An interview with Congressman Henry T. Rainey of Illinois, majority leader of the House and ranking member of the powerful Ways and Means Committee, resulted in President Smith securing a hearing before this Committee then considering the relief bill.

On May 31 Mr. Smith made his first appearance before the Ways and Means Committee in which he urged that a provision be placed in the measure authorizing and directing the Reconstruction Finance Corporation to finance the disposal of farm crop surpluses so as to remove their continuing depressing effect on farm prices.

In his testimony, all of which was reproduced in the Congressional Record, Mr. Smith insisted that the first essential in getting the country back on the road to prosperity was to take such action as would immediately result in raising farm price levels so as to restore farm buying

(*Continued on next page*)

LETTER TO SECRETARY HYDE

Hon. Arthur M. Hyde,
Secretary of Agriculture,
Washington, D. C.

Dear Mr. Hyde:

Before leaving for home, where I expect to remain for about ten days in semi-retirement, at least, I am taking the liberty of addressing a few lines to you relative to the farm situation as I see it.

It is my most sincere conviction that everything possible should be done, and done immediately, to take full advantage of authorizations contained in the recent amendment to the Reconstruction Finance Corporation Act relative to the disposal of surpluses of agricultural commodities. I feel sure that paragraph (c), (d) and the last sentence of paragraph (f), taken together and properly interpreted, make it possible to dispose of not only accumulated, but recurring surpluses of agricultural commodities. I am equally sure that the disposal of these surpluses and public knowledge of such accomplishments should result in the immediate improvement of price levels of farm commodities.

I have personally witnessed great encouragement on the part of livestock farmers as a result of the recent improvement in hog and cattle prices. If these increases can be maintained with possibly some further improvement in hog prices, and in addition, if there could be secured substantial improvement in the price of wheat and corn, the reaction of farmers would be manifest throughout the business structure of the middle-west and should react to the betterment of all lines of industry.

While I am keenly disappointed in the failure of the emergency legislation, such as contained in the Norbeck-Rainey measures; yet, I am hopeful that if energetically and courageously administered and every effort put forth immediately to do so, the authorizations contained in the above referred to amendment should, in a large measure, result in what was hoped for in the more definite price-raising bill.

I, of course, recognize that the provisions authorizing the disposal of surpluses are very much more simple from an administrative viewpoint; and in making the above request for immediate action, I want to assure you of my willingness and desire to co-operate in every possible way to bring about proper results, and also the full co-operation of not only the institution, but the people whom I have the honor to represent.

Again assuring you of my continued high personal regards, I beg to remain,

Sincerely yours,

ILLINOIS AGRICULTURAL ASSOCIATION,
(Signed) Earl C. Smith, President.

power. He told the congressmen that 50 per cent of the buying power of America is directly dependent upon farm income, that only through such restoration of buying power could factories resume normal operations.

While the provision requested by the Illinois Agricultural Association was placed in the bill through the efforts of Congressman Rainey, and reported out of the House Ways and Means Committee, it was seriously amended and its effectiveness restricted during consideration on the floor of the House.

A similar provision which was included in the Wagner bill in the Senate was similarly amended on the floor of the Senate.

But when the relief bill came up for consideration in conference committee representing both House and Senate, the provision directing immediate disposition of farm surpluses was restored through the efforts of Congressman Rainey and Senator Norbeck, respective leaders from the House and Senate on this committee.

The relief bill then went back to each House where it was passed and sent to the White House.

Vetoes Bill

On July 11, President Hoover vetoed the measure on the ground that the bill provided for loans to private corporations and individuals.

Two days later a new relief measure meeting all the requirements of the President was introduced, again including full authorization for loans for the disposal of farm crop surpluses as originally requested by the Illinois Agricultural Association and the American Farm Bureau Federation.

This revised bill was finally passed by Congress on July 16 and was signed by the President.

The sections of chief interest to agriculture are Section C and Section D under Title II—Loans by Reconstruction Finance Corporation. These sections are as follows:—

(c) *In order that the surpluses of agricultural products may not have a depressing effect upon current prices of such products, the corporation is authorized and directed to make loans, in such amounts as may in its judgment be necessary, for the purpose of financing sales of such surpluses in the markets of foreign countries in which such sales can not be financed in the normal course of commerce; but no such sales shall be financed by the corporation if, in its judgment, such sales will affect adversely the world markets for such products.*

(d) *The Reconstruction Finance Corporation is authorized and empowered to make loans to bona fide financing institutions, organized under the laws of any State or of the United States and having resources adequate for their undertakings, for the purpose of enabling them to finance the carrying and orderly marketing of agricultural commodities and livestock produced in the United States.*

Rainey And Norbeck

These provisions were consistently protected during all the deliberations on the measure by Congressman Rainey and Senator Norbeck whose earnest efforts and watchfulness prove them to be real leaders for and friends of the farmers of America.

President Smith had been assured that the surplus disposal provision would have the approval of the administration, particularly of Secretary of Agriculture Hyde and Chairman Stone of the Farm Board.

An interpretation of the far-reaching possibilities of the surplus disposal provision for improving farm prices if aggressively and courageously administered was given by Mr. Smith in a radio address from Station WLS Chicago on July 21, in which he said:—

Authorization Given

"Careful study of this provision undoubtedly reveals that without any restriction, there is full authorization given—first, for financing sales of agricultural surpluses in the markets of foreign countries in which such sales cannot be financed in the normal course of commerce; second, to provide loans to bona fide institutions for the purpose of enabling them to finance the carrying and orderly marketing of agricultural commodities and live stock. These provisions have received very little publicity. Had much publicity been given, no doubt, certain of the interests opposed to the improvement of farm prices would have immediately and possibly successfully thwarted the efforts that were being made.

"All who believe that the immediate disposal of accumulated surpluses of farm commodities is essential to the improvement of farm prices will be glad to know that the first mentioned provision not only authorizes but directs action be taken to bring this about.

Meets Problem

"It is generally recognized that one of the chief reasons for the failure of farm prices to improve has been the inadequacy of credit facilities to finance processors in being able to carry processed commodities in storage or otherwise. The second provision meets this problem. For instance, one of the reasons given for the extremely low price of hogs during recent months was that the market for lard had been greatly restricted, particularly the export outlet. Second, that packers were not adequately financed to carry the lard in storage. The provision just referred to would meet a situation of this kind in two ways—either to finance the carrying of the lard until a normal demand was restored or to finance the sale to a foreign government of the excess accumulation of lard.

"It should also be noted that these provisions are not confined to accumulated surpluses, but also obtain as to recurring surpluses. There is a substantial school of thought in both congressional and administration circles, which believes that the amendment I am referring to should result in the immediate and substantial general improvement of farm commodity price levels. While I do not personally believe that the same results can be expected or obtained as would have resulted from the enactment of the Rainey-Norbeck measure; yet, I do not hesitate to say that if aggressively, courageously and immediately administered, farm price levels should respond to a substantial degree.

Predict $1 Wheat

"It is interesting to note that although the bill finally passed Congress on July 16, a Washington newspaper of Monday, July 18 carried in its headlines a prediction of $1.00 wheat by September. Senator Norbeck, to whom I have previously referred, is quoted as saying that he believes an increase of 25 cents a bushel is a possibility in the early future.

"I do not believe anyone can accurately predict as to the future. Too many elements are at the present time operating to disturb the economic equilibrium of the Nation. I have no hesitancy in saying, however, that the complete disposition or removal from our domestic markets of the surpluses that have been accumulating during the past two and one-half years should be most helpful in bringing about gradual, but substantial increase in farm commodity price levels.

Getting Wise

"Of one thing we can be sure, it is fast becoming generally recognized and accepted that the restoration of normal and prosperous conditions in agriculture must be realized before there can be any substantial or permanent improvement in any line of industry in the United States. The agricultural problem is receiving far more at-

(*Continued page 5 col. 3*)

Brief Story Of The Rainey-Norbeck Bill

Rules Committee, Speaker Garner, and Reactionary Senators Defeat It

WHILE in Washington early in May conferring with the leaders in Congress regarding measures for the relief of agriculture, Congressman Rainey requested President Smith to undertake the preparation of emergency agricultural legislation having for its purpose the immediate increase in prices of basic farm commodities so as to improve the income of the American farmer.

On his return to Chicago, Mr. Smith called into conference other officers and staff members of the Association, C. V. Gregory, editor of Prairie Farmer, M. L. Wilson of Montana, a recognized agricultural economist, and a number of business leaders and executives.

Undivided Attention

Undivided attention was given to the preparation of this legislation. After the principles of the legislation had been generally agreed upon, Mr. Fred Lee of Washington, an authority on constitutional law and legislative drafting, was retained to write these principles into a bill. This was done and the bill was delivered to Congressman Rainey on June 13. On June 15 Mr. Rainey introduced it in the House where it was referred to the Committee on Agriculture.

In its deliberations the Committee on Agriculture was practically unanimous in asserting that the measure would have the desired effect in raising the prices of wheat, hogs, and cotton, yet insisted upon including many other agricultural commodities which made it impossible of operation.

Recognizing the impossibility of getting the Rainey bill out of the Committee on Agriculture in the House without serious amendment, the bill was introduced in the Senate on June 28 by Senator Norbeck of South Dakota. On July 1 the Senate Committee on Agriculture reported it out with favorable recommendation, and on July 13 the bill passed the Senate without a record vote.

Favorable Consideration

On its passage, the Norbeck bill was messaged to the House and on receipt was immediately referred to the Committee on Agriculture where it received prompt and favorable consideration, being reported out unchanged by a vote of 9 to 4. Congressman Rainey, who had the whole-hearted support of the entire downstate Illinois delegation in Congress as well as influential representatives from other states, then worked energetically for immediate consideration on the floor of the House.

Under the Rules of the House, no bill can be brought up unless a rule for its consideration is obtained from the powerful Rules Committee. In getting a rule for consideration of the Rainey-Norbeck bill in the House, sponsors of the measure met with difficulty.

Seek To Recall Bill

In the meantime, a situation had arisen over in the Senate which threatened the life of the bill. Reactionary sentiment from the East led by Senator Bingham of Connecticut, on July 14, sought to recall the Norbeck bill from the House and move for a reconsideration. This was a parliamentary effort to destroy the measure, at least for the current session of Congress. But this effort was temporarily blocked when Senator Norris of Nebraska, a valiant supporter of the measure, gained the floor and maintained it throughout the day to give time for ample consideration in the House.

While Senator Norris' filibuster was underway in the Senate, members of Congress, both Republicans and Democrats, went repeatedly to Speaker of the House Garner and the Rules Committee urging them to allow immediate consideration of the bill. All of these efforts failed.

Norris Yields

Since nothing more could be done to secure consideration of the bill by the House word was sent over to the Senate that it was useless to continue the filibuster. Thereupon Senator Norris yielded the floor and Senator Bingham was recognized. His motion to recall the Norbeck bill from the House and recommit it to the Committee on Agriculture where it now rests, prevailed 30 to 25. The vote on this measure follows. All those who voted "yea" were against the bill, all those who opposed Bingham's motion were for the bill.

Responsibility for the defeat of the Rainey-Norbeck emergency price-raising measure which would have brought about immediate increases in the price of wheat, hogs and cotton, and indirectly other agricultural commodities, rests with Speaker Garner and the Rules Committee of the House for their inaction, and with the reactionary interests in the Senate who insisted on the bill's recall and recommitment.

Bill Widens Farm Credit

Senate bill 2409 to widen the powers of Federal Intermediate Credit banks and give them greater latitude in financing farmers recently went to President Hoover for approval.

The measure would authorize Federal Intermediate Credit Banks to accept drafts drawn on them by co-operative marketing associations and would permit rediscount by Federal Reserve banks of notes discounted by such banks.

STILL HOPE FOR HIGHER PRICES

(*Continued from page* 4)

tention on the part of outstanding business men and executives in all walks of life than at any previous time. Certainly we still have in America the ingenuity of thought, the determination and willingness of effort, the brains and the statesmanship that should when coupled together result in an early agreement upon and the putting into effect of such a permanent agricultural policy as is necessary to assure the future prosperity of the corner-stone of the Nation — its AGRICULTURE."

J. E. Mummert, our president who was seriously injured in an automobile accident, is making satisfactory recovery, writes J. E. Watt, farm adviser Fulton county. It will be several weeks before he is able to walk.

Watch For Hoover And Roosevelt Farm Pledges

I. A. A. To Withhold Comment On Planks Until Presidential Nominees Have Spoken

COMMENTS by the Illinois Agricultural Association on the Republican and Democratic party platform pledges to agriculture will be withheld pending such time as the presidential candidates in future addresses place their individual interpretations upon the party commitments.

Experience has proved, said President Earl Smith in a recent statement, that party platforms and pledges amount to little except to the extent presidential nominees publicly interpret and define the planks, and upon such interpretation make their personal pledges for action if and when elected.

A. F. B. F. Statement

A formal statement issued by the American Farm Bureau Federation concerning the agricultural planks in the platforms of the two major parties declares that both platforms "include in part some of the features of the program of organized agriculture, but both platforms fall short of covering the entire program.

"The American Farm Bureau Federation is awaiting with interest the interpretations of these platforms which will be made by the respective major candidates," the statement continues. "This interpretation, it is felt, will be more significant than the phraseology of the platforms themselves.

"President Earl C. Smith of the I. A. A. took a leading part in the activities of the A. F. B. F. committee which presented a suggestive agricultural plank to the Resolutions Committees of the two parties at their conventions in Chicago in June. Mr. Smith was quoted widely in the national press for his plea on behalf of the farmer before the platform builders.

Suggested Plank

"The suggested farm plank drafted by the national leaders of the Farm Bureau organization included the following topics: means for disposal of accumulated surpluses; emergency measures to effect immediate improvement in price levels; amendment of the Agricultural Marketing Act to include the equalization fee; tariff protection for agricultural products; stabilization of the value of the dollar; development of agricultural credit facilities; governmental economy.

"The Republican party pledged its support to the principle of assistance to farmer-owned and controlled co-operative marketing associations and to prompt amendment or modification of the Agricultural Marketing Act as experience may show to be necessary to fully carry out the preamble of the acts. It pledged tariff protection to agriculture, relief from unjust tax burdens and formulation of a national land utilization program.

Democrats Advocate

"The Democratic party platform advocates better financing of farm mortgages; extension and development of the co-operative marketing movement; effective control of crop surpluses to give the farmer full benefit of the domestic market; enactment of measures to aid the farmer in getting commodity prices in excess of cost of production. The platform condemns the Hawley-Smoot tariff act of 1930.

"President E. A. O'Neal of the A. F. B. F. has been especially caustic in his criticism of the conventions for their failure to discuss the great economic problems before the nation. He has pointed out that even in the delegations from the great agricultural states there were none who would fight on the floor of the convention for the cause of the farmer.

"Speech after speech was made on other subjects," Mr. O'Neal said, in an address on July 4, "but not a single voice was heard telling the parties of the actual condition and needs of the 50,000,000 people directly dependent on agriculture."

Republican Party Pledge

THE Republican party pledges itself to the principle of assistance to co-operative marketing associations, owned and controlled by the farmers themselves, through the provisions of the Agricultural Marketing Act, which will be promptly amended or modified as experience shows to be necessary to accomplish the objects set forth in the preamble of that act.

"The party pledges itself to make such revision of tariff schedules as economic changes require to maintain the parity of protection to agriculture with other industry.

"The American farmer is entitled not only to tariff schedules on his products but to protection from substitutes therefor.

"We will support any plan which will help to balance production against demand and thereby raise agricultural prices, provided it is economically sound and administratively workable without burdensome bureaucracy....

"The time has come for a reconsideration of our tax systems—federal, state, and local—with a view to developing a better coordination, reducing duplication, and relieving unjust burdens. The Republican Party pledges itself to this end....

"We favor a national policy of land utilization which looks to national needs. Such a policy must foster reorganization of taxing units in areas beset by tax delinquency, and divert lands that are submarginal for crop production to other uses. The national welfare can be served by the acquisition of lands for watershed protection, grazing, forestry, public parks and game preserves. We favor such acquisition."

Democratic Party Pledge

THE Democratic party solemnly promises by appropriate action to put into effect the principles, policies and reforms herein advocated, and to eradicate the policies, methods and practices herein condemned....

"We advocate:

"For the restoration of agriculture, the nation's basic industry, better financing of farm mortgages through reorganized farm bank agencies at low rates of interest, on an amortization plan, giving preference to credits for the redemption of farms and homes sold under foreclosure; extension and development of the farm cooperative movement and effective control of crop surpluses so that our farmers may have the full benefit of the domestic market.

"Enactment of every constitutional measure that will aid the farmer to receive for basic farm commodities prices in excess of cost."

Lower Rates To Farm Co-ops Now In Effect

Passage of Norbeck-Steagall Bill Reduces Interest From 4½ to 3½ Per Cent At St. Louis Credit Bank

Substantial reductions in the rate of interest on all new loans to financing institutions and farmers' co-operative marketing organizations have been put into effect by election of the twelve Federal Intermediate Credit banks. This action followed passage by Congress of the *Norbeck-Steagall bill* making debentures of the Intermediate Credit Banks eligible for note-issue and 15-day loans. The bill, which embodies principles advocated by the American Farm Bureau Federation, was signed by President Hoover May 20 and the new scale of rates went into effect less than a month later, on June 15. The reductions range from 1½ per cent at the St. Paul bank, to ¾ of one per cent at Houston and with the St. Louis bank, which serves Illinois farmers, lowering its rate one per cent, or from 4½ to 3½ per cent.

Previously the banks had been at a disadvantage in the market with other securities which were eligible for note-issue and 15-day loans. Member banks in the federal reserve system had in the past been unwilling to take intermediate credit debentures at the same rate of interest as other securities because the debentures would not have this privilege. By placing the debentures on the same footing, which is provided by the Norbeck-Steagall bill, they are now able to get the same low rate of interest that other securities obtain.

The American Farm Bureau Federation's Washington office urged approval of the bill in hearings before the Senate and House Banking and Currency committees, in compliance with a resolution endorsed by delegates to the national Farm Bureau convention last winter. This resolution was based on recommendations made by the National Committee on Rural Credits after a survey and study of agricultural credit problems. R. A. Cowles, treasurer of the Illinois Agricultural Association, was a member of this national committee.

More counterfeit money is in circulation now than at any time within his memory, says W. H. Moran, chief of the U. S. Secret Service.

In the fiscal year 1931, 1,534 persons were arrested and $391,957 in counterfeit notes were destroyed by the Secret Service.

Roosevelt Said—

In his acceptance speech before the National Democratic Convention in Chicago July 1, Franklin D. Roosevelt, presidential nominee, spoke at length on the agricultural problem. While discussing the unemployment question he advocated a plan for converting many millions of acres of marginal and unused land into timber land through reforestation. "There are tens of millions of acres east of the Mississippi river alone in abandoned farms, in cut-over land, now growing up in worthless brush," he said. "Every European nation has a definite land policy and has had one for generations. We have not. Having none we face a future of soil erosion and timber famine. . . .

"In so doing, employment can be given to a million men. That is the kind of public work that is self-sustaining—therefore capable of being financed by the issuance of bonds made secure by the growth of tremendous timber crops. I have a definite program of providing employment by that means. I have done it, and am doing it today in the State of New York. . . . The practical way to help the farmer is to do something toward the reduction of the surpluses of staple commodities that hang on the market. It should be our aim to add to the world prices of staple products the amount of a reasonable tariff protection, give agriculture the same protection that industry has today.

"Final voluntary reduction of surplus is a part of our objective, but the long continuance and the present burden of existing surpluses make it necessary to repair great damage of the present by immediate emergency measures. . . .

"And as to the actual wording of the bill, I believe that the Democratic party stands ready to be guided by whatever the responsible farm groups themselves agree upon. That is a principle that is sound.

"One half of our population, over 50,000,000 people, are depending on agriculture, and my friends, if those 50,000,000 people have no money, no cash to buy what is produced in the city, the city suffers to an equal or greater extent. . . .

"Rediscounting of farm mortgages under salutary restrictions must be expanded, and should, in the future, be conditioned on the reduction of interest rates. Amortization payments, maturities, should likewise in this crisis be extended before rediscount is permitted where the mortgagor is sorely pressed. The tax burden caused by expansion and inefficient local government is an additional factor. . . . Our most immediate concern should be to reduce the interest burden on these mortgages." Further statements of presidential nominees on the problems of agriculture will be carried in future issues of the RECORD.

Insurance Men Sign 1100 New Members

"Following their usual methods, Country Life insurance men went over the top in the 4th of July membership campaign with reported Farm Bureau memberships totaling 1100," says L. A. Williams, manager. "Headliners like George Dickson of Kendall county, Wm. Linker of Whiteside county, Ben Roth of Livingston county, all produced over 20 members. Insurance agents in Livingston county wrote a total of 49, Peoria county 24, Ford county 24, Rock Island county 35, Schuyler county 19, Carroll county 44, etc.

"General agents in many instances wrote the members and gave credit to their men. Others went out to win watches. More than 30 watches were counted at the sectional meetings. It was to be expected that the men who have been active in Farm Bureau work and active in selling work would cooperate in putting over a gigantic program throughout the state of Illinois. Our general agents from Pope-Hardin to JoDaviess counties, throughout the length and breadth of the State jumped in and did marvelous work.

"Our leading producer of the year, Glen Kaufman, who sold 26 applications on one special day for Country Life, is also flashing a new Waltham watch for his Farm Bureau effort, which proves the statement which I make that the man who sells life insurance finds selling membership a very simple task. Ten of our men will be very glad to challenge ten men from any other subsidiary of the I. A. A. in any one month's race for Farm Bureau membership, naming any prize which would be agreeable to the accepting party, the losers to purchase the prize. Think that one over."

Country Life Insurance Co. announces that it wrote more life insurance in July, 1932 than in July, 1931.

The Reconstruction Finance Corporation recently loaned the Baltimore and Ohio railroad $25,500,000, the largest single loan approved by the Interstate Commerce Commission.

Cement prices were advanced recently by several of the larger manufacturers.

The farm price index advanced 5 points from June 15 to July 15.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Higher Farm Prices

WHILE the Rainey-Norbeck bill was defeated in the recent session of Congress, efforts of organized farmers to secure action designed to raise farm prices met with a measure of success. The agricultural provisions, sections C and D, of the relief bill amending the Reconstruction Finance Corporation Act, now enacted into law, have promise of bringing about substantial recovery. Everything now depends on the vigor and sincerity with which these provisions are administered.

The corporation is authorized and directed to dispose of surplus farm products in the markets of foreign countries in which such sales can not be financed in the normal course of commerce. It is empowered to extend credit to domestic millers, packers, and other processors to enable them to finance the carrying and orderly marketing of agricultural commodities and livestock produced in this country.

There is nothing in these provisions to restrict their application to present surpluses of farm commodities. They apply also to future surpluses. They aim to correct one of the chief reasons for low prices, namely, restricted credit on the part of big buyers of farm crops who process and hold in storage for future sale.

The opportunity to start farm prices on the upward grade is apparent. Will those charged with responsibility take advantage of it?

The Facts In the Case

THE Grain Futures Commission composed of the Secretary of Agriculture, Secretary of Commerce, and Attorney General—all members of President Hoover's cabinet—recently said to the Chicago Board of Trade "give the grain producers and their co-operative equal privileges on the Chicago exchange or be suspended for 60 days."

Peter Carey, president of the Board of Trade, replied that the organized middlemen will fight to the last ditch to bar the farmer-owned and farmer-controlled Farmers National Grain Corporation from enjoying the full privileges of this terminal market.

The controversy will presently be transferred to the U. S. Circuit Court of Appeals, and eventually to the Supreme Court for a final decision.

The action taken by the Commission is authorized in Section 6 of the Grain Futures Act of 1922 which provides (Section 5) that *"The Secretary of Agriculture is hereby authorized and directed to designate any board of trade as a 'contract market' when, and only when, such board of trade complies with and carries out the following conditions and requirements*:

> (e) "When the governing board thereof does not exclude from membership in, and all privileges on, such board of trade, any duly authorized representative of any lawfully formed and conducted co-operative association of producers having adequate financial responsibility which is engaged in cash grain business, if such association has complied, and agrees to comply, with such terms and conditions as are or may be imposed lawfully on other members of such board: Provided, That no rule of a contract market shall forbid or be construed to forbid the return on a patronage basis by such co-operative association to its bona fide members of moneys collected in excess of the expense of conducting the business of such association."

Greed and selfishness are the primary motives of the middlemen in their war against farmers who would better themselves as thousands already have done through organized co-operative selling. The "trade" believes like the kings of old that it has a divine right to collect toll from the farmer's grain; that the farmer must not do this for himself even if he will.

The present controversy as Mr. C. E. Huff, president of the Farmers' National, points out, is reminiscent of the fight waged against co-operative farmers' elevators 30 years ago. "Let it be recalled," said Mr. Huff, "that when the first farmers' elevators were organized, not a bushel of grain forwarded to market by them would be accepted or handled by members of grain exchanges unless the sale was authorized by the local co-operative elevator making the shipment, to be made in the name of a local private grain dealer (their competitor) and for his account and with a commission deduction for his benefit.

"They then thought that even local co-operatives were wrong. It required special action on the part of the federal government, the active interest of

the then President of the United States, and of the Attorney General; to secure for farmers' elevators their initial right to have their grain sold by members of most grain exchanges at regular commission rates.

"The issue today is not with regard to the Federal Farm Board nor to the government in business, but has to do solely with the development of large scale co-operatives, which are putting the American farmer in control of his commodities in the market places to enable him to retain for himself those final values which heretofore have passed to others in the form of commissions, discounts and so on.

"The early opposition to the co-operative movement was hardly more ridiculous than that of the present, and yet, looking backward, the utter unreasonableness of it is more completely apparent. The passing of time will reveal the folly of the present opposition."

Value of the Farm Bureau

A news dispatch which came over the wires June 1 announced that Earl C. Smith, president of the Illinois Agricultural Association, had been in conference that day at the White House with President Hoover concerning proposed surplus control legislation now before Congress.

That brief item should have been a source of much satisfaction to every member of the Madison County Farm Bureau, and of every other Farm Bureau in the state.

Their personal representative in the White House! Talking over matters of legislation of vital importance to every farmer! How different from the old days, when the farmer, of all groups, was unorganized and without voice in the legislative halls and executive offices of the nation.

It is most fitting that the question of the value of the Farm Bureau be discussed at this time in Madison County. Many of the bureau memberships are expiring this summer. What the members themselves think of the bureau will be shown by their renewals. The Intelligencer hopes and believes that every expiring membership will be renewed. That this belief is justified may be seen from the fact that only last week 27 new members were taken into the organization. . . .

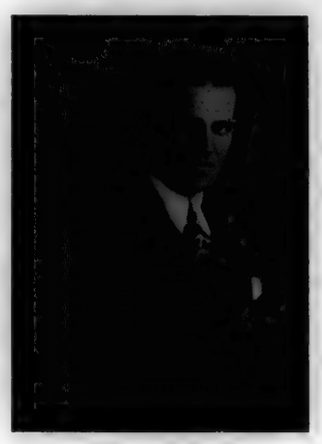
The Madison County Farm Bureau has materially increased its value to its members in the last year or two. Every department has been strengthened and additional services have been instituted which have proven highly popular with and profitable to the members.

The Intelligencer would like to see the Madison County Farm Bureau membership greatly increased. That would strengthen the organization. Its power to benefit the farm would be infinitely greater.

Last of the great productive units to take up organization, the farmer is now making up for lost time. The value of organization constantly becomes more apparent. And as it does the strength of the farmer associations grows.

The farmer has often been termed the greatest of individualists. He still is. He has complete control over his crops, their rotation, variety, etc. The desirability of this individualism has been put forth by enemies of Farm Bureaus as a reason the farmer should not join them. As a matter of fact, they in no way affect his individualism. He is his own boss just as much now as he ever was.

In fact, he has greater control over his own affairs. In times past he was almost completely under domination of the middleman or the speculator. He took their price for his products or he could not sell. Organization is changing that. The farmers' co-operative marketing organizations have attained such power and influence that only the broader laws of supply and demand now affect his prices. The whims of the speculator no longer affect him.



The organized farmer has been a powerful influence in legislative matters in the last several years. His voice, through his organizations, will grow in strength. If the Farm Bureaus throughout the nation are given the support they desire the time will soon come when the farmer will find himself on an economic parity with the manufacturer, the wholesaler and the retailer, all of whom have been organized efficiently for many years.

Farmers of Madison County may speed the arrival of that time by associating themselves with the Madison County Farm Bureau. Every person a member should renew that membership and get as many of his neighbors on the roster as possible. He will thus be given additional protection to his own interests and those of his friends.—Edwardsville (Ill.) Intelligencer.

Service Company Men Sign 712

The Illinois Farm Supply Company sales force is responsible for more than 22% of the new Farm Bureau members enrolled during the special statewide campaign, reports L. R. Marchant, manager. C. W. Ward, field sales director, was active in working with service company men to make this showing.

Forty-four of the 52 associated county service companies reported 712 new members. Thirty-six managers and 154 truck salesmen demonstrated their ability to sell something besides oil and grease by signing one member or more. Nine of the managers and 21 of the truck salesmen signed ten or more each.

M. COMISKY

LaSalle County Farm Supply Company leads with Manager Comisky and his eleven salesmen signing 87 members; Carroll Service Company scored second with 59 members signed by Manager Rahn and five salesmen; Macoupin Service Company was third with Manager Rodman and six salesmen signing 40; Manager Curtiss of McLean County Service Company and his fifteen salesmen ranked fourth with 34 members.

Manager Ludwig of Woodford County Service Company signed 15 members; Manager Rahn of Carroll Service Company 12 members; Manager Stewart of Champaign County Service Company 11 members; Manager Whitebread of Lee County Service Company 11 members; and the following managers are credited with 10 each: Rodman of Macoupin, Campbell of Livingston, Comisky of LaSalle, Wilkins of Fruit Belt, Winkleblack of Coles and Curtiss of McLean.

Among the salesmen on the Honor Roll with 10 members or more are: LaSalle County—Edward Geil, Lyle Albert, Roy Rees, Wm. Morrison, Sigurd Eike, and Don S. Bastian; Carroll County—C. P. Boddiger, Fred Nesemeier, Edwin Miller, Harold Frey; Ford County—Severt Hill; Henry County—Walter Putnam; Knox County—John Cisco; Logan-Mason Counties—Adolph Keith; Macoupin County—Ernest Costley, Keith Mitchell; Marshall-Putnam County—Clarence Austin; Monroe County—Alvin Prange; Richland-Lawrence Counties—H. D. Lewis; St. Clair County—Laclede Holcomb; McLean County—two salesmen.

Ford County Goes Over Top With Big Celebration

Nearly 5,000 people from all parts of the county gathered at Paxton July 4th to help in the celebration and demonstration. The parade consisted of 400 cars, at least 2,000 people, numerous floats, and three bands. Not more than a third of those in attendance could find room in the capacious pavilion during the program, and the park itself was filled to overflowing all afternoon.

The success of this celebration was due not only to the efforts of Farm Bureau members, but also to support given by civic organizations of both Gibson City and Paxton, and by the American Legion of Ford county. Prairie Post, American Legion, of Paxton, furnished a color guard to head the parade.

Bands from Paxton, Roberts and Gibson City supplied music. The parade required 50 minutes to pass. Floats and trucks carried slogans such as "Taxes Must Come Down," "Keep the Dinner Bell Ringing in America," "You Can't Have Prosperity Without Prosperous Farmers," "Restore the Farmer's Buying Power and the Factories Will Hum," "Give us a Price and We Will Buy the Nation Back to Prosperity."

A. B. Schofield, president of the Farm Bureau, who gave a most inspiring address, introduced the speaker of the day, Phil Evans of the Chicago Producers.

W. F. Purnell, farm adviser, reported that a quota of 90 new members had been assigned to Ford county, that 88 new members had been reported by the "Minute Men" of the county, and that it was expected that the full quota would be obtained. The previous membership in the Ford County Farm Bureau was 670. The addition of the quota will bring the membership up to 760.

Prayer Offered At Dedication Programs

This prayer, written by the famous minister, Dr. John Holland of St. Paul, was given from most of the platforms throughout Illinois at the beginning of Dedication Day Programs.

"Our Father in Heaven and upon Earth; we come before Thee with strangely conflicting emotions. Our human wisdom seems to have failed us. Our dreams of justice and fair play seem to be broken in our hearts. Wars, greed, duplicity, and selfishness have broken our economic balance and upset our mental and spiritual poise.

"Hunger co-exists with plenty, men tramp our country for work, and women and children cry for bread. We are not sufficient for these things, and we turn with our whole hearts to Thee.

"We pray for our President that he may be divinely led to think both of the lowly and the mighty. May those servants of the people elected to positions of public trust, legislate for the welfare of the whole people.

"We pray that our government may be so guided in equity that bloody revolution may not march down our streets. Bless, we pray Thee the millions of farmers, and the toilers whose labor brings them an inadequate livelihood, but bless especially those, who, in this land of plenty are denied the chance to work.

"Help us as a people facing discouragement, uncertainty, and lead us to think, pray, and act as one people that justice may be guaranteed to farmer and laborer alike.

"We pray in the name of the Carpenter of Nazareth that workers may not, through our blundering states-craft be reduced to slaves. We pray in the name of Him whose feet walked through the fields of wheat that growers of grain and food may not be forced into servitude to those who control the affairs of state. In Christ's name we pray for a spiritual sense of the economic values of life which shall make us a people think and act in the fraternity of true brotherhood.

"Bless these troubled but undiscouraged and unsurrendering hosts who march this day in the hope of a better day to come. Endow them with patience, guide them in true charity, and strengthen their hearts to persist until they prevail in their faith for the righting of their economic wrongs.

"We ask these things in the Name of the Savior of Men. Amen."

Two Mile Parade Features Jo Daviess Celebration

"The Farmers Dinner Bell is the Liberty Bell of 1932, Keep it Ringing" was the slogan uppermost in the minds of 5,000 farmers and townspeople who gathered in Elizabeth on July 4th to impress on all people that the return to prosperity can be brought about by restoring the farmer's buying power.

The most impressive feature of Dedication Day was the two-mile parade, including 400 cars and floats. Some of the more elaborately decorated floats represented "The Farmers Dinner Bell," "Co-operation Will Win," "4-H Clubs," "Unit Organization," "48 States," etc.

An old horse-drawn hearse carrying the effigy of "Old Man Depression" drew many comments from the crowd. Old Man Depression was later buried with due ceremony on the park grounds. "Dick" Tapley as George Washington headed the parade, followed by Elizabeth band and a squad of soldiers from the

Rock Island County Crowd Estimated at 10,000-15,000

Moline, July 4:—Between 10,000 and 15,000 farmers, members of their families and residents of the quad-cities and nearby communities joined in a celebration July 4 at Prospect Park here today.

The celebration was part of a state-wide campaign to help restore the economic independence of agriculture and at the same time to start the ball rolling for the return of prosperity in the nation.

The parade which began at 11:15 A. M. from Fifteenth street and Sixteenth avenue, Moline, to Prospect Park, included three elaborate floats entered by the Farm Bureau under the direction of C. V. Golden of Coe township, chairman of the parade committee. One, a 4-H club float, was prepared by Rural township members, a taxation float was entered by Bowling and Edgington township residents, while the dinner bell float was the Coe township entry.

More than 200 automobiles were in the parade, the Tri-City brass band, seven horses, Sons of Union Veterans, members of 4-H clubs, Moline Eagles drum and bugle corps, prize wagon, decorated cars, Salvation Army band and floats of Rock Island and Moline stores and business concerns.

The highlight of the afternoon program was an address by Rev. Loyal M. Thompson, pastor of the First Methodist church of Monmouth. He made a stirring plea for agricultural relief. Ben H. Bollman, Farm Bureau president, presided, and Mayor John F. Huey of Moline welcomed the visitors with a brief talk. Others who gave short talks were John R. Spencer, W. H. Moody, and Robert Quick. Rev. Williams, pastor of the Broadway Presbyterian church, Rock Island, gave the opening prayer.

Shortly after the talks were concluded the crowd witnessed the burning in effigy of "Old Man Indifference," and "Unfaithful Public Servants."

The Farm Bureau prizes were awarded as follows: farm wagon, R. W. Wilson, Bowling township; chest of silver, Raymond Reed, Buffalo Prairie township; bicycle, Ralph Keller, Drury township, and set of eight goblets, William G. Mueller, Prairie township.

Eight acts of vaudeville were presented in the evening. G. L. Smith signed ten new members to win a radio for his car. Sixty new members were reported on July 6.

Savanna Proving Grounds. These were followed by floats and cars.

More than 1,000 cars were parked on the main and side streets of Elizabeth, filled with people who came to see the parade.

Fred Kammiller of Dubuque, farmer and speaker of wide repute, spoke on farm problems, followed by R. A. Cowles, treasurer of the I. A. A. who talked on policies of the state organization with emphasis on legislation which the I. A. A. is endeavoring to secure for the benefit of agriculture in the present congressional session.

Thos. Youngbluth of Rush township was the lucky winner of the farm wagon, Donald Krug of Massbach won the bicycle, Mrs. Joe Budden of Menominee township received a fine set of silverware, and Mrs. Ross Pierce of Stockton the beautiful set of glassware.

The best float prizes were awarded to the Ladies Patriotic Circle, 1st; 4-H Club, 2nd; for unusual floats. Joe Armitage horse drawn hearse with "Old Man Depression." Henry Droegmiller, 2nd.

Of a total of $17,000,000 of farm loans in 17 states for 1930, 38 per cent called for payments on the principal each year of the loan, eight per cent for one or more payments, and six per cent for amortization. Forty-eight per cent were straight loans payable at the end of the term, whereas 90 per cent of the business reported for the preceding year in 10 states was for straight term loans.

Open Season On Ducks

The open season on wild ducks and geese has been set at two months for the coming fall. The earliest open season in any state will be October 1 and the latest opening date October 16 with the exception of Florida where it will be November 20. In Illinois the new open season for ducks and geese is October 16 to December 15.

Farm Hand: "I'm kinda expectin' you to raise my wages next week, boss."

Farmer: "Well, I always have raised them every week an' I guess I can do it next week."

Consumption of meat has been stimulated very noticeably as a result of low prices.

Shipping Associations Put Out of Business

I. A. A. Conference at Shelbyville Discusses Problems

SURVEYING the development of co-operative livestock marketing before Farm Bureau leaders attending the recent district conference of the Illinois Agricultural Association at Shelbyville, R. W. Grieser, sales manager of the Illinois Livestock Marketing Association, told how the local shipping association put the country buyer out of business and how about five or six years ago the packer buyer came in again and with the truck put the shipping association out of business.

He explained that the passing of the local shipping associations made necessary the establishment of new marketing machinery and resulted in the organization of the Illinois Livestock Marketing Association, an organization whose purpose is to seek the best outlet for all units of livestock with the idea of raising the general price level.

Last year, he said, 23 to 24 per cent of the hogs in Illinois went direct to packers. Hard roads and trucks were another factor in doing away with the shipping association. To meet this condition, concentration points were established. The Illinois Livestock Marketing Association is returning to the producer 17 cents per hundred pounds more for hogs than he could get without the organization, Grieser said. Seven cents of this is accounted for in freight, and 10 cents in selectivity of markets.

C. J. Gross, director of the I. A. A. from the 19th congressional district, presided at the meeting, and Farm Adviser J. H. Hughes of Moultrie county acted as secretary.

Among other speakers were L. B. Hornbeek and A. B. Culp, district organization managers of the I. A. A. Mr. Hornbeek spoke on "Organization Morale" and Mr. Culp's subject was "The Marketing Act and the Equalization Fee."

After a discussion of legislation on hard roads and waterways, it was decided to refer the matter to the state association in order that a more comprehensive study might be made. Upon the invitation of Farm Adviser Glenn Hoover of Douglas county, it was decided to hold the next meeting at Tuscola.

Twenty-three states now permit branch banking in some form.

A five-day week for the U. S. Department of Labor was established July 30.

Farm Bureaus Act To Cut Farmers' Tax Bill

Largely as a result of Farm Bureau efforts, the majority of Rock Island and McDonough county farmers are paying less taxes this year than in 1931, a survey of 72 farms picked at random in the two counties revealed. The average saving on these 72 farms approximated $33 per farm.

Out of 36 farms chosen from different townships in Rock Island county, all except one showed a reduction in taxes. The only farm to show an increase was a farm of 185 acres which paid $2.88 more than a year ago. The other 35 Rock Island county farms ranged from $3 to $80 less. For example, one 90-acre farm saved $20 on its 1931 taxes; a 320-acre farm saved $40; a 250-acre farm, $14.61; and a 160-acre farm $80.88.

All of the 36 examined in McDonough county showed a reduction. The actual dollars-and-cents savings ranged from $2 to $72 per farm. In ten cases, the reduction was more than $50 per farm. This saving is in the most part accounted for by the 25 per cent reduction in assessed valuations of farm lands and improvements secured through the efforts of the public relations committee of the Farm Bureau.

Randolph Co. Director Blind But Still Active

Alfred Donjon, a member of the executive board of the Randolph County Farm Bureau, according to J. B. Countiss of the I. A. A. staff, took an active part in all arrangements for the big celebration at Waterloo.

Mr. Donjon is blind, but he took home a copy of the special rededication issue of the I. A. A. RECORD and said he would have it read so he could get all the information about what was going on throughout the state.

Atlee Pomerene, former Democratic Senator from Ohio, has been appointed by President Hoover as chairman of the Board of Directors of the Reconstruction Finance Corp.

Mr. Pomerene will succeed Eugene Meyer, governor of the Federal Reserve Board who held the R. F. C. post since the resignation of General Charles G. Dawes.

Farm prices are entirely out-of-line with the gold supply and ultimately must rise.—Any rise in the general price level will result in a greater rise in farm prices, says George F. Warren in the June 1932 Farm Economics.

Hog Cholera Control Is Popular Bureau Service

Savings To Members Estimated at $300,000 in 1931

The Illinois Farm Bureau Serum Association, which serves 73 counties, bought for Farm Bureau members last year nearly 50,000,000 cubic centimeters of anti-hog cholera serum and virus saving approximately $300,000 on farmers' vaccination bills.

This service has been offered for a number of years with increasing volume and increasing savings. The unusually large amount of serum and virus bought last year was due mainly to serious outbreaks of hog cholera in many parts of the state.

Indications are that farmers this year are going to take advantage of the lesson learned during last year's outbreaks and vaccinate their pigs at an earlier age. This will mean an additional saving.

Last year's purchases were the largest ever made by the association in a single year and this year's contracts are thought to be the largest single purchase of serum ever made by any organization at any time. During the first three months of 1932 orders were about eight per cent above the corresponding period of a year ago, but this is not as great as it should be under present conditions.

Considering the fact that farmers can now vaccinate their hogs at a lower cost than at any time in history, they should take advantage of this opportunity to insure their herds against cholera.

If we are to profit by the experience of 1931, when serious outbreaks of the disease appeared in practically every section of the state, we must vaccinate while the pigs are young and light. Last year many farmers waited until cholera broke out in their own herd or in a neighbor's herd before they did anything. The result was a higher cost of vaccination and in many cases heavy losses.

The Farm Bureau Serum Association is a co-operative formed to buy high grade serum and virus for Farm Bureau members direct from the manufacturers. This service is provided for them not only to save money on serum costs, but also to make available a guaranteed supply of serum of tested quality at all times.

The Illinois Milk Producers Association at Peoria recently moved into its own building and is installing equipment to process part of its surplus milk and cream. Up to now the association has had to dispose of surplus milk on the open market.

Country Life Queen Contest Features Farm Bureau Day at State Fair

Two major attractions which promise to bring out a larger attendance than usual on Farm Bureau Day, Friday, Aug. 26 at the Illinois State Fair are the Country Life Queen contest, and the awarding of state prizes to the lucky ticket holders who registered at one of the 90 county Dedication Day celebrations on July 4.

Farm Bureau headquarters as in past years will be located in a large tent east and south of the race track grandstand. Checking facilities, chairs, drinking water, and other conveniences will be available for Farm Bureau members who attend the Fair any day from Aug. 20-26. Placards and charts arranged about the tent will visualize the work of the Farm Bureau and I. A. A. in serving members.

The first prize in the registration contest will be a fine automobile in the medium priced field, the second prize a lower-priced car, and the third a handy chest of carpenter's tools. The winners need not be present but no one is eligible who failed to register on July 4th in his or her respective county.

The Country Life Queen contest will see 37 of the finest young women representing as many counties in downstate Illinois. All are champions, having won their respective county contests.

The county winners in the Country Life Queen contest who are expected to enter the competition at Springfield follow:

Rowena Stevenson, Bond county; Irene Hill, Boone; Bernita Kurzweg, Champaign; Anna Homann, Coles; Laura Schoenbeck, Cook; Marian McConaghie, DeKalb; Robilee Coad, Edwards; Evelyn Loy, Effingham; Lucille Duffey, Gallatin; Norma Hicks, Greene; Angeline Painter, Henderson; Evelyn McNeil, Henry; Maude M. Bonnett, Jo-Daviess; Thelma Reeder, Johnson; Dorothy Woolsey, Knox; Leona Bloom, Lake; Rita Downs, Lee; Mildred Fischer, Livingston; Ruth Andreas, McHenry; Nora Michel, Marion; Louise Laughead, Mercer; Myrtle Ruhl, Monroe; Ruth Whitlock, Montgomery; Marjorie Wilmot, Peoria; Martha V. Hawthorne, Piatt; Vera Riley, Pike; Dorothy Layman, Pope; Mildred Fritchley, Richland; Ernestine Gifford, Rock Island; Ruth Whitacre, Shelby; Bernell Emmerich, St. Clair; Mabel Oertley, Stark; Rose Ann Pero, Washington; Clara Clark, Wayne; Mary Olive Ridenour, White; Maxine Chamness, Williamson; and Mary Parks, Woodford.

"We believe the Country Life Queen contest is of outstanding importance," said V. Vaniman of the I. A. A. who will be in charge. "It is necessary that agriculture advance in its culture and appreciation of the best there is in womanhood as well as to advance economically. The young women in this contest have been chosen because of their fine character, intelligence, personality and other qualities as well as for their natural physical beauty.

"The Farm Bureau movement is to be congratulated for laying emphasis on this phase of farm life. This contest, while only two years old, has attracted the favorable attention and support of the Home Bureau.

"It is inconsistent for us to give so much attention to the improvement of farm life and the development of better farm practice and then neglect the human and social side. I predict that this movement within the near future will spread into all the other states for it is sound and constructive."

37 Girls Compete In Contest State Fair

By V. Vaniman

With 37 young ladies—each one a winner in her county—entering the contest to determine the "Country Life Queen of Illinois for 1932," indications are that standing room at the state meet will be at a premium.

This contest will be held at the State Fair, Springfield, on Farm Bureau Day, Friday, August 26, at 11:30 A. M.

The 1931 contest with only 10 contestants filled the 60 x 90 foot Farm Bureau tent to capacity. This year's contest will in all probability be held in the coliseum if suitable arrangements can be made.

Grace, poise, dignity, sincerity, reserve, personality, modesty, self-possession, charm, intelligence and vivaciousness, and physical attractiveness will be given consideration by the judges in determining the winner.

Emphasizes Culture

Illinois Farm Bureaus are the first in the United States to hold a state-wide beauty contest. Average attendance in the counties in 1930, where contests were held, was 600; in 1931 the average attendance was 720. Gallatin County made arrangements for an attendance of 250 and 1100 came out.

The Country Life Queen contest is designed to honor and emphasize the high type of culture and young womanhood found in rural Illinois. Should agriculture have a culture of her own or should she derive it from the city? Should country people cultivate grace, charm, poise, self-possession?

The more culture a person has managed to attain the more independent he is of outward circumstances. Uncultured people live in the world without being conscious that to be alive at all is one grand mystery. Culture has the faculty of enabling us to be happy in the only way wherein most human beings can be happy—in complete defiance of their surroundings. Like charity defined by St. Paul culture is not puffed up, does not show itself as something ponderous, majestic, pompous, imposing, it does not show itself at all.

"Old Inferiority Complex" is going to have a hard time to survive among farm people that attend the Country Life Queen contest at Springfield. The ideals set up before our young people determine what the future generation will be.

Conferences To Reduce Taxes Now Completed

Tax Committees At Work Getting the Facts, Co-operate With Others

RECENT conferences with Farm Bureau leaders and county tax committees held in Rock Island and Warren counties concluded a series of district and county tax conferences sponsored by the Illinois Agricultural Association during the past two months.

Attendance at the larger district conferences where a program of intelligent tax reduction was presented by John C. Watson ran as high as 175 or more. The majority of those attending these meetings had had previous experience in their respective counties with tax matters and many were veterans of past battles to secure equalization of assessments.

Latest reports coming to the Department of Taxation indicate that county tax committees are at work throughout Illinois studying levies, treasury balances, tax rates, and expenditures with an eye to reducing wherever possible without hampering necessary public service. The Tax Department already has a number of requests on file for further co-operation both in compiling and presenting information to proper authorities for action.

In a recent letter to the counties Mr. Watson said:

Aug. 2 Last Day

"Please note that Aug. 2 is the last day on which any school district board of directors or board of education can legally certify the levies for school purposes, taxes for which are to be paid next year. Whatever tax reductions are to be secured this year whether in elementary or high school districts, must be secured before Aug. 2. This work should be done as soon as possible. If any board certifies its levy before Aug. 2, it has the right at any time up to but not after this date to withdraw such certificate and to substitute a new levy therefor.

"There are some outstanding matters on which taxpayers' committees can properly and safely act this year if information secured warrants such action. These are as follows:

1. Elimination of waste or extravagance.
2. Elimination of expenditures for non-essentials.
3. Reduction of levy for roads and bridges to require a rate of not over 25 cents where possible without jeopardizing maintenance.
4. Reduction or omission of levy for school purposes where cash on hand is needlessly large and permits such action."

Mr. Watson recommends that the Farm Bureau invite the co-operation of other constructive taxpayer organizations and persons so as to avoid duplication of effort and accomplish substantial tax reductions.

Out For a Fee

Farmers and others should be warned of the fact that there are many individuals, particularly lawyers, operating today who promise to secure reductions in taxes on a contingent base. It is not necessary to pay or bribe anyone to get taxes reduced. If it is necessary to go to court to obtain justice the cost should either be borne by the Farm Bureau or prorated among the beneficiaries. In court the Farm Bureau can represent only its members.

Fifteen district tax conferences were held since the latter part of May in addition to several county conferences. All the organized counties in the state were represented at the district meetings with the exception of three or four. The largest tax conference was held at Bloomington where 176 attended. There were 135 present at the Peoria conference.

Tells How To Get Facts

The Tax Department has supplied all County Farm Bureau tax committees with detailed information on mimeographed sheets telling how to go about the compilation of necessary figures.

In a recent letter regarding tax reductions for school purposes, Mr. Watson said that if the income tax is sustained by Supreme Court any balance remaining in the proceeds derived therefrom, after first deducting the amount appropriated for the state school fund, will be distributed not on the basis of the average levies as often erroneously stated, but of the average expenditures for educational purposes in the elementary grades in the immediately preceding four years. There is no reason, therefore, why the levy should not be reduced, or, if possible, entirely omitted in any school district which has a needlessly large balance at the end of the preceding school year.

4-H CLUB DELEGATION FROM ILLINOIS TO WASHINGTON

Left to right: E. I. Pilchard, state Club leader; Bert McKee, Marshall-Putnam county; Clara Haun, Marshall-Putnam county; Caroline Farrar, Coles county; Thomas Chamberlain, Coles county; Martha Hensley who supervises girls' club work in northern Illinois.

Thomas Chamberlain represented the encamped club members from all the states in presenting a baton made from wood taken from the White House when it was remodeled in 1927 to Captain Tailor Branson, director of the U. S. Marine Band. The two boys and two girls were chosen for their outstanding work last year. Between 150 and 200 Club members from all the states participated in the six-day encampment on the grounds of the U. S. Department of Agriculture.

President Earl C. Smith discussed farm legislation on the National Farm Forum conducted by the National Broadcasting Company over a chain of stations from Washington during the last days of Congress.

The daily farm program of the I. A. A. over station WJJD has been discontinued during August and early September. The station is economizing by reducing its hours of broadcasting through the summer months.

Instead the I. A. A. will have a 15-minute period in co-operation with Farmer Rusk on station WJJD Thursday nights from 8:15 to 8:30 P. M. Central standard time.

"The Grain Exchange Controversy" was the title of a 10 minute radio address by George Thiem, editor of The RECORD, Thursday night, July 28.

Tiedeman And Lynch On July 4th Programs

Two officers of Sanitary Milk Producers, farm cooperative of the St. Louis milk territory, were among the 90 speakers on the Illinois statewide Fourth of July program Monday at Marion in Williamson County and Salem in Marion County. E. W. Tiedeman, president, spoke at the latter. A. D. Lynch, secretary-manager, was the speaker at Marion. Both carried the message paramount in the campaign of the Illinois Agricultural Association, urging passage of emergency price-raising legislation before the Congress.

"Since the deflation of 1921—for over ten years—organized agriculture has been making a fight for economic equality," Tiedeman declared. "All other lines of industry and labor have had the support and kindly consideration of the government. Agriculture has not even been given a seat at the family table. Since the collapse of 1929, the situation has become exceedingly aggravated until at the present time it is acute. A year ago the farm price index was 91—today it is 56. On the first of last December it had fallen to 71. By the first of February it dropped to 60."

Lynch in his speech at Marion, Illinois pointed to prevailing milk prices as an accurate example of the influence of uncontrolled buying in pushing down commodity prices. The entire blame for inequitable milk prices was laid at the hands of distributors unwilling to cooperate with the policy embodied in the program of milk cooperatives, he said.

"While it must be admitted," Lynch continued, "that lower milk prices than in 1929 are inevitable today, it is also true that organized farm action such as has availed labor groups and other farm bodies would have saved disastrous reductions and saved the milk producer from his present plight. The milk price now should be at least $1.47 and I firmly believe our base and surplus marketing plan could have maintained that level had not unsympathetic distributors buying on the old-time butterfat basis forced cooperating dealers to batter down the price."

Since the Limestone-Phosphate Department was organized early in 1920, a complete change has been brought about in both the methods of handling limestone and phosphate and the standard quality grades acceptable to Illinois farmers. These changes, in both cases, resulted beneficially to the purchaser.

Ag College Graduates Get Jobs Facts Show

Experience in Agriculture a Real Advantage in These Days When Positions Are Scarce

Seventy-five per cent of the men graduated this year from the New York state college of agriculture, who had been brought up on farms, had jobs at commencement time. An equally high proportion of the graduates who had worked on farms before coming to the college, though not reared there, were also employed. Contrasted with this, only slightly over twenty-five per cent of those who had not had any farm experience had been able to find work, says A. W. Gibson, associate secretary of the college.

Those who are now employed are working on farms, teaching vocational agriculture, inspecting perishable products in terminal markets, working in dairy plants, greenhouses, florist establishments, seed concerns, farm supply stores and marketing agencies, helping with the state soil survey, or, with few exceptions, in occupations closely related to their courses of study. Only two among those who came to college with a farm background have taken jobs which are not connected with agriculture.

The evident advantage which farm experience gives agricultural college graduates in getting jobs, at a time when it is difficult for young men just starting out to find employment, is worthy of serious consideration by boys in the rural counties of the state, says Mr. Gibson, in charge of placement of students. He adds that it is doubtful if, on graduation from any other type of college, they would find themselves three to one favorites over their classmates.

I. A. A. Aids Fight To Lower Power Charges

Gather Evidence For Hearing Before State Commission in September

As we go to press, organized farmers who demand a reduction in minimum electric rates for light and power, are taking steps to gather evidence for presentation before the Illinois Commerce Commission in September, to substantiate their contentions.

The hearing scheduled at Springfield for July 21 was postponed by the Commission until September to allow time for interested parties to gather evidence. The Illinois Agricultural Association is assisting members in efforts to reduce service charges.

Complaints received from Franklin, Henry, Rock Island, McDonough, McLean, Sangamon, Clay, LaSalle, and other counties at the I. A. A. offices primarily refer to the $9 per month minimum charge to farm users, and to line construction costs.

"A number of complaints have been adjusted informally through the able efforts of the Commerce Commission's engineering division," stated L. J. Quasey of the I. A. A. transportation department in a letter to the Commission. "But in our opinion complaints are too numerous for individual consideration.

"We believe that in order to promote rural electrification on a sound and equitable basis the construction costs of rural lines should be reduced to the lowest practical figures and that the rate schedules should be so adjusted as to encourage the use of electricity in large quantities.

"Furthermore we believe that some special provision should be made for the rural tenant who often is not in a position either to bear the burden of construction costs or use as large a quantity of electricity as a customer who owns and operates his farm. Therefore we respectfully request that your honorable commission give consideration to making a general investigation into all phases of the subject of rural electrification."

Editor, I. A. A. RECORD:

The speech made by C. V. Gregory and published in the July number of the RECORD is a masterpiece and will go down in history for future generations to read. What our country needs is a thousand men like him and we would not have to worry about old man depression.

R. L. Sweetnam,
Peoria County, Ill.

Insurance Service Was Initiated 7 Years Ago

Farm Bureau Members Save Dues on This Benefit Alone

Seven years ago the Illinois Agricultural Association lead the foundation for what was to prove one of its most important undertakings when the board of directors decided to establish an insurance service at cost for members.

The Farmers Mutual Reinsurance Company was organized in 1925 by the I. A. A., the county Farm Bureaus, and certain local mutuals. This company now has more than $45,000,000 in fire, windstorm and hail insurance in force at a considerable saving for farmers.

Insurance is written on farm property on a cost basis. The company was originally organized to reinsure local mutuals and to take risks which were too large for them to handle. Later, however, it started writing direct insurance.

For Members Only

Two years after the Reinsurance company began, the I. A. A. organized the Illinois Agricultural Mutual Insurance Company to supply Farm Bureau members insurance on their automobiles at cost. This company sells to members only. Its rates are substantially below those of the nearest statewide competitor with the result that Farm Bureau members often save the entire amount of their dues through this service alone. This company, it is estimated, has saved Farm Bureau members in Illinois more than $300,000 a year for the past several years.

The Illinois Agricultural Mutual is a legal reserve company with assets of nearly $1,000,000 and is continuing to grow yearly. To date more than 33,000 applications for automobile insurance have been received. During April and May this year the company received 1,167 applications, which is considerably more than the number for the same two months a year ago.

This company also writes employers' liability insurance for Farm Bureau members. More than 2,000 farmers have taken advantage of this service.

Country Life Youngest

The youngest and largest of the Farm Bureau insurance enterprises is Country Life Insurance Company which was organized three years ago and which has more than $44,000,000 worth of insurance in force at present. Country Life is one of the outstanding examples of what organized farmers can do in the business field.

This company, entirely owned and controlled by the 60,000 Farm Bureau members in Illinois showed a gain of $9,000,000 in paid for business during 1931. This is a larger gain than any other Illinois company made and placed Country Life among the highest 15 of the 338 legal reserve companies in the United States.

The assets are now double the assets of a year ago and in the most liquid form possible, consisting mostly of government bonds and securities of the very highest type. Following the examination of the company by state insurance examiners some time ago, one of them said that Country Life was in better financial condition than any company he had examined during the past four years.

Farmers National To Hold Annual Meeting

Stockholders Assemble Aug. 16 To Review Progress During Past Year

THE annual meeting of the stockholders of Farmers National Grain Corporation will be held at the Chicago offices of the corporation Tuesday, August 16, for consideration of the annual reports of the corporation for the fiscal year ending May 31 and for the election of a board of directors. The final meeting of the present board of directors will be held the day preceding the stockholders' meeting, which will be followed by a meeting of the new board for organization and the outlining of plans and policies for the ensuing year.

Reports to be placed before the stockholders will show steady growth of the corporation throughout the past year, officials said. In the matter of grain handling facilities organized farmers now control, through ownership or lease, more than three times the capacity in country and terminal storage space they had at the beginning of the 1931 crop season.

Terminal Facilities

Terminal facilities controlled by Farmers National Grain Corporation as of July 11, 1932, numbered 42, of which 12, with total capacity of 13,256,837 bushels, were owned, and 30, with capacity of 40,116,800 bushels, were under lease.

Country facilities totaled 401 houses, of which 293, with total capacity of 17,748,999 bushels, were owned, and 108, with capacity of 2,343,629 bushels, were under lease. The total of leased and owned terminal and country capacity was approximately seventy-three and one-half million bushels, against a total at the beginning of the 1931 crop season of something less than 25,000,000 bushels.

Merchandising operations of the corporation have been extended, through the opening of branch offices, into every important grain producing and consuming area in the United States. Volume of business of the corporation for the last fiscal year showed substantial increase over that for the previous twelve months.

Ship Grain Abroad

Of the total wheat exports from the port of Galveston from July 1, 1931, to July 1, 1932, Farmers National Grain Corporation handled in excess of 60 per cent. Belgium, Germany, France, Italy, England, Holland, Finland and Greece were among the foreign countries to which the corporation shipped grain. Establishment of a seed division has further increased the merchandising services offered by the corporation to grain producers. Operations of this division were begun in the intermountain territory, with headquarters at Ogden, Utah, while arrangements are being made to extend this service into the North Pacific and hard spring wheat territories in the near future.

Direct Marketing

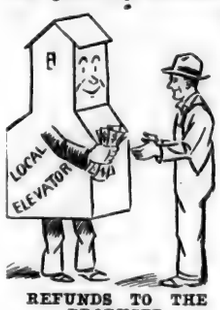
The direct marketing program approved by the board of directors of the corporation more than a year ago and offered to those stockholders desiring it has been extensively developed. Acceptance of the plan by the Farmers Union Jobbing Association and the Equity Union Grain Company, both in the Kansas City area, within recent weeks, brought the number of stockholders marketing their grain directly from their country units through Farmers National Grain Corporation to 19, out of a total of 28. The Cooperative Grain Growers of California, Berkeley, a new stockholder, is among those adopting the plan.

Directors of the corporation are C. E. Huff, president, Chicago; William H. Settle, first vice-president, Indianapolis, Ind.; C. B. Steward, secretary, Lincoln, Neb.; D. L. O'Connor, St. Paul, Minn.; Oscar Slosser, Fostoria, O.; E. R. Downie, Kansas City, Mo.; G. C. Johnstone, Bloomington, Ill.; John R. Maddock, Maddock, N. D.; Jess W. Wade, Ogden, Utah; F. J. Wilmer, Rosalia, Wash.; L. E. Webb, Dodge City, Kan.; C. W. Croes, Aberdeen, S. D.; A. F. Barbezat, Yuma, Colo.; Lyle Hague, Cherokee, Okla., and L. J. Taber, Columbus, O.

E. A. Hake, our general agent, signed 16 Farm Bureau members, writes Lloyd R. Caldwell, Washington county. Thirty-five new members joined.

Story of Illinois Grain Told In New Booklet

Sketches Development of Co-operative Grain Marketing In Illinois and Nation



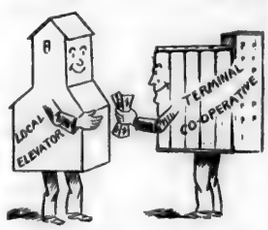
The story of the Illinois Grain Corp., the earlier development of co-operative grain marketing in Illinois, and a short sketch of the Farmers National Grain Corp, together with statements by officials in each organization are contained in a 20-page booklet recently published under the title "We're Paying For Our Marketing Machinery—Now Let's Own It." The booklet was published by the Illinois Grain Corp. and is amply illustrated with pictures, charts, and drawings.

"The founders of farmers' co-operative elevators in the United States," declares the booklet in its opening statement, "learned more than 50 years ago that the way to a better price for grain is through organized selling." They knew that their grain and their patronage paid for the local elevator and its grain handling facilities, besides frequently returning the operator handsome profits.

These early leaders of co-operative thought did the logical and sensible thing. They said: "Let's all get together, market our own grain, run our own business." The co-operative elevator which blazed the trail for co-operation in America was the result.

Many Had Monopolies

At many shipping points private elevators had monopolies. Here the toll paid by farmer's grain was frequently large. The courage and intelligence of the co-operative pioneers in such cases was rewarded by an immediate increase of from two to six cents or more per bushel.



REFUNDS TO THE PRODUCER

The first co-operative elevators were met with hostility and opposition. Old line commission men in the terminal markets refused to handle their grain. Railroads in league with the middlemen would not furnish cars. Discriminatory rules were adopted by the exchanges outlawing "co-operative" grain. Much the same crowd that fought the early farmer's elevator is now fighting co-operative selling agencies in the terminal markets.

The farmer's elevator is an important unit in a farmer-owned and farmer-controlled grain marketing system. It is not a co-operative marketing system in itself. It IS an important part of the system. The founders of the early elevators knew this. The need for getting into the terminal markets and carrying their grain co-operatively all the way to the processor, exporter, and consumer was as apparent then as now. And so in the face of extreme difficulties, bitter opposition from the "trade," and discriminatory rules and regulations against farmers elevators, co-operative terminal agencies were established. Some of these fell by the wayside, others succeeded and are going concerns today.

The Illinois Grain Corporation with a membership at this writing approaching 100 local elevators and associations is one of the youngest regional co-operatives, yet it has leaped into prominence as the third largest affiliated with nation-wide farmer-owned sales agency, the Farmers National Grain Corporation.

REFUNDS TO THE LOCAL ELEVATOR

Terminal Co-ops Object

The co-operative in the terminal market serves the local farmer's elevator as the local elevator serves the producer. Its object is to pay the highest possible price to the farmer for his grain. Private commission men and other handlers of grain thrive by maintaining a wide margin of profit for themselves. Co-operatives thrive by reducing this spread to pay the farmer more.

The private handler is interested in margins, the larger the better. The co-operative sales agency is interested in getting a high price for the farmer—the more the better. The old-line system of distribution with its excessive toll and waste was developed by private handlers of farm products. Naturally it favors them. Co-operative marketing has been developed by producers to favor the growers. That's the difference. Which system do you want to support?

Other Statements

The organization and development of Illinois Grain Corp. is set forth briefly. Then follows a statement by G. C. Johnstone, president, under the title "Illinois Grain Corporation On a Sound Basis." A statement by General Manager C. P. Cummings, "It's a Long-Time Program," gives the viewpoint of a man with 25 years' experience in the grain business regarding the problems and possibilities of co-operative grain marketing in the terminal markets.

Statements by C. E. Huff, president, and Geo. S. Milnor, general manager of the Farmers Grain Corp., follow a brief history of the development of the big co-operative.

"The operations of the Corporation's facilities," declares Mr. Huff, "result not only in substantial savings to producers in the physical handling of grain, but enable the corporation to secure the most advantageous outlets and prices, as well as to control to a degree the flow of grain into consuming channels.

Here to Succeed

"Grain exchanges must adjust themselves to the new facts and factors in marketing. Co-operative marketing is here to render service and to succeed. Farmers will not be misled, nor can their marketing program be defeated. We shall move steadily forward."

A brief statement by Manager Geo. S. Milnor who at the age of 19 found his first job in the elevator of the Sparks Milling Co. at Alton says: "Heretofore the farmer in many sections had only his local co-operative elevator. In some states he had district and state-wide co-operatives operating on one or two markets. All these lacked co-ordination. Now for the first time the farmer has a local, district, and nation-wide agency all working together which enables him to maintain his interest in the grain he delivers at the local shipping point until it reaches the processor or foreign buyer. The picture is now complete."

Contains Agreement

Short biographical sketches of Farmers National grain men serving Illinois producers, a description of the uniform marketing agreement, and a copy of the marketing agreement operating between the Illinois Grain Corp. and the local elevator complete the booklet. Pictures of representative elevators holding membership in the Illinois Grain Corp., of officers and directors, pictures of facilities owned or controlled by the Farmers National, and maps of the United States and Illinois showing member elevators of Illinois Grain and branch offices of the Farmers National give the reader a fairly good understanding of this farmer-owned and farmer-controlled grain marketing system.

Penny post cards are coming into use since the recent boost in postage rates.

Automobile production fell more than half during the past two years.

Life Insurance

By L. A. Williams

Country Life Insurance Company policyholders are delighted with the information recently sent out that the Company's position is perhaps as strong as the strongest in the United States. Country Life could cash its securities overnight and take only approximately an 8% shrink on all of its investments. Its position of strength is one which eliminates worry on the part of the policyholder as to safety of funds invested with the Company.

Country Life's mortality for the first six months was about fourteen points better than the mortality of six months ago. In other words, our mortality for 1931 was 35% of the expected, and for the first six months of 1932 was 21.4%. The Company's interest earned for the first six months is 4% compared with 4.1% a year ago. Country Life does not have one security in default. Country Life has never had a month that it hasn't made a gain since it began business.

The Company recently brought out a new policy called the Term to 65, to enable those who are in straitened circumstances and could not otherwise afford to carry life insurance, to get under the protecting wing of legal reserve life insurance. This policy sells, at age 35, for $13.39 a thousand, and pays annual dividends beginning at the end of the second year. It is sold only to people aged 20 to 50 years.

Standard lines of life insurance policies sold by the Company provide protection from the time a child is born, and insure people even as old as age 65. The Company has paid its dividends regularly to policyholders, and has paid out already more in dividends than the capital stock of the Company, and the Company is still only three and one-half years of age.

Country Life policyholders do not lapse their policies. They have found that the Company's prompt payment of death claims means more to their beneficiaries than the small amount of satisfaction they would get by having the immediate use of a few dollars at the expense of a lapsed policy. If it is hard for the head of a family to get along now, it certainly wouldn't be any easier for his wife and dependents to get along if he were gone, unless he provided life insurance.

American people in general are proud of legal reserve life insurance, and the remarkable way that it has guaranteed security to its policyholders. Millions of dollars have been loaned to policyholders, millions have been paid out in death claims, millions have been paid out in matured policies. And, so satisfied are policyholders all over America that I am sure the next ten years will see a tremendous increase in estates created by life insurance over and above even the balmiest days prior to 1928 and 1929.

The great lesson that has been taught the American people in security and soundness of their investments in life insurance will continue to bear fruit. Mothers will start their children while their age rate is low. Boys and girls will start 20 year policies as soon as they have any money to lay aside. Married couples will start housekeeping with $10,000 life insurance contracts instead of $1,000 or $2,000 which used to be the vogue. People will rely on $100,000 and $1,000,000 life insurance estates for posterity rather than lay aside bonds and stocks which fluctuate in value.

Country Life's low cost puts it in the running as a superior Company, and a preferred Company for the most careful buyer to consider. We insist that price is important. We insist that there are two things for the buyer to consider, quality and price. And we of Country Life are very happy to have applicants investigate and compare quality and price before buying. The tremendous records of the Company have been built because of discriminating and appreciative purchasers.

Livestock Marketing

The movement of livestock by truck to the Chicago market is continuing to show a sharp increase, reports the Chicago Producers. During the month of June the equivalent of 2,540 carloads arrived by truck as compared with 1,507 for the same month a year ago. This represents 20 per cent of the cattle, 20 per cent of the hogs, 19 per cent of the calves, and 6.7 per cent of the sheep.

A warning to livestock growers against overproduction of hogs because of the heavy impending corn crop was issued recently by the National Live Stock Marketing Association.

Ford County Adds 97 Farm Bureau Members

33 Minute Men Active, Five of Whom Sign 10 Or More

IN A letter to Farm Bureau Unit Directors, expressing his appreciation of their assistance in the recent Fourth of July Celebration and Dedication, A. B. Schofield, President of the Ford County Farm Bureau, made the following statement, "No organization can be stronger than the morale of its membership. The hard work done by yourself, and your unit committees, has been one of the biggest contributions to the success of this drive. I feel that its greatest result will be in local communities like your own where this demonstration of loyalty and sacrifice will raise the prestige of the Farm Bureau."

A. B. SCHOFIELD

The splendid morale and devotion of Farm Bureau members in Ford County was conclusively shown by the efforts of 33 minute men, who added 97 new memberships during the present drive. Five of these men distinguished themselves by adding ten or more members each. They were, R. P. Cothern, A. B. Schofield, Severt Hill, Joe Meis, and Walter Carlson.

The success of this membership drive follows like successes in three other drives during the past two and one-half years, during each of which substantial increases in membership have been made, giving a total net increase during that period of 307, after deducting losses from death, removal, and other cancellations. Officials of the organization point out that each and every month during that period has show a net increase in members.

"The Farm Bureau Units have been of great assistance in the growth of our organization," said Mr. Schofield. "They have been an ideal means of contact with the membership; they have assisted members to become acquainted with their organization, the Farm Adviser, and with each other; the programs presented have been of great educational value; they have furnished an opportunity for the clearing up of misunderstandings, and for the destruction of effects of insidious propaganda; finally they have contributed socially, young and old deriving much pleasure from an evening spent together."

Number 9 | SEPTEMBER, 1932 | Volume 10

A Bond Issue to Reduce Property Taxes

This Measure Must Be Approved by the Voters in November or the Property Owner Will Have to Pay

By John C. Watson

EARLY in February, 1932, a series of bills enacted into law provided relief for residents of the state who were destitute by reason of unemployment or otherwise. These measures were as follows:

The Illinois Emergency Relief Commission was created and the sum of $20,000,000 was appropriated thereto.

Funds for immediate use were provided by authorizing the sale of state warrants in the sum of $18,750,000 in anticipation of collection of taxes in 1933.

$25,000,000 Authorized

In order to provide a legal basis for the issue of such warrants, an additional state tax of $25,000,000 was authorized upon all assessed taxable property for the year 1932, payable in 1933. At the same time a proposed state bond issue of $20,000,000 to redeem all such anticipation warrants and interest accrued thereon was submitted to the electors of the state to be voted on in the general election in November, 1932. If the bond issue is approved, it was provided that the additional state tax of $25,000,000 on all property should not be levied.

If the bond issue is approved, the state is authorized to withhold from each allotment of money to counties under the motor fuel tax law (gasoline tax act) an amount sufficient to pay such bonds and interest as they come due. The amount must be withheld from the different counties in the same proportion that the emergency relief funds expended in each county bear to the total relief funds expended in the state. Under this plan any counties *WHICH HAVE NOT RECEIVED STATE RELIEF FUNDS WILL PAY NO PART OF THE COST OF THE SAME.*

TELL YOUR NEIGHBOR

A bond issue every property owner can and must vote for will be up for adoption on a separate ballot in the November election. A vote FOR this proposal, in this case, will be a vote for lower property taxes. As explained in the accompanying article this measure must carry or the property owners of Illinois will be saddled with an additional burden of $25,000,000 for poor relief. If the bond issue carries, it means that poor relief funds already borrowed on the state's credit, and spent, will be paid back out of gas tax funds. Explain this measure to your neighbor and urge him to vote for it.—Editor.

This rather complicated arrangement was unavoidable because private relief funds in Cook County were practically exhausted and public funds had to be raised at once to prevent actual starvation. Because of tax delays and tax delinquencies, Cook County, where the need was greatest, had been unable to sell its own relief bond issues. The state's credit, however, was good and could be, and was used, to borrow against the aforesaid $25,000,000 state tax levy. *This levy,* as before stated, *will not be imposed if the bond issue is approved.*

However, if the bond issue fails of approval, an additional state tax of $25,000,000 on 1932 values, payable next year, will necessarily be levied on all assessed taxable property in the state. This means that the 1931 state tax rate of 39 cents must be nearly doubled in 1932. If such increased state taxes are required, they must be levied in every county, whether it has received any state relief funds or not.

This heavy increase in property taxes can be avoided only by approval of the bond issue. Every owner of property, whether real or personal, should vote and work for its approval.

To be approved, the bond issue must receive a majority of all votes cast for members of the General Assembly, in the November election. Every person who votes in the election and fails to vote on the bond issue, in effect votes against it.

Vote "Yes"

Vote "YES" on the bond issue, on the separate "emergency relief ballot."

Chairman of the State Emergency Relief Bond Issue Committee to work for the passage of this important measure is Earl C. Smith, president of the Illinois Agricultural Association. Douglas Sutherland, (Executive Secretary, The Civic Federation and Bureau of Public Efficiency of Chicago) is serving the committee as secretary.

Wants Candidates Records

Editor, I. A. A. RECORD.

The publication of the actual voting record is the most valuable and useful thing the RECORD has done in political reporting. I hope you will add an analysis of the records and make recommendations from the farmers viewpoint on all that are candidates this fall.

The RECORD is written excellently.

HARRY L. DIEHL,
Ford County, Ill.

County Winners Who Competed in State Contest, Springfield, Aug. 26.

Farm Bureau Day Draws Record Crowd

Mercer County Girl Wins Country Life Queen Contest, Lake County Second

MORE than 2,000 Farm Bureau members and their guests assembled in the huge Farm Bureau headquarters tent at the Illinois State Fair, Friday, August 26 to help celebrate Farm Bureau Day. Attendance at the fair this year was said to be a record for recent years.

The feature of the day was the Country Life Queen Contest which was won by Miss Louise Laughead of Mercer county, a pretty brunette and a popular choice for the honor. Leona Bloom of Lake county, another charming dark-haired girl, placed second.

Miss Laughead was presented with the crown by Harvey J. Sconce, former president of the Illinois Agricultural Association, and now connected with the agricultural division of the Century of Progress Exposition.

He served on the committee of judges with Miss Gay Lee of Station KMOX, St. Louis; and Robert B. Irwin, manager of the Springfield Chamber of Commerce. Mr. Sconce announced that he hoped to have a similar contest in connection with the Century of Progress Exposition next year.

Thirty-five girls between the ages of 16 and 25 competed in the contest. Thelma Reeder of Johnson county and Dorothy Laymann, Pope county, were absent.

The girls mounted the long T shaped platform singly, moving from one end to the other and back again to their corner of the tent so as to give the judges and audience ample opportunity to make their placings. The procession required about 40 minutes after which all of the contestants came out to form a long line stretching from one end of the tent to the other.

V. Vaniman, director of insurance service for the I. A. A., had charge of the contest, and explained its purpose to the large audience.

"The Country Life Queen Contest is designed to honor and reveal the fine culture and young womanhood found in rural Illinois," he said. "Should agriculture develop a culture of its own emphasizing qualities of modesty, gracefulness, naturalness, charm, poise, etc., or should it derive it from the cities?

What Is Culture?

"Real culture develops self-confidence and independence of environment and circumstances. One of our great pyschologists states that uncultured people live in the world without being conscious that to be alive at all is one grand mystery. Culture has the faculty of enabling us to be happy in the only way wherein most human beings can be happy—in complete defiance of their surroundings. Like charity defined by St. Paul, culture is not proud, majestic, pompous, nor imposing, it does not show itself at all."

The contestants were judged on naturalness, personality, poise, gracefulness, sincerity, and similar qualities. The contest was in no sense a beauty contest as is commonly conducted under that name. It was initiated to give emphasis to the development of qualities admired by all in womanhood.

The young women in the contest were chosen as representatives from their respective counties on the basis of character, intelligence, naturalness, poise, gracefulness, all of which to a large extent can be developed.

Developing People

A frequent criticism heard on every hand is that the human race devotes more time and attention to breeding finer specimens of domestic animals and livestock than it does to the development of people. We have to go back thousands of years to the Spartans and Greeks to find examples of serious effort and intelligence applied toward developing human perfection. Only within comparatively recent years have the American people given much attention toward growing healthier children through scientific diet and health practices on a wide scale. And health is a first requisite

of physical perfection, charm, and personality.

President Earl C. Smith spoke briefly about the Farm Bureau Day program, stating that the selection of the country life queen was in no sense a beauty contest but was promoted in recognition of the finer qualities of womanhood as expressed in countenance and personality.

In the drawing contest Dana Mahaffey, 32 years old and unmarried (No. 37439), of Kewanee, Henry county, won the Buick sedan. Edwin Kooyenga (No. 16262) of Blue Island, Cook county, won the four cylinder Ford two-door sedan. Mr. Kooyenga is a loyal Farm Bureau member who gave splendid help in the "minute men" campaign prior to the July 4 celebrations. He now drives a model T. Ford and the new car will be very welcome to him and his family. F. H. Korte of Germantown, Clinton county, won the set of carpenter's tools. Korte is a loyal Farm Bureau booster who signed eight members in the recent campaign.

The drawing was staged on the platform in the Farm Bureau tent directly after the country life queens made their appearances, and while the judges were deciding the winners. More than than 64,000 tickets, stubs of which were held by Farm Bureau members who registered on July 4 at the county celebrations, were rolled around before the audience in a large box. A little girl was brought up to select the three lucky tickets. The numbers were announced immediately, also the winners' names and addresses as soon as they could be determined from the list in the hands of Secretary George E. Metzger.

Exhibits Popular

The Farm Bureau headquarters tent this year was larger than ever, but none too big for the huge crowd that surged in and out throughout the week. Exhibits of the Illinois Agricultural Association and the associated companies attracted much favorable attention. The marketing exhibit was the same as that of last year, showing a relief map of the state of Illinois with a motor-driven train running from one end to the other. As the train moved through the various sections of the state lights flashed on a series of maps of Illinois telling the story of co-operative marketing of the different farm commodities in Illinois.

The Illinois Farm Supply exhibit showed a miniature bulk storage plant, service station, and a motorized train carrying SERVICE petroleum products in the background. A map of Illinois above the platform was electrically lighted and showed the location of some 50 associated county companies and their bulk plants.

COUNTRY LIFE QUEEN

Miss Louise Laughead of Aledo, Mercer county, crowned country life queen at the Illinois State Fair, August 26, is a brunette, age 21, height five feet three inches, weight 110 pounds. She lives on the farm and attended the Alexis community high school and later business college in Quincy. She is at present employed as a stenographer. Her favorite sport is swimming.

The Sangamon county 4-H club and Producers Dairy had a booth in one end of the tent where they dispensed delicious sandwiches and dairy products.

Checking facilities were taxed to capacity to care for the great demand for this service.

PLACES SECOND

Miss Leona Bloom of Wadsworth, Lake county, who placed second in the country life queen contest, is a blue-eyed brunette, age 19, height five feet five and one-half inches, weight 117 pounds. She attended the Townline Warren high and Waukegan high schools. She lives on the farm, was president of her 4-H club, and plays the piano. Her hobbies are dancing and horseback riding; favorite sports, baseball, basketball, and skating.

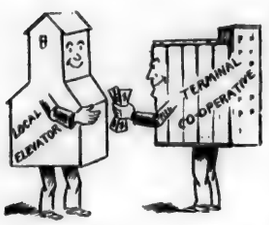
Conway's Comments On Live Stock Situation

Fed cattle stand to continue in a strong position during September, but too many heavy steers and long-fed yearlings are headed for the late fall and early winter. The feeding demand is now centered on heavy steers suitable for a short turn in the feed lot and for a market that for two years has been quite attractive but promises this year to be somewhat the reverse. The coming late winter looks best for the lower grades and a year from this fall for the better grades.

Seasonally short supplies continue to support the hog market and with marketings much below last year the situation is favorable for improvement during the next few weeks. However, it is best to keep hogs topped out as finished and also see that spring pigs are finished before marketed as corn is cheap and should be well utilized. Hog prices are still relatively low, so the market is expected to hold well into the fall and continue much better than during last winter. This season it will be best to have early spring pigs marketed before December and for late spring pigs the late winter looks best.

The lamb market is now apparently passing its seasonal low with rather hard going in sight for the next four weeks. While proportionally large supplies of slaughter lambs are in sight for September, the demand for feeding lambs is increasing and the situation is quite favorable for materially higher prices during the late fall and winter.

Information has just been received from L. O. Grieser, Manager of the National Live Stock Credit Corporation of St. Louis, that hereafter based on the appraised value of live stock representing the primary security, cattle and lamb loans ranging upward to 100% can be made through that organization. This supersedes the old requirements where cattle loans ranged only up to 80% and sheep loans to 75%. In some cases it may be necessary to ask for additional live stock as a margin. Cattle loans may run for a term of nine months, and lamb loans a term of six months.



A series of informal "schools" on cooperative marketing will be conducted this fall by Prof. R. W. Bartlett, agricultural economist of the University of Illinois, in virtually every local district of Sanitary Milk Producers. Extending a similar series conducted last winter into new territory, Professor Bartlett will continue the school this year at the request of farmers in many localities.

Farmers' National Has Good Year

Net Profits in Excess of $1,300,000 Belongs to the Producers

How the Farmers National Grain Corp. in the fiscal year ending May 31, 1932 handled in excess of 148,000,000 bushels of grain, not including that purchased from or handled for the Grain Stabilization Corp. and derived net earnings in excess of $1,000,000 after adding a substantial sum to reserves, was revealed at the annual meeting of the co-operative in the Morrison Hotel, Chicago, on August 16.

In the 15 months ending May 31, or since the last report (the end of the fiscal year was recently changed from Feb. 28 to May 31) net profits of the corporation were approximately $1,300,000 after reserves.

Based on the fact that the Illinois Grain Corporation furnished approximately one-tenth of the member grain sold through the Farmers National, Illinois grain producers and their elevators affiliated with this movement have approximately a one-tenth interest in the Farmers National earnings.

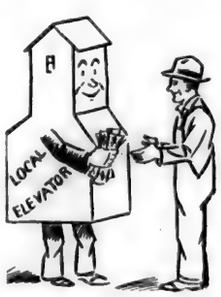
Everything to Gain

This interest will be reflected in increased stock holdings, higher value of stock now and to be held, and in time cash dividends and patronage refunds. In other words every farmer who sells his grain through the Illinois Grain Corp. either direct or through a member farmers elevator, shares in the ownership of profits made from the sale of that grain. Under the old system of private handling, any profits made are kept by the commission man and the owners of terminal storage space.

Thus the grain producer who sells through his own co-operative agency has everything to gain—since he gets just as much or more for his grain at time of sale—and nothing to lose.

Merchandising policies of the Farmers National not only have returned higher prices to its members than those paid by its competitors, but have placed grain producers in all areas in a better position with respect to marketing their own commodities Manager George S. Milnor reported to the stockholders.

"While we appreciate the great importance of making sufficient profit to establish necessary reserves and meet all of our obligations," Mr. Milnor said, "we also realize that a matter of even greater importance is our duty to market producer members' grain efficiently, economically and at better prices, and that duty is one to which we are primarily giving our time and effort. In carrying out this policy we have been instrumental in bringing about material reductions in country elevator handling charges, giving the producer the benefit of a better price, compared to mill or export bids, than would be the case were it not for our operations.



Marketing Efficiently

"Further than that, under our policy of selling all grain in the most advantageous domestic or foreign market available at the time of sale, the margin on which we operate, the spread between the price the producer gets and the price the consumer pays, is being, and will be still further reduced by our operations."

Mr. Milnor's report showed that as of May 31, 1932, the corporation had under its control a total of more than 75,000,000 bushels of country and terminal storage space, owned or leased and operated by the Farmers National Warehouse Corporation, subsidiary of the grain corporation. This represents a gain of more than 55,000,000 bushels over the amount of country and terminal storage space at the close of the 1931 fiscal year.

Cut Per Bu. Cost

"In our warehousing operations," Mr. Milnor said, "we follow regular published rates, which are generally in line with the rates charged for similar services in terminal markets. Our extensive operations, however, have enabled us to handle a large turnover through our facilities, thereby reducing the per bushel cost to a very low level.

"Adequate handling and storage facilities are vital to the effective marketing of producers' grain. In the expansion of the corporation's facilities program, however, there has been constantly in mind the necessity of avoiding the tying up of capital in poorly situated elevator properties.

"Since the last annual report," Mr. Milnor said, "branch offices or representatives of the corporation have been established at Toledo, and Fostoria, O., Champaign, Ill., Des Moines, Ia., Hutchinson, Salina, and Dodge City, Kan., St. Joseph, Mo., Marshall, Minn., Aberdeen, S. D., Williston, N. D., and Amarillo, Texas. During the same period offices in several of the smaller cities that were no longer needed have been discontinued, these being principally the wire offices of the Updike Grain Company, a subsidiary which is being liquidated."

Benefits to grain growers in all areas through national co-operative marketing, were cited by Mr. Milnor.

Paid Bank Loans

The report of Walter I. Beam, vice-president of the Corp., showed that during the fiscal year the Corporation completed the liquidation of bank loans, and that for the second year of operation it was entirely out of debt to all of its bankers at the same time.

Two outstanding events of the year's operations were the funding of the corporation's $16,000,000 debt to the Federal Farm Board, making it payable over a period of 10 years, and the adoption and development of the policy under which the national organization becomes the single grain marketing medium of its regional stockholders.

Mr. Beam reported that banking relations had been quite satisfactory. "We have banking connections with about 100 banks," he said, "and our turnover of dollars has run into hundreds of millions. We have tied up in closed banks approximately $4,000. New arrangements have been made with certain of our banking connections under the terms of which there has been made available to the corporation for its current uses, substantial lines of credit without specific security, for caring for sudden swings of the market, and for financing grain out of collateral position. Our Kansas City subsidiary, Hall-Baker Grain Company, which has heretofore enjoyed a substantial line of unsecured credit, also has had its credit lines reaffirmed, with an increased line from a bank not heretofore a creditor.

Company Has Prospered

"While the Farmers National was born during the depression, and almost any new-born company produced under such inauspicious conditions has slim chance of surviving, your company has survived, rendered an adequate service in marketing grain, and has prospered." Mr. Beam stated that in deference to the trend of the times and to some extent to the expressed opinion of those from whom we had our financing, the income of the higher paid personnel was reduced, that while the operations continued to show a profit and the scale of salaries is moderate in comparison with the size and nation-wide character of the corporation, and its very large turnover of capital and business, it was sensible to reflect the lower living costs by a fair reduction in salaries.

Salaries Reduced

He stated that material operating economies have been made effective by salary reduction, the consolidation of certain offices and the centralization of effort made possible thereby, which will result in a saving in operating costs of several hundred thousand dollars a year.

The meeting was the most harmonious gathering of the Corp. since its organization in 1929. The problem of bringing nearly 30 co-operatives together in one national unified program over a period of two years is a tremendous accomplishment. Naturally there had to be a great deal of self-sacrifice by leaders in all the groups to develop a unified marketing system.

In his vigorous but dignified address to the stockholders, President C. E. Huff asserted that the past year had been one of extreme growth, expansion, and adjustment for the co-operative.

"Those who now seek to alienate farmers from the co-operative marketing program to which they have devoted themselves for more than a quarter century," he said, "undertake a fool's task."

Reviewing the efforts of the National Grain Corp. to obtain clearing privileges on the Chicago Board of Trade, President Huff predicted ultimate victory for the Corporation in its demand for full trading privileges granted at the Chicago market.

We Expect To Win

"This attitude of defiance against law and authority on the part of the Chicago Board of Trade probably marks the final stand of private tradesmen against the growing strength and importance of farmer-owned co-operatives," asserted Mr. Huff. "When this battle has been won, as it will be won, we will be able to go forward with greater security and more rapid growth."

SEEK TO BAR FARMERS FROM TRADING PRIVILEGES AT CHICAGO

Left to right: Weymouth Kirkland, chief counsel for the Chicago Board of Trade who is also attorney for the Chicago Tribune; Fred Uhlmann, vice-president, and Peter B. Carey, president of the Board of Trade. They are defying the Grain Futures Act of 1922 which declares that farm co-operatives shall not be discriminated against on the public exchanges.

Announcing the establishment of a seed marketing department, Mr. Huff replied to criticisms of the seed trade. "The vital interests of more than a quarter of a million agricultural producers must properly take precedence over the interests of 1,500 tradesmen.

"Of the 28 stockholders of the corporation, 19 now have turned over to the National all the marketing operations formerly conducted by themselves, and others are considering like action," Mr. Huff said.

Influenced By Facts

Referring to the favorable banking relations of the Corp., Mr. Huff said: "Bankers are influenced in the lending of money more by sound facts than by loose propaganda. Based upon the soundness of our structure and operations, we have been able to obtain such credit. No such line of credit, once established, has ever been withdrawn. No bank, once entering upon business relations with us, has yet voluntarily ended such relationships."

C. V. Gregory, editor of Prairie Farmer, whose address was one of the highlights of the meeting, stated that the opposition of the middlemen to the Farmers National was to be expected. We can forgive commission men for fighting for their business, said Mr. Gregory, but it is harder to forgive farmers who swallow their propaganda against co-operative marketing. This is the crucial battle of special privilege against the advocates of equal opportunity, he said.

Business and industry in this country have for years controlled the government, continued Gregory. This talk about "government-in-business" is merely an expression of their belief that they will not continue this control.

Mr. Gregory scored the financial leadership of the country and upheld agricultural leadership. "Our financial leadership, which always has dictated business practice and even governmental policies, has shown itself hesitant and fearful in this crisis, and without effective remedies for the present conditions," he declared. "Four years ago they told us that a new era was here in which business could continue to prosper despite a prostrate agriculture. Events have shown our farm leaders to be right when they held consistently that no prosperity is possible for long unless based upon a prosperous agriculture. To the farm leaders the suffering people both of city and country must look for leadership," he said.

Vote "Yes" on the Bond Issue

Carelessness on the part of any great percentage of voters in failing to vote "Yes" on the Emergency Relief Bond Issue in November may defeat it.

This is the one danger that must be guarded against.

The bond issue must receive a majority of all votes cast for members of the legislature which means that every person who votes in the election and fails to vote on the bond issue in effect votes against it.

The fact that this proposal if carried will prevent an increase in property taxes is so unusual that there is likely to be misunderstanding. The article on Page 3 explains why a vote for the measure is a vote for lower taxes. Get this information over to your neighbors and urge them to vote "yes" on the separate bond issue ballot November 8.

On Meeting Opposition

AFTER all, the most effective way farmers can meet the opposition in the "trade" who would destroy their efforts in cooperative marketing, is to sell more farm products co-operatively . . . patronize existing co-operative selling agencies.

Slush funds raised to spread propaganda and hire workers to undermine the terminal co-ops come from commissions on handling farm products. Let's not lose sight of this fact.

The spectacle of one group of producers furnishing the funds to fight the co-operative efforts of another group of producers is incongruous yet it exists and lends support to the statement that many farmers, because of their extreme individualism, are their own worst enemies.

The future of co-operative marketing depends entirely on the producers of farm products. Legal difficulties can be ironed out, monopolistic tendencies of organized middlemen overcome, other obstacles in the terminals removed. But none can correct the lack of unity and co-operative spirit among farmers except farmers themselves.

Unreasonable Criticism

SOMEHOW certain business groups have the notion that the government is unfair in loaning money to farmers for the development of co-operative marketing. Yet there has not been a single word of criticism so far as we know against the Reconstruction Finance Corporation's huge loans to railroads, banks, insurance companies, building and loan associations, and similar enterprises.

There has been no general complaint against the government for subsidizing a merchant marine, for financing the Inland Waterways Corp. on the Mississippi and its tributaries, for subsidizing second, third and fourth class mail, nor against many other services the government renders for the beneft of American citizens.

The discrimination against agriculture is not reasonable and that school of thought should not be countenanced by legislators when efforts are made at Washington to discriminate against farmers and their business institutions.

Handling Seeds Co-operatively

Farmers will welcome the news that a nation-wide co-operative seed handling service is being developed for their benefit by the Farmers National Grain Corporaton. In his annual address President Huff of the Farmers National said: "We have attempted to set up the seed handling operations in such a way as to effectively utilize all presently existing seed co-operatives, whether among producers or consumers of seed.

"No other requirement is made of a producer's seed co-operative than that it affiliate with some present stockholder of the Grain Corp. and that all marketing be to or through Farmers National. . . . We are attempting to give national extent and pattern to seed marketing; to secure more adequate returns to the farmer who grows seed for the market, and better seeds at more favorable prices for the farmer who must add the expense of purchased seed to the cost of producing his next crop."

This promises to be a worthwhile service and should result in reducing the spread between the price paid by farmers who buy and that received by the seed growers.

One of the remarkable incidents of the current economic situation is the large attendance at almost every great sporting event. Baseball games, prize fights, athletic contests, state fairs, horse races, and similar shows are attracting unprecedented crowds. There seems to be no lack of interest and money to pay admission fees for these events.

It is reported that the Illinois State Fair was more largely attended this year than at any time during recent years. Exhibits of crops and livestock were especially numerous. The chance to pick up a few dollars in premiums was not overlooked. Then, too, the Fair provides a comparatively inexpensive vacation for many who in more prosperous years would travel farther and stay longer.

Regardless of what people may think of the several proposals recently advanced by Gov. Franklin D. Roosevelt, the Democratic presidential nominee, to curb speculation and correct abuses which brought on and intensified the depression, his program to compel honesty and truth telling by promotors, investment bankers, and others who offer securities to the investing public will meet with general approval.

The orgy of financial piracy directed by greedy bankers, public utility magnates, and common promoters in the era preceding the market crash of 1929 should never have been tolerated. The excesses of this period which saw literally millions of small investors cleaned out of their life's savings would never have happened had bond and stock sellers been compelled to tell the truth about each issue.

"I propose that every effort be made to prevent the issue of manufactured and unnecessary securities of all kinds which are brought out merely for the purpose of enriching those who handle their sale to the public," said Gov. Roosevelt in his Columbus speech. "I further propose that with respect to legitimate securities the sellers shall tell the uses to which the money is put. This truth telling requires that definite and accurate statements be made to the buyers in respect to the bonuses and commissions the sellers are to receive; and furthermore true information as to the investment of principal, as to the true earnings, true liabilities and true assets of the corporation itself."

No one except those willing to see wholesale robbery of the innocent public continued, can object to more careful supervision and regulation by the government of such public offerings. Before the coming of stocks, bonds, and intangible property the rule of "caveat emptor" (let the buyer beware) might be defended on the ground that the buyer could see what he was getting. But we are living today in a different age. The rank and file of small investors have no way of judging whether or not a stock, bond, or other equity is worth the money. They must rely on the word of bankers and sellers who offer such "paper" for sale. The average prospectus sheet is framed deliberately to deceive the investor. If they do not actually lie, they usually resort to puffing, and withhold essential information to help the investor judge intelligently the degree of risk involved.

Prison sentences would be the penalty imposed upon fraudulent operators in many countries, but here we let most of them go. Will Rogers said with considerable truth after visiting a state prison "The trouble is they got the wrong crowd in there." Intrenched privilege may again shout "government in business" but their cry is that of the wolf deprived of its prey.

It's time the government got into the business of protecting its citizens against the buccaneers parading as respectable investment bankers, realtors, contractors, utility magnates and what not. Protection here is even more necessary than the police who guard us from the less hypocritical robbers who take our valuables by force rather than deceit. The tendency toward further consolidation in business makes such regulation all the more essential.—E. G. T.

Maintain Base Price For Milk at St. Louis

Settlement of a dealer-producer milk price controversy involving numerous St. Louis dealers and Sanitary Milk Producers, was announced recently in a report submitted by Dean Isidor Loeb of Washington University, arbitrator.

His decision permits the price for basic supply of milk to remain at the present figure of $1.74 per 100 pounds for 3.8 per cent milk, while the price for surplus milk was established on the average price of butterfat on the Chicago market for August, with the provision that it do not exceed 18 cents a pound.

The Pevely Dairy Co., which has never co-operated with the organized producers, has been constantly bearing down the price to the producer with the result that the dealers buying from the association claimed they were at a disadvantage in competing with Pevely.

The dealers sought a reduction in the existing base price, while the organized dairymen sought an increase.

Dean Loeb in announcing his decision explained that dealers buying on the base and surplus plan enjoy certain advantages of steady supply and quality, and that they can afford to absorb a temporary reduction in profit in the interest of retaining the co-operative's plan of operation.

Big Crowd Attends 14th Dist. Picnic, Monmouth

Between 6,000 and 7,000 people gathered at Monmouth Park in Warren county for the annual I. A. A. Farm Bureau district picnic on August 16. President Earl C. Smith and Mrs H. J. Meis, president of the Home Bureau Federation, were the principal speakers. The I. A. A. public address system carried the speeches far beyond the fringes of the audience.

A full program of contests, races, and events was run off in the morning and early afternoon. Henderson County's Baseball team defeated the McDonough County Farm Bureau nine in an unofficial game, McDonough having previously won the district championship.

Mr. Smith reviewed the economic history of American agriculture since 1920 and told of the long continued effort made by farm representatives to gain the attention of political and business leaders to the plight of the farm industry.

With all other groups prosperous, the farmer was given scant attention although industry was warned that it could not continue on a high place of prosperity for long with agriculture out of balance.

Today there is general recognition among business and industrial leaders that the farmer's buying power must be restored before normal employment and income can return to the cities. This is the one bright spot in the picture.

Mr. Smith later reviewed the tax reduction program of the Association over a period of years stating that the I. A. A. was one organization that had been working on the tax problem long before the depression intensified the burden.

Running Water In Movies

A one-act play "Running Water" written by Dorothea Barton, Jo-Daviess county, is being produced as a two-reel motion picture. This play was one of 12 awarded a prize in the play-writing contest sponsored in 1929 by the American Farm Bureau Federation.

E. W. (Farmer) Rusk, former agricultural adviser in Macoupin county, will play the part of the county agent in the screen version of the play.

Advance applications for bookings should be addressed to the Motion Picture Division, American Farm Bureau Federation, 58 E. Washington Street, Chicago.

Uncle Ab says it is a good plan always to have the courage to appear as good as you really are.

FIGHT THE FARM BOARD AND THE CO-OPS

Left to right at the banquet table are Peter Carey, president of the Chicago Board of Trade, and Congressman Shannon of Kansas City. The latter is chairman of the congressional committee investigating so-called "government-in-business." While 90 per cent of the government's services are in fields other than agriculture approximately 98 per cent of the testimony encouraged and offered by witnesses was against the Farm Board and government aid to co-operatives. The demand for the "investigation" is understood to have come from the grain exchanges.

"Whispering Campaign" Aims To Hurt Co-ops

Co-operative Marketing Groups Handled $2,400,000,000 Business Last Year

M. S. Winder, executive secretary of the American Farm Bureau Federation, sounded a new note in the struggle between the old line traders and the farm co-operative associations, when in an address at Ionia, Michigan, in August, he likened the attacks on the co-operative organizations to the "whispering campaigns" conducted by the "reds" to undermine the stability of American financial institutions.

Although handicapped by this unscrupulous "whispering campaign" the co-operative movement is making rapid progress throughout the nation, Mr. Winder declared. The co-operatives have been in the "big business" class for a number of years, he stated, pointing out that in 1930-31 the total business transacted by approximately 12,000 co-ops. was $2,400,000,000.

"In a period which will go down in history as the world's worst experience with hard times," he said, "certainly these figures are something of which farm business leaders can be proud.

"And yet, such organizations as the boards of trade and produce exchanges in Chicago and other large cities, some of the live stock exchanges, private commission houses, and others have thought it wise to conduct against these gigantic farmers' business enterprises a campaign of 'poison pen' propaganda the like of which no commercial institution, certainly none doing $2,400,000,000 worth of business a year, has ever encountered.

"The vicious, unprincipled attacks of these hostile agencies have but one aim. Their purpose is to destroy the gigantic co-operative business built up by the farmers on the principle that the middlemen alone have the right to control the marketing of the things they grow.

"The banks have some protection in law against the 'whisperers' who have been undermining public confidence in our financial institutions. Thus far, however, farmers have had to take the attacks of their enemies squarely on the chin, while they carry on trusting to the intelligence of farm people to recognize the source of the malicious propaganda."

A 75 Cent Breakfast

C. T. Croften, Farm Bureau member of Savanna, Carroll county, who was in Chicago recently computed the value of a 75 cent breakfast on a railroad diner in terms of farm commodities.

He figured that 75 cents at country prices would buy approximately three bushels of corn, or two and one-half bushels of wheat, four to five bushels of oats, five pounds of butterfat, 17 pounds of pork, seven and one-half dozen eggs, two four-pound hens, or a 10 gallon can of milk.

Notify us promptly if you move or change your address so you will continue receiving the I. A. A. RECORD and Bureau Farmer. Drop a card to the Mailing Department, Illinois Agricultural Association, 608 So. Dearborn St., Chicago.

Co-operation, Consolidation, or Decay

Farmers Must Take Their Choice of These Three For Their Industry

By Ray E. Miller

A good farmer in one of Illinois best counties remarked the other day that in spite of all he could do, in spite of the hardest kind of work by himself and family, he was face to face with the fact that his equity in his farm home was gradually slipping away from him.

He went ahead to say that he had done everything humanly possible as an individual to protect his property but that he had come to the realization that acting alone he was powerless. This farmer was willing to join forces with other farmers to act collectively in the interest of agriculture.

The avalanche of farm foreclosure continues. Where is it to end? Some of our best thinkers are stating in no uncertain terms that agriculture is at the cross-roads. The industry is faced either with corporate control of large areas of land—and a lot of our great insurance companies are already in the farming business—or individual farmers must join forces in doing those things which other industries are doing for their own protection.

Glenn Frank Said

Glenn Frank, president of the University of Wisconsin and one of America's foremost thinkers, said "A farmer must choose between co-operative and chain control. He must organize as the rest of economic America has organized or be lost in the shuffle." In another part of the same address he states, "He (the farmer) is today suffering the fate of the individualist in a corporate age." Unless individual farmers everywhere are willing to face these facts and not only face them but act upon them agriculture in this country will come to occupy a permanent position at the foot of the economic ladder.

Every industry passes through three rather definite stages of development. First, there is the period of experimentation, then there is a period of expansion and the third period which usually occurs with some variations is one of consolidation.

In the railroad industry there was first that period of experimentation with the funny little engines, the cars about the size of the modern truck, the wooden rails and all those other things which we regard as absurd now. Then there was the period of expansion when the steel ribbons were pushed across the uncharted prairies of this country and great railroad systems were developed. Giants in the railroad industry such as the Harrimans and Vanderbilts and all the rest, were part of that period of expansion. We are told that there were something over 8,000 railroad systems in operation at one time in this country. Now the railroad industry has reached the stage of consolidation and almost on every hand we see evidence of this tendency. Now the bulk of the railroad mileage is controlled by a few great systems.

Same Three Stages

In the automobile industry there were the same successive stages. Remember the sputtering little two cylinder Buicks and earlier still those high wheel crosses between the old fashioned buggy and the modern automobile. That was the period of experimentation. Then we had a period of expansion when the automobile industry grew by leaps and bounds into one of America's greatest industries. There were literally hundreds of automobile manufacturing concerns in operation. Later we had that same period of consolidation that we note in the case of the railroad. Now we have the General Motors group, Henry Ford, the Chrysler group and so on. One-half dozen great automobile groups manufacture the bulk of the cars. Most industries take more or less the same course.

Perhaps you are thinking that agriculture is an exception to this rule, but is it? Shortly after our country was first settled we had that same period of experimentation in which our pioneer forefathers were experimenting with the virgin soil on this continent. They were not only experimenting in methods of production but they were also experimenting in those methods of distribution which prevailed at that time.

Next we had the period of expansion and who is there who has not read thrilling stories of the prairie schooners that fought their way westward in the face of all sorts of obstacles. Indians, disease, starvation, uncertainty, hardships of all kinds that I am afraid would stop most of us moderns if we were called upon to undergo half of them. That was a period of expansion. The American agricultural industry developed from a few pioneer farmers clustered along the Atlantic seaboard until it reached its gigantic proportions of today with total investment of fifty-eight billion dollars producing annual gross income under normal conditions of around twelve billion dollars.

What does the future hold? Does agriculture face the next step through which the railroads, the automobiles, the airplanes, and other industries too numerous to mention, have gone through? Farm implement manufacturing, chain stores, theaters, newspapers and banks are other examples of the same thing. Is the farmer not facing some sort of consolidation?

There is no question but what American agriculture is today faced with one of perhaps three alternatives. Farmers must either consolidate their holdings into great operating units or cooperate in doing the things the individual cannot do for himself. The third alternative is continued and permanent economic ruin of the industry and poverty for the individual farmer.

Organize For Progress

A. E. Russell, the great Irish philosopher and thinker, said, "I assert that there never can be any progress in rural districts or any real prosperity without farmers' organizations or guilds. Wherever rural prosperity is reported of any country inquire into it and it will be found that it depends on rural organization. Wherever there is rural decay, if it is inquired into, it will be found that there was a rural population but no rural community, no organization, no guild to promote common interests and unite the countrymen in defense of them."

Russell recognizes that it is only through cooperative effort that the agricultural industry can cope with organized groups in other fields. There is the matter of taxes. Today real estate in the middle west bears about 85 to 90% of the taxes although producing not more than 10 to 20 per cent of the total income. There is the field of marketing. The farmer is compelled to take what's left after the middleman, the wholesaler, the manufacturer, the transporter has taken his toll. What remains, if any, is finally passed on back to the farmer for the subsistence of himself and family.

In the field of legislation we know that the politicians listen to those

who speak with the force of an organization behind them. How can the individual farmer expect to have his needs recognized if it is necessary for him to make his journey as an individual down to Washington or to the State Capital where he may "buttonhole" the representatives and senators and plead his cause as a farmer from Podunk. The idea is absurd.

Half Slave—Half Free

Owen D. Young, in an article published in Collier's under date of July 9, said, "Take this country as an example. Here we are down in the depths. Why? Partly, I think, because for years we have tried to live half slave and half free. That's exactly what I mean; half slave and half free. For selfish reasons, which can be ascribed about equally to industry and politics, we have created an exclusive tariff barrier around this country behind which the industrial half of our people are free to make a profit out of their activities, while at the same time the unprotected other half, the agricultural half, is held in bondage not only to the first half but also to the competition of the world as well."

Should any more convincing argument be needed to the American farmer to interest him in the work which he can do in cooperation with men of similar interests but which he cannot do if he persists with his individualistic ideas? On every hand we see evidence of the concrete advantages obtained through organized groups.

Too Much Indifference

In the field of taxation a start has been made both in Illinois and Missouri, and in fact in twenty states, where income taxes or other new sources of revenue have been tapped and made to bear some share of the expense of government.

In the field of marketing it would be difficult to find better examples of concrete advantages than you have right here in St. Louis. The Producers Live Stock Commission Association, beginning only ten years ago without a dollar—in fact they were $5,000 in debt—have been able to send back to the country through earnings and refunds on commissions paid, over $1,150,000, an average of more than $100,000.00 a year. The Sanitary Milk Producers Association today is fighting to send back to its members a fair price for milk, without penalizing the consumer.

Examples of the benefits of cooperative legislative action are too numerous to mention but bear out the fact that agriculture must find expression through organized groups if it is to protect itself and the American standard of living for American agriculture.

The other day throughout Illinois the 4th of July was celebrated by County Farm Bureaus in over ninety counties. It was made not only a day of celebration but a day of dedication. A dedication of the energies, resources and man-power of agriculture toward the perpetuation of agriculture as a basic industry on a fair and just economical scale. As a part of the proceedings a number of the enemies of agriculture were burned in effigy. Among these was Old Man Indifference. It seems to me that the farmers have no worse enemy than Old Man Indifference. Even though a farmer may be financially independent at the present time he has no right to assume an indifferent attitude because unless he does bestir himself, eventually he too will suffer the burdens of taxation, marketing costs and legislative injustice crowded upon all farmers alike unless they all act collectively to protect the industry.

Note: From a recent radio address delivered over Station KMOX, St. Louis by Mr. Miller.

St. Louis Producers Host To 200 Visitors

Approximately 200 livestock growers in the St. Louis territory, representing 40 counties, gathered at E. St. Louis August 18 to tour the livestock market and review the progress of the St. Louis Producers.

J. R. Fulkerson, president of the Producers, called the meeting to order and presided during the program. C. B. Denman, livestock member of the Federal Farm Board, attended the meeting and gave an interesting talk about the progress made in co-operative marketing since the Farm Board came into existence.

American agriculture is a piker when it comes to asking relief from the government compared with other economic groups in our national life, said Mr. Denman. Other interests are getting far more financial aid from the government than is agriculture. Mr. Denman referred to the large loans made and being made by the Reconstruction Finance Corporation.

Among those participating in the program were H. D. Wright, manager of the St. Louis Producers who explained the new commission rates; P. O. Wilson, secretary of the National Livestock Marketing Association who gave a progress report; and Ray Miller of the I. A. A. who led discussions of plans for the completion of county livestock marketing programs.

R. F. C. Loans Near One And Quarter Billions

How business and financial organizations secured more than twice as much money in loans from the federal government as agricultural co-operatives was revealed recently in a report submitted by Ogden L. Mills, secretary of the treasury.

R. F. C. loans to banks, railroads, insurance companies and other institutions totaled $1,219,000,000. Mr. Mills reported that 6345 loans were extended to 4747 different institutions. Of the amount stated above $976,000,000 had been paid on Aug. 19 and only $110,000,000 returned.

The most money ever authorized to be loaned to co-operatives and for use by the Farm Board in stabilization operations to prevent a collapse of farm commodity prices and with it countless banks in 1929-30 was $500,000,000. The Farm Board never used all the appropriation and subsequently a substantial part of this sum was turned over to the Red Cross in the form of wheat and cotton.

A higher percentage of its loans to co-operatives have been returned than that shown by the Reconstruction Finance Corporation.

Loans by the Reconstruction Finance Corporation were distributed as follows:

4190 banks and trust companies—$736,000,000 including $30,000,000 to aid in reorganization and liquidation of 34 closed banks.

43 railroads—$230,000,000

541 building and loan associations—$68,000,000

73 insurance companies—$67,000,000

60 mortgage loan companies—$81,000,000

10 agricultural credit corporations—$767,000

14 livestock credit corporations—$8,000,000

8 federal land banks—$26,000,000

5 joint stock land banks—$1,500,000 (approximately)

3 credit unions—$405,000.

Mills reported that 70 per cent of the banks obtaining loans were in towns of less than 5,000 population, 86 per cent in towns of less than 25,000 people, and 90 per cent in towns of less than 90 per cent.

More than 20 per cent of all banks in the United States received loans, these banks having about 15,000,000 of the 40,000,000 depositors in the United States.

Loans to banks in the smaller cities were relatively small running from $25,000 in many instances up to $100,000 or more. The banks in the big cities, however, received heavy loans, one bank in Chicago, according to reports, receiving $80,000,000 alone.

As we go to press the race for the championship in the Illinois Farm Bureau Baseball League is narrowing down to a handful of divisional winners.

Christian county came out on top in the first inter-divisional contest of the quarter finals with Macon winning in two successive games. Livingston and Will counties were scheduled to settle their quarter-final series on August 27. They split the first two games.

Marshall-Putnam and McDonough are hooked up in another quarter-final series, Carroll and DeKalb in a third.

Morgan county, winner in its division, will probably play Christian in its first inter-divisional contest.

The fact that there are nine divisions in the League this year may complicate the play-off for the state title. At this writing an effort is being made to get Christian county to play an extra quarter-final series against Morgan to determine which shall go on into the semi-finals.

While this plan puts Christian county at a disadvantage, there is likelihood that a series will be so arranged to expedite the early completion of the championship race.

In the event that a contest cannot be arranged between Morgan and Christian, the former will be matched against one of the losing teams in the various quarter-final series. The losing teams will be required to draw lots to see which one plays Morgan and thereby renews its chance at the state title. The remaining teams in the quarter and semi-final series will then draw lots to see which one stays out each time until only two teams are left to play for the state championship. If the state contest is run off under the "bye" system there is likelihood that the final series will not be played until late in October unless the teams consent to play several games a week.

The nine divisional winners in the state League are Livingston, Will, McDonough, Marshall-Putnam, DeKalb, Carroll, Macon, Christian, and Morgan counties.

Barley, oats, buckwheat, and wheat, all lost money for the labor of growing them in New York state last year, according to farm accounts.

Accident Prevention Campaign Is Underway

From September 1 on through until the last day of November, Farm Bureau members in Illinois will take part in a state-wide accident prevention campaign sponsored by the I. A. A. insurance department.

Recruits will be sought in the Illinois Farm Bureau Safety Club and present members will be urged to renew their study and observance of accident prevention measures.

Illinois Farm Bureau members now have the lowest state-wide automobile insurance company in the Illinois Agricultural Mutual, organized by the Illinois Agricultural Association, and every effort is being made through accident prevention to keep down the cost. Up to date this effort has been successful. While many companies have been forced to increase their rates, the I. A. A. company has held down assessments because its policy holders as a group are careful drivers.

Our country needs more no-accident drivers, observes the National Safety Council. In these days preceding election, when everyone is being told what he can do for his country and what it is America needs, every good citizen can start a little campaign of his own as a candidate as a no-accident driver.

You can cast a vote for safety every time you sit down behind the wheel of your car. If enough candidates of the no-accident driver party are successful in getting votes for safety, literally thousands of lives can be saved in America during the next twelve months.

So why not get on the bandwagon in this worthwhile movement? Do your bit to check the peace-time war which is slaughtering more than 33,000 Americans each year. Toss your hat in the ring and start a one-man campaign that will assure you of a clear conscience when the motor vehicle death totals are figured up at one end of the year.

Which is safer, you or your car? You can answer that question specifically for yourself, but we can tell you the answer for the country at large. The car is the safest part of the combination; the driver the more dangerous by far.

Eighty-five to 90 per cent of all automobile accidents are caused by the *driver*, according to a recent analysis made by the National Safety Council. Automobiles, especially those that are relatively new or have been kept in good condition, are just about as safe as engineering science can make them. The driver has a long way to go before he attains an equal state of perfection.

HORSESHOE Tournament

The Century of Progress Exposition announces a horseshoe pitching tournament open to all comers in the central states on September 22 and 23, 1932. The contest will begin at 10:00 A. M. and is open to Farm Bureau teams.

The tournament will take place in the amusement section on the Century of Progress grounds near the replica of old Ft. Dearborn on the Lake front.

There will be no entrance fee. Prizes will be offered but they have not yet been announced. The contest will be in charge of Harvey J. Sconce, chairman of the Agricultural Division, Century of Progress, Chicago. Contestants should make their entries without delay.

Mr. Sconce explained that the tournament is being held this fall with the idea of arousing interest in a much larger tournament to be staged while the exposition is in full swing next year.

Beef Cattle Numbers Greatest Since 1928

The number of cattle on farms has been increasing since 1928 and it is expected to result in a marked increase in cattle slaughter within the next few years according to the Bureau of Agricultural Economics. The number slaughtered during the first half of 1932 was the smallest for the period in many years, the report states. If this slaughter continues small during the remainder of the year the number of cows on farms January 1, 1933, will be near the largest total ever recorded in this country.

Although the total number of cattle in the United States is larger than a year ago, the number on feed is smaller. Marketings of grass cattle from the Western States during the remainder of the year probably will be larger than in the corresponding period last year. Because of favorable range and feed conditions, grass cattle marketed this fall are expected to be in better flesh than those marketed last fall, and the time of their movement is likely to be somewhat later than usual. Present indications are that market supplies of grain-fed cattle during the remainder of the summer and the early fall will be smaller than those of a year earlier, but that supplies of such cattle during the late fall and early winter will be larger.

To Finance Movement Of Staple Commodities

New Corporation Created To Stimulate Trade, May Improve Prices

The Commodities Finance Corp. "to finance manufacturers and others in processing and moving commodities" particularly in inland cities where sufficient credit is not available, was proposed recently by Eugene Meyer, chairman of the Federal Reserve Board.

According to the announced plan of organization, the corporation will be authorized to issue $50,000,000 of notes for which New York banks will be asked to subscribe. The stock in two wholly owned subsidiaries, one an acceptance corporation, the other a finance corporation, is to be offered as collateral.

It is reported that the corporation will not buy commodities including farm products itself, but will make loans to established processors and others to assist them in carrying on their business. The purpose of the new movement according to the announcement is to employ some of the $230,000,000 of excess reserves in New York banks to stimulate the movement of commodities.

Banks Pick Directors

The corporation will be governed by a board of directors chosen from the subscribing banks.

It was announced on Aug. 23 that Mortimer N. Buckner head of the New York Clearing House Ass'n. had been elected president at the first meeting of the board, and C. A. McCain of the Chase National Bank, chairman of the executive committee.

There is some conjecture as to whether this organization represents the administration's plan for carrying out the agricultural provisions of the new Reconstruction Finance Corp. Act passed in the last session of congress.

Section D of the Act provides that the Reconstruction Finance Corp. is authorized to make loans to bona fide financing institutions to enable them to carry and market in an orderly manner agricultural commodities and livestock produced in the United States.

Presumably the Commodities Finance Corp, will make loans for the carrying, processing, and marketing of both agricultural and non-agricultural commodities.

Apparently an effort will be made to achieve the desired results without government aid, but if further money is needed to finance the movement of farm products, the Reconstruction Finance Corp. will undoubtedly come to the rescue.

Spreading Propaganda In Central Illinois

J. W. Brinton, author of a recent book attacking the Farmers National Grain Corp. and the Farm Board, is reported to be spreading propaganda against the Farmers National and Illinois Grain Corp. in central Illinois.

Brinton is an old-time farm organizer and was formerly with the Non-Partisan League which controlled politics in North Dakota for several years. Later he was connected with the Minnesota Wheat Growers and the Nebraska Wheat pool. More recently he sought jobs with the Farmers National Grain Corp. and the Federal Farm Board but without success.

It is reported that he is now working for the grain trade in an effort to undermine farmers' confidence in their co-operative grain marketing endeavors.

The Farmers National Grain Corp. some time ago published a complete reply to the many charges made in Brinton's book. Copies may be had by writing the Farmers National Grain Corp., Fisher Bldg., Chicago. The grain trade is leaving no stone unturned to fight co-operative marketing and ruin, if possible, all farmers' efforts to control their own marketing system.

Protests Against Cheap Imports of Tapioca

Protection for Illinois corn growers against competition of imported tapioca is being stressed by D. C. Dobbins of Champaign, Democratic candidate for Congress in the 19th district, in talks before farmers.

Congress permits tapioca, which is almost a perfect substitute in many uses for corn, to come into the United States free of import duty, said Mr. Dobbins. Because of its cheapness, cotton and paper mills all over the United States, and particularly near the seaboard and in the south, use tapioca instead of corn starch in their processes.

Western factories are thus deprived of markets that would greatly stimulate employment in that section. This cheap foreign substitute utterly destroys a market every year for from 5,000,000 to 10,000,000 bushels of corn. If our corn growers were given protection against competition of this kind, as other producers and favored manufacturers are protected, a better market for corn would result.

Practically all of the tapioca imported into America comes from the Dutch East Indies where the cassaba plant from which tapioca is derived is grown by coolie labor for a daily wage of a few cents.

Rock Island County Reports Lower Taxes

Substantial reductions in 1932 tax levies for school districts were reported on August 22 by the Rock Island County Farm Bureau largely as a result of its current and past work in seeking lower taxes in that county.

Tax levies for school districts of Rock Island county announced by County Clerk C. N. Isaacson for 1932 payable in 1933, revealed substantial reductions in the majority of the 107 school districts listed in the report.

In Rural Township, for example, there was a reduction of approximately $3,000 in levies for 1932. In this township there are 119 farms according to the recent U. S. census which means that the saving in school taxes alone in 1933 will average slightly more than $25 per farm.

John R. Spencer, farm adviser, reports that the County Farm Bureau tax committee has secured complete figures for the past eight years under the general county tax of 25 cents, and is securing other figures for three additional county tax levies including the T. B. Sanitarium, county highways, and bond issues.

The Farm Bureau secured the cooperation of the Moline and Rock Island Chambers of Commerce in the county tax study.

Ask 25% Cut In Macon

The Macon County Farm Bureau public relations committee, led by Archie P. McIntosh, chairman, asked for a 25 per cent cut in farm land taxes in a public hearing before the county board of review early in August.

"We are asking the cut in valuations with the conviction that the local governments will be able to carry on with the reduced income from taxes," said McIntosh. "They can manage. If they don't have the money to spend, they won't spend it."

Asks Tax Cut

The Montgomery County Farm Bureau recently filed a petition with the Board of Review asking for a flat reduction of 10 per cent on the assessment of all farm lands in the county for the present year.

The crow eats most grain in winter; when he is supposed to be eating or pulling corn, he is usually hunting grubs.

DAIRY Marketing

The organized milk dealers of Rock Island, Davenport, and Moline recently refused to deal with the Quality Milk Association representing more than 800 dairymen in that territory in the sale of their milk.

While declining to recognize the right of farmers to bargain collectively they insist on operating through a strong dealers' organization themselves.

The producers offered to sell the dealers all the milk needed for their fluid milk trade and to take care of their own surplus.

Whole milk for the fluid trade was offered at $1.85 a hundred, the present price, which the dealers said would be too high if they got no surplus. Representatives of the producers countered by asking if this was not an admission that the dealers are not paying $1.85 now for fluid milk but are using surplus for fluid purposes. The dealers could not answer this question.

The dealers asked for an absolute guarantee that the farmers will not go into business for themselves, they asked for complete protection of all price cutting of competitors which they don't have now and never will have. The dealers refused to buy butter made in the association plant stating that they can make it cheaper with the producers' surplus milk than can the association.

The dealers insist that the farmers have no right to organize, that they are satisfied and don't want an organization, that it is ill-advised, wrongly promoted, and that when the organization accumulates funds through a check-off it will give the organized dairymen too much power.

The dealers have nothing to offer in place of the proposal of the organized dairymen, and insist that they will buy milk from individuals only, according to their own prices and grades.

The dairymen in the meantime refuse to be bluffed. They have completed the financing and lease of a plant to manufacture butter and other dairy products from their surplus milk. At this writing they plan, beginning Aug. 30, to deliver the milk from some 800 farms to their own plant unless the dealers come to terms and recognize farmers' rights to bargain collectively in the sale of their products.

The Quality Milk Association controls about 85 per cent of the milk going to the organized dealers on the quad-cities' market. Unless the two groups get together presumably the dealers will attempt to ship in milk from distant centers of production. One friendly milk processor who was refused membership in the organized dealers bottle exchange, will begin distributing fluid milk on Aug. 30 in fibre bottles, co-operating with the producers and paying $1.85 per cwt. for all milk going into the fluid trade. "And you can check my sales every day if you like," he said. The other dealers refused to let the producers see their records so they could determine what percentage of milk was going into the fluid trade and how much manufactured into butter and other products.

This situation reveals the problems farmers face in seeking to obtain a voice in the sale of their products. Every organized effort of producers meets with similar opposition when it seeks to overcome special privilege or monopoly and gain economic justice.

The solution of this and similar problems is up to the producers. Are they going to be pushed around by organized dealers who themselves insist on dealing collectively while refusing to recognize the right of producers to do likewise?

The distribution of fluid milk and cream has been one of the few industries that has thrived throughout the present depression. Four leading dairy distributing chains of America show a 40 per cent increase in net profits from the period 1929 to 1931. During the same time farmers' income declined approximately 40 per cent. Thus, through organization and semi-monopolies, these distributors were able largely to dictate prices and maintain high average profits while the price paid the farmer constantly diminished.

Middlemen who have an unfair advantage in the setting of prices to their own profit will not relinquish this privilege without a struggle. Farmers can meet such opposition only with more thorough organization and a determination to fight for their rights.

"Probably the low point in prices of stocks, bonds, and basic commodities has been passed, but the world monetary chaos is still with us. For the next ten years, world demand for gold will probably be the major factor affecting prices, as it has been for the past seventeen years. Caution about debts continues to be good advice."—G. F. Warren, August, 1932.

Livestock Marketing

Feeders who are in need of financial assistance to carry on their feeding operations should apply to the National Live Stock Credit Corporation of St. Louis.

The National Live Stock Credit Corporation is owned and operated by the live stock feeders through their Producer terminal sales agencies, and has been engaged in financing feeders for over eight years. This organization was recently enlarged to such an extent that it is now in a position to handle the needs of any reliable and experienced feeder.

Loans are at 6% net, taking a promissory note, secured by a chattel mortgage on the stock purchased, together with the feed necessary to finish them. They loan a varying percentage of the appraised value of the stock depending upon the grade and the financial standing of the borrower.

These loans are made for nine months in case of cattle, and six months for sheep with the amount loaned in general running from 80% down in the case of cattle, and 75% down in the case of sheep.

For additional information write directly to the National Live Stock Credit Corporation, 228 N. LaSalle St., Chicago, Ill.

A black, neatly polished steer calf belonging to Robert Woolsey of Williamsfield, in Knox county, sold for top price of all 4-H Club calves on Aug. 23 in the first calf club auction of the year, conducted by the International Livestock Exposition at the Union Stock Yards, Chicago. Between 250 and 300 calves were auctioned off by Carey M. Jones. The Woolsey calf selling for $9.75 per hundred pounds was the only calf of the entire sale to bring that price. Armour and Company was the buyer.

A total of 39 calves were sold from Knox county yesterday on a market that had declined $1 per hundred from the values a week previous, market quotations on 900 to 1100 pound steers ranging from $6.50 for medium grade to $8 for good steers. A total of 25 of the 39 Knox county calves sold for $8, or better.

Stronger Wool Market Reported By National

We can report another week of very satisfactory sales with values showing decidedly advancing tendencies, reports the National Wool

When the driver lost control, this truck jumped the curb and took the side of the house off before turning over.

Accidents are *EXPENSIVE!*

Are you prepared to pay court costs, lawyer's fees, hospital and repair bills- out of your present bank account?

IN case of an accident it makes no difference who is at fault. If you are uninsured you are immediately in serious trouble. The other party may admit his share of the blame or he may force you to secure expensive legal representation to protect your interests. You cannot afford this expense.

Besides the cash, it will cost you much valuable time if you are uninsured. If you are a property owner a judgment may wipe out part if not all your estate. Judgments up to $5,000 and more are common.

A policy in the Illinois Agricultural Mutual, your own company, is available at money-saving rates. You can save your Farm Bureau dues on this service alone.

Experience shows that our 30,000 Farm Bureau member policy holders are above the average as careful drivers. Accident prevention work through our Safety Club is proving effective. With fewer numbers of accidents among policy holders, semi-annual assessments in this company are proportionally lower.

As a Farm Bureau member, you are privileged to insure with your own company at the low rates other members are paying. Call your local Farm Bureau office or write to the

Issues Last Call For 1932 Tax Reductions

I. A. A. Tax Director Tells Farm Bureau Committees How To Go About It

The last call for tax reductions for all county purposes was issued recently by John C. Watson, director of taxation, in a letter to the County Farm Bureau tax committees.

Every county having a board of supervisors is required by statute to make tax levies in the week beginning Tuesday, September 13. In counties having a board of county commissioners, except Cook county, tax levies must be made beginning Monday, September 19.

JOHN WATSON

Each county board is required by law to prepare a budget of expenditures, setting forth the various purposes for which expenditures are believed necessary or desirable and the amounts proposed to be expended for each purpose in the next fiscal year.

Estimate Income

Good practice requires that before determining the amount which must be levied in general taxes on property, said Mr. Watson, each county board shall first estimate, as accurately as possible, the revenue of the county general fund which, on the basis of previous experience, may be reasonably expected during the fiscal year from:

1. The fees collected by each fee officer after deduction therefrom of the salary of the fee officer, the compensation of other employees in his office, and other necessary expense of the office.

2. Other county non-property sources, such as the county farm.

3. Refund of the State's share of blind pensions and mothers' pensions previously paid by the county.

The sum of all revenues which may be reasonably expected from non-property sources should be deducted from the total general county levy. The remainder, if not requiring more than the maximum tax rate permitted by law, represents the levy which must be made upon valuations of all assessed taxable property for the current year.

Mr. Watson suggested that each county tax committee should request a conference with the finance committee and the chairman of the board of supervisors in counties having township organization, or with the county commissioners in other counties. In either case, the county clerk and county treasurer should usually be included in the conference, he said.

What To Consider

"In the conference each county tax committee should, with constructive and helpful purposes, ask for further information about any matters which are not clear. In particular the conference should discuss such matters as illegal levies, if any, and tax objections thereto, the method of determining appropriations for the various items of the county budget in each of the last two years, the degree to which actual expenditures for various items agree with appropriations therefor, the amount of revenue from non-property sources, delinquent taxes and measures taken to require their collection, county indebtedness of any kind and methods of reducing or paying same, reports required by law either of the county board or of county officers, and the necessity of having all audits required by law made by unbiased persons who not only are competent and experienced in accounting but are familiar with the statutes relating to county government.

"If any county tax committee is convinced that *expenditures are being made for political or other useless purposes, it should ask the county board to eliminate them.* The conference should also carefully consider any expenditures for *non-essential, even though desirable, purposes which might temporarily be reduced or even omitted.*

Reduction In Pay

"The conference in each county should carefully consider a temporary reduction, wherever legally permissible, *in the compensation of county employees commensurate with the reduction made in wages and salaries paid to employes by private employers.* Due to constitutional restrictions, reduction by county boards in the compensation of county officers is permissible this year *only in the case of circuit clerks and recorders, who are to be elected this fall.* In case of all other county officers, reductions will be valid only with the consent or by the voluntary action of the officers themselves. But the county board has power at any time to adjust the compensation of all other county employees, including deputies and clerks in the fee offices, *but only, in the case of each fee office, if the county board has followed the better practice of allowing a specified amount for such expense apart from the compensation of each fee officer himself.*

"All reductions in county costs effected by any economies should be fully reflected either in the coming levy of taxes by the county board or, in counties which have unpaid obligations, in specific provision for their payment."

STRONGER WOOL MARKET REPORTED BY NATIONAL

(*Continued from page* 15)

Marketing Corp. for the week ending Aug. 20.

Private wool dealers have followed the lead of the National when it advanced its holding prices 5 cents per clean pound one week ago. The situation is, therefore, strong.

Choice Fine Territory wool, graded for staple, has touched 40 cents, clean. Owing to the scarcity of rain and resulting unfavorable range conditions in many producing sections during the growing season, the supply of staple wool is limited. For this reason the National can see no necessity for offering its holdings in volume at this moment. Choice Territory Fine wools, with a sprinkling of Half-blood, have also touched 40 cents, clean, in the original bags.

Topmaking wools, in the original bags, are obtainable at from 35 to 38 cents, according to quality. Half-blood graded wools are firm at 38 cents, clean. Choice territory Three-eighths blood is very firm at 32 to 33 cents, clean, while ordinary wools of this grade may be had at 30 cents, clean. Quarterblood territories are difficult to obtain under 30 cents or slightly more.

This strong situation has brought on renewed buying activities in the West, and prices all the way from 2 to 3 and 4 cents, in the grease, over prices obtainable at shearing time, have been paid.

A GREAT DEAL of wool has changed hands during the past 2½ weeks. Topmakers and manufacturers are still eager to buy in quantity at the old prices, but are finding it more and more difficult to trade on this basis. It is evident that many mills are now accumulating stocks for future needs. In these circumstances the National, being strongly financed, is pursuing a policy of conservative selling but cannot well refuse to consider offers from its regular customers based on its latest quotations. To date the National has sold only 10 per cent from its holdings of 1932 wool, believing it possible to obtain somewhat better prices as the season advances.

Uncle Ab says he is not sure which is worse, the knocker or the booster; one means deflation and the other inflation, and both are bad.

Farmers Unorganized Haven't Got a Chance

Handful of Rich Southern Cotton Shippers Block Legislation

Through the efforts of lobbyists working for the 600 members of the old line southern cotton shippers, legislation of undoubted benefit to two million southern cotton farmers was defeated shortly before adjournment of Congress, M. S. Winder, secretary of the American Farm Bureau Federation, charged in an address at the Louisiana Agricultural College recently. Winder stated that while the private cotton shippers number approximately 600, in reality the situation was handled on behalf of 68 men who control the bulk of the business done by the shipping associations.

"In other words," said Mr. Winder, "sixty-eight men were able to impress their will on the nation in a matter adversely affecting 2,000,000 farmers. It happened because the 2,000,000 were not organized to defend their own rights."

Directing his remarks largely to a discussion of the sources and results of the vicious propaganda campaign aimed to destroy the Agricultural Marketing Act, Mr. Winder declared it is easy to understand why those who deal in agricultural commodities are so desperately opposed to the co-operative marketing movement.

"Not for years," he said, "have our farmers been able to secure a price that would pay for cost of production of their wheat and cotton and yet these traders on the commodity exchanges have been making rich profits from their deals in our farm products."

Cash to Canada

In Chicago, he said, one prominent operator on the Chicago Board of Trade has been reported recently as having endowed sums ranging above $1,000,000 on each of his brothers and sisters, all of whom are Canadian citizens.

"The strange thing about it," said Mr. Winder, "is that this man himself is a Canadian by birth, who came to this country when a boy and made his money by deals in wheat. And yet, lately he has been one of the principal critics of the Agricultural Marketing Act and the Federal Farm Board, the agency designed to help the farmers retain some of those millions the grain traders have taken from them."

In the middle west, Mr. Winder charged, the head and front of the attack on the co-operative movement is an organization calling itself the Federation of American Business.

"If you read their statement of policy," he said, "it sounds so constructive that anyone could subscribe it. Actually, however, the Federation of American Business has concentrated its efforts almost entirely on a campaign of misrepresentation to discredit the Agricultural Marketing Act and deal a fatal blow to co-operative marketing. That is easy to understand since the board of directors of the organization is composed almost entirely of representatives of the selfish speculative groups who operate on the grain, live stock and produce exchanges.

The Old Game

"The most unfortunate feature of the whole attack," he continued, "is the fact that these enemy groups do not attack us by themselves alone. Instead they make use of the great army of unorganized farmers to carry on the attack for them. Farmers who are under obligations to the old line market operators are lined up at the Shannon investigation hearings to testify as farmers against the Marketing Act and the activities of the co-operatives.

"Farmers must remember that the real purpose of the attacks on the Farm Board is the ultimate destruction of the farm co-operative associations, whose success threatens the hold the old line operators have on the distribution of agricultural commodities."

While spokesmen for the enemies of the farmers charge that since creation of the Farm Board, the prices of all agricultural commodities have declined, they carefully avoid all reference to the fact that most other articles of commerce have gone down even farther than the farm products, Mr. Winder pointed out.

"It is true," he said, "that the price of wheat has dropped from the high average cash price for all grades and classes, of $1.34 in 1929 to its present price between 50 and 60 cents, a drop of more than 50 per cent in three years. It is true that the 1929 high for middling spot cotton in 1929 was 19.33 cents and the current price is now 66 per cent below that figure or around six cents. It is true that steers have declined 56 per cent in the three year period. But if the enemies of co-operative effort were honest they would also tell you that a study of market prices for fifty leading industrial stock show a drop of 85 per cent in value for the same period. They would tell you that twenty leading rail stocks suffered a drop in value of 91.4 per cent since 1929. They would tell you that the copper and brass group declined 79.45 per cent, that the drop in General Motors values was 69.90 per cent; that U. S. Steel has been worth only 54.50 per cent of its 1929 value, and that the New York city banks suffered a shrinkage in value of 71.29 per cent."

Will Keep The Act

Mr. Winder declared that every member of the Farm Bureau and every organized farm group in the land must join in a demand that the Agricultural Marketing Act be retained on the statute books for the benefit of American agriculture.

"If any change is made," he said, "let it be strengthened and improved so that it can more effectively do the work it is designed to do. To do that we farmers must, regardless of our political affiliations, immediately set about it to counteract the destructive propaganda of the special interests. We must convey to every candidate for Congress and to both presidential candidates our demand that the Marketing Act be retained. Otherwise, if Congress, aroused by the selfish insincere clamor against the Act, should repeal it, the co-operative marketing movement would be set back ten years."

Mr. Winder declared emphatically that the Farm Bureau organization is in favor of reductions in the cost of government on an impartial basis without discrimination against agriculture.

FARMER'S NATIONAL HAS GOOD YEAR

(*Continued from page* 7)

"Had farmers followed the advice long offered by business leaders to 'put business practices into farming' they would have done as business has done in closing plants, discharging men and resisting price declines," Mr. Gregory said. "This would have kept food prices high. Charitable organizations then could not have bought enough food to feed the hungry, and the depression would have ended long since either by application of effective remedies or by the revolt of the hungry. On the other hand, had business followed the example of agriculture, producing normally and selling its product for what it would bring, adjustment would have been completed sooner and the depression could not have lasted three years."

All of the directors of the Farmers National were re-elected with three exceptions: Carl J. Martin of Lansing, Michigan, was chosen to succeed L. J. Taber of Ohio; A. R. Shumway of Milton, Oregon succeeded F. J. Wilmer; and Wm. A. Schuldberg of Preston, Idaho, succeeded Jess W. Wade. D. L. O'Connor of St. Paul, Minn., became a member of the executive committee. C. E. Huff of Salina, Kansas was re-elected president; W. H. Settle, Indianapolis, Indiana, first vice-president; and C. B. Steward, Lincoln, Neb., secretary.

Throw Off The $5,000,000

Vote for and Work for the Passage of the Emergency Relief Bond Issue on November 8

PROSPECTS for a state tax rate for next year of approximately twice the 1931 rate looms ahead unless the voters of Illinois pass the proposed bond issue for $20,000,000 in the election on November 8.

It is conservatively estimated that the farm owners and farmers will pay an extra $5,000,000 in state taxes on farm lands and personal property next year unless the bond issue providing for the shifting of this burden to the counties' share of gas tax funds, carries.

According to John C. Watson, director of taxation, the increase in taxes would amount to approximately $25 on the average quarter section farm. It will probably mean an increase in the state tax rate of around 35 cents on each $100 of assessed valuation.

Based on this rate the increase in taxes on farm property and total property is estimated for each county on the pages following.

Allotments of state relief funds have been 91.4% to Cook county, and 7.3% to 38 downstate counties with 1.3% left for expenses, overhead, and reserve.

An explanation of the situation which gave rise to the proposed bond issue follows:

Early in February, 1932, a series of bills enacted into law at Springfield provided relief for residents of the state who were destitute by reason of unemployment or otherwise.

These measures created the Illinois Emergency Relief Commission, and the sum of $20,000,000 was appropriated thereto. Funds for immediate use were provided by authorizing the sale of state warrants in the sum of $18,750,000 in anticipation of collection of taxes in 1933.

In order to provide a legal basis for the issue of such warrants, an additional state tax of $25,000,000 was authorized upon all assessed taxable property for the year 1932, payable in 1933. At the same time a proposed state bond issue of $20,000,000 to redeem all such anticipation warrants and interest accrued thereon was submitted to the electors of the state to be voted on in the general election in November, 1932. If the bond issue is approved, it was provided that the additional state tax of $25,000,000 on all property should not be levied.

If the bond issue is approved, the state is authorized to withhold from each allotment of money to counties under the motor fuel tax law (gasoline tax act) an amount sufficient to pay such bonds and interest as they come due. The amount must be withheld from the different counties in the same proportion that the emergency relief funds expended in each county bear to the total relief funds expended in the state. Under this plan any counties *WHICH HAVE NOT RECEIVED STATE RELIEF FUNDS WILL PAY NO PART OF THE COST OF THE SAME.*

This rather complicated arrangement was unavoidable because private relief funds in Cook County were practically exhausted and public funds had to be raised at once to prevent actual starvation. Because of tax delays and tax delinquencies, Cook County, where the need was greatest, had been unable to sell its own relief bond issues. The state's credit, however, was good and could be, and was used, to borrow against the aforesaid $25,000,000 state tax levy. *This levy,* as before stated, *will not be imposed if the bond issue is approved.*

However, if the bond issue fails of approval, an additional state tax of $25,000,000 on 1932 values, payable next year, will necessarily be levied on all assessed taxable property in the state. This means that the 1931 state tax rate of 39 cents must be nearly doubled in 1932. If such increased state taxes are required, they must be levied in every county, whether it has received any state relief funds or not.

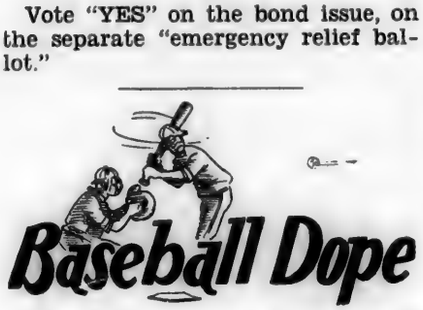
This heavy increase in property taxes can be avoided only by approval of the bond issue. Every owner of property, whether real or personal, should vote and work for

Pass the Bond Issue

FARMERS and farm owners in Illinois are facing an increase of $5,000,000 in state taxes on their property this year unless the proposed state bond issue for $20,000,000 is approved in the election on Nov. 8. This increase would amount to $25 on the average quarter section farm. In many counties it would wipe out all decreases in taxes due to cuts both in valuations of property and in levies of taxes for county and local purposes already made this year.

The property owners of Illinois must understand that this extra burden of taxation now rests on them. The power of the state to tax property is pledged to pay back this money already spent. The only way property owners can throw off the load is to pass the state bond issue in the general election on November 8, thus shifting the burden solely to counties in which state relief funds have been expended. Bonds will then be paid over a period of years, out of each county's share of gasoline tax funds, in proportion to the expenditure of state relief funds therein.

To pass, the bond issue must receive a majority of all votes cast for candidates for the lower House of the state legislature. It is imperative that every voter go to the polls Nov. 8 and cast his or her ballot for this measure.



(Signed) EARL C. SMITH, Chairman,
State Emergency Relief Bond
Issue Committee.

its approval on November 8th.

To be approved, the bond issue must receive a majority of all votes cast for members of the General Assembly, in the November election. Every person who votes in the election and fails to vote on the bond issue, in effect votes against it.

Vote "Yes"

Vote "YES" on the bond issue, on the separate "emergency relief ballot."

As we go to press McDonough, Livingston, and Christian are still in the race for the state Farm Bureau baseball championship. McDonough is assured of a place in the final championship series by reason of its victory over Carroll county in two hard fought games, score 3 to 0 and 1 to 0. The last game played at Chadwick in Carroll county was a pitchers' battle, McDonough scoring its only run in the first inning.

Livingston nosed out Christian after trailing most of the way in a slugging contest at Taylorville, September 23. Errors by Christian county in the seventh, eighth, and ninth innings were responsible for the loss of the game. Until that time the Christian county boys were in the lead 7 to 3. Each side drove out 13 hits.

The second game of the series was scheduled to be played at Wing in Livingston county October 1, and the third, if necessary, by October 5. An effort is being made to start the championship series on Saturday, October 8.

Farm Products Up 2.5 Per Cent In Aug.

Farm prices led the Labor Department's index of wholesale commodity prices with a gain of 2.5 per cent from July to August. Increases were recorded in the average prices of barley, corn, rye, wheat, calves, poultry, cotton, eggs, hay, and peanuts.

Decreases in the average prices of oats, cows, hogs, fresh apples, lemons, oranges, leaf tobacco, and onions were shown for August.

The Department reported increases in food prices for butter, cheese, rye and wheat flour, fresh and cured beef, cured pork, veal, coffee, lard, raw and granulated sugar, and most canned vegetables. Average food prices for August were 1.5 per cent above July.

If The Bond Issue Fails To Pass, Additional State Taxes Will Be Levied On Property Next Year As Follows:

County	Taxes Required on Lands and Improvements by Counties 35 cent rate	State Funds Allocated to Counties for Relief	Taxes Required on all property by Counties 35 cent rate
Adams	$ 75.000	$ 20.000	$227.000
Alexander	15.000		55.000
Bond	23.000		47.000

SUMMARY

	Distribution of $18,750,000 in State Unemployment Relief Funds	Taxes Required on Property to Repay State Levy of $25,000,000	
		Farm Property	All Property
Cook County	$17,136,756.50	$ 240,000(?)	$12,778,000(?)
All other counties	1,370,225.61	5,000,000	12,222,000
Total allocated	18,506.982.11		
Unapportioned and Unexpended	243,017.89		
Total	$18,750,000.00	$5,240,000	$25,000,000

It should be noticed that the additional amounts of tax which failure of the bond issue would require of lands and improvements in each county include some urban lands which are not used for agricultural purposes. If it were possible to exclude urban lands from land assessments and if the additional tax were computed both on farm land, including improvements and on farm personal property, the amounts given above would be approximately correct for most counties, including those in which reductions in valuations have been made this year. Additional taxes which would be required in Cook County can only be estimated since the 1931 assessment is not yet completed.

Farm Bureau Tax Work Gets Results

Substantial Cuts Follow Intelligent Program of Tax Reduction Initiated By I. A. A. Last Spring

SUBSTANTIAL reductions of taxes in nearly all Illinois counties have been reported during the past few weeks largely as a result of the campaign of intelligent tax reduction initiated by the Illinois Agricultural Association and the County Farm Bureaus last spring.

GEO. F. TULLOCK

Reductions in assessed valuations of property made by assessors and boards of review this year and last have been followed with voluntary and involuntary cuts in salaries and fees of county officers and employees, expenditures for supplies and equipment, and in levies against property.

The Winnebago County Farm Bureau submitted a detailed brief relative to the cost of government in Winnebago county to the board of supervisors at a public hearing early in September.

Letter Explains Study

In a letter to the supervisors, signed by President Geo. F. Tullock, the Farm Bureau said:

> "The Winnebago County Farm Bureau is joining with the Farm Bureaus in nearly 100 other counties in Illinois in a constructive, intelligent study of the cost of local, county and state government. We have set up an organization, with representation in each tax levying district from the school district up, with the hope of getting at the facts of tax levying and tax spending. Our line of procedure is along lines outlined by John C. Watson, of the Department of Taxation and Statistics of the Illinois Agricultural Association. The information being collected in this state-wide study should be of use to every tax levying body which desires to keep the costs of government down to the limit of efficient operation.
>
> "The group of members of the Winnebago County Farm Bureau to whom you are kindly giving audience this morning is composed of the officers, board of directors and members of our county tax committee. We are here in an effort to extend to you an offer of co-operation in your work of planning the budget for next year.
>
> "It is our belief that the cost of government has risen to a peak far above the plane of income of the taxpayer. We believe that the members of this honorable body desire to be familiar with the wishes of the electorate which has placed them in office. Therefore, we are here to convey to you a message from our membership in which we ask you to adjust the costs of government radically downward, eliminating every nonessential activity, curtailing all lines as completely as can be done without destroying efficiency."

Ask 30% Reduction

The recommendations submitted by the Farm Bureau provide for a drastic reduction approximating 30 per cent in salaries of many county officials and employees, and in the running expenses of the county home and hospital, and the Rockford tuberculosis sanitarium. County officials whose compensation is fixed by law were asked to take a voluntary reduction. The survey of the Farm Bureau indicated extravagance and waste in the charitable institutions.

In its report to the supervisors the Farm Bureau committee estimated that the following savings should be made:

1. On salaries and fees at least	$40,000
2. On dependent children..	8,000
3. Rockford Farm Home and Hospital	44,000
4. Rockford Tuberculosis Sanitarium	80,000
Total	$172,000

"The present condition of things absolutely cannot continue," said the report. "The public cannot carry this load. Everyone will be bankrupt except the officeholders and the big financiers."

The survey submitted in tabular form revealed the increases in the salaries and wages of all county officials and clerical help between 1914 and 1931. Comparisons were made of the cost of operating charitable institutions in Winnebago county and other counties. The survey revealed that the Winnebago county institutions apparently are squandering money and paying out far greater sums for equipment and service than is true in other Illinois counties such as Peoria and Sangamon.

Other Counties Busy

The board of supervisors gave the report its careful consideration and while not concurring in all its recommendations, ordered a drastic reduction in salaries and expenditures demanding that county officials whose compensation is fixed by statute voluntarily bear their full share of the reduction. If such officials fail to comply with the demands of the supervisors the fight will be carried to the people in the next election of local officers.

The work of the Farm Bureau in Winnebago county is typical of the organization's tax reduction efforts in scores of other counties throughout Illinois.

In Effingham county the board of review reduced assessments for 1932 a total of $184,790.

The McLean county board of review approved the petition of the Farm Bureau and the Taxpayers' League and ordered a horizontal cut of 10 per cent on real estate values in that county for next year. This follows a substantial reduction in valuations made the previous year.

The Bloomington Pantagraph reports that "every taxing body in the county has the responsibility of cutting expenses to the bone . . . for there is no dodging the fact that collections of taxes are harder to make and smaller in quantity than for any year of the last 30, and government expenses in every unit must come down to avoid disastrous and disgraceful public bankruptcy."

The Kane county board of review announced that real estate assessments in that county would be reduced 20 per cent. Will county announced a 10 per cent slash in assessments.

Ford county, following a cut of 15 per cent in assessed valuations last year, took another five per cent from the valuations this year. The decrease was not made uniform in all townships.

Macon county also reduced valuations 10 per cent. This was a horizontal reduction.

Sangamon county, following effective work by the Farm Bureau, aided

(*Continued on Page 6*)

Farm Bureau Tax Work
(Continued)

by the I. A. A. reduced assessed valuations of farm lands an average of about 18 per cent for the whole county. Cuts ranged from five per cent in Ball township to 30 per cent in Woodside township.

Gives Farm Bureau Credit

Expressing the views taken by the three members of the board of review, Chairman Bradley was quoted in the Illinois State Register as follows: "The reduction was granted not because the Farm Bureau asked for it, but because the Bureau succeeded in proving its points by presenting a mass of information.

"The Bureau using tax experts from Chicago probably was better able to present its case than an individual farmer or a group of farmers in one section of the county would have been. . . .

"It has been the contention for 15 to 20 years, which has been substantiated by figures, that the assessed valuation on farm land is nearer the sale price of the land than is the assessed valuation on city property. The farm land assessments have been 45 to 25 per cent higher than on city property.

Help From I. A. A.

"The board is indebted to the Farm Bureau tax committees in the respective townships and to the county at large for information relative to values. Experts from Chicago (John C. Watson of the Illinois Agricultural Association) assisted in the work, and the Farm Bureau made use of its own books and records in the recorder's office. It would have cost the board a lot of money to undertake the task alone.

"We believe the information obtained is authentic. It checks with the records."

Similar reports are coming in from many other counties indicating that the Farm Bureaus' campaign of tax reduction based on accurate records and statistical information is getting results. Savings to the farm property owners of Illinois in taxes paid next year will be very substantial. This work would not have been possible without organization.

Liked Bond Issue Story

Editor, I. A. A. RECORD.

"The article 'A Bond Issue to Reduce Property Taxes' by Mr. Watson, is good, and I hope sufficient copies have been produced to scatter over the entire state. . . .

"I feel that if the bond issue fails and the state tax is doubled with additional taxes for relief in the county, the future of the schools appears dark indeed.

"I enjoyed the September number of the RECORD very much."

"Stop Farm Fires" Is Watchword During Week

Here Are Some Things You Can Do To Prevent a Fire on the Farm

The first week in October has been designated "Fire Prevention Week" to emphasize the importance of fire prevention particularly on the farm where there is least protection. The Illinois Agricultural Association is cooperating in the movement in the state to make all people fire conscious, and active in preventing fire losses.

Farm fires in Illinois two years ago destroyed approximately $14,000,000 worth of property. While the figures for last year are not yet reported, it is estimated that 1931 losses will exceed those of the year before.

How many times have you read items like the following which appeared in a weekly newspaper in Illinois a short time ago?

> "Little Boyd Loftien, four, playing with matches, caused a fire last Saturday morning, at the Loftien farm home east of town, and west of Creston, causing a damage estimated at $4,000 which destroyed a barn, and its contents of hay, machinery, also two horses and two calves which were burned to death in the building."

Learn The Cause

Insurance adjusters who make it their business to learn the cause of farm fires tell us that at least 90 per cent of such losses are preventable. Even fires caused by lightning can in part be prevented by proper protection with lightning rods. Many farm fires are the result of sparks from chimneys falling on unprotected roofs. A chimney in the first place should be constructed of good hard brick and lined with tile. If tile is not available the chimney should be of two courses of brick thick and in all cases should be built by a competent workman.

The top of the chimney should extend at least two feet higher than the peak of the roof to secure proper draft. If soft coal or wood is burned a heavy wire spark screen should protect the opening at the top. Over $24,000,000 of property was destroyed last year because of preventable fires starting from defective chimneys and flues.

Watch For These

Don't let old newspapers, clothing, or other waste material accumulate in piles in the attic.

Watch for bare electrical connections. See that no metal objects are laying on exposed wiring, and that no extension cords are twisted around nails, pipes, or other metal materials.

Do not plug the fuses. A fuse is a protection against an overloaded circuit which causes wires to get hot and start fires.

When kerosene and gasoline cook stoves are used be sure there are no curtains or other inflammable material nearby that might catch fire should the burner flare up. Don't pile ashes on the floor, against wood posts or in wood boxes. Use metal containers.

Keep all trucks and tractors off the barn floor. Backfiring of a cold motor or a short circuit in the electrical equipment cause many a fire. There should be no portable gas engines operated inside a barn.

Beware Oily Rags

Keep the barn clean. Don't let empty bags and rubbish accumulate in corners. Keep the building well ventilated.

Don't let oily rags pile up in corners. Put them in metal cans or containers. If they start on fire then they will do no damage.

Go over the farm buildings periodically. Inspect and clean out all the corners where rubbish accumulates. If the hay was put in damp, spread it out so the heat will be liberated. Inspect the chimneys on the house and make the needed repairs. Keep the fire extinguisher in a handy place and be sure there are buckets, ladders, and water conveniently located for instant use in time of need.

J. Frank Grimes Chief Speaker For Supply Co.

J. Frank Grimes, president of the Independent Grocers' Alliance, Chicago, will be the headline speaker at the annual meeting of the Illinois Farm Supply Company, Bloomington, October 12.

Mr. Grimes who appeared at the annual I. A. A. meeting two years ago will speak on the subject "What Independents Can Accomplish By Group Action." He will have an interesting message. Mr. Grimes is an aggressive speaker and his hobby is co-operation and group action among small home-owned business institutions.

Donald Kirkpatrick, legal counsel for the I. A. A. will discuss legal problems affecting county service companies.

The address of the President, Fred Herndon of Macomb, and the manager's and treasurer's reports, together with election of officers and directors will comprise the business end of the program.

The meeting will begin at 10:00 A. M. in the Y. M. C. A. auditorium. Delegates and directors are expected from 52 county service companies affiliated with the state company.

Soybean Growers Annual Meeting

More Than 400 Attend Rousing Session at Decatur, Hear Full Explanation of Marketing Operations

A ROUSING meeting of Illinois soybean growers at Decatur, Sept. 21 voted unanimously to stick to their organization, the Soybean Marketing Association, and carry on in their efforts to establish better markets for the grower.

The spirit and confidence in the co-operative principle expressed by more than 400 growers who attended the annual meeting were remarkable in view of discouraging markets during the past year. Although the Association could not sell all of its million and a-half bushels marketed during the year at top prices, it succeeded in getting the member growers more money for their beans than the bulk of non-members got who marketed their crop when prices were at low ebb.

Spontaneous applause followed the detailed explanation of the marketing operations and the financial condition of the Association by Earl C. Smith, chairman of the management board. Sentiment expressed from the floor revealed confidence of the members that their representatives had done their best to find outlets for the crop at favorable prices.

We're Going To Stick

Speaking for the larger growers of soybeans, Frank Garwod of Christian county said: "My brother and I grow 700 acres of soybeans. We are satisfied that the Association did the best it could in getting us a fair price. We are going to stick to the organization."

"Lack of understanding is at the bottom of criticism of our marketing association," said L. A. Moore, another large grower of Christian county. "I am following men like Frank Garwood. I believe the big growers are for co-operative marketing."

In his report to the members Manager W. H. Coultas stated that a statistical survey of market receipts showed that 85 per cent of 1931 domestic soybeans had moved into the terminal markets by November 20, and 65 per cent had left the farms by November 1. At that time, he said, country elevators were paying from 19 to 22 cents for soybeans. Most unorganized growers sold at that price. A few who held their beans and sold later in the fall and winter secured a substantially higher price largely because of the European outlet for beans resulting from the war between China and Japan which closed Manchurian ports.

Last year the Association handled 1,538,723 bushels of members' soybeans. Ninety-four per cent of the beans received by the Association graded No. 2 or better. Members received an average of 25¾ cents per bushel net after all expenses were paid. The crop marketed through the Association brought an average price of 32 cents a bushel. Approximately 3½ cents of this went to country elevators, two cents to liquidate long-term loans, and three-fourths of a cent for operating expenses.

Exported First Cargo

"Your Association exported the first shipment of soybeans to Europe," said Mr. Smith. "The first cargo of 50,000 bushels consigned to Germany was sold to net us 38 cents a bushel. This outlet was unforseen at the beginning of the marketing season. It developed after most of our beans had moved into storage at Peoria."

Before this sale beans had been bringing around 20 cents a bushel. Immediately afterward the price at country points jumped to 38 cents. Much lower prices were secured for beans sold earlier to domestic processors. But as soon as the foreign outlet opened up the entire complexion of the market changed.

In reviewing the operations of the Association since its organization Mr. Smith gave from memory details about sales and prices. He discussed frankly how the market on soybeans steadily declined two years ago after the Association announced its original advance of $1 per bushel to the grower. While the organization in 1930 expected around 700,000 bushels of soybeans, more than 1,125,000 bushels were received. There is evidence that non-members delivered their beans in the name of members to the Association because they could get a better price.

To protect itself last year, the Association entered into a profit-sharing agreement with processors under which the price received depended upon the market price of oil and meal. In the fall of 1931 the price of soybean products continued their downward course, oil bringing as low as 2¼ cents a pound and meal $16 to $18 a ton.

"I am pleased to announce here that we have contracted to sell all your beans of the 1932 crop at a premium above the market based on monthly average prices. The grower was given the privilege of picking his own market. Some chose to sell in November or wait until spring while others decided to take the average pool price for the period. We propose to close the pool next year in April. Some members expect the Association to sell the entire crop at the top of the market. But no man or group of men are smart enough to do this," said Mr. Smith.

Answers The Critics

S. S. Baughman, Christian county, who raised 170 acres of soybeans last year, charged that unfriendly country elevators were a source of much opposition to the co-operative. "When all other grains have been selling at the lowest prices that anyone can remember," he said, "why is it that our enemies continually harp on soybeans. Let's give our Association credit for finding a foreign outlet for our crop at a good price. Sure the non-members got the benefit without paying a cent for it. And now some of those who held their beans and got the high price are going around the country damning the Association.

"Some of our members forget that two years ago the Association paid them a much higher price for beans than they could get elsewhere. I know because I held my beans until all the terminal storage space was filled. When I harvested the price was around $1.25 a bushel, but I finally took 70 cents a bushel when the members of the Association got $1 or more. You don't hear from the fellows who got less than the Association paid. All you hear about is some fellow who cashed in on the fight made by the Association for a higher price.

Milnor Speaks

George S. Milnor, manager of the Farmers National Grain Corp., went to the platform immediately upon his arrival from Chicago early in the afternoon. In introducing him Mr. Smith said: "There has been no valid criticism of the Farmers National under his management. If farmers will stick to the leadership of men of his type and not let propagandists lead them down blind alleys they will win."

Mr. Milnor spent some time answering critics of the Farm Board and the National Grain Corporation. "Eighty-five per cent of this abuse," he said, "comes from the grain trade; the other 15 per cent from other business groups who have some special privilege they wish to protect. I

I. A. A. Political Policy

THE Board of Directors of the Illinois Agricultural Association meeting in Chicago Sept. 16 authorized and directed that the Republican and Democratic party planks on agriculture be published in the October issue of the RECORD with the following statement of policy:

"History discloses that party pledges amount to little, except to the extent that leading candidates place their personal interpretation upon their party platforms, and in addition pledge their active support and participation in putting into effect their understanding of party pledges.

"The Illinois Agricultural Association urges all of its members and friends to carefully study these platform pledges (see page 9) of the respective parties and throughout the presidential campaign to follow closely the interpretation placed upon these platform pledges by the leading candidates of the respective parties. By so doing, farmers and all friends of farmers, and in addition all those who believe that the restoration of agriculture to a basis of prosperity is a first essential to the restoration of prosperity in America, will be enabled to vote intelligently and effectively on November 8th on what the Association believes to be the greatest issue confronting the American people at this time.

"The Association has never engaged in partisan politics and is not now offering any advice of a partisan character. It does, however, urge its members and friends to join forces in support of the candidate who most clearly, definitely and courageously deals in understanding terms and commitments on this all important issue and, by such joining of forces, to discharge not only their rights but their duties at the polls in the interest of genuine public welfare and the perpetuity of the principles of government as outlined by the founders of the Nation."

Chicago Comes A'Begging

IF ANY further reason or demonstration were needed to show Chicago's unfitness to control the state through unlimited legislative reapportionment, that reason has been completely demonstrated in the present unemployment relief dilemma.

Unable to borrow money on its own credit, Chicago came to Springfield last year appealing to the sentiments and emotions of the legislators to use the state's credit to get a huge loan to provide for her destitute people. Because of the nature of the plea permission was granted and a loan of $18,750,000 was obtained, more than $17,000,000 of which went to Cook county.

That money is now spent and the property owners of Illinois are left holding the sack pledged to pay it back in state taxes unless the emergency relief bond issue carries in November.

Meanwhile the Emergency Relief Commission went to Washington and secured $14,000,000 more from the Reconstruction Finance Corporation. Of the first $9,000,000 granted, 82.8 per cent was allocated to Cook county, only 13.9 per cent to 53 downstate counties.

This money is to be repaid with interest at three per cent either on such terms and installments as the state and R. F. C. agree upon, or by annually deducting one-fifth of the state's share of regular federal appropriations for highways, beginning in 1935.

More than likely, Illinois' portion of the federal highway fund, which incidentally comes through the U. S. Department of Agriculture appropriation which Chicago newspapers and grain speculators have delighted in maligning, will pay the loan.

Further attempts have been made at Springfield to saddle a general sales tax on the people of the state to get additional unemployment relief funds, the lion's share of which would go to Cook county. But for the organized efforts of Illinois farmers represented by the I. A. A. and downstate representatives in the legislature, this proposal undoubtedly would have gone through. And farmers would have paid a substantial part of the bill.

The I. A. A. has insisted in conferences held at the state capital that each county care for its own, and that unemployment relief legislation be drafted following out this sound principle. This whole situation emphasizes the necessity for constant organized vigilance of farmers in guarding against tax raids and demands for legislation by groups bent on securing special privileges for themselves at the expense of others.

Republican Party Plank On Agriculture

Farm distress in America has its root in the enormous expansion of agricultural production during the war, the deflation of 1919, 1920, and the dislocation of markets after the war. There followed, under Republican administrations, a long record of legislation in aid of the cooperative organization of farmers and in providing farm credit. The position of agriculture was gradually improved. In 1928 the Republican Party pledged further measures in aid of agriculture, principally tariff protection for agricultural products and the creation of a Federal Farm Board "clothed with the necessary power to promote the establishment of a farm marketing system of farmer-owned and controlled stabilization corporations."

Almost the first official act of President Hoover was the calling of a special session of Congress to redeem these party pledges. They have been redeemed.

Th 1930 Tariff Act increased the rates on agricultural products by thirty per cent, upon industrial products only 12 per cent. That act equalized, so far as legislation can do so, the protection afforded the farmer with the protection afforded industry and prevented a vast flood of cheap wool, grain, livestock, dairy and other products from entering the American market.

By the Agricultural Marketing Act, the Federal Farm Board was created and armed with broad powers and ample funds. The object of that act, as stated in its preamble, was—"To promote the effective merchandising of agricultural commodities in interstate and foreign commerce so that . . . agriculture will be placed on the basis of economic equality with other industries. . . . By encouraging the organization of producers into effective association under their own control . . . and by promoting the establishment of a farm marketing system of producer-owned and producer-controlled cooperative associations."

The Federal Farm Board, created by the Agricultural Marketing Act, has been compelled to conduct its operations during a period in which all commodity prices, industrial as well as agricultural, have fallen to disastrous levels, a period of decreasing demand and of national calamities such as drought and flood has intensified the problem of agriculture. Nevertheless, after only a little more than two years' efforts the Federal Farm Board has many achievements of merit to its credit. It has increased the membership of cooperative farm marketing associations to coordinate efforts of the local associations. By cooperation with other Federal agencies, it has made available to farm marketing associations a large value of credit, which, in the emergency, would not have otherwise been available. Larger quantities of farm products have been handled cooperatively than ever before in the history of the cooperative movement. Grain crops have been sold by the farmer through his association directly upon the world market.

Due to the 1930 Tariff Act and the Agricultural Marketing Act, it can truthfully be stated that the prices received by the American farmer for his wheat, corn, rye, barley, oats, flaxseed, cattle, butter and many other products, cruelly low though they are, are higher than the prices received by the farmers of any competing nation for the same products.

The Republican Party has also aided the American farmer by relief of the sufferers in the drought-stricken areas, through loans for rehabilitation and through road building to provide employment, by the development of the inland waterway system, by the Perishable Products Act, by the strengthening of the extension system, and by the appropriation of $125,000,000 to recapitalize the Federal Land Banks and enable them to extend time to worthy borrowers.

The Republican Party pledges itself to the principle of assistance to cooperative marketing associations, owned and controlled by the farmers themselves, through the provisions of the Agricultural Marketing Act, which will be promptly amended or modified as experience shows to be necessary to accomplish the objects set forth in the preamble of that act.

Tariff and the Marketing Act:

The Party pledges itself to make such revision of tariff schedules as economic changes require to maintain the parity of protection to agriculture with other industry.

The American farmer is entitled not only to tariff schedules on his products but to protection from substitutes therefor.

We will support any plan which will help to balance production against demand, and thereby raise agricultural prices, provided it is economically sound, and administratively workable without burdensome bureaucracy.

The burden of taxation borne by the owners of farm lands constitutes one of the major problems of agriculture. President Hoover has aptly and truly said — "Taxes upon real property are easiest to enforce and are the least flexible of all taxes. The tendency under pressure of need is to continue these taxes unchanged in times of depression, despite the decrease in the owner's income. Decreasing price and decreasing income result in an increasing burden upon property owners . . . which is now becoming almost unbearable. The tax burden upon real estate is wholly out of proportion to that upon other forms of property and income. There is no farm relief more needed today than tax relief."

The time has come for a reconsideration of our tax systems, Federal, state and local, with a view to developing a better coordination, re-

(Continued on page 18)

Democratic Party Plank On Agriculture

The Democratic party solemnly promises by appropriate action to put into effect the principles, policies and reforms herein advocated, and to eradicate the policies, methods and practices herein condemned. . . .

We favor the restoration of agriculture, the nation's basic industry, better financing of farm mortgages through reorganized farm bank agencies at low rates of interest, on an amortization plan, giving preference to credits for the redemption of farms and homes sold under foreclosure.

Extension and development of the farm co-operative movement and effective control of crop surpluses so that our farmers may have the full benefit of the domestic market.

The enactment of every constitutional measure that will aid the farmer to receive for basic farm commodities prices in excess of cost.

On The Tariff:

We advocate a competitive tariff for revenue with a fact-finding tariff commission free from executive interference, reciprocal tariff agreements with other nations, and an international economic conference designed to restore international trade and facilitate exchange.

November RECORD Will Carry Voting Records

Voting records on important agricultural issues of members of the last General Assembly many of whom are candidates for re-election on November 8 will be carried in the November issue of the RECORD to be published and delivered to all members on the mailing list a week before the election.

This action was authorized by the Board of Directors at its regular meeting on September 16.

The statement of policy of the Association wherein it urges its members to vote for candidates who deserve support because of their voting records in behalf of agricultural policies also will be carried in this issue.

"Farmers Always Paid Costs of Marketing"—Huff

"Much has been said in the public press about our salaries, as though for the first time growers were paying the costs of marketing, including the providing of incomes for those who carry on marketing processes," said President C. E. Huff of the Farmers National Grain Corp. in a recent address to stockholders.

"As a matter of fact, growers have always paid all of the costs and salaries involved in the handling of grain and in addition have provided wealth for private dealers in their commodities. Boards of Trade and Exchanges have afforded the means for amassing fortunes for many of their members through the tolls levied upon agricultural producers, and they today defy the producer in his attempt to discontinue the tolls which he has always paid them, and to market his own grain at actual cost.

"Palatial homes in the finest residential sections of Chicago, and the massive Board of Trade building itself, eloquently testify to the liberality with which private grain dealers have treated themselves at the farmer's expense.

"Even now grain producers are providing higher salaries and earnings for many outside of the co-operative movement, through brokerage and commissions, than to any within it.

"Yet only within the co-operative movement has money paid in salaries brought to the producer any service directly in his own behalf. For the salaries which the Grain Corporation is paying, the grain growers of America are receiving devoted and intelligent service, and a foundation has been laid upon which the grain marketing structure of the future will be built."

Discuss Marketing At 14th District Conference

A conference of Farm Bureau leaders in the 14th congressional district was held at Stronghurst, Sept. 2. The meeting was called by I. A. A. director M. G. Lambert.

Manager Charles P. Cummings explained the operations of the Illinois Grain Corporation stating that the regional cooperative handled 1,000,000 bushels a month during the first seven months of 1932, with an additional 1,300 cars or nearly 2,000,000 bushels during August.

This is the best record made by the co-operative since its organization two years ago. The Corporation will handle at least 14,000,000 to 15,000,000 bushels by the end of the fiscal year.

The grain marketing committee of the Hancock County Farm Bureau this year is giving particular attention to the marketing of grain through the Illinois Grain Corporation, stated Arthur Kraushaar, chairman, of Warsaw. "It hopes to bring to the attention of the farmers of Hancock county the advantages of owning and controlling their own marketing machinery and sharing in its earnings."

The $20,000,000 CHICAGO BOARD OF TRADE BUILDING
"eloquently testifies to the liberality with which private grain dealers have treated themselves at the farmers' expense."

Harrelson Goes With A. P. At Albany, N. Y.

Max Harrelson, formerly assistant in the I. A. A. Department of Information, is now working as night editor for the Associated Press at Albany, N. Y. He began his new duties Sept. 15.

Uncle Ab says never to correct anybody, even—or especially—a child, when other persons are present.

Livestock Marketing

Forty-four out of 55 counties sending livestock to the St. Louis market have shown increases in the number of carloads sent to the Producers Commission Association. Pike county ranked first with an increase of 53 carloads, Macoupin county second with 45, and Morgan county third with 41. Other leading counties showing gains in shipments to the Producers include Greene with an increase of 38 carloads, Madison with 27, Sangamon with 26, Effingham with 25, Montgomery with 24, St. Clair with 22.

The above figures represent gains in the second quarter of 1932 compared with the first quarter.

Forty-two leading counties shipped 1,349 carloads to the Producers in the first quarter, and 1,995 in the second quarter.

More than $165,000 has been paid back to livestock growers in patronage refunds by the Peoria Producers Commission Association.

Ninety-two per cent of the livestock received at the Peoria market comes in by truck.

A total of 274 baby beef club calves sold at the fifth weekly calf club auction in Chicago averaged 914 lbs. and brought an average price of $9.46 per cwt. Wilson Bros. paid $11, the top, for a 1070 lb. Hereford fed by 13 year old Dale Andrews of Vermilion county.

Look For Larger Runs Market Cattle In Winter

After the present brief period of scarcity, supplies of cattle may be expected to increase whether viewed from either the short or long-time point of view, according to L. J. Norton of the State College of Agriculture.

His recent report states:

(1) Cattle on farms have been increasing since 1928. Slaughter of cows has been decreasing

(2) Supplies of grain fed cattle will be larger during the late fall and early winter than in the corresponding months of last year.

(3) Prospects are for larger supplies of well-finished cattle during the spring and summer of 1933.

(4) While there has been an improvement in business sentiment in recent weeks business activity and money level of consumers is at practically the lowest level of the depression. As one financial observer summarizes the situation: "The panic is over; the depression is not."

Milk Producers Demand Justice

A Radio Address by George Thiem, Director of Information, over Stations WHBF, Rock Island, and WOC-WHO, Davenport-Des Moines, Sept. 1, 1932

I REPRESENT an organization of 60,000 Illinois farmers which, since 1919, has attempted among other things to assist producers of farm products in marketing their commodities co-operatively.

Our association is supported entirely by farmers. It was organized to represent and protect farm interests in all public questions and problems arising beyond farmers line fences which they cannot solve working alone.

Long before the Agricultural Marketing Act and the Federal Farm Board were created, farmers in Illinois, Iowa, in fact in all sections of the United States, have attempted through organization to have a voice in the sale of their products, to gain some recognition from the buyers of farm commodities, to bargain collectively for a fair price.

As a result of this effort in Illinois in the dairy marketing field, practically every major milk market in the state is now operating under a plan by which the milk producers bargain collectively with the dairy distributors in arriving at a fair price for fluid milk. In many cases representatives of the consumers sit in at conferences and have a voice in questions affecting their interests because the supply, quality, and price of milk are vital to them.

Purpose of Organization

A little more than two years ago, the milk producers in the quad cities trade territory organized the Quality Milk Association. Its purpose is to place the dairymen on an equal footing with the milk distributors in the sale of milk, to promote impartial checking of weights and tests, to improve quality, to regulate production to consumer demand in Davenport, Rock Island, Moline, and East Moline, in short, to create an orderly program for the marketing of this essential commodity which directly affects the health and well being of the people of the community.

The Quality Milk Association has a membership of 850 Illinois and Iowa milk producers who furnish approximately 85 per cent of the fluid milk supply for the quad cities. The Association, organized under the co-operative laws of Illinois as a non-profit organization, has held many conferences with the organized milk distributors here in an effort to initiate on this market a plan similar to that now in operation on all the major milk markets of the country—a plan that will insure a safe steady supply of high quality milk, a plan in which the consumer has a voice along with the producer and distributor in questions affecting the market.

The Quad City Milk Council was set up here more than a year ago with equal representation of producers, distributors, and consumers. Its chief function was to provide an impartial butterfat test on each producer's milk. The milk testers were employed jointly by the council, thus every precaution was taken to insure a fair test.

Only Five Remain

In the beginning, 13 dealers operating on this market co-operated in this fair and equitable plan. I am informed that eight of the member dealers subsequently dropped out until today only five are left, which represents only about 10 per cent of the dealers in the four cities.

You may ask why? Their chief complaint was that the milk testers, employed mind you, by a Board on which both producers and dealers were represented, gave the farmers too high a test. This is virtually an admission that many distributors previously had been short-changing the producers and wished to continue the practice unhampered by impartial testing.

In every line of industry except farming, the seller reserves the right to specify the quality of his product, to have something to say about the price, and to weigh the commodity out to the buyer. When the farmer seeks to establish this right for himself, a right that every seller should have, no stone is left unturned by his enemies to thwart him in his efforts to achieve simple justice.

But what do producers themselves say about their reasons for asking that the weights and tests of their milk be made by an impartial tester. F. P. Lawson and Son of Coal Valley in Rock Island County, milk a large herd of Brown Swiss cattle. This fine breed produces milk that invariably averages 4 per cent or more butterfat. Mr. Lawson who until recently sold his milk to the Midvale Dairy, last month received a 3.5% test. The official tester for the Rock Island-Henry Cow Testing Association, of which Mr. Lawson is a member, tested a composite herd sample the same month and found that the milk from this herd tested 4.47%, a difference of more than nine points. This, and numerous cases like it, have all the appearance of being mighty shabby treatment of farmers.

A $25.00 Loss

The price of milk per hundred pounds is determined partly by its butterfat content. At present the price varies 4c per 100 lbs. of milk for every .1% variation of the butterfat content from 3.5%. Thus milk testing 3.5 per cent brings $1.85 per cwt., whereas milk testing 4.4% should bring 36c per 100 lbs. more, or $2.21 per cwt.

In this case it appears that the buyer, knowingly or unknowingly, shortchanged the producer (based on the records of the cow testing association) at least 36 cents per 100 lbs. On the 7,000 pounds of milk delivered during the month, this man lost more than $25.00, or rather had it taken from him, if the cow testing association records tell the truth. Let me say here that my previous experience in this field leads me to testify that the records of a competent cow testing association supervisor are highly accurate and are accepted by authorities everywhere as authentic.

No wonder producers have organized. No wonder they wish to throw off the yoke of a system which denies them protection against the dishonest tendencies of buyers who are more interested in their own profits than in giving the farmer a square deal.

An Iowa Farmer Speaks

What do farmers themselves say about the situation here? Mr. Hugo W. Schaff, a producer in Scott County, Iowa, said in answer to the question, "Why did you join the Quality Milk Association?" " Because I believe farmers will get a square deal, fair weights and tests for his milk, and a fair price, only through organization, because I wasn't getting a fair price for my so-called surplus milk; because farmers ought to have a voice in this market which they work 365 days a year to supply."

Mr. Schaff produced a milk receipt from one of his neighbors, Elmer Kuhl of Davenport, showing that he netted only 15 cents per hundred pounds for his surplus milk—much less than its value by whatever standard measured.

There is no justice in this kind of a deal. Dairymen at best are underpaid for their hard labor in milking cows day in, day out, but when they are deliberately denied a fair test

"Poor old Sam—they're selling his farm under the hammer—

"It might have happened to me—but I have a

COUNTRY LIFE INSURANCE POLICY"

"The best thing I ever did was to take out my Country Life Policy. When I needed money the company gave me a loan on my policy. My wife and family are protected, too. If I pass out of the picture—my mortgage will be paid. It gives me a feeling of security."

The Country Life Insurance Co. offers you low cost old line legal reserve insurance. Everyone should protect his property and his loved ones by having a policy. The cost is trivial—the value is big.

Ask your local County Farm Bureau about Country Life Insurance. Don't delay.

Remember! You can borrow on a Country Life Insurance Policy. Premiums are low—dividends reduce premiums. The rates are fixed—no increases in cost.

Insure in your own company

Quality Milk Ass'n Plant Now Operating

The Quality Milk Association plant in Davenport shown in the accompanying picture was leased from the Cudahy Packing Co. It contains complete equipment for manufacturing butter, separating milk, pasteurizing and sterilizing milk and cream, and for caring for the finished product in cold storage.

It is equipped with three large 10,000 pound churns. F. J. Watson who has been employed as manager, formerly operated the plant for the Cudahy Company. He states that they have made as high as 10,000 pounds of butter a day in the plant. The first week in September milk deliveries were exceeding 40,000 pounds daily. Sixteen large trucks were hauling in. All of these trucks are controlled by the Association.

The Cudahy Packing Co. is under contract to market the butter for the Association up to 1,500,000 pounds a year.

The milk of members on the Illinois side is being delivered to the Sturtevant Ice Cream Co. which

F. J. WATSON is the efficient manager of the Quality Milk plant in Davenport.

owns the finest dairy manufacturing and distributing plant in any of the quad-cities. The Sturtevant Co. is co-operating heart and soul with the producers and has agreed to pay $1.85 per cwt. for all the milk going into its fluid trade. It is taking the other milk at the surplus price.

The Sturtevant Co. is building up a retail and wholesale fluid milk and cream business, and on September 8 reported that it was making deliveries to more than 60 stores, restaurants, and other dealers in the four cities.

The Sturtevant Co. is using "Sealright" fiber bottles. The fiber is coated with wax inside and out, is more sanitary than the glass bottles, and does away with the necessity of washing and returning the container.

UNLOADING AT QUALITY MILK ASS'N PLANT IN DAVENPORT
As we go to press, this co-operatively controlled plant is receiving nearly 50,000 lbs. of milk daily. The milk is separated, pasteurized, the cream churned into butter and the skim returned to the farm. Members received 22c per lb. net for butterfat the first month of operation—nearly as much as the milk distributors paid them for whole milk.

Milk Producers Demand Justice

(Continued from page 13)

and short changed on weights, when they are subjected to the dictation and domination of a monopoly of arrogant distributors who go so far as to foment strife and disorganization among producers struggling for a square deal, it is too much for those with any sense of fairness and justice to stand idly by without uttering a vigorous protest.

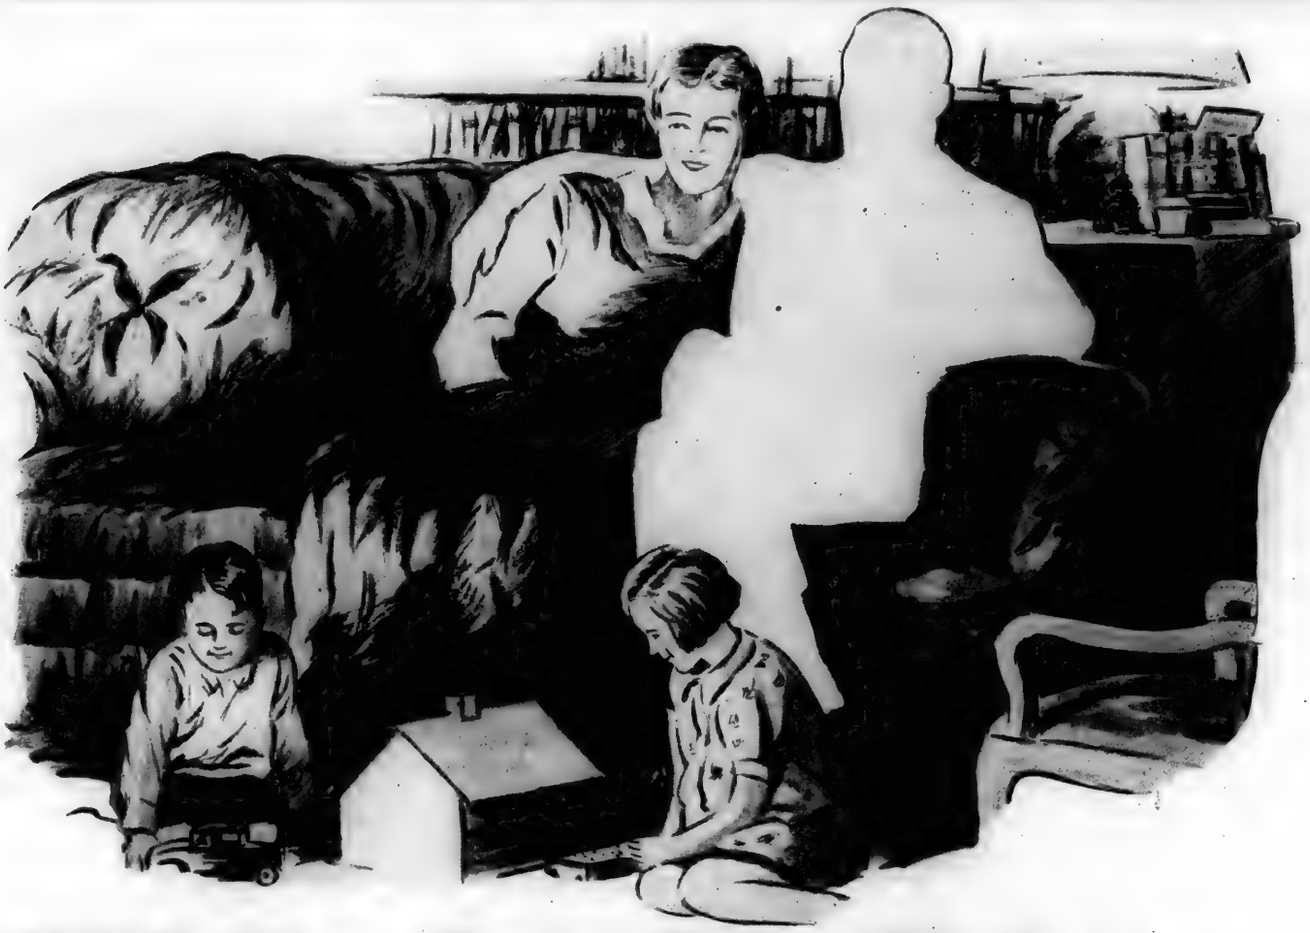
The action which the newspapers have designated as a strike, came about primarily because of the dealers' refusal to allow the producers to check their records and determine the percentage of milk going into the fluid milk trade, and that portion known as the surplus used for making butter and other products.

The Spread Too Wide

On this market for some time, the dealers have been paying $1.85 per cwt. for so-called base milk—supposedly that portion or percentage sold as fluid milk, and a lesser price based on the butterfat market for the surplus or manufactured milk. The price on the latter class has been netting the farmers about a cent a quart, that on the base milk approximately 4 cents a quart. On the average, about 50 percent of the farmers' milk goes in the base class at $1.85 per cwt. and about 50 percent in the surplus class at 66 cents per cwt. Thus his entire supply averages after hauling charges, about 99 cents per cwt., or a little over 2 cents a quart, which any fair-minded person must admit is too wide a spread. The distributor sells this milk to the consumer at 10 cents per quart. The farmers contend that they should be allowed the privilege of checking the distributors' records to determine the percentage sold in the higher bracket and that sold as butter and other manufactured products.

The distributors here have contended all along that they have been losing money on the surplus, that they didn't want it. "All right," said the producers, "we'll acquire our own plant and process our own surplus, and supply you with just enough milk at $1.85 per cwt., to take care of your fluid milk trade."

The dealers replied that they couldn't pay $1.85 per cwt. for milk for their fluid trade if they couldn't get any surplus. Thus they virtually admitted deception, that they were not now paying $1.85 for the base milk and were in fact, hoodwinking the producers by diverting so-called surplus milk bought at a butterfat price, into their more lucrative fluid milk trade.



The organized dairymen hold that they can process the surplus milk themselves into butter more economically than can the distributors and are willing to sell butter to the distributors for their retail requirements at the Chicago market price.

Then the dealers asked the farmers to agree not to go into business for themselves. This request the dairymen refused, since such action may be necessary to provide a future market for their milk.

The dealers asked the producers to give them protection from all price cutting, an absolute monopoly. Such a request is absurd. The distributors don't have any such protection now nor will they ever have so long as the market is kept free and open to all comers.

Finally they told the producers in their last conference that they had

A Year of Progress

Thirty-Five Million Gallons Petroleum Products Sets New Record For Illinois Farm Supply Co.

By L. R. MARCHANT, Manager

THE effort put forth to organize the buying power of the Farm Bureau members in Illinois during the past six years has progressed to the point where fifty-two local companies are serving approximately 75,000 farmer patrons with Illinois Farm Supply Company products. This marvelous growth in centralized purchasing of petroleum products and other essential farm supplies stands out as a splendid achievement in the light of present business conditions.

The sixth fiscal year of the company has established a new record for cooperative purchasing of petroleum products. A number of new county service companies have been organized, the volume of business has been increased, and the net earnings of the State Company for the period actually exceed the previous high mark of 1931. This concentration of buying power, together with the economies of distribution practiced by the associated companies has resulted in an annual distribution of over $500,000 to Farm Bureau member patrons.

135 Oil Storage Plants

The fifty-two affiliated companies own and control 135 oil storage stations with a combined storage capacity of over five million gallons and operate 385 service trucks in some eighty counties. Five of these companies were organized and placed in operation during the year, namely: Egyptian Service Company, Fruit Belt Service Company, Madison Service Company, Twin County Service Company, and Vermilion Service Company.

The capital stock investment of Illinois Farm Supply Company and associated companies totals $1,030,502 and of this amount $71,500 represents the stock requirements to finance the new companies.

Thirty-five million gallons of petroleum products were handled during the period. This is a gain of 6.83 per cent in comparison to the gallonage handled during the preceding year,—a most remarkable showing in view of a general decline of five to fifteen per cent in the consumption of petroleum products according to the most authentic information available to the industry. This total gallonage includes 23,704,640 gallons of gasoline, 8,754,487 gallons of kerosene, 2,215,718 gallons of distillate and fuel oil, 876,796 gallons of lubricating oil, and 659,867 pounds of grease. This gallonage is equivalent to 2,963 tank cars of gasoline, 1,371 tank cars of kerosene and distillate, 292 cars of lubricating oil, and 33 cars of grease.

These figures speak for themselves. They are convincing evidence that county service companies under proper management can not only maintain but increase an established business under the most adverse conditions.

The volume of miscellaneous products handled has made a notable increase, particularly such items as Fly Spray, Stock Dip, Mange Oil, Wood Preserver, Cod Liver Oil, Alcohol, and Radiator Glycerine. A tabulation of the fly and insect killer and fly spray shipments shows a gain of 34 per cent for the period, which is the most outstanding among the entire list.

Two new products, automobile tires and Soyoil paint, introduced late in the year 1931, have developed into leaders among the miscellaneous products sold by a goodly number of companies. First line tires and tubes have been furnished under a double guarantee of service, to sell at popular prices. The response has been a steadily increasing volume of orders which would indicate a most promising future for this particular service.

Soyoil Paint Wins

Soyoil paint, the pioneer paint to be placed on the market containing not less than 25 per cent of soybean oil, has commanded the attention of farmers throughout the state. Some twelve thousand gallons have been distributed within the course of a few months with very satisfactory results. Judging from the experience with this product up to date a very substantial increase in volume can be expected in another year.

The business of the company for the fiscal period ending August 31 totaled $1,852,571.78 at wholesale prices, exclusive of Federal and State taxes. This figure is $100,000 more than the value of the merchandise purchased during the preceding year even though lower prices for most commodities prevailed throughout the period.

The Net Worth of the company as of August 31, 1932 was represented by a capital stock investment of $96,002.00 and a Surplus of $60,370.40, which with reserves for dividends total $242,887.08. Of this amount $186,671.73 was invested in U. S. Securities, $3,750 in the National Corn Credit Corporation, and the balance used for current requirements of the business. The capital stock of the company includes 934½ shares of Preferred "A" stock, having a par value of $100 per share. This stock is held by the fifty-two member companies. These shares are subject to 7 per cent cumulative dividends. The common stock outstanding consists of 52 shares, having a nominal value of $1 per share, which are held by the member companies and entitle them to participate in the patronage refund.

The gross operating income for the year was $145,572.55, an increase of 11.7 per cent over last year. Brokerage income of $110,318.47 was an advance of 6.39 per cent, and the trading income of $35,254.08 resulting from profits on purchases and sales, a gain of 32.37 per cent.

A net operating income of $104,273.97 with additional income of $9,777.30 from interest and discounts earned, less deductions of discounts allowed and loss on sales of bonds, resulted in a net income of $107,916.44 or 74.13 per cent of gross operating income, before deduction for patronage and Federal income tax, as compared with $100,811.41 for the preceding year. On the basis of the paid-in capital stock held by all member companies, the earnings represent a profit of 112.4 per cent on the investment.

Capital stock dividends in the amount of $6,424.25 will be paid to the member companies. This amount represents 4.41 per cent of gross income, and the addition of $17,580.84 to Surplus, 12.22 per cent of gross income. Approximately $80,000.00 in patronage refunds will be distributed to these member companies on a percentage basis of the brokerage earned and trading income on purchases and sales. This will result in a total of $86,514.68 being returned to the associated companies on the year's business.

Pay Stock With Refunds

Forty-seven of the companies to participate in the distribution of earnings were in operation the full time and the remainder from three to nine months. All companies organized prior to the calendar year 1931 have made full payment for their subscriptions for capital stock in Illinois Farm Supply Company from the annual patronage refunds. The majority of the companies organized in 1931 have earned sufficient patronage this year to entirely clear their notes covering subscriptions for stock.

The total aggregate sum of $243,737.01, or more than double the capital stock investment, has been returned to the member companies in the form of Preferred Stock dividends and patronage refunds during the past six years. This is an annual yield of 77.85 per cent on the investment, according to the amount of stock invested in the company, and 253.7 per cent returned on the basis of the total capital stock investment as of August 31, 1932.

This progress and achievement is now a matter of cooperative history. The future is of far greater concern. The period of most rapid expansion from the standpoint of new companies is almost at an end. Further development and advancement must necessarily come through concentration of effort in the territory already served. Economical and efficient

(Continued on page 18)

Republican Party Plank on Agriculture

(Continued from page 9)

ducing duplication, and relieving unjust burdens. The Republican Party pledges itself to this end.

More than all else, we point to the fact that, in the administration of executive departments, and in every plan of the President for the coordination of national effort and for strengthening our financial structure, for expanding credit, for rebuilding the rural credit system and laying the foundations for better prices, the President has insisted upon the interest of the American farmer.

The fundamental problem of American agriculture is the control of production to such volume as will balance supply with demand. In the solution of this problem the cooperative organization of farmers to plan production, and the tariff, to hold the home market for American farmers, are vital elements. A third element equally as vital is the control of the acreage of land under cultivation, as an aid to the efforts of the farmer to balance production.

We favor a national policy of land utilization which looks to national needs, such as the Administration has already begun to formulate. Such a policy must foster reorganization of taxing units in areas beset by tax delinquency, and divert lands that are submarginal for crop production to other uses. The national welfare plainly can be served by the acquisition of submarginal lands for watershed protection, grazing, forestry, public parks, and game reserves. We favor such acquisitions.

Milk Producers

(Continued prom page 15)

no business organizing, that they would rather deal with them as individuals. Yet the dealers themselves have an organization to help them fix prices to consumer and producer alike.

Process Own Surplus

Rather than submit to such dictation, the members of the Quality Milk Association last Tuesday began to deliver their milk to their own plant. They still stand ready, however, to supply the distributors with their requirements for their fluid milk and cream trade at $1.85 per hundred lbs. which is only four cents a quart, but to process their own surplus milk rather than deliver it to the dealers at less than cost of production or less than a cent a quart.

Recognizing the fairness of the farmers' program for intelligent milk marketing on the quad cities market, one dealer, the Sturtevant Ice Cream Company, has agreed to cooperate in every way, and pay the producers the agreed price of $1.85 per cwt. for all fluid milk and allow the dairymen the privilege of checking their sales records.

More recently an effort was made by certain distributors through legal technicalities to break up the Quality Milk Association and scare its members into withdrawing. This action was based on the contention that the co-operative organization had not secured permission from the Secretary of State of Iowa to organize. As a result, a few members were influenced to sign applications for withdrawal. The legal counsel for the Illinois Agricultural Association who set up the Quality Milk Association organized under the co-operative laws of Illinois advised late last night that the member producers on the Iowa side had been misinformed; that because the Quality Milk Association is a co-operative organization of farmers formed not for pecuniary profit, it is exempt from the state blue sky law, and in Iowa as in Illinois, needs no special permission to organize.

The organized dairymen here are going ahead in a peaceful way to work out their problem and become established as a factor in the quad-cities milk market. They appeal to the consumers' sense of fairness and justice to co-operate with them by buying milk only from dealers who are fair and honest in their relations with producers.

Soybean Growers Annual Meeting

(Continued from page 7)

want to say that the Farm Board has been conducted efficiently and economically. The real reason for opposition to it is the inroads cooperative marketing has made into the trade and profits of the private dealers.

"Your organization, the Farmers National which is a true co-operative, farmer-owned and farmer-controlled, is the largest grain marketing firm in the United States. It is represented in all the producing centers of the United States and in all importing countries. It is the only firm doing business from coast to coast and from the Canadian line to the Gulf.

Over $2,000,000 Profit

"During the last two and one-half years it made a profit of over $2,000,000 and paid as much or more than any other buyer. I know for a fact that you would not have secured as good a price for grain in the past two years were the Farmers National not in the picture. I also know that the $2,000,000 profits your organization made would have gone to the grain trade. You producers don't make any extra contribution to pay my salary and that of the other employees of the Farmers National. That is paid out of the commissions which heretofore have gone to the grain trade. After paying all expenses and getting more for your grain that $2,000,000 is what was left and that belongs to you."

Milnor defended Mr. Huff, president of the Farmers National. "The only thing they could find against Mr. Huff is that some 20 years ago out in Oronoque, Kansas where he was farming they did not have a preacher at the local church. Mr. Huff was an educated man—self-educated—and he took the pulpit and conducted church. He has been active in co-operative marketing for more than 20 years and during that time has been an active producer.

"You hear people say that you can't help the farmer by legislation. I used to think the same before I began studying the problem farmers are up against. But I know that in a country following a policy of special privilege to different groups through the tariff and immigration laws and other laws that the only way you can solve the farm problem is through legislation."

Only one change was made in the board of directors. L. A. Reed was replaced by Everett Reynolds of Morgan county. Officers and directors elected were J. W. Armstrong, Champaign county, president; Dwight Hart, Christian county, vice-president; W. G. McCormick, Douglas county, secretary; R. A. Cowles, Bloomington, treasurer; John Albright, Moultrie county; W. G. Sandusky, Vermilion county; J. F. Probst, Macon county; Parks Kerbaugh, McLean county; A. M. Piatt, Piatt county; Edgar Boynton, Sangamon county; T. H. Lloyd, Macoupin county; Sam Sorrells, Montgomery county; Burton E. King, Hancock county; Dan A. Smith, Shelby county; M. D. Tomlin, Mason county; and Everett Reynolds, Morgan county.

A Year of Progress

(Continued from page 17)

methods of operation, coupled with a sound, aggressive sales program, will do much to bring this about, while unity of action in the purchasing of essential supplies will continue to bring to the associated companies the highest quality merchandise at a minimum cost and at the same time accrue substantial earnings for the State Company from which annual patronage refunds will be paid. This was the ultimate object of those who sponsored the movement six years ago.

Secretary of Agriculture Arthur M. Hyde addressed a gathering of farmers from central Illinois at Mackinaw Dells in Woodford county on Sept. 23.

Number 11 | NOVEMBER, 1932 | Volume 10

Vote "Yes" On Bond Issue

All Organizations Unite In Drive To Pass Measure In Nov. 8 Election

WITH the slogan "Vote YES on the Bond Issue," the state-wide Emergency Relief Bond Issue Committee representing all important civic groups and trade organizations in Illinois swung into action last week in a united drive to insure victory for this important measure in the election on Nov. 8.

President Earl C. Smith, chairman of the state committee representing agriculture, labor, banking, business, women's clubs, real estate, manufacturing, newspapers, motorists, and others, following a series of conferences, announced that all groups are actively working in the campaign to get a majority vote.

The Illinois Agricultural Association and County Farm Bureaus are assuming responsibility for securing an overwhelming favorable vote throughout downstate rural districts. In addition many County Farm Bureaus have called or will call county-wide meetings representing all local interests to co-ordinate efforts in behalf of the measure.

While there is no organized opposition to the measure, indifference and misunderstanding loom as the chief obstacles threatening its passage.

If enough "YES" votes are secured it means that the $18,750,000 spent by the State Emergency Relief Committee for unemployment relief will be repaid out of each county's share of gas tax funds in proportion as state relief funds have been expended in such counties.

If enough "YES" votes are obtained it means that only counties which have used state relief funds will contribute from their share of state gas tax funds toward repayment of the loan.

No increase in the gas tax will follow.

But if the bond issue fails to carry it means that at least 35 to 40 cents per $100 assessed valuation will be added next year to the usual tax rate for state purposes on real and personal property throughout Illinois. This extra tax will approximately double the 1931 state tax rate of 39 cents.

Failure of this proposal to carry will result in an extra tax on the average quarter section farm in Illinois next year estimated at $25.

Failure of the measure will mean that Illinois farmers in 1933 will be required to pay approximately $5,000,000 additional state taxes. Failure means that an extra $25,000,000 will be levied against property in Illinois to insure the payment of the $18,750,000 spent by the Emergency Relief Committee, most of which went to Cook county.

To insure a favorable vote a uniform plan has been developed by the I. A. A. and the County Farm Bureaus to:

1. Provide speakers' bureau in each county with a group of men and women thoroughly informed on the measure who can explain it in a few minutes before all meetings held before Nov. 8.
2. Prepare a statement signed by the head of every organization in each county and give it publicity calling upon their members and the public at large to vote "YES" on this measure.
3. Man the polls in every rural precinct, with the Farm Bureau using its township and road district tax committees as workers at polling places.
4. Create a county publicity committee to contact all newspa-

(Continued on next page)

What a "Yes" Vote Means

The Illinois Agricultural Association and the County Farm Bureaus are charged with the responsibility for securing an overwhelming "YES" vote in downstate counties on the bond issue November 8. The passage of this proposal is of tremendous importance to farmers because they are all property owners and taxpayers.

A "YES" vote on this measure will be a vote to throw off $5,000,000 on the farmers' 1932 tax bill payable in 1933.

A "YES" vote is a vote to throw off at least $25 in taxes on the average quarter section Illinois farm.

A "YES" vote will be a vote to transfer the burden of unemployment relief from property to each county's share of the gas tax in proportion as relief funds have been expended therein—without any increase in the gas tax.

A "YES" vote means that Cook county must pay its own unemployment relief bill of more than $17,000,000, or 91.4 per cent of the whole.

A "YES" vote and passage of the bond issue insures that counties which received no part of the $18,750,000 spent for unemployment relief will pay no part of this loan.

Finally a "YES" vote is a vote for lower taxes—a vote for reducing the levy on all property next year $25,000,000.

A "NO" vote or a failure to vote is, in effect, a vote to force this levy on property.

A "YES" vote is urged by the following statewide organizations: Illinois Agricultural Association, Illinois Association of Real Estate Boards, Illinois Bankers Association, Illinois Chamber of Commerce, Illinois Emergency Relief Commission, Illinois Federation of Labor, Illinois Federation of Women's Clubs, Illinois League of Women Voters, Illinois Manufacturers Association, Illinois Press Association, Chicago Motor Club, and many other groups both state and local.

pers, radio stations, and other publicity mediums to impress on readers and listeners the importance of approving the bond issue.

In Chicago and Cook county, civic leaders supported by all newspapers went into action the middle of October making addresses before luncheon clubs, trade associations, and neighborhood, civic and business organizations. Fred Sargent, president of the C. & N. W. R. R., is chairman of the committee pledged to secure a favorable vote in Cook county.

An effort is being made to schedule speakers on all the radio stations in Chicago and St. Louis to urge every Illinois citizen to vote "YES" on the bond issue November 8.

Reports from County Farm Bureaus reveal that much work has been done during the past month.

"The Farm Bureau has sponsored the cause at community meetings and if there is not a 100 per cent vote in favor of this proposition in St. Clair county it will be because there are more dumb folks here than we realize," wrote B. W. Tillman, county agricultural agent. "Every organization in St. Clair county has endorsed the bond issue and urge the citizens to vote in its favor at the election. We shall continue our efforts along every reasonable line to foster a favorable vote on this proposition."

In Whiteside county the Farm Bureau sponsored a county-wide meeting representing all civic, business, and trade organizations at Morrison on October 20. Plans were laid to have at least six workers at each polling place in all towns and cities as well as rural districts in the counties on November 8. It will be their sole duty to see that every man and woman votes "YES" on this measure.

Similar meetings have been or will be held and definite plans adopted throughout the downstate counties for the purpose of securing a favorable decision.

Vote To Re-elect Them

The greatest economic battle fought on the floors of the General Assembly in recent years was waged last spring over the passage of the State Income Tax and the use of all revenue derived therefrom to reduce taxes upon property.

On one side were the home and property owners of Illinois, commonly known as the property taxpayers. On the other side was a relatively small but influential group enjoying large incomes comparatively free from taxation as a result of constitutional restrictions and legislation in behalf of special privileged classes. The home and property owners won this battle in the Senate by *three* votes, and in the House by a margin of one.

EARL C. SMITH

The next General Assembly will have before it other far-reaching and effective legislation having for its purpose more equal distribution of the tax burden. To a large extent, the result of future efforts of this character will be determined by the voters in the election of members to the General Assembly on November 8th.

The voting record of members of the General Assembly on the Income Tax is presented on page 5. We urge all members and friends of the Association to carefully review this voting record and to *put forth every effort to secure the reelection to the General Assembly of all present members seeking reelection, who by their favorable votes on this important measure have been tried and found worthy of this support.*

By so doing, the property owners of Illinois will not only be repaying, in part, what they owe to their representatives, but will be laying an effective groundwork for future constructive legislation now in the making.

The time has arrived when the thinking voters of the State must lay aside party prejudices, or at least make them secondary to the economic interests of the people at large.

Earl C. Smith
President

Waterfowl Show At Kewanee Nov. 9

The third annual Illinois State Waterfowl Exposition will be held in connection with the 40th annual Illinois State Poultry Show at Kewanee November 9 to 13.

The waterfowl show is being held during the week of the National Corn Husking Contest. A special waterfowl judge will judge all entries. Many cash premiums, club specials and badges, and silver trophies are offered.

Competition is open to anyone. Past records include the largest Pekin and Rouen duck classes and the second largest Toulouse goose class ever exhibited in the world with entries from six states. Prospective exhibitors of ducks and geese should write the secretary, Ruth M. Adams, Alexander, Illinois, for catalog.

I. A. A. Statement On Gateway Amendment

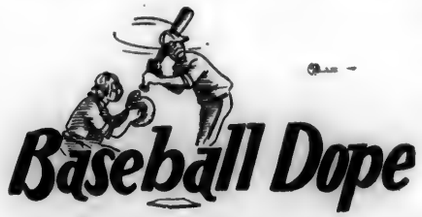
In answer to numerous inquiries about the so-called Gateway amendment, proposing to modify the amending article of the State Constitution, and submitted for vote on November 8, 1932, the Illinois Agricultural Association offers the following information:

The only modification proposed is to change the word *one* to *three* in the amending article so as to permit the legislature in any biennial session to submit amendments to three articles of the Constitution instead of one, as at present.

The Association is taking no position on this proposed amendment, for the reason that such action, regardless of whether for or against it, would tend to divert attention from the far more important State relief bond issue. The submission of changes in two or three articles, instead of one, would probably not make it easier to secure the required majority of all votes cast in any election. It has usually been this requirement that has defeated every constitutional amendment submitted in the last 24 years.

The constitutional amendment is of little importance compared with the proposed State relief bond issue to pay State anticipation tax notes. Unless the bond issue is approved, another State tax, *in addition to* the usual State taxes, must be levied on all property. The constitutional amendment and the bond issue should not be confused. The constitutional amendment will be printed on the main ballot containing the names of candidates for the various national, state and county offices. The State bond issue will be printed on a small ballot by itself.

The Illinois Agricultural Association urges that its members and other down state people concentrate their effort to secure approval of the State bond issue on the small ballot.



Uncle Ab says he does not know anything that is good just because it is old, even though some old things are good.

HOW SENATORS, REPRESENTATIVES VOTED ON INCOME TAX
In the Special Session of the Fifty-Seventh General Assembly

District & Counties	For	Against
7th District (rural and suburban Cook county and part of City of Chicago)		
Sen. Huebsch	X

Rep. Rush	X	

**Absent on account of illness and so notified representatives of Association. Rep. Nyman made effort to be present but because of car trouble arrived too late to vote.*

In addition to the above, Sen. Roberts and Rep. Blackwell of Chicago voted for the Income Tax Bill, being the first two votes ever cast from Chicago for this legislation.

As we go to press, the crack Farm Bureau nines from Livingston and McDonough counties are scheduled to play the final game of the state championship series at Peoria (3-I League diamond) on Oct. 22.

McDonough won the state title two years ago, and Livingston took the flag last year. The two teams are evenly matched, and judging from the outcome of the first two games which were evenly divided, the team that is nearest "right" on the final day will win the championship.

After winning the first game played at Macomb by the one-sided score of 11 to 4—the game was much closer than the score indicates—the McDonough county boys drove over to Wing the following Saturday where the Livingston team gave them a severe drubbing, score 10 to 2.

In the opening game of the series at Macomb on Oct. 8 McDonough started out in high gear driving in four runs the first inning. Livingston came back in the fourth to tie the score at four all. But McDonough came up in the fifth and started a batting spree that netted five more counters. Then Arntzen, McDonough hurler, settled down and held the opposition scoreless the rest of the way.

In the game at Wing, fragmentary reports credit Livingston with 13 hits against McDonough's nine. Both teams made two errors. The 1932 state champions will be awarded a trophy presented annually by the Illinois Agricultural Association.

No Vote Recorded On Price-Raising Bills

Many members of the Association have been making inquiries as to the attitude of their representatives in Congress on agricultural measures having for their purpose a raise in the price levels of farm commodities.

The Association's policy confines all pronouncements of this character to the voting records of members of legislative bodies.

The Rainey-Norbeck price raising bill did not come to a vote in the House, therefore, there is no voting record. It is only fair to all downstate Illinois Congressmen to say that in each case they had given their definite assurance of active support, if and when this legislation could be brought to a vote.

Although the Norbeck bill passed the Senate, the record shows there was no roll call, it having passed by an Aye and Nay vote.

Domestic Allotment Plan Principles

Fits Specifications Presented By Gov. Roosevelt In Topeka Speech

The domestic allotment plan in which considerable interest has been expressed both by farm and business leaders was first suggested, according to reports, by the late Dr. Walter J. Spillman of the U. S. Department of Agriculture, and developed by Professor John D. Black of Harvard University, and Prof. N. L. Wilson of the Montana State College.

In April this year a committee was set up to draft a bill embodying the plan to be presented to Congress, reports the Business Week. That committee was composed of Mr. Wilson, Henry I. Harriman, president of the U. S. Chamber of Commerce, R. R. Rogers of the Prudential Life Insurance Co., Louis S. Clarke of Omaha, president of the Mortgage Bankers Association of Nebraska, Henry Wallace, editor of Wallace's Farmer, and W. R. Ronald, editor of the Evening Republican of Mitchell, South Dakota.

The Rainey-Norbeck bill introduced in both houses of Congress late during the last session embodied the principal features of this plan which briefly is as follows:—

Each farm producing wheat, cotton, hogs, tobacco, or rice is to be allotted each year, or at shorter intervals for hogs, a definite production allowance based upon the average production of that product on that farm over the past five years.

The total allotments for each product are to be determined for each state by the federal government on the basis of the Department of Agriculture figures showing average acreage during the preceding five years and average yield per acre for crops during the preceding 10 years. Each state would similarly determine the total allotment for counties through a state commission, and each county or township could set up a voluntary board of farmers to determine allotments to individual farms.

The plan would be put into effect only when at least 60 per cent of producers of the product by referendum agree to abide by it and sign contracts with the government. These contracts would stipulate that the farmer must not produce more than the allotted amount and must agree to reduce his production according to instructions issued by the Federal Farm Board or similar agency.

In return for this agreement, the producer would be paid by the government an amount equal to the tariff on the product for each unit domestically consumed. This would amount to 42 cents per bushel for wheat, five cents per pound for cotton, two cents per pound for hogs, five cents per pound for tobacco, and one-half cent per pound for rice, these being the crops with a surplus for export to which alone the plan would be applied, since other products already receive the benefit of increased price through tariff. The proportion of the crop required for domestic consumption would be determined by the Department of Agriculture each year. These payments would be made in addition to the regular market price received by the farmer.

The money to pay this subsidy to farmers agreeing to control production would be raised by a federal excise tax levied on processors or distributors of the product, and also on substitute products like silk and rayon. No tax would be levied on products exported, or on feed or products which are consumed on the farm.

The plan meets the specifications presented by Governor Roosevelt, reports Business Week, because it provides for the producer of surplus staple commodities a tariff benefit over world prices which would conceivably be equivalent to the benefit given by the tariff to industrial producers, and does not stimulate further production.

It finances itself and does not draw on the public treasury. It does not involve any mechanism for dumping products abroad so as to cause European retaliation. It makes use of existing agencies, and is so decentralized that the chief responsibility for its operation rests with the local interests rather than with any new created bureaucratic machinery. It operates on a co-operative basis and can be altered or withdrawn as conditions change. It is wholly voluntary.

Farm Wages Are Now Below Pre-War Period

Farm wages are the lowest in thirty years. Wages range from 60 cents a day without board in South Carolina, Georgia and Mississippi, to $2.50 a day in Massachusetts, the average for the country being $1.19 a day.

The farm wage index computed by the Bureau of Agricultural Economics was 84 per cent of pre-war, on October 1, a decline of 3 points since July 1.

The yield per acre of corn this year for Illinois will average around 40 bushels, according to October 1 returns from state crop correspondents. This is the highest since the 1925 record yield of 42 bushels. The yield per acre of soybeans is reported the best in years.

I. A. A. States Policy On Relief Legislation

Legislative representatives of the Illinois Agricultural Association, who have been on the job in Springfield since the opening of the present special session of the General Assembly now considering unemployment relief, are holding to the principle that each county should be responsible for raising and expending its own funds to relieve its destitute people.

"The one danger we must avoid in all unemployment relief legislation is waste and extravagance of the taxpayers' money," said President Earl C. Smith, in a recent statement. "If relief funds are raised and spent locally there will be less waste and less danger of perpetuating a dole system with all its attending evils.

"We must prevent the development of a situation in which counties are forced into competition to get their share of unemployment relief funds," he said. "Neither the federal nor state governments can afford any longer to be Santa Claus to any county or relief organization. The farther away from home the money is raised, the more likely it is to be misspent."

If further funds must be provided the I. A. A. favors legislation to permit Cook county, and if absolutely necessary, other counties, by a two-thirds vote of the county board, to levy a two per cent tax on all retail sales except foods for human consumption, in providing funds for the relief of their own destitute citizens.

The Illinois Agricultural Association regards as undesirable any further diversion of the county's share of gasoline tax funds for relief purposes. However, it did not oppose the measure recently passed by the legislature which allows counties by vote of their respective boards to divert their share of gas tax money to unemployment relief.

It is doubtful if any further legislation of a relief nature will be proposed until after the election. Legislative representatives of the I. A. A. will be at Springfield if and when the General Assembly convenes again.

Sen. Frazier Addresses Hoosier Farmers Nov. 16

Senator Lynn J. Frazier of North Dakota will be the principal speaker at the annual convention of the Indiana Farm Bureau on November 16 at Indianapolis.

Senator Frazier's bill to refinance farm mortgages at a low rate of interest through federal aid is expected to be one of the important measures before the next Congress.

Credit Unions Now Operate In Indiana

Credit unions are now operating in 20 Indiana counties. Only producers of farm commodities are eligible to membership and only members are entitled to loaning privileges. Members subscribe for one or more shares at $5 each, constituting the deposits, and borrowings have ranged from $25 to $400.

"A growing interest is shown in the new movement among farmers because of the immediate accessibility to small loans with which to finance payments of taxes, crop and livestock production and other needs of the family at a time when the farm income is at low ebb and other local credit facilities not in position to serve the farmer," says C. H. LaSelle, director of the credit union division, Indiana Farm Bureau Cooperative Association, Indianapolis.

Each credit union is strictly a cooperative organization operated solely for its members. The state banking department maintains supervision for the protection of members and depositors, but the primary purpose is to serve rather than make large profits. At the end of the fiscal year, the earnings, excepting some for a reserve fund, are returned to the members in the form of dividends or interest. A nominal interest charge is made to borrowers.

Farm credit unions are now operating at Greenfield, Wabash, Albion, Huntingburg, Goshen, Huntington, Columbia City, Greencastle, Evansville, Frankfort, Nobl'esville, Sullivan, LaGrange, Angola, Auburn, Plymouth, Rochester, Kokomo, Seymour and Crown Point.

R. F. C. Prepares To Export Farm Products

The Reconstruction Finance Corporation, according to reports, is at last setting up an export division for the express purpose of moving farm surpluses into foreign countries which can buy only on a long-t'me credit basis. Provision for this action was made in the act amending the original R. F. C. measure, passed in the last session of Congress

One of the first projects will probably be the exportation of large quantities of wheat to China. This news is of special interest to wheat growers in the northwest, reports the Farmers National Grain Corporation. A good wheat crop in that area this year has resulted in a large exportable surplus and since growers on the Pacific coast depend to a considerable extent on Oriental markets they are hopeful that the credit arrangement can be made.

In this hope, however, grain growers do not seem to have the support of the private grain trade on the coast which complains that the former sale to China put local wheat prices so high that they were unable to sell wheat to the rest of the world and therefore are losing commissions. In other words the private handlers of grain preferred lower prices that they may make sales more readily. They are interested only in the commission.

Talks on the Emergency Relief Bond Issue which will be voted upon November 8 will be made on Chicago radio stations the week preceding the election. Stations WLS, WJJD, and WMAQ particularly are expecting to schedule speakers on this important measure.

The Illinois Agricultural Association is providing a speaker for Farmer Rusk's radio program each Thursday night at 8:15 P. M. from station WJJD, Chicago.

The crop allotment plan and the possibilities in acreage reduction as a way to higher farm prices were discussed by George Thiem, director of information, the night of October 13. G. W. Baxter of the Transportation Department discussed the mixed livestock rule and other utility problems October 20. J. H. Kelker was scheduled to speak on farm fire prevention the night of October 27.

Station WJJD is seeking to get the farm organizations and co-operatives with headquarters in Chicago to sponsor a 15-minute program each evening at 8:15. In addition time will be allotted on the noon-hour farm service program from 12:30 to 1:00.

Station KMOX, St. Louis is broadcasting agricultural talks regularly during its noon farm service hour. Talmage DeFrees, president of the Illinois Fruit Growers Exchange and director from the 22nd district on the I. A. A. board, spoke over station KMOX on October 25, 12:45 P. M., subject "The Farmer's Future." The Department of Information has offered to co-operate in scheduling a series of farm speakers from this station during the fall and winter months.

Country Life Insurance Company will broadcast a half-hour jubilee program over station WLS, Chicago, 8:30 to 9:00 P. M. the night of Saturday, December 10. This program will be broadcast in connection with the county Country Life queen contests to be held over the state that evening. Radio hook-ups will be made so that those who attend the various celebrations may hear the broadcast. The broadcast will wind up an "Achievement" drive among the Country Life agents.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for missent copy please indicate key number on address as is required by law.

Study Candidates' Statements

IN THE October issue of the I. A. A. RECORD, there were printed the agricultural planks of the Democratic and Republican platforms, also a statement of the I. A. A.'s political policy as follows:

"History discloses that party pledges amount to little, except to the extent that leading candidates place their personal interpretation upon their party platforms, and in addition pledge their active support and participation in putting into effect their understanding of party pledges.

"The Illinois Agricultural Association urges all of its members and friends to carefully study these platform pledges of the respective parties and throughout the presidential campaign to follow closely the interpretation placed upon these platform pledges by the leading candidates of the respective parties. By so doing, farmers and all friends of farmers, and in addition all those who believe that the restoration of agriculture to a basis of prosperity is a first essential to the restoration of prosperity in America, will be enabled to vote intelligently and effectively on November 8th on what the Association believes to be the greatest issue confronting the American people at this time.

"The Association has never engaged in partisan politics and is not now offering any advice of a partisan character. It does, however, urge its members and friends to join forces in support of the candidate who most clearly, definitely and courageously deals in understanding terms and commitments on this all important issue and, by such joining of forces, to discharge not only their rights but their duties at the polls in the interest of genuine public welfare and the perpetuity of the principles of government as outlined by the founders of the Nation."

The soundness of this policy is best understood when considering that immediately after the party conventions, the Democratic National Committee announced that its candidate would deliver at least one address in the mid-west, largely confined to agriculture and its party agricultural policy; and the Republican National Committee announced that its candidate would deliver not to exceed three addresses in the campaign, one of which would be largely confined to its past and future agricultural policy.

When called into conferences by party leaders, the I. A. A. has confined its position to urging candidates of both parties to lay greater stress upon the solution of the farm problem, believing that upon a sound and permanent solution of this question largely depends the return of America to a normal basis.

As we go to press, in this, the last issue before election, the Democratic candidate has delivered one address, chiefly confined to agriculture. In other speeches he has referred directly to agriculture and its importance in the economic affairs of the Nation. The Republican candidate has delivered one address largely confined to agriculture and what may be expected by farmers if the present administration is continued.

According to announcements of party headquarters, the Democratic candidate is to again come into the mid-west and is scheduled to speak in Springfield, Illinois, to discuss matters of major economic interest to this section of the Nation, particularly agriculture. It is also understood the Republican candidate will, before election, again come into the mid-west, possibly Illinois, in a further address largely confined to agricultural policies and the party's attitude toward the farm problem.

Wide publicity has and will be given to all pronouncements of leading candidates of political parties up to the day of election. The I. A. A. continues to urge its members and friends of agriculture to carefully study and review all previous pronouncements, both in platforms and in the interpretation of platforms by leading candidates and to watch closely further pronouncements of a definite character by such candidates. Only by so doing can voters be enabled to vote intelligently and effectively on what the I. A. A. believes to be the greatest issue confronting the Nation at this time.

Vote For Your Friends

THE state income tax passed by the General Assembly on Feb. 2 and now awaiting a decision as to its constitutionality by the state supreme court, was the most important measure

(Continued on page 9)

Vote for Your Friends

(Continued from page 8)

affecting farm interests before the special session of the legislature last winter.

When in operation it is believed that this legislation will provide from $25,000,000 to $30,000,000 per year in such years as 1931, and from $40,000,000 to $45,000,000 per year in years of greater prosperity—all of which will REPLACE a like amount of taxes now levied on property.

The Illinois Agricultural Association sponsored this measure and urged a favorable vote by members of both houses at Springfield. The vote on this bill was a test of each member's interest in removing a part of the heavy tax burden now borne by property owners. The vote was a test of each legislator's interest in bringing tax relief to the farmer and home owner.

The members of the Association and friends of agriculture must recognize that to secure the passage of this legislation, tremendous opposition had to be overcome. Many of those who have been enjoying privileges and benefits of government without contributing directly to its cost recognized immediately that this legislation would bring them into the tax-paying class.

Members of the General Assembly were importuned on every hand to oppose the legislation. To those members who stood up against all opposition and who overcame all obstacles obstructing its passage belongs the credit for these newly created statutes. Farmers and other property owners, regardless of party faith, should support these members in the coming election.

Put Export Bounty On Hog Products of Ireland

New governmental regulations relating to hog production and international trade in pork products have been adopted or proposed recently in several European countries.

Export bounties for hog products have been inaugurated in the Irish Free State and the Netherlands, and the establishment of quotas for imports of lard and pork products is being advocated strongly in Germany.

Recent declines in hog prices in the United States are attributed to relatively large supplies of dressed pork. Inspected slaughter in September was the largest on record for that month.

Consumption of pork, lard, and mutton in the U. S. are greater this year than last, while beef and veal consumption are lower. Exports of hog products for the first eight months of '32 were the smallest for any corresponding period in at least 30 years.

Acreage reduction as a way to higher farm prices is receiving more and more consideration as thinking people delve deeper into the farm problem.

Acreage reduction must be considered whether we will or not, if higher prices is to be our goal. The American farmer's market outlook is far different today than a few years ago. The entire civilized world is going through a depression. Countries burdened with debt, of necessity, are conducting their businesses very much the same as an individual or a family in a similar position. They are growing more of their own food supply, buying as little as possible, paying off their debts. Tariff barriers, import quotas, and embargoes are symptons of this condition.

As a result the export market for many American farm products has all but evaporated. Until that market is re-established and trading between nations resumed, it seems folly to continue producing more than the market wants at a price somewhere near cost of production. That is unless we desire to be altruistic and continue producing a cheap food supply at less than cost as a public benefaction.

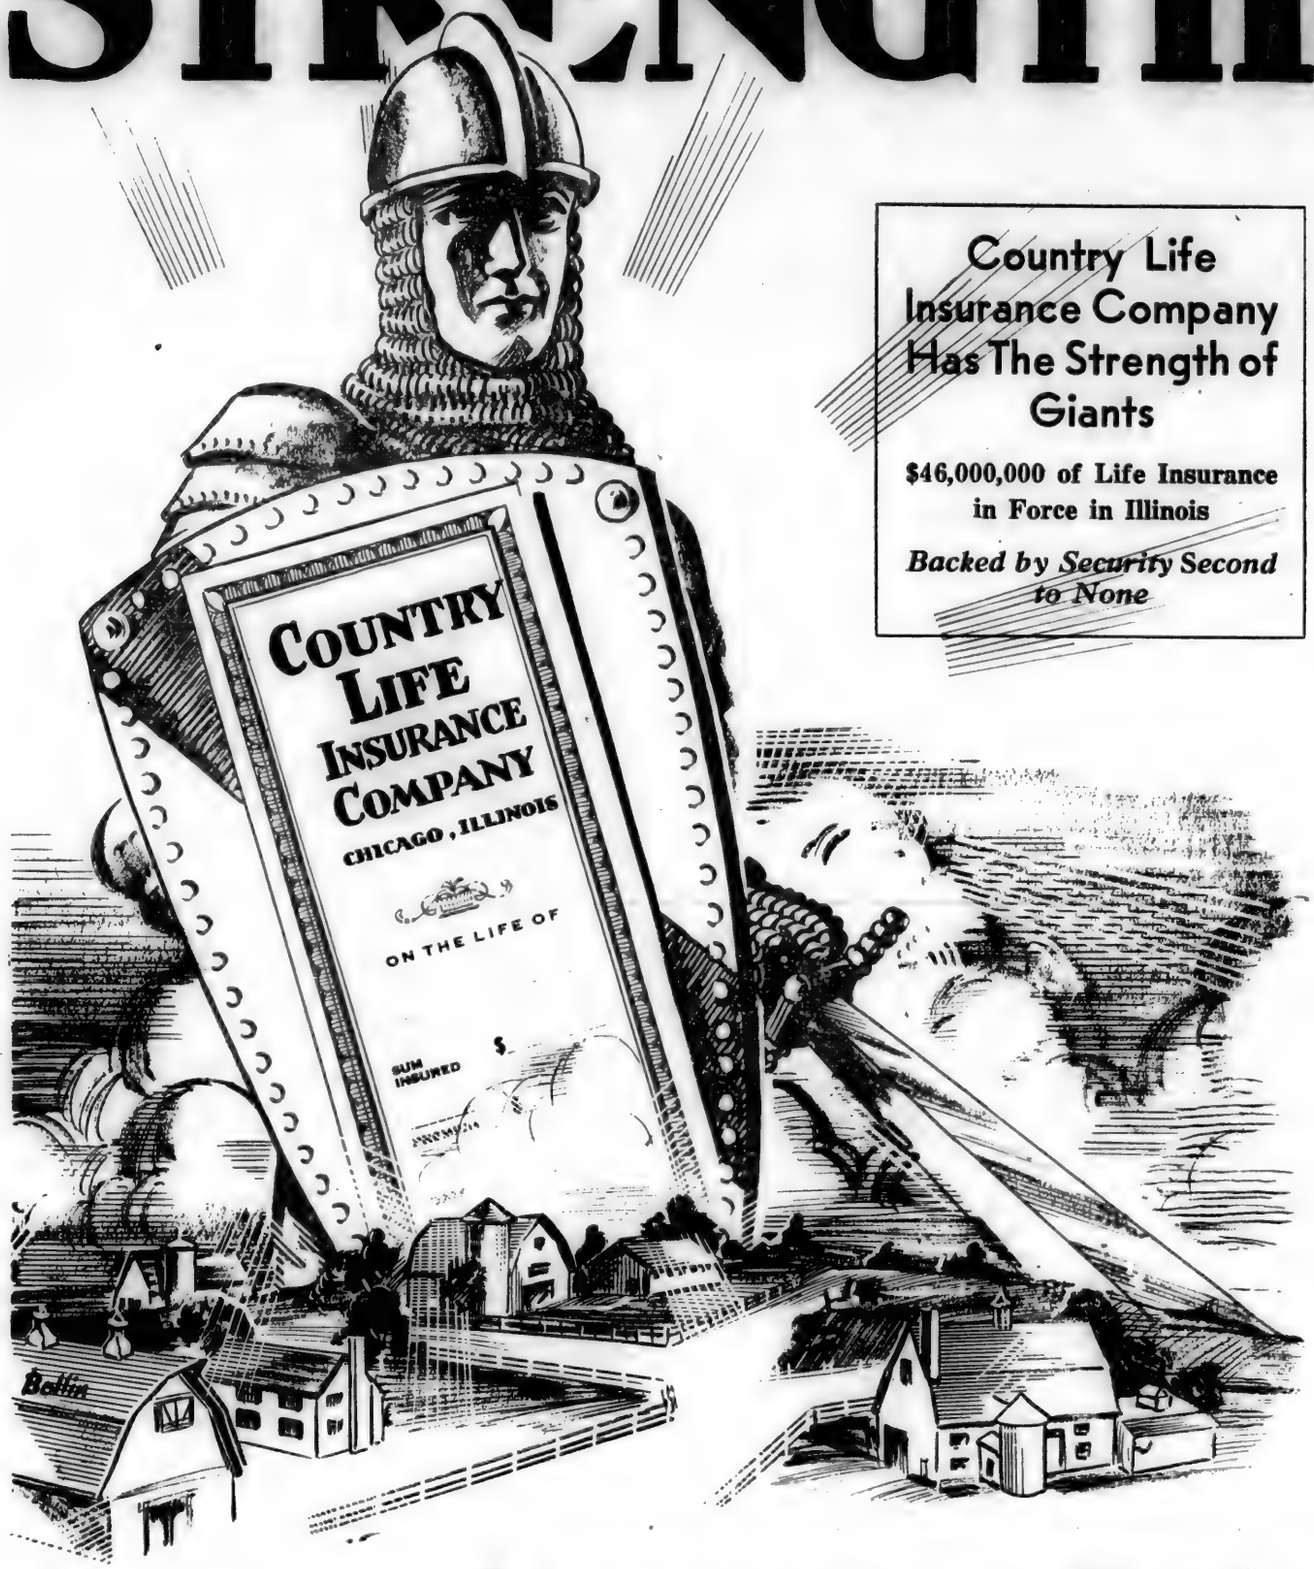
Few people doubt the effectiveness of a drastic cut in corn and wheat acreage in raising prices. But there is some doubt about possibilities for accomplishing this feat following a voluntary plan. The fact is that such a plan has never been seriously attempted. There has never been any organization to put the job over. There has been advice and warning which, as might be expected, got nowhere.

That farmers and others dependent on agriculture are giving serious thought to acreage reduction is indicated by expressions from many sources. They do not all agree on the amount of reduction, nor on the means of obtaining the desired ends. "A 25 per cent reduction is not enough," writes Leon Lemaire, farmer and manufacturer of Des Moines county, Iowa, who states that he has lost large sums of money in farming during the past eight years. Mr. Lemaire also manufactures pearl buttons a goodly share of the income from which he presumably has lost in farming.

"The supply that is carried over would still make an oversupply and the price would not respond," he continues. "In order to make the prices respond enough to put the farmers in a good position and revalue the real estate, the crop must not be over two-thirds of a regular normal acreage. Anything above that would only continue very low prices. Then, after that is done, let them have a little backbone and sell their crops for cost of production plus a nice profit, same as a manufacturer might do.

"If it were not talking out of school, I could tell you that in our line of production we see to it that we do not produce merchandise that is not wanted. That is what the farmers are doing, and they are suffering from the result. Ten cents for corn is a joke. That is what it is worth here now for any corn. It is simply destitution. It is bankruptcy.

"At the same time, if we had 1,500,000,000 bushels of corn crop, and if we had had not over 550,000,000 bushels of wheat raised, the farmer would be well-to-do today. There would not be any foreclosures for non-payment of taxes and interest. Country banks and all banks interested in real estate would not have been forced into bankruptcy, and the farmers would be buying their supplies and paying for them. The whole country would be benefited, instead of Sovietized as we are today.



"But they must be well guarded against the commission men and railroads and speculators. They will make the greatest howl against a reduced acreage that you have ever heard, but at the same time, that is the saving of the farming situation."

The surplus bugaboo is the stumbling block which has wrecked nearly all previous efforts to maintain profitable prices for agriculture or other commodities. Once the crop is produced, whether it is kept on the farm, impounded in terminal elevators, or shipped abroad, it has a depressing influence on markets. But if an effective way can be found to curb production, to keep the surplus in the ground as in the case of crude oil in Oklahoma and Texas, the problem will be largely solved.

And with reduced acreage farmers will be conserving soil fertility, saving labor, cutting down the wear and tear on machinery and equipment, and getting more actual dollars for their lowered production than they heretofore have secured for a record-breaking crop.—E. G. T.

Stove pipes should always enter directly into the chimney without passing through closets, walls, or partitions If the chimney pipe must pass through a partition, a ventilating thimble should be provided.

Farm Supply Meeting, Bloomington

More Than 500 Delegates, Managers, and Farm Bureau Leaders Attend Enthusiastic Session

A RECORD breaking year in the sale of petroleum products through the 52 county service companies associated with Illinois Farm Supply Co. was reported at the annual meeting of the state-wide organization at Bloomington, Oct. 12. More than 500 delegates and visitors, most of them leaders in the Farm Bureau movement in Illinois, attended the enthusiastic convention held in the Y. W. C. A. auditorium.

L. R. MARCHANT

In spite of the decline in most industries the State Supply Co. handled 35,500,000 gallons of petroleum products, a larger quantity than in any previous year, during the 12 month period ending August 31.

Manager L. R. Marchant reported that the Illinois Farm Supply Co. and its associated companies now ranks as the largest association of its kind handling petroleum products and farm supplies in the United States.

"Our distribution of petroleum products exceeds that of any other group of farmer-owned and operated companies," he said. "This fine record of achievement has not taken place of its own free will. Close observation of the membership contract, splendid co-operation, and co-ordination of member companies and their increasing tendency to bind themselves together for their mutual protection and advancement have been the keynote to success.

Pay As You Go

"The financial strength of the company is frequently expressed by the manner in which it meets obligations. It is up to every local company to keep its own house in order. It should institute into the minds of its patrons the 'pay as you go' plan, and conquer the credit problem from its best means of approach. Experience shows that the chief cause of business failures is the result of inability to do this and farmer-owned and controlled companies are no exception to the rule."

A statistical report of operations in the 12 month period ending August 31 was published in the October issue of the RECORD.

One of the principal addresses of the afternoon was made by J. Frank Grimes, president of the Independent

Grocers' Alliance. "From the looks of the financial statement of your company which shows increasing dividends for six consecutive years, your company should be an institute or example for all America to see," said Mr. Grimes.

A Sleeping Giant

"Have you the slightest conception of the enormous power that lies in the hands of agriculture that it does not even attempt to use? There is an enormous power lying sound asleep, and through sensible and powerful methods of merchandizing and advertising that great sleeping power can be awakened. Organization can accomplish almost anything it goes after, anything that is reasonable, that is proper, that is right. It is wonderful to see an organization built up of men who know what they are going after. There are sensible, practical, scientific ways of doing things if we will study them out and put them into practice."

"This thing called credit trouble can be diagnosed as the principal disease of the world today," declared J. N. Moylan, credit manager of the American Steel and Wire Company, Chicago. "A sale is never complete until the money for that sale is deposited by the seller. There is no glory in putting a volume of business on the books and waiting for the money to come back. There is no business wisdom having to do with credits, that can be swallowed in capsules. There is only one way you can control the credit problem and keep yourself out of trouble. Do business for cash as nearly as possible especially in handling consumption articles such as petroleum products.

Troubles Within Hurt

"In every co-operative organization of any form the troubles from within are the troubles that really hurt. Frequently those who sit in places of authority are inclined to ask for special privileges on the terms of sales, etc. Directors should have no reason to expect favoritism which may lead to further violation of the company's policies and break down sound business principles."

Referring to the fundamentals of a business organization Moylan compared it to the wheels of a wagon. The right front wheel he said might represent the stock of merchandise which should turn over quickly. Merchandise which is slow in selling will pull the wheel out of line.

"The left front wheel, accounts receivable. Too many accounts receivable will make the going lopsided. The right rear wheel, the cash or working capital, is a very important part of a business. The left rear wheel, the plant investment, the tanks, trucks, etc. These must all be kept up to keep the wagon running smoothly. All four wheels should be the proper size and stay well balanced to go along over all kinds of roads in good order. We are traveling the dirt roads today and if the wheels are out of line it is almost impossible to travel."

Great Accomplishment

"Business in no line can show the accomplishments of this cooperative endeavor," said Donald Kirkpatrick of the I. A. A. Referring to the unorganized territory of the state he said: "Fill up those white spaces, improve your merchandizing methods, tie the organization together in such a way as to present a united front."

Answering the question "Who should be entitled to the rights and privileges of the local companies?" Kirkpatrick said: "The County Farm Bureaus should furnish the county supply companies with a certified list of all members in good standing prior to the declaration of any patronage refund. Failure on the part of the service company to strike from its records all Farm Bureau members who are not in good standing at the time the patronage refund is declared, might lead to legal difficulties."

Adoption of a resolution pertaining to the definition of membership in good standing as approved by the Illinois Agricultural Association at its annual meeting last winter was recommended. This resolution in part is as follows:

Who Is a Member?

In all matters relating to affiliated or subsidiary organizations connected with the Illinois Agricultural Association and County Farm Bureaus wherein the term "membership in good standing" or a term similar is used involving the right to service or distribution of savings or earnings, membership in good standing be allowed, if such

Grain Marketing

A PARTY of farmer elevator managers and grain producers from Livingston county on a recent tour visited elevators at Graymont, Secor, Kruger and Washington winding up their trip at the million bushel terminal elevator and offices of the Farmers National Grain Corporation at Peoria.

Directors of the Farmers Grain Co. at Fairbury, and of farmers' elevators at Ocoya, Pontiac, and Rooks Creek made the trip.

Answering questions about the service of the Illinois Grain and Farmers National, A. B. Sheeler, manager of the 500,000 bushel house at Graymont, said: "Even though our agreement says that we are not compelled to market our grain through the Farmers National only when it can give us a net or on track price equal to or more than I can get from any other source, I find that between 60 and 70 per cent of our grain goes to the national cooperative. The service from the office at Pontiac has been excellent."

George L. Potter, member of the grain marketing committee of the Livingston County Farm Bureau, made a complete report of the trip to the Bloomington Pantagraph.

He quoted Mr. Greiner of the Secor elevator to the effect that about 80 per cent of their grain went to the Farmers National Grain Corp. Mr. Potter's report of the trip follows:

Manager Smith of Kruger said, "We came into this program as one of the first. We were required to buy capital stock to the extent of $100 for each 10,000 bushels handled. For the protection of the few of us who pioneered this field, we bound ourselves together with an agreement to market all our grain through our own sales agency. We never altered from the course and for two years 100 percent of our grain has gone through the Farmers National.

"Now that the success of the venture is assured, there being over 100 elevators as members in Illinois, who have originated some twenty-five million bushels of grain to the Farmers National, we are allowed to find a better market if we can. Even though brokers continue to call us daily, I believe they offer no better market than the Farmers National and 100 percent goes to it."

Service Excellent

Mr. Esch, manager of the Washington elevator, said, "I was cautious of this proposition at first, and our board was divided. But the service is excellent and I find that approximately 90 percent of all our grain finds itself in the Farmers National hands. Here is the one great opportunity that has been offered the grain farmer to organize and gain the advantages offered of co-operative sale of his product."

The visitors were especially interested in going through the million bushel terminal elevator owned by the Farmers National and the instructive description of methods of handling by Mr. Wilke, the manager.

All Sold or Hedged

He said, "We have 985,000 bushels of grain on hand. We move in and out about 500,000 bushels a month. We have 27 different grades of wheat here at the present time. It is all sold or hedged. It is our job here to receive the grain from the country elevator, clean it, dry it, and blend or process the various grades required by the miller or processor. The profits from this business now go to the Farmers National, from there to the Illinois Grain corporation and down to the member elevators in proportion to the amount of grain they sell to the Farmers National."

A question was asked Mr. Wilke, "We understand from the opposition to this program that the Farmers National hasn't employed good grain men, that it has employed inexperienced personnel, incapable of handling such tremendous volume, and, in the picture only for what they can exploit from the farmer. What has been your experience as manager of this big terminal?"

Everything Business-like

Mr. Wilke answered: "I have been employed here since I was 13 years old and have been manager for many years. I can truthfully say that I have learned more about the grain business since the Farmers National took it over two years ago than I had learned in all my past experience. Anybody that tells you that their co-op's men don't know their stuff is crazy. They handle everything on a business-like basis and their cards are on the table all the time."

It was reported at the Farmers National office at Peoria that with some 20 commission firms on the Peoria market, the Farmers National handles from 30 to 50 percent of the daily receipts.

Same Fight Repeated

Mr. McClintock, manager of the office, said in part to the visitors: "You men, as directors of farmers elevators out in the country, have seen today that you have not gone far with the marketing of your grain. You older men have been through the fight. You know of the storms of disapproval from the grain trade that came. You know of their first refusal to handle your grain. This avalanche of propaganda against the Farmers National and co-operative marketing is no different today. But you have seen that it was all worthwhile. You have been paid with what it was worth to firmly establish the Farmers elevator.

Profits To Grower

"Now the Farmers National is the next layer on the cake. It is the extension of the farmers marketing machinery into the terminal. All the profits from commissions, terminal storage, processing, blending, etc., belong to the farmer members. The

The Illinois Farm Supply Company's trade mark is your guarantee of quality.

Grain Marketing

(Continued from page 13)

program is sound, it is adequately financed. Your only worry is the efficiency and integrity of its management.

"That you have with your local elevator. The whole program is set up in such a way that this problem is always in the hands of the producer who elects directors for his elevator. The elevator directors control the regional, and the various regionals elect directors for the National." Mr. McClintock explained that the grain stabilization was no longer a factor in the market, that the last held by the Red Cross would be consumed by May, 1933.

Alibi Worn Out

One of the party remarked how funny it was that the trade had contended that grain would be 25 cents higher if it wasn't for the wheat held by the farm board, and that all grains had dropped continuously in price since it was known that the board's wheat was gone. Another said, "We don't hear so much about 'government in business' since everybody knows what the government has loaned to banks, insurance companies, railroads, etc."

O. D. Brissenden, field representative of the Illinois Grain corporation, accompanied the party on the tour. He explained how every legitimate objection to membership had been met. He said that no capital is required by the member elevator, that dividends were based on patronage, that no elevator was required to market its grain through its own organization, unless it could give a net price equal to or more than the other fellow and that all questions of management are left to the local board.

Now More Volume

Mr. Brissenden said: "On this trip today we have seen the system in successful operation. We are assured by the audits of the national association that it is making substantial profits. We know from its set-up that these profits will be returned to the producers But its ultimate success will depend on volume. There is a greater hope for this movement than to return a part of the handling charge to the producer. Its great purpose is to control sufficient volume to affect the price paid for grain.

"Should a lack of patronage cause the failure of this ultimate purpose it would be another generation before there could be built another organization with the promise that Farmers National offers. The support of this movement, or the lack of it, will set a policy for the next generation to follow. Shall they have faith and carry on the co-operative movement because their forefathers paid the sacrifice necessary and through it worth enough to go on with the next big job?"

The Illinois Grain Corporation handled 1,131 cars of grain in September making a total of 6,503 cars shipped during the first nine months of the year 1932. The state regional now has 100 member elevators and grain co-operatives. Four new elevators became members during September.

During the first nine months of the year the Illinois Grain Corporation handled well over 11,000,000 bushels of grain which is in excess of the volume handled during the entire calendar year of 1931.

DAIRY Marketing

The first payment on butterfat to members of the Quality Milk Association was a net price of 22 cents per pound after all operating expenses were paid. This price is higher than the Chicago market, and returned the producers more for 100 pounds of milk than they received previously for the surplus sold to distributors at Rock Island, Davenport, Moline, and E. Moline.

Market Cabbage For Whiteside Co. Growers

The Illinois Fruit Growers Exchange during the past season found a market for approximately 85 carloads of cabbage for Whiteside county growers around Morrison, Fenton, and Oliver Siding. Most of the cabbage was shipped to southern markets such as New Orleans, Mobile, Nashville, and Memphis. Although prices obtained were very low the growers were fortunate to get a market at all since home grown supplies this year were unusually heavy at most markets.

H. W. Day, director of fruit and vegetable marketing, states that a short apple crop has resulted in higher prices than obtained last year. Apples are retailing at from 75 cents to $1.50 a bushel.

Sell Apples To Truck Men From Central Point

The Illinois Fruit Growers Exchange is assembling apples on route 10 a mile east of Jacksonville where sales are made to truck buyers from all sections. The same practice was followed last year and results from the experiment justified its continuance this year.

The Illinois apple crop is much below normal this fall and actual yields are falling under estimates made early in the season. It will be approximately a 25 per cent crop when harvested.

Milk Prices

(For September, based on 3.5% milk unless otherwise specified.)

St. Louis—Sanitary Milk Producers announces Class I basic $1.35 f.o.b. country; Class II 71c f.o.b. country; Class III 58c f.o.b. country. 5c has been deducted for check-off. Averaged weighted price to producers all milk 93c. Retail 10c.

Indianapolis — Central Indiana Dairy Association announces Class I $1.60 f.o.b. city. Class II $1.00 f.o.b. city.

St. Paul — Twin City Milk Producers Association announces Class I basic $1.24 delivered Retail 8c.

Cincinnati—The Cooperative Pure Milk Association announces weighted price per 100 pounds $1.21.

Detroit—Michigan Milk Producers Association announces Class I basic $1.60 delivered; Classes II and III 85c. Averaged weighted price to producers all milk $1.51 f.o.b. city. Retail 9c.

Cedar Rapids—Cedar Rapids Cooperative Dairy Company announces Class I basic $2.00 delivered. Averaged weighted price to producers $1.10. Retail 10c.

New York—Dairymen's League Cooperative Association Inc. announces Class I basic $1.79 delivered; Class II $1.26 and Class III $1.15. Retail 12c.

Bloomington — McLean County Milk Producers announces Class I basic $1.70 f.o.b. city. Class II delivered $1.10. Class III 84c. Averaged weighted price to producers all milk $1.13. Retail 10c.

Champaign — Champaign County Milk Producers announces Class I basic $1.83½ f.o.b. city; Class II delivered $1.15½; Class III 78½c. Averaged weighted price to producers all milk $1.34½. Retail 11c.

Chicago — Pure Milk Association announces Class I basic $1.85 f.o.b. city. Class II delivered 73c. Retail 11c.

Galesburg — Galesburg Pure Milk Association announces Class I basic 4% milk $1.85 f.o.b. city. Retail 9-10c.

Peoria — Illinois Milk Producers' Association announces Class I basic $1.65 f.o.b. city. Class II delivered 97c. Class III 69c. Averaged weighted price to producers all milk $1.19. Retail 9-10c.

Springfield—Producers Dairy Company announces Class I basic $1.40 f.o.b. country. Retail 9 1/11c.

Many a turkey grower can develop a profitable local market and a reputation for his flock by advertising in his local newspaper.

A hen that does not lay is not even a fair risk any time; and now-a-days she is a greater liability than usual.

PRODUCE MARKETING

A NEW produce marketing association was recently organized in Pope-Hardin counties for handling poultry, eggs, and cream. White county recently organized another cream marketing unit at Carmi. Interest is being manifested in county produce associations at Mt. Vernon, and Marion.

Frank Gougler announces that southern Illinois egg producers are getting along nicely in shipping eggs co-operatively to the eastern markets in carload lots. Plans are being made to service these shipments through the produce marketing units with egg cases, fillers, etc.

Further co-operation between the organized milk producers and cream shippers was discussed at a meeting of 35 to 40 representative producers from all sections of Illinois in the I. A. A. offices, Chicago, October 13.

Consideration is being given to establishing processing plants for taking care of surplus milk which milk distributors do not wish to handle. It is contemplated that if such a plan is followed butter manufacturing plants will be established in a number of the larger downstate cities where surplus milk will be separated and the cream churned into butter. Cream from co-operative produce associations also will find a market through these plants.

The fluid milk producers during the past two years in many markets have received such low prices for surplus, in some cases below butterfat value, that ways and means of establishing outlets at more favorable prices have been considered for a number of years.

Steps already have been taken toward establishing processing plants at Peoria, Bloomington, and Rock Island.

The newly organized farmers' creamery company of Bloomington, owned and controlled by the McLean County Milk Producers, recently leased a building close to the present McLean County Farm Bureau offices, according to a recent announcement. The company expects to begin making butter on or before January 1.

Since the cream station was started here in 1927 Forrest Fairchild, manager of the Milk Producers Association, is quoted by the Pantagraph as saying: "The spread in price of cream has been changed from nine to two cents, to the benefit of the producer. And under the new plan possibly two to four cents more can go to the farmer. On the 1,500,000 pounds of butterfat produced in McLean county this would amount to about $45,000 increase in returns to the producers annually."

Life Insurance Co.'s. Take 71% Farm Loans

Farm mortgage loans were smaller in both total volume and average size in 1931 as compared with the preceding year, mortgage bankers in 17 western and southern states reported recently. The ratios of loans to value of farms were higher than in preceding years.

Of a total of 3,918 loans representing more than $19,500,000 in loan contracts made during the year in these states, 67 per cent consisted of renewals, the balance, new loans.

The average ratio of loans to value of farms was 39.4 per cent on new loans last year and 61.3 per cent on loans renewed. Loans requiring renewal for the most part included farms with heaviest indebtedness.

Most of the loans were made for a term of five years. Sixty-five per cent of all loans made last year require some payment on principal annually.

Life insurance companies took 71 per cent of the total loans or less than in previous years. There was an increase in the proportion of farm mortgages bought by private investors and other local agencies.

Get a Better Deal On Mixed Shipments

Better rates on mixed shipments of livestock will become effective November 1 as a result of a ruling adopted by carriers following negotiations initiated by the I. A. A. Transportation Department.

The modified mixed livestock rule applies on shipments between points in Illinois, according to G. W. Baxter.

This rule provides that when cattle, calves, hogs, sheep, lambs, goats, or kids are shipped in mixed carloads the charge shall be based on the carload rate and actual weight of each species in the car. However, the total charge on the carload shall not be less than the carload rate and minimum weight for that class of stock contained in the car which on a straight carload basis carries the highest charge.

The modified rates do not penalize shippers who have sheep in the car, as in the past. Heretofore shippers have paid the actual weight of all stock in the car at the highest rate class. In other words if the car contained 17,000 pounds of cattle, hogs, and sheep the entire 17,000 pounds of livestock paid the sheep rate which is higher than that on cattle and hogs. This new rule will permit the shipper to apply the weight and rate for each species in the car subject to a minimum for the stock in the car which on a straight carload basis will produce the highest charge.

Livestock Marketing

A total of 164 decks of livestock were handled by the Illinois Livestock Marketing Association and its member co-operatives during September. Of these, 50 decks were sold through the state sales office at Decatur. This is the largest volume handled in any month since its organization.

Shipments from Illinois counties to producer agencies indicate a total of 11,609 cars for the six months' period ending June 30, 1932. This compares with a total of 11,946 cars for the corresponding six months of 1931.

The ninth and final calf club sale held under the auspices of the International Live Stock Exposition, Chicago, October 11 established a new top for the season when the Hygrade Food Products Corporation bid $12.25 per cwt. for an outstanding 900 pound Hereford. The calf was fed by 13 year old Jean Turnbull of Marshall county, Illinois.

A total of 162 calves brought an average price of $8.45. They weighed 929 pounds average. The 1,927 calves auctioned off this season sold for an average price of $8.89, average weight 905 pounds.

The National Livestock Credit Corporation announces that 551 applications for loans had been passed upon favorably by October 6, the loans granted totaling $832,000. There are ample funds available and feeders in need of financial assistance in their cattle and sheep feeding operations should write for application blanks to the nearest producer agency. Loans are made in some cases up to 100 per cent and at six per cent interest.

The Indianapolis Producers sold 913 carloads of livestock during September, an increase of 138 cars compared with the same month last year. Illinois supplied 126 carloads of this total.

Illinois counties showing an increase in livestock shipments to Indianapolis Producers during the third quarter this year compared with last are Clark, Crawford, Jasper, Cumberland, Effingham, Richland, Sangamon, White, and Williamson.

Trucking of livestock from Illinois increased from nine carloads in September, 1930 to 107 carloads in September, 1932.

The Chicago Producers showed a substantial increase in receipts of all livestock during September compared with the same month a year ago. Producers' cattle receipts increased 8.7 per cent, whereas market receipts

(Continued to page 17)

Livestock Marketing

(Continued from page 16)

of salable cattle fell off 11.5 per cent. The Chicago co-op handled 12.5 per cent of the salable receipts of hogs compared with 10.9 per cent in September a year ago.

The market for fed cattle is expected to hold fairly steady during the winter, according to H. M. Conway of the National Livestock Marketing Association. This situation, he believes, makes short feeding of the lower and intermediate grades reasonably favorable for the period February to April. Supplies of hogs are expected to be lower in the late winter.

Feeder lamb prices have weakened during the past eight weeks making a favorable situation for the feeder. The greatest scarcity of fed lambs and highest prices are expected during the winter.

Eastern Livestock Men Organize At Baltimore

The Eastern Livestock Cooperative Marketing Association, with headquarters at Baltimore, Maryland, was recently admitted to membership in the National Livestock Marketing Association. L. T. Skeffington, formerly with the Illinois Agricultural Association, has been employed as manager.

The Eastern Association was organized in September, 1931, by stockmen and farmers in the States of Virginia, West Virginia, Tennessee, Maryland, North Carolina Pennsylvania, and New York, and serves livestock producers in this territory. Its first selling agency started operations at the Union Stock Yards, Baltimore, Maryland on August 1, 1932. During August, the Eastern handled 3.652 head of livestock valued at $40,645, while during September the Association handled 5,542 head valued at $85,200.

Indiana Votes On Income Tax Amendment

The Indiana Farm Bureau Federation will sponsor income tax legislation in the coming session of the General Assembly at Indianapolis.

The Farm Bureau has recommended and urged the passage of an income tax in Indiana during past years as a replacement tax that farmers and property owners may be relieved of a part of their heavy tax burden.

An income tax amendment to the state constitution will be submitted in the general election in Indiana on November 8. If the amendment passes it will settle for all time the constitutionality of a law to tax incomes says Lewis Taylor, director of the tax and legislative department.

Life Insurance

By L. A. Williams

WHATEVER the original motive back of Country Life Insurance Company may have been, and we who had to do with it believe it was service, the fact remains that it has performed an invaluable service to the farmers of Illinois.

$274,000 has been paid out in death claims to farmers' beneficiaries since we started three and a half years ago.

More than $125,000 in dividends have been paid to living policyholders.

More than one-half million dollars of premium outlay has been saved to farmers over the past three and a half years, because of the lower first cost of Country Life under the average participating life insurance premium.

Another savings which has accrued to the benefit of policyholders through careful management in the handling of funds is the holding and preserving securely, by careful investment, of $1,600,000 of Company funds, not one security of which is in default, and the accumulating of $300,000 of surplus, through earnings and savings, for policyholders.

Still another service for farmers has been the placing of more than $50,000,000 of life insurance with farmers, a great number of whom would never have carried any life insurance had it not been for the confidence they had in their own Company, and the service they received from their own leadership and their own people, Needless to say, many thousands of dollars have been paid out to beneficiaries who would have had no life insurance had it not been for the origin of Country Life.

We have paid out to Farm Bureau members who are agents of Country Life $570,000 in commissions, of which the Farm Bureaus have retained as their over-writing share nearly $60,000.

Country Life Insurance Company has made a gain every month since it has been in business. Its income today is more than a million dollars yearly. It is true that we have lapsed several million of business, but we have always gained more in new business than we have lapsed.

This Company has been built during the three and a half years of depression. Its record of accomplishments is unequaled anywhere in the annals of life insurance history. The fact that farmers have built this Company and operated it for their own benefit during the hardest financial years known to the country is proof of their ability to operate their own business in practically any line of marketing or group purchase, or through group action to build a defense against unjust legislation, and for fair taxation.

In fact, Country Life Insurance Company stands as a monument to the ability of farmers to act in groups for their own welfare.

Achievement Day Jubilee will be December 10, culminating in a radio broadcast that evening from 8:30 until 9:00, over WLS, at which time the accomplishments of the various counties, will be broadcast, also the names of the Country Life Queens. About seventy counties will hold beauty contests. Other counties will hold entertainments of other kinds.

$38,000,000 Loaned Livestock Growers

The National Feeder and Finance Corporation, co-operative credit agency affiliated with the National Live Stock Marketing Association with headquarters at Chicago, has loaned to livestock growers during the past two years more than $38,000,000.

The six regional credit corporations loaning money to livestock growers are located at Chicago, Denver, San Francisco, Salt Lake City, Oklahoma City, and Fort Worth. These regional credit corporations now have a total loan capacity of approximately $40,000,000 On September 1 only about $10,000,000 of loans were outstanding. There is still $30,000,000 available for loans.

Illinois livestock growers can get full information about loans by writing the National Feeder and Finance Corporation, Builders Building, 228 No. LaSalle St., Chicago.

The average taxes in dollars per acre in 1913 and 1930, and the 1930 indexes based upon 1913 as 100 per cent, are reported as follows: Ohio, $0.53 in 1913, $1.36 in 1930, index 258 per cent; Indiana $0.59 in 1913, $1.41 in 1930, index 237 per cent; Illinois $0.49 in 1913, $1.16 in 1930, index 235 per cent; Michigan $0.54 in 1913, $1.34 in 1930, index 247 per cent; Wisconsin $0.47 in 1913, $1.07 in 1930, index 226 per cent; Minnesota $0.29 in 1913, $0.83 in 1930, index 291 per cent; Iowa $0.56 in 1913, $1.24 in 1930, index 222 per cent; Missouri $0.14 in 1913, $0.45 in 1930, index 311 per cent.

Editor,
I. A. A. RECORD

The September issue of the RECORD is one of the best of the year. I read it from cover to cover.—Geo. F. Tullock, Winnebago County, Ill.

Farm Supply Meeting, Bloomington

(Continued from page 12)

membership is free from default on any day during the 60 days next preceding the last day of the calendar month prior to such demand for service or declaration of distribution of savings or earnings.

Secretary George E. Metzger of the I. A. A. congratulated the company on its splendid showing and discussed briefly the $20,000,000 bond issue coming up for vote on November 8.

President Fred Herndon of the Illinois Farm Supply Co. gave an interesting address in which he recounted some of the problems of the local companies. He pleaded for uniform merchandizing methods and trade practices by the 52 companies over the state. He said that competition among the companies is unthinkable, yet it does exist.

Congratulating the managers and truck salesmen for their excellent work in supporting the Farm Bureau membership drive preceding the 4th of July celebration he said: "The records show you secured 700 new members. You hold an important position in our Farm Bureau program. Your truck salesmen contact Farm Bureau members and non-Farm Bureau members every day. It is your duty to acquire and disseminate proper information concerning the Farm Bureau and your local company."

Excellent Statement

The condensed financial statement distributed to delegates shows that total dividends to member companies had increased from $1,372.08 in 1927 to $86,511.76 in 1932. Of this latter amount patronage dividends to common stockholders amounted to $80,-090.43. Assets of the company at the close of the fiscal year were $248,-690.30 and liabilities including the $86,511.76 dividends payable were only $92,412.78.

Mr. Fred E. Ringham, manager of the Illinois Agricultural Auditing Association read the financial report and discussed briefly accounting problems of the local companies.

Only one change was made in the board of directors. H. A. Keele of Macoupin county replaced Sam Sorrells of Montgomery county. Other directors are F. E. Herndon, Geo. F. Tullock, E. E. Stevenson, Grant Broster, J. M. Eyman, Frank J. Flynn, H. R. Neal, T. J. Penman.

The number of hogs in Germany, Denmark, and Holland was 10 per cent less for June this year than last year. Reduced supplies resulted in higher hog prices in July than in June in both the United States and Europe.

Chairman Stone On Farming The Farmer

In one of his numerous blasts against the Farm Board and the U. S. Department of Agriculture, Arthur W. Cutten, Chicago grain speculator, is reported to have called on voters everywhere to defeat members of Congress who supported the Agricultural Marketing Act. In a recent public address Chairman Stone of the Federal Farm Board without mentioning any names referred to Cutten's articles published in Chicago newspapers, says the Farmers National Grain Corp.

"I think one of the most enlightening newspaper articles I have seen in many days appeared in Chicago several weeks ago," said Chairman Stone. "It was written by one of your largest and most influential grain traders in which he made the statement that he had never seen a better job of the farmer being farmed than was done by the Farm Board.

"Yet that man came here from Canada some 20 odd years ago with practically no money. I understand he has given to his brothers and his sisters an endowment fund of $1,000,-000 each and God knows how much he has left. I would like to have him tell the people of this country whether he made it growing or selling wheat. If there ever was a glaring example of how the farmer was farmed I think he gives a good demonstration."

Textile Trade Improves

Rochester, N. H., Aug. 20: Five hundred employees of the Gonic Manufacturing Company here were notified today of a 10 per cent increase effective immediately. Improved conditions in the textile trade made this increase possible.

A recent cartoon pictures an automobile wreck with the car and the driver all scrambled together at the side of the road. The engine reared an angry head from the mass of wreckage and said to what was left of the driver: "Why blame me! *You're* supposed to have brains." And there's the rub. The driver has the brains, but all too often he fails to use them.

Alfalfa needs at least six inches of growth before winter. Take the first cutting next season earlier than usual, then the last cutting will be early enough for a good growth before winter.

Farmers National Seed Market Service Explained

Three sales plans for seed marketing are now available through Farmers National Grain Corp. service, according to P. V. Kelly, manager of the Seed Division.

"At the option of the producers, seed may be offered to the Farmers National for immediate cash sale. It may be delivered for storage and later sold upon order of the owner, or it may be handled through pools by the usual pooling methods.

"Seed accepted for storage will be graded, cleaned, and stored. Against warehouse receipts for such stored seed, the co-operatives or the regional organizations may borrow for the purpose of making advance payments to the grower.

"Seed pooled by growers in accordance with usual pooling practice will be purchased by the corporation or sold for the account of the pool whenever the pool orders sale to be made. The entire marketing operations will be in the hands of Farmers National Grain Corporation, but sales policies will be determined by the separate pools."

Any producer group may avail itself of the cleaning, grading, warehousing and marketing facilities of the Farmers National if organized as a co-operative under the Capper-Volstead law and affiliated with the regional such as Illinois Grain Corp.

Extensive and permanent sales outlets will be provided by the contacts maintained with co-operative sales agencies, the Farmers National serving as a clearing house between the associations of seed producers and associations selling seed to other farmers. All the facilities of the Corporation will be available as seed distribution agencies.

Regional agricultural credit corporations with paid up capital stock of $3,-000,000 set up and financed by the Reconstruction Finance Corporation are authorized in the new relief bill recently signed by President Hoover. They may be set up in any Federal Land Bank district where needed. Management would rest with the R. F. C. and such credit corporations will be able to make loans for agricultural production, breeding stock, etc. to farmers.

Illinois farmers plan to reduce the fall sown wheat acreage about five per cent from that of last year. The marked slump in the Illinois wheat acreage during the past two years is chiefly due to the discouraging price situation, with the menace of fly and chinch bug damage a contributing factor.

Proper care and feed prevents a well-bred pullet from molting in the fall. Plenty of feed will not make the pullets too fat.

Annual Meeting Jan. 25-26-27

Peoria Connected With Early History of I. A. A., Many Will Recall Meetings of 1919 and 1920

WHEN the organized farmers of Illinois gather at Peoria January 25-26-27 for the eighteenth annual meeting of the Illinois Agricultural Association and meetings of many associated companies, it will remind some of the pioneers in the movement of the historic meeting in this same city in January 1919.

It was in Peoria 14 years ago that the founders of the I. A. A. decided to make it a live membership organization with a broad program of service rather than a loose federation of County Farm Bureaus. At that memorable meeting 120 men made personal pledges of $100 each to underwrite the employment of a secretary, the establishment of an office, and the inauguration of a joint membership campaign throughout the state.

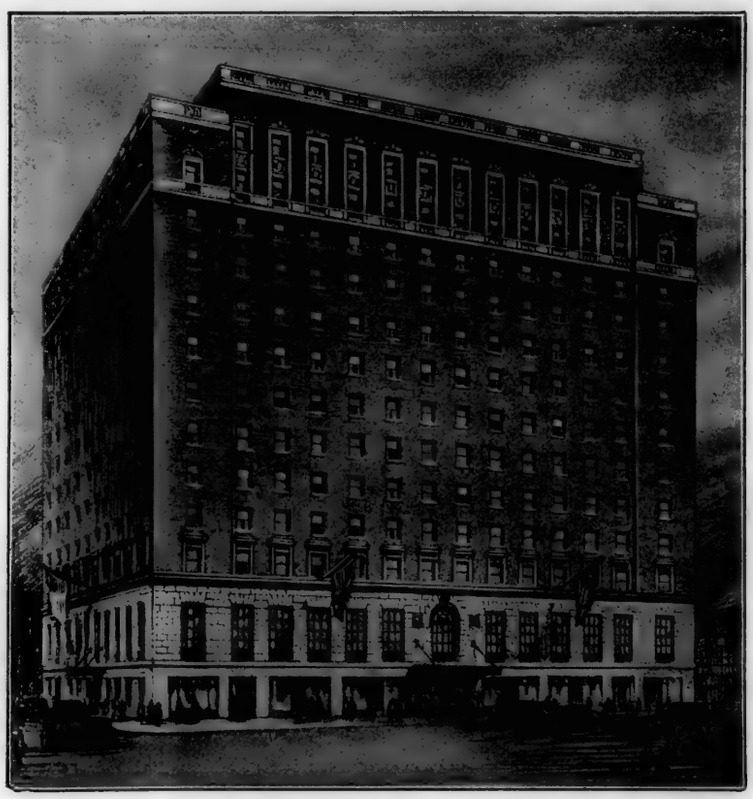
The first I. A. A. office was set up in a couple of small rooms at 1103 Edison Building, across from the Federal Building in Chicago.

At the end of the year, the organization committee reported that 40,551 members had been secured through membership campaigns in 33 counties. The following year, 1920, this figure had been more than doubled and since then the I. A. A. has been one of the largest and strongest state farm organizations in America.

The H. C. of L.

When the members met in Peoria a year later in January, 1920, to review the year's accomplishments, one of the interesting subjects discussed was the boycott of eggs, butter, and other farm products by city housewives, and the nation-wide publicity given the High Cost of Living.

"Because there is a lot of comment about the farmer being to blame for the high cost of living," the Publicity Department reported, "the I. A. A. fed two families in Chicago for a week, kept strict account of what that family ate, and what it cost them. The products were traced back to see how much the farmer got. Out of the four main necessities of life which come direct from Illinois farmers—meat, bread, milk, and potatoes—the farmer gets 42 per cent, and others get 58 per cent," said the report. "In the case of bread, the farmer gets 3.1 cents for the wheat in a 10 cent one-pound loaf which means that if he gave his wheat for nothing bread would still cost about seven cents a loaf. Carrying it out further it would mean a reduction of 75 cents per bushel for wheat to make a one-cent reduction in a loaf of bread."



How different is the picture today? The low cost of living and the lowest price for farm products in the memory of living men will characterize the economic situation as delegates and members gather from the 102 counties of Illinois in January 1933.

In welcoming the delegates to Peoria, his home county, at the annual meeting on January 13, 1920, Zealy M. Holmes, then Association vice-president, struck one of the keynotes of the convention when he said:

"What we want and expect is that the price of farm products can be stabilized so after producing the crops we can in return receive the cost of production plus a reasonable profit.

"In the contracts our government made with other industries during the war, they allowed cost plus a certain

(Cont'd. p. 4, col. 3)

President Smith Serves On National Committee

U. S. Chamber of Commerce Calls Meeting To Devise Ways and Means of Rehabilitating Farm Buying Power

A committee composed of representatives of business and agricultural interests met in the office of General Robert E. Wood, president of Sears, Roebuck & Co., Chicago, November 21 to consider ways and means of re-establishing an equitable price ratio between farm and industrial prices.

The meeting was called by H. I. Harriman, president of the United States Chamber of Commerce. Earl C. Smith, president of the Illinois Agricultural Association, is a member of the committee representing organized farmers.

Others attending the meeting were: Burton F. Peek, vice-president, Deere & Company, Moline, Ill.; F. A. Theis, vice-president of Simonds-Shields-Lounsdale Grain Co., Kansas City, Mo.; M. L. Wilson, agricultural economist, Montana State College; R. R. Rogers, Prudential Life Insurance Co., Newark, N. J.; H. A. Wallace, editor of Wallace's Farmer, Des Moines; Lyman E. Wakefield, president, First National Bank of Minneapolis; Harper Sibley, managing director, Sibley Farms, Rochester, N. Y.; A. C. Hardison, Hardison Ranch Company, Santa Paula, Cal.; N. P. Hull, president, Grange Life Insurance Company, Lansing, Mich.; Sydney Anderson, vice-president General Mills, Inc., Minneapolis; D. L. James, secretary to the new committee; E. L. Bacher, secretary, foreign commerce committee, United States Chamber of Commerce; Thomas Wickman, chairman legislative committee, Chicago Association of Commerce.

Resolution Adopted

The resolution adopted by the committee follows:

"With farm product prices at present levels, the burden of agricultural taxes, interest charges and freight rates is intolerable. Farm products today will buy only one-half their normal amount of consumer goods.

"Inasmuch as it will be a slow process to negotiate reciprocal tariff agreements and make governmental debt adjustments in such a way as immediately to increase exports to a material extent we advocate the immediate development of a plan which will establish a domestic price level for basic farm products which is far enough above the world level to re-establish an equitable price ratio between farm and industrial prices.

"We believe, therefore, that it is in the general public interest for all groups to cooperate with agriculture in formulating a plan which will restore the purchasing power of farmers."

A sub-committee was appointed to present a plan to re-establish farmers' buying power for the consideration of the committee as a whole at a further meeting to be held at an early date.

Business Leaders Aroused

The significance of this committee's activity is that business leaders are showing vital interest in the farm problem and will likely give support to an effective plan to raise farm prices for submission in the next Congress. It will be recalled that the Chamber of Commerce endorsed the Agricultural Marketing Act passed in 1929 which since has proven ineffective in maintaining farm prices on a par with the prices of industrial commodities.

If business and agriculture can get together on an effective plan there is little doubt that it can be put through the coming session of Congress. The fact that business in general is desperate and is ready to do almost anything that promises to put factory wheels in motion is one bright spot in the future outlook.

SOUTHPAW HUSKER FROM KNOX COUNTY WINS NATIONAL CHAMPIONSHIP

Carl Seiler (right) member of the Knox County Farm Bureau, not only won the state title in the contest held near Monticello in Piatt county, but husking against 16 picked men, all winners, from eight other states, won the national contest before 20,000 or more people who gathered on the Robert Peterson farm east of Galva in Henry county Nov. 10. Seiler gathered a net load of 36.91 bu. in 80 minutes.

Orville Welch, Piatt county Farm Bureau member (left) was the national champion last year and placed second in the state contest, sixth in the national contest, this year. The Henry County Farm Bureau, American Legion, and other local groups co-operated with Prairie Farmer in staging the big event.

Annual Meeting Jan. 25-26-27

(Continued from page 3)

percent of profit. The farmer stood by the government at all times. We have worked from early morn until late at night to help feed the world and so far have succeeded in doing it. Was any profit guaranteed the farmer? Would we not as farmers be better off if the government had not fixed the price of wheat? Most of the wheat at present is in the hands of speculators, and they are asking a 50 per cent raise. Do you think the price of pork should fluctuate from $1 to $2 in 24 hours? I see no real protection. Wool has gone down to the producer. Can you buy clothing any cheaper? You can answer if you will. What we need first is education as to our grave needs so that we may build the foundation of an organization that can perpetuate this great industry in which our lives and money are invested. Ever since the Pilgrim Fathers landed in America, organization of this great cause of agriculture has been needed."

Here's Real Vision

That the founders of the I. A. A. had prophetic vision and foresight in building the organization, is revealed in the report of the first Finance Committee made by Joe Fulkerson, chairman.

(Continued on page 5 col. 3)

British Farmers Get Price-Fixing Legislation

Parliament Passes Marketing Act Much More Far-Reaching Than Ours

THE British Agricultural Marketing Act passed in July last year permits the producers of any farm commodity by means of a two-thirds majority vote to place the entire marketing of all the commodity produced under the control of their own organization.

If the producers of a given commodity wish to set up an organization they must first submit their plan to the Minister of Agriculture. The plan must provide for a board to control marketing, must define its powers and provide for the election of its members by producers. If the Minister approves the plan and is satisfied that the persons submitting it are representative of the producers of the commodity, he has to submit it to Parliament where, upon its approval, it becomes law.

The Act provides wide powers. A commodity board under the terms of the Act could own and operate a meat packing plant. But before the plan can be made effective it must have a two-thirds majority vote of producers voting on it. At least half of the producers of the commodity must have taken part in the voting.

Three Types Boards

Three types of boards are contemplated under the Act, the trading board which would handle the commodity in question, a regulating board which merely issues instructions as to how the commodity is to be sold, and a third type which would have both regulatory and trading functions. A board cannot exercise any direct control over production, but it may control sales in such a manner as to impose a penalty on producers for production of excessive amounts.

The law provides for co-operative buying as well as cooperative selling. One difference between this Act and our own marketing act in the United States is that the British Act provides for compulsory co-operation of all producers when two-thirds of them approve the plan.

If there is substantial opposition to the plan objectors can obtain redress in the courts. This must be done before the Act passes Parliament. Once a plan is approved by Parliament no court action can repeal it. In England Parliament itself is the court of last appeal.

While the Act has been in force about a year only one plan has come into operation, that for controlling the marketing of hops.

The principal objections raised against the Act by certain farmers is the compulsory feature, also that without control of imports or a tariff, the Act would be ineffective in raising prices since it provides no method of dealing with foreign competition.

The plan for marketing hops applies to a commodity of which the price in England is largely dependent on the domestic supply. A tariff has proven ineffective and attempts on the part of producers to organize for limiting supplies have failed owing to the refusal of a minority to co-operate. Producers are to be paid for their hops in accordance with the principle of the seasonal pool. The hops plan was approved by Parliament early in July this year, and the producers gave it the required majority vote early in August.

The British Marketing Act received more widespread support among farmers in Scotland than in England chiefly because Scottish farmers have made more headway in co-operative marketing than have English farmers. In Scotland plans have been developed for marketing milk and raspberries.

The boards appointed under these plans may exercise both regulatory and trading functions. They may even process the commodity. Where the board does not itself market the product, it will fix the price and payment will be made by the producer to the board and not to the producer. The board after deducting its own expenses will distribute the proceeds among the producers, paying a uniform price for each grade of product.

A bounty plan subsidizing wheat farmers in the British Isles was enacted during the past summer by which wheat growers are guaranteed a price of approximately $1.30 a bushel.

This recent action by Great Britain to help its farmers is in line with similar action taken by such countries as France, Italy, Germany, etc.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL ASSOCIATION

NOTICE is hereby given that the annual meeting of the members of ILLINOIS AGRICULTURAL ASSOCIATION will be convened at the Pere Marquette Hotel, in Peoria, Illinois, on the 26th day of January, 1933, at 9:00 o'clock a. m., for the following purposes:

For the consideration and vote upon approval and ratification of the reports of the president, secretary and treasurer of the Association, and the acts of the board of directors and officers in furtherance of the matters therein set forth, since the last annual meeting of the members of the Association.

To approve, ratify and confirm the several purchases heretofore made by this Association of stocks and evidences of indebtedness of corporations whose activities will directly or indirectly promote agriculture or the interests of those engaged therein.

To secure consent and authorization to acquire on behalf of this Association, by purchase, certain stocks and evidences of indebtedness of corporations whose activities will directly or indirectly promote agriculture or the interests of those engaged therein.

To elect eight members to the board of directors for two-year terms.

To elect a president and vice-president.

To consider any proposed amendments of the articles of association or of the by-laws of Illinois Agricultural Association as may be properly submitted.

For the transaction of such other business as may properly come before the meeting.

GEO. E. METZGER,
Secretary.

Chicago, Ill., Nov. 26, 1932.

I. A. A. Annual Meeting Set For Jan. 25-26-27

(Continued from page 4, col. 3)

"Our Organization Department has done its work and done it well," said the Committee report, "but there will be times when our annual payments will come in slowly; times when money among farmers will be scarcer than it is today, then will come the test of the real strength of this Association. Is it wise to risk letting a great work fail just at the most important moment for lack of funds to carry it through? Is it just and right to ask the representatives from your district on the executive committee who are already donating their time and labor to loan their personal credit to tide this Association over a critical place?

"Many organizations own real estate and office buildings valued up in the millions. They have a permanently established credit and can borrow money at any time. I hope to see the day come in the near future when the I. A. A. may have $100,000 invested in United States government bonds which could be put up as collateral at a moment's notice.

(Continued on page 6 col. 3)

"New Plan of Cream Marketing in Illinois" will be the subject of a radio talk by Frank Gougler, director of produce marketing on station KMOX, St. Louis Monday noon, Dec. 5, 12:45 P. M.

The following Monday, Dec. 12, W. J. Niergarth, manager of the Farmers National Grain Corporation at St. Louis, will discuss co-operative grain marketing.

"What Farmers can Accomplish Through Organization" was the subject of an address prepared by Secretary Geo. E. Metzger and delivered over station KMOX, Monday, November 21, by A. D. Lynch, manager Sanitary Milk Producers, St. Louis.

The address emphasized the fact that farmers had been forced to organize in marketing their products and in buying needed supplies cooperatively, told what had been done in Illinois. "The chain principle of doing business," he said, "has forced farmers, likewise, to adopt chain business methods."

More than a dozen listeners to Station KMOX still use crystal sets. Most of them are within 25 miles of Saint Louis, but one is in use in Oklahoma.

Visit Fruit And Vegetable Market At Benton Harbor

H. W. Day, director of fruit and vegetable marketing, visited and inspected the growers truck market at Benton Harbor, Michigan recently. He was accompanied by representatives of the State Department of Agriculture.

The purpose of the trip was to secure information about this type of market and determine the possibilities of establishing something similar for fruit and vegetable producers in southern Illinois.

The Benton Harbor market is being operated by the city for growers within a radius of approximately 50 miles. The question of establishing such a market was discussed at a recent conference of farm advisers in Mt. Vernon.

Pete Clausen, one of the early organizers of the I. A. A. and Farm Bureau who now resides in Aurora, writes that he spent three months last summer in Norway, Sweden, Germany, and Denmark. "I hadn't been 'home' for 42 years," he said. "What a change!"

Pete is contributing regularly to the Aurora Beacon News, still fighting for agriculture.

An automobile insurance policy in the I. A. A. company remains in force until it is cancelled by the company or by the policyholder, states A. E. Richardson. The responsibility is placed upon the County Farm Bureau for notifying the company if a policyholder is not a Farm Bureau member in good standing. The company will then cancel the policy at the next assessment date after receiving notice of cancellation.

Income Tax Amendment Fails In Indiana Nov. 8

The referendum on the income tax amendment to the state constitution, November 8 failed, reports the Indiana Farm Bureau. It was favored by a majority of the citizens who considered the proposal but a majority of all the citizens voting in the state did not endorse it, which is a requirement of the state constitution. Seventy-one of the 92 counties in the state gave constitutional majorities to the proposal, all usually considered as strictly rural sections.

The state farm organization was very active on the referendun having advocated income tax measures in various sessions of the legislature during recent years as a means of securing government revenue to replace or reduce levies on farm and other property.

With only Steuben county not reported and the total vote of Floyd county not in, the count shows that 1,574,520 votes were cast in the election on November 8. To carry, it was necessary that the amendment receive a total favorable vote of 787,261. The "yes" vote on the amendment totaled 695,791 failing by 91,470. The "no" vote on the proposal totaled 205,276.

Industrial centers of large cities were responsible for its defeat. Not that it received a larger "no" vote than a "yes" vote in such centers but because it was entirely ignored evidently because no urban interests were active in its behalf. The lack of interest shown in the resultant vote in Marion county, seat of Indianapolis, was sufficient to kill it. In other words, eliminating Marion county, the proposal would have been adopted by a constitutional majority of 21,930. Only 35,143 of 213,463 persons voting in Marion county voted on the amendment, of which 27,193 were favorable. Therefore 178,320 did not vote either way on it. Other counties with large urban populations which had a similar situation were Allen, Delaware, Lake, La Porte, St. Joseph, Tippecanoe and Vanderburgh.

Announce Speakers For Annual A. F. B. F. Meeting

Among the speakers scheduled for the annual meeting of the American Farm Bureau Federation, Chicago, Dec. 5-6-7 are Admiral Richard E. Byrd, chairman, National Economy League, who will be the featured speaker at the annual banquet Tuesday evening, Dec. 6; Congressman Henry B. Steagall, Alabama; M. L. Wilson, director, Department of Agricultural Economics, Montana State College; Miss Helen Johnston, State Home Demonstration Agent, Alabama; Dr. G. F. Warren, Department of Agricultural Economics, New York State College of Agriculture; Henry I. Harriman, president, United States Chamber of Commerce; Dean J. H. Skinner, Purdue University; Ray Fife, Ohio State Supervisor of vocational education, and others.

President Edward A. O'Neal will entertain the state Farm Bureau presidents and secretaries at a dinner on Sunday evening, Dec. 4.

The meeting will be held at the Sherman Hotel as in past years. The A. F. B. F. board of directors will hold its final meeting of the year on Friday, Dec. 2, and on Saturday there will be a special meeting of voting delegates, state Farm Bureau officials, and state directors of extension service.

I. A. A. Annual Meeting Set For Jan. 25-26-27

(Continued from page 5, col. 3)

"This idea of collecting dues and tying them up may not be very popular with the members down home, but it is good business. Think it over."

Basis of Representation

As in past years the I. A. A. meeting scheduled for January 26-27 will be preceded by the annual meetings of the associated companies and organizations on Wednesday, January 25.

This year the Illinois Produce Marketing Association also will hold its annual meeting at Peoria on January 25. There will be the usual conference for insurance agents, and a conference for managers of county service companies affiliated with Illinois Farm Supply Company.

The basis of delegate representation in the coming annual meeting will be the paid-up membership on any day during November and December, 1932. Therefore counties are advised to get as many members on the eligible list as possible before the end of the year.

The annual banquet will probably be held in the armory. The Pere Marquette Hotel, as at the 1927 meeting, will be headquarters of the convention.

National Grange Master Outlines Relief Program

Expresses Friendly Interest In Domestic Allotment Plan To Lift Farm Prices

THERE are four essential steps that should be demanded of the short session of Congress, L. J. Taber, member of the National Grange, declared in his annual address before the delegates and national assembly at Winston-Salem, North Carolina on November 16.

"There should be an amendment to the Marketing Act providing machinery to deal with the surplus problem and lift prices.

"Monetary stabilization must have consideration and an honest dollar must mean more than one hundred cents. It must mean a dollar honest to debtor and creditor alike.

"Credit machinery must be set in motion to prevent foreclosures, to reduce interest charges, and where the farmer has any equity left, give him a fighting chance to hold his farm and home.

Must Cut Taxes

"Governmental costs, local, state, and national, must be reduced and tax burdens lightened on real estate." He also recommended that the organization endorse a long-time policy for rural life founded on a sound program of land utilization.

He advocated retention of the Agricultural Marketing Act but that it be amended to overcome its weaknesses and shortcomings. "When the Act is amended," he said, "it must be amended by the friends and not by the enemies of agriculture.

"The stabilization features of this Act have not been wholly successful . . . yet it is apparent that a better substitute must be found if there is to be permanent good derived from machinery of this character," said Taber. "The surplus problem is still with us. Some solution must be found for this problem, or continued disaster is ahead."

Allotment Plan

After upholding the export debenture plan which the Grange has consistently advocated, Mr. Taber said: "The Domestic Allotment Plan is now receiving considerable support from industrial and commercial leadership as well as rural groups. This method provides for the payment of the equivalent of the tariff on that portion of certain commodities domestically consumed; funds for this purpose to be raised by a tax on the processor. Overproduction would be checked by the fact that the farmer receives less for his surplus than for that used in the home market.

"It is possible that this plan can be amended and simplified in a manner where the Grange can give it support. We never have advocated any measure because of name, origin, or the nature of support behind it, but have always sought to favor any program economically defensible, lifting farm prices without burdensome or bureaucratic machinery. . . . Our organization stands ready to co-operate with every force in the nation to the end that the intolerable inequality of the export branches of agriculture shall be minimized. . . .

Amend Marketing Act

"The Marketing Act should be amended: First, to provide for a Bi-Partisan Board; second, by restoring to the Board funds spent for wheat given to charity and to China; and third, by substituting for stabilization some additional method of lifting farm prices."

Mr. Taber recommended overhauling and reorganization of the functions of government, but declared that agriculture must guard against the crippling of services necessary and helpful to industry.

Tax reduction, lower cost transportation, extension of farm to market roads, opposition to extensive diversion of gas tax license fees for other than road building purposes, tariff protection, co-ordination and improvement of the farm credit system, reduced interest charges on long-time farm loans, and constructive amendments to the present credit system without drastic changes, were other recommendations.

Retention of the gold standard, avoidance of fiat money, but "correction of the currency structure so as to stabilize the value of the dollar and its buying power in terms of commodities," were also advocated by the National Grange Master. He voiced opposition to the proposed farm march on Washington, opposed repeal of the 18th Amendment, and advocated co-operation with other farm organizations and plans to improve the condition of agriculture.

Bond Issue Goes Over With Large Majority

How more than 20 Illinois counties gave the emergency relief bond issue a 100 per cent vote or better (counting vote for state legislators as 100) will be revealed in a survey now being completed by John C. Watson, director of taxation. As we go to press some 70 counties have reported in each of which the proposal carried by an overwhelming majority.

In a number of senatorial districts where there were no contests for state legislators many voters did not mark their ballots for members of the General Assembly, but voted "YES" on the small bond issue ballot. Such action in Mercer county, for example, resulted in a vote for the bond issue of approximately 32 per cent greater than the vote for state representative.

While some of the following figures may be subject to revision they are the leading counties in voting to approve this important measure, the passage of which saved property owners from an additional levy of $25,000,000 in taxes next year: Mercer 131.8, Rock Island 110.39, Henry 107.67, Boone 106.87, Effingham 105.55, Whiteside 105.46, Pike 105.12, Henderson 104.39, Putnam 103.39, JoDaviess 102.32, Menard 102.29, Moultrie 102.21, Tazewell 102 21, Knox 101.55, DeKalb 101.54, Stark 101.23, Piatt 100.99, McDonough 100.-97, Brown 100.720, Marshall 100.12. Other counties not yet heard from also may exceed the 100 per cent mark.

A large number of counties gave the bond issue overwhelming majorities of more than 90 per cent of the total vote for state legislators. Thorough organization by precincts with committees on hand during the day to talk to voters, coupled with widespread publicity, were responsible for the wonderful showing in the downstate counties.

Pass Relief Legislation At Springfield Nov. 21

The lower house of the state legislature at Springfield on Nov. 21 (1) approved a $17,000,000 Cook county relief bond issue, (2) approved the optional county sales tax of one per cent on the retail selling price of all tangible property which can be established by a two-thirds vote of the county board and kept in force until July 1, 1933 for unemployment relief purposes, and (3) approved the issuance of bonds by down-state counties without referendum for relief purposes.

Prompt passage of these measures by the senate was regarded as assured.

The bills are calculated to permit relief agencies in Chicago and other centers of unemployment to carry on until the new General Assembly meets in January when, according to the present outlook, an effort will be made by metropolitan interests to enact a state-wide sales tax.

The I. A. A. has been represented at Springfield each week while the legislature was in session. It has opposed the principle of taxing the people of one section of the state to provide relief for the people of another section. The association believes that each community should provide for its own unemployed.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. An Expression From The Taxpayers

THE overwhelming approval given the emergency relief bond issue to reduce property taxes was not only a tribute to the effectiveness of the campaign to carry it; it was a tribute as well to the intelligence of the voters, and proof that they are aroused and determined to cut down the tax burden on farms, homes, and other property.

The greatest progress in tax reduction during the past two years has been made in local taxing districts where government is nearer and most responsive to the will of the people. Tax cuts ranging from 20 to 40 per cent in downstate counties over the two year period have been numerous. Let the state and federal governments take their cue from these expressions of the taxpayers.

Breaking The Jam

AVERAGE prices received by farmers for their products on Oct. 15 stood at an index of 56 using the 1910-1914 five year average as 100.

This means that farmers now are exchanging their crops at prices nearly 50 per cent below the pre-war average whereas non-agricultural prices, wages, transportation costs, taxes, etc. vary from 100 up to more than 200 per cent of the 1910-14 average.

Thus it requires from two to four times as many bushels of grain, fruits, and vegetables, and pounds of livestock, milk, and butterfat to buy railroad transportation, fertilizers, farm implements, fuel, automobiles, pay taxes, interest, and debts, as it did before the war.

This unfair exchange value which places the farmer at a great disadvantage in any trade is the primary reason the country is in a jam. And the reason the jam has continued for three years is because of the resistance offered by creditors, industry, organized labor, the railroads, and government to the same percentage of deflation as that suffered by agriculture.

One or both of two things can happen to loosen the jam. Either farm prices will be raised so as to re-establish the exchange ratio of the pre-war period, or else the deflation in industrial prices, wages, taxes, interest, and other costs, now underway, will continue to the level of agriculture.

There is ample evidence to discount the possibility of relief through printing more money. That will probably do no good. There is plenty of money in the big banks, as much or more than ever, but for the moment it lies idle. The banks will not loan it out except when secured by gilt edged collateral, and then for only short periods. And most of our daring enterprisers of a few years ago who were venturing into all sorts of new fields are now twiddling their thumbs, holding on to the money they salvaged from the crash.

Deflation in agriculture apparently is at or near the end but non-agricultural prices, wages, taxes and other costs must yield additional ground unless farm prices are raised. That much is certain. When the equilibrium is reached and trading picks up, prices will rise and the debt situation will look less serious.

Why the Depression Continues

A Critical Analysis of Present Economic Ills With Suggestions For Their Cure

By GEORGE ROBERTS, National City Bank

Here is an analysis of the present economic situation by an orthodox economist, offered without comment to our readers because it represents the views of one large school of thought on the depression and its cure.

Inequalities in prices of services and commodities are responsible for our hard times and until these are adjusted so as to give everyone a fair trade, unemployment will continue indefinitely says Mr. Roberts. "The drop in prices of what farmers and raw material producers sell warns of the necessity of reducing the prices of what they buy if recent improvement is to be turned into lasting recovery."

High wages, high taxes, high transportation costs, high costs of finished commodities, the continued high cost of living are all key logs in the jam blocking recovery. Resistance to deflation by the better organized groups in our society together with the disturbing influences of foreign money values and international trade are having their influence in slowing up the return of a normal prosperity.—Editor.

THIS depression began three years ago, and by now there should be general recognition of the fact that serious derangements exist in the economic system.

By this time the natural economic forces would have accomplished a substantial recovery, if their influence had had free play. Something in the nature of a log jam exists in the business stream, and it is of great importance to locate the key logs in the jam. There is reason for believing that the railroad situation is one of them.

Furthermore, the high cost of living, notwithstanding the low prices upon food and raw materials, together with the state of unemployment and low aggregate earnings of the whole body of wage workers, notwithstanding high nominal wages, afford a key explanation to the blockade of trade.

Must Come Down

It is a fair question, whether in this crisis, the railroad orders have done all that they can afford to do to sustain the industry which gives them employment, or all that is fair and right for them to do to sustain the entire industrial organization.

Are they convinced that a reduction of 10 per cent, limited in time to a period that will expire in now three months, is the utmost concession they can make from a wage increase of approximately 157 per cent (accomplished in a few years under the influence of war and inflation), as their share in a general readjustment of wages and prices which had yielded to them more than a 10 per cent increase in the purchasing power of their wages before their concession was granted?

Are they certain that even from the standpoint of their own interests alone they could afford to see the railroads ruined, with resulting effects upon the country's financial structure and all business, rather than make any further concession? Or do they count upon action by the United States Government, in their behalf, to assume railroad losses and liabilities, along with all its other undertakings for the support of business and employment and the relief of distressed people?

If this expectation is the basis of their policy, it is not unreasonable to ask if they have considered how long the public credit would stand up under such demands, in view of the present state of the revenues and present ability of the country to pay taxes or subscribe for bonds? With 40 per cent of their members unemployed the railroad brotherhoods certainly have an interest of their own in the restoration of general prosperity. . . .

When the economic system is seen to be what it is, a mutually supporting organization for exchanging services and supplying each other's wants, it should be apparent that the relations within the system are of great importance. Upon the stability of these relations depends the stability of trade, production, employment and consumption. The highest state of prosperity and well being is attained when all parts of this voluntary organization are in such balanced relations that there is full employment for all workers and the varied products and services readily pay for each other.

In a sound economy the system is regulated automatically by price movements, which tend to distribute the working population into the occupations as needed to maintain the desired equilibrium in production and prices. *If anything occurs to seriously disturb the balanced relations trade necessarily slows down and unemployment results.* This is the situation in which this country has been struggling for now nearly three years. Undoubtedly the wants of the people for goods of all kinds are as great as they ever have been and productive capacity is greater than ever before, but price relations have been in such a state of confusion that the volume of trade has fallen off between one-third and one-half.

The excess of supplies over market demands has seemed to imply a general state of overproduction, but *the true explanation is a loss of purchasing power to millions of would-be consumers.* This loss is not by reason of a shortage of the money supply or any loss of physical wealth, but is due to the fact that the different commodities and services are not being valued to each other on the same terms as they were a few years ago. If the former price relations were restored the exchanges would soon be flowing as they were then. . . .

Many Costs Rigid

Certain factors in the economic system are more rigid than others. Prices of commodities of current production coming in volume to the markets are constantly changing under the influence of supply and demand. Compensation for personal services is controlled to a considerable degree by custom and bargaining power and changes less readily. Contracts of all kinds extending over years usually are rigid.

The costs of government have a high degree of rigidity, except that they tend to increase, particularly in good times, when people are free with expenditures and not paying much attention to taxes. Moreover the expenditures of governments are chiefly for personal services and interest on borrowed money, costs which are relatively unyielding.

The people have just now waked up to the fact that taxes have become increasingly burdensome. . . .

Transportation costs are another important claim upon all business and all incomes, like the costs of government having a high degree of rigidity because the expenditures are chiefly in the form of compensation for personal services. *Transportation costs stick out like a sore thumb in comparison with the reduced prices of products transported.*

Rents have a high degree of rigidity, but dependent in part upon the

SAFETY and security have been the watchword in the development of COUNTRY LIFE INSURANCE COMPANY. Organized shortly before the beginning of the drastic deflation in stock, bond and commodity prices four years ago . . . developed during the worst depression in the history of the country, Country Life has forged steadily onward building soundly with one purpose in mind . . . to provide Farm Bureau members and their friends with secure protection at the lowest possible cost consistent with safety.

Forty-seven million dollars in estates created . . . farm homes and families protected . . . millions of dollars in premium payments safely invested . . . payment of mortgages assured . . . education for children . . . old age income provided for . . . these are the contribution COUNTRY LIFE is making to the welfare of Illinois agriculture.

COUNTRY LIFE has the strength of the giants with a surplus of sound reserves back of every policy . . . with assets Nov. 1, 1932 at $1,731,485.54, with an increase in surplus approximating $139,315.99 for the year.

Ask your County Farm Bureau or send a card to the address below and get the facts about our low cost money saving policies.

Why The Depression Continues

(Continued from page 9)

contract in them. Since the war, rents have reflected the high wages which have prevailed in the building trades and building material industries. *Construction costs are one of the "key logs" in the jam.*

Debts and interest rates on long term indebtedness are an inflexible element in the situation, and a very important one. Debts always have increased importance in a period of reaction, after a boom period has induced a general increase of them. Interest rates in themselves are not inflexible, for market rates are as changeable as any economic factor, but legal contracts to pay money are not easily changed. The subject, which always involves the money question, is too complex for a full discussion here, but reference is made elsewhere to the tendency of interest rates to decline in periods of depression, and so far as the debt burden is increased by a fall of commodity prices, the effect always has been temporary.

Debts Not So Crushing

A general and rapid fall of prices always is due to derangements in the economic system which interfere with the normal flow of products into consumption. *When order is restored, as it always has been and will be again, prices recover, and the debts are found not to be so crushing as they appeared in the time of panic.*

Finally, wages constitute the principal factor in economic relations, because they are the chief item of costs in nearly every industry and therefore the chief factor in the making of prices. The greater part of the aggregate income of all the people of this country is first received as wages and salaries, and subsequently expended for commodities and services. . . .

We have seen that personal compensation in the form of wages and salaries is the principal factor in the costs of government and in the rigidity which characterizes them. There is great popular sentiment against any proposal to reduce wages, and wage rates therefore have a high degree of rigidity. On the other hand, largely because wage rates are so rigid, employment and actual wage-earnings are subject to great fluctuations, and this is one of the chief reasons why depressions sink as deep and last as long as they do.

For in a period of depression large numbers of people find their incomes unavoidably reduced, and if the things they would like to buy do not decline in price there must be a drastic reduction in the physical volume of their purchases, and unemployment results.

The present state of disorder, the worst ever known, is due primarily to the war, which forced many violent changes in industry and trade. It created an unlimited demand for man-power and caused a vast shift of labor into war industries, which was induced by bidding up wages, and of course had an influence upon all wages. Moreover, the cost of living rose rapidly, on account of the extraordinary demands of Europe for foodstuffs and other necessities, and this properly was taken into account in fixing wages.

In all the past, on account of continuing improvement in methods of production, transportation and distribution, wages have normally moved on an upward course, and it has become a habit of mind to expect them to do so. Furthermore, it has become a fixed principle of organized labor never to permit a retrograde movement. With the usual rate of wage advancement this was possible, but the rise from 1915 to 1929 was wholly abnormal, and could not be made in real wages (commodities) out of current production.

The country was not creating wealth at that rate, and the attempt to convert these money-(credit-)wages into commodities drove up the cost of living, rendering the nominal wage advance largely fictitious, in the sense that it did not carry any such increase of purchasing power. These wage rates never should have been regarded as other than emergency rates, intended to compensate for the existing depreciation in the purchasing power of money or, in other words, the rising cost of living. They were not effective in increasing real compensation at the time, and the attempt to maintain them later, when they did represent a substantial increase of real compensation (after the fall of commodities), has upset the equilibrium of all industry and forced millions of wage-workers out of employment. *Industrial costs are relatively so high that products cannot be sold.*

The labor leaders treat the situation as a conflict between employers and wage-workers and denounce the former for seeking wage reductions. This is an inadequate and mistaken view. The responsible head of an industry very properly endeavors to conform to conditions as he meets them, in order to continue doing business and affording employment for his working force. The conflict which develops when the industrial system is thrown out of balance is not primarily between employers and employes, but between different sections of the economic system, over the terms upon which their products shall be exchanged. There is no fundamental conflict of interests, for all of these groups would be best served by finding a fair basis upon which their products and services could be readily exchanged and enter into use.

Index of Hourly Earnings	Base 1914	Year 1929	July 1932
Agricultural Implements	100	235	204
Automobiles	100	239	203
Boots and Shoes	100	235	190
Chemicals	100	251	218

Rubber	100	263	248
Simple Average of these Industries	100	236.58	209.42
CLASS I RAILROADS	100	251	*231

* June Source: National Industrial Conference Board.

The preceding table gives figures showing the rise of wages upon the railroads and in twelve leading industries from 1914 to 1920 and their comparative level in the month of July, 1932. The calculation is based upon average wage rates in 1914 as 100, the figures for 1929 and 1932 representing average wages in these years in percentages of 100. Thus, wages in the agricultural implement industry in 1929 were 235 per cent of wages in 1914, or 135 per cent higher, and in 1932, 104 per cent higher.

The following table gives in cents per hour a showing of union wage scales in the principal building trades in 1913 and 1932, with the percentage of increase, as given in the Monthly Labor Review:

Occupation	Cents Per Hour Year 1913	May 15, 1932	Per Cent Change
Bricklayers	67.1	130.0	93.7
Building Laborers	29.9	96.6	223.1
Carpenters	50.1	100.9	101.4
Cement Finishers	56.5	116.1	105.5
Inside Wiremen	51.3	121.7	137.2
Painters	47.1	116.8	148.0
Plasterers	64.9	129.9	100.2
Plumbers	59.7	120.5	101.8
Stonecutters	57.3	119.6	108.7
Structural-iron workers	60.6	125.3	106.8

It will be seen that notwithstanding the wage reductions made between 1929 and July, 1932, average rates in the above-named industries, including the railroads, this year are more than 100 per cent above the 1914 level.

The primary industries, producing foodstuffs and raw materials, were very much stimulated outside of Europe during the war, to make up for the loss of supplies that had previously come from Russia and Central Europe. Since the war this new production, largely in the United States, Canada, Australia and Argentina, has been maintained and with the recovery and increase of production in Russia and Central Europe, an excess of supplies has resulted, which has broken down prices. It is needless to say that these scattered producers of primary products have no way of controlling the prices of their products as the workers in the highly organized industries are able to control wages. Adjustments in production must be made, but these require time.

Farmer Hit First

The American farmer has been selling his products this year at about one-half the average prices of 1913. In contrast with this the railroad employes have been insisting that they should not be asked to accept wages less than 157 per cent above their wages in 1913. In the principal American industries, as shown above, average wage rates are now 100 per cent above the 1913 level. An exchange of services on this basis would mean that the farmer must give nearly four times as much of his products for an hour's factory or railroad wage as in 1913. . . . *With this heavy handicap upon him the farmer has had no alternative but to cut his purchases to the lowest possible point, and employment in factories and on railroads was reduced accordingly.*

Purchasing Power Down

While the loss of purchasing power began with the farmers and other producers of primary products, of course it did not end there. For as these consumers, under the pressure of necessity, reduced their purchases of the products and services of the other industries, and the latter cut down their working forces, the purchasing power of these groups also declined. The entire industrial organization slowed down.

It is urged that the remedy for the situation is to cease reducing wages and promptly restore those which have been reduced. If everybody was a wage-worker, and there was any assurance that all employers were in position to follow this advice, there might seem to be some plausibility in the proposal,

(Continued on page 14)

O'Neal States Policy On Foreign Debt Situation

Opposition to any scaling down of foreign debts unless compensatory trade agreements are made by which European countries agree to buy our products, was expressed by Edward A. O'Neal, president of the American Farm Bureau Federation in a recent letter to Alfred P. Sloan Jr., chairman of national debt commission.

"The moratorium on the payment of European debts to us, so generously granted by the President and the congress," O'Neal wrote, "has not during the past year succeeded in stimulating this trade (between America and her debtors), and I am wondering if a permanent reduction in these debts would have any different effect from that which we have observed during the past year. If we could make a condition incident to the scaling down of these debts a provision that the nation so benefited should agree to buy certain quantities of goods from this country, then it seems to me there might be some justification for a scaling down of these debts."

But O'Neal said he felt the problem is "not only a problem of intergovernmental debts, but of all debts, public and private." He asserted that the mortgage indebtedness of American farmers is no less than the inter-allied war debts which now concern the debt committee. It was his judgment that the same factors rendering payment of government debts difficult were also making impossible the payment of the debts of farmers and other producers of wealth in America.

Farm Dollar Drops

"Of much more importance than consideration of any settlement of the foreign debt," the farm leader wrote Sloan, "must be consideration of ways and means whereby commodity values can be raised to a point where we will be enabled to pay off our farm indebtedness without being obliged to suffer foreclosure and loss of property." Farm indebtedness incurred when products brought reasonable prices must now be paid off while those products bring less than half the price they formerly commanded, he said.

O'Neal made three suggestions: devaluation of the American gold dollar to offset commodity price decline; world conference on adequate international mediums of exchange, and tariff revision to promote "freest possible interchange of commodities."

Says Deflation Is The Ultimate Remedy

Charles Benedict, writing under the title "Deflation is the Ultimate Remedy" in The Magazine of Wall Street says: "The problem of deflation is world-wide. It has everywhere wrought two evils: (1) It has indisputably made the world's burden of debt beyond the world's capacity to pay; (2) It has resulted in a great inequality of current prices, which disastrously impedes the exchange of commodities.

"There are three ways of approaching the problem. One is stubbornly to resist all price declines, another is to let prices crash to new levels and scale down and write off debts with all possible speed; the third is monetary or credit inflation or a combination of the two.

"The United States, together with England and Germany, is at present inclined toward resistance to price reductions and toward inflation in one form or another. France advocates noninterference with prices and opposes inflation. She proposes to allow wages and production costs to come down to the price level rather than attempting to bring the price level up artificially to meet costs. Her reasoning and her policy are sound.

"There has been no greater calamity in the present series of calamities than that of the artificial pegging of prices in all lines where such control was possible. Beyond a doubt this perverse rear-guard action against the inevitable has accentuated and prolonged the depression and will still further prolong it. It is mainly responsible for the fact that as the depression has advanced the spread between urban and manufactured products and rural and raw materials has become greater and greater.

"While surpluses have increased farm products have fallen 47 per cent in the past three years while urban products have gone down but 25 per cent. Only recently have our export agricultural products surrendered to world price levels—and the surrender is not yet complete. . . . We might far better have reconciled ourselves at the outset to the fact that deflation is the natural corrective to inflation—the correction of abnormal prices and maladjustments of supply and demand. . . ."

There are indications and some support for the belief that this nation is preparing at last to grapple with the farm problem more effectively and perhaps more successfully than has been the case up to now.

Until recently, our federal government over a period of 50 years, or more, has placed emphasis on agricultural production. It has been effective through reclamation projects and free land grants in expanding and pushing the production area steadily westward. It has succeeded in encouraging more efficient production in the older agricultural sections of the East and Middle-West. It has stimulated competition in agriculture.

The world war gave powerful impetus to the produce-more-food movement. "Food will win the war," we were told. Farmers plowed up virgin acres in obedience to the sudden demand and the chance for profit. Production of wheat and other crops was stepped up in response to the highest farm prices in anyone's memory. With the end of the war came deflation for agriculture and the beginning of a long series of mortgage foreclosures and losses. That story is too well known to be reviewed at length here.

About 1922 if not before, we became conscious of the surplus problem, of inequalities in the exchange value of farm commodities and non-agricultural goods. This problem has been with us ever since, only more intensified in the past three years. There are those who believe there would be no surplus problem here if everyone in this country were well fed. The facts indicate that they are wrong. True the unemployment situation with consequent low buying power in consuming centers is partly responsible for the more recent drastic decline in the prices of farm products. But agriculture was in a state of depression from surpluses when industrial unemployment was comparatively negligible and consumer buying power in the cities was at high tide.

The fact is there is too much food produced in this country for domestic consumption at any price. We have been relying on foreign markets for part of our production, ever since the war. We have been allowing foreign markets to fix the price on our entire production of such crops as wheat, corn, cotton and hogs, while buying needed supplies in a protected market. There has been a steady transfer of national wealth from agriculture to industry.

Were foreign markets open to us and foreign people financially able to buy at a price yielding us a profit, crop acreage reduction would not have to be considered. But the foreign market outlook has completely changed. Where before the war, we were shipping our farm products to Europe to pay interest on our debts, now we are a great creditor rather than a debtor nation. And we are demanding payment of debts although refusing to take our pay in the form of manufactured goods and services from abroad.

Another disturbing influence is that Europe has gone back to farming. The World War made the belliggerent nations extremely conscious of the importance of a domestic food supply. Economic agricultural nationalism has grown at a terrific rate among European countries. Practically all of these nations have set up tariffs, import quotas, milling and mixing regulations, and licensing systems which have practically shut off the normal export flow of our farm products.

Yet we in this country have gone along producing for a market which has ceased to exist. We will cut our production, however, within the next few years either voluntarily or involuntarily. In fact the point has been reached now where the actual cash outlay for production on large areas of land is greater than the value of the crops. Production this year was largely maintained by subsidy, out of borrowed or accumulated capital. When that capital is used up, great tracts of land will be allowed to lie idle until consumption catches up. Then and not until then will there be a rise in prices unless we carry out a plan of orderly acreage reduction. We can take our choice of managing production or allowing the law of the survival of the fittest to do it for us. Incidentally the more money is loaned by the government and others to continue surplus agricultural production, the greater will be the sum lost and the longer the time required for the inevitable adjustment.

If, and when, the domestic allotment plan or some modification of it is enacted into law, it will drive into the open and expose the folly of investing accumulated capital into the production of surplus commodities for a market which will not or cannot pay their cost.—E. G. T.

Why Depression Continues

(Continued from page 13)

but the census figures showing the principal occupational divisions of the gainfully employed population, which were given in this publication last month, indicate what may be expected of this policy.

In 1930, of a population of 122,775,000 there were 98,723,000 persons ten years of age or older and of these 48,830,000 in the language of the Census were "gainfully employed." Of these, 10,472,000 were employed in agriculture, of whom 6,079,000 were owners, tenants or managers, 2,733,000 were hired employes and 1,600,000 were unpaid members of the resident families. There were 9,550,000 operatives and laborers employed for hire in all the manufacturing establishments and 1,072,000 on the steam railroads, these two groups together numbering about the same as the "gainfully" employed upon farms. Forty-four per cent of the entire population lived either outside of incorporated towns and cities or in towns of less than 2,500 people, where all incomes are largely dependent upon farm prosperity.

The total number of employes engaged in operating steam railroad trains, was 456,000 and the total membership of the American Federation of Labor is less than 3,000,000. Any one can make his own estimate of how many of the members of these groups, and how many of the remaining gainfully employed, would be likely to have their incomes increased as the result of even the most effective wage-lifting movement that could be organized under present conditions. It is then to be considered that whatever might be thus added to the purchasing power of the recipients must be subtracted from the purchasing power of the whole population, including the farmers and all others whose purchasing power is already below normal, after which he may draw his own conclusions. *For there is no way of increasing the income of any section of the population except either through an increased production of wealth within itself or by a transfer of income from other sections of the population.* . . .

The conclusion appears to be inevitable that the wage-paying industries are on an artificial and uneconomic basis, suffering an enormous waste in the idleness of both labor and capital, causing living costs to be 35 per cent above the 1913 level, while wage scales which are nominally very high in comparison with those of 1913 produce a smaller aggregate of actual wage payments. The explanation is to be found in the unbalanced state of industry, which prevents the normal flow of trade.

More than 600 fluid milk producers around Rockford, members of the Mid-West Dairymen's Company, met in Rockford the night of November 18 to protest against the action of dealers cutting the price on all fluid milk to flat butterfat basis.

News of the reduction in price to producers followed announcement by the dealers that they would drop the price to the consumer from nine to six cents per quart. The dealers' action in cutting the retail price one-third was precipitated by raw milk peddlers who have established milk depots on the outskirts of Rockford where they are dipping milk out of cans as it comes from the farm for five cents per quart. Raw milk peddlers have cut into their trade to such an extent say the distributors that they were forced to take this action.

Members of the Dairymen's Association have been receiving a net average of approximately $1.13 per cwt. for milk, according to the following schedule: base milk $1.50; class 2 or surplus $1.05; class 3 (condensing) 90 cents.

Sentiment at the meeting of dairymen was unanimous for withholding milk the next morning. J. B. Countiss, director of dairy marketing for the I. A. A. who attended the session, recommended that such action be deferred until an outlet could be found for members' milk and an opportunity was afforded to confer with the dealers.

Newspaper publicity questioning that sanitary requirements were being met by the raw milk depots resulted in a tremendous increase in demand for the lower priced product. The dealers apparently decided on the drastic cut from nine to six cents only after their established business had been demoralized by low priced competition.

Members attending the indignation meeting unanimously favored the Association withholding a $10,000 payment due from the distributors for milk and using the money to establish a plant of their own either for separating milk or carrying the product direct to the consumer.

Newspaper reports quoted W. E. Sawdey, president of the Association, to the effect that producers would be ahead to separate milk on the farm, sell the cream, and feed the skim to the pigs. By so doing they would save 25 cents per cwt. including the 15 cent hauling charge, and 10 cents per cwt. for the skim.

"This is the lowest price for milk offered recently to fluid producers in this state," said Countiss. "But before we do anything drastic let's first consult with the dealers, develop a plan, and find out where we're going. If we withhold our milk the dealers will get plenty anyway. There is plenty of condensery milk in this section."

W. H. Lee, the new manager of the Mid-West Dairymen's Company, stated that under the new price farmers would be getting only 29 per cent of each dollar paid by the consumer, whereas formerly the farmers received 42 per cent of the consumer's dollar.

Conferences with the mayor of Rockford and the City Health Department indicate that the producers have the friendly support of local officials.

As we go to press plans are being developed to protect the interests of the organized dairymen and get them the maximum price possible.

Livestock Exposition Is Bigger Than Ever

As we go to press B. H. Heide, manager of the International Live Stock Exposition, announced that the best specimens of 35 different breeds of live stock will fill to capacity 22 acres of exhibition barns that house the big show.

Walter Biggar, famous Scotch fat cattle judge from Dalbeattie, Scotland, is scheduled to place the steer classes. His grand champion steer selection in 1929 sold for the world record price of $8.25 a pound in the fat cattle auction.

The utility corn show at the International Hay and Grain Exposition will find many Illinois entries. Smooth type corn will compete with the rough corn in the grand championship contest. Farmers of nearly every state in the Union and in the Province of Canada are exhibiting wheat and other grains.

The 4-H Club show promises to be a feature of the exposition as in past years. More than 1,000 farm boys and girls from nearly every state in the Union will be in Chicago the week closing Dec. 3.

Choose Illinois Delegates A. F. B. F. Meeting Chicago

Earl C. Smith, A. R. Wright, and Geo. F. Tullock were chosen as voting delegates to represent the Illinois Agricultural Association and its members at the annual A. F. B. F. meeting, Chicago, Dec. 5-6-7. The entire board of directors will attend the convention.

The December meeting of the I. A. A. board will be held the same week on Friday, Dec. 9.

Mrs. Minnie Staffeldt owns a farm with fields situated on both sides of the railroad right-of-way just south of Eola in DuPage county. The railroad company maintains a farm crossing between the two fields. She stated that the approaches were too steep to haul grain across registering her complaint with the Farm Bureau on July 20. Since she expected to move grain within the next 10 days prompt action was requested in repairing the crossing, and in extending tile under a fourth track, newly built, so as to take care of the water being dammed up in the field by the right-of-way.

The I. A. A. wrote the company on July 22 and on July 31 the work of reconstructing the crossing was under way and drainage provided under the tracks.

H. S. Wright, farm adviser of DuPage county wrote: "Mrs. Staffeldt is very thankful for the service rendered on these claims. I wish also to thank you for the speed with which you had these matters taken care of."

Farm Supply Sales Meetings Well Attended

An excellent attendance of county service company managers, oil truck salesmen, and county directors was reported at the four district conferences sponsored by the Illinois Farm Supply Company at Mattoon, East St. Louis, Peoria, and Aurora, November 16-17-18 respectively.

Attendance at each meeting ranged from 90 up to 200 or more. Manager L. R. Marchant reported that this series of meetings was the most enthusiastic and best attended of any yet held.

Among the speakers were Mr. Marchant; C. W. Ward, supervisor of sales for the state company; Henry Sagemiller, of the W. H. Barber Company who discussed the new process of refining to secure lower cold test oils; L. A. Williams, Country Life Insurance Co. who discussed salesmanship; T. A. Faust who talked about the value of cod liver oil in the diet of young animals; P. C. Battenfeld who told the advantages of asphalt roof coating; and Mr. Mason from the Goodrich Rubber Company who spoke on the subject "Making Timely Adjustments."

President Fred E. Herndon of Macomb presided.

Sorrells Tells Advantages of New Livestock Co-ops.

Livestock Growers Must Shoulder Responsibility For Developing More Efficient Distribution System

"IN revamping our livestock machinery in Illinois," said Sam Sorrells in a recent radio address over Station KMOX, "we have found that larger marketing units such as those serving an entire county or parts of three or four counties, can meet competition because:

"1. They can make frequent shipments.

"2. They can ship regularly.

"3. They can grade livestock at home and ship graded loads of one species.

"4. They can use double-deck railway equipment, and in other ways economize in the handling of livestock.

"5. They can provide full-time management by a man whose entire time is devoted to a study of the chief markets of the country and their peculiar demands.

"6. Livestock can be moved in the most direct and economical way to the particular market or outlet where it will command the highest price."

Mr. Sorrells, president of the Illinois Livestock Marketing Association and I. A. A. director, discussed recent changes made in the co-operative marketing setup in this state. He appeared as I. A. A. feature speaker on the regular Monday noon farm program over the St. Louis Station on Nov. 14.

New Units Established

"Within the last year or two in Illinois, county marketing units have been established in Champaign, Vermilion, Shelby, Iroquois, McDonough, Knox, Coles, Edgar, and Macon counties," he said. "Others are in process of organization and the demand is still coming from various sections of the state for similar work. In each case these larger marketing units are serving the territory previously served by from five to 15 small shipping associations."

Speaking of the organization of the State Marketing Association Mr. Sorrells pointed out that its purpose is to correlate marketing work of the district co-operatives, to assist in standardizing methods of handling, of grading, and accounting, to regulate the movement of livestock to market according to demand; to bring to each district or county unit the full benefit of the experiences of other units, and to assist each district co-operative in finding the markets or outlets for livestock which will return the highest net price to the grower.

In conclusion, said the speaker, the livestock farmer is recognizing as never before his responsibility in building an efficient distribution system to get the livestock to the processor and on to the consumer at the lowest reasonable cost consistent with the quality of the product and service rendered. Co-operative marketing success is a long-time program and to achieve its ends and aims members must continue working together during bad as well as good years.

Livestock Marketing

The cattle market, reports the National Livestock Marketing Association, as of Nov. 15, is still greatly depressed by large receipts of top yearlings and an excess of heavy short-fed steers. This has weakened the entire market and has resulted in an extremely wide spread in cattle prices for this time of year. The outlook is favorable for some improvement by the end of the year and for substantial recovery by the late winter, coming largely from a strong feeding demand and reduced supplies of fed steers and butcher stock.

Many yearling heifers and medium grade feeder steers now look favorable for the March market. Also many of the better grades will find their best market at that time. The fall market a year from now is expected to be best for choice steer calves, best lightweight yearling steers and good and choice fleshy steers taken out next spring and early summer. The late spring and early summer appears to be the period for the cattle feeder to avoid next year. Next summer it will be well to have light to medium weight steers and have them well finished.

The hog market continues in a seasonably weak position. The supply is centered in the early marketing areas, which means relatively large supplies during the balance of the year. Storage demand on the part of packers, however, is expected to be reflected in some price improvement by the end of the year as short supplies in the late winter are generally expected. The situation is now favorable for fully finishing hogs and the holding of the lighter weights for the February or March market.

Substantial reduction in supplies of lambs is in sight for the next few months as the movement of feeding lambs into the Corn Belt has been greatly curtailed. In general, the situation is favorable for the lamb feeder, but with the western feeder taking a slightly larger proportion of the crop, the situation indicates highest prices during December, January and February, slightly the reverse of last year.

The eighth unit of the Illinois Livestock Marketing Association at Paris, Edgar county, handled 31 cattle, 30 calves, 1,577 hogs, and 53 sheep during its first month of operation in October.

The State Marketing Association handled during October 227 decks of livestock from its affiliated associations.

The Indianapolis Producers report that 1,180 different truckmen are now hauling livestock regularly to this co-operative commission firm. The ten in Illinois bringing the largest number of consignments to the Producers rank as follows: Wiley Ikemire, Jasper county; Fred Q. Payne, Cumberland county; Cecil Roberts, Douglas county; Chas. E. Burkett, Edgar county; William Ramsey, Shelby county; Chas. McClain, Effingham county; L. W. York, Douglas county; Everett Toppe, Champaign county; O. L. Bradford, Douglas county; and F. E. Knight, Coles county.

Old Time Parties Beat Depression In Effingham

"Farm prices may be at a low ebb and hard times with us, but the depression is not preventing us from having a good time in Effingham county," says Farm Adviser Geo. H. Iftner.

A feature article in the Decatur Herald of November 21 quoting Iftner reports that more than 350 farm folks in Effingham county are taking an active part in planning and executing entertainment for the 11 Farm Bureau community units in that county. Most of these are young people, many just above the 4-H club age.

Community meetings are held monthly in each district. Programs are arranged and most of the talent furnished by members of the community units. All sorts of games are played. There is plenty of music by local pianists, fiddlers, and banjoists. There are folk dances, relay races, and other features to provide wholesome fun at little or no expense.

The old songs and dances, the old-time parties are the best means of bringing our folks closer together, said Iftner. Our larger meetings bring out from 500 to 1,000 people

Declares Country Life In Excellent Condition

Actuary Points Out Favorable Position of Company For Future Growth

"Country Life Insurance Company is in probably the most liquid condition of any life insurance company in the United States," L. A. Glover, consulting actuary, said in a brief talk before the monthly meeting of the board of directors November 18.

"You were very fortunate in starting the company when you did," said Glover. "You have avoided the difficulties most other companies are experiencing. Country Life Insurance Company has been built on a sound foundation and you are in a very favorable position to go ahead.

"Your business has been sold on a sound basis judging from your experience in keeping policies in force. Most of your policies are small and the premium payments are generally within the ability of the policyholders to meet them. Companies which have sold large policies based on inflated income are having difficulty in keeping such policies in force."

A. R. Wright, chairman of the Finance Committee, who, with the Treasurer, R. A. Cowles, has largely directed the purchase of securities for Country Life and other associated companies, announced that none of the securities of the life or auto insurance companies are in default in either interest or principal.

The Country Life directors declared a dividend of 10 per cent on the capital stock of the company to take care of preferred dividend requirements of the holding company due on December 19.

The board also authorized that a discount of three per cent per annum be allowed on all life insurance premiums paid in advance by policyholders.

Country Life Insurance Company is now retaining risks without reinsurance up to $10,000 exclusive of the double indemnity. As a result of this action larger risks are being scrutinized more closely than ever by a risk committee composed of the medical director, the actuary, the active manager and counsel.

Manager L. A. Williams reported to the Board of Directors that acquisition for October was $1,122,000, and that the paid-for business for the year would approximate TEN MILLION by the end of December.

He reported business coming in from every County in the State with one exception, announced agents' sales meetings at Centralia, Decatur, and DeKalb, for November 28, 29 and 30, at which final preparations for the December 10th Achievement Day Jubilee were to be given out.

Mr. Williams anticipates that Country Life will be one of the few companies in the United States to make a gain for 1932 in life insurance in force. He reported creditable persistency of business for the year and that premium income for 1932 would be nearly a million dollars.

Black Elected V. P. Anti-Thief Association

Charles S. Black, I. A. A. director from Jacksonville, was elected national vice-president of the Anti-Horse Thief Association at their recent annual meeting in Perry, Oklahoma. Mr. Black is also a member of the executive committee of the Illinois division which he served two years as president. The Illinois division held its annual meeting recently at Litchfield where President Earl C. Smith of the I. A. A. made the chief address.

CHAS. S. BLACK

Charles McDaniels of Macon county is national secretary-treasurer of the organization, and Sydney Holben of Edinburg in Christian county is state secretary.

The Anti-Horse Thief Association, recently changed to Anti-Thief Association, was organized in Clark county Missouri in 1854 by Major David McKee and his associates. It now has about 40,000 members located in Kansas, Oklahoma, Missouri, Iowa, Illinois, Arkansas, New Mexico, and Colorado.

It is both a detective and protective order. If property be stolen from any member, the organization seeks to recover the property and capture the thief. Its motto is "Protect the innocent; bring the guilty to justice."

The order works hand in hand with law enforcement officials, and in many communities is so well organized that thievery has been practically abolished.

Annual dues regulated by the local lodge range from $2 to $3 a year. Full information about the organization may be had by writing the state secretary at Edinburg.

It is estimated that there will be 5,000 fewer automobile deaths this year than in 1931. A smaller number of automobiles on the road coupled with more sober living and thinking are given as reasons for this decline.

Rich-Law Service Pays 20% Dividend

350 Attend Annual Meeting of Lawrence County Farm Bureau

THE Rich-Law Service Company operating in Richland, Lawrence, Crawford and Jasper counties voted to pay a twenty percent patronage dividend on major products and a fifteen percent dividend on other products at the annual meeting of the company held at Olney Oct. 27.

The total amount set aside by the company for patronage refunds was $9,933.44 according to Leslie L. Miles, manager. This was an average refund of $13.09 to each Farm Bureau member patron. The largest patronage refund check was for $468.40. Five patrons received checks of $100 or over and 22 received checks of from $50 to $100.

This dividend was declared after a 7% dividend on Class A Preferred stock had been paid, a considerable deduction for depreciation of equipment allowed, and a substantial reserve set up.

THREE hundred and fifty persons attended the annual meeting and dinner of the Lawrence County Farm Bureau held at Lawrenceville, Thursday November 3. L. A. Williams, manager of Country Life talked to the group immediately after the noon hour. Considerably over a million dollars of Country Life policies are held in this county. Williams emphasized the need for truth as a basis of modern business with his main theme the value of group effort.

The dinner and afternoon meeting were held in the Chamber of Commerce building. The morning meeting which consisted of reports of the activities of the Bureau was held at the Court House. Members of the board of directors elected to serve for two years were H. O. Tedford, Thomas Finley, H. R. Neal, Edwin F. Schrader, Charles Saums and Harry Warner. Three members of the board, R. C. Cunningham, Benton Haines and Ralph Zehner, hold over for another year.

University of Illinois On Air Daily Over Station WILL

Members of the agricultural and home economics staff of the Illinois College of Agriculture are broadcasting daily except Sunday over the University station WILL, reports Joe Wright, director of publicity.

All of the agricultural features are broadcast during the noon-day period from 12:00 to 12:15.

WILL operates on a wave length of 890 kilocycles.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL AUDITING ASSOCIATION

NOTICE is hereby given that the annual meeting of the members of Illinois Agricultural Auditing Association will be held on Wednesday, the 25th day of January, 1933, at the hour of 10 o'clock a. m., at the Pere Marquette Hotel, Peoria, Illinois, to elect directors, receive, and, if approved, confirm the report of the Board of Directors of the Association for the fiscal year ending December 31, 1932; and to consider and, if approved, ratify and confirm all the acts and proceedings of the Board of Directors done and taken since the last annual meeting of the members of the Association; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, November 26, 1932.

GEO. E. METZGER,
Secretary.

NOTICE OF ANNUAL MEETING OF ILLINOIS FARM BUREAU SERUM ASSOCIATION

NOTICE is hereby given that the annual meeting of the members of Illinois Farm Bureau Serum Association will be held on Wednesday, the 25th day of January, 1933, at the hour of 10:00 o'clock a. m., at the Pere Marquette Hotel, Peoria, Illinois, to elect directors, receive, and, if approved, confirm the report of the Board of Directors of the Association for the fiscal year ending December 31, 1932; and to consider and, if approved, ratify and confirm all the acts and proceedings of the Board of Directors done and taken since the last annual meeting of the members of the Association; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, November 26, 1932.

RAY E. MILLER,
Secretary.

FARMERS MUTUAL REINSURANCE COMPANY ANNUAL MEETING

The annual meeting of the Farmers Mutual Reinsurance Company will be held at the Pere Marquette Hotel at 3:00 P. M. Wednesday, January 25, 1933.

The annual reports of officers will be made and directors elected for the coming year. Policyholders are cordially invited to attend the meeting.

NOTICE
ILLINOIS AGRICULTURAL ASSOCIATION
ELECTION OF DELEGATES

Notice is hereby given that in connection with the annual meetings of all county Farm Bureaus to be held during the month of January, 1932, at the hour and place to be determined by the Board of Directors of each respective county Farm Bureau, the members in good standing of such county Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of the Association, including the election of officers and directors as provided for in the by-laws of the Association.

During January annual meetings will be held in Carroll, Douglas, DeKalb, Winnebago, Fulton, Franklin, Greene, Mason, Knox, Lake, McHenry, McLean, Macon, Mercer, Peoria, Sangamon, Whiteside, and Woodford counties.

Signed,
G. E. Metzger, Secretary

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL MUTUAL INSURANCE CO.

NOTICE is hereby given that the annual meeting of the members of Illinois Agricultural Mutual Insurance Company will be held on Wednesday, the 25th day of January, 1933, at the hour of 1:00 o'clock p. m., at the Pere Marquette Hotel, Peoria, Illinois, to elect directors, receive, and if approved, confirm the report of the board of directors of the company for the fiscal year ending December 31, 1932, and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the company; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, November 26, 1932.

GEORGE F. TULLOCK, Secretary.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL HOLDING COMPANY

NOTICE is hereby given that the annual meeting of the stockholders of Illinois Agricultural Holding Company will be held on Wednesday, the 25th day of January, 1933, at the hour of 11:00 o'clock a. m., at the Pere Marquette Hotel, Peoria, Illinois, to elect directors, receive, and, if approved, confirm the report of the board of directors of the company for the fiscal year ending December 31, 1932, and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the company; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, November 26, 1932.

GEORGE F. TULLOCK, Secretary.

NOTICE OF ANNUAL MEETING OF ILLINOIS FARM BUREAU BASEBALL LEAGUE

NOTICE is hereby given that the annual meeting of the members of Illinois Farm Bureau Baseball League will be held on Wednesday, the 25th day of January, 1933, at the hour of 9:30 a. m., at the Pere Marquette Hotel, Peoria, Illinois, to elect officers and directors, receive, and, if approved, confirm the reports of the officers and executive committee of the League for the fiscal year ending December 31, 1932, and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the League; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, November 26, 1932.

E. G. THIEM,
Secretary.

Indiana Grain Co-ops Vote To Consolidate

Merger of the Central States Grain Association and the Indiana Farmers Co-operative Elevator Company, the two Hoosier State stockholders of Farmers National Grain Corporation, was announced Nov. 18 by C. E. Huff, president of the corporation. Boards of directors of both organizations have approved the merger, which becomes effective at once.

The consolidation brings together in one statewide marketing organization co-operatives of the two major types, the Central States association representing the so-called pooling plan and the elevator company, as its name implies, the farmers' elevator groups.

The Central States Grain Association was organized early in 1924 under the name of the Indiana Wheat Growers Association and now embraces in its membership about 13,000 grain growers in Indiana, Southern Illinois and Western Ohio, together with a number of local farmers' elevator associations.

The Indiana Farmers Co-operative Elevator Company was organized in 1929 and is made up of about twenty farmers' elevators in Northern Indiana. It is estimated that the two groups handle co-operatively approximately one-third of all grain marketed commercially in the state. Membership campaigns involving both individuals and farmers' elevators are now under way and the volume handled is steadily increasing.

ABOVE is a duplicate of a draft drawn by our adjuster to settle a public liability claim against our insured. Suit for $10,000 was started but the case was settled out of court.

An average of 500 to 600 accidents involving Illinois Agricultural Mutual policyholders are reported each month. Approximately 1,000 checks are written every 30 days to pay losses, attorneys' fees, adjusters' fees, hospital bills, court costs, and the numerous expenses incurred in operating your company.

Safeguards Farm And Estate

Some checks are large, many are small. But every policyholder with **full coverage protection** knows that the ILLINOIS AGRICULTURAL MUTUAL keeps its word . . . . stands between him and loss . . . . protects his farm and estate against confiscation growing out of liability from automobile accidents.

How much is it worth to have such protection? Certainly far more than the cost. You can save money by insuring in your OWN COMPANY. Ask us to tell you how.

A post card to your County Farm Bureau or to the address below will bring you full information.

HERE'S A THOUGHT ABOUT MOTOR OIL

worth while for every farmer to

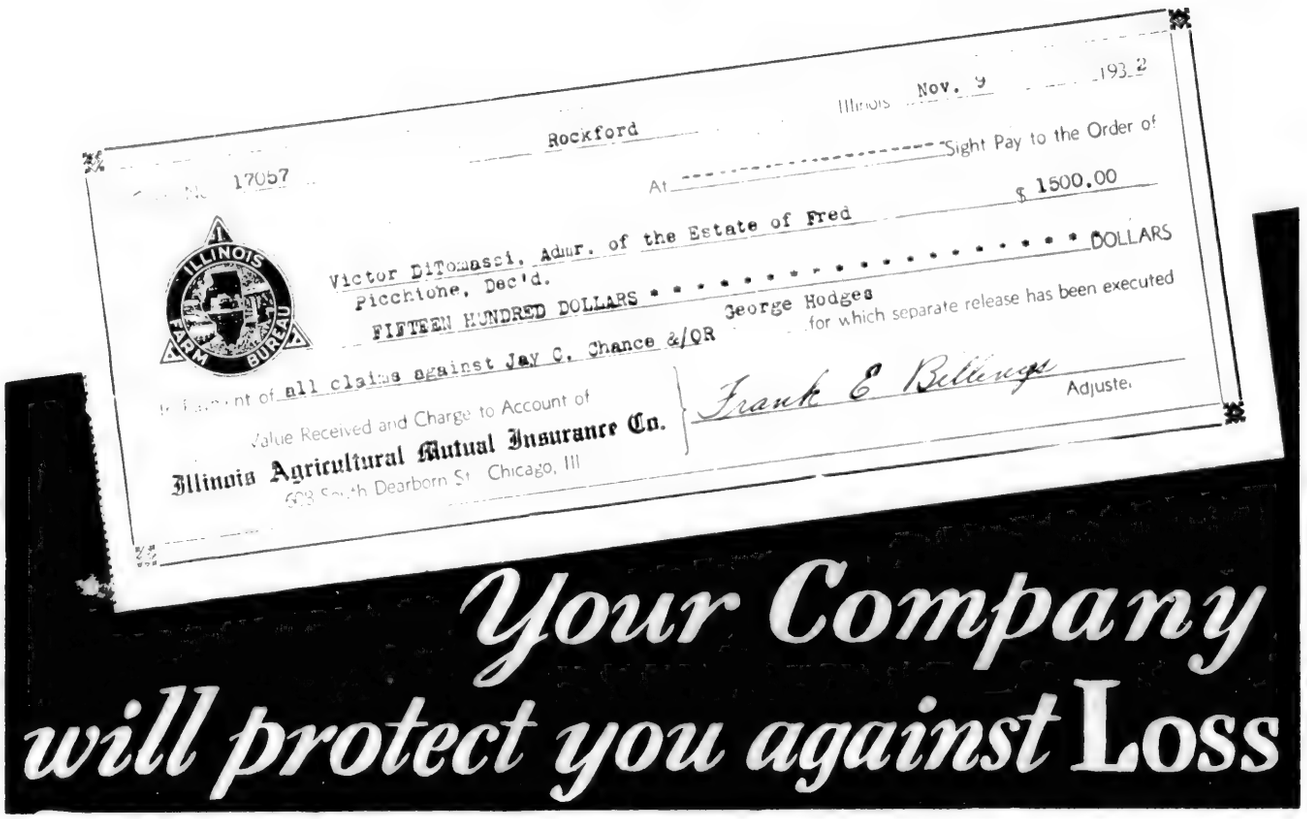
PASTE IN HIS HAT

EVERY farmer should be on his guard against cheap, inferior motor oils. Cheap oil has its appeal but it takes quality to satisfy.

Under the heat and friction of the modern high speed, heavy duty motor cheap oils quickly thin out and break down. They cause a host of motor troubles—scored cylinders, "frozen" pistons, smashed connecting rods, broken crank shafts, and other serious motor damage.

Illinois Farm Supply Company and its associated companies sell the best oil money can buy. You can buy Penn Bond (100% pure Pennsylvania) and Blue Seal (pure paraffin) oils with safety—the same high quality Summer and Winter, year in and year out, with a new and far lower cold test.

Save Money ORDER NOW



IF YOU want to save money place your order now for next season's requirements. Telephone your local Farm Bureau company or ask your SERVICE man for these special prices. Don't take chances with cheap, inferior oils; make the SERVICE sign your guide to safe lubrication.

Inquire about these oils and lubricants for every Winter use.

"Every individual owes something to the industry from which he gets his living."

THEODORE ROOSEVELT

"I DON'T need the Farm Bureau," says Mr. Brown. "I have worked hard, paid for my farm. I am independent. I know how to farm efficiently. I have all the comforts and conveniences in my home. I can get along without the county adviser's help and the services of the organization. Why should I join?"

Such argument is heard less today perhaps than in the past. Yet there still are many who have achieved relative financial independence. Have they no further obligation?

Every farmer owes something to his industry . . . . owes his best efforts to improve farm conditions . . . . to make farming a business as well as a way of living.

How better can he make this contribution than through his organization, the Farm Bureau, the Illinois Agricultural Association, which gives purpose, force, and direction to the combined constructive thought of the membership.

Not to get, but to give. Not for self, but for others, for future generations. Such is the opportunity for service to agriculture offered by this organization.

Ask your neighbor to join.

Get Ready For Annual Meeting

Harriman, O'Neal, Smith And Others Will Discuss Economic Problems During Three Day Session At Peoria Jan. 25-26-27

CO-OPERATION between business and agriculture to restore a fair exchange value for farm products as a means of leading the nation back to prosperity will be one of the leading questions considered at the 18th annual convention of the Illinois Agricultural Association in the Pere Marquette Hotel, Peoria, January 25-26-27.

Henry I. Harriman, prominent New England business man and president of the Chamber of Commerce of the United States, is scheduled to speak on this subject at the annual banquet of the Association Thursday evening, January 26. Mr. Harriman is a man of advanced ideas on economic questions and reflects the views of the progressive business men of the country.

Born in Brooklyn, N. Y., in 1872 Mr. Harriman was educated at Wesleyan University and the New York Law School. His entire life has been devoted to manufacturing and public utility interests mostly in Massachusetts. In his recent addresses he has frankly stated that the greatest single factor responsible for the depression was the economic condition affecting between one-third and one-half of the nation's population directly or indirectly dependent on agriculture. Mr. Harriman also recognizes the need for constructive action in improving our money and credit system and stabilizing the value of the dollar.

Ed O'Neal Scheduled

Edward A. O'Neal, president of the American Farm Bureau Federation, will appear on the banquet program with Mr. Harriman. Mr. O'Neal is well known to Illinois farm people and will bring an interesting message direct from Washington where he, with other farm leaders, has had a prominent part in framing a legislative farm program in the current session of Congress.

Efforts are being made to secure a speaker of sound yet progressive views on the question of reorganizing the farm credit structure and refinancing farm mortgages at lower rates of interest. Prospects are considered good for securing a man high in the councils of the new national leadership. This subject will be given prominence on Friday morning, January 27.

The annual address of Earl C. Smith, president of the Association, on Thursday morning, January 26, will be of widespread interest because of the active part he has had during recent months in working out solutions of farm problems with national farm, business, and political leaders.

Mr. Smith will review not only the record of progress of the Association and its business enterprises during 1932, but also will devote considerable time to a discussion of up - to - the - minute developments at Washington in price-raising legislation, reflationary and farm credit measures.

Crank up the Flivver

Luncheon Discontinued

The usual luncheon on the last day of the convention with introduction of guests and speakers will be discontinued this year. Part of this program will be held in connection with the annual banquet.

Election of officers, and directors from the odd-numbered districts, as in past years, will probably be held on Thursday evening after the banquet and speaking program.

The sectional conferences on Thursday afternoon will not be varied since these sessions are particularly designed to give every member ample opportunity for expression on any part of the work or policies of the Association. Conferences will be held on Public Relations, Organization and Publicity, Business Service, Marketing, and the Women's Conference. District caucuses for delegates are usually held following these sessions where nominations are made for the board of directors.

Get In Resolutions Now

The Public Relations Committee of the Association met in Chicago on December 22 to consider legislative problems and measures which are expected to come before the next regular General Assembly which convenes this month. Revenue for unemployment relief, insurance laws, government economy, proposed amendments to the state constitution, and similar questions are among those which are likely to be discussed at the Public Relations Conference on Thursday afternoon January 26 at Peoria. Voting delegates will pass on the legislative policies of the Association submitted in the form of resolutions.

The Resolutions Committee composed of A. R. Wright, Varna; Harold C. Vial, Downers Grove; Charles Marshall, Belknap; Talmadge Defrees, Smithboro; W. A. Dennis, Paris;

There will be reduced rates on most railroads. Ask for them.

Charles Bates, Browning; and A. B. Schofield, Paxton, will hold its first meeting in Chicago, Saturday, January 14 when resolutions offered will be given consideration.

Members who have resolutions to offer for consideration of the board of delegates, the supreme governing body of the organization, should send them to Secretary Geo. E. Metzger at the Association offices at once.

Members of the Credentials Committee for the convention are as follows: M. G. Lambert, Ferris; C. J. Gross, Atwood; W. L. Cope, Salem; and Fred Dietz, DeSoto. The number of voting delegates eligible to representation in the annual meeting will be based on the paid-up membership in each county as stated in the by-laws.

A Busy Day

The annual meeting of the Illinois Farm Bureau Baseball League will start off the day on January 25 when the associated companies all organized by the I. A. A. will hold their annual meetings and conferences. This day promises to be busiest of all for the delegate or visitor whose interests are divided between auto insurance, fire, hail, and windstorm insurance, auditing the accounts of co-operatives and farm organizations, produce marketing, serum service, life insurance, and baseball. Meetings and sessions of companies and associations representing all these services and activities will be held that day, many of them simultaneously. In addition there will be a meeting for managers of the county service companies sponsored by Illinois Farm Supply Co.

Programs for these sessions are now being prepared but none has been definitely outlined so as to be ready for publication at this writing.

Speed Up Friday Session

Complaints of previous years that the Friday afternoon business session was allowed to drag on too late into the evening making it necessary for many delegates to stay an extra night, will be met this year by the abolition of the luncheon and the long drawn out introduction of guests. After the Friday morning session it is planned that delegates and visitors will get their lunch quickly and return to start the afternoon session promptly at one o'clock. This arrangement should make possible adjournment of the convention by four or five o'clock.

The fact that Peoria lies in the heart of one of the most populous Farm Bureau sections of Illinois indicates that attendance this year will be heavy. At least 5,000 delegates, members, and friends are expected to gather during the three-day session. Those who contemplate attending the convention are asked to make reservations at once with the Peoria County Farm Bureau, Peoria.

A Word From Our President

AS WE pause to look back over events of the past year and attempt to anticipate developments of the future, nothing stands out more impressively than the loyalty, the courage and the determination displayed by the membership of the Illinois Agricultural Association and County Farm Bureaus during the year 1932. The fact that Illinois now leads all states by a substantial margin in supporting Farm Bureau membership is a record of which we all should be proud; a record that should be a source of satisfaction and further encouragement to continue our united efforts toward correcting those evils which have all but impoverished the industry we love, and now engulf the Nation.

Agriculture has felt the full effects of deflation and depression which has crystallized in its most acute form during 1932. Failure of government for twelve years to face the farm problem fairly and squarely has resulted in forcing the farmers out of the market as buyers and this depleted buying power of nearly one-half of the population has finally resulted in the closing of a large per cent of our manufacturing industries and has paralyzed business in general. Almost single handed and alone, constructive farm organizations have for eight years anticipated such a condition, unless agriculture was recognized in such proper and just manner as would restore a balance between agricultural income and industrial prices entering into the cost of farm production. If nothing else, this general paralysis of business has resulted in focusing the attention of thinking business, industrial and political leaders on the farm problem and a rapidly growing conviction that a restoration of farm buying power is a first essential to the return of America to a normal basis.

Farmers have in the past been the backbone of America in meeting and overcoming serious dangers confronting the Nation. Their continued stamina, courage and determination, coupled with the fast increasing support of thinking business interests will again meet and overcome present difficulties. The time has arrived for directing our thoughts to facts and not fiction; for action and not debate.

To this end our efforts must be dedicated, for only through constructive thinking and united action can agriculture hope to gain its rightful position in the economic life of the Nation and can the Nation hope to recover.

Earl C. Smith

DIVIDEND NEWS

Many favorable reports have been received concerning the patronage dividends declared by local Farm Bureau service companies associated with Illinois Farm Supply Company, and other Farm Bureau organized co-operatives.

Among the companies that closed their books during the fall months, Adams Service Company, Rich-Law Service Company, Jersey County Farm Supply Company, and Marshall-Putnam Oil Company declared a refund of 20 per cent or more to Farm Bureau member patrons.

Some of the companies that have declared a patronage dividend of 15 per cent or more are: Champaign County Service Company, Ford County Service Company ($8,446.60), Fulton Service Company ($9,000), Greene County Service Company ($4,184.51), Henry-Stark Service Company ($10,966.50), Kane County Service Company, LaSalle County Farm Supply Company, Livingston Service Company, Logan-Mason Service Company ($8,500), Peoria County Service Company, St. Clair Service Company, Stephenson Service Company, Tazewell Service Company, Tri-County Oil Company ($17,550), Whiteside Service Company.

One thousand one hundred and sixty-three patronage dividend checks, totaling over $24,000, were distributed to Farm Bureau members in good standing in LaSalle County.

Champaign County Service Company has returned $24,561.71 to Farm Bureau members the past two years. Seven hundred and ten Farm Bureau members received dividend checks this year. One patron received over $250, two over $100, 41 over $50, and 102 over $25. The average refund for the past fiscal year was $16.47 per member.

Congress Works Over Farm Bill

All Major Farm Organizations Unite Behind Measure To Control Surplus And Raise Prices On Staple Farm Commodities

AGRICULTURE'S own solution for the Farm Problem was presented to the House Committee on Agriculture December 14, President Earl C. Smith reported following his return from Washington where he attended several meetings and conferences of farm organizations and co-operatives called by the American Farm Bureau Federation.

The plan was outlined before the committee by Fred Lee, legislative counsel for the A. F. B. F. who also represented farm co-operatives and other general farm organizations.

The plan is the result of many months of intensive study and was unanimously approved by representatives of the major farm groups the day before. The plan is based on the following definite principles:

Here Are Principles

1. The pre-war purchasing power of farm commodities in terms of goods the farmer buys must be restored insofar as the domestic market is concerned in order to permit a fair exchange of goods between farm and factory and so make possible a general renewal of business activity.

2. Production of farm products must be reduced in line with effective demand.

3. Plans to attain these objectives must be applied to basic products which have a price determining effect on other products, and on which the tariff is not effective because of exportable surpluses.

4. Plans adopted must be self-financing and must not require the creation of any large new governmental agencies.

The farmers' plan as outlined by Mr. Lee would apply to wheat, cotton, tobacco, hogs and possibly to dairy products, and is to be administered by the Secretary of Agriculture.

In the case of wheat, cotton and tobacco, it provides for the payment to producers of these commodities of special adjustment payments, on that portion of their production required for domestic consumption, sufficient to raise the total price to the pre-war purchasing parity. The adjustment payments will be made in two equal installments, the first thirty days after marketing, and the second six months later.

Favor Those Who Cut

Adjustment payments will be made only to those producers who shall submit satisfactory proof to the designated local agent of the Secretary of Agriculture that they have reduced their 1933 acreage by 20 per cent, and have not planted that acreage to other cash crops. Payments will be made by the treasury of the United States, the money to be recovered by an excise tax on the commodity at point of first processing.

The processing tax is to be the amount required, as estimated by the Secretary of Agriculture, to be paid in adjustment payments in order to restore the total price of that portion of the commodity used in domestic consumption to its pre-war purchasing parity. Revision of the excise tax and payments to producers in accordance with the principle is to be made by six-month periods. The excise tax will become effective at the beginning of the 1933 crop marketing season and will apply to flour stocks in the hands of processors at that time.

If, in the judgment of the Secretary of Agriculture, it is necessary, after the first year, to make individual allotments to producers and enter into individual contracts with them in order sufficiently to control production, he is empowered to do so, and to designate the percentage of acreage reduction required. Administrative expenses are limited to not more than 2½ per cent of the excise tax fund collected.

In the case of cotton, the parity period is to be 1921-29 instead of 1909-14, on account of the change in production costs caused by the boll-weevil.

Applied To Hogs

The plan is to be applied to hogs in the following manner:

Thirty days after passage of the act, the excise tax on pork products is to go into effect on a graduated basis, on the basis of 50 cents per 100 pounds of hog, live weight, for the first sixty days, $1.00 for the second sixty days, $1.50 for the third sixty days, and $2.00 thereafter, that rate to be advanced to the point necessary to restore pre-war purchasing power as rapidly as improved business and increased consumer income permits.

The production control program will go into effect thirty days after passage of the act, producers to be paid an adjustment payment from then until October 1 of $1.00 per cwt. on all hogs weighing 210 pounds or less, and in consideration of an agreement that each producer's total tonnage marketed during the year shall be 20 per cent less than during 1932.

Adjustment of hog production to effective demand is to be facilitated by the following temporary measures.

1. The Secretary of Agriculture is empowered, when and as necessary to prevent surplus pork and lard stocks from defeating the purpose of the plan, to purchase such stocks in the required amount and dispose of them in non-competitive channels, such as unemployment.

2. The close relationship between corn and hogs necessitates a reduction in corn production for 1933. This is to be accomplished by payment to corn growers who reduce their corn acreage by 15 per cent, of $4.00 per acre on the acres thus taken out of production.

Pre-War Parity Sought

This plan, in the opinion of farm leaders, will result in such adjustment of production to demand as is necessary to restore the pre-war parity between farm and industrial prices, and thus open the way to the resumption of business activity on a normal scale. Farm leaders are positive in their statements that there can be no approach to normal business conditions and employment until farm buying power is restored to normal. They point out that farm prices are now 31.6 per cent below pre-war, while goods purchased by farmers are 6 per cent above pre-war. Whenever restored employment and improved world trade raises the open market price of farm products to their pre-war parity, the plan will automatically become inoperative.

The plan is endorsed by the following farm organizations:

AMERICAN FARM BUREAU FEDERATION
Edward A. O'Neal, President
Charles E. Hearst, Vice-President
Earl C. Smith, Director and Chairman of Legislative Committee
George M. Putnam, Director and Member of Legislative Committee
M. S. Winder, Secretary-Treasurer.
Chester H. Gray, Legislative Representative

Unemployment Relief

THROUGHOUT the third special session of the General Assembly ending last April and the more recent 4th special session, the Illinois Agricultural Association opposed the enactment of any bills creating a system of additional state-wide taxes for unemployment relief.

The Association will continue to oppose the enactment of a state-wide sales tax for this purpose or of any tax which would relieve counties, townships, or other municipalities from the necessity, at least to the extent of their ability, of caring for their own.

The I. A. A. is convinced that sufficient provision has been made in statutes now in existence to take care of destitute people in most counties. In addition to general property taxes for relief, which are subject to limitations and restrictions in counties, but not in townships, counties may, until July 1, 1933, divert to unemployment relief their gasoline tax allotments not otherwise obligated.

Until January 1, 1934, any county may issue bonds without referendum by a two-thirds vote of its county board, the total of such bonds not to exceed six times such county's share of gasoline tax receipts in the preceding calendar year. Such bonds and interest thereon must be guaranteed by general property taxes, but can be and no doubt will be paid out of future gasoline tax allotments to such county.

In addition counties may enforce a retail sales tax of not more than one per cent which may be levied by a two-thirds vote of the county board to be effective to July 1, 1933.

The theory of providing relief through a state-wide tax and from a state-wide fund is wrong in principle because it places counties in competition with each other in securing their share of such funds. Such a plan is wrong because it takes away responsibility from local units of government in caring for their unemployed; it definitely leads to waste and extravagance in the administration of such funds.

This whole question, affecting as it does, the farm tax burden, will be discussed in detail at the public relations conference to be held during the coming annual meeting in Peoria. This problem and many others involving the levying and collecting of taxes reveals the need for vigilant and effective organization to protect farmers' interests at Springfield.

Growing Liberalism

THE NEW liberalism displayed by business and political leadership throughout America toward solutions of farm problems may be set down as one of the gains produced by the current hard times.

The cocksureness of their own position, and the intolerance toward organized farm effort once prevalent in financial and industrial circles has been largely supplanted by a new and commendable attitude of co-operation.

No writer is doing more to promote liberal and constructive thought on national economic and political problems than Walter Lippman of the New York Herald Tribune whose articles are syndicated and published in daily newspapers throughout the country.

Commenting on the domestic allotment plan for raising farm prices now being considered at Washington, Mr. Lippman recently wrote:—"Because of its potential abuses and actual difficulties many persons, especially in the larger cities, will be disposed to reject the scheme out of hand. This would, I think, be a serious mistake. The plight of the American farmer is so serious that an experiment, provided it is based on a reasonable principle, is justified. The basic principle of the allotment plan is reasonable; if the farmers wish to try it, I do not see how the rest of us can refuse to let them.

"For American agriculture is now producing under conditions of unrestricted individualism in a world where virtually all other production, including agriculture in almost all countries, is either protected or controlled. The American farmer should not be denied the right to set up his own collective defenses against the efforts of free competition until the time arrives when other producers accept free trade.

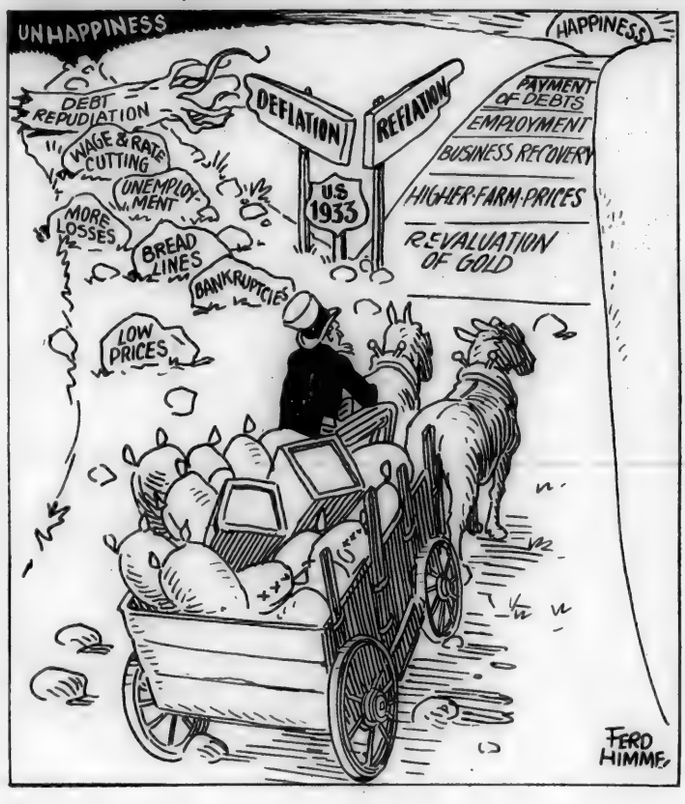
"The allotment plan has all he faults of protection and all the complexities of state socialism. There is no use pretending that this is not the most daring economic experiment ever seriously proposed in the United States. But what other remedy is proposed for the plight of agriculture that might be substituted for this one? Until such a remedy is brought forward, and some assurance given that it can be put into operation, an attitude of open-minded co-operation with the men who are trying to work out this plan, an attitude at once sympathetic and critical, would seem to be in order."

The year 1933 promises to be an interesting and crucial one in the life of this nation. With it we begin the fourth consecutive year of a period of deflation unprecedented in American history. Whether or not we shall continue on the downward path beset as it is with low prices, business stagnation, unemployment, bankruptcies, wage and rate cutting, scaling down of debts, and headaches will be largely determined by the incoming administration and its policies.

While controlled inflation or reflation which can be brought about by revaluing gold may not cure all our troubles overnight so easily as the cartoonist has pictured it in the accompanying illustration, that course offers more hope than the one we have been following.

It is clear now that the policy of bolstering up our financial institutions with huge government loans is only a stop gap to put off the evil day of reckoning. These loans presuppose a return to higher price levels. So did wheat and cotton stabilization. For ten years the farmer particularly has been given all kinds and varieties of credit legislation and loans to make it easier for him to go in debt. But little has been done to aid him in paying back his borrowings. Lower interest rates and higher farm prices alone will do this. So reflation to the average 1920-29 price level seems to be the solution of a difficult problem.

Such a course will result in some injustices for no law or action can be applied to fit perfectly every case. The greatest good to the greatest number should govern. Certainly the interests of the large number who have been caught in the whirlpool of toppling prices through no fault of their own outweigh those of the smaller group of creditors who have loaned money at present low levels.



There are powerful individuals and groups whose influence will be trained on the new law-making body and administration at Washington to defeat any efforts at establishing higher price levels. These people belong largely to the creditor class. They are always at work. It is possible, not probable, that they may thwart not only reasonable inflationary measures but also present efforts at raising farm prices. What then?

Agriculture will be no worse off than it is now and the farmers' position likely will be improved. Deflation apparently has run its course in agriculture but not in freight and utility rates, taxes, farm machinery and supplies, lumber, fencing, etc., which must yield considerably more ground before they are on a fair exchange basis with farm products. American ingenuity will solve the problem eventually of producing services, machinery, and commodities at prices we can afford to pay.

This readjustment in exchange values will not solve the debt problem, however. That situation can and will be corrected by scaling down interest rates, or through moratoriums on interest and principal payments until we work back to higher price levels. The gradual climb will begin just as soon as everything is thoroughly deflated and we all are buying and selling again on a fair exchange basis. Not before. But this is the long hard road. Why should we take it when the government has the power to provide a smoother and shorter road?

Opposition to the application of the domestic allotment plan to hogs was expressed by leading packer representatives before the House Committee Dec. 19 and 20.

The packers asserted the proposed excise tax of two cents per pound would result in a lower quoted price to producer on live hogs "because low buying power of the public could not absorb additional cost."

The packers have issued a pamphlet attacking the plan among rural banks and corn belt farmers.

At The Livingston County Farm Bureau Jubilee In Pontiac, Dec. 10

Beauty Contests Attract Large Numbers To County Jubilees

NEARLY 50,000 people turned out for the Farm Bureau-Country Life Jubilee meetings in at least 55 counties on Saturday night, Dec. 10 when winners of local beauty contests were chosen. It is estimated that approximately 850 girls, all daughters of Farm Bureau members or Country Life policyholders, took part in the contest.

The Jubilee meetings climaxed a 10-day drive for new business by Country Life agents. More than a million and three-fourths dollars of insurance for the month was reported over the radio that night by Manager L. A. Williams in the half-hour broadcast from WLS. By Dec. 19 this total had climbed to $2,100,000.

The beauty contest winners will compete in the state contest to be held either at the Illinois State Fair next summer or at the Century of Progress Exposition in Chicago.

Radio Program

During the half-hour radio program talks were made by President Earl C. Smith, Manager L. A. Williams, and V. Vaniman, director of insurance service. Mr. Williams who acted as announcer, discussed the value of life insurance, told about recent progress of the company, and read telegrams and announcements.

President Smith reviewed the record of the company in which he paid tribute to the farmers of Illinois who by their wholehearted support made possible its progress and achievements.

The object of the beauty contest as explained by Mr. Vaniman is to arouse interest in the development of personality, health, culture, gracefulness, naturalness, charm, modesty, poise, etc., in the young women of rural Illinois. To be eligible girls must be between the ages of 16 and 30 and unmarried.

"Although recognizing the many opportunities for improving and increasing the social features of the I. A. A.'s program," said Mr. Smith, "the very force of conditions adversely affecting the welfare of farm people and rural interests generally, have caused the program to become somewhat overbalanced in efforts to meet and solve our economic problems.

"We have continued throughout the years, however, to actively sponsor and support 4-H club activities for both boys and girls, vocational training for older boys and young men, and in recent years have encouraged the setting apart of at least one evening each year to recognize and pay tribute to the fine young womanhood of rural Illinois.

"The first essential to grace and attractiveness is good health. Health is necessary to long life. If for no other reason, this fact would justify giving special emphasis and support to this evening program in the many counties."

County Winners

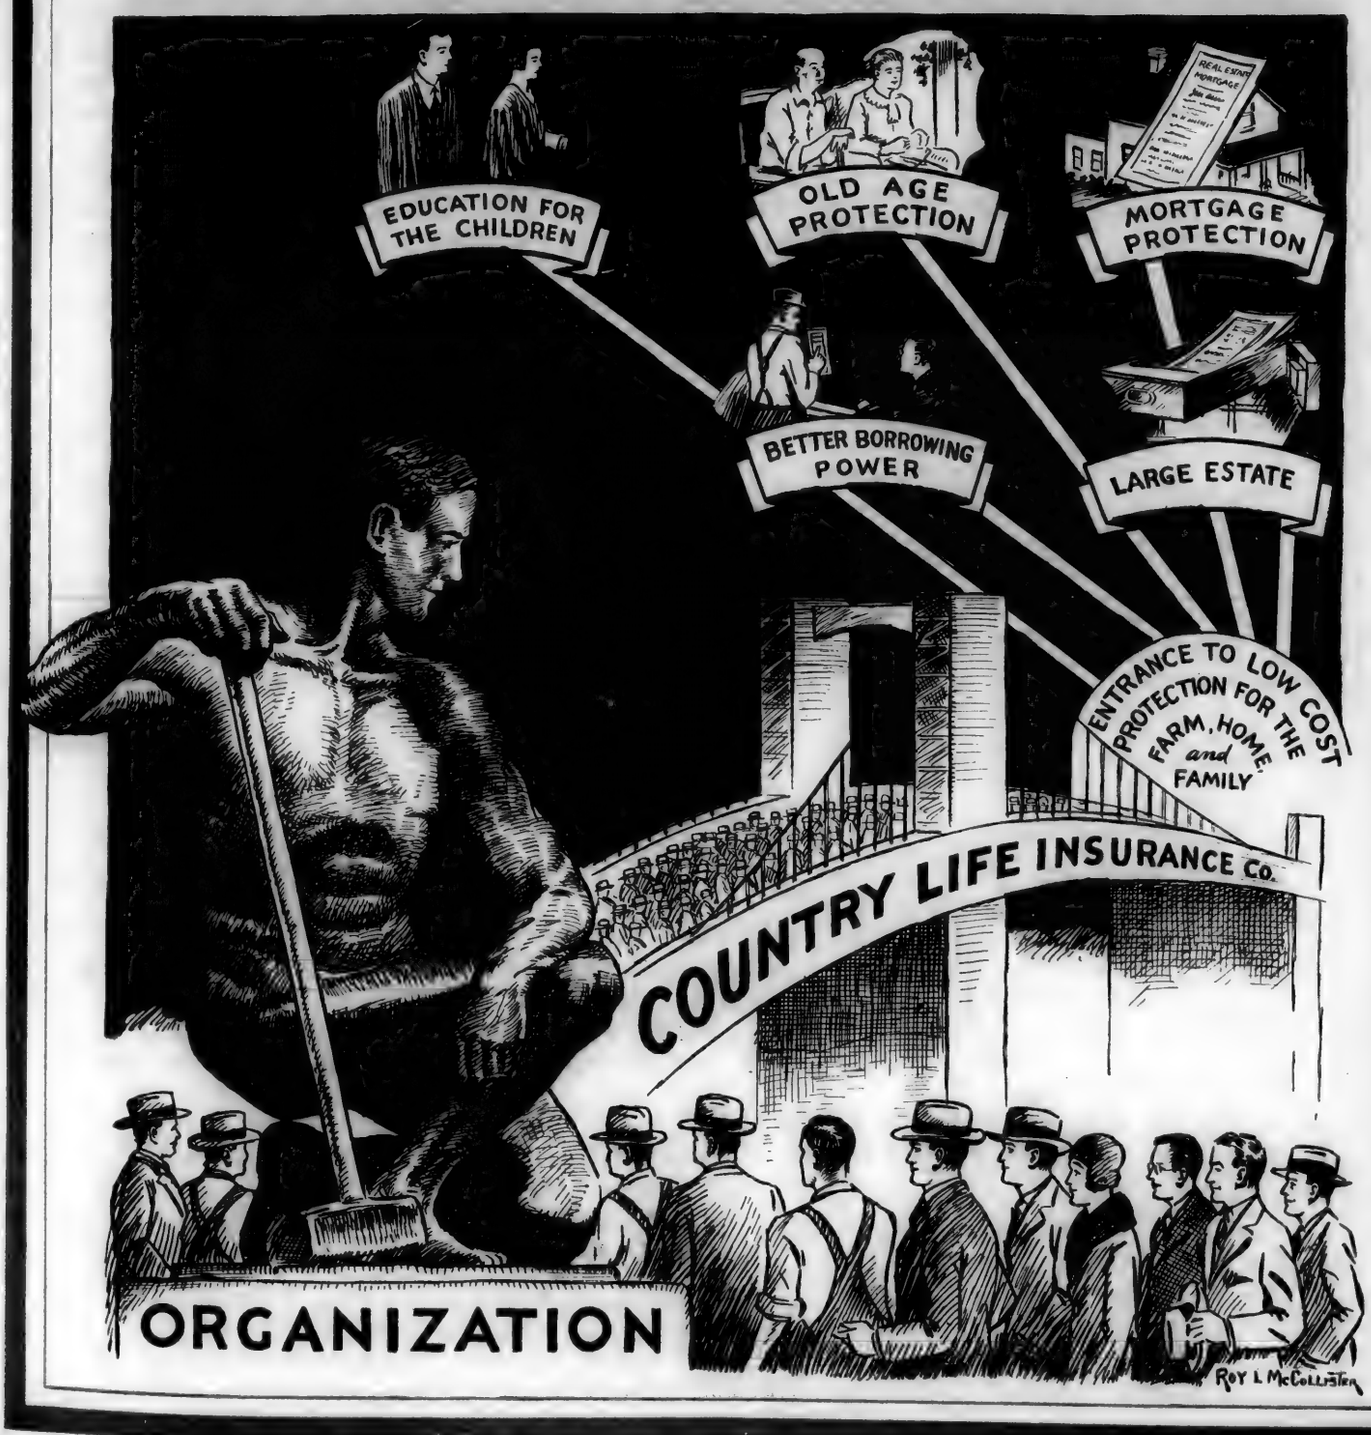
County winners of the beauty contest are as follows: Bond, Clarice Brewer; Bureau, Althea Minkler; Carroll, Alma Williamson; Cass, Alta Jokisch; Christian, Irene Emmerson; Coles, Martha June White; Cook, Alice Ettema; DeKalb, Hazel Jandt; DeWitt, Margaret Hoge; Edgar, Pauline Beatty; Edwards, Mary Ann Shepherd; Ford, Mildred Noland; Gallatin, Thelma Rodgers; Greene, Mary Strang; Henderson, Wilda McKeown; Henry, Maxine Radue; Iroquois, Edythe Baylor; Jackson, Bonnie Mae Allen; Jefferson, Catherine Simmons; Jo-Daviess, Doris Rife; Knox, Mary Catherine Davis; LaSalle, Ruth Anderson; Lake, Eleanor Van Zandt; Livingston, Lucille Hollaway; Lawrence, Martha Cunningham; McDonough, Bernice Arnold; McLean, Lucille Burnett; Madison, Marie Schafer; Marion, Gladys Jarren; Massac, Ruth Moller; Menard, Mildred Grosboll; Mercer, Elizabeth Rathbun; Montgomery, Ruby Mindrup; Morgan, Marjorie Saunders; Peoria, Dorothy Heinz; Pike, Genevieve Lewis; Richland, Erma Roby; Rock Island, Grace Bollman; St. Clair, Elsie Schaller; Stark, Mable Irene Oertley; Stephenson, Edith Bear; Tazewell, Mary Louise Wertsch; Washington, Erna Heggemeier; Wayne, Juliana Crippin; White, Lena Burger; Whiteside, Beth Clark; Williamson, Marie Wagley; Woodford, Ruth Haas.

Country Life Insurance Co. is expected to finish the year with more than $10,000,000 of new business written with total life insurance in force of more than $47,000,000 and with a net gain of at least $3,000,000 of insurance in force since last January.

On November 30 the company had a total of 28,943 policyholders who carried a little more than $46,000,000 of insurance. The average policy in the company is less than $2,000. Premium income for 1932 was close to $1,000,000, mortality under 25 per cent of expected, interest earnings on investments approximately four per cent without a single investment in default in interest or principal, and a lapse ratio of under 15 per cent.

Assets of the company as of November 1, 1932 were $1,731,458.54 or approximately 50 per cent greater than a year ago with an increase in surplus of $139,315.99 or about 75 per cent greater than that of January 1, 1932.

Missouri Supreme Court Upholds Income Tax



The Missouri Supreme Court recently upheld the constitutionality of a state income tax law including a 1931 amendment which substituted an increased, graduated schedule of individual tax rates varying from one to four per cent of net income, for the former flat tax rate of one per cent.

This ruling was the first by the Supreme Court on the new Missouri income tax law which became effective September 14, 1931. Missouri has a revenue clause in its state constitution very similar to that in Illinois.

Judge Ragland stated that the legislature was empowered to classify the subjects of income taxation and that a tax which was uniform upon all subjects in the same class, even though not uniform as between the different classes, did not violate the uniformity provisions of the constitution, if the classifications were reasonable.

The basic principle underlying all such classifications is the ability of the taxpayer to pay. He held the classifications provided by the amendment were not discriminatory.

Organization has built the Bridge that leads to real Protection

A Gain Every Month Sinc

47 million of insurance in force—1932 increase i
75 percent—No investments of any kind
management all go to

The record of Country Life Insurance Company is a creditable one. It demonstrates the value of united action. Low costs are possible because insurance like any other commodity can be purchased co-operatively. Sponsored by ninety-four county Farm Bureaus of the Illinois Agricultural Association and their more than sixty thousand members, Country Life Insurance Company is living proof that farm people can provide through their own efforts family security of the same high type enjoyed by those who pay stiffer rates.

You Can Help Reduce Costs

Realize what Country Life really holds out to you. Here is a company functioning as a legal reserve institution. It is on a self-supporting dividend paying basis. The initial expenses of getting under way are all behind it. Overhead—cost of running an office with forty-seven million of insurance policies in force — is already far below the usual cost per policy. The same people, same offices, same management can handle additional business at little or no increase in cost. That is why every additional new policy taken out in Country Life means the reduction of cost to present policy holders.

Larger Volume—Lower Rates

Thus not only an original low overhead in management and operating expense works in favor of policy holders in Country Life, but also the most powerful of all expense reducers — large volume. Every time you get an applicant for Country Life

Again we make new records! A better than 50% increase in percentage of lapse to amount in force, lower mortality, lower to make a gain last year. Ten million new paid business in 193 magnificent showing. Will you help us establish a still bigger

Ordinary Life Policy

Typical Rates
Per $1,000 of Insurance

Age	Quarterly Rate
20	$3.66
30	4.70
35	5.47
45	7.90

This policy has loan values, extended insurance and pays dividends at end of second year contingent upon payment of third premium. Example: Age 35 annual rate per $1,000 $20.63. Dividends at end of second year, contingent dividend amount is $2.63, leaving the net cost of a policy issued 1929 $18.00. At end of third year, contingent dividend amount is $2.83 leaving the net cost of the policy issued in 1929 $17.80 annually.

20-Pay Life Policy

Typical Rates
Per $1,000 of Insurance

Age	Quarterly Rate
20	$5.79
30	6.92
35	7.69
45	10.06

A Paid Up Policy at the end of twenty years, or policy may be surrendered at that time for its cash value, plus any and all dividend accumulations.

This policy earns a dividend payable at the end of the second year the insurance is in force, contingent upon payment of third premium.

Since Starting in Business

rease in assets 50 percent—Increase in surplus y kind in default—Benefits of economic go to policy holders.

Insurance you are helping yourself, you are making it possible for your family and yourself to enjoy standard protection in an old line legal reserve company at **still lower rates.**

Safe Insurance for Every Member of the Family

Country Life Insurance Company was organized to provide for every member of the farm family a safe insurance, low in cost. In Country Life you can insure every member of the family, babes in arms or men and women, up to the age of sixty-five. Rates for men and women are the same for the same ages. All policies start with low participating rate. At the end of the second year each policy is eligible to dividends that still further reduce cost.

Assets and Surplus Increased

The healthy growth of Country Life is evident from the record. It is a remarkable record . . . An increase every month since it started doing business. In the short time of only four years more than forty-seven million dollars of insurance has been written and is in good standing today. During 1932, an exceptionally bad year for most businesses, including insurance companies, Country Life showed a gain in assets of over 50% and a gain in surplus in excess of 75%. That is definite evidence of careful management and low administration costs. Policy holders are effecting much of this savings for themselves by continually adding to the volume of insurance in force.

% increase in assets, a 75% increase in surplus—low cost, low rtality, lower expense per thousand, one of the few companies siness in 1932. I congratulate the policyholders on such a still bigger record for 1933?

(Signed) L. A. Williams,
General Manager.

Endowment at Age 65

Typical Rates Per $1,000 of Insurance

Age	Quarterly Rate
20	$ 4.36
30	5.99
35	7.30
45	12.05

This Endowment at Age 65 Policy will provide an old age income for you if you survive and it gives protection to your dependents if you do not survive.

In other words, this policy pays the full amount of $1,000 (or multiples thereof) at age 65 or at death. Dividends are payable at the end of the second year the insurance is in force, contingent upon payment of third premium.

Term To Age 65 Policy

Typical Rates Per $1,000 of Insurance

Age	Quarterly Rate
20	$2.73
30	3.20
35	3.55
45	4.66

This policy furnishes protection for a small annual outlay of money and still gives maximum security. It is convertible to any other standard form at any time and carries full face protection to age 65 if not converted. This policy pays dividends at end of second year, contingent upon payment of third premium, provides for cash and loan values and paid up insurance.

It's Not the Size of the Dog in a Fight

There is an old saying, "It's not the size of the dog in the fight but the size of the fight in the dog," which applies here. Country Life has the fight because it has its finances in shape. When business institutions are being tested in such times of stress as those of the past three years, it is the giant strength of Country Life with its showing of no defaults and its surplus to liabilities that makes it superior to even the oldest institutions when it comes to fighting ability. In this crisis Country Life has kept in the top rank of companies with high liquid financial strength. A conservative management assures every Country Life policy holder that he need not fear for his cash nor that his beneficiary need worry about his death claim being paid. Country Life Insurance Company is organized and operated as a legal reserve life insurance company for your benefit for the protection of your family, for the security of your estate.

Country Life Offers Unexcelled Security

Country Life Insurance Company though only 4 years old holds an unequalled position of strength owing to its liquid financial condition, its large surplus as compared with liabilities and the wonderful portfolio of investments.

This Company was built to save policyholders from error in matters of insurance. We invite all Illinois farmers to Participate in our great Security, our Low Cost and our Guaranteed Rates.

I. A. A. Gives Dinner To Illinois 4-H Champs

Some of Best Lessons to Be Learned on Farm, Dean Tells Club Members

Some of the best lessons are to be learned on the farm and in the farm home, Dean H. W. Mumford of the Illinois College of Agriculture told his audience of more than 200 Illinois 4-H Club members, leaders, farm advisers, I. A. A. officials, staff members and their guests who attended the annual banquet tendered the Illinois champions by the Illinois Agricultural Association and associated companies in the Great Northern Hotel December 1.

"One of the lessons every boy and girl should learn is to be prompt," said the Dean. "As a boy I worked on the stack with my father. He stacked with a fork and he always wanted the bundles where they belonged, and he wanted them on time.

"The older you get the more you will realize how much there is to learn and how little you know. You will learn that you must work for what you get. Nothing is handed to you on a silver platter. You perhaps have had more of that sort of thing this week than you will have for some time."

Dean Mumford called attention to the fact that while attendance in the University of Illinois has dropped off from 10 to 12 per cent registration in the Ag College this fall was only two less than a year ago. Jobs in other lines are scarce now, he said, and many boys are learning that there is no better place than on the farm.

Interesting talks were made by Lloyd Atwell and Alda Von Ohlen for the Club members.

President Earl C. Smith presided and introduced I. A. A. directors, members of the staff, and managers of the associated companies who cooperated in sponsoring the dinner. Each responded with a short talk.

E. I. Pilchard and Miss Mary McKee, state club leaders, and Homer J. Tice, veteran member of the Illinois Legislature and superintendent of the Illinois State Fair, assisted in awarding the medals.

C. B. Denman, livestock member of the Federal Farm Board, and managers of several Producers' Commission Associations in Illinois were guests.

The dinner, entertainment, and the program as in past years were arranged by Ray E. Miller, director of livestock marketing.

The following organizations cooperated in sponsoring the dinner: Illinois Farm Supply Company, Illinois Agricultural Mutual Insurance Company, Country Life Insurance Company, Farmers Mutual Reinsurance Company, Illinois Grain Corporation, Soybean Marketing Association, Illinois Livestock Marketing Association, Illinois Farm Bureau Serum Association, Illinois Agricultural Auditing Association, Illinois Produce Marketing Association, and Illinois Fruit Growers' Exchange.

I. A. A. WINS SILVER TROPHIES

For "Outstanding Publicity on a State Project," and for the "Best Single Issue of A State Farm Bureau Publication," these cups were awarded to the Illinois Agricultural Association during the recent A. F. B. F. convention in Chicago. The I. A. A entered two of the three publicity contests winning both in competition with eight other State Farm Bureau Federations. An exhibit and description of the publicity campaign used in putting over the state-wide Dedication Day Celebration July 4, and the September issue of the I. A. A. RECORD were submitted.

Judges were Dean H. F. Harrington of the Medill School of Journalism, Northwestern University; Ralph D. McManus, publicity director, Armour & Co., and Ross Bartley, director of publicity, Century of Progress Exposition, Chicago. Nevada won the third contest for best publicity on a national project.

"Personality" Can Be Developed Says Prof.

Personality may be partly an inborn quality but much of one's personality is acquired through living, says Prof. Paul J. Kruse of New York State College of Agriculture in advising farm boys to develop "personality."

Growth of anything, he says, plant, animal, or human depends upon the condition surrounding it. Good seed may fail to make a good plant through improper cultivation; bad handling of a colt may result in a mean disposition horse; likewise a young man of promise may fail to become successful in his work and as a citizen through failure to cultivate his mind and personality. Man is in some degree master of his own destiny.

David C. Shepler of Logan county who for many years was active in soliciting memberships for the Illinois Agricultural Association recently passed away following a heart attack at his home in Lincoln. He was 64 years old.

Mr. Shepler was an active member of the Logan County Farm Bureau which he assisted in organizing many years ago.

Whiteside County Folks Help Injured Neighbor

Fifty men and 19 women with 17 wagons gathered at the home of Frank Allen near Lyndon in Whiteside county recently to help him finish picking corn when Mr. Allen lost an arm in a mechanical corn picker.

The party picked 800 bushels of corn and hauled it to the cribs.

Frank is a son of Rep. Henry C. Allen who has represented the 35th senatorial district in the state legislature for many years. Both have been active in the past in Farm Bureau work in that county.

Mr. Allen recently returned home from the Sterling hospital where for a time his condition was very grave.

I. A. A. Float Wins

Float No. 1, "The Farmer's Dinner Bell is the Liberty Bell of 1932" designed for the Illinois Agricultural Association during the statewide 4th of July demonstration was used by the Washoe County Farm Bureau at Reno, Nevada on Sept. 1 and was awarded first prize in the parade.

An organization of corn growers is being formed in Nebraska, declares a press dispatch of Dec. 18, to get farmers in the corn belt to sign up for a 20 to 25 per cent reduction in corn acreage in 1933.

There is an old saying, "It's not the size of the dog in the fight but the size of the fight in the dog," which applies here. Country Life has the fight because it has its finances in shape. When business institutions are being tested in such times of stress as those of the past three years, it is the giant strength of Country Life with its showing of no defaults and its surplus to liabilities that makes it superior to even the oldest institutions when it comes to fighting ability. In this crisis Country Life has kept in the top rank of companies with high liquid financial strength. Whiteside County Folks Help Injured Neighbor

Fifty men and 19 women with 17 wagons gathered at the home of Frank Allen near Lyndon in Whiteside county recently to help him finish picking corn when Mr. Allen lost an arm in a mechanical corn picker.

The party picked 800 bushels of corn and hauled it to the cribs.

Frank is a son of Rep. Henry C. Allen who has represented the 35th senatorial district in the state legislature for many years. Both have been active in the past in Farm Bureau work in that county.

Mr. Allen recently returned home from the Sterling hospital where for a time his condition was very grave.

I. A. A. Float Wins

Float No. 1, "The Farmer's Dinner Bell is the Liberty Bell of 1932" designed for the Illinois Agricultural Association during the statewide 4th of July demonstration was used by the Washoe County Farm Bureau at Reno, Nevada on Sept. 1 and was awarded first prize in the parade.

An organization of corn growers is being formed in Nebraska, declares a press dispatch of Dec. 18, to get farmers in the corn belt to sign up for a 20 to 25 per cent reduction in corn acreage in 1933.

DAIRY Marketing

The Producers' Milk Company, a subsidiary of the Mid-West Dairymen's Company, Rockford, was incorporated recently with authorized capital stock of $40,000. This move was made following action of leading dealers in reducing the price from $1.50 per cwt. for base milk to a flat butterfat price. J. B. Countiss, dairy marketing director, is assisting the producers at Rockford.

The organized producers who number more than 400, immediately raised $5,000 in notes and cash at their initial meeting. Approximately 400 new membership contracts were signed providing for a check-off of five cents per cwt. and a differential to Farm Bureau members.

The plan provides for a plant and equipment to handle all members' milk. Producers volunteered to deliver their own milk from door to door with their own horse-drawn conveyances until more satisfactory equipment can be obtained.

As we go to press negotiations are underway leading to a reconsideration by the dealers of the price offered producers.

Co-op Creamery Soon To Open At Bloomington

The Farmers' Co-operative Creamery is expected to open early in January at 413 N. Center street, Bloomington.

Equipment is now being installed to handle an annual output of approximately 1,710,000 pounds of butter. The maximum capacity of the plant is reported at 5,700 pounds of butter daily.

The plant will have a maximum storage capacity of 1,800 gallons of cream and will require 800 regular patrons to keep it running. Six employees will be necessary to operate the machinery and office.

The building is located directly north of the Farm Bureau office. Butterfat from co-operative cream marketing associations in DeWitt, McLean, Woodford, and Livingston counties will be processed as well as surplus milk not otherwise sold by the McLean County Milk Producers' Ass'n. The Farm Bureaus of these counties are co-operating in getting this project under way.

Congressman Joins Rock Island Farm Bureau

Congressman-elect Chester Thompson of the 14th congressional district signed up in the Rock Island County Farm Bureau recently, reports Farm Adviser John H. Spencer.

DIRECTORS OF MID-WEST DAIRYMAN'S CO., ROCKFORD

Left to right, Front Row: Grant Westphal, Hugh Mainland, vice-pres., Wilbur Sawdey, president, Clayton Hoisington, secretary, Harry Fenton. Back Row: Maurits Nystrom, Harry Stevens, Wilkie Lee, Abel Larsen, Geo. Johns, Jr. Directors Wm. Nicholson and Harold Crandall were not present.

Livestock Marketing

New minimum weights of 10,000 pounds on straight or mixed loads of livestock from country points to Chicago on the Rock Island, Illinois Central, and C. B. & Q. railroads were recently secured by the I. A. A. Transportation Department. Previous minimum weights were 17,000 pounds.

Following this reduction the Chicago Producers announced a cut in commission charges to conform to the new freight minimums. The new schedule of charges placed on file with the Packers and Stock Yards Administration reduces the minimum charge on cattle from $17 to $10 per car. The schedule states when the car contains less than 20 head the commission charge will be nine cents per cwt. with a maximum of $17 and a minimum of $10. When a car contains less than 50 head of calves the charge shall be 35 cents a head with a minimum of $10 compared with the old charge of $17.

If the car contains less than 50 hogs the commission charge is nine cents cwt. with a minimum of $10 compared with the old rate of $15. In case of mixed livestock of single ownership the minimum was cut from $16 to $10 per car and in the case of more than one owner of unmixed stock the minimum has been reduced from $14 and $18 to $10. And on mixed cars from $17 to $10.

Orderly marketing during the next six weeks and the holding of many steers that can be profitably fed into the late winter was recommended by the Research Department of the National Live Stock Marketing Association on Dec. 14.

A general recovery of prices is expected in the late winter as a gap in supplies is expected at that time coupled with support from feeding demand and a relative scarcity of butcher stock. Recovery is expected in the hog market by late winter, although little improvement is indicated in the next four to five weeks. The trade generally expects reduced supplies for February and March. It seems advisable to continue to feed all lightweights and market only hogs that are well finished. Weight is not yet penalized. Early fall pigs will feed well for the late winter or early spring, and many late spring pigs can be steered for later marketing. The situation does not warrant any increased breeding for next spring's pig crop.

The lamb market continues to hold most of its advance and is in a rather strong position as supplies are expected to show further reduction as the fed-lamb season advances. Shortest marketings are expected in January. Supplies are not expected to be particularly excessive any time, but it will be well to go slow in taking out feeding lambs during the next 60 days. Lightweights might do well for late April or early May.

Illinois Corn To Europe

Farmers National Grain Corp. loaded 60,000 bushels of Illinois No. 2 yellow corn at New Orleans recently. The corn was bound for Liverpool and Manchester, England.

This was one of the first export shipments via barge from this state. Additional consignments are booked by Farmers National for export during the first half of January.

Bond Issue Vote, Victory for Organization

Downstate Leads Cook County In Giving Overwhelming Approval To Tax Reduction Measure

A GREAT victory for organization aided by a well-directed and effective campaign of publicity characterizes the favorable vote on the Emergency Relief Bond Issue in the election on Nov. 8. The effect of this decision by the voters will be to remove $25,000,000 of taxes from property in 1933.

Results of the smashing drive for passage of the measure led in most of the downstate communities by the County Farm Bureaus, finally have been tabulated by John C. Watson. They show that the measure received better than a 90 per cent favorable vote over the state as a whole; in the downstate counties 93.64% and in Cook county 86.70%.

The table beginning on this page contains the best information obtainable although there is still some doubt about the accuracy of the vote reported from several counties, said Mr. Watson. "It is believed that the table is substantially correct and that the counties are listed in the correct order."

What Table Discloses

The table discloses the following facts which are believed to be unmatched in the vote on any other bond issue or public policy question in the history of the State:

1. The bond issue received a constitutional majority of the highest legislative vote in every county of the State.

2. In twenty counties more votes were cast for the bond issue than for candidates for the legislature.

3. In the State as a whole, the bond issue received 90.35 per cent of the highest legislative vote. In Cook county the percentage was 86.70, and in the remainder of the State was 93.64.

Mercer County First

Mercer county gains first place with the highest percentage of its legislative vote given by any county of the State. The thirty-third senatorial district, consisting of Mercer, Henderson and Rock Island counties, secured first, second and thirteenth places respectively in the order of the counties, and first place in the order of the senatorial districts.

In districts which either voted for State senator or had more than three candidates for State representative, and hence had a real legislative contest, Henry county gained first place, Effingham county second place, and Pike county third place.

Menard Ahead Here

The highest percentage of all votes on the bond issue cast in its favor was secured by Menard county, with 98.27 per cent, followed closely by Mercer county, with 98.14 per cent, and Effingham county, with 97.78 per cent.

The campaign for approval of the bond issue removed $25,000,000 from this year's tax bill on property, more than $5,000,000 of which would have been on farm property. It was a worth while project for this purpose. However, it was much more worth while as a demonstration of what organization can do. It showed clearly that whenever properly drawn public policy questions which the Illinois Agricultural Association and other organizations can support, are submitted to the people, their approval by a constitutional majority, even against selfish opposition, can be assured by a well-planned campaign of education and organization for that purpose.

Tax Amendment Next

With the experience gained in the bond issue campaign, the Illinois Agricultural Association believes that the time is ripe for urging the long overdue modification of the State constitution in the revenue and one or two other articles.

President Earl C. Smith served as chairman of a representative State-wide committee to pass the bond issue. Much credit for the favorable vote in Chicago should go to Douglas Sutherland of the Civic Federation of Chicago who acted as secretary of the committee and to Fred Sargent, president of the Chicago & Northwestern Railway, who served as chairman of the bond issue committee in Cook county.

HOW COUNTIES VOTED ON THE EMERGENCY RELIEF BOND ISSUE

County	Senatorial District	Votes on Bond Issue For	Votes on Bond Issue Against	Highest Legislative Vote	Percentage of Highest Legislative Vote Cast for Bond Issue

reau members in Whiteside county participated in the distribution of $9,316.17 on a patronage basis and $1,648.54 for preferred stock dividends. Four hundred and twenty-eight non-members patronized the company the past year.

Seven hundred and sixty-two Farm Bureau members in St. Clair and Washington counties received patronage dividend checks totaling $8,185.51. One member received $88.

Madison Service Company, organized last April, has declared a 15 per cent patronage refund on lubricating oil, grease, Soyoil paint, stock dips, and mange oil, 12 per cent on gasoline, 10 per cent on kerosene, automobile tires, and other miscellaneous merchandise at the end of the first six months' operation. Twenty-five per cent of the net income for the period was set aside to surplus. Eighty-six per cent of the Farm Bureau members in Madison county received patronage dividend checks.

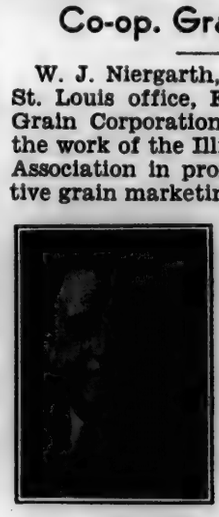
JoDaviess Service Company declared a 10 per cent cash dividend totaling $1,984.81 to Farm Bureau members.

Twin County Service Company (Jackson & Williamson) declared a five per cent (station) and 10 per cent (truck) dividend totaling $422.75.

Richland County Produce Association recently refunded $2,107.54; Rich-Law Service Company declared a 20 per cent dividend of $2,972.79; Richland County Shipping Association refunded $257.59 on commissions and $142.95 on sales of twine.

The Menard County Farm Bureau announces total cash dividends of $4,375.76 paid by the Menard County Farm Supply Company, the Springfield Producers' Commission Company, and the County Farm Bureau Shipping Association.

Coles-Douglas Supply Company declared a 15 per cent cash dividend totaling $1,828.25. Tuscola Co-operative Grain Company distributed six per cent on common stock.



Schuyler Service Company announces a five per cent cash dividend totaling $980 to Farm Bureau members.

Pulaski County Farm Bureau announces that Ullin Livestock Shipping Association paid a 20 per cent cash refund and Villa Ridge Fruit

Lauds I. A. A.'s Work In Co-op. Grain Marketing

W. J. Niergarth, manager of the St. Louis office, Farmers National Grain Corporation, paid tribute to the work of the Illinois Agricultural Association in promoting co-operative grain marketing, in a radio talk over KMOX, St. Louis, Dec. 12.

W. J. NIERGARTH

Commenting on the Illinois Grain Corp. and its development he said: "The Illinois Agricultural Association has played a leading part in establishing this service in Illinois, in carrying the co-operative marketing principle beyond the local point and into the terminal markets. Certainly without the backing of this strong and effective farm organization real co-operative grain marketing in Illinois by farmer-owned and farmer-controlled co-operatives would not have developed as rapidly nor as soundly as is the case."

Mr. Niergarth stated Illinois producers had not reaped the benefits of the privately-owned marketing system, "whose chief weakness, from the grower's standpoint, is found, not in its structure, but in its ownership, for while industry controls its own distributive machinery and takes the profits therefrom, the producer previously has found it necessary to turn his product over to the private handler for distribution."

Chicago Milk Price Cut Consumption Increases

The retail price of a quart of milk in Chicago dropped from 11 to nine cents on December 1 following a conference between officials of the Pure Milk Association and the organized milk distributors. The cut applies also to the suburbs of Chicago and to such cities as Waukegan and others.

The new prices are nine cents per quarter for milk instead of 11, a return to the 1917 level; six cents per pint instead of seven; half pints of cream 15 cents, a drop of one cent; and nine cents for buttermilk.

The milk wagon drivers' union the previous week had accepted the $5 wage cut to $40 a week, and the producers were asked to take a cut of 40 cents per cwt. for base milk.

Thus farmers assumed a reduction of about one cent per quart, drivers about five-eighths of one cent, and the dealers the balance.

"Members of the Pure Milk Association," declared W. C. McQueen, president and Don Geyer, manager, "have accepted a cut in their milk price which, in our opinion, is all out of proportion to our direct responsibility to the consumers of milk in Chicago. This reduction of 40 cents per cwt. added to the reductions already accepted by the association, equals 50 per cent of the 1929 price as against 20 per cent reduction for labor and a total reduction of approximately 35 per cent in the price to the consumer.

"Dairy farmers are accepting this reduction only under extreme protest. At the new price farmers will receive about three cents per quart of the nine cents paid by the consumer. They have a right to expect a more equitable distribution."

During the series of conferences between dealers and producers it was reported that in 1912 farmers were getting $1.90 per cwt. for 3.5 per cent milk, the price to the consumer was eight cents a quart, and milk wagon drivers were paid $19 a week. At that time there were approximately 1,600 milk dealers in Chicago, today there are 131.

Following the reduction in price, consumption of bottled milk increased noticeably, according to Chicago newspaper reports. The new price to producers in the Chicago area will be $1.45 per cwt. for base milk and flat 92 score butter price for surplus.

Several of the larger distributors since the cut have advertised a city-wide campaign calling attention to the food value of milk and the new reduced price. Since the other dealers reduced to nine cents the Meadowmoor Dairies, Inc., which refuse to buy milk from the Pure Milk Association, announced an eight-cent price.

Continuation of the hearing before the Interstate Commerce Commission involving extension of transit privileges in change of ownership of livestock at various western markets was set for January 5 at Excelsior Springs, Missouri. From there the hearing will be transferred and continued at Chicago, January 16.

L. J. Quasey, director of transportation for the I. A. A. has been attending the hearing in an effort to secure a long-haul rate from the western cattle ranges to corn-belt feed lots via the terminal markets even though there is a change of ownership at such markets. Such a transit privilege is now accorded livestock shipped to country points for resale to corn-belt feeders.

The co-operatives as well as individuals make considerable use of the latter privilege. But those who buy their feeder cattle and lambs at the terminal markets have had to pay two rates, one from the range country to the market, and another short-haul rate from the market to the feed lot.

The Illinois farmer at the present time is unable to buy Texas cattle at the Kansas City market for example and obtain the full billing from original point of origin because that constitutes a change of ownership.

Shippers now have such a privilege at Denver and interests at Chicago, East St. Louis, St. Paul, Fort Worth and all Missouri River markets are asking for a like privilege.

As an example, on a carload of cattle moving from Alpine, Texas to Kansas City for re-sale and later shipment to a feeder in Illinois intermediate to Chicago, a local rate of 60 cents applies to Kansas City plus the local rate from Kansas City to Chicago, or 40 cents, making a through rate of $1, while the through rate from Alpine, Texas to Chicago is 77 cents, or a difference of 23 cents which the shippers are now penalized if they stop at Kansas City on a change of ownership basis. In this particular instance, it would cost a shipper $50.60 to buy on the Kansas City market. The figures as given are based on final movement to Chicago on a feed in transit privilege on which the through rate to Chicago has been figured and the local rate to individual feeding point.

The contention is that these markets are deprived of the privilege of trading in feeder stock; that it has a tendency of keeping feeder cattle out of the markets.

Dividend News

(Continued from page 16)

Shippers' Association a cash dividend totaling $300.

Kendall Farmers' Oil Company announces a 10 per cent cash dividend on fuel oils, 20 per cent on lubricating oil.

Robinson and Oblong units of Crawford County Produce Association recently distributed cash dividends of 1.5 to two cents per pound on butterfat totaling $1,047.73 announces the Farm Bureau. Crawford-Jasper county members received $2,516.87 in dividends from Rich-Law Service Company; livestock growers received 25 per cent of commissions on sales to Indianapolis Producers.

McLean County Service Company announces cash dividends of 18 per cent on sales of gasoline and kerosene, 23 per cent on oil and grease, 30 per cent on paint, and 5 to 17 per cent on other items, a total distribution of $43,958.93 to Farm Bureau members in good standing.

Jersey County Farm Supply Company declared a 22.5 per cent dividend on fuel oils and 10 cents a gallon on lubricants, total refund $12,880. The County Produce Association returned $890.91 in cash to members.

Ford County Dairy Marketing Association refunded 1.25 cents per lb. on butterfat, total $588.05; Gibson City Farmers' Cream Station refunded one cent per pound on butterfat, total $203.85.

Lake County Farm Supply Company announces a 10 per cent dividend on petroleum products, total $9,000; four per cent on feed, seed, fertilizer, etc., estimated at $2,500, or a total of $11,500 to Farm Bureau members.

Wabash Valley Service Company announces a seven per cent cash dividend to consumer stockholders totaling $12,066.55; the Albion-Browns and West Salem units of Edwards County Produce Association refunded $987.12 to patrons.

Montgomery County Farmers Oil Co. declared a 10 per cent cash refund totaling $2,688.17; Shelby-Effingham Service Company a 10 per cent refund, total $4,372.63; Shelby County Livestock Marketing Association refunded 4½ cents per cwt., total $565.27.

Scott Co. Division Morgan Farmers' Oil Co. cash refund 10 per cent, total $1,079.

Higher Prices Only Hope For Debtor And Creditor

A. R. Wright Declares Worthy Debtor Must Be Helped To Preserve His Equity

"IF THE debtor is to be permitted to pay his debt and the creditor receive his pay, some means of inflation must be brought about and that before many months," A. R. Wright, vice-president of the Illinois Agricultural Association, and president of the Marshall County State Bank, said in an address at the Farm Debt conference held recently at Urbana. The conference was called by Dean H. W. Mumford of the State College of Agriculture and included college economists, bankers, farmers and others. Robt. A. Cowles and John C. Watson represented the I. A. A. at the conference.

A. R. WRIGHT

"What the farmer needs is an increase in the sale price of his products," continued Mr. Wright. "Supplying the exhausted patient with oxygen in the form of more credit, without providing him with some opportunity of paying his loan, will only drive him more deeply in the mire. Temporary credit and refinancing of farm mortgages at low interest rates are sorely needed, but a means of providing him with an income somewhat equal in purchasing power to that level at which he contracted his debt is far more important.

"The country banker is vitally interested in this problem but now the farm debt question has ceased to be a problem only of the local banker. Big industrial and business leadership is now concerned about its own welfare because of its dependence on the farm.

Organization Needed

"The farmer unorganized as he is has endeavored to maintain himself in a highly organized field. In this respect he has failed. Bankers stress organization, and are organized, mortgage bankers are organized, the insurance companies have organized to advantage, yet all have loaned their resources to, and staked their bet on an industry that was unable to protect its rights through organized efforts. Worst of all, many members of these groups have not encouraged farmers to align themselves with the leading farm organizations, in fact some bankers are discouraging such a step. I am convinced that this short-sighted policy is responsible to a greater degree than we appreciate, for the dire predicament in which the lender finds himself today.

"Having gotten ourselves into this morass, leniency and co-operative effort to the fullest extent possible must be resorted to by the creditors. Lapsed interest must be compromised or amortized over a term of years. Mortgages must be refinanced at the lowest rate of interest commensurate with the debtor's ability to pay, and for a length of time that will insure the worthy farmer a chance to make good.

Must Work Together

"The worthy debtor must be helped to preserve his equity and above all things, he must be encouraged to maintain his morale. It is one thing for the creditor to take over a farm but an entirely different thing to manage it. Some of us are having our experiences with land trusts, receiverships, etc. The hooray and glamour of corporation farming has passed and farming has established its dual capacity once more—not only a business but a mode of living.

"In instances where more than one creditor is involved they can best protect their interests by working together with the worthy debtor in a compromising spirit. There is nothing to be gained these days by a dog-eat-dog policy. There never has been a time when the need for practicing the Divine exhortation of Brotherly Love was as great as it is now. When the farm problem is solved the bankers' problem will have largely faded away."

Pres. Smith On Farm And Home Week Program

"The Aims and Objectives of Organized Agriculture" will be the subject of a talk by Earl C. Smith, president of the Illinois Agricultural Association, on the general conference program of Farm and Home Week at Urbana Friday morning, Jan. 20. Illinois farm advisers will hold their annual meeting during the five day short course which begins Jan. 16 at the State College of Agriculture.

Twenty-nine different short courses designed to help rebuild the incomes of farmers and restore their buying power will be offered, announces the State College. These courses will stress more effective marketing, cheaper unit costs of production, higher quality products, reduction of losses and wastes on the farm and in the home and higher living standards, as well as a wider variety of community interests and a happier rural life.

Home makers will open their sessions Tuesday, Jan. 17 with a meeting of the Illinois Home Bureau Federation.

Corn and grain honors of the season will be settled in the annual Illinois Seed Grain and Utility Corn Show. In addition to the grain show exhibit, there will be one on foods and nutrition and another on seed cleaning machinery.

The 15 crops in order of their value in the 1930 census are corn, hay, cotton, wheat, oats, potatoes, tobacco, oranges, barley, apples, sugar beets, tomatoes, dry beans, grapefruit, and sweet potatoes.

The Bureau of Chemistry and Soils has concentrated its farm crop research to find new uses for these crops not only as food but also industrially.

8 Livestock Meetings Scheduled In January

Eight district conferences for county livestock marketing committees will be held during January as follows: January 4, Masonic Hall, Polo; January 5, Armory, Galesburg; January 6, Farm Bureau Office, Ottawa; January 9, Y. W. C. A., Danville; January 10, Dunlap Hotel, Jacksonville; January 11, Jefferson Hotel, Peoria; January 12, Broadview Hotel, E. St. Louis; January 13, City Hall, Effingham.

Meetings at Peoria and E. St. Louis will be held in conjunction with annual meetings of the Peoria and St. Louis Producers. Charles A. Ewing, president of the National Livestock Marketing Association, will address both of these meetings.

At each of the district meetings a director will be nominated for the board of directors of Illinois Livestock Marketing Association.

The annual meeting of the State Livestock Marketing Association will be held at the Farm Bureau office in Bloomington, Tuesday, February 14 where directors will be elected, reports made, and new business transacted.

"From 67 to 90 per cent of Illinois farmers' income in most sections of the state is derived from livestock," states Ray E. Miller, director of livestock marketing. "It is high time livestock producers themselves take vigorous steps to extend the operation and effectiveness of their co-operative marketing organizations. They should receive and enjoy greater net returns from the sale of their livestock. No plan will succeed unless and until it is understood, approved, and given aggressive support of farmers themselves."

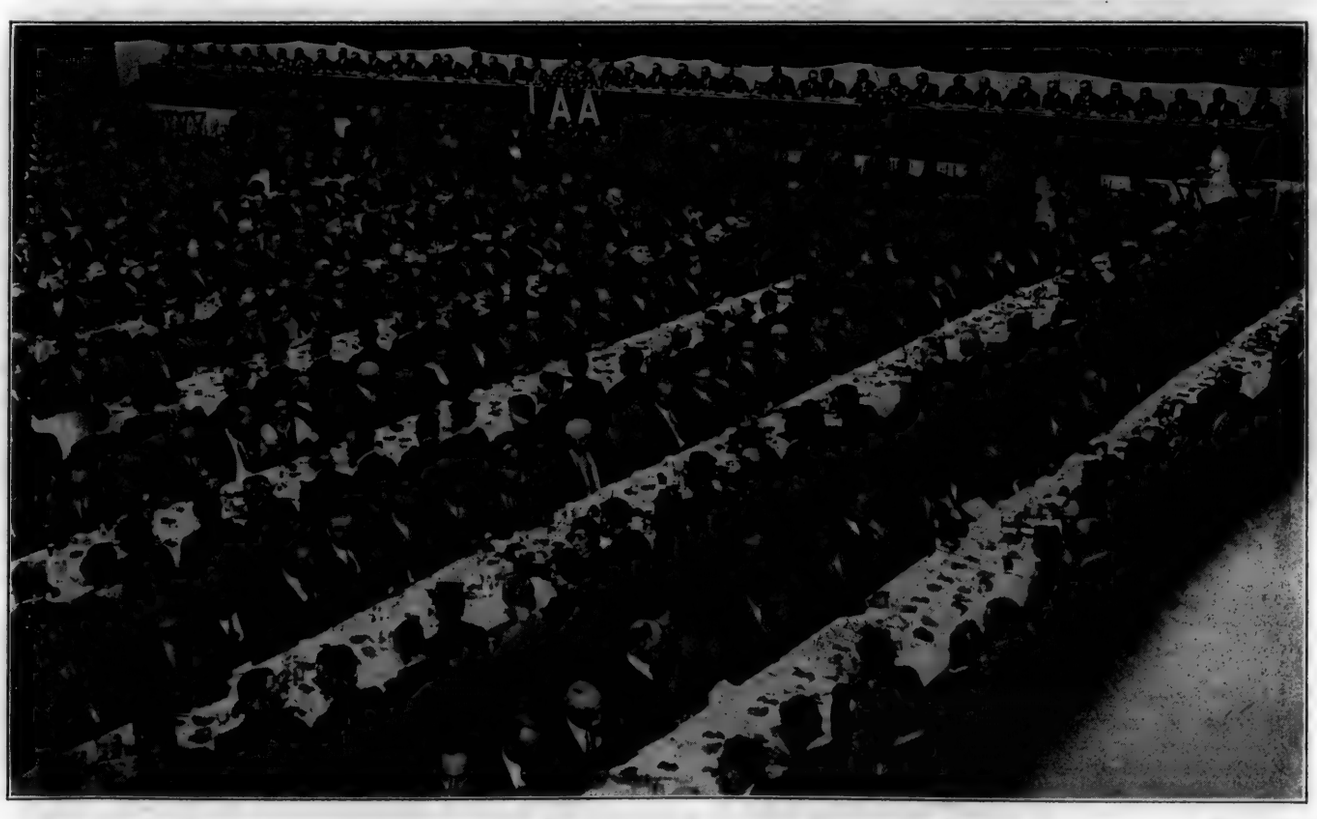
About the Convention at Peoria

Strength, Determination, and Enthusiasm To Go Forward Seen at 18th Annual Meeting

AS A demonstration of strength and determination to carry on in building constructive services and maintaining proper representation for the benefit of Illinois agriculture, the 18th annual convention of the Illinois Agricultural Association at Peoria Jan. 26-27 was never surpassed.

While the crowd estimated conservatively at more than 3,000 might have been exceeded in former years, enthusiasm and determination were there abundantly as if in reply to the concerted drive being made by organized middlemen and their allies to disorganize farmers and shake their faith in farm leadership and institutions.



"What an organization! See the determined look in their faces," commented Henry Harriman, the national chamber of commerce president, as he gazed from the platform at the vast audience—nearly 2,000 strong—during the annual banquet in Peoria's great armory. That expression was spontaneous. Any newcomer could have said as much.

In a year of great depression and consequent unrest brought on by unprecedented losses and radical changes in economic and social conditions, you might expect such influences to be reflected in the annual meeting of a great organized body like the I. A. A. There were evidences of low farm spending power but not a ripple of the disunity and internal dissension which enemies of agricultural cooperation delight in, and which have hindered farm progress.

Thus in fourteen years, since the I. A. A. was set up on its present membership basis in the city of Peoria, Illinois farmers have welded into their organization a measure of strength and stability unequalled in any similar or contemporary association in America.

Shall we reduce dues and cut service? That was the question more than 300 County Farm Bureau presidents, directors, and leaders

(Continued on page 5)

More than 1,600 were served, approximately 2,000 attended the Annual Banquet in Peoria's Big Armory on Thursday night, Jan. 26. The I. A. A. was launched in this city as a membership organization in 1919.

Smith and Wright Re-elected

Five New Directors Chosen, Bamborough, Sorrells And Cope Re-elected In 13th, 21st, And 23rd Districts

EARL C. SMITH of Detroit was re-elected to serve his eighth term as president of the Association and A. R. Wright, Varna, was re-elected for the fourth time as vice-president following the speaking program at the banquet on Thursday night.

Mr. Smith's name was placed in nomination by Albert Hayes, president of the Peoria County Farm Bureau who paid a glowing tribute to his leadership during the Association's period of greatest development beginning in 1926. The nomination was seconded by M. A. Goodmiller of JoDaviess county and Chas. H. Snyder of Brown county. A. R. Wright was nominated by A. L. Goodenough, president of the Whiteside County Farm Bureau. Mr. Goodenough wittily made a play on the name "Wright" in his nominating speech.

"When you have the right man in the right place, let's keep him there," he said. "It's well to have someone who is 'Wright' all the time." The nomination was seconded by R. B. Endicott of Pulaski county.

In the absence of other nominations the secretary was instructed in each case to cast a unanimous ballot for the nominee.

EARL C. SMITH A. R. WRIGHT

Five New Directors

Five changes were made in the board of directors. Ebb Harris, Grayslake, was elected to succeed H. C. Vial in the 11th district, M. Ray Ihrig of Golden succeeds Charles Bates in the 15th district, E. D. Lawrence, Bloomington, replaces A. B. Schofield in the 17th district, Eugene Curtis, Champaign, succeeds C. J. Gross in the 19th district, and Robert B. Endicott, Villa Ridge, succeeds Fred Dietz in the 25th district.

C. E. Bamborough of Ogle county was re-elected in the 13th district, Sam Sorrells of Montgomery county in the 21st district, and W. L. Cope of Marion county in the 23rd district. Directors are elected for two year terms, thus the terms of half the board members expire annually.

Mr. Harris, age 58, is a charter member of the Lake County Farm Bureau, one of the oldest county organizations in the state. He served as president of the Farm Bureau for three years and at present is serving as vice-president. Harris operates a 245 acre dairy farm, is an officer in the Lake-Cook County Supply Company, and a member of the Pure Milk Association.

Ihrig Youngest Member

Mr. Ihrig, age 30, is the youngest member of the board. He is secretary of the Adams County Farm Bureau, is married and has two children. He and his father are partners in the operation of a 320 acre farm.

Ed Lawrence has been active in the McLean County Farm Bureau for many years. A University of Illinois man, Mr. Lawrence manages a large estate where he has put into practice the best known methods of soil and crop improvement and livestock production. Lawrence served ably as president of the Illinois Farm Supply Company several years ago. He has been closely associated with the development of Farm Bureau work in McLean county.

Gene Curtis, age 37, has been an aggressive leader in the Champaign County Farm Bureau for a number of years. He served two years as president of the county organization and is still a member of the board. He is now serving as president of the Champaign County Livestock Marketing Association. Curtis operates a 240 acre livestock and grain farm, is married and has three daughters.

Endicott From "Dixie"

R. B. Endicott, age 51, is known throughout southern Illinois where he has been active among organized fruit growers. He had a prominent part in organizing the Farm Bureau in Pulaski county in 1920 which he served as president for the first five years of its existence. He has been on the board continuously since that time. He served for many years as president of the Illinois Fruit Growers' Exchange.

Bob Endicott attended the University of Illinois in 1898 and 1899 shortly after the Agricultural College was established. His son graduated from the College of Agriculture at Urbana last June. He operates a 273 acre farm devoted to fruit and general farming. In addition to tree fruits including apples, peaches, and pears, he grows raspberries, strawberries, and other small fruits, nuts, asparagus, and general grain crops.

Mr. Endicott will travel the most miles to I. A. A. meetings. Villa Ridge is close to Dixie, only 12 miles from Cairo, and nearly 400 miles south of Illinois' northern boundary.

All of the five conferences on Thursday afternoon were well attended, the crowds ranging up to 800 or more in each.

The Rialto Theater seating nearly 1,800 was filled for the opening session of the I. A. A. meeting Thursday morning. Attendance at the Friday session was somewhat smaller but still heavy.

The Master Farmer Club of Illinois held a luncheon sponsored by Prairie Farmer Thursday noon. Approximately 30 members, most of them delegates to the convention, were there. C. V. Gregory, editor, and Floyd Keepers of the Prairie Farmer staff attended.

About the Convention at Peoria

(Continued from page 3)

debated in the closed session on Wednesday night, a time when internal, confidential problems vital to the organization are annually discussed.

There was no set program that night. The question of dues was introduced from the floor by a Farm Bureau president asking for experiences and information from other counties. Then spontaneously came one after another, men who pioneered in the Farm Bureau movement, others who came later in response to the call to assume responsibility and leadership in the county organizations. And here is the way they analyzed it:

Cutting dues hasn't resulted in increased membership wherever tried; in fact it has weakened membership by reducing service and so paving the way for a decline. Every member who uses his organization is getting more than his dues back in actual cash savings and refunds, directly, to say nothing of the indirect benefits through having a representative organization fighting for his interests before legislative, tax, and rate-making bodies. We need organization now more than ever. We will do nothing to weaken our cause.

The annual meetings and conferences of associated companies on Jan. 25 disclosed that the service institutions set up by the parent organization are in a thriving condition, all having paid dividends on capital stock and with one exception have added to capital reserves. Announcement of the declaration of an extra $48,000 of dividends to Country Life policy holders by the Holding Company was welcome news in view of recent action by many life companies in reducing their dividends.

The opening session of the I. A. A. convention on Thursday morning in the Rialto Theatre found nearly every one of the 1,750 seats on the main floor and balcony filled. The Pawnee Four were back with new songs and poetry in tune with the times. The old time favorite, "Down On the Farm at Half Past Four", sung at the banquet, was as good as ever to old convention goers, and more than delightful to the newcomers.

Plans to round up the 120 founders of the I. A. A. who signed $100 notes to underwrite the launching of the Association at the initial meeting in Peoria 14 years ago failed to materialize because a list of the signers was not readily available. However, many of these old timers were around the convention halls taking honest and justified pride in the growth of the baby they produced early in 1919.

Without vision of the founders, and the continued support of those who saw beyond the bricks and windows and visualized the building and its possibilities, Illinois farmers today could not point with genuine satisfaction to a long list of achievements made possible by organization.—*Editor.*

Nearly every seat was filled as the opening session of the big convention got underway in the Rialto Theatre Thursday morning.

Fred Lee Outlines Farm Debt Refinancing Plan

Higher Farm Prices The Way Out He Says, But Tells What Can Be Done In Meantime

THIS question of farm mortgages is tied up closely to reflation and higher prices. The price scale is the important thing for with present prices no farmer can pay off on his mortgage no matter how much refunding and refinancing is done, Fred P. Lee, of Washington, D. C., legislative counsel of farm organizations, said in his address before the I. A. A. convention on January 27.

Pending the return of higher prices, said Lee, we need a plan to stave off foreclosures and ease the debt situation. There are many ways to refinance such as scaling down principal payments, extending time of payment, and reducing interest rates.

The Congress can't flatly prevent foreclosures, nor can it reduce the first mortgage on a property, but the creation of conciliation committees can do much toward adjusting debts, and composing secured and unsecured debts to give the debtor a chance to pay out on a long time basis at reduced rates of interest.

Details Plan

Mr. Lee outlined in detail the plan embodied in the resolution on this question reproduced elsewhere in this issue. He suggested the formation of a billion dollar corporation to take up present farm mortgages and debts that are in distress, extend their maturity, and stop indiscriminate foreclosures. He would have the joint stock land banks liquidated gradually without causing them to foreclose on their mortgages.

Mr. Lee illustrated how he would compose farm debts by assuming that Farmer A has debts totaling $10,000. Of this amount suppose $6,000 represents a first mortgage on the farm, $2,000 a second mortgage, and $2,000 of unsecured debts. He would scale down the second mortgage and unsecured debt totaling $4,000 to $1,500, for example, leaving a total debt of $7,500 which the refinancing corporation would take over to be amortized over a long period of time at a reduced rate of interest. Lee thinks it doubtful if anything can be done to arbitrarily reduce a first mortgage on property.

He closed by emphasizing the importance of organized farmers presenting a united front at Washington and elsewhere in their efforts to gain needed legislation. It pleased Congress when on January 12 the farm groups all got together on a program to raise farm prices, he said. Division in the farm ranks only plays into the hands of those who are against doing anything for agriculture.

The resolution on farm mortgage indebtedness follows the plan outlined by Fred Lee in his address on this subject at the Friday morning session.

Nearly 2000 Assemble In Armory For Banquet

Harriman and O'Neal Speak, Many Guests Attend

THE largest single gathering of the convention was the banquet on Thursday night when nearly 2,000 crowded into Peoria's new armory. A large number sat in the balcony to hear the speeches but did not take part in the dinner. It was necessary to cook the food elsewhere and bring it in since the armory has no kitchen facilities.

"We served more than 1,600 people and never missed a fork," commented the caterer the next day.

The acoustics in the armory were very poor but with the aid of the I. A. A. public address system, speakers' voices were carried clearly to nearly all sections of the big room. When speakers moved away from the microphone it was next to impossible to hear them beyond a few rows from the speakers' table.

H. I. Harriman, president of the U. S. Chamber of Commerce, the first speaker, received a warm welcome from the audience. He stuck closely to his manuscript. President Edward O'Neal of the American Farm Bureau discarded his written speech and much to the delight of the audience gave an informal and intimate word picture of lobbying and legislative developments at Washington interspersed with plenty of Ed's famous picturesque language.

Presidents and managers of co-operative marketing organizations operating in Illinois, and the I. A. A. staff who were introduced en masse, occupied a long table immediately in front of the speakers' platform.

Among the guests introduced by President Smith were C. A. Atwood, Chicago, president Allied Mills; C. V. Gregory, editor, Prairie Farmer; Dean H. W. Mumford; Harvey O'Hair, ex-Chairman House agricultural committee; Senator Simon E. Lantz, chairman Senate agricultural committee; J. C. Spitler, state extension leader; George C. Jewett, of Chicago; Allan Gordon, of the Illinois Manufacturers' Association; C. G. Ferris, secretary, Illinois Chamber of Commerce; Fred Stowe, editor Peoria Journal-Transcript; Homer Ahrends, mayor of Peoria; P. I. Rogers, president of Peoria Chamber of Commerce; Irma Hill Vogel, secretary Illinois Home Bureau Federation; Eugene Eckert, master State Grange; Senator Harry Wilson, president, and H. O. Allison, secretary, Illinois Farmers' Institute; Harvey J. Sconce of the Century of Progress; Howard Leonard; George Milnor, Chicago, manager Farmers' National Grain Corp.; Samuel R. Guard, editor, Breeder's Gazette, and Fred Lee, legislative counsel, Washington.

Produce Markets and Community Recreation were discussed at the Women's Conference sponsored by the Illinois Home Bureau Federation.

Women Hear About Farm Produce Markets

Co-operative marketing, home bureau markets, and community recreation featured discussion at the women's conference sponsored by the Illinois Home Bureau Federation during the I. A. A. convention, Peoria, Thursday, Jan. 26. Mrs. Irma Hill Vogel, secretary, presided in the absence of Mrs. Meis, president, who is recovering from serious injuries suffered in an automobile accident.

In her address on Home Bureau markets, Miss Grace Armstrong of the University of Illinois stated that when money is more plentiful it is a man's world, but when cash is scarce it then belongs to the woman. "Women try to reduce expenditures and try to increase the net income," she said. "Many women have gone back to the work they did before they were married, some are teaching school, and others have begun private trading."

Miss Armstrong stated that between 600 and 700 Illinois women have formed co-operative organizations to sell farm produce. There are 26 of these co-operative markets operating in 14 counties, she said. Of the 26 eighteen have been launched since 1930. These 26 organizations are in towns ranging from 4,000 to 45,000 in population. A survey showed gross sales of 13 of the 14 counties having such organizations to be $107,577.

Guy French of Putnam county told of the progress farmers are making in co-operative marketing. The farm woman, he stated, has borne more than she should because co-operative marketing has not yet reached its goal—that of giving the farmer bargaining power through control of a large volume in the sale of his products.

Mrs. Spencer Ewing led an interesting discussion on the subject of "Co-operation in Community Recreation."

Many An Old-Timer At The Peoria Meeting

Memories of the early days of the I. A. A., particularly the historical meeting held in Peoria early in 1919 when the Association was launched on its present membership basis, brought many an old-timer back for the 18th annual meeting.

Zealy M. Holmes of Peoria county, gray-haired veteran Farm Bureau leader who served as vice-president of the I. A. A. in 1920-21, was an interested spectator at all the main sessions.

Among other pioneers in the movement who attended were J. C. Sailor, Iroquois county, Charles Borgelt, Mason county, Howard Leonard, Woodford county, Harvey J. Sconce, Vermilion county, Eugene Funk and G. C. Johnstone of McLean county, H. E. Goembel, Henry county, Geo. A. Fox and Henry H. Parke of DeKalb county, Edgar L. Bill, former I. A. A. publicity director and now owner of Station WMBD, Peoria, C. V. Gregory, member of the first I. A. A. legislative and publicity committees, and W. H. Moody, Rock Island county.

President Earl Smith, Bob Cowles, I. A. A. treasurer since 1922 and a pioneer in the organization of McLean County Farm Bureau, Vice President A. R. Wright, George F. Tullock, W. L. Cope, Sam Sorrells, Frank Barton, A. B. Culp, and others still closely identified with the Association, also were active in the early history of the organization.

Pres. Smith Reviews Year's Work

Discusses State And National Problems And Solutions, Charts Course For Future In Annual Address At Peoria

WE ASSEMBLE for the 18th Annual Meeting of the Illinois Agricultural Association for the purpose of reviewing the developments of the past year and to better define the program of the organization for 1933. Certainly everyone in this audience recognizes that we have passed through the most trying year of the present century and possibly in the history of this country.

"People engaged in all walks of life and institutions representing every phase of business and industry have been seriously affected. Associations and membership groups throughout the country have been undermined and in many cases forced to give up some, if not all, of their former activities. The depression has continued its heaviest toll in agriculture. We have witnessed on every hand most heartrending scenes and all this largely brought upon us as a result of the neglect of America in recognizing and meeting the farm problem which has increased in magnitude and complexities for more than a decade.

"Under such conditions, it is with just pride that we meet this morning with the knowledge that our Association has withstood the economic storm of the past year proving again the soundness of the foundation laid for it in this city 14 years ago. . . .

"As we meet today and look back over the record we can justly feel some measure of satisfaction in our achievements. We know more today about the possibilities and limitations of organization. We have learned that farmers by working together can do many things to help themselves.

"We have brought much constructive influence to bear in the field of legislation and before administrative tribunals of various kinds, even with only a minority cooperating in organization. That influence would be decidedly greater did the farmers of this state show more unity thru membership in standing together for the best interests of agriculture.

Direct Savings Large

"In the year 1932 every member of this organization who made use of the services available for his benefit can show actual cash savings much in excess of his annual membership dues. And yet these direct savings, large as they loom in this year of depression when farm income is at its lowest point due to conditions beyond our control, fade into insignificance when compared with the indirect, less tangible, yet genuine benefits made possible by organization.

"Early last year your officers and directors adopted a budget of expenditures substantially lower than that of the previous year. As time advanced, and continued deflation forced farm prices to new low levels, further economy measures were adopted which could be effected without abolishing any of the services which time and experience have proved most valuable to the membership. While these economies resulted in reducing expenditures nearly $30,000, for the first time in seven years we were forced to use approximately $13,000 of our cash reserve. Few business institutions, and I feel sure no membership organization such as ours, can equal that record—a record that stands as a tribute to the men who pioneered in establishing and setting the course of this organization, and to the effectiveness of the service program developed throughout the years.

Successful Year

"Notwithstanding the very difficult conditions prevailing during the year 1932, the organized farmers of Illinois again proved their ability to own, control and successfully direct business service corporations.

"While we have witnessed all types of business failures and resultant bankruptcies from the smallest to the largest corporate institutions, without a single exception the ten business service corporations, owned, controlled and directed by the Farm Bureau movement of Illinois have provided for all dividend obligations on the stocks of the various companies and in nearly every case have added substantially to their respective surpluses. Savings in dollars and cents accruing from these efforts, to say nothing of the much more important and valued services thus made available, amount to more than the total of all county, state and national Farm Bureau membership dues in Illinois. It would seem that such outstanding achievement would cause every thinking farmer to seek membership in a farm organization with such a record.

Service Company

"Throughout the year, the guidance and direction of these corporate services have continued under the Illinois Agricultural Service Company.

"Because of the seriousness of present day conditions, much more time than formerly has been required by the Service Company's board of directors to properly safeguard these various business institutions.

$12,000,000 Turnover

"You may be surprised to know that the I. A. A. with its associated companies now constitutes the largest business or trade association west of the Alleghany mountains. Taken together, the business turnover approximates $12,000,000 annually, which is equivalent to $40,000 per working day. Our auditor advised me that it required 3,592 deposits to the accounts of these various companies, and the issuance of 44,656 checks that the affairs of these corporations might be carried out in an orderly and effective manner.

"We particularly invite your attention to the financial statements of each of these organizations, which appear in the annual report. Recognizing the very natural state of unrest by many who hold equities in financial institutions and particularly insurance companies, the board of directors of Country Life Insurance Company and Illinois Agricultural Mutual Insurance Company authorized the inclusion in this report of an itemized list of the security holdings of these two large insurance companies. You will be glad to know that, without exception, not a single security held by either one of these companies, has defaulted, either as to principal or interest, and the total holdings of each company show only a nominal depreciation in market values as of December 31st. This record is most outstanding, especially if one considers conditions prevailing within the security markets during the year.

"In each case these business corporations have been set up and developed along lines that guarantee their perpetuity of control by the Illinois Farm Bureaus and Illinois Agricultural Association and the return of all earnings to those participating in the services provided by each organization.

"In reporting very briefly on their condition, I am taking them up in the order in which they were organized.

(Continued on page 11)

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Resolutions Adopted by Board of Delegates, Illinois Agricultural Association, 18th Annual Meeting, Peoria, Jan. 26-27, 1933

I—Restore Farm Buying Power

Long delay and neglect of the Government in squarely facing the agricultural surplus problem has resulted in a tremendous accumulation of agricultural surpluses greatly aggravating the unfortunate condition of agriculture and finally undermining the economic structure of the Nation.

We believe a sound and effective solution of the surplus problem of agriculture and a resultant increase in farm price levels is a first essential to restore a normal condition in America.

The purchasing power of farm products has now declined to approximately one-half its pre-war level, many thousands of factories are idle and millions of people are unemployed because the farmers and those dependent upon farmers are out of the market as buyers. National welfare demands immediate action to restore farm buying power.

We recognize the change in international trade that has taken place due to changed debt relations among Nations during the years of neglect and inequitable treatment of agriculture by the Government. We also recognize that rates of exchange by the Governments now adversely affect the normal disposal of crop surpluses abroad.

We urge the Officers and Directors of the Association to use their full influence to secure the enactment of such emergency measures as may be necessary to restore directly to the producer at least the pre-war purchasing power of the domestic requirements of our more important surplus agricultural products.

We also favor such legislation as is necessary to secure proper and effective control of crop surpluses in such manner as will prevent farm prices from being forced below fair exchange price levels.

We further authorize and direct the Officers and Directors of the Organization to use their full influence in promoting such industrial uses of farm products as may be found possible as a result of years of research by our Colleges of Agriculture, the United States Department of Agriculture, and other agencies.

We specifically authorize and direct the officers and directors of this organization to immediately investigate and, if justified, use their full influence in promoting legislation for the use of a blended fuel made by diluting all petroleum products used to develop power in internal combustion engines with Ethyl alcohol made from agricultural products and by-products thereof grown within the continental United States of America.

II—Support Co-operative Marketing

In many quarters the Agricultural Marketing Act and the Federal Farm Board have been held responsible not only for the very low price of farm products, but for practically all other ills in America.

The Illinois Agricultural Association has never believed that the Agricultural Marketing Act embodies all the necessary provisions for a sound national agricultural policy. Recognizing, however, that many of its functions are very helpful in the building of co-operative marketing organizations, we have given it our wholehearted support.

We emphatically reaffirm our support to co-operative marketing and urge all units of our organization to emphasize the importance of aggressive support of co-operative associations that are organized on a basis guaranteeing their control and management by producers and equitable participation by all members in the earnings and savings resulting from collective marketing of a large volume of products. We ask all rightful thinking people to differentiate between true and genuine co-operatives and those operating under the guise of co-operatives, but, in reality, confining their earnings to a given few.

We resent the continuous attacks upon many successful co-operative marketing associations by those who have only selfish interests to serve; we insist that any changes in the marketing act, or in its administration originate from farmers or their known friends rather than from private trading interests who have long controlled the marketing and processing of farm products and have made tremendous profits therefrom.

III—Farm Mortgage Indebtedness

While Congress and the Nation are engaged in formulating and considering suitable National legislation to restore reasonable price parity between basic farm commodities and goods and services required in farm operations, it is important to save the farm home and retain title in its farm owners and operators, pending the restoration of reasonable price parity. The continuing ruinous price levels of basic farm commodities, sharply depressed to new low levels, since maturing 1932 crops, now directs attention to the immediate crisis, in the interest of debtor and creditor and the nation.

We, therefore, respectfully importune the Congress to enact appropriate legislation and to provide funds

therefor, in the emergency, to relieve the farm debt situation. And to that end, we specifically suggest and recommend:

1. That the wave of farm foreclosures be halted by the following means:

a. The appointment of one or more conciliation commissioners for each rural county as special referees with jurisdiction, under the supervision of the federal courts, to compose farm indebtedness and extend the terms thereof on petition of either debtor or creditor. Pending such composition and extension proceedings, all foreclosures and other action, both within and without court, against the farmer or his property, should be stayed, whether instituted before or after the commencement of the composition or extension proceedings. The composition and extension proceedings should be decentralized and close to the farmer, simple in form, inexpensive to the farmer and with a minimum of expense to the Government, and should not result, in case of their failure, in placing the farmer in involuntary bankruptcy.

b. Establishment of a temporary credit agency in the federal land bank system to refinance, by short term loans at a low rate of interest, the present frozen loans to the farmer on a scale-down in order to facilitate the composition, particularly of subordinate liens and unsecured indebtedness, and to permit worthy farmers gradually to work out of their financial difficulties.

c. Temporary loans to Federal land banks, and during liquidation, to joint stock land banks in order that mortgages held by either type of bank may be extended as to principle and interest and reamortized.

d. Reduction of the interest rate on existing and new Federal land bank loans, and for that purpose the addition of new capital to the Federal Land bank system and the establishment of a revolving fund in the United States Treasury for the purchase of outstanding high interest bearing Federal land bank bonds as they become callable, and the purchase of new Federal land bank bonds at par.

2. The strengthening of the Federal land bank system so that such banks can afford credit at the present time and refinance sound first mortgages offered by individual creditors, joint stock land banks, and other fiscal agencies that need to liquidate, to the end not only of preventing foreclosures but of maintaining an efficient co-operative credit system adequate under present conditions for the needs of farmer borrowers.

3. Compulsory liquidation of joint stock land banks, either through their own directors or by a liquidation corporation under the Federal Farm Loan Board, in such manner as to protect the interest of their farmer borrowers and of their bondholders without the government taking over or guaranteeing their mortgages or bonds through the Federal land bank system or otherwise.

IV—Restrict Federal Injunctions

Inasmuch as the unrestricted injunctive power of federal judges may present a menace to the efforts of organized agriculture, we urge that the Federal Judicial Code be amended to extend to farm organizations the same security now obtained for labor. We oppose for appointment and confirmation to a federal bench any person who believes in the unrestricted use of injunctions against farmers in their development of co-operative effort.

V—Revenue Reform, Reapportionment

We reaffirm our position repeatedly declared in favor of such revision of the revenue article of the State Constitution as may be necessary to remove all confusion and uncertainty and to give unquestioned authority to the General Assembly to establish a taxing system applicable to all citizens according to their ability to pay.

If and when the constitutional basis of reapportioning our legislative districts shall be changed, we favor the principle of apportionment approved in a resolution adopted two years ago whereby representation in one House of the General Assembly shall be determined on the basis of population, in the other on the basis of territory.

We believe that amendment of the revenue article of the Constitution should be accomplished at the earliest possible time. If, however, a more general revision of the State Constitution should seem desirable, we favor action by the present General Assembly to submit to the people of the State the question whether they desire to have a constitutional convention.

VI—Assess Income As Property

The Supreme Court of the State of Illinois having set forth in its decision on the constitutionality of the State Income Tax Act that all "income and salaries" of the citizens of Illinois are "property," we hereby authorize and direct the Officers and Board of Directors of the Illinois Agricultural Association to take whatever steps may be necessary to require the assessment of this class of property on the same basis as other classes of property.

VII—Economy In Government, Sales Tax

We urge such immediate action by the General Assembly as is necessary to substantially reduce all maximum tax rates created by law for each unit of government in the State of Illinois.

We favor such reduction in public appropriations as can be accomplished without the serious impairment of necessary services provided by government. We urge repeal of all statutes setting minimum salaries for county officials whose compensation is paid out of county funds.

In all matters affecting appropriations to provide services for agriculture, we insist that the proper officers of our organization and others primarily engaged in agricultural production, be consulted as to the services which can best be dispensed with.

After securing every possible saving in the cost of government from all such reductions, we recognize that new sources of revenue must be found to relieve property from its unjust portion of the tax burden.

We favor, therefore, enactment of a state retail sales tax of two per cent on all tangible personal property except food and food products; division of all revenue derived therefrom on a fair and equitable basis between Cook County and down-state counties; and inclusion of such other provisions as are necessary to insure the full use of all revenue to replace taxes now levied upon and collected from property.

Recognizing the existing acute unemployment situation, we express a willingness to support a provision in such a law as will allow any county within the State to use any part or all of such moneys allocated to it for the years 1933 or 1934 for the purpose of taking care of its needy and unfortunate people.

VIII—Elect Able Supreme Court Judges

The citizens of the rural areas in Illinois have heretofore failed to realize the importance of the biannual judicial elections. In the June election of this year there will be selected to the Supreme Court of Illinois a majority of the members of this important bench. We urge our members to interest themselves in this election and support in a non-partisan way the ablest and most worthy candidates for this high office.

(Continued on page 10)

IX—Lower Utility Rates

On account of the economic depression, large numbers of public utility users have found rates and charges higher than they were able to pay and have discontinued the services.

The remaining customers find it increasingly difficult to meet the high cost of public utility charges.

The decrease in customers reduces the revenues of the companies, makes maintenance and operation more costly, and in the case of telephone service, greatly diminishes the value of the service to the remaining subscribers.

The valuations of public utility properties are generally on a basis seriously out of line with present cost levels.

We believe that the Public Utility companies should take the initiative in lowering their rates by reducing the valuations of their properties, construction and maintenance costs consistent with reductions in labor and materials.

We urge the Illinois Commerce Commission to exercise the full extent of its legal and persuasive powers in bringing about reductions in all public utility valuations, costs and charges in keeping with general economic conditions.

X—Excise Tax On Oleo

Because of continued importation of large quantities of foreign oils and fats and their displacement of our farm products in manufacture for domestic consumption, we authorize and direct the Officers and Directors of the Association to use every proper effort to secure enactment of a State excise tax on all oleomargarine which contains any such imported oils and fats and is sold or offered for sale in the State of Illinois.

Since relief workers for the Illinois Emergency Relief Commission apparently are recommending to their dispensing agencies the use of butter substitutes in the place of butter for supplying the unemployed; and since the keynote of this convention has been to restore farmers' buying power that the country may return to normal business conditions; and since public funds are used for unemployment relief, it seems only fair that farmers' products should be purchased with public money and thus return to him purchasing power to help business conditions return to a normal basis.

Therefore we urge the Illinois Agricultural Association to investigate this situation and if found to be true take such means as it deems advisable to correct this condition.

XI—Better Supervision of Raw Milk Sales

In practically all of the organized fluid milk markets of the State, certain standards of quality which organized farmers have been required to meet, have been specified by the health departments in the various cities served by these organizations. Our organized dairymen have met these requirements. To produce high quality product, however, requires considerable capital investment in barns, equipment and labor to keep equipment in a sanitary condition.

We now find interference with the milk markets by producers who are not equipped to produce a high quality product. We find further that the specifications of health departments in various cities are avoided by establishing retail milk stations outside the city limits, where milk of unknown origin is sold to consumers under conditions considered unsafe by city health departments. City health departments are powerless in these cases. In the interest of public health and for the protection of those dairymen who have been required to make substantial investments to produce quality milk, we favor the enactment of a law which will empower the State Department of Health to set up specifications covering raw milk and require such milk to conform more closely to the requirements of the various city ordinances.

XII—Soybean Oil In Paint

Experiments at the University of Illinois disclose that soybean oil as a basic ingredient in paint is at least equal, if not superior, to other oils. Tests of paints carrying different percentages of soybean oil have been made in different sections of Illinois by hundreds of farmers and such paints have met with great favor. Thus far, it has been found impossible to secure inclusion of paint carrying soybean oil in the specifications of public contracts.

Without exception, all experiments justify specification of soybean oil in public contracts. We insist, therefore, upon such changes in statutes or regulations as will remove present discriminations.

XIII—Consolidation In Dept. of Agriculture

We favor any reasonable consolidation of the Divisions of the State Department of Agriculture relating to the livestock, poultry and dairy industries, with transfer to the College of Agriculture, University of Illinois, of educational functions, when such consolidation may be in the interest of economy and efficiency; and we emphatically urge, in order that the livestock, dairy and poultry industries may best be served, that the administration of such consolidated Division be in the hands of a practical livestock man who has the best interests of these industries at heart and who is free from selfish business or professional interests.

XIV—Century of Progress

The metropolis of Illinois is the agricultural capital of the world and celebrates during the year its one hundredth anniversary by opening to the world an international exposition displaying in modern and royal fashion the fine arts and sciences. The industry of agriculture is being given its proper place in this gigantic pageant which is under the immediate direction of one of the first presidents of Illinois Agricultural Association.

We hereby pledge to the commissioners of this international exposition the heartiest cooperation of the Farm Bureau people of Illinois.

XV—Stop Reserve Board Deflation

Inasmuch as the purchase of government securities by the Federal Reserve system expands deposits, and eventually loans, we view with alarm the sale in January, 1933, by the Federal Reserve system, of $70,000,000 of bonds. This action is definitely deflationary, and we insist such policy be immediately discontinued.

XVI

The delegates and visitors of this Eighteenth Annual Meeting of the ILLINOIS AGRICULTURAL ASSOCIATION held in PEORIA, January 26 and 27, 1933, hereby express their grateful and hearty appreciation for the cordial welcome and for the unfailing courtesy and cooperation shown them by the Peoria County Farm Bureau, the Mayor, the Convention Bureau of the Ass'n. of Commerce, and the organizations of the City of Peoria, and the citizens of the City of Peoria and Peoria County who have contributed so effectively to the comfort, convenience and success of this annual meeting.

Members of the Resolutions Committee were A. R. Wright, Chairman, Harold C. Vial, Chas. Marshall, Talmage Defrees, W. A. Dennis, Chas. Bates, A. B. Schofield, Harvey Herndon, F. C. Thomas, R. B. Endicott, Geo. W. Lenhart.

Pres. Smith Reviews Year's Work

(Continued from page 7)

Auditing Association

"During the year, the Illinois Agricultural Auditing Association has completed 366 audits for its members and shows an increase in membership of 13.

Reinsurance Company

"The Reinsurance Company closed the year with an increase in the volume of its direct and specific fire and windstorm insurance, but a substantial decrease in hail insurance, largely due to the reduced per unit value of insured crops.

"There is a school of thought fast developing which believes the company's operations should be changed to a basis comparable to other legal reserve mutuals, whereby insurance is written at conference rates and in addition provide that savings and/or earnings be paid back to policy holders in dividends at time of renewal. Levying of assessments, particularly special assessments, always leads to disturbance and misunderstanding. With such a change in policy, the savings brought about as the result of organized effort would be apparent at each premium paying date. This matter is receiving attention of the management. Recommendations for changes, if any, will be made at an early date.

Farm Supply Company

"The Illinois Farm Supply Company enjoyed the best year in its history. From an organization six years ago consisting of six charter members and less than a dozen bulk plants, it has grown to 52 members with 135 bulk stations, operating 385 trucks and serving approximately 75,000 farmers in 80 counties. It is the largest association of its kind in the United States. The volume of petroleum products and farm supplies distributed exceeds that of any other group of farmer-owned and operated companies.

"During 1932, the company handled 35,000,000 gallons of petroleum products approximating a train-load every other day with a retail value of $5,000,000. Its earnings last year were equal to 112.4 per cent on capital stock, and besides adding substantially to its surplus the company returned $86,514 to member companies.

Auto Insurance Company

"The Illinois Agricultural Mutual Insurance Company has continued to render outstanding service to its Farm Bureau member policyholders. It is always difficult to compare costs with other companies, for the reason that there are many types of policies and many methods of operation. It is without fear of contradiction, however, when I say that this company is now saving its policyholders more than one-quarter million dollars annually on auto insurance alone compared with the cost of similar insurance in any other company operating throughout Illinois.

"Although it has experienced a greater number of cancellations than in any previous year, largely due to economic conditions, the company closed the year with a net increase of 983 policies in force. As will be noted from the financial statement, the company is in a splendid financial condition, having added $109,622.56 to its surplus in 1932.

Life Insurance Company

"The Country Life Insurance Company has made an enviable record during the year. New paid-for business approximates $10,000,000. The net increase over that of a year ago is $3,600,250, showing a net insurance in force at the close of the year of $47,368,250.00. Few legal reserve companies, if any, operating in the United States, will show a net gain in insurance in force for the year. Country Life's mortality experience has been much better than anyone anticipated, approximating only 25 per cent of the expected, which is the lowest annual mortality in the experience of the company.

"As previously stated, the financial condition of Country Life Insurance Company is all anyone could possibly expect or ask, and fully justifies the continuing confidence of its policyholders.

Produce Marketing Ass'n.

"The Illinois Produce Marketing Association last year handled approximately 2,500,000 pounds of butterfat, having a value of $471,072.

"Because of the steady increase in surplus milk within several of the Illinois milk sheds and its resultant effect upon butterfat prices, our Dairy and Produce departments have been directing their attention during recent months toward the development of a program which provides for surplus plants equipped to separate milk and manufacture the cream into butter. Such plants likewise will offer a market for cream handled by the produce association. This subject will receive full attention in the Marketing Conference this afternoon.

Soybean Association

"Approaching the marketing season of 1932, the Soybean Marketing Association, because of its peculiar ability to negotiate in terms of large volume, succeeded during the month immediately preceding the marketing of beans last fall to raise the Illinois country price of beans from 37-38 cents to 46-47 cents per bushel. This fact will not be disputed by anyone in a position to know. Within itself, such a service justified a much larger volume of beans than had been previously marketed by the organization. Its experience, however, was to the contrary, as its volume shows a great decrease from that of the previous year. Every bushel of beans sold by the organization was at the time of its sale disposed of on a premium basis above market price. Nearly all of its beans have now been disposed of. Thirty-five cents (35c) per bushel has been returned to each of its pooling members, and final settlement should be made and available in the near future.

"It is my belief that the officers, board of directors and interested members throughout the soybean territory of Illinois should convene without undue delay and make preparation for the complete reorganization and capitalization of this organization on a sound business basis. I am sure the service it has rendered, the influence upon price which it has had, and its reputation for sound business practice provides a basis upon which will yet be builded one of the strongest and most serviceable co-operative marketing institutions yet developed in the State of Illinois.

Illinois Grain Corp.

"The Illinois Grain Corporation has enjoyed a good year notwithstanding the insidious propaganda continuously put forth by opponents of co-operative marketing to confuse and misguide the grain producers of the state. This corporation is now the second largest regional of the Farmers' National Grain Corporation. Its membership now numbering 111 farmers' co-operative elevators and grain associations, handled 9,140 cars of grain during 1932 or approximately 14,500,000 bushels. This shows an increase of 30 per cent in grain handled over that of the previous year.

"The corporation paid its cumulative dividends for 1931 and 1932 during the year, and placed in its surplus account $29,909.00. In addition, it received from Farmers' National Grain Corporation a stock dividend carrying a par value of $52,815. In my judgment, the corporation is justified in declaring and distributing a substantial patronage dividend at this time.

"Although only in its infancy, such a record certainly entitles the Illinois Grain Corporation to much greater and widespread support by the grain producers of this state in efforts to secure control of their own marketing machinery.

Serum Association

"The Farm Bureau Serum Association handled a total of 41,011,000 cc of serum and virus during the year. This volume had a contract value of $185,176. While it is difficult to appraise the savings made possible by this co-operative enterprise, a survey of prices prevailing in adjoining states indicates a saving equivalent to 15 cents per 100 cc on both serum and virus, or a total of $61,517.

Holding Company

"The Illinois Agricultural Holding Company was organized in the spring of 1929 for the purpose of acquiring the stock of Country Life Insurance Company. The first Preferred stock is held by the Farm Bureaus and Farm Bureau members throughout Illinois; the Second Preferred Stock and Common Stock is held by the Illinois Agricultural Association. All of this stock is limited to 7 per cent cumulative dividends. At the time of its organization, it was recognized and understood by the Farm Bureau leaders of Illinois that all dividends reaching the Holding Company as a result of its ownership of the stock of Country Life Insurance

(Continued on page 12)

Smith

(Continued from page 11)

Company, were to be distributed, after the payment of stock obligations, according to the provisions of a contract running between the Illinois Agricultural Association and the Illinois Agricultural Holding Company. These contracts were duly presented, considered and approved by the delegates and stockholders in attendance at previous annual meetings of the Illinois Agricultural Association and the Illinois Agricultural Holding Company.

"The real purpose of this Holding Company is to provide a legal way in which excess savings and earnings accruing from its ownership of stock in Country Life Insurance Company can be distributed to Farm Bureau members holding policies in Country Life, and to holders of the First Special policies issued by the company immediately after its organization.

"I am particularly pleased to report that the board of directors of the Illinois Agricultural Holding Company, at its last meeting, authorized the distribution of $48,000, according to the terms of the agreement mentioned, which will be distributed in the very early future. Such a distribution coming at the end of a period such as we have been passing through again furnishes proof as nothing else could, as to the soundness of and great possibilities in organized effort. The Holding Company occupies a peculiar position. Ordinarily we think of a holding company as an organization set up for the purpose of absorbing excess earnings resulting from its stockholdings. Our Holding Company is set up to make possible a legal distribution of all earnings over and above cumulative dividend requirements.

"I cannot refrain from expressing a feeling of satisfaction and pride at the achievement of these various business service corporations operating under the general management of the Service Company. In a large measure credit for the continued success of these companies is due to the active and aggressive attention given to the affairs of each company by its active manager, and by others participating in different degrees of responsibility.

"I do not hesitate to say most definitely that the results obtained by each company and the splendid relationship existing between companies and their active management fully justify repeated statements I have made to annual meetings of the Illinois Agricultural Association, that the Illinois Agricultural Service Company is essential as a safeguard to the progress of each company and in addition, assures a proper balance between business services and co-ordination of all efforts."

State Legislation

Reviewing the passage of the income tax act and the subsequent adverse opinion of the State Supreme Court as to its constitutionality in which the court held that "income" is "property," he said: "I recommend, therefore, that the delegates take action authorizing and directing the officers and board of directors of the Association to immediately seek full application of the principle of law (place incomes on property tax rolls and relieve tangible property thereby of one-fourth its tax burden) as laid down by the court in this decision."

Mr. Smith also advocated revenue reform to spread the base of taxation, and reviewed unemployment relief measures and the $20,000,000 bond issue which due to the I. A. A.'s active support and the co-operation of other groups was passed. As a result, Illinois farms were relieved of $5,000,000 additional taxes in 1933, a saving of approximately $25 per farm.

On the question of a state sales tax, he said: "We believe the sales tax proposal now pending in the General Assembly to be unfair and unsound, particularly in its provision for distribution of the revenue derived therefrom. We believe that any law providing new sources of revenue should insure its full use to reduce or replace taxes now levied upon property. We are told by the defenders of this bill that it is a temporary measure and will be repealed as soon as the Government can be relieved of responsibility for taking care of the large number of unemployed. History discloses, however, that when we provide new sources of revenue for temporary purposes, they usually become permanent and seldom, if ever, are repealed.

"When new sources of revenue are provided, we believe that such revenue should be distributed fairly among the various counties of the state. Certainly no one can defend the fairness of a sales tax that enables Cook County to use all of the revenue collected therein. On the surface, such a proposal may seem fair, but only casual information forces one to other conclusions. A sales tax is ordinarily not paid by the seller of goods, but by the consumer. Our large mail order houses ship goods to all portions of the State but would pay sales taxes thereon in Cook County. But who pays the tax? It is usually consumers of the wares and goods sold. I am informed on good authority that more than 90 per cent of the tremendous sales at retail by the mail order houses of Chicago are made to people in other regions than this great metropolitan county, a very large part of them in the State of Illinois. . . .

"I believe we should immediately seek substantial reductions in maximum tax rates for each unit of government in the State of Illinois. In addition, I believe all minimum fees and salaries provided by statute for officers and employees of county and lesser units of government should be repealed. Until such reductions are accomplished, I see no way of bringing about substantial economies in the cost of our local governments.

"We must realize that after securing every economy of government that is in the realm of possibility, we must still find new sources of revenue if we are to remove from property its unjust portion of the cost of government.

"It seems that the time has arrived for the enactment of a state-wide sales tax. We must face the situation squarely, and see to it that the provisions of such a tax are equitable and fair and conform to the principles of taxation for which this Association has fought in the past.

"Therefore, I recommend to this annual meeting its approval of a state-wide retail sales tax of two per cent on all commodities except food and food products, with the understanding that any such measure, to have our support, must provide for the division of the revenue therefrom in a manner similar to that worked out by the 57th General Assembly for the distribution and use of revenues derived from state income tax. So far as we are informed, no one has ever questioned that the provisions of this plan adequately insure the full use of new revenues to replace taxes levied on property.

"In order to provide temporarily for our unfortunate among the unemployed, I believe we would be justified in approving a provision that in the year 1933 or 1934, any portion or all of the fund so allocated to any county may, by a two-thirds vote of its county board, be used for the purpose of taking care of its unfortunate. The provisions of statutes such as I have described would make the sales tax a replacement tax, and would provide a way by which such revenue could temporarily be used to meet urgent need for relief of unemployment in any county of the State."

Pointing to the enormous tax delinquency in Cook county which owes the state $22,000,000 and soon will owe $17,000,000 more, Smith said: "It is time to impress the leaders of Cook County with the fact that a depression exists in all of the other counties of the state, and that not only is each county forced to practice strict economy, but its citizens are making every effort to keep all their governments in operation by the payment of taxes. They must not be called upon to assist great metropolitan centers, either because of tax delinquencies by individual taxpayers or because local government in one county has failed in its obligations to the State of Illinois.

"It is conditions of this and similar kinds that demand eternal vigilance on the part of the organized farmers of Illinois, and they are entitled to and should receive the co-operation of all downstate units of government, all other citizens and particularly all home owners and other property taxpayers. . . . "

National Legislation ✓

Summing up the efforts of organized farmers over a ten year period seeking government recognition of the agricultural situation, he said: "Your Association has repeatedly and continuously insisted that the longer we delay a sound, adequate and permanent solution of our steadily increasing surplus problem, the more serious would become its effect upon all lines of American industry, and that sooner or later such neglect would undermine the economic structure of the nation. We all know that such a condition now prevails."

He traced the decline of net farm income from nine and a quarter billion dollars in 1920 to less than one billion in 1932; showed how taxes had mounted and farm indebtedness multiplied during this period.

"Other countries have had the genius and courage," he said, "to adopt policies that bring fair returns to their farmers while the United States, richest in natural resources of any, has been standing idly by.

"As a result of national policy based on legislation, wheat in November, 1931,

was bringing $1.62 in Paris, France; $1.46 in Berlin, Germany; and $1.43 in Milan, Italy, while at the same time in the United States, in Chicago, wheat was selling at 57 cents a bushel. In November, 1932, the average wheat price in Paris was $1.19, in Berlin, $1.29 and in Milan, $1.55, while in Chicago, the price was 45 cents.

"The average price for top quality hogs in November, 1931, was $11.55 in England, and $8.94 in Germany, compared with $4.82 in Chicago. In November, 1932, $9.13 in England, $8.36 in Germany, and $3.56 in Chicago.

"These are facts. They challenge the statesmanship of America. They challenge the farmers of America to better organize for effective action. . . . "

As a way out, he suggested, (1) raising farm prices, by whatever means, to a price level that will give them the same exchange value they had in the five year period immediately preceding the war; (2) uniform scaling down of both public and private debts; (3) changes in our monetary system to give us a commodity dollar.

Outlining the principles and contents of the domestic allotment plan bill, termed the "National Emergency Act," he said: "This legislation is directed toward the surplus problem, but more important, it has for its purpose immediate rise in the farm income from wheat, hogs, cotton, and tobacco. . . .

"It is my opinion the most immediate and beneficial effect that would follow the enactment of such a law would be to bring renewed courage and hope to farm people in the feeling that at last the Government is giving courageous attention to the justice of their demands. Further this bill will provide an opportunity for the development of a much more effective and permanent solution of our difficulties.

"I do not underestimate the tremendous obstacles that must be overcome to achieve these ends. Not the least of these spring from the deliberate propaganda from hostile forces that is intended to confuse the thinking of the American farmers, and to drive them apart—propaganda that tells consumers in one breath that the legislation, if put into operation, would cost them more than one billion dollars a year; that tells you in the next that the proposed legislation would greatly reduce the returns to the farmers; and that tells the public that the processers would be destroyed by the Act.

"There is a contradiction here which I defy even the most skillful propagandist to reconcile. . . . .

"It should be remembered that the opposition to the emergency solution of our acute problems we are now encountering emanates from the same sources that have fought farmers throughout the years in all efforts made to secure a sound national agricultural policy. It was the influence of this selfsame group that resulted in the weaknesses and limitations of the Agricultural Marketing Act at the time of its passage. They now attempt to place responsibility for these weaknesses in the Act upon the shoulders of farm organizations, and they also bitterly criticize the Federal Farm Board for failure to secure results from the Marketing Act when they well know it is the same weaknesses and limitations within the Act, for which they are responsible, that have made it impossible for the Farm Board to assist in securing such adequate control of crop surpluses as is necessary to keep these surpluses from depressing the price of the whole crop.

"While we carry no responsibility for weaknesses in the Marketing Act, and have no brief for any mistakes that may have been made by the Farm Board in its administration; yet it behooves the farmers of this country to keep intact such provisions of the Marketing Act as have been helpful in the building of co-operative marketing institutions and defend the Farm Board for all earnest and sincere efforts put forth in administering these provisions.

"Before passing on to other matters which must be touched upon, I want to drive one truth home into your minds so that it will stick there even if everything else is forgotten—farm conditions will be improved, and farmers' problems solved, if, and when, and just to the extent we farmers make up our minds to ignore hostile and destructive propaganda that is intended to divide us, and determine that we will work shoulder to shoulder, through our organization, until the battle is won."

Referring to the National Emergency Act as an emergency measure only, Mr. Smith urged the necessity of adjusting production to the domestic market, pending resumption of international trade. "For my own part," he said, "I would favor even more direct steps to bring about the production adjustment that is necessary if we are to stop creating and piling up farm surpluses. I would at once provide for Government rental of lands that must be taken temporarily, at least, out of production, so as to provide an opportunity for the absorption of the present burdensome surpluses. The mere announcement of such a program with the conviction on the part of the people, particularly processors of such given commodities, that substantial reductions were to be made, would bring about real improvement of price levels of these commodities.

"I know of no governmental expenditure of money that has been or could be so effective in restoring public confidence, in opening up new avenues for purchase, in making possible the payment of interest upon debts, premium upon insurance, the payment of store bills, etc., as would be brought about by such a program. All of such added income reaching farm people would be used immediately in the channels of trade, and financial economists tell us that money distribution in this manner would be turned over from fifteen to twenty-five times within the following year.

"As a permanent solution of this problem, it is my belief that Government should assume leadership in the development of a program designed for the intelligent planning of our agricultural production. . . .

Economy In Government

"For many years, the I. A. A. has occupied an outstanding position in urging a reduction in the cost of Government as well as an equitable distribution of the necessary costs thereof. The present depression has given rise to many and various types of organizations, seeking arbitrary reduction in costs of government. We cannot but view with regret as well as concern many of the suggested programs for bringing this about. The I. A. A. will go as far as any group, or institution, within the State of Illinois to secure intelligent pruning of public services and to put into effect every possible economy. We are willing that services made available to agriculture, both in the state and nation, shall be curtailed in proportion to curtailment of services provided for other groups.

"We insist, however, that some of the efforts being promoted by certain business groups of our cities to make radical reductions in appropriations for agricultural projects will not be countenanced by the farm people of this country. . . .

"In their attacks upon the extension service and our experiment stations, and when speaking of the tremendous total appropriated for the department, they leave the impression that the enormous sums mentioned ($317,000,000) are expended for these particular purposes. As a matter of fact, less than $15,000,000 covers the total appropriations for all of our experimental and extension work.

"I am sure I speak the sentiments of a large majority of the farmers of Illinois in saying to those charged with the direction of our national and state governments that our full co-operation is available toward the intelligent pruning of public appropriations for agricultural purposes in full proportion to economies that are put into effect in the general structure of government. We insist, however, that farmers be consulted as to what portion of agriculture's departmental program shall be affected and curtailed. Farmers resent efforts being made by those prompted only by selfish interests, to dictate what services Government can and should render farm people.

"I am firmly convinced that there never was a time when thorough, constructive and militant organization of farmers was more needed than now. We are at the turn of the road. Either agriculture is going to be recognized and recognized to the extent of its importance in our national economic life, or through a continuation of belated and half-way measures farmers will be permanently committed to that level on which they can barely survive and contribute necessary food and other raw materials to the balance of the population.

"Only by thorough and proper organization can 200,000 scattered farmers in Illinois, or six million farm families in the United States, hope to regain in whole, or in part, a fair share of the national income and the distribution of necessary costs of Government among all the people according to their ability to pay.

"I trust every Farm Bureau member attending this convention may go home definitely resolved to make organization his or her uppermost thought throughout the coming year. More time spent by farm people to secure a genuine understanding of their problems, and less attention to the continued production of burdensome surpluses, would be the most profitable time that could possibly be spent in 1933.

"Farmers have in the past been the (Continued on page 16, first column)

N SURANCE COMPANY
rn Street Chicago, Illinois.

Manager "Larry" Williams talking at Country Life's Conference at Pere Marquette Hotel, Wednesday, Jan. 25.

Country Life Agents Meet In Enthusiastic Session

Plan For Big Year in 1933, Joint Conference for all Agents Held

GENERAL and special agents to the number of about 350 were present in the Grand Ball Room of the Pere Marquette Hotel at Peoria, on Wednesday morning, Jan. 25, for the conference of Country Life Insurance Company, held in connection with the annual meeting of the the I. A. A. L. A. Williams, manager, presided and the session was marked by great enthusiasm over the record of accomplishment of the Company during 1932, as well as optimism over 1933 prospects.

Reviewing the work of the Company in the year just closed, Mr. Williams pointed out that Country Life now has more than $47,000,000 insurance in force, an increase of considerably more than $3,000,000. Laspes of policies, on the other hand, totalled less than 14% of the normal expectancy and an extremely good record was made in holding down operating expenses, all of which redounds to the advantage of the policyholder.

Plans for the coming year were outlined by Mr. Williams and received the enthusiastic support of all present. Confidence was expressed that regardless of adverse business conditions prevailing at the turn of the year, the 1933 record would equal if not surpass that of its predecessor.

Dr. John Boland, medical director of Country Life, dwelt on mortality and risk selection in his talk to the agents, pointing out that the extremely low mortality figures were of distinct advantage to policyholders in that they increase dividends and that this record has been accomplished and can only be continued through continued cooperation between the medical department and the agents in the field in selecting the best possible risks for Country Life policies.

Clarence Ramler, service manager, explained the working of the Home Office for the benefit of the newer agents and made a number of suggestions for cooperation between the field force and the home office force for the improvement of service to policyholders.

On the afternoon of the same day, there was a joint meeting between the agents selling life, automobile, and fire and crop insurance which was addressed by the managers of the respective insurance organizations.

Mr. Vaniman spoke on "Coordinated Effort," Mr. Williams on "The Psychology that Never Fails," Mr. Richardson on "The Economies of Cooperative Insurance" and Mr. Kelker on "The Agent's Opportunity."

Thursday evening the annual dinner of the Country Life General Agents Club was held in the La-Salle Room of the hotel. This organization is composed of general agents who make their sales quotas, as well as such special agents as write fifteen applications in any one month throughout the year. Claude Hicks of Livingston County was selected as president for the ensuing year succeeding H. O. Henry, Effingham County.

Smith

(Continued from page 13)

backbone of America in meeting and overcoming serious dangers confronting the nation. Their continued stamina, courage and determination, coupled with the fast increasing support of thinking business interests will again meet and overcome present difficulties. The time has arrived for directing our thoughts to facts and not fiction; truth instead of propaganda; for action and not debate. To this end, our efforts must be dedicated, for only through constructive thinking and united action can agriculture hope to gain its rightful position in the economic life of the nation, and can the nation hope to survive."

Farm Advisers Name Whisenand President

J. W. Whisenand, Peoria county farm adviser, was named president of the Illinois Association of Farm Advisers at the annual meeting of the organization during Farm and Home Week at the University of Illinois on January 20.

J. W. WHISENAND

L. E. McKinzie of Schuyler county was named vice-president, Geo. H. Iftner, Effingham county, secretary, and S. G. Turner, Livingston county, treasurer.

Mr. Whisenand succeeds Ray C. Doneghue of McDonough county. Whisenand is one of the oldest farm advisers in Illinois in point of service. He left the animal husbandry department of the State College of Agriculture more than 10 years ago to take a position as associate farm adviser in Iroquois county. Later he became farm adviser in Henry county where he served ably for many years. When Wilfred Shaw resigned to become manager of the Illinois Milk Producers' Association Whisenand was invited to take the post as farm adviser in Peoria county where he has been successful in maintaining a strong organization and developing a broad program of service to the farmers of the county.

The Money Question

Our Nation Can't Continue With Half Its People On One Price Level And The Other Half On Another Says Henry Wallace

EVERY country except the United States, Holland, and Switzerland has eased the internal problem for debtors by depreciating their currencies and raising prices, Henry A. Wallace, editor of Wallace's Farmer, told more than 1,500 men and women who attended the Friday morning session of the recent I. A. A. convention held in Peoria.

An honest way out of our difficulties, he said, is to reduce the grains of gold in the dollar. Another way out is not to balance the budget and float gracefully off the gold standard as France did. One thing is certain, the United States is a dominant economic force in the world, and if this country starts back to normal prosperity the rest of the world will undoubtedly start with us.

Wallace expressed the hope that silver would be used on a world-wide basis through symmetalism by which paper currency would be redeemable partly in gold and partly in silver rather than in one or the other exclusively.

Debt Adjustments

Debt adjustments, he said, only temporize with the situation. It is difficult to make debt adjustments uniform in treatment. The farmer has been caught in a trap or enclosure with four walls something like a bunch of cattle. When we push on one side to get out, our opponents tell us to try the other side. There are several ways to ease the predicament in which we find ourselves. One way is to raise farm price levels with legislation like the domestic allotment plan, another way is to devalue the dollar. When Fred Lee, your next speaker, suggested to an insurance man who was in Washington that his company write down their farm mortgages 40 per cent, he threw up his hands in alarm and said: "If we do that how can we pay our death claims?" Before, he had opposed price raising legislation, but after thinking it over he became an ardent advocate of establishing higher price levels.

The public and private debt of the United States, Wallace said, is close to 200 billion dollars whereas the national wealth is estimated to be not much more than 180 billion dollars. "Something is going to snap," he continued, "we can't continue on our present basis trying to pay our debts with prices half or less than they were when the debts were created. Our nation cannot continue much longer with half its people on one price level and the other half on another. The tension is too great.

Effect of Deflation

"Some people say that the proper way to deal with this situation is to go ahead with the deflation. This means that debts and taxes must be cut in half, and that the rates of public utilities and railroads must be reduced very materially. If the reduction in debts is accomplished by the customary procedure of bankruptcy and sale of foreclosed properties, there can be no large volume of construction activity in the cities until 1937 or 1938. If the freight rates are brought down and the railroads thrown into receivership, the effect on the insurance companies may be disastrous because they hold about three-fourths of the railroad bonds. If farm mortgages are cut in half, the insurance companies may again be embarrassed because they have to pay their policies in full. Some people think there is something fine, righteous, pure and high-minded about deflation and that inflation is something wicked and luxurious against the laws of God and man. As a matter of fact, what we want is neither inflation nor deflation but stability at a price level which will do the maximum of justice between debtor and creditor.

"Our present monetary system is based on the theory of a fixed price for gold without regard to the law of supply and demand. For more than 50 years in the United States, the price of gold has been $20.67 an ounce no matter how scarce or how abundant gold might be. If the law of supply and demand were really functioning with respect to gold, the price might well have gone down to $10 an ounce during the early part of this century, whereas at the present time, in view of its scarcity, the price might well be $30 or even $35 an ounce. In times like these, it is barbarous to compel all industries to adjust themselves to a suspension of the law of supply and demand with respect to gold. This has been recognized in every country but the United States, Holland and Switzerland. All of the others have at one time or another during the past 10 years devalued their respective units of currency and, in so doing, have eased the burden of debt.

"It has ever been thus. When debts have reached an impossible point, and repudiation on a scale sufficient to endanger the creditors has started, it has been customary to reduce the amount of metal behind the unit of currency. Oftentimes this has not been done openly but by issuing paper currency and government bonds.

Col. Ayres' Prediction

"At Cincinnati I heard Colonel Leonard Ayres of the Cleveland Trust Company say that he thought the year 1933 would be known as the year of the great battle between the inflationists and the deflationists and that in his opinion the inflationists would lose, as usual. Colonel Ayres is a very level-headed man for whose judgment I have the greatest respect. But in this case, I am inclined to think he is wrong. The continuance of present prices means such a volume of foreclosures, bankruptcies, receiverships and failures that no man in his right senses can think about them without wanting to do something to bring a more even-handed justice between debtors and creditors. We must have inflation but it must be a controlled inflation. We must avoid an uncontrolled inflation such as that which plunged Germany over the precipice after the World War.

"The most honest method of controlled inflation is to increase the price of gold from $20.67 an ounce to $30 an ounce. This is the same thing as reducing the weight of gold behind the dollar from 23.22 grains, as at present, to 16 grains. If this were done, the foreign currencies would at once be able to buy more dollars and, therefore, more pounds of wheat, lard and cotton. The price of our exports in terms of British pounds and French francs would not go up but in terms of American dollars, the price would be materially higher. The price of imports into the United States would also be higher in terms of American dollars although there would be no increase in the price in the country from which they came. Domestic prices would move more slowly.

Objections To Reflation

"The common objection to devaluing the dollar is that more than 50 billion dollars of contracts have in them the celebrated 'gold clause.' The 'gold clause,' it is claimed, would compel a man who

owes the money in terms of gold to pay perhaps $140 in currency to settle the obligation, whereas he expected to pay only $100. It happens that farmers are very little affected by this situation because more than 90 per cent of their contracts do not have in them the 'gold clause.' Other nations have not written 'gold clause' contracts because they have been common sense enough to realize that if the emergency were great enough to push a nation off the gold standard, it would also be great enough to cause an abrogation of the contracts. As a matter of fact, this is exactly what would happen in the United States. It is my guess that in case we go off the gold standard, the 'gold clause' will either be proved unconstitutional or a law will be passed taxing away completely any profits resulting from the 'gold clause.' Congress has the right to abrogate contracts and I feel confident it would do so in a case of this sort. Moreover it is likely that public sentiment would make it unhealthy for anyone to attempt to collect 'gold clause' profits.

Need International Conference

"The other argument customarily presented against devaluing the dollar is that the matter cannot be taken up in Congress without creating a panic. Under the constitution, Congress is given the specific duty of 'coining money and regulating the value thereof.' It is claimed that Congress is a debating society and cannot act promptly in case of emergency. Some people say that it would be all right for the United States to devalue the dollar if it could be done overnight in the same way as England did it.

"Devaluing the dollar would at once give us the whip hand in holding an international monetary conference. At the present time, foreign nations competing with us for the markets of the world are exceedingly anxious to keep us on the present gold standard. A great variety of proposals might be considered at an international monetary conference. A definite effort might be made to set up an international bank in some neutral country, like Switzerland, to which the Federal Reserve System of the United States and the central banks of the other nations would contribute one-fourth of their gold reserves. This international bank might issue an international currency and take care of the bookkeeping debits and credits in international trade. Eventually it may be possible for the international currency to represent constant purchasing power in terms of the basic commodities which move in world trade. Inventions of this sort are scientific and can eventually be made to work when international fears and hatreds are to some extent overcome. . . .

England More Sensible

"It is unfortunate that the wild-eyed inflationists of the thirties, seventies and nineties of the last century should have so scared our bankers and financial leaders that it is impossible for them to think sensibly in the present emergency. England has understood from past history how to handle her monetary matters more sensibly than we. Her problem has been enormously more difficult than ours but she has handled it much more skillfully. Many people in England feel that the Federal Reserve System of the United States has not only handled the monetary problem in such a way as to damage the United States, but the rest of the world as well.

"There are a few people who believe that the United States is such a dominant figure in world affairs that the all important thing is for her to get business activities started again and that it doesn't make a lot of difference which monetary method is used. These people claim that inasmuch as the United States consumes a very high percentage of the world's rubber, silk, coffee, etc., and inasmuch as she holds 40 per cent of the world's monetary gold and also inasmuch as the hopes and fears of other nations go up and down with what is going on in the United States,—it is simply a matter of the United States striking out boldly. If our prices go up and our activities start, business will revive over the entire world. It is confidence which makes for high velocity of credit and money. It is confidence which will bring the money out of hiding, most of which is said to be hoarded in bills of $1,000 or more. Some of the people who hold to this theory claim that confidence is more likely to re-establish itself if there are no inflationary measures whatever. I might agree with them if it were not for the fact that there is a world wide fear of gold shortage. Furthermore, the currents of trade between the United States and the rest of the world are being cruelly interfered with by the fact that we have not reduced the quantity of gold behind the dollar to the same extent as the rest of the nations of the world. If the United States is to restore herself to her normal parity with outside nations, she should reduce the weight of gold behind the dollar by at least 25 per cent.

We Forced 'Em

"It must be recognized, of course, that the foreign nations have been forced into currency depreciation partly as a result of our high tariff and our attitude on the inter-governmental debts. Some of the leading foreign nations finding that we could not learn to behave as a mature creditor nation should, decided that we were vulnerable through currency and gold manipulations. It is reported that certain large bankers have on occasion shifted 100 million dollars in gold back and forth between the United States and France. When gold is shipped out of a country suddenly, prices tend to fall on the stock exchange, whereas when it comes into a country, prices tend to rise. It is, therefore, possible by handling large gold shipments and by buying and selling stocks, to conduct a huge 'shell game.'

"We must adopt new rules for the banking system of the world. These rules must make it possible to maintain a stable price level from year to year. If the rest of the nations of the world are not yet ready for such rules, the United States should adopt them by herself. Holding, as she does, 40 per cent of the gold of the world and dominating the world trade in many fundamental commodities, she can eventually force the other nations to adopt her rules if they are fundamentally sound and just.

"The first step is for the United States to inflate to the same extent as England. The next step is for the United States, England, France and Germany to hold a monetary conference and agree on uniform rules of procedure. At such a conference should be discussed the money problem, tariffs, inter - governmental debts, tonnage quotas, currency quotas and all of the other things which are now so upsetting the world."

Harriman Suggests Way Out of Economic Storm

The well being of agriculture is the key to national prosperity H. I. Harriman, president of the U. S. Chamber of Commerce, said in his address before the annual I. A. A. banquet the night of Jan. 26. The balance between agriculture and other groups must be restored. There is no gain for anyone when prices are below cost, wages are low and buying power is gone.

Harriman recommended stabilization of the dollar with the index of commodity prices, the unshackling of business, opening up of trade and commerce through the removal of tariff barriers, and reduced government expenditures along with higher farm prices as the way to restore national prosperity.

As a long range solution to the farm problem he advocated taking marginal lands out of production and encouraging the use of agricultural products for other purposes than food. He suggested that farmers make a study of the possibilities in using ethyl alcohol as an adulterant of motor fuels.

Something must be done immediately, he said, to restore farm prices. "Too much peanuts" was his comment on the domestic allotment bill which passed the House.

In introducing Mr. Harriman, President Smith called attention to the fact that for the first time the president of the American Farm Bureau Federation and the president of the U. S. Chamber of Commerce were speaking from the same platform. This is indicative of better co-operation between business and agriculture for the welfare of the nation, he said.

A number of I. A. A. staff members and convention visitors including Larry Williams, Ray Miller, George Thiem, Vernon Vaniman, Lee Quasey, Frank Gougler, G. C. Johnstone and Mrs. Burl Hornbeek talked over Ed Bill's Station WMBD, Peoria during the three day session. The address of H. I. Harriman on Thursday night also went out over this station.

Metzger Tells How $4.50 Membership Fee Is Spent

Compares I. A. A. Service Program To Machine Capable of Benefiting More Members

COMPARING the services and associated companies established by the I. A. A. to a great machine designed to divert part of the profits from the sale of farm products and the purchase of farm supplies to Illinois farmers, Secretary George E. Metzger in his annual report said, "the machine is large, and it may need refining in some parts, it may need more skilled mechanics to handle its operation but it is capable of serving many thousands of Illinois farmers in a much better way than they are now being served. We must develop a program of organization and education to inform members and non-members how they can benefit through taking advantage of these services."

GEO. E. METZGER

He urged that farmers use the co-operative selling agencies so as to increase the volume of products handled that the full benefits of organized bargaining power may be realized.

Expenditures Cut 25%

Commenting on membership dues he said, "A great deal of thought has been given to this question by sincere friends of the organization. Enemies of the Farm Bureau movement, too, have advocated reduced dues knowing that the most effective way to cripple the organization is by decreasing its income. Officers and directors of the Association have not been unfriendly to suggestions for cutting expenditures. Substantial cuts have been made in our operating expenses. Salaries and operating expenses have been reduced more than 25 per cent. But an analysis of the pay roll and total expenditures of the organization shows that if all salaries were cut out and the staff paid nothing for its services it would reduce the total expenditures of the Association only 24.4 per cent. This would lower the total fee only about one dollar.

"A substantial item of expenditure in your Association is that of travel. Railroad rates have not decreased. In the operation of automobiles the allowance has been reduced from seven to four cents per mile. Every possible economy has been made where it would not interfere with service to members.

Salaries Less Than Fourth

"It may be of interest to the delegates and members to know how the $4.50 dues in the I. A. A. are spent; Salaries constitute 24.4 per cent of the Association's expense; travel, 4.6 per cent; clerical help, 10 per cent; annual meeting, 3.2 per cent; travel and subsistence of the board of directors, 2.4 per cent; expense of advisory committees, .6 per cent; finance committee, .5 per cent; general conferences, one per cent; district conferences, .2 per cent; county meetings, .4 per cent; per diem, travel and office expense of the president, 2.8 per cent; secretary's office, 5.6 per cent; treasurer's office, 5.4 per cent; comptroller, .3 per cent; legal service, 5.4 per cent; marketing program, 15.01 per cent; organization, 28 per cent; publicity, including publication of RECORD and Illinois Section of Bureau Farmer, 8.2 per cent; taxation department, 3.9 per cent; transportation, .8 per cent.

How Dues Are Spent

"The $4.50 membership fee when split up among the various activities and departments of the Association is as follows:

Annual meeting, 1932	$ .174
Board of directors' travel and subsistence	.129
Advisory committee work	.03
Finance Committee	.026
General Conferences	.052
District Conferences	.01
County Meetings	.014
Maintenance of President's Office	.153
Secretary	.305
Treasurer and his office	.289
Comptroller	.018
Department of Taxation	.209
RECORD, Bureau Farmer, Publicity	.441
Legislative Program	.106
Organization and Membership Maintenance	1.51
Limestone-Phosphate Department	.144
Business Service	.02
Clerical help	.59
Rent	.267
Marketing	.816
Legal Service	.288
Transportation	.044
General Office	.108

"Our experience shows that a reduction in membership does not increase the number of members. When counties, or states, have decreased membership fees they have usually lost members rather than gained because of the almost immediate reduction they necessarily had to make in their service program. Experience in the middle west during the past six years has proved that the states with the higher membership fees have retained the higher number of members. It seems that farmers don't care to belong to an organization offering little or no service even though the membership fee is small.

"In a few counties in the state nearly 70 per cent of the farmers residing therein are members of the Farm Bureau. An increase of 10 per cent in the membership in those counties is probably all that can reasonably be expected. On the other hand, we have a few counties where it would seem possible to increase the membership 200 per cent. It does not seem unreasonable to expect that 100,000 farmers in Illinois should be carrying membership in the organization.

"We have built a fine machine offering real benefits to the farmers of this state. Let us make every effort in the coming year to use this machine to greater capacity and extend the benefits to a larger number of members."

Newspaper Men At The Convention

Peoria newspapers did a good job of covering the convention. The Journal was represented by Flaherty and Kinsey, the Transcript by Maggenheimer and Perry, and the Star by Mr. Johnson. Photographers were on hand from all three newspapers.

Floyd Keepers, managing editor, covered the meeting for Prairie Farmer.

Gifford Ernest of the Chicago News and Paul Potter of the Chicago Tribune reported the convention for their respective papers. Bob Howard of the Associated Press, Chicago sent the news out over the wires to all dailies in and beyond Illinois having A. P. service. Howard is a son of J. R. Howard of Iowa, first president of the American Farm Bureau Federation. Flaherty took care of the Chicago Herald Examiner and Johnson filed stories for the International News Service.

Farm Supply Co. Officers

Officers elected by the board of directors of the Illinois Farm Supply Company at their recent meeting were: Fred E. Herndon, Macomb, president; Geo. F. Tullock, Rockford, vice-president; E. E. Stevenson, Streator, secretary; and R. A. Cowles, Bloomington, treasurer.

Directors who will serve in the coming year are Grant Broster, Grayville, J. M. Eyman, Warrensburg, Frank J. Flynn, Woodson, Fred E. Herndon, Macomb, H. A. Keele, Chesterfield, H. R. Neal, Lawrenceville, T. J. Penman, Yorkville, E. E. Stevenson, Streator, and Geo. F. Tullock, Rockford.

Illinois Leads All States In Membership

Report of Organization-Publicity Conference At Peoria Jan. 26 C. E. Bamborough, Chairman

FARM Bureau membership experience throughout the United States clearly reveals that if the organization is to maintain a service program offering real benefits to farmers it must be adequately financed. Reduction in dues by other State Farm Bureaus invariably has been followed by reduced membership.

M. S. Winder, secretary of the American Farm Bureau Federation, stated that when he served as secretary of the Utah State Farm Bureau the organization had a $10 membership fee, approximately 7,000 members, and a real service program which represented the farmers of the state in tax matters and legislation and carried on organized buying and other helpful projects. Then the Board of Directors decided to cut the dues to $5 in the hope of doubling the membership. The result was quite the contrary of that expected. The membership steadily declined largely because the Farm Bureau was forced to dispense with the services of its tax expert, organization director, and other employees. Within a few years the membership had fallen from 7,000 to 1,800.

C. E. BAMBOROUGH

Illinois Suffers Less

Secretary Geo. E. Metzger disclosed the results of a survey in other states showing the decline in membership since the high point of the past six to eight years. Illinois which has a higher membership fee showed a smaller percentage reduction than any middle west state, whereas the states having $5 fees and less showed the greatest decline. Several Farm Bureaus which have $10 dues showed greater reductions in membership than the I. A. A. but much less than reductions in the smaller fee states.

An open discussion was held on the question of the volunteer organization plan versus the paid solicitor plan. No conclusions were reached.

J. C. Spitler, state leader of farm advisers, reviewed extension work in Illinois over a 20 year period. He stated that few counties in Illinois ever had taken advantage of the 1913 act which allows county boards of supervisors to appropriate up to $5,000 annually for extension work in agriculture. Only three or four counties in Illinois make such appropriations at the present time, he said. It has been our experience that extension work and Farm Bureau organization thrive best where farmers themselves assume responsibility not only for maintaining the organization but also for directing extension and Farm Bureau work.

Improve The Product

George Thiem, director of information, called attention to the need for maintaining favorable public relations between the Farm Bureau, its membership, non-members, and the general public. If the Farm Bureau is not thriving, the first thing to do, he said, is to carefully analyze the situation, find out where the weaknesses are, and then correct them. When everything else fails try improving the product, said a wise advertising man. Let's apply that advice to the Farm Bureau. If the membership isn't up to par, try improving the service program and make it so attractive that farmers will want to belong. There may be weaknesses in the Farm Bureau management and if so this situation should be corrected, but oftentimes it is not so much the personnel as lack of aggressive administration of the service program. More attention to publicity to keep the members fully informed about their opportunities for profit in using Farm Bureau services was urged as one way to build stronger membership.

Robert A. Cowles, treasurer of the Association, led an active and valuable discussion on ways and means of collecting Farm Bureau dues. He outlined the collection plan developed by the treasurer, secretary, and Mr. Vaniman by which competent men are employed on a commission basis—not exceeding 20 per cent of the cash collected—to collect past due items. C. E. Carrier who was employed to collect in his home counties, strongly urged Farm Bureau leaders to act promptly in collecting dues before they are more than a year in arrears. "It is next to impossible to make collections," he said, "when the delinquent member owes more than one year's dues."

The board of directors of the Illinois Agricultural Association held 12 monthly meetings during 1932 with only four absences. The board held a brief session at Peoria Wednesday morning Jan. 25 before the opening of the regular meetings and conferences of associated companies.

Serum Association Makes Good Record In Past Year

Hear About Efforts To Prevent Farmers From Vaccinating

THE Illinois Farm Bureau Serum Association during 1932 handled more than 41,000,000 cc of serum and virus for the benefit of 77 member counties Secretary Ray E. Miller reported at the annual meeting, Peoria, Jan. 25.

The report showed the organization to be in excellent financial condition with a total net worth of $23,188.80. The Association paid dividends on all outstanding preferred stock. Cholera outbreaks, it was reported, were considerably less than in the previous year.

Some discussion was had regarding the efforts of organized veterinarians to prevent farmers from vaccinating their own pigs. The attack, brought to a head in the report of the so-called Shannon investigation committee, centered on farm advisers for their efforts in advocating livestock sanitation and disease prevention. It was brought out that the attack against Farm Bureau Serum Service was prompted by the reduced income and profits of veterinarians who believe that they alone should be allowed to immunize pigs.

All the evidence shows that for the most part farmers who vaccinate their own pigs are more careful in the use of serum and virus than professionals and that as a result there has been less loss in Illinois from hog cholera and other swine diseases since the Farm Bureaus took hold of the situation.

The fact that farmers are now saving thousands of dollars annually not only in the cost of protecting their herds against cholera, but also in the less frequent losses of livestock as shown by facts and figures, is unanswerable argument favoring the continuation of this helpful service, members agreed.

The report before the Shannon Committee regarding activities of the Farm Bureaus in hog cholera control and livestock sanitation work, together with many spurious conclusions was submitted by D. F. Luckey, secretary of the Illinois State Veterinary Medical Ass'n.

Directors of the Serum Association all were re-elected. Chas. S. Black of Jacksonville was added to the board as a representative of the Illinois Agricultural Association. Officers and directors of the Association are as follows: Samuel Sorrells, Raymond, president; Edgar Walther, Port Byron, vice-president; Ray E. Miller, Chicago, secy.-treas.; Adam McWilliam, Toulon; W. H. Stockley, Earlville; A. B. Schofield, Paxton; James Gillespie, Lawrenceville.

Auto Company Makes Wonderful Record In '32

President Smith and Manager Richardson Report on Progress of Organization

Your company is to be congratulated for finishing the year with the strongest financial statement ever presented to its policyholders, President Earl C. Smith reported at the annual meeting of the Illinois Agricultural Mutual Insurance Company, Peoria, Jan. 25. More than 600 attended the meeting.

A. E. RICHARDSON

"The assets now total $934,193.49 of which $890,008.28 is invested in high grade bonds," he said. "It is with pleasure that I report to you that not a single bond of this company has defaulted either in interest or in principal.

"During the past year the premium earned was $363,756.94. This item refers to assessments due and paid. During 1932 Illinois farmers purchased a greater volume of auto and employers' liability insurance through their own company than in any previous year. A total of 4,723 applications were received for auto insurance and 166 for employers' liability.

"While it is difficult to compare costs for the reason that there are many types of policies and many methods of operations," said Mr. Smith, "we can say without fear of contradiction that this company is saving its members more than a quarter of a million dollars annually on auto insurance alone when compared to the cost of similar insurance in any other company operating throughout the state."

20,000 Claims Handled

More than 20,000 claims have been reported to the company since it was organized. Of the large number filed there are only 46 unsettled claims which occurred prior to 1932. A year ago the audit report showed a reserve of $111,207 to cover 520 claims which were open at that time. All of these have subsequently been settled except 46, and on Jan. 1 this year a reserve of $54,051 was in reserve to take care of these remaining claims. If it should take all of this reserve, the company would have disposed of the claims open a year ago for $91,100.61 instead of $111,207, the reserve which was set up.

Manager A. E. Richardson and V. Vaniman, director of insurance service, discussed briefly acquisition experiences during 1932. Vaniman reported on the accident prevention work through the Illinois Farm Bureau Safety Club. He later presented Emory W. Parks of Macon county with a silver cup awarded by the Illinois Agricultural Association to the County Farm Bureau most active in accident prevention work.

Every chair filled at the Annual Meeting of Illinois Agricultural Mutual Insurance Co. in the Pere Marquette Hotel, Peoria, Jan. 25.

Agents Get Hats

Manager Richardson awarded three new hats to agents for the company making the best records during the December drive. The winners were E. A. Carncross of Cook county, R. P. Cothern, Ford county, and D. J. Auble of DuPage county.

Mr. Richardson stated that there was no consistent variation in the loss ratio between the various sections of the state. Contrary to expectations, the policyholders in the area closest to the largest metropolitan center in the state had comparatively fewer accidents than policyholders in some of the downstate areas. He stated that there has been a steady decrease in percentage of operating expense since the company was organized. In 1927 operating expenses took 31% of premium income whereas in 1932 it required only 18.2%.

Auditing Association Holds Annual Meeting

THE importance of proper and accurate accounting and auditing for farm co-operatives and organizations was traced by M. S. Winder, secretary of the American Farm Bureau Federation, in addressing more than 100 delegates and members at the annual meeting of the Illinois Agricultural Auditing Association in Peoria, Jan. 25.

Mr. Winder praised the Illinois Agricultural Association for its aggressive attitude and business policies as exemplified in the success of the many service companies each has established. He cautioned against too great economy at the expense of high grade service.

M. S. WINDER

Manager F. E. Ringham presented details about the organization's work during 1932 in which he reported the completion of 366 audit assignments for the 314 members of the Association.

Increase In Members

The membership showed a net increase of 13 for the year. He invited the co-operation of all member companies in an effort to secure a better distribution of the work of the auditors throughout the year. He stated that every effort had been made to reduce operating costs so that member companies might benefit through lower expense. He showed how the average service charge per member had declined from $107.06 in 1928 to $87.94 in 1932.

A. J. Gilfillan of Watseka who has served ably for many years retired as president of the organization and member of the board of directors. Directors and officers elected for 1933 were Albert E. Heckle, Quincy, president; Jesse L. Beery, Cerro Gordo, vice-president; Geo. E. Metzger, Chicago, secretary; R. A. Cowles, Bloomington, treasurer; C. R. Hays, Normal; Henry H. Parke, Genoa; R. H. Vorhees, Jerseyville.

Co-operative Finance New Field For Organization

C. V. Gregory and Department Directors Address Marketing Conference

THAT farmers must soon get into the field of co-operative finance was the assertion made by C. V. Gregory, editor of the Prairie Farmer, in the marketing conference at the recent I. A. A. convention. Approximately 800 interested members crowded into the ball room of the Pere Marquette Hotel and a large number were turned away because of lack of room.

The meeting was presided over by Samuel S. Sorrells, chairman of the marketing committee for the I. A. A.

SAM SORRELLS

"You have made millions of dollars in the past decade and that money has passed out of your control into banking institutions in all parts of the country," he said. "By organizing credit unions farmers' surplus money can be kept in the community where it is most needed. From such a beginning we can build larger institutions in the future. For the present and perhaps for some years to come we may have to depend on government credit, but farmers should begin to plan to set up their own financial credit agencies on a sound basis."

Not Enough Alone

In discussing co-operative marketing, Gregory said that the co-operative program alone cannot save the farmer today. He said they must adopt emergency measures. He expressed the belief that patronage dividends are being over-emphasized and are harming the co-operative program. He believes that the greatest opportunity in co-operative marketing lies in concentrating a large volume of products through the co-operatives to give them bargaining power in influencing prices.

W. H. Coultas reported that soybeans was one of the few farm commodities, if not the only one, that registered a price increase during 1932. This was due in no small measure to the volume of beans controlled by the Soybean Marketing Association he said, and to the Association's efforts in seeking and finding export outlets, also in stimulating new uses for soybean products.

F. A. Gougler, director of produce marketing, reported that more than 4,000,000 pounds of butterfat had been marketed during 1932 by co-operative produce associations. He told the delegates that developments in the industry had rendered necessary the establishment of co-operative creameries because of unsatisfactory outlets for cream, also because of the immense quantities of surplus milk accumulated on the principal fluid markets.

Much Surplus Milk

J. B. Countiss, director of dairy marketing, emphasized particularly the immense quantities of surplus milk which are being produced and urged that both cream producers and whole milk producers alike support the program as outlined by Mr. Gougler. He described the co-operative dairy marketing organizations in Illinois which are now serving practically every principal market.

H. W. Day, director of fruit and vegetable marketing, stated that the extensive use of the truck is a complicating factor in the marketing of fruits and vegetables. He stated that this situation could be corrected by the centralized sale of fruits and vegetables through the Illinois Fruit Growers Exchange and cited the accomplishments of that organization in marketing apples from western Illinois during the past season.

Harrison Fahrnkopf traced the growth of the Illinois Grain Corporation to its present membership of 112 elevators throughout the state. C. P. Cummings, manager, told the delegates that Illinois Grain Corp. had handled 9,463 cars of grain during the past year or 14,500,000 bushels, and had a present surplus of approximately $30,000.

Livestock Biggest Crop

Ray E. Miller, director of livestock marketing, stated that changing marketing conditions, particularly the use of the truck in transportation and the increase in the direct movement of livestock to packers has resulted in the decline of shipping associations.

To meet this situation the department organized the Illinois Livestock Marketing Association with 8 district co-operative assembling points and carried on educational work in 86 counties. During the 12 months' period ending September 30, 1931 Illinois farmers marketed through member agencies of the National Livestock Marketing Association a total of 23,463 cars of livestock. For the corresponding period in 1932 they marketed 23,762 cars, although during the same period terminal market receipts of hogs on the Chicago market declined 17 per cent.

O'Neal Lauds Work of Organized Illinois Farmers

A. F. B. F. President Tells About Lobbying at Washington in Stirring Address

IF every state had an organization like the Illinois Agricultural Association we would have little trouble in solving our problems, President Edw. A. O'Neal, of the American Farm Bureau Federation, said in a stirring address before the annual I. A. A. banquet in Peoria's mammoth armory on Jan. 26.

"The I. A. A. is the most influential state organization represented at Washington. Your state is carrying more than its share of the burden of fighting for the American farmer and you should feel proud of the contribution you are making for agricultural welfare in America," he said.

O'Neal gave an intimate description of lobbying at Washington for the domestic allotment bill and other farm measures. He predicted the passage of an honest dollar measure either in the present session or in a special session of Congress.

Roosevelt With Us

He expressed the assurance that President-elect Roosevelt will co-operate with organized farmers of the nation in working out a new policy for agriculture. Mr. O'Neal told of a conference he had had only a week before with the President-elect in which he secured a definite promise that everything he said in his Topeka address in regard to farm mortgages and surplus control, he still supports. He further confirmed this, said O'Neal, by asking help from Senator McNary, chairman of the Senate Committee on Agriculture, in passing the surplus control bill so that it could be expedited into law before March 4.

O'Neal stated that while farmers have been successful in securing attention in Washington other groups are spending from six to 50 times as much annually at the national capitol as is the American Farm Bureau. It is nothing unusual, he said, for industrial and business groups to spend more in one week sending men into Washington than we spend in a whole year.

The outspoken A. F. B. F. president expressed the belief that on farm legislation it is doubtful if the Congress could function without the leadership of the united farm organizations. The farm organizations have succeeded in crystallizing support behind a definite program and overcoming to some extent the lack of unity among the members of the Congress, O'Neal said.

(Continued on page 26)

Farm Supply Conference Peoria Well Attended

Hear of Tremendous Growth of Company In Recent Years, Big Gain In Future Orders

UTMOST confidence that 1933 will surpass even the remarkable record made in 1932 was expressed at the various conferences of officials of Illinois Farm Supply Company and officers of affiliated county companies held in connection with the annual meeting of the I. A. A. at Peoria. Approximately 350 attended the session.

L. R. MARCHANT

L. R. Marchant, manager of the Company, announced at the "Victory Breakfast" on January 27 that the Company now has on order 579,805 gallons of lubricating oil for 1933 delivery as compared with approximately 350,000 gallons which were on order at the same time a year ago. Sales for 1933 in all departments will exceed 1932, C. W. Ward, superintendent of sales, predicted, for a number of reasons. First the operations of the Company have increased enormously in scope, due to the extension of existing county supply service and to the formation of new companies; also to the fact that the managers and salesmen are better informed regarding their product, while the field offers plenty of room for expansion.

22 Exceed Quotas

Twenty-two company managers, who made or exceeded their quotas for 1933 delivery were guests at the breakfast.

At the conference held at the Board of Education Building on Jan. 25 at which F. E. Herndon, president of the Company, presided, special emphasis was laid on the scope of Company operations, and the importance of the supply business to the Farm Bureaus of the state. The annual report of the Company was reviewed and it was revealed that last year approximately 75,000 Illinois farmers were customers of the county service companies. Mr. Marchant pointed out that the organized buying power of 60,000 members of Illinois Farm Bureaus, plus the economies of group distribution effected through the county service companies, has resulted in a distribution of patronage dividends to member - customers amounting to more than half a million dollars annually. At this meeting also there was a general discussion of business methods, methods of improving service to the customer, and one of the interesting features was a chart showing that fifteen cents of the farmer's dollar spent with the county supply companies was returned to member-patrons in the form of patronage dividends.

There was much interest in the contest among the companies to sell their various quotas of lubricating oil for futur delivery. This contest was won by Carroll county with a sale of 159.5% of its quota. It was notable that the twelve high companies among the 52 competing averaged 135.75% of the quotas assigned to them. F. E. Bender, of Tazewell County, stood first in the contest among the salesmen, with a total of more than 6,400 gallons of oil to his credit.

Standing room only at the meeting of Service Company managers sponsored by Illinois Farm Supply Company, Peoria, Jan. 25.

Prospects for the coming year were favorable, the various speakers asserted, particularly in the line of fire prevention where the company's efforts since its inception have been unceasing and which J. H. Kelker, manager, declared are bearing more and more fruit, with satisfactory results in cutting down claims and keeping insurance costs at a minimum.

Hear Report Year's Work at Farmers' Mutual Meet.

Nearly $11,000,000 fire and lightning insurance on farm buildings and crops was written in 1932 by Farmers Mutual Reinsurance Company, it was reported at the annual meeting of the Company held at Peoria January 25. Geo. F. Tullock of Rockford, president of the Company, presided. About 300 were present.

This impressive amount of fire and lightning insurance was augmented by the following totals written by the various departments of the Company:

Windstorm, cyclone and tornado, about $6,000,000, farm crop hail insurance approximately $947,000 and hail on buildings about $615,000.

At the annual election the following were chosen as directors: Norman Flagg, Moro; G. F. Hayes, Aledo and J. M. Beckett, Blue Mound, the latter being a new addition to the board.

Grain and Livestock Conventions In Febr.

The annual meeting of the Illinois Livestock Marketing Association at Bloomington on Feb. 14, and the annual meeting of Illinois Grain Corp. at Peoria on Feb. 22 head the list of activities of organized Illinois farmers for this month.

Addresses by Earl C. Smith and Chas. E. Ewing will feature the meeting of livestock growers at the McLean county seat. Mr. Smith will discuss "The Essentials of a Successful Marketing Program," and Mr. Ewing will talk on the subject, "A Year with the National Livestock Marketing Association." The meeting will be held in the Farm Bureau building.

In addition there will be reports from Ray E. Miller and R. W. Grieser on the first year's business, and operation of the state sales office. Geo. F. Tullock will deliver the treasurer's report.

The annual meeting of Illinois Grain Corp. scheduled for Washington's birthday will be held in the Jefferson Hotel, Peoria. C. E. Huff, president, Farmers National Grain Corp. will address the gathering. Other speakers will be announced later.

Truck competition is costing the railroads at least $275,000,000 a year, according to an estimate of the U. S. Department of Commerce.

I. A. A. Business Service Real Aid To Members

Speakers Tell About Achievements and Outline Plans For Greater Growth in '33

ONE of the best methods of establishing and maintaining confidence of membership is to audit books and accounts periodically, Fred E. Ringham, manager of the Illinois Agricultural Auditing Association, said in the business service conference at the recent annual meeting in Peoria. Approximately 240 attended. Geo. F. Tullock acted as chairman.

G. F. TULLOCK

The audit serves to offset suspicion and counteracts whispering campaigns that may exist, he said. Careful audits enable the board of directors to plan effectively in overcoming their difficulties and in restoring their business to a profitable basis. The Auditing Association, he said, completed 366 audits for its member companies during 1932.

L. R. Marchant pointed out that the 52 companies associated with the Illinois Farm Supply Company did a business last year in excess of $5,000,000 which places the organization in a prominent position among the leading co-operative purchasing organizations in the United States.

Efficiency The Key

Marchant reported the results of a comparative study of local company operations which clearly indicated that the benefits to be derived in purchasing organizations depends largely upon the efficiency of the company handling the business. It was generally agreed that the State Supply Company and associated companies are rendering an excellent service to farmers over the state and that the Farm Bureau differential maintained was highly commendable.

It was stated that the limestone contract now in force between the Farm Bureaus and certain companies maintains the principle of the cash dividend to purchaser and the differential to Farm Bureau members. It also provides a small fee to be paid by the limestone company to County Farm Bureaus to partially offset the money outlay for soil testing service and equipment.

J. H. Kelker, manager Farmers Mutual Reinsurance Company, stated that the outstanding problem in the fire and lightning insurance field is determining the insurable value of buildings. Three points must be taken into consideration: (1) Actual value, that is, cost less depreciation; (2) Use value of building; (3) Moral hazard.

Interest More Members

Plans for a concerted effort in 1933 to interest every member in the casualty insurance program of the Association were outlined by A. E. Richardson, manager of the Illinois Agricultural Mutual Insurance Company. He further suggested that special attention and study be given to encouraging increased Farm Bureau membership by enlightening non-members about the benefits they can secure through affiliation with the organization.

L. A. Williams pointed out the need for interesting more County Farm Bureaus to become active in the life insurance program because of the opportunity to provide a beneficial money-saving service to members and for the 10 percent overwriting income received. Mr. Williams stated that Country Life and its agency system will return $146,000 in 1933 to policyholders as dividends and refunds.

V. Vaniman, director of insurance service, stated that the present agency system is working out satisfactorily and that 100 per cent co-operation between the county agency, general agent, special agents, and the company is the ideal to be obtained.

Butterfat Producers Set Five Year Marketing Goal

Change Name To Illinois Producers Creameries, Reorganize For New Year

THE year 1930 is going to mark the beginning of a new plan for marketing our dairy products. Our producers are going to undertake to process the butterfat produced on their farm through their own plants. Frank Gougler, manager of the Illinois Produce Marketing Association, stated the annual meeting was attended by more than 300, in Peoria, Jan. 25.

"Shall we not say that by 1937 we will make 35,000,000 pounds of butter co-operatively in farmer-owned and farmer-controlled plants," he continued. "Indiana started operating co-operative creameries five years ago and now they are making nearly 15,000,000 pounds of butter annually in these plants. We can surpass that record in the next five years. Are you ready to assist in putting it over?"

Opportunities Ahead

Gougler pointed out that the opportunities are attractive to cream producers in the co-operative field. First, the present method of assembling butterfat can be greatly improved, he said. The station method whereby approximately 2,000 stations in Illinois assemble cream, is wasteful and uneconomic. Most towns have from four to eight cream buyers. The volume handled by each station in a given town, for example, averaged only 15,625 pounds for the year.

"In establishing our own co-operative creameries we propose to replace the station idea with the trucking system. Cream will be trucked direct from farm to plant." Gougler expressed the belief that higher quality butter eventually would be made in co-operative plants because farmers would have a money incentive for delivering high grade cream. He emphasized the necessity of delivering a large volume of cream to each plant so as to reduce the cost of processing.

Figures were presented showing that plants manufacturing 100,000 pounds of butter or less did so at a cost of 3.5 cents per pound, whereas plants manufacturing 500,000 pounds or more reduced the cost to 2.4 cents per pound.

C. R. George, manager of the Producers Creamery, Marion, Indiana, gave an interesting talk in which he reviewed the progress made by organized farmers in that section of Indiana in manufacturing and selling their cream co-operatively.

Elect Directors

At the organization meeting which followed the reports and speaking program the following directors were elected: Wm. Krause, Lincoln; Ryland Capron, Peoria; Elery Leefers, Carlinville; Tom Jackson, Timewell; A. B. Schofield, Paxton; Herb Klowan, Rock Island; Harold Enns, Bloomington; Burton Leamon, Olney; and Talmage DeFrees, Smithboro.

The delegates and members voted unanimously to change the name of the organization to "Illinois Producers Creameries." The individual units will be known as ——— Producers' Creamery, each organization to carry the name of the town or city in which the creamery is located.

At the directors' organization meeting Wm. Krause was elected president, Ryland Capron, vice-president, and Elery Leefers, secretary-treasurer. Frank Gougler was re-elected manager.

The directors adopted a budget for 1933 and voted to employ the Illinois Agricultural Service Company as corporate manager.

Legislative Policies Up At Public Relations Conf.

Tax Measures, Tax Reduction, Utility Rates and Service Considered in Large Meeting

THE STATE sales tax, the effect of the Supreme Court decision on the income tax, exemption of uncultivated farm lands from taxation, tax reduction, and proposals for consolidating taxing districts featured the discussion before the public relations conference at the I. A. A. convention, Peoria, Jan. 26.

CHAS. S. BLACK

Chas. S. Black of Jacksonville, chairman of the advisory committee on public relations, presided before a large audience.

Mr. Smith pointed out objections from the farmer's standpoint to the sales tax measure pending in the legislature. He stated that the bill, to protect farm interests, should be so amended as to provide that the proceeds be used primarily to levy taxes upon property and that in the present emergency it be made possible for any county board by a two-thirds vote to use any portion of its share of such taxes for unemployment relief in 1933 or 1934.

Commenting upon misrepresentation of the I. A. A.'s position on the state sales tax appearing in a certain Chicago newspaper, Mr. Smith cited this as an example of careless if not deliberate misrepresentation of truth. Some curb should be placed on publications knowingly misrepresenting and misleading the public through false assertions, he stated.

Both Mr. Smith and John C. Watson, director of taxation, discussed the necessity of reducing the cost of state, county, and local governments. Watson pointed out that the proposed exemption of fallow land from taxation in Illinois is prevented in the constitution. He also discussed briefly the proposed limitation of the proposed tax rate of $1 or $1.50 per $100 valuation and the obstacles to overcome in accomplishing this worthy end.

It was stated that the Association expects to introduce a bill in the legislature providing a way by which farm land can be withdrawn from within the corporate limits of villages; also that the I. A. A. will ask for legislation to provide a later date for certifying school taxes. It is also proposed to introduce in the General Assembly a bill to place income on the property tax roll in accordance with the State Supreme Court decision holding that income is property. A proposed bill to tax oleomargarine containing foreign fats and oils also was considered.

L. J. Quasey pointed out that the time is here to demand lower rates for power, light, and telephone service based on downward revaluations of public utility properties.

Lower Valuations Now

The utility companies, he stated, heretofore have insisted that valuations shall be based on cost of reproduction. As a result, during the high cost period valuations were boosted and rates along with them. Now that we have much lower labor and material costs, it is only fair that valuations and rates shall be reduced commensurately.

Members were urged not to sign agreements for granting rights-of-way to pipe line and high tension electric corporations unless they thoroughly understand the contracts which they were asked to sign.

Quasey expressed the belief that the Illinois Waterway development not only affords an outlet for grain from the Mississippi Valley, but also promises to influence reductions in grain rates by rail.

The conference favored reductions in utility rates and particularly costs of rural electric lines. It recommended group action on public utility problems.

Col. Ayres Sees Danger In Price Level Inflation

"The problem of trying to forecast the business developments of 1933 is one that involves in large measure the attempt to guess or estimate the degree to which the policies of the new administration at Washington will be formulated with wisdom and its actions guided by sagacity," said Col. Leonard P. Ayres of Cleveland, nationally recognized economist, in a recent statement. "It is quite literally a problem of political economy rather than one of business economics."

He stressed probabilities of lower industrial wage rates, a lower cost of living, a greater number of commercial failures, less dividend payments, and lower interest rates.

There are two alternatives ahead, he said: inflation or adjustments "necessary for a resumption of normal business at lower prices. It is prudent to expect," he said, "that the long, hard grind of sound money will be chosen."

He believes that if a course of attempting to lift price levels by inflation should be chosen, the attempt would in all probability fail and the subsequent events prove disastrous.

Black and Skinner Head Baseball League in '33

Chas. S. Black, Jacksonville, was re-elected president and A. N. Skinner, Yates City, vice-president at the annual meeting of the Illinois Farm Bureau Baseball League in Peoria, Jan. 25.

A. N. SKINNER

The principal action taken was to amend the eligibility clause of the by-laws. Hereafter any Farm Bureau member or dependent member of his family, in good standing, shall be entitled to play in the League. Members who are in arrears more than six months will automatically be disqualified.

The new rule is largely an experiment to simplify the eligibility requirements and make it possible for young men closely associated in Farm Bureau work even though they are not actually living on the farm and working there full time, to play Farm Bureau baseball. Counties having teams were advised that it is up to them to keep the sport strictly on an amateur basis as a recreational activity for farm boys.

Roettger Speaks

Walter Roettger of Bloomington, outfielder for the Cincinnati Reds, gave a highly interesting talk in which he related his experiences in the big leagues, and told what is necessary for good team play.

"Team morale means hanging on when you're behind," he said. "A winning team must have good players but team spirit is highly important." He called the Cardinals team of 1931 the greatest he ever played with. "This team never quit trying," he said. "It was the Cardinals spirit that beat the Athletics that year."

Secretary George Thiem reported that the 32 teams competing last year played 120 official games according to reports received at League headquarters; that every team appeared for regularly scheduled games except where satisfactory postponement arrangements were made.

He urged that teams select competent umpires and then abide by their decisions. He stated that the State Arbitration Committee would refuse to review questions of fact regarding plays, and that if protests were made, they must be announced during the course of the game.

I. A. A. Sponsors Sales Tax Amendments

LEGISLATIVE representatives of the Illinois Agricultural Association were in Springfield on Tuesday and Wednesday, January 31st and February 1st watching measures pending before the General Assembly. They secured introduction, in the Senate, of amendments to the sales tax bill to provide as follows:

1.—Exemption from the sales tax of all food for human consumption.

2.—To make the sales tax primarily a replacement tax for educational purposes in the elementary schools instead of being primarily an unemployment relief tax.

3.—To remove from the State Emergency Relief Commission the power to decide for what purpose any county's share of the sales tax fund is to be expended.

4.—To permit diversion of the sales tax fund from educational purposes to unemployment relief purposes in any county only when the county board by two-thirds vote adopts a resolution requesting such diversion and files the same with the State Department of Finance.

5.—To distribute the sales tax fund not on the basis of collection, but

(a)—on the basis of assessed valuations of property as between Cook county and the other counties of the State.

(b)—On the basis of average expenditures for educational purposes in the elementary schools in all downstate counties.

These and other amendments offered to the sales tax bill were to be considered by the Senate Tuesday, February 7th.

O'Neal

(Continued from page 22)

He paid tribute to the leadership furnished by Illinois for the farmer's cause, mentioning Sam Thompson, Earl Smith, Geo. Peek, and Clifford Gregory. He gave much credit to Mr. Smith for his good work in securing a more favorable provision for hog producers in the domestic allotment bill.

"Weaker states in the Farm Bureau family are counting on Illinois to carry on as you have so ably done in the past," he said. "You members and leaders of the Illinois Agricultural Association have answered the call for leadership. You have fought a great fight in your state. You have shown great courage. Faith and courage and great leadership will give us a new day for agriculture."

NOTICE
ILLINOIS AGRICULTURAL ASSOCIATION
ELECTION OF DELEGATES

Notice is hereby given that in connection with the annual meetings of all county Farm Bureaus to be held during the months of February and March, 1933, at the hour and place to be determined by the Board of Directors of each respective county Farm Bureau, the members in good standing of such county Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of the Association, including the election of officers and directors as provided for in the by-laws of the Association.

During February an annual meeting will be held in Will county.

During March annual meetings will be held in Kankakee, McDonough, and Boone counties.

Signed,
G. E. Metzger, Secretary
Feb. 1, 1933

Farmers' Institute, Joliet

"Raising the Farmers' Price Level," will be the subject of an address by President Earl Smith on Thursday morning Feb. 23 at the annual Illinois Farmers Institute, Joliet. Henry Wallace, C. V. Gregory, Dr. C. L. Holmes and others will address the three-day session beginning Feb. 22.

Smith To Washington On Legislative Work

President Earl C. Smith left Chicago for Washington on Feb. 1 to work for the early passage of legislation to raise farm prices and relieve the farm debt situation.

John C. Watson, Donald Kirkpatrick, Robt. A. Cowles, and Chas. Black, chairman of the Public Relations advisory committee are representing the Association alternately at Springfield to protect the interests of Illinois farmers in legislation pending before the General Assembly.

Mrs. Meis Doing Well

Mrs. Henry J. Meis, president of the Illinois Home Bureau Federation, who was seriously injured in an automobile accident at a railroad crossing near Jacksonville in Morgan county, is making satisfactory progress toward recovery at her home in Pontiac. One leg was broken in several places and two ribs were fractured, in addition to other injuries.

Mr. Meis was fatally injured in the same accident. He passed away in the local hospital at Jacksonville.

Mrs. Meis was out on a speaking tour addressing Farm and Home Bureau annual meetings when the accident occurred.

Quality Milk Ass'n. Seeks New Agreement

As we go to press, efforts are being made by directors of the Quality Milk Association at Rock Island, Moline, E. Moline, and Davenport to work out a new agreement with milk distributors at the quad cities. The contract entered into last fall expired Feb. 1 when several dealers served notice that they would buy their requirements from unorganized farmers.

Possibilities of a milk price war loomed between dealers who disagree over co-operating with the Association. The fact that Quality Milk has members both in Iowa and Illinois is complicating matters. Davenport dealers are attempting to divide the Association and remove I. A. A.-Farm Bureau influence, thinking that by so doing they can have a freeer hand in dictating the basis of dealer-farmer co-operation, if any.

In the meantime, members of the Association have a market through their plant in Davenport which is manufacturing 93 score sweet cream butter commanding a premium price.

New Farm Bloc In Congress Announced

Formation of a farm bloc in Congress composed of approximately 150 members representing all parties and determined to secure legislation at the present session for the relief of agriculture and the entire nation was announced by the A. F. B. F.

Four such committees were appointed, according to the announcement as follows: Farm Mortgage Foreclosures—Congressman John N. Sandlin, Louisiana; Farm Relief—Congressman Wm. W. Arnold, Illinois; Currency Reform—Congressman Jeff Busby, Mississippi; City Co-operation—Congressman James M. Mead, Buffalo, N. Y.

Edward A. O'Neal, president, American Farm Bureau Federation, was invited by the first three of these sub-committees to sit in and counsel with them in behalf of organized agriculture. The sub-committees are meeting and working with all possible haste to whip legislation into concrete form and drive it through Congress regardless of whether either major political party formulates a legislative program.

The committees contemplate legislation to lower the price of the dollar, stop wherever possible farm mortgage foreclosures, and bring about equality for agriculture and labor.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 165 So. Main Street, Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rates of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

Number 3 | MARCH, 1933 | Volume 11

Sales Tax, Mortgage Legislation Before General Assembly

I. A. A. Legislative Committee at Springfield to Protect Illinois Farm Interests

IMPORTANT progress which promises to mean much to the taxpaying farm and home owner in Illinois was made recently when through the efforts of the Illinois Agricultural Association, and its friends in the state senate, the three per cent sales tax bill was amended, first to provide for the distribution of revenue therefrom between Cook county and downstate on the basis of population; and secondly, paving the way to make it a replacement tax rather than an additional tax.

The latter feature which is of tremendous importance to property owners will reduce taxes now levied on property for elementary educational purposes when further amendments to protect the replacement feature are finally adopted. With the inclusion of these new amendments the I. A. A. is favorably disposed toward the passage of this measure because of the opportunity afforded for taking part of the burden of government from property and bringing many who now escape into the taxpaying fold.

Before The House

As we go to press, the sales tax measure which passed the senate has been reported out of the Judiciary Committee in the House. The I. A. A. public relations committee presented a plan in the form of amendments mentioned above to make sure that property will be relieved of taxes as funds are derived from the sales tax.

"We estimate that taxes now levied on property for the educational fund of the elementary schools will be reduced at least 60 per cent if and when the three per cent sales tax carrying our amendments becomes operative," said President Earl C. Smith. "This estimate is based on expected returns from the three per cent revenue measure which passed the senate, when placed in operation.

"While we shall support the sales tax measure when properly amended in the Hous because it promises to be a step toward removing part of the cost of government from farm property, we are also actively working for every reasonable economy in government. Now that we have succeeded in providing for a fair distribution of revenue from the sales tax between counties, our next purpose is to work out the replacement feature of the bill and secure a fair distribution of the returns between districts within counties."

Redistribute Gas Tax

To this end amendments have been presented to sharply reduce the maximum levy for elementary educational purposes unless the voters of a given district by referendum permit a higher levy. The purpose of this is to prevent districts from securing more funds than they had before which invariably leads to waste and extravagance to the detriment of the taxpayer.

Another question of outstanding importance to farm taxpayers to which the I. A. A. is giving active attention is a redistribution of the three cent state gas tax. Based on careful estimates, it seems likely that receipts from automobile and truck license fees will provide sufficient revenue to pay off interest and amortized principal payments on both the $60,000,000 and $100,000,000 state hard road bond issues and also maintain and police the state paved roads.

The state gas tax provides 25 million dollars or more annually. Annual levies against property for roads and streets throughout the state approach this figure. Thus the opportunity presents itself for equitably apportioning gas tax money among the county and township road districts of the state so as to replace road levies against property.

Farm Mortgage Bill

The I. A. A. legislative committee is giving careful study to various proposals with the idea of supporting legislation fair to rural districts, and providing for careful administration of gas tax funds so that property taxpayers will secure further tax relief and the people gain maximum mileage of needed roads from such expenditures.

Another problem on which the I. A. A. has been working for many weeks, both at Washington and Springfield, is to secure relief for the worthy farm debtor without doing anything to hamstring future credit for agriculture.

At this writing a bill has been prepared addressing itself to the farm mortgage question. It provides that in worthy cases now pending in the courts, or hereafter commenced, the court upon application of the mortgagor who is defendent in such proceeding and who is not in default in pleading, shall after a hearing in which good cause therefor is shown, and unless good cause is shown to the contrary, by order continue such proceeding until July 1, 1935. The court, however, has the right for just cause to set aside such order.

In all proceedings now pending in which the debtor is in default in pleading but in which no judgment or decree has been entered, the court shall take no further action therein for 15 days after the Act becomes effective so as to allow mortgagors to apply for the extension. After a hearing and unless good cause is shown to the contrary, the court shall by order

(Continued on page 4, Col. 3)

Take Further Steps In Alcohol Dilution Plan

Chester Davis Retained By Committee of Farm Organization Leaders To Assemble Facts

FURTHER steps toward co-ordinating all facts and information and promoting early consideration by congress of the alcohol-gasoline dilution plan were taken recently when Chester C. Davis, former grain marketing director of the Illinois Agricultural Association, was retained temporarily by the committee of farm leaders recently set up to investigate and promote the plan.

CHESTER DAVIS

Mr. Davis who during recent years has been associated with Maizewood Products Company which manufactures building board from cornstalks in their Dubuque plant, is well known to Illinois farm people. The Maizewood plant has been closed temporarily because of business stagnation in the building field. For many years Mr. Davis was associated with Geo. N. Peek of Moline at Washington in efforts to secure enactment of surplus control legislation. He will delve into the pile of information already assembled and seek further facts bearing on the feasibility of the plan.

The Illinois Farm Supply Company is considering a road test, in a limited territory, of gasoline diluted with 10 per cent ethyl alcohol. Permission must first be secured from the Federal Prohibition Department which supervises the distribution and use of industrial alcohol. For diluting purposes only anhydrous alcohol can be used, containing less than one-half of one per cent water, and dilution may be made only under the supervision of a federal officer. At this writing an early conference has been scheduled to secure permission and arrange details of the proposed test.

Gasoline diluted with 10 per cent alcohol will sell for a premium of three cents per gallon above the ordinary price of gasoline. Even at this price all profit will be stripped from the handling of the alcohol.

The Illinois Agricultural Association hopes to sponsor legislation containing the alcohol dilution plan as offering a new outlet for the disposal of surplus grain. The plan is in no sense an emergency measure since several years will be required to erect plants for making alcohol from grain.

In the meantime the I. A. A. and Farm Bureau will continue their support of surplus control legislation of an emergency nature consideration of which is expected in the proposed special session of congress to meet soon after March 4.

Henry A. Wallace New Secretary of Agriculture

THE appointment of Henry A. Wallace, of Iowa, editor of Wallace's Farmer, as the new Secretary of Agriculture assures American agriculture of an outstanding champion in President Roosevelt's cabinet. Mr. Wallace, age 44, will be the youngest Secretary of Agriculture appointed since the position was created. He follows in the footsteps of his father, Henry C. Wallace who was Secretary of Agriculture in the cabinets of both Presidents Harding and Coolidge.

Mr. Wallace long has been recognized as an outstanding writer and thinker on farm economic and social questions. He and his father both have vigorously opposed government policies tending to promote industrial development at the expense of agriculture. This attitude on the part of Henry C. Wallace brought him into sharp conflict with Herbert Hoover when both were in President Harding's cabinet.

The selection of Henry Wallace will meet with general satisfaction among farmers throughout the country because of his unquestioned devotion to the best interests of agriculture.

Wm. E. Reigel, Tolono, manager of the Meharry Farms, was recently elected president of the Illinois Farm Managers Association. E. D. Lawrence, Bloomington, was elected vice-president; and Carl Olson, Sibley, secretary-treasurer.

Sales Tax, Mortgage Legislation Before General Assembly

(Continued from page 3)

continue such proceedings until July 1, 1935, although reserving the right to set it aside later.

Operation of Property

Under the bill the court is authorized to make provision for the control and operation of the property so as to give due consideration to the mortgagor, shall determine and fix a fair rental or consideration to be paid by the party in possession, and shall make provision for the distribution of rents, income, and profits from the real estate and for care and preservation of the property.

The bill would further preclude obtaining deficiency judgments in similar cases where good cause is shown and the debtor is worthy of consideration.

The order of the court shall provide that taxes, including special assessments in the case of real estate, costs, insurance, maintenance and upkeep shall be paid in the priority named from the rents, income, and profits, and any balance distributed in such manner as the court may direct.

If the mortgagor violates any order of the court, the latter may set aside its stay of execution and permit a final determination of the proceedings or may order the sheriff to levy upon and sell the property subject to execution.

The court also is authorized to recommend conciliation and may enter orders acceptable to the interested parties not covered in the provisions of the Act. The Act if passed will expire July 1, 1935 and will take effect on passage.

Changes In Farm Advisers

F. A. Fisher, formerly county adviser in Wabash and Morgan counties and more recently director of Farm Bureau farm management service in northwestern Illinois, was recently employed as county adviser in Macon county.

L. J. Fultz, formerly farm adviser in Johnson county, was employed to succeed the late J. E. Whitchurch as county adviser in Saline county.

Reorganization of the Soil and Crop Improvement Association in Kankakee county as the Kankakee County Farm Bureau and employment of a farm adviser to succeed the late John H. Collier are being considered in that county.

Fred Campbell, formerly assistant farm adviser in Knox county, has accepted a position as farm manager in northwestern Illinois for the John Hancock Life Insurance Company. This company, like many others, has large sums of money invested in farm mortgages.

The Farm Bureau at Washington

Allotment Plan, Farm Mortgage Legislation, Demand For Lower Freight Rates, And Reflation Feature Relief Program

As this is written, barely a week remains of the so-called "lame duck" session of congress. This session has been almost barren of results in raising prices or alleviating the farm debt situation, although there is a possibility of passing the "debt composition" measure sponsored by the Farm Bureau and other farm organizations in the few remaining days. Enactment of the allotment plan or other price improvement legislation and reflationary measures, if any, will be left for the proposed special session which will probably be called after March 4.

E. A. O'NEAL

The measure originally providing for raising prices on wheat, cotton, tobacco, and hogs to pre-war parity was passed in the House after being weakened by the inclusion of peanuts, butter and other products which would have complicated its administration. This bill in the main, however, embodied the principles, including acreage and crop reduction, desired by the farm organizations.

Weaken Measure

The death knell of the measure was virtually sounded in the senate when the agricultural committee removed all acreage reduction and surplus control features from the bill and took out everything except wheat and cotton which at once alienated support of the middle west, and in fact all thinking people.

In the meantime, Senator Smith, chairman of the agricultural committee, introduced a bill, applying to cotton alone, which provides for drastic acreage reduction and loans to cotton growers to buy cotton futures to the extent of their reduced production. The theory of this measure is that growers will profit when the market rises as a result of reduced production.

This bill which did not have the support of the Farm Bureau, was hustled through the senate, sent over to the house, reported out by the house agricultural committee, and given a rule for early consideration. Then, according to reports, word came from the democratic leadership to let the measure die since it was purely a sectional measure and would have split the forces now united in support of effective price-raising legislation.

The Smith bill has hindered the progress of the allotment measure, which may or may not come to a vote in the senate before March 4.

The American Farm Bureau Federation has exerted all possible influence to get early enactment of its debt relief program embodied in senate bill 5515 and amendments to H. R. 14359 sponsored by Senator Robinson of Arkansas.

Debt Situation Grave

"So grave is the situation with respect to foreclosures of farm debts that this committee and this congress have a terrible responsibility if in the face of such conditions, Congress adjourns without having done at least something substantial to alleviate the situation," President Edward A. O'Neal wrote the Senate banking and currency committee recently.

"Each day of delay the situation becomes progressively worse," he continued. "If something is not done soon, I am fearful of what may happen. Already there are ominous signs on the horizon. The very desperateness of conditions is driving many to resort to desperate measures. I have used my influence to restrain farmers from the use of force and illegal measures, and have urged them to exercise restraint, but the continued foreclosures of farm mortgages are driving many to resort to extreme measures in a great many localities."

"The farm mortgage debt now is nearly three times the pre-war level, while the farm price level is only about one-half the pre-war level. The gross farm income has shrunk from 16 billion dollars annually in 1919 to 5 billions annually in 1932. Farm land values are now less than half their 1920 value. Farm interest rates have been reduced but little since 1920. All credit agencies have engaged in a *harsh contraction of credit to agriculture. One-tenth of all the farmers in the United States have lost their farms during the past 5 years, involving foreclosures totalling approximately one billion dollars.* The estimated total farm debt of 12½ billion dollars, measured in terms of prices of farm commodities with which this debt must be paid, would amount to nearly 30 billion dollars.

"Confronted with these deplorable conditions, farm leaders have developed an emergency program which they believe will bring effective and immediate relief and will tide over the situation until permanent remedial legislation can be put into effect. After months of study, the principal farm organizations have agreed upon an emergency program. In the main, it is embodied in two bills—S. 5515 by Senator Robinson of Arkansas, now before this committee, and the amendments of Senator Robinson to H. R. 14359 now before the Senate Judiciary Committee. Some modifications of S. 5515 will be required, but in the main it embodies the emergency program of the farm groups, when coupled with the Robinson amendments to H. R. 14359.

Cannot Wait

"This relief cannot wait until the special session. I do not agree with the thought that I have heard expressed that our program is too large to put through before this session ends on March 4. Let me call attention to the *fact that in the last session of Congress the original Reconstruction Finance Corporation Act was passed by both Houses of Congress within thirteen days and it authorized a total of two billion dollars. Later Congress rushed through the Wagner-Rainey bill appropriating over two billion dollars more. About three-fourths of the money loaned by the R. F. C. has gone to the banks and the railroads.*

Why should it take longer to do something for the farmers than it does to do something for the banks and the railroads?

Speaking for the American Farm Bureau Federation, the emergency program may be summarized as follows:

(1) Stop the wave of farm foreclosures by providing a simple means for the extension of delinquencies and the composition of debts.

(2) Set up an Emergency Agricultural Refinance Corporation operated by the Federal Farm Loan Board, with a capital stock of one billion dollars subscribed by the United States Treasury, to refinance the debts of any distressed

farmer at a rate of interest not to exceed 3 per cent.

(3) *Strengthen the Federal land banks by:*

(a) Subscription of $100,000,000 of non-voting stock in the Federal land banks by the United States Treasury, to be repaid out of future earnings, to provide additional funds for new loans, for carrying delinquencies and for aiding in the sale of new bonds.

(b) Appropriation of $50,000,000 to $60,000,000 to the Federal land banks by Congress for the specific purpose of making extensions to borrowers. These extensions should be added to the principal debt and amortized over the life of the original loan.

(4) *Strengthen the national farm loan associations, as follows:*

(a) Subscription of 50 to 75 million dollars to the capital stock of solvent national farm loan associations by the United States Treasury, to be repaid out of future commissions and dividends.

(b) Permit direct loans by the Federal land banks to farmers, but require such borrowers to subscribe to the stock of the system and to join national farm loan associations whenever as many as ten farmers in that locality become borrowers.

(c) Amend Federal Farm Loan Act to provide a fixed commission rate for the associations at ¼ of 1 per cent semi-annually on the unpaid principal of any loan endorsed by such association. The banks should be required to repay any commissions which they have denied to associations heretofore.

(5) *Reduce the interest rate on existing loans and on new loans in the Federal Farm Loan system very materially. A rate of 5 per cent is too high under present and probable future conditions. Government guarantee of new issues of Federal land bank bonds would surely result in lowering the interest rate.*

(6) *Liquidate the joint-stock land banks without injury to the Federal land banks and repeal the sections of the Federal Farm Loan Act which relates to the joint-stock land banks.*

How Plan Operates

Farmer owes $12,000 at average interest rate of 7 per cent.

Present appraised value of his property $11,000.

Original appraised value of his property $22,000.

Foreclosure would wipe out all of the farmer's equity and entail losses to the creditors, even if a cash buyer could be secured, which is doubtful.

Farmer appeals to local debt conciliation commissioner, who gets together the debtor and his creditors and works out a settlement as follows:

Creditors are willing to scale down principal to $8,000 if paid cash in full.

A loan of $8,000 at 3 per cent interest is obtained for the farmer, with the proceeds of which he pays off his creditors in full.

RESULTS:

Farmer's debt is reduced 33-1/3 per cent and his interest charges are reduced from $840 to $240 annually.

Creditors get rid of frozen assets and obtain $8,000 in cash which can be put to immediate use.

The loan of the government agency represents less than 75 per cent of the value of all the farmer's property, based on a new appraisal. It may take a mortgage on the land, a chattel mortgage on other property, and, if necessary, a crop lien, as security for the loan.

Hull Debt Bill

Another mortgage bill has been introduced by Senator Hull of Tennessee which would refinance farm mortgages wholly through the Reconstruction Finance Corp., largely disregard the Federal Farm Loan system, financing only corporate holders of mortgages, thus not serving directly 60 per cent of the farm mortgagors. This bill is objectionable to the Farm Bureau, and is not making much progress.

The A. F. B. F. likewise is seeking to amend the R. F. C. Act so that financial aid to co-operative marketing activities, the acquisition of facilities for handling farm crops, and similar functions will be definitely authorized in the R. F. C. law, as amended, beyond the power of unfavorable interpretation by legal counsel. The present farm crop loan feature of the R. F. C. act has been of no value to agriculture because of adverse legal interpretation.

Acreage Lease Plan

Some support has been given to a plan, along the line suggested by Secretary Hyde, involving government leasing of surplus acreage formerly devoted to growing corn, cotton, wheat and other crops. The government would get its funds to pay rental from a small fee or adjustment charge levied on the processors who handle the crops formerly produced on the rented acres. The farmer who rents his acres to the government is to be obligated in some way not to put in equivalent acreage somewhere else.

"I feel that if we accept the acreage rental plan, it will be given us," said Mr. O'Neal in a recent statement. "And, moreover, that is all we will ever get in the way of surplus control legislation. It is my thought that we need to cover more ground in surplus control legislation than merely to rent and withdraw acreage from production. We need to be on guard that instead of getting a loaf in regard to surplus control, we will be handed less than one slice."

Demand Freight Cut

The recent petition of the American Farm Bureau Federation to the Interstate Commerce Commission asking for a general study of freight rates on basic commodities with a view towards a reduction has created a tremendous impression at Washington and throughout the nation. There are many who feel that organized farmers are wrong in trying to get price-raising legislation through surplus control plans or inflationary measures or both. They would like to see farmers sharpen their axes and go after freight rates, taxes, utility rates, the protective tariff, etc. with the idea of bringing everything else down to the level of farm prices.

"Such representative publications as Business Week and Whaley-Eaton Service have picked our petition out for special mention as of great national consequence," reports President O'Neal of the A. F. B. F. "The Interstate Commerce Commission also has recognized it by immediately declaring a date for oral arguments and then postponed that date until Friday, March 24 at the request of railroad representatives. Senator Capper put the entire document in the Congressional Record of February 8 with a brief introductory statement by himself, expressing his general interest on the question of reduced freight rates."

If the bitter-end deflationists win their fight in the proposed special session of congress after March 4, it means that a lot of railroads will be forced into receivership, debts both public and private will have to be scaled down wholesale, taxes cut another 25 to 50 per cent, and freight rates reduced to pre-war levels.—Editor.

Hancock County Back To $15 Membership

After one year's experience with a $10 membership fee, the Hancock County Farm Bureau went back to their former $15 annual dues, in the county, state, and national organizations. The $10 fee had no appreciable influence in increasing membership.

Plan Co-op. Creameries At Several New Points

Directors of Illinois Producers Creameries Meet To Consider Marketing Problems

Establishment at an early date of additional co-operative creamery plants in the Olney, Quincy, and Champaign districts was considered at the first meeting of the board of directors of Illinois Producers Creameries, Inc., in Chicago, Feb. 16.

Stock is being sold both in the Olney and Quincy districts in proposed manufacturing plants, and mass meeting of cream producers was held in Champaign Feb. 18 where plans were laid for establishing a creamery there.

C. R. George, manager of the Producers Creamery, Marion, Indiana, a successful co-operative, spoke at the meeting of cream producers in Champaign.

At a meeting in Peoria, Feb. 15 representatives of co-operative cream pools in that territory appointed a committee and voted unanimous approval of plans for membership work.

Seven directors were chosen for the proposed creamery in the Olney district at a meeting Feb. 22 at Sumner in Lawrence county. The directors chosen were Burton Leamon, Richland county; L. R. Gantz, Wayne county; Luke Crouse, Clay county; Silas Andrus, Wabash county; J. C. Piper, Lawrence county; Raymond Kegley, Edwards county; S. M. Austin, White county. This board of directors will serve until the annual meeting of stockholders when the latter will elect new directors.

Following an explanation of the stock setup by Frank Gougler, produce marketing director, application for incorporation was made and it was voted that counties shall raise their quotas of stock subscriptions by April 1. The name of the new organization will be "Producers Creamery of Olney."

Butter will be marketed by the chain of co-operative creameries, all of which are to be affiliated with Illinois Producers Creameries, under the trade name "Illini." A central agency will be set up to sell butter direct to stores, hotels, and other distributors. A superior butter made only from sweet cream and grade A sour cream will be manufactured and sold when present plans are in operation.

Truck routes will be established and cream picked up several times a week. This plan, it is believed, will reduce the cost of assembling, result in a higher quality product, and increase the farmers' returns from butterfat.

ILLINOIS PRODUCERS CREAMERIES BOARD OF DIRECTORS

Left to right, seated: Tom Jackson, Timewell; Frank Gougler, manager and director produce marketing; Wm. Krause, Lincoln, president; Elery Leefers, Carlinville, secretary-treas.; Ryland Capron, Peoria, vice-president; Herb Klowana, Rock Island; J. B. Countiss, director dairy marketing.

Standing, left to right: Burton Leamon, Olney; Harold Enns, Bloomington; A. B. Schofield, Paxton; Talmage DeFrees, Smithboro.

Baruch Outlines Plans To Restore Agriculture

New York Financier Tells Senate Committee How He Would End Depression

"Inflation will precipitate general starvation, and Congress is trifling with disaster by allowing the treasury deficit to continue to mount," Bernard M. Baruch of New York, prominent business leader and close friend and adviser of President-elect Roosevelt, testified before the Senate Finance Committee recently. Baruch who served as chairman of the War Industries Board during the Wilson administration told his senatorial listeners that they must balance the budget, asserting that the only defense between this country and ruin are these government securities which are dependent upon government credit. Baruch was prominently mentioned as a possible appointee to the President's cabinet.

"Every bank, every insurance policy, the solvency and continued operation of every corporation employing men—the wages of labor, the wherewithal to pay wages and above all the resources to feed the hungry and relieve distress, all hang by a single thread, the credit of the United States," Baruch testified.

Will Attract Money

"Balance the budget," he continued, "and money will flow here from all the world and the people will find the means to earn their daily bread with great rapidity."

He suggested an international agreement on silver, revision of the Versailles Treaty to speed disarmanent, increase the profits of farm crops by decreasing output, aids to rapid liquidation of debts, encouragement of rapid consumption of commodity surpluses and control of productive capacity.

Four causes of the depression he said were "Inflation due to the war, debts and taxes, failure on the part of the United States to maintain friendly trade relations with other countries, and excess productive capacity.

Farm Mortgage Plan

Dealing at length with the farm problem, Baruch proposed a farm mortgage plan suggesting a corporation to issue three per cent tax exempt thirty-year bonds with interest unconditionally guaranteed by the government.

The bonds would be exchanged for existing farm mortgages or for the title of foreclosed farms, but not to exceed 60 per cent of par of such mortgages.

Mortgages would be revised on the basis of 3¼ per cent interest on a scaled down principal, the effect being to write down the principal of existing mortgages by one-half and the interest rate by two-thirds.

Baruch's second proposal for farm relief was to have a governmental agency rent land from farmers to be taken out of production. This, he said, was an exact reversal of the principle now proposed for bounties on production.

Mr. Baruch would raise $200,000,000 to be used for renting land to reduce acreage by levying an excise tax on the processing of crops whose production is reduced by the government leasing program. He suggested a one-half cent tax on all meats. An average rental of $3 per acre would be paid to provide for taxes and make it attractive for farmers to reduce acreage.

The financier opposed cancellation of war debts, urged a beer tax and repeal of the 18th amendment and asserted that the world's hope is to revive commerce and give men a chance to work for a living.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 S. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago. The Sales Tax

THERE are two ways for property owners to get tax relief. One is to insist on every reasonable economy in government expenditures; the other to replace part of the property tax with revenue from other sources. The Illinois Agricultural Association has its legislative committee at Springfield working for both these ends.

The three per cent state sales tax which passed the senate, and as this is written is being considered in the House will be a "replacement" rather than an additional tax when amendments sponsored by the I. A. A. and its friends in the General Assembly, are adopted. Only by a two-thirds vote of the county board of supervisors may any portion of this new revenue be diverted to unemployment relief. Otherwise taxes levied on property for the elementary educational fund, based on the Association amendments, are to be decreased to the extent revenue is derived by school districts from the sales tax. The I. A. A. will support the measure, however, only when its "replacement" feature is properly protected.

This tax is based more nearly on ability to pay than the property tax. Wealth is largely proportional to buying power. The person who buys little pays very little tax. This measure will broaden the tax base. It will bring contribution from many who heretofore have paid little or nothing.

This measure when amended will save the farm and home owner substantial amounts. So long as farm buying power is at its present low ebb farmers will contribute little to revenue derived from this source.

Another amendment sponsored by the I. A. A. and adopted in the Senate provides for division of sales tax revenue among Cook county and down-state on the basis of population. The original proposal would have allowed each county to retain all revenues collected therein. This would have been grossly unfair to counties having no large trading centers.

These modifications of the original sales tax measure, both of great importance to Illinois farmers, indicate the need for effective representation where laws involving farm interests are being made.

Stop Farm Foreclosures

THE WAVE of farm foreclosures which in the past five years resulted in nine and one-half per cent of the farms of the United States changing hands, will be halted, at least until July 1, 1935 if a bill to this effect supported by the I. A. A. in the General Assembly is enacted.

Under this measure worthy mortgagors who are not hopelessly in debt, on proper appeal to the courts may secure suspension of foreclosure proceedings until the above date. The bill in no way impairs the equity of the creditor. It is fair to both parties concerned yet does not jeopardize future farm credit. This legislation will meet with the approval of all fair-minded debtors and creditors. It would be unnecessary were all mortgagees and mortgagors willing to bear with each other until normal trading, employment and higher prices are established. This measure will stop those who are disposed to take advantage of the present situation for selfish reasons.

Industry To The Rescue

LATE reports of new uses for the soybean being developed by Henry Ford is encouraging news to Illinois farmers. Steering wheels, distributor shells, knobs, insulators, and other automobile parts have been made successfully from the soybean. Pointing to the parts mentioned above Mr. Ford is quoted in "Business Week" as saying "Cheaper than plastic we have used heretofore and better because more elastic. We raised 18,000 tons of soybeans this year. We're just trying to see if we can't help develop some crops that the farmer can sell to industry."

Soybean oil is being used to finish Ford bodies, also for core making in the Rouge foundries where it is reported more satisfactory than linseed oil and 25 per cent cheaper.

With the rate of population growth seriously declining, industrial outlets for farm products are of vital importance. Where such uses increase the efficiency or lower the cost of industrial commodities so much the better. A natural development is to be preferred to one based on compulsion.

The creation of a more efficient and economical motor fuel by dilution of gasoline with alcohol made from farm products would be a great boon to agriculture. Such a development is not beyond the realm of possibility.

Temporarily, almost any kind of compulsory act that raises farm prices and re-establishes farm buying power is justifiable. But any unsound and uneconomic measure cannot be counted on to secure permanent public support. Some day the world will have its fill of impractical artificial devices and eco-

(Continued on page 9, Col. 2)

A DISQUIETING aspect of the farm surplus situation is the keen competition it has aroused among producers, for preferred markets. Thus we find unorganized farmers fighting producer associations which through superior bargaining power and a better quality product have been able to secure higher prices. Nowhere is this condition more apparent than in the sale of fluid milk, although it exists among fruit and vegetable growers and others.

Because the milk business in the larger cities is well organized, both in production and distributing, it has been able to maintain relatively satisfactory prices. Farmers in fluid milk territory have fared better than dairymen in the butter, cheese, and condensery districts. As a result, milk production not only has been stepped up in the higher price territory but "outsiders" have exerted more and more pressure to get in the preferred group.

Even $1.25 or $1.40 a hundred pounds, low as it is, is decidedly more attractive than a butterfat price of around 70 cents. A producer who is "off" the market while his neighbor is "on," can't see the justice of the discrimination. So we have the situation of a McHenry county producer, for example, mandamusing the Chicago Health commissioner to inspect his herd, that he too, may sell his milk on the big market. And there is good reason for such action particularly where milk is being brought into Chicago from more remote sections of Wisconsin.

Whenever a price in one section or point gets out of line with the general average, it immediately becomes a target for larger supplies of the commodity, and price cutting. A producers organization can't maintain a price for fluid milk too high above its "surplus" value, commented H. D. Allebach, president of the Philadelphia milk producers association recently. If the price is too high unorganized dairymen farther back in the country flood the market with their cheaper milk. This leads to disorganization and loss of all that has been gained by organization.

It was definitely demonstrated during the recent milk war at the Quad Cities that a low price for milk greatly increases consumption. In view of the tremendous surpluses everywhere, and the dwindling percentages of milk going into fluid classes, cutting the price may be a wise step both for the organized producers and the established distributors.

In a period like the present, the importance to the farmer of distributing milk efficiently to the consumer cannot be too strongly emphasized. Farmers must work for a larger portion of the consumer's dollar, though the effort places them in direct conflict with the dealers and their employees whose main interest lies in maintaining high wages and comfortable profits. Where a board of health doesn't autocratically eliminate distributor competition, the situation rights itself for a wide margin invariably attracts new and perhaps more efficient milk dealers into the field.

The ideal situation, of course, is to have comparatively few but highly efficient milk distributors charging the consumer a moderate price, and returning to the producer a maximum percentage of the retail price. To bring such a situation about it may occasionally be necessary for producers to get into the distributing business themselves.—E. G. T.

Industry To The Rescue

(Continued from page 8)

nomic barriers which in the long run only tend to throw everything out of joint with resulting unemployment and hard times.

There is plenty of evidence to support the belief that this depression would not have lasted so long had there been less interference with natural trade and commerce between nations, with prices, rates, national currencies, etc. The world has never seen such an orgy of manipulation as today. And judging from the condition of business in this country other nations so far have out-manipulated us.

Hyde Would Pay Farmers Rent For Idle Lands

Secretary of Agriculture Arthur M. Hyde recently proposed a plan under which the federal government would lease and eventually purchase farm lands withdrawn from cultivation.

Under this plan a fund of from $150,000,000 to $200,000,000 a year would be provided. The treasury would be reimbursed from the proceeds of a tax of eight cents a bushel on domestically consumed wheat and corresponding taxes to be paid by the consumers of other farm products.

At present there are 60,000,000 acres planted to wheat, and 45,000,000 acres to cotton. Secretary Hyde suggests that the first year the government might lease 10,000,000 acres each of wheat, corn, and cotton lands, paying about $1.50 an acre for wheat, $3 for corn, and $2 for cotton. At that annual rental 30,000,000 acres of marginal lands now in crops could be taken out of cultivation for $65,000,000.

"With this fund at its disposal," said Secretary Hyde, "enough land could be leased by the government to bring about a balanced production. The plan is direct, positive, and reaches the real disease and is not a mere bandage on a symptom. The effect on farm commodity prices would be felt the instant the commodity markets knew that a part of the land now producing the surpluses was to be taken out of cultivation."

The government, under the Hyde plan, would take a ten year lease on the withdrawn lands, with an option to purchase and devote them to a general land utilization program, whereby marginal lands would be set aside for forest production or other purposes.

$90,000,000 Available Crop Production Loans

A reduction of 30 per cent in the acreage planted to cash crops will be required this year to procure crop production loans according to Secretary of Agriculture Arthur M. Hyde.

Approximately $90,000,000 have been made available for crop production loans through the Reconstruction Finance Corporation. As a condition of any loan the Secretary of Agriculture is authorized to require "that the borrower agree to reduce his acreage or production on such basis, not to exceed 30 per centum, as may be determined by the Secretary."

Farmers seeking crop production loans this season are advised to obtain application blanks and copies of the regulations in their home county rather than from Washington. Field agents of the Crop Production Loan office are now designating representatives in each farming county to inform prospective borrowers of the requirements governing loans and to distribute application blanks and other necessary forms. These agents will assist farmers in filling out applications without charge.

The 1933 regulations limit the amount available to any individual to $300. As last year, interest is fixed at 5.5 per cent to be deducted when the advance is made. All notes are due October 31, 1933.

The Organization-Publicity Advisory Committee will meet in the I. A. A. offices on Friday, March 10.

"COUNTRY LIFE INSUR
is Second to Non

THAT statement from one of the country's leading actuaries is important to **you.** It's what you should be able to say about the company that insures **your** life.

Country Life offers you complete protection for your home, your farm, your family at a cost as little as a dime a day. And only one dollar will make that protection available to your loved ones immediately, as soon as your application can be approved by the home office.

SAFE BY EVERY TEST

Country Life is safe and sound by every test. In 1932—a bad year for business—its assets increased 50 per cent; its surplus 75 per cent. Not one investment is in default as to principal or interest.

Don't gamble with your family's future. Act immediately to protect them by insuring with a Company you know to be sound, "second to none in strength."

We feel sure you will be interested in our new Term to Age 65 policy. Just sign the coupon, it will not obligate you but **will** bring you complete information.

If every Country Life policy holder had demanded the cash value of his policy on the first day of March, 1933, Country Life could have paid them all and still had approximately three-quarters of a million dollars of assets left over.

SURANCE COMPANY
in Strength"

Livestock Growers Plan Expansion

Officers Discuss Marketing Trends and Problems in Annual Meeting, Bloomington

CONTINUED expansion with co-ordination of all co-operative livestock marketing agencies in and adjacent to Illinois were emphasized as the goal for 1933 at the annual meeting of the Illinois Live Stock Marketing Association, Bloomington, February 14. More than 300 livestock growers representing all sections of the state gathered for the meeting held in the McLean County Farm Bureau auditorium. President Samuel Sorrells, of Raymond, presided.

SAM SORRELLS

How the tremendous increase in the movement of livestock to market by truck has affected marketing machinery was outlined in the annual report of Ray E. Miller, secretary and manager of the Association. During the year 1932 there were three outstanding developments, he reported, which include: (1) increase in trucking and further decrease in rates charged by truck, (2) increase in the direct movement of livestock to packers and (3) a continued decline in the price of farm products with a corresponding effect upon economic conditions of Illinois farmers.

Truck Rates Cut

The decline of truck rates to a point where they are now in many instances lower than rail rates, and the convenience of truck transportation, have eliminated most of the remaining livestock shipping associations and promoted an enormous increase in the direct movement of hogs to packers, Miller said. As a result, the marketing of hogs has been decentralized and country buyers, whether private or packer representatives, are again playing one producer against the other in driving down prices.

High freight rates as well as exorbitant costs which farmers are compelled to pay for corn, yardage, and commissions are among the chief reasons for the increase in the direct movement of livestock. "The only substantial relief of these costs which farmers have been able to secure at all have been secured as a result of co-operative commission agencies which either have reduced commissions, refunded substantial parts of commissions, or increased and improved the services which their members received," Miller continued.

"The net result of this decentralization of marketing has been to throw one community in competition with another, one state in competition with another state, and one part of our marketing system in competition with another part. While the terminal market is seeking to stabilize prices on a satisfactory basis, the disorganized movement from many country points exerts continued bearish pressure. We are still depending on the terminal markets for our price determining machinery but are doing nothing or very little to protect them.

"The Illinois Live Stock Marketing Association was established to give livestock growers the highest price to be obtained for the particular kind of livestock they have to offer at the time they wish to sell. And in doing so the Association is correlating the movement and sale of livestock from country points with the operations of co-operative sales agencies on terminal markets. Under present conditions both parts of this marketing machinery are essential and will be a permanent part of the marketing organization."

In a little more than a year the Association gained from an initial membership of four units in Vermilion, Macon, Shelby and Iroquois counties to eight units now operating in the above counties and in Edgar, Knox, McDonough, and Coles. The ninth, at Bloomington, McLean county, will probably be in operation by April 1. Individual membership increased since October, 1931 from 950 to 4,379. Seven district units marketed 2,033 decks of livestock during the year 1932 or an average of 169 decks per month. Vermilion county led with 460, Macon 389, McDonough 348, Galesburg 302, Shelby 271, Iroquois 199, and Edgar county 61. More than three-fourths of the livestock handled in the co-operative concentration points consisted of hogs.

More Volume Needed

"The one factor which has the most to do with the service to be rendered by the Illinois Live Stock Marketing Association is volume," Miller said. "A particularly fertile field for increased shipments co-operatively lies in the Farm Bureau membership itself. Many Farm Bureau members who thoroughly believe in that organization and who are consistent patrons of the insurance and oil companies, have not yet given their wholehearted support to the co-operative marketing of their livestock which accounts for nearly two-thirds of total Illinois farm income.

"With the support of more producers the Association can render the highest type of marketing service and can be a powerful factor in helping to raise country prices for livestock and support the co-operative commission agencies on the terminal markets."

President Sorrells Speaks

"Disintegration of livestock shipping associations, rapid expansion of direct marketing, the need for better contact between the individual producer and the co-operative selling agencies on the terminal markets, and mounting marketing costs all have pointed the way to the need for more complete organization in the country," said President Sorrells in opening the meeting. "Our units, commonly called co-operative concentration points, make available more frequent and regular shipping service, make possible home grading of livestock and shipment in graded loads of one species, effect savings in freight costs by the use of double-deck equipment and reduction of mixed shipments, reduce losses from dead and crippled stock, decrease competition between small shipping associations, and make possible the full-time employment of men trained and experienced in grading and marketing livestock.

"The organization of the State Marketing Association is merely a step toward consolidating what's left of some 500 local shipping associations which existed at one time in Illinois," said Mr. Sorrells. "Livestock growers know that under the old marketing system the tendency always has been toward higher marketing costs until co-operative agencies entered the field. More recently the grower has learned that he can provide marketing service for the same cost or less and build up a surplus or reserve for future needs.

"In developing our organization we must recognize that direct marketing is here to stay. We must also recognize that the terminal markets are playing and will continue to play a highly important part in determining price levels. Any marketing system which attempts to move all livestock direct is ill considered and weak, and will not pro-

Hog Control Plan In Holland

All Pigs Earmarked, Processing Tax Assures Growers a Fair Return

THE Netherlands last July passed an Emergency Hog Act setting up a "Netherlands Hog Central," composed of representatives of the hog industry to establish a price stabilization fund, to import and export hogs and pork products, and to enforce production control.

The purpose is to maintain domestic hog prices at a level that will represent "at least the indispensable cost of production."

A tax levied on practically all hogs slaughtered in the Netherlands is the main support of the stabilization fund. Hogs slaughtered for consumption by owners are taxed too, except in cases where the tax may be adjudged as excessively burdensome. The slaughter tax was fixed on August 15, 1932, at $1.64 per 100 pounds and was increased to $1.82 on January 15, 1933.

Slaughter Tax

The hog slaughter tax is paid at the time of official inspection, and the inspection service has been authorized to refuse certification of live hogs or hog products unless the tax has been paid. The amount of the tax must always be such that "including expenses for the execution of the Act, by means of a stabilization fund a basic price may be obtained for the hogs, corresponding as far as possible with the indispensable cost of production."

The Hog Central imposes an import duty on all hogs and pork products imported into the Netherlands, and the tax must be "fixed in such a way that the differences between the price of pork products in the home market and in the world market are thereby equalized," the law states. One-third or more of the total production of pork in Holland usually is exported, so that the granting of an exclusive export monopoly to the Hog Central makes it predominant.

Last September the Hog Central announced it would pay $5.47 per 100 pounds live weight for hogs of less than 330 pounds delivered for export. At that time the regular market price ranged from $2.92 to $3.65 per 100 pounds. January 15, 1933, the Central price was reduced to $5.11. The losses incurred by the Central, in exporting the surplus are met through the medium of the stabilization fund. The Central has exclusive control over the 25 bacon factories which produce the bacon exported from the Netherlands and these factories are under contract with the Central on a fixed-price basis. Factories are required to deliver for export as ordered, the exports of hogs and pork products being controlled so as to maintain the home market price.

All Hogs Counted

The first step in production control was a complete count of all hogs late in 1932, and it was announced that the Central intended to reduce the hog population to about the 1930 level. It was estimated that at that level the resulting marketable supplies could be disposed of at a profit.

The production control centers upon a system of earmarking of hogs to the number designated by the Ministry of Agriculture. The responsibility for earmarking rests upon eleven Provincial Centrals which have been established by the Hog Central. The Minister of Agriculture determines periodically and for specified periods the total number of marks to be placed, as well as the number of marks available for the territory of each Provincial organization. District organizations have been set up by each Provincial Central, and earmarks can be placed only on hogs that belong to members of these district organizations. The average district includes about 350 farms and 3,500 hogs.

Production Control

The law provides that the keeping, transporting, and marketing of hogs heavier than a live weight to be determined by the Minister of Agriculture is permissible only when the animals are provided with official earmarks. The hogs must be earmarked before they weigh 22 pounds. A fee of 10 cents is charged for each earmark, for the number approved, and additional marks may be obtained upon payment of a high fee—at present $4.02 each—which usually makes the raising of excess hogs too expensive.

The Central agrees to purchase at a fixed price all hogs delivered by producers in conformity with present or future regulations. Certain localities have been designated for receiving hogs from farmers. A representative in each village keeps the Central informed as to the number of hogs to be marketed in his territory, dates of shipment, etc., and farmers must give at least eight days' notice of contemplated shipments. Each farmer is notified upon what date he may ship. If offerings appear excessive, the Central may hold them up.

The index of farm prices of 27 agricultural products reached a new low point at 51 per cent of pre-war on January 15. The index on January 15, 1932, was 63 per cent of pre-war.

Live Stock Growers Plan Expansion

(Continued from page 12)

tect the farmers' interests. On the other hand, it is illogical and uneconomic to assume that all livestock must go through a terminal market regardless of conditions."

Commenting upon the effect of the tariff upon American agriculture Charles A. Ewing, president of the National Livestock Marketing Association, said: "During the past 10 years farmers have been paying a sales tax through the tariff of $10,000,000,000 to $15,000,000,000 as a special protection to one class of industry. The Tariff Act of 1922 gave an average protection to industry of 45 per cent ad valorem effective on 90 per cent of its output, and on everything the farmer bought from the hat on his head to the shoes on his feet, he paid a tribute because of the 1922 Tariff Act.

Tariff Barriers Hurt

"Our policy of raising higher and higher the barrier of tariff protection against our foreign neighbors has led at last to retaliation. They have built around us new trade relationships, have established new trade quotas, and are rapidly reducing their business contacts with this country. As a result much of our foreign trade has been lost and this is one of the outstanding reasons for the terrific decline in farm income. I do not blame foreign nations because our whole policy toward them has been unwise and destructive."

Secretary George E. Metzger of the I. A. A. in addressing the meeting commented on the splendid financial record which co-operatives generally have been able to maintain in the face of failures, bankruptcies, and foreclosures being suffered on every hand by various other industrial and commercial concerns. He emphasized particularly the fact that the major objective in the co-operative program is not merely to save a fraction of the handling cost but it is to control sufficient volume to enable the organization to raise price levels.

The following officers and directors were elected: Samuel Sorrells, Raymond, president; Sam McCluggage, Peoria, vice-president; Ray E. Miller, Chicago, secretary; Geo. F. Tullock, Rockford, treasurer; H. H. Parke, Genoa; A. E. Crum, Virginia; O. B. Goble, Charleston; Wm. Temple, LaSalle county; W. E. Sawdey, Rockford; Harvey Herndon, McDonough county; Mont Fox, Vermilion county; D. H. Myers, Adams county; Joe Fulkerson, Jersey county; C. G. Oakes, Shelby county; Carl Lage, Bloomington.

Illinois Grain Corp. Meeting

550 Attend Largest And Most Enthusiastic Annual Session at Peoria, Feb. 22

G. C. JOHNSTONE of Bloomington, president of Illinois Grain Corporation was reelected at the annual meeting of the corporation, held at Peoria, on Wednesday, February 22. A. R. Wright, Varna, vice-president of Illinois Agricultural Association, was re-elected vice-president, and R. A. Cowles, Bloomington, was re-elected treasurer. Fred Romine, Tuscola, was elected secretary. The following were chosen as directors: E. E. Stevenson, LaSalle County; E. H. Williams, Lee County; B. L. Baird, Knox; Ralph Allen, Tazewell; J. C. Sailor, Iroquois; O. G. Anderson, Ford; G. C. Johnstone, McLean; Charles Schmitt, Logan; Fred Romine, Douglas; Ralph Mills, Vermilion; A. C. Kolmer, Monroe; Fred Zimmerman, Mason; A. R. Wright, Marshall; G. L. Potter, Livingston and H. P. Joy, Morgan.

G. C. JOHNSTONE

The meeting was the largest and most enthusiastic in the history of the Corporation. Approximately 550 representatives of the 122 member elevators were present when the meeting was called to order by President Johnstone.

Flourishing Condition

The annual reports of the president and C. P. Cummings, manager, revealed that the Corporation is in a most flourishing condition. Membership increased more than 50 per cent since January 1, 1932, and the volume of grain handled by member elevators increased in about the same proportion. More than 15,500,000 bushels of grain were marketed during the year, about 25 per cent of that amount being from non-members. This was cited as a favorable omen by President Johnstone, who pointed out that this grain was handled on a competitive basis. The scope of the service being rendered by the Corporation was revealed by the fact that 9,142 cars of grain were originated by the Corporation in 1932 from 302 points in 66 counties in the state.

The report of the treasurer showed that Illinois Grain Corporation had a net income of more than $39,000 and that dividends were declared by the board of directors, two on the preferred stock of the corporation and in addition a patronage dividend of ⅛ cent a bushel on oats and ¼ cent a bushel on wheat, corn and other grains handled during the year. Harrison Fahrnkopf, director of acquisition and organization, spoke enthusiastically of the work accomplished during the year and voiced his conviction of even greater advances during 1933.

Manager Cummings told the delegates of some of the problems of co-operative grain marketing, cited the progress that has been made, announced that a new office had been opened recently at Mendota to take care of a rapidly growing membership in northern Illinois and predicted a successful future for the cooperative marketing of grain in this state.

Mr. Huff Speaks

At the afternoon session C. E. Huff, president of the Farmers' National Grain Corp., outlined policies and activities of the national body and discussed the extremely bitter attacks made against cooperative grain marketing in general during the last several years. He stated that without exception these attacks were selfishly inspired and were without foundation. The Farmers' National, Mr. Huff said, has never defaulted in the payment of interest or principal due the federal farm board. The funded debt of $16,295,000, he said, covers all co-operative grain marketing purposes in the United States including money loaned to the most isolated country elevator. This amount will be reduced to 15¼ millions when the payment due the farm board, May 31, and now ready to turn over, is completed.

Mr. Huff pointed out that the Farmers' National is now the largest grain handling organization in the country, with branches in every grain producing section. Criticism of the organization and its policies, he said, are prompted because the Farmers' National is a true co-operative which gives the grain producer the benefit of all profits and savings on a patronage basis.

"Let me call to your attention," he added, "that we are paying off our debt to the farm board, are even prepared to pay ahead of schedule; that while our activities are country-wide and that grain marketing is extremely essential to the welfare of all the country, the entire amount we borrowed—and are now paying off—is only about 20% as much as was reported to have been borrowed by a single Chicago bank from the Reconstruction Finance Corporation."

Resolutions were adopted at the meeting in favor of reducing railroad rates on grain to meet truck competition and at the first meet-

Milk Producers Winning Fight at Quad Cities

Build Up Fluid Outlet Through Sturtevant Ice Cream Co. When Organized Dealers Cancel Contract

AS WE go to press organized milk producers at the Quad Cities' market represented by Quality Milk Association are winning their fight to establish a retail fluid milk outlet following cancellation by the organized distributors of their agreement to buy milk from the Association February 1.

The Sturtevant Ice Cream Company of Rock Island, owned and operated by O. G. Sturtevant and his son Kenneth, with the finest dairy plant in the Quad Cities, has been distributing milk of Association members since February 7 when the producers, fighting desperately for their market, put the price down to three cents per quart in an effort to build up a fluid outlet. Within 10 days the Sturtevant Company had grown from two truck routes to 15, and by February 25 had put on 23 trucks servicing 4,000 retail stops. The organized dealers voted to hold their price at 8 cents and lost business consistently since February 7.

O. G. STURTEVANT

The tremendous demand created immediately could not be taken care of by the Sturtevant Company because of shortage of bottles and equipment. As a result, the price was raised to six cents per quart on February 22, and contrary to expectations the volume of output was not only maintained but actually grew the latter part of that week.

Better Milk

"In talking to several people," said Ben H. Bollman, field representative for the Association, "they report that Sturtevant is delivering milk of such fine flavor and quality that they will never go back to the other dealers."

The organized dealers, prior to February 1, had set up a "rump" organization composed largely of outlying sour cream producers, nonmembers, and a few "deserters" from the Quality Milk Association. This organization, called the Illinois-Iowa Milk Producers' Association, is largely controlled by the organized distributors who assisted in selecting the manager, and picked the first board of directors.

Promote Dissension

The strategy of the dealers has been to promote dissension among milk producers, and break up the Quality Milk Association or get the organization hopelessly in debt. To this end, the dealers first demanded that the Association sever all connections with the Farm Bureau and Illinois Agricultural Association, that it get the Sturtevant Company out of the milk business, that it buy the dealers' old butter churns and other obsolete equipment, and finally employ a manager meeting with their approval. The Association refused to go along on those terms contending that the dealers had no right to dictate the kind of organization farmers shall have.

In the meantime the distributors, the ringleaders of which control the smaller dealers through a bottle exchange, held their price at eight cents and thereby suffered a tremendous loss of business to the Association and its co-operating distributor, Sturtevant. At this writing the organized dealers are meeting daily and are expected to drop the price to six cents in a desperate effort to regain their lost business.

House to House Canvass

Members of the Quality Milk Association are continuing their fight for a fluid market by house to house and store to store solicitation. Shortage of bottles and equipment has been the only obstacle to taking over a much larger volume of the distributing business from the non-cooperating dealers. Kenneth Sturtevant of the Sturtevant Company started by airplane for New York February 23 to speed up the delivery of more sealright fiber bottles from the factory there, but found it unnecessary to continue the journey.

The drastic action taken by the Quality Milk Association in lowering the price to three cents was the only course left, for when the distributors summarily cut off the regular producers who for years have produced for the Quad Cities' market the only outlet left was a butter market. They chose to sacrifice temporarily to build up a retail fluid milk outlet and market for the future. The course of the battle indicates their sound judgment.

More than 600 members of the Association in several mass meetings and in the annual meeting on February 24 voted unanimously to stick to their program until they have established sufficient fluid milk volume to insure a fair price and a year 'round market.

At the annual meeting in Rock Island February 24 attended by approximately 400 members, the following directors were chosen: F. H. Schafer, Port Byron; H. E. Wells, Port Byron; H. M. Sheesley, Coal Valley; H. O. Klawon, Coal Valley; Earl Phillips, Reynolds; Hugo Schaff, Eldridge, Iowa; Herman

(Cont'd p. 16)

Modern Plant of Sturtevant Ice Cream Co. at Rock Island

Ralfs, Walcott, Iowa; F. A. Martzahn, Davenport, Iowa; and Robert McKnight, LeClair, Iowa. The new alignment gives Illinois five directors and Iowa four.

Battle For Equality

The fight of the milk producers at the Quad Cities is the old battle of the farmer against organized and strongly entrenched middlemen who insist on maintaining dictatorial powers and naming the price both to the producer and consumer. It is a fight for equal privilege against special privilege. When the dealers could not control the Quality Milk Association they sought to destroy it. They attacked Farm Bureau and I. A. A. support and joint stock control because they recognized in this setup a factor of additional strength for the producers.

To prejudice the public against the Quality Milk Association, the dealers through their puppet organization came out in the Quad Cities' newspapers with large advertisements in which they referred to the Illinois Agricultural Association as the "Chicago group" and "outside control." The appearance of the so-called Illinois-Iowa Milk Producers' Association on the scene was designed to confuse and give the distributors "face" with the public. The Quality Milk Association countered by telling its story in radio speeches over the Davenport and Rock Island stations and through publicity in the newspapers. The determining factor in the fight was the price of milk.

Distributors Disturbed

With a six cent retail market the producers will receive approximately 90 cents per 100 pounds for milk which is something better than the butterfat price and approximately as much as producers netted when they were selling previously to the organized dealers. The public will consume more milk at this price than at 8 or 9 cents. At this writing certain of the organized distributors are reported to be frantic over the loss of business they have suffered and are expected to lower their price to six cents per quart to meet the competition.

O. G. Sturtevant and his son Kenneth have gone all the way with the producers in helping them fight for a fluid market. Without them the Quality Milk Association either would have been forced into the distributing business directly, or else become resigned to a surplus market. The modern and well equipped plant of the Sturtevants together with their past experience in the milk business, and ample capital, prompted the producers to seek their co-operation which has been freely given from the beginning.

The Quad Cities' market like other markets where producers are

Kenneth Sturtevant ready to take off for New York to speed delivery of more bottles.

unorganized, has been a favorable one for the distributors for many years. With an air-tight organization reenforced by a bottle exchange by which the big dealers whipped the little ones into line, the distributors had absolute control, bought their milk at a low price from the producers, and charged the consumer at a rate to give them a wide and profitable spread.

20% Consumers' Dollar

For many years local milk producers secured only around 20 per cent of the consumers' milk dollar. As late as the summer of 1932 producers were netting only around $1 per 100 pounds for milk which was being sold to the consumers in bottles at $4.60 per 100 pounds. More than that, the dealers for a long time controlled the hauling of milk from the farmers to the plants charging the producers up to 35 cents per cwt. for the service. The Quality Milk Association broke up this racket last year when it put in its own truck drivers and lowered the hauling price to 20 cents. Last June, according to Herman Ralfs of Walcott, Iowa, it required half of all the milk he produced to pay the cost of hauling.

Frank Watson, manager of the Quality Milk Association and its surplus plant in Davenport, points out that when the dealers lowered the price to the farmer on cream last November, the farmer was given a cut of $4.70 per 100 pounds of 20 per cent cream, whereas the price to the consumer was cut only $1.84 per cwt. In other words, the dealers used the situation to increase their profits from handling cream $2.86 per cwt. more than they previously had taken.

The organized producers, more than 400 strong who attended the annual meeting at the Fort Armstrong Hotel, Rock Island, Feb. 24, were unanimous in favor of continuing their fight for a fluid market through the Sturtevant Company.

Larry Williams, manager of Country Life, talked to the group congratulating them on their fine spirit, emphasizing the importance of following leadership and sticking to the finish. He cited case after case of victory resulting from co-operation, and failure from division.

Attorney Wier of Davenport paid his respects to the farmers of the "rump" association who have allowed themselves to be used as tools of the organized dealers to the detriment of their neighbors.

Base Milk Declines At Bloomington During 1932

McLean County Milk Producers Meet In Annual Session Feb. 28

DURING the year 1932, 442 members of the McLean County Milk Producers' Association produced 20,723,966 pounds of milk, a slight increase over 1931, Manager Forrest Fairchild reported at the annual meeting, Bloomington, February 28.

Of this quantity nearly 32 per cent was used for fluid milk and cream compared with 37 per cent the year before. A little more than 10 per cent of milk was sold to other than contracting dealers, 22½ per cent was used for manufacturing purposes, 1¾ per cent was used in a special class, and nearly 34 per cent was turned into butter.

FORREST FAIRCHILD

Total value of milk sold was nearly $290,000, a decrease of 28 per cent from 1931. Base milk was 31.87 per cent of the total, and surplus 68.13 per cent.

"This year the quality of milk delivered has been considerably better than that delivered in previous years," said Fairchild. The Association purchased supplies for members, profits from which were paid back in the form of patronage refunds.

The Farmers' Creamery Company set up late in the year began making butter early in February, churning sweet cream from surplus milk of members, and also cream received from produce associations in McLean and adjacent counties. The creamery is equipped to take care of an annual capacity of 1,200,000 pounds of butter.

Donald Kirkpatrick and J. B. Countiss of the Illinois Agricultural Association spoke on legal and technical problems in co-operative marketing.

Dr. H. A. Ruehe of the University of Illinois spoke on the subject, "Operating a Creamery and Putting Out a Quality Product." Officers and directors were re-elected.

Smith and Kirkpatrick At Country Life Banquet

400 General And Special Agents Gather For Annual Roundup at Peoria

FOUR hundred general and special agents of Country Life Insurance Company warmly welcomed President Earl C. Smith and Donald Kirkpatrick, general counsel, at a banquet held in the Pere Marquette Hotel, Peoria, February 21. The dinner marked the high point of the annual "round-up" of Country Life agents. Mr. Smith and Mr. Kirkpatrick were not only the honored guests but also the principal speakers.

EARL C. SMITH

The annual "round-up" opened on the morning of February 21 and continued through the afternoon of the following day. It was the largest and most enthusiastic meeting of its kind held in the history of the Company. L. A. Williams, manager, presided.

In his address Mr. Smith traced the history of the Company, telling how the Illinois Agricultural Association in 1927 decided to foster such a company in response to demand from members, the long and laborious preliminary steps necessary before the Company finally came into being, and of the stock setup and control worked out by Mr. Kirkpatrick to keep its ownership within the Farm Bureau movement. Special tribute was paid to Vernon Vaniman, who directed the original "selling" campaign with the result that the necessary stock was oversubscribed, and to L. A. Williams, under whose direction the growth of the Company in strength, in prestige, and in the amount of insurance in force has been continuous.

"Every member of the I. A. A. is proud of Country Life," Mr. Smith said, "because from these small beginnings it has flourished and grown until it commands the attention and respect of the oldest companies in the insurance field and because of the outstanding position it occupies, not only as an insurance company, but also as a truly successful agricultural co-operative."

The speaker's mind was never far from the needs and problems of present day agriculture, however, and he brought a message of optimism to the guests who were almost to a man practical farmers.

"I believe the bottom has been reached," Mr. Smith said, "and that from here on we may begin to note improvement. I am confident that existing farm problems eventually will be ironed out and brought to a successful solution."

He stressed the importance of complete organization among the farmers of the nation as a means of obtaining a voice in the settlement of agricultural problems and said that through organization the entire country may be impressed with the true importance of the farmer in the economic scheme of the nation. Through organization, he said, it can be clearly demonstrated that the first necessity is to restore the prosperity of agriculture as a means to restoring the prosperity of every other class in America.

Mr. Kirkpatrick paid an eloquent tribute to the memory of George Washington, whose birthday was the following day. He stressed the importance of team work in any cooperative organization and showed how no one aspect of a cooperative group could be permitted to prosper at the expense of another but that all must bear their full share of the burden and accept full responsibility if success is to be achieved.

He emphasized the importance of life insurance in general to the people of the United States and showed how it forms an extremely important part in the financial structure of the country. He likewise stressed the importance of life insurance service in the I. A. A. picture and pointed with pride to the record the Company has made.

At the other sessions of the "round-up" speakers were for the most part members of the Country Life organization, their subjects being matters of interest to the agents, and discussions of the agents' problems. W. K. Braasch, sales engineer, of Chicago and A. R. Jaqua of Cincinnati addressed the agents on insurance subjects. Mr. Williams opened the meeting with a talk on "The Importance of a Purpose," and other speakers and leaders of the discussions included Dr. John Boland, medical director, C. C. Ramler, Dave Mieher, Bernard Mosier, M. E. Roberts, H. O. Henry, G. R. Williams, V. Vaniman and A. E. Richardson.

The Illinois Agricultural Holding Company recently declared and paid a dividend of $48,000. Approximately 10,000 checks were mailed out.

This distribution is another example of the value of co-operative effort among Farm Bureau members.

Walter W. McLaughlin Director of Agriculture

Walter W. McLaughlin, former farm adviser in LaSalle county, was recently appointed state director of agriculture by Governor Horner.

McLaughlin is a native of Marion county, Illinois, where he resided until he started to school at Southern Illinois Normal college, Carbondale. After graduating there he taught country school for three years before entering the University of Illinois in 1913. Out of college during the war, McLaughlin re-entered the State University in 1920 where he secured his bachelor's degree in the College of Agriculture. He worked in LaSalle county seven years, first as assistant farm adviser then later as adviser.

During recent years McLaughlin was employed as farm manager for the Citizens National Bank at Decatur. More than a year ago he joined Dudley C. Smith and Frank D. Baldwin in organizing Decatur Farm Management, Inc. which has been supervising approximately 17,000 acres of land in Macon and adjoining counties.

McLaughlin's appointment is a popular one, and he is assured of securing the good will and co-operation of agricultural interests throughout the state.

1200 Attend Sanitary Milk Producers Meeting

More than 1,200 milk producers attended the annual meeting of Sanitary Milk Producers, at St. Jacob Feb. 23 reports Sec. Geo. E. Metzger, who attended the meeting.

An active discussion was had on the question of establishing surplus plants in the country. At current prices, farmers are receiving less for surplus milk after paying trucking charges, than they would receive were the milk condensed or separated and the cream churned into butterfat.

Dr. Arthur E. Holt of the Chicago Theological Seminary was the principal speaker at the gathering representing 9,000 members of the Association.

Soyoil Paint at Century of Progress

The Illinois Farm Supply Company recently announced the sale of more than 400 gallons of Soyoil paint to the Century of Progress Exposition.

The paint will be used both inside and outside in covering the walls of the Illinois Host building.

Illinois Grain Corp. Meeting

(Continued from page 14)

ing of the new board of directors went on record as favoring complete investigation of the plan now under consideration for the dilution of motor fuel with alcohol produced from farm products as a possible means of restoring the farmer's purchasing power through providing a better market for his grain.

Smith Lauds Illinois Grain

The importance to every resident of the United States of the cooperative grain marketing movement was stressed by Earl C. Smith, president of the Illinois Agricultural Association, in addressing the morning session of the annual meeting.

After outlining efforts that are being made to restore the farmer's purchasing power to a parity with other classes of our citizens, Mr. Smith said:

"We who are fighting the battle of agriculture in this state are very proud of Illinois Grain Corporation. Starting about a year after some of the others in our sister states we have outstripped them and Illinois now has one of the largest of all the Farmers' National regionals in volume of grain handled.

"Slowly but surely organized agriculture is getting recognition. Through his cooperative marketing organizations the farmer is coming to have a voice in the price of the grain and other products he raises and sells. He is beginning to help himself and regain his place in the economic scheme of our country."

Touching on the depression, Mr. Smith said:

"In my judgment the bottom has been reached. The farmer is coming back and everywhere organized agriculture is being recognized as a real power in the recovery from present depressed and depressing conditions. People everywhere are beginning to realize that no class of industry or business will recover until the farmer recovers and we feel that victory is in sight.

Grow Despite Propaganda

"I predict that Illinois Grain Corporation will double in membership and in the volume of grain handled within the next year or two."

G. C. Johnstone, president of Illinois Grain Corporation, while optimistic for the future, pointed out to the delegates attending the meeting that difficulties are daily being encountered in the movement to give the producer a voice in securing a fair price for his products.

"Cooperative Marketing is having to fight for its existence," Mr. Johnstone said, "but we are winning. We must continue to have strong and fearless leadership and we must have loyal support from the ranks. Our growth and development in Illinois and the nation in the last two years has been accomplished in spite of the most insidious propaganda ever attempted, with the exception perhaps of that directed at the prohibition question. This propaganda is being disseminated through every conceivable channel. Never before has it been so well financed and so well organized.

"And grain marketing is not the only target. Propaganda is being directed at all efforts of the farmers to organize for their mutual benefit. The charges made in the beginning have been exploded but new ones have been created to take their place. And it has been the policy of Illinois Grain Corporation not to attempt to answer the many absurd charges but rather to demonstrate by our operations, that the service we render is really in the interests of the farmers themselves.

"It is more important now than ever that the farmers be awakened to the fact that they should join together to protect their own interests. A renewed, nation-wide drive is being made by all handlers of farm products to break down the confidence of farmers in their own organizations of every kind, both cooperative marketing and general farm organizations. Under the guise of economy, they are also attempting to make all protective legislation and appropriations for the benefit of the farmers inactive.

"No individual farmer can hope to resist this attack. Strong organization, with a loyal and determined membership, is his only chance."

BAGS OF MONEY FOR THE McLEAN COUNTY MEMBERS

At the annual meeting of the McLean County Service Company one of the features was the payment of a patronage refund amounting to approximately $45,000. This was dramatized by having the individual truck salesmen appear on the stage with bags of "money" in the amount of the refund paid to the customers on their various routes, and guarded by members of the American Legion. They are shown above, grouped around Manager George Curtiss. When it's loaded into bags $45,000 sure is a lot of money. (Just between us the sacks were filled with washers and the guns loaded with blanks but the patronage divided was distributed just the same.—Ed.)

I. A. A. Committees Appointed For 1933

President Smith appointed the following advisory committees at the February meeting of the I. A. A. board of directors:

FINANCE COMMITTEE: A. R. Wright, Varna, Chairman, M. G. Lambert, Ferris, Talmage DeFrees, Smithboro.

ORGANIZATION COMMITTEE: C. E. Bamborough, Polo, Chairman, E. D. Lawrence, Bloomington, M. Ray Ihrig, Golden, T. W. May (Adviser), Edwardsville.

PUBLIC RELATIONS COMMITTEE: Chas. S. Black, Jacksonville, Chairman, Geo. B. Muller, Washington, R. B. Endicott, Villa Ridge, Edwin Bay (Adviser), Springfield.

MARKETING COMMITTEE: Samuel Sorrells, Raymond, Chairman, W. A. Dennis, Paris, W. L. Cope, Salem, Eugene Curtis, Champaign, J. R. Spencer (Adviser), Moline.

BUSINESS SERVICE COMMITTEE: Geo. F. Tullock, Rockford, Chairman, Chas. Marshall, Belknap, E. Harris, Grayslake, W. L. Purnell (Adviser), Gibson City.

I. A. A. Board Meetings

Monthly meetings of the I. A. A. board of directors will be held during 1933 on Friday following the second Monday of each month unless otherwise ordered. On this basis the dates for board meetings for the balance of the year are as follows: February 17, March 17, April 14, May 12, June 16, July 14, August 18, Sept. 15, Oct. 13, Nov. 17, Dec. 15.

Number 4 APRIL, 1933 Volume 11

The Roosevelt Farm Bill

It Gives The Secretary of Agriculture Broad Powers To Attack The Price Problem And Restore Farm Purchasing Power

THE farm bill of the Roosevelt administration which was unanimously approved at a conference of 52 representatives of the general farm organizations, cooperatives, and farm press is different than any agricultural legislation heretofore proposed.

It sets forth certain objectives the chief of which is to raise farm prices gradually until the farmer has the same purchasing power he had in the five-year period from 1909 to 1914. The bill clothes the Secretary of Agriculture with broad powers to act in achieving the goal. It does not tie the administration down to any one plan or principle. It does point out several ways of starting agriculture on the upgrade leaving it to the discretion of the Secretary to use one or all of the methods suggested. In this respect the measure blazes a new trail in legislation so far as agriculture is concerned.

As a means toward raising prices, the bill would restore the balance between production and consumption of farm crops. It gives the Secretary of Agriculture power:

(1) To provide for reduction in acreage or production of specified farm products and to compensate producers for such reduction through rental or benefit payments.

(2) To enter into marketing agreements with producers, marketing agencies, and processors of farm products.

(3) To license processors and distributing agencies engaged in interstate or foreign commerce in handling agricultural products and to regulate them so as to eliminate unfair practices and charges.

(4) To use the Smith Cotton option contract plan on the 1933 crop of cotton.

(5) To impose taxes on the processing of the basic agricultural commodities at an amount not in excess of that necessary to restore the pre-war price parity, subject to the limitation that the tax shall be reduced if the full amount is more than can be borne under existing conditions without excessive reduction in consumption.

It is intended under this broad grant of power that the Secretary will call in representatives of the producers and processors for each commodity and shall work out separately for each commodity the method of dealing with it which offers the best hope of effective control of production for the 1933 crops and of progressive action towards an elimination of surplus stocks or production, and restoration of normal price parities.

Under the taxing power, provision is made for hearing interested parties so that before applying the law the Secretary will discuss each proposed step with those interested and will take into account their expert advice.

In controlling production of different commodities different systems will probably be used. Thus it is anticipated that in the case of hogs benefit payments will be contingent upon a reduction in the tonnage of pork marketed by the producer. In the case of cash crops the rental or benefit payment may be based primarily upon reduction in acreage of the particular crop in question, with supplementary provisions as to the alternative use of the land. Under the plan the Secretary is also at liberty to rent land in large tracts or in selected regions, or to allot the sums for land rentals by States and counties so that each producer will have an equal opportunity to rent a portion of his land.

Provisions are included for taxes on the existing warehouse stocks at the time the processor's tax goes into effect and refunds on the exportation of finished products upon which processing taxes have been collected and for the imposition of such taxes as are found necessary on commodities or products competing with the basic agricultural commodities or their products. Commodities used by unemployment relief agencies are exempt from taxation. Through these, and other special provisions it is hoped that the tax can be applied with the least possible necessity for adjustment in the various industries and without injustice to the various individuals and concerns involved, so that in every way the addition of the tax will work out in the same way as an increase in the price of the product itself.

In practically all cases the percentage of the retail prices which now goes to the farmer is so small that the addition of the tax will have only a very slight effect on the retail price. It is anticipated that that part of the tax which is added to the retail price will not be burdensome to consumers. At the same time by increasing the funds available in rural communities and thus increasing the assets behind the rural banking structure and increasing the purchasing power of farmers for industrial products it is expected that there will result an increase in city industrial activity. As this develops the increased activity will eventually provide city workers increased incomes far greater than the small increase in food cost.

The basic products to which the Act applies are: wheat, cotton, corn, tobacco, rice, hogs, cattle, sheep, and milk and its products. In practically all cases these products are now selling at retail far below the cost of other items of food and the prices of goods and services which consumers buy. The Bill specifically states that the Act is not to be so administered as to advance the retail price of the products affected out of line with the prices of other products.

The President may terminate the measure whenever he finds that the existing emergency in relation to agriculture has been ended.

How The New Bill Was Written

The Emergency Banking Act Furnished The Principal Idea In The Measure

THE farm bill of the Roosevelt administration described on the preceding page proposes to do for agriculture what the new banking act does for finance.

Passage of the Emergency Banking Act which gives the President certain dictatorial powers to straighten out the financial situation inspired the idea back of the new farm measure. The plan of giving the Secretary of Agriculture broad powers to handle the situation was first discussed by a small group of farm leaders on the way to Washington to attend the conference called by Secretary Wallace. The thought was to empower the Secretary to apply different principles of surplus control to each of the several commodities as the peculiarities of the commodity might best justify.

This provision incorporated in the new bill removes the outstanding weakness of previous measures which attempted to apply one principle of law to several basic commodities regardless of their relationship or the special problems they presented in production, processing, or marketing, said President Earl C. Smith who attended the many conferences held before the measure was finally drafted.

Confidence In Wallace

This broad grant of power unanimously agreed upon at the conference of 52 farm representatives expresses the implicit confidence farmers everywhere have in Henry Wallace.

The conference appointed a committee representing each commodity and major farm organization the members of which appear in the picture below. This committee conferred with the President in the White House office building following which several changes in the bill were made before submitting it to Congress.

The new farm bill is definitely a Roosevelt administration measure and as such has the unqualified support of the President. The general farm organizations and cooperatives have offered their services in helping the President and Secretary of Agriculture to make it operate when enacted.

The bill which passed the House by a vote of 315 to 98 on March 22 empowers the Secretary of Agriculture to invoke one or more of several plans to restore farm prices to pre-war parity.

As we go to press plans to refinance farm mortgages through a federal credit agency are being dis-

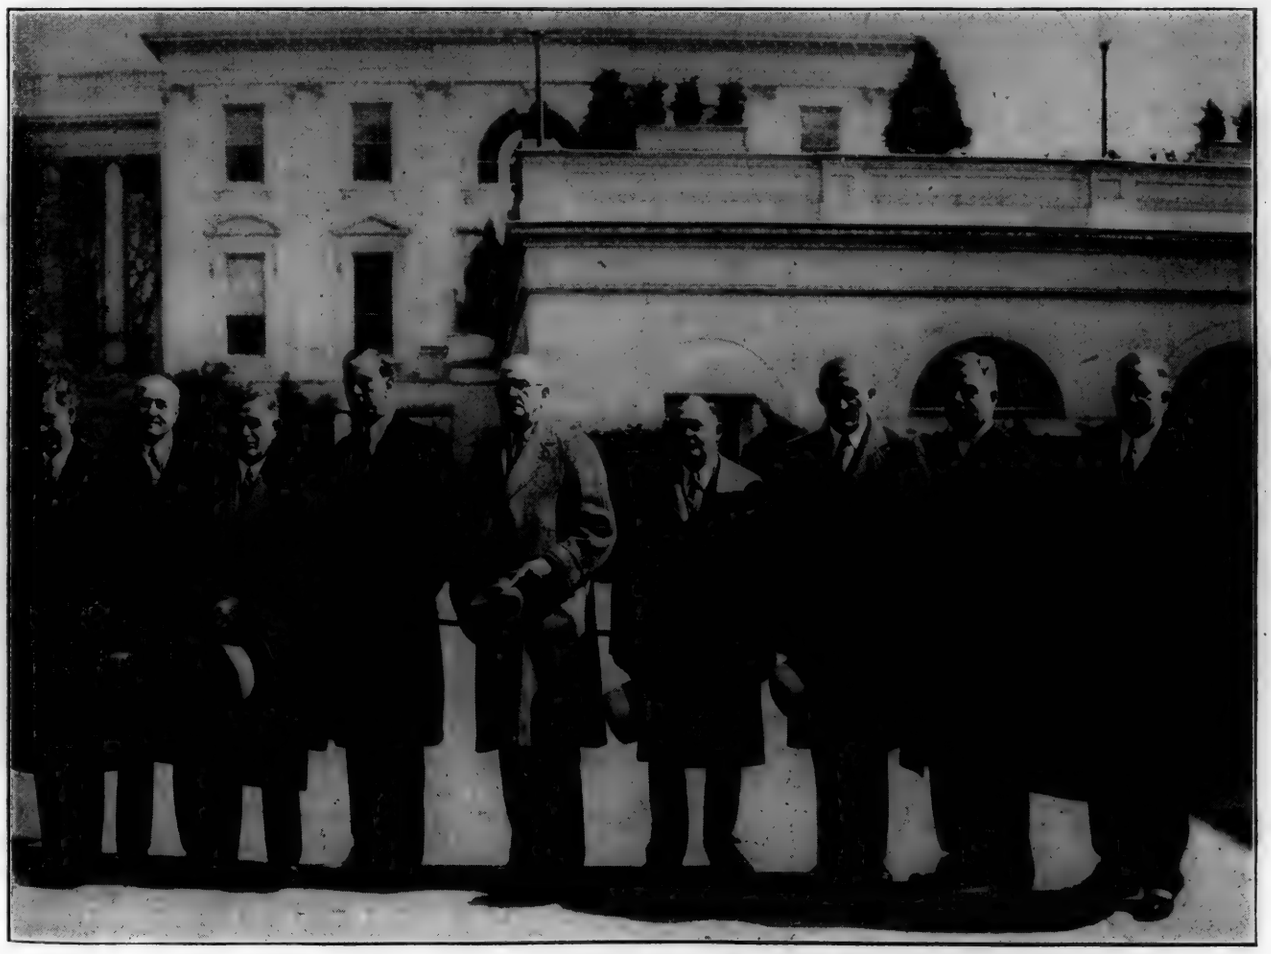
The State Sales Tax

I. A. A. Amendments Provide For Equitable Distribution And Make It a Replacement Tax

Enactment of the administration's state sales tax which went into effect April 1 paves the way for substantial reductions in property taxes in all down-state counties where unemployment relief is not a major problem.

The measure of relief to property will depend upon the amount of revenue raised by the new taxing measure. Based on estimated returns of $40,000,000 in the next twelve months, the sales tax will make possible reductions in levies against property for educational purposes in the various counties as indicated in the accompanying table.



The revenue from the sales tax in each county will be used wholly to reduce property taxes for educational purposes unless the county board by a two-thirds vote decides that part or all of such revenue be diverted for unemployment relief in 1933 or 1934.

The prospective reduction in property taxes, according to John C. Watson, director of taxation, who compiled the data, is contingent upon all of the money returned to the counties being used for educational purposes in which case levies against property by school districts must be cut to the extent funds are derived from the sales tax. The reduction in property taxes, likewise, is contingent upon local school boards not increasing their levies for educational purposes above expenditures in the school year of 1930-31.

"If any school board," said Mr. Watson, "takes advantage of the situation to increase its levy in the coming year above the 1930-31 figure the effect will be to lower the saving made possible by the replacement feature of the sales tax. It is up to the taxpayers of every county to see that there is no unnecessary diversion of sales tax revenue to unemployment relief, and also to see that school boards hold down their levies consistent with the greatly reduced ability to pay, of property owners."

Some question has arisen regarding the Illinois Agricultural Association's interest and part in the passage of the state sales tax commented President Earl C. Smith. The I. A. A. did not sponsor this measure. The sales tax was sponsored by the state administration. The original measure provided that all revenue was to be made available to the state unemployment relief commission. Expenses in 1932 revealed that Cook county received more than 90 per

Smith, president, Illinois Agricultural Ass'n; W. B. Blalock, president, American Cotton Co-op. Ass'n; Dr. O. O. Wolf, Director, National Livestock Marketing Ass'n; Cong. W. P. Lambertson, vice-president, Farmers Union; M. L. Wilson, Montana Agricultural College; Dante Pierce, publisher Wallace's Farmer-Iowa Homestead.

The State Sales Tax

(Continued from page 5)

cent of all funds expended for the relief of destitute people in Illinois.

The Illinois Agricultural Association early recognized that new revenue would have to be found from some source to take care of unemployed people particularly in the metropolitan areas. When the measure was introduced the I. A. A. insisted that any proposed tax imposed on the people of the state would be unfair if nearly all of it were spent in metropolitan areas.

In line with the Association's well-known policy to the effect that all new revenue derived from taxes be used primarily to replace or reduce taxes on property, the I. A. A. sponsored three amendments to the administration's sales tax bill. Two of these were passed in the senate and are now incorporated in the enacted bill. One makes the sales tax a replacement tax, although a county board of supervisors by a two-thirds vote may divert sales tax revenue to unemployment relief, during 1933 and 1934. The other amendment provides for an equitable distribution of sales tax revenue among the counties according to population. The third amendment sponsored by the I. A. A. would have reduced the maximum levy against property for the educational fund in school districts to 80 per cent of the average annual levy in the four years ending June 30, 1932 unless higher levies are permitted by referendum.

Because of organized opposition of Illinois teachers who insisted on maintaining the salary levels of the prosperity era this amendment was defeated. Therefore the Association urges the property taxpayers to see that educational fund levies are held down in line with the spirit of the defeated amendment. This is necessary to secure the maximum reduction in property taxes from the replacement feature of the Sales Tax Act. In the meantime the Association is giving consideration to the introduction of a bill to make cuts in levies for the educational funds of school districts mandatory.

The Illinois Agricultural Association believes strongly in education and in maintaining efficient public schools, but it believes that schools should reduce their expenditures and cost of maintenance along with other branches of government so as to share at least in part the tremendous decline in the incomes of taxpayers.

Twenty thousand dollars in cash dividends were paid to patrons of the Will County Farm Supply Company on March 4.

* No school district can be apportioned any sum from the sales tax which when added to its receipts from the state school fund in any year exceeds its average annual expenditures for elementary educational purposes in the four years ending July 30, 1932. The balance, if any, is to be apportioned to all high schools and non-high school district in the same county in proportion to assessed valuations.

Hi-Ball Gas Proves Popular

Users Are Enthusiastic About New Motor Fuel, Hope For Legislation

GASOLINE diluted 10 per cent with anhydrous (dry) grain alcohol makes a better motor fuel than either ordinary or the so-called "premium" brands of undiluted gasoline. This is the conclusion reached almost unanimously by users of the new blended fuel who have been testing it under actual daily driving conditions in ten down-state Illinois counties.

A total of 300,000 gallons had been distributed by the County Farm Bureau Service Companies up to March 29. In their opinion, the alcohol-gasoline blend is superior in every department of motor operation to straight gasoline of whatever test. Only a negligible minority dissented from this opinion in the slightest particular.

Throughout most of the month of March, Illinois Farm Supply Company has been distributing through the County Farm Bureau service companies, the new "Hi-Ball Gasoline," diluted with anhydrous alcohol at the ratio of 10 to 1. It was distributed to consumers at 3 cents per gallon higher than ordinary gasoline. The distribution of the new fuel was made possible by a permit from the Federal Bureau of Industrial Alcohol secured by the Illinois Agricultural Association and the American Commercial Alcohol Corporation of Pekin.

Laboratory Experiment

Distribution of "Hi-Ball" gas was in effect a gigantic laboratory experiment conducted under the strictest supervision in an effort to determine the facts concerning a gasoline-alcohol blend as motor fuel. Wide publicity had been given the proposals for such a blend as a means of supplying the farmer with a market for his surplus grain and of advancing grain prices. Bills were introduced in the Congress. Claims had been advanced that the plan offered the only real hope of farm relief and there was considerable misinformation circulated regarding the scheme.

At the instance of Earl C. Smith, president of the I. A. A., a national committee was formed headed by C. V. Gregory of Prairie Farmer to investigate the plan from all angles. Dr. L. M. Christiansen, of the Iowa State College at Ames, one of the first to experiment with alco-gas blending, supplied the committee with much information. Chester C. Davis, vice-president of the Maizewood Products Corp., was retained temporarily to assemble the data.

Very little concrete information about the fuel was available and the Illinois Agricultural Association determined to make a test so that all agencies and groups interested might have actual facts upon which to base reliable conclusions. Illinois Farm Supply Company and its associated service companies were ideally situated to conduct the test.

300,000 Gallons

Up to date, approximately 300,000 gallons of Hi-Ball Gas have been distributed in the counties of Peoria, Knox, Fulton, Tazewell, Logan, Mason, DeWitt, Henry, Marshall, Putnam, Woodford, Livingston, McLean and McDonough counties. The return of the questionnaires supplied each purchaser of the new fuel has led to the above conclusions.

Of 240 users who compared "Hi-Ball" gas with ordinary motor fuel 178 reported increased mileage. (The average increased mileage per gallon for all cars with Hi-Ball was 3.07.) Only one out of 240 reported a decreased mileage and 78 did not report either increase or decrease.

In the other various departments of motor operation results were reported as follows:

Two hundred seventeen reported better starting with Hi-Ball gas, two reported better starting with ordinary gas and 21 could see no difference; 228 got better acceleration with Hi-Ball, one with ordinary gasoline, and eleven could see no difference. In smoothness of operation, 231 preferred Hi-Ball, none thought ordinary gas was better and nine thought that the new fuel made no difference. Only eleven out of 240 users thought that anti-knock qualities were not improved by the new fuel while 229 were sure they were improved. In this classification not one user found that gasoline's anti-knock properties were superior to Hi-Ball.

More Power

Only one user reported that he got more power with ordinary gasoline, while 231 were of the opinion that their motors developed greater "pull" with Hi-Ball, and eight could note no difference. Two hundred thirty - four expressed the opinion that their motor performance was generally better with Hi-Ball, not one thought that gasoline gave better motor performance and in the opinion of six it was about a stand-off between two fuels.

One question developed an exceedingly interesting answer. Asked whether they would be willing to pay two or three cents a gallon more for blended fuel, provided its use would provide a market for surplus corn, 239 declared they would willingly pay this premium and only one said he would be unwilling to do so.

A special comparison is being made of the results obtained with Hi-Ball Gas and high test or premium motor fuel. Out of thirteen such users, 10 reported an average increase of 3.74 miles per gallon, not one reported a decrease as compared with straight high test gasoline and three did not report any change.

Aids Motor Operation

The following tabulation covers other departments of operation.

	Hi-Ball Better	Premium Gas Better	No Difference
Starting	9	—	3
Acceleration	10	1	1
Smoothness of Operation	11	—	1
Power	10	1	1
Anti-Knock	9	—	3
General Motor Performance	9	—	3

Of the thirteen reporting, 12 expressed their willingness to pay a premium of 2 to 3 cents per gallon for the new fuel and one decided he would stick to high test at the lower price.

After the fuel has been tested for a period of 60 to 90 days depending

(Continued on page 15)

Administration Investigates

News dispatches from Washington state that Secretary of Agriculture Henry A. Wallace has assigned investigators in the Department of Agriculture the task of gathering complete information about diluting gasoline with alcohol made from grain. The results of the experiment among several thousand users of Hi-Ball gasoline will be made available to the Secretary together with data being compiled by Chester C. Davis for the Committee of Farm Organizations. Large numbers of replies have been received in response to questionnaires sent out by the Illinois Farm Supply Co. to County Service Companies in the Peoria and Bloomington areas. This information is being tabulated and analyzed. Results of the first reports received are outlined in the accompanying story.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Administration Farm Program

HERE'S to the Business Week for a clear and honest appraisal of the economic situation and the Roosevelt program to raise agricultural prices. Admitting that there may be sound objections offered to the proposed farm legislation, the weekly declares in its March 29 issue:

> "President Roosevelt's farm program has one supreme justification which overrides objections. It is necessary to do something for the farm population and do it quickly. . . . One way or another, the rest of the population is going to be taxed for the benefit of the farmer . . . but that aspect of the situation is mitigated by the reflection that *for a long time the farmer has subsidized the rest of us. . . .*"

Here is an honest statement of fact. It has been too often denied in business and industrial circles. Our "protection for industry" policy pursued for many years is largely responsible for putting the farmer down where he is. That policy has led to the near destruction of American agriculture's foreign markets and compelled the farmer to pay exorbitant tariff-made prices for nearly everything he bought. Further, our high tariff policy, immigration restrictions, and rate-fixing have greatly increased the cost of processing and distributing farm products. As a result the American farmer receives an unwarranted small percentage of the consumer's dollar.

Higher farm prices will immediately release a wave of buying that will be reflected in greater employment and prosperity in industrial centers. Thus the administration farm program strikes at the heart of the depression. It is a program designed not to benefit agriculture alone, but to benefit the entire nation.

Inflation Not Enough

CONTROLLED inflation is now being offered by the conservative Chicago Daily News as the cure for the farm problem in particular and the depression in general. In doing so it expresses opposition to the administration farm program and plans to refinance farm mortgages at lower rates of interest. While it is gratifying to see additional city support to the movement for reflation, this alone will not establish parity prices for agriculture.

Inflation will tend to raise all commodity prices equally. This will bring relief to the farmer from such fixed charges as debts, interest, taxes, transportation and utility rates, and excessive costs of distribution. Possibly no other one thing will do more for those deeply in debt. But inflation alone will not eliminate farm surpluses nor open up foreign outlets for farm products.

It will not eliminate the disparity between farm and non-agricultural prices. More than that is necessary. The situation calls for a broad attack all along the line, for a plan of acreage reduction in some instances, reciprocal trade agreements, a retreat from our high tariff policy, property tax reduction, and the like. And the administration should be given power to apply any one or all of the things necessary to do the job.

Social Legislation

THE state sales tax was conceived as a piece of social legislation for unemployment relief. The original bill in effect declared that every time you spend a dollar you must contribute three cents to the unemployment relief commission to buy food and shelter for a less fortunate neighbor. No one with an ounce of social consciousness can deny subsistence to those who are worthy and in want. The danger of such legislation lies in the possibility of creating a permanent class of dependents. Incidentally, President Roosevelt's reforestation program to provide work for the unemployed attempts to meet this serious problem.

As a result of the amendments sponsored by the Illinois Agricultural Association, however, the state sales tax has been made primarily a measure to reduce property taxes. This was accomplished without destroying its value as a source of revenue to feed the destitute. One way or another, hungry people are going to be fed. If food isn't offered at public expense many will take it by force. It is far better to give the needed relief in an orderly and equitable way. And it is no more than just that the property owner be not required to bear this additional load.

Sales tax revenue may not be used for unemployment relief except by a two-thirds vote of the county board. In rural counties there need be little if any diversion. Where none is voted, it must replace property levies, dollar for dollar. In more populous counties the revenue if needed can be used for relief purposes. There, people are being fed now either out of gas tax money, or from funds contributed by property taxpayers. So in any case, the overburdened property owner is no worse off, and he may have his taxes reduced.

THE complaint of the grain exchanges for an unrestricted futures market has always seemed to us more an expression of resentment by professional speculators against the government keeping an eye on their operations, rather than because of any actual interference with the play of legitimate market factors on prices.

It may be true that the wolves like to shear the lambs without the government knowing about it, but recent events indicate the exchanges are not averse to "regulation" so long as they can do their own regulating in the interest of the speculators regardless of the effect on the farmer who produces the grain.

When the grain exchanges opened following the recent national bank holiday, they found it "convenient" to impose restrictions on trading by setting a maximum price advance of five cents on wheat, three cents on corn, and two cents on oats. In other words, the exchanges did the very thing they have continually complained against.

Farmers weren't consulted, incidentally, when the maximum price was established. Only the interests of a lot of "shorts" were protected by the move. The farmers lost by the "restricted" market, for wheat prices the first day of opening would have gone considerably higher than the five cent limit. The maximum was reached early and the price stayed there all day.

At one time, apparently very few trades were made because there were unlimited buying orders but none willing to sell at the "regulated" price. The trade has continually complained about the bearish influence of the Grain Stabilization Corporation, yet at the first sign of an economic revival, the market went ahead in spite of the Stabilization Corporation's 30,000,000 bushels. All of which is proof that business conditions and low buying power throughout the world are responsible for depressed grain prices, not the Federal Farm Board or the paltry 30,000,000 bu. or less owned by the Stabilization Corporation.

Do we really have unrestricted commodity markets when the exchanges can arbitrarily set the price, as was done in this case, on the farmers products? When the government seeks regulation in the interest of the farmer it appears to be all wrong from the standpoint of the middlemen. But when the latter impose regulations in the interest of the speculators, restriction seems to be a blessing.

The cash grain market advanced steadily during the bank holiday when future trading throughout the United States was dead as a mackerel. So the argument that speculating in grain is an aid to higher prices and necessary to business was not borne out by recent experience. The proponents of unlimited future trading never have satisfactorily answered the charge that the tremendous sums collected by grain brokers who take toll from every bushel bought and sold, is a burden on the back of the farmer and consumer.

To our mind, the biggest hope of the farmer lies not in an unrestricted or restricted future trading market, but in the development of their own co-operative agencies which not only accumulate profits to the producers' credit, from buying and selling, but also from conditioning, mixing, storing, and marketing grain at the highest price the world market affords.—E. G. T.

The Kasbeer Incident

THE farmers elevator at Kasbeer in Bureau county on December 19, 1932, voted to become a member of the Illinois Grain Corporation. The board of directors of the elevator appeared to be agreed on the advisability of the action and the manager, Mr. Postlewaite, expressed his willingness, in the presence of Illinois Grain fieldman, to sell through the state regional and Farmers National Grain Corporation whenever he could get the price.

Apparently the opposition heard of the action and sent their workers into the territory spreading false and malicious propaganda. With the help of the manager, these representatives succeeded in stirring up a fight among the local grain producers which culminated at a stockholders' meeting at Kasbeer on March 10.

Previously, it should be mentioned, the manager attempted to persuade his board of directors to rescind their action in voting to affiliate with the farmer-owned state co-operative. When the board refused, the manager carried the fight to the stockholders.

The manager is reported to have secured proxies from more than a third of the stockholders and lined up sufficient others to support him, first in electing a new board of directors, and secondly in opposing the membership in Illinois Grain Corporation.

Charles Peavey, who has gone up and down the state for years singing praises of farmers elevators who give their business to old line commission men and condemning all efforts at carrying farmer co-operation into the terminal markets, was present to read the audit and the manager's report, and shout his disapproval of Illinois Grain Corporation and the Farmers National Grain Corporation. The latter incidentally have taken a sizable amount of business away from Peavey's friends.

Spokesmen for Illinois Grain Corporation were not allowed to appear until after the manager's hand-picked board of directors had been voted in with the help of the proxies in his pocket, and only then at the insistence of stockholders, who demanded fair play, was O. D. Brissenden, fieldman for Illinois Grain Corporation, introduced.

A Publicity Stunt

The fact that the Chicago Journal of Commerce which propagandizes for the grain exchanges and other middlemen groups, against farmer co-operation, announced the incident in headlines a few days later as follows: "FARMERS NATIONAL UNIT DEVELOPS RIFT, Kasbeer Farmers Elevator Withdraws Completely from Illinois Grain Corporation," indicates that certain grain producers around Kasbeer were used by the grain commission crowd and the local manager to further publicity against Illinois Grain Corporation and Farmers National Grain Corporation.

One elevator, more or less, doesn't make much difference to the Illinois Grain Corporation or the Farmers National Grain Corporation. These farmer-owned and farmer - controlled marketing agencies are going concerns, earning dividends every day for intelligent producers who are working together for their mutual welfare.

Illinois Grain Corporation is paying $26,998.75 in patronage dividends on business handled in 1932. One central Illinois elevator alone received $1,133.55 of patronage dividends in stock; another $941.65 in cash, and this stock today is worth one hundred cents on the dollar.

Commenting on the Kasbeer meeting, C. P. Cummings, Manager of Illinois Grain Corporation, who was compelled to leave to keep an engagement that evening in Bloomington, said:

"I personally am opposed to our organization doing anything to divide the stockholders of an elevator. I would like to have so stated at the Kasbeer meeting had I been given an opportunity. We would

For Farm Bureau M

Country Life Insuranc

Group Policy Available At Rock ot

DURING the month of April, Country Life Insurance Company offers Farm Bureau Members a chance to "cash in" on their membership. During that month, Group Life Insurance—complete protection for your family in the event of your death—can be obtained **by Farm Bureau Members only** at a cost of only a few pennies a day. This policy is offered to meet the demand for low rate, convertible insurance to "tide over" our Farm Bureau members who are feeling the pinch of the depression. Already this group insurance plan is in effect in 40 counties in the state. We know you will want to get the details and set up group insurance in **your county.**

Special 12-Year Term, Convertible Policy

During April any 50 Farm Bureau members between the ages of 18 and 50, whose dues are paid, may group together to save money on these Country Life Group Insurance policies. Policies are convertible to any standard form policy at any time within 12 years, or at the end of that time new term policies may be taken out. For $1,000 protection no medical examination is required. The rate is the lowest available with complete safety and may be further reduced by dividends which your agent will be glad to explain. You can reach him at your Farm Bureau.

Everything to Gain; Nothing to Lose

Here's a policy on which you have everything to gain and nothing to lose. Your family **must** be protected. With this group policy you can protect them for only a few pennies a day—then when times improve convert your group insurance to some other standard form more suited to your needs, **but getting the benefit of all premums paid on the group policy,** in addition to the benefit of the rate for your age **when the group policy was taken out.** Again Country Life, your own legal reserve, farmer-owned and farmer-managed company, offers you a life insurance opportunity you can't afford to miss.

Use the coupon to learn how your Farm Bureau can help you get this minimum rate, maximum safety group insurance policy during the month of April

COUNTRY LIFE INSURANCE COMPANY

608 South Dearborn Street - - - - - Chicago, Illinois

reau Members Only

At Still Lower Rates

Bottom Cost During Month of April

Form a Class of 50 Members

You can take advantage of this low cost insurance by enrolling in a class of 50 Farm Bureau members in good standing **immediately**. All must be between the ages of 18 and 50 years. No medical examination is required for $1,000 policies. Your Farm Bureau will be glad to help you form a group among your Farm Bureau friends. It's easy to get 50 or more applications. Groups already are functioning in 40 Illinois counties. Get yours started immediately. There are only 30 days in April and you'll have to work fast. Call the Farm Bureau today, or mail the coupon immediately.

Just Notice These Low Rates

per $1,000 applying on Country Life Group Insurance for Farm Bureau members:

Age	Annual Premium	Age	Annual Premium
18	$7.71	40	$11.06
19	7.76	41	11.48
20	7.82	42	11.99
21	7.88	43	12.56
22	7.95	44	13.22
23	8.02	45	13.94
24	8.10	46	14.76
25	8.18	47	15.68
26	8.27	48	16.69

Chicago, Illinois.

Please tell me how to take advantage of your special April offer of low-cost group insurance. It is understood that in making this request I do not obligate myself in any way.

My name is_____

I am a member of the_____ County Farm Bureau.

My address is_____ P. O._____

The situation during the next six weeks calls for orderly marketing and the topping out of finished cattle, particularly heifers and mature steers, the Research Department of the National Live Stock Marketing Association advises.

There is danger of marketing too many unfinished calves and light weight steers during the late spring and summer. Quality and finish are what count in the cattle market during the last half of the year. As heavy cattle supplies decrease and the better grades assume more normal proportions the fat cattle market is expected to show further strength during the next few weeks.

Highest prices in hogs are expected early in April. The market is still in a strong position. All weights are selling close together and it will probably be late May before fall pigs become seasonably excessive, and from then until early July is the period to be avoided. A substantial improvement in the hog market is looked for in the summer reaching the highest level during August and September with a possible tendency to hold well into fall. Buying is on a fresh pork basis which makes seasonal variations in prices more marked.

Highest prices for fed lambs are expected during late April and early May. Fed lambs will be relatively scarce and a substantial cut in supplies of early spring lambs is expected. The outlook indicates the advisability of fully finishing lambs on feed and holding back marketings as far as weight limitations make possible. Crowd early native lambs on the market as quickly as possible because the situation looks less favorable for later marketing.

Ask Illinois Senators To Support Farm Bill

A telegram urging the two United States senators from Illinois, Hon. J. Hamilton Lewis and Hon. William H. Dietrich to support the administration's emergency agricultural bill was dispatched by the Illinois Agricultural Ass'n. following a meeting of the I. A. A. board and staff on March 24.

The telegram signed by President Earl C. Smith said: "After carefully reviewing the administration's emergency agricultural bill the board of directors and staff of Illinois Agricultural Association unanimously and respectfully urge your active support of this measure."

Ewing Chosen Again To Head Live Stock Group

Chas. A. Ewing of Decatur was re-elected president of the National Live Stock Marketing Association at the annual meeting of stockholders in Chicago, March 22. C. N. Arnett, Denver, was elected vice-president; P. O. Wilson, Chicago, secretary; and H. H. Parke, Genoa, Ill., treasurer.

New directors are C. W. Fine, St. Paul Farmers Union; J. N. Horlacher, Des Moines; and Lloyd Nickles of Cincinnati Producers. Directors re-elected were C. A. Ward, Chas. E. Hearst, Chas. E. Collins, L. J. Taber, Dr. O. O. Wolf, J. R. Fulkerson, Sam McCluggage, E. A. Beamer, Chas. A. Ewing. M. S. Barker, Irwin Porteus, E. F. Forbes, H. L. Kokernot, C. D. Bellows, J. L. Snook, Jr., John O'Mealey and L. L. Lehman.

Manager P. O. Wilson reported an increase of 15 per cent in volume of livestock handled in '32 as compared with the previous year, and a decrease of sales value of 46 per cent.

Resolutions were adopted pledging support to the new farm bill before Congress, and urging that present credit features of the Agricultural Marketing Act be retained.

Macon Co. Live Stock Ass'n. Steps Up Volume

The Macon County Livestock Marketing Association handled 25,199 head of livestock during the last fiscal year which represents an increase of 247 per cent over 1931, it was reported at the recent annual meeting in Decatur.

Kasbeer Incident

(Continued from page 9)

gladly have cancelled their marketing agreement if they had so requested. If an elevator isn't sold on the idea of co-operative marketing, it can't help us nor can we help them. I'd rather have a hundred elevators on the outside fighting us, than to have one sharpshooter on the inside. We have received no official notice of cancellation of the Kasbeer elevator but if such a notice comes in it will receive more courteous treatment than we were given recently at their meeting."

Warn Wool Growers Against Advance Sale

Illinois Livestock Marketing Association Will Conduct Wool Pool In 1933

A warning to wool growers against the advance sale of wool at unnecessarily low prices was issued recently by the Illinois Live Stock Marketing Association, following reports to the effect that wool buyers are already out contracting for wool at below market levels.

The National Wool Marketing Corporation of Boston, which handled all pool wool in Illinois last year, reports that in certain sections wool has been contracted on the sheep's back at 10 cents or less per pound and that advances have been made on such wool at 50 cents per head.

"While no one is in a position at this time to forecast the trend of prices for 1933," says the Wool Marketing Corporation, "we feel justified in again emphasizing the importance of holding wool for a fair market price. The market will most likely be determined by the price levels established in the producing sections. Thus, the farmer who sells his wool cheap to a local buyer exerts a bearish influence on prices throughout the country. A determined effort during the next few months to obtain all the market affords for wool over a period of time rather than the maximum of cash at shearing time will hasten the return of better days for the wool grower.

"While price forecasting is dangerous, we feel justified in advising against contracting for wool at this time."

The Illinois Live Stock Marketing Association through its wool division will conduct a wool pool in 1933 similar to that of last year. A substantial advance will be made at time of delivery as in the past, and final payment will be made after the wool is sold.

Under the pooling plan the grower is assured of getting all the market affords for the particular grade and quality of wool he delivers. The Wool Marketing Corporation with which the State Marketing Association is affiliated is the largest handler of wool in the country, and through control of a large volume exerts a powerful influence toward maintaining satisfactory prices to benefit the grower.

E. W. "Farmer" Rusk formerly connected with radio stations WMAQ, WENR and WJJD is now employed as farm manager in northern Illinois and eastern Iowa for the Mutual Life Insurance Co. of New York. His headquarters are Galesburg.

Tax And Other Problems Interest 19th District

Discussion At Conference In Tuscola Covers Many Farm Bureau Projects

TAX reduction, grain marketing, co-operative creamery, and organization and collection problems featured the discussion at the district conference for Farm Bureau leaders at Tuscola, March 2. The meeting was called by Eugene Curtis of Champaign, I. A. A. director from the 19th district. Between 50 and 60 attended the meeting.

John C. Watson, director of taxation, analyzed the sources of tax money in the general revenue fund of Illinois and showed how the farmer's tax dollar is spent. Eighty per cent of the tax dollar stays in the county, he said, about 70 per cent in the township, and the balance goes for state purposes. The local tax problem is the real problem. The greatest opportunity for saving lies in enforcing economies in local government.

Mr. Watson presented figures for each county in the 19th district giving the total expenditures for educational purposes in the year 1930-31. He also showed the probable return by counties from the state sales tax assuming that $40,000,000 would be collected throughout Illinois, and indicated how this money will be used to replace property levies unless diverted.

Grain Marketing Success

J. Fred Romine, secretary-treasurer of the Illinois Grain Corporation, reviewed the progress of the state regional and the Farmers National in the past year. He reported that his own local elevator at Tuscola which purchased $1,000 of stock in Illinois Grain Corporation, had so far received a total of $805.20 of cash and stock dividends for the years 1931 and 1932. This does not include the elevator's equity in the stock dividends received by the Illinois Grain Corp. from the Farmers National, he said.

The Tuscola elevator was established right in the center of a well organized "old line" grain territory, he reported. At present the bid in Tuscola is about two cents above territory to the south. He emphasized the fact that greater volume of grain delivered to the Illinois Grain and Farmers National will decrease the overhead per unit and make possible greater patronage returns to the producer. All together the Farmers National has borrowed approximately $40,000,000 from the Farm Board, said Romine. And all of this except $15,000,000 has been repaid. The Farmers National not only has met its interest and principal payments on time, but in addition has offered to make its June 1 payment well in advance of the due date.

Source Extension Funds

J. C. Spitler of the University of Illinois discussed the extension service and its relation to the Farm Bureau. The state appropriation for county advisers and home extension workers at present is $145,500 for the fiscal year, said Spitler. This money is paid from the general revenue fund of the State of Illinois. It goes entirely as salaries to farm and home advisers. The extension staff at the University of Illinois gets no state money. About one-third of the cash in the general revenue fund is derived from real estate and personal taxes. Therefore, a property owner paying $100 of taxes pays one and one-fourth cents to support agricultural extension work in Illinois.

J. B. Countiss discussed the co-operative creamery project. Farmers are justified in launching a co-operative creamery program at this time, he said, because they can churn butter of higher quality and do it more efficiently than is being done at the present time. He cited opportunities in cutting down overhead for equipment and buildings, of assembling cream of high quality more efficiently by truck routes, and of reducing the manufacturing cost.

A. B. Culp and B. L. Hornbeek of the Organization Department discussed collections and organization problems. It was voted to hold the next district conference in Decatur, June 1.

New Auto Insurance Policy Is Announced

A new auto insurance policy for Farm Bureau members requiring a lower initial investment than the regular policy was described by Manager A. E. Richardson of the Illinois Agricultural Mutual before the board of directors on March 23.

The new policy known as the "Surplus Fee Plan" eliminates the surplus share and reduces the premium deposit. A smaller surplus fee is substituted for the surplus share.

The net result of the change is that under the surplus fee plan the policyholder pays a little more for his insurance each six months but avoids the necessity of making a rather substantial surplus and premium deposit when he takes out a policy. The surplus fee payable each six months covers semi-annual interest on the surplus share and extra premium deposit which he would have to put up under the old policy.

Thus, on a low-priced, one-year old car a full coverage policy with stationary and movable object collision would cost $15.13 with application (including policy fee) against $35 with application under the surplus share plan. However, the full coverage semi-annual premium under the old plan on a low-priced one-year old car is $6.63 whereas the surplus fee plan policyholder under present schedules would pay $8.13 semi-annually.

The surplus fee plan costs a little more to keep in force but makes auto insurance available to Farm Bureau members with a minimum initial outlay of cash.

Indoor Picnic Makes A Hit In Winnebago Co.

A novel annual meeting attended by more than 1,000 Farm Bureau members, their families, and friends was held by the Winnebago County Farm Bureau in Rockford, March 11. President Geo. F. Tullock reports that it was probably the largest crowd that ever attended such a gathering.

A feature of the meeting was the indoor picnic dinner at noon held in the basement of the Shrine Temple. Each family brought a well-filled basket and sat down at long tables for an informal hour and a half of visiting and entertainment.

While the program for the older folks was underway in the auditorium upstairs, the 4-H club boys and girls and children of Farm Bureau members led by their club leaders gathered in the basement where they played games, sang, and were entertained by the WLS Prairie Ramblers.

A special drawing card was the offer by the Farm Bureau to give every member in good standing who attended five gallons of gasoline. Winnebago Service Co. truck drivers distributed coupons among members the previous week. Those attending the meeting had their coupons stamped and validated to make them eligible for the free offer.

"Several of our members commented that this was the best meeting we ever had in the county," said Mr. Tullock. "The informal indoor picnic was very popular. We expect to try it again next year."

Speakers were Sec'y Geo. Metzger of the I. A. A. and C. W. Ward, supervisor of sales for Illinois Farm Supply Company.

Stocks of old crop corn in Argentina and the Union of South Africa are almost depleted while export supplies from the new harvests are not yet available in important quantities.

Harvest of the new crop in Argentina is underway in early regions, but new corn shelled and ready for export usually does not begin to move in volume until April.

How the New Bill Was Written

(Continued from page 4)

cussed pro and con in the press. The plan which has the most general support of farm leaders provides for an extensive issue of government bonds to be offered holders of farm mortgages in amounts equivalent to a fair appraised value of the mortgaged property. In many cases this means an appraisal below the face value of the mortgage.

It is contemplated that these bonds will bear 2½ to three per cent interest, the rate to be held down as low as possible. The rate will depend upon the state of the money market and the mortgagees' willingness to take the bonds at par value. It is estimated that the government will find it necessary to add approximately one per cent interest to the bond issue rate to the farmer, to cover administration costs, thus offering him a long term loan at the revised valuation in return for a first mortgage, principal and interest to be amortized over a period of 35 to 40 years.

Wholly Voluntary

This plan, if enacted, will be wholly voluntary. No holder of a farm mortgage will be compelled to take the government bonds. It is likely, however, that with the passage of such a measure the government will be called upon to take over many distressed mortgage loans, particularly those bearing high rates of interest where interest and principal payments are in default.

The details of the farm mortgage refinancing program will depend to some extent on the policy of the new administration with reference to inflation. As we go to press there are indications from influential quarters that a reflationary movement may gain considerable momentum.

Heretofore controlled inflation as a remedy for the depression has been sponsored largely by farm organizations, but more recently city interests, particularly holders of distressed real estate, life insurance companies, and others who have even a larger stake in the debt situation than farmers, have shown much interest in relief from this quarter.

In a leading editorial on March 27 the Chicago Daily News, a conservative newspaper, definitely favors controlled inflation as a way out. Opposing the farm mortgage refinancing program the Daily News says: *"Instead of indulging in such complicated experiments the Roosevelt administration should employ a method of farm relief that is already available. The emergency banking act has created the machinery for controlled inflation. Properly and aggressively directed, such expansion of the currency could raise price levels of all farm commodities within a reasonable period. The farmer's burden of taxes and mortgage payments would be lightened as rural dollar incomes rose. If with inflation there was also a temporary moratorium on foreclosures, the major causes of farm discontent would be removed."*

Inflation will bring some relief through higher farm prices from debts, high taxes, and burdensome transportation and distribution costs. Economists generally agree that farm commodity prices would be among the first to be influenced by inflation. But inflation also will raise the cost of things the farmer must buy. Inflation will not alone establish parity prices for agriculture. Control of farm surpluses, development of foreign markets, and relief from excessive interest rates are likewise needed.

DAIRY Marketing

Suit was filed in the Scott county, Iowa district court March 15 and March 18 by the Quality Milk Ass'n., Moline, to collect sums aggregating $7,477.89 against the Superior Dairy Company and five other distributors at the Quad-Cities.

The money is due the producers association for milk delivered the last two weeks of January. The dealers refused payment apparently as another move to harm the producers' organization.

Defendants named in the suits filed in Iowa were Superior Dairy Company, $2,182.17; Double Y Dairy, $349.33; Micheel Bros. Dairy, $1,327.76; Washington Dairy, $1,320.80; Model Dairy, $1,011.97; Iowana Farms, $1,285.86.

When the dealers summarily refused to buy milk from the 800 organized dairymen who have always supplied the Quad-Cities' market, the producers temporarily dropped the price to 3 cents in an effort to build up an outlet through a cooperating distributor, Sturtevant Ice Cream Company. Later the price was raised to six cents.

Retail milk business developed by the Quality Milk Association through the Sturtevant Company has increased steadily as a result of the house to house canvass of the producers. Twenty or more trucks are now operating daily.

All dairies in the Quad-Cities are now selling at six cents per quart, although a number of milk depots have been peddling raw milk direct to the consumer at five cents.

1932 Farm Income Is 56% Less Than In '29

"Farmers are finding it extremely difficult, and many find it impossible to pay their taxes and other fixed charges" says the Bureau of Agricultural Economics, in its recent report on the farm situation. It is stated that there is "universal complaint that fixed charges now swallow income."

Reviewing the drop in farm income, the bureau points out that "in the last three years the producers of grains, of cotton, of meat animals, and of dairy products have seen their income shrink roundly a billion dollars in each of those lines; and these industries are not the only large losers."

The bureau places responsibility for the long deflation in farm products prices in "causes largely outside agriculture." Net production of farm products, it is stated, has been comparatively stable for ten years while all sorts of farm shifts and readjustments have been resorted to, and production is less this year than in 1929. Nevertheless, the gross farm income is only 44 per cent of that for 1929.

Gross income from farm production for 1932 is tentatively estimated at $5,240,000,000. In 1931 it was $6,955,000,000, in 1930 $9,403,000,000, and in 1929 $11,950,000,000.

The livestock industry shows a return of approximately $2,958,000,000 for 1932 compared with $4,191,000,000 in 1931. Gross income from crops is placed at $2,282,000,000 for 1932 as contrasted with $2,764,000,000 for 1931.

The biggest shrinkage in the livestock group this year has been in returns from cattle, hogs, and sheep, and in dairy products.

Co-operate In Treating Horses Against Bots

F. J. McNair, manager of the Shipping Association, at Dahlgren, Hamilton county, reports that in that section farmers have cooperated successfully in treating horses and mules for bots and stomach worms, at a decided saving in cost.

"Local farmers purchased a capsule gun for $1.75 and a quantity of liquid carbon disulfid," said McNair. "Each dose including capsule costs only a few cents. Carbon disulfid bought in 100 pound lots can be had as cheaply as linseed oil and this amount will treat approximately 1600 horses.

"Farmers everywhere should organize in December and buy carbon disulfid," writes McNair. "If any community is interested we will be glad to give additional information."

Marchant Sees Good Year For Oil Company

ILLINOIS Farm Supply Company has passed the half-way mark in another year with the largest volume for a corresponding period during the history of the company, Manager L. R. Marchant said before the I. A. A. board of directors March 23.

The total number of tank car shipments is approximately 6.76% above the corresponding period in 1932 which is considered remarkable in view of the average decline of 8.98% in the industry in Illinois.

A consolidated statement of all companies associated with Illinois Farm Supply Company during the calendar year 1932 shows total sales of $4,475,185.03. If the income of all the companies had been equally distributed among all Farm Bureau members in good standing in the state at the end of the calendar year 1932, the return would have been $13.68. If distribution had been made to Farm Bureau members in good standing in the territory served, the average would have been $15.95. On the other hand, if distribution had been made among the Farm Bureau members in good standing in the territory served, who were patrons of the companies, the average would have been well above this figure.

Difference In Companies

A summary of the comparative analysis of the business operations of the associated companies indicated that the fifty-two companies could be classified in four different groups, on the basis of net income. The control of operating expenses is a prominent factor in the operations. The more efficiently operated companies were able to show a better net income at the end of the year and consequently a higher patronage refund.

Detailed information on the twelve most efficiently operated companies in the state was presented and the importance of controlling certain operation factors brought out. It was pointed out that a substantial Farm Bureau membership must be maintained; otherwise there will be a tendency to break down the system of distributing the income among Farm Bureau members; also that an aggressive sales program must be carried on at all times in order to maintain the present volume which in a large degree governs the possible net income to the income. Furthermore, the lack of aggressiveness and proper management is likely to lead to the outcropping of undesirable competition in the territory.

"In general," said Mr. Marchant, "sound business principles must be applied; managers must be active, alert, and have some common knowledge of business practices. Sound sales and credit policies must be maintained. Those in positions of leadership must not be influenced by personal interest and must have courage to run the company on a business basis; otherwise they will be unable to maintain the good-will and the respect of the people they are supposed to serve."

I. A. A. Audit Service

"An audit service such as that given by the Illinois Agricultural Auditing Association is fundamental to the success of any co-operative business," C. V. Gregory of Prairie Farmer said in a recent letter to Manager F. E. Ringham. "I only wish that the various co-operatives in the state would make still greater use of it."

Fewer Fires Improve Casualty Co. Earnings

A smaller number of fire losses and an increase in earnings were reported by J. H. Kelker, manager of the Farmers Mutual Reinsurance Company before the I. A. A. board on March 23.

In times of depression the problem of eliminating moral hazards faces every insurance company, said Kelker. When money is needed to pay taxes and mortgage interest the temptation to set fire to a building to get the insurance is ever present. A number of companies in adjoining states, he said, are now withholding insurance money where the building is not replaced. Sentiment is growing against paying claims except where insurance money is used to replace the destroyed building.

The financial statement of the Farmers Mutual was stronger than that of last year and reveals the improvement in operations. The company gives reductions for fire prevention measures such as fireproof roofs, lightning rods, etc., with the result that the average rate on fire is around 32 cents per $100.

Lester Ryan has been employed to manage the Galesburg unit of the Illinois Livestock Marketing Association.

Sid Cherrill who had been managing the Galesburg unit is back on his old job doing field work for the State Association.

Hi-Ball Gas Proves Popular

(Continued from page 7)

on results a complete tabulation will be made of the results obtained under actual driving conditions, with all makes of cars and trucks and motors of every age and condition. This is expected to furnish most important facts from one angle of the proposition, namely, whether the new fuel will actually work in a satisfactory manner and whether it will find a ready market at a premium.

President Smith points out that this is only one step in the march for adoption of blended fuel as a farm relief measure. In the first place, comparatively few existing distilleries are equipped to manufacture anhydrous alcohol which must be used. Alcohol containing water will not mix with gasoline. He said that the committee's investigation has revealed that if all the distilleries capable of producing anhydrous alcohol were to work at full capacity and their entire output devoted to dilution of gasoline, the resulting blend would be only about ⅝ of 1 per cent. It has been learned that it will require three years of intensive construction to build distilleries of sufficient capacity to produce a sufficient amount of alcohol to bring about a 10 per cent dilution.

Legislative Problem

The problem of legislation also is important. It is recognized that producing oil companies and refineries will be inclined to oppose dilution to the utmost. Whatever legislation is attempted must overcome this opposition and extreme care must be taken in formulating the measure to prevent it being declared unconstitutional.

Members of the committee, Mr. Smith said, are extremely optimistic regarding the whole dilution scheme, particularly since early reports indicate such a favorable reception and such excellent operating results. They are proceeding slowly, however, testing every step in order that what may prove a boon to grain producers in the long run is not throttled by hasty action in the beginning, and so that no ill-advised action may be taken which would be a detriment rather than a help to the plan.

"Everything will be done that it is possible to do," Mr. Smith said, "but we must proceed cautiously, and base whatever conclusion we reach on the facts, rather than on opinion, however rosy the opinion may paint the picture."

Cost of Flour Small Item In Loaf Bread

Baker's Profit Per Loaf Amounts To More Than Farmer Gets For Producing Wheat

TESTIMONY showing that the price of wheat has little influence on the price of bread was given before the Senate Committee on Agriculture recently by Wm. H. Settle of Indiana, president of the Indiana Farm Bureau, while discussing the domestic allotment plan.

Quoting from a report of the Senate Sub-committee which investigated this subject two years ago he said: "This investigation revealed an alarming tendency toward the monopolistic control of the food supply of the nation by a small group of powerful corporations and combinations. This is particularly true as to bread and milk.

"Bread-cost per pound for three large baking companies was 7.27 cents in 1922-24; 7.89 cents in 1926; and 7.78 cents in 1930; bread-cost for 1926 was only 11/100 of a cent per pound higher than the 1930 price of 7.78 cents.

"On the other hand, wheat at Liverpool for 1926 ranged from $1.55 to $1.74 per bushel whereas in 1930 the price range was $1.37 down to 70 cents per bushel. The 1926 average Liverpool price was approximately $1.57 per bushel, while the 1930 average was $1.04, or 53 cents per bushel lower in 1930 than 1926.

Flour Small Item

"The wheat flour cost in 1926 per pound loaf of bread was 2.47 cents as compared to 1.92 cents for 1930, a decrease of 55/100 cents per pound loaf of bread. The average wheat price decrease from 1926 to 1930 was 53 cents per bushel and the wheat flour per pound loaf of bread shows a decrease from 1926 to 1930 of 55/100 cents. It is constantly stated that a bushel of wheat makes 62 loaves of bread. That being true, it follows that a decrease in the wheat price of 53 cents per bushel should be equivalent to a decline in bread price in the amount of 52/62 cents per pound loaf of bread, or 9/10 cent per loaf.

"At the average farm price of 25 cents per bushel of wheat, the farmer's interest in a pound loaf of bread is 25/62 or 2/5 cents per pound loaf of bread. At present wheat prices, if the farmer furnished wheat for nothing the decrease in bread price would only be cut 2/5 of a cent per pound loaf. The baker's profit per loaf in 1930 was over 4/5 of a cent. The baker's profit in 1930 was twice as much per loaf of bread as the farmer's wheat-interest in the present price of a pound loaf."

Mr. Settle also quoted Sydney Anderson, vice-president of the General Mills, Inc., who in a previous hearing said: "But it is unquestionably a fact that flour is a comparatively small element in the cost of a so-called better-type loaf of bread that is made today; one that contains milk and eggs and sugar and butter. If the flour costs the baker nothing you still have difficulty in reflecting that difference in cost into a loaf of bread."

Settle showed that while wheat rose to $1.51 per bushel in 1925 and declined to 80.9 cents in 1930 the average price of bread per pound loaf in the two years was 9.4 cents in 1925 and 8.7 cents in 1930.

Grain Marketing

The Farmers National Grain Corporation reports that 280 carloads of grain may be unloaded in a 10-hour day into the remodeled and newly equipped Northern Pacific elevator at Kansas City operated under lease by the Farmers National.

The elevator has a capacity of 5,762 bushels. Complete overhauling and modernization of the plant followed the fire and explosion which destroyed the old frame workhouse a year ago. The plant is said to be the most modern, economical handling grain elevator in the country.

It is equipped to perform all services of cleaning, scouring, clipping, washing and drying grain. Cleaning machinery includes the largest capacity disc separator made, capable of handling from 1,600 to 2,000 bushels of wheat an hour. The dust control system in the new concrete work-house includes eight large dust collectors with valves, traps, belt loader hoods, floor sweeps and piping which connect with the cleaners and clippers. The system also is connected with the car dumper sink to eliminate dust in unloading. More than 21 tons of galvanized steel were used in constructing the dust control system. The dust explosion hazard has been greatly reduced by installation of huge explosion ventilators of galvanized steel. These contain patented caps which, in case of explosion, open outward and provide enlarged space for the expansion of the exploding gases.

Texas Wheat Growers Making Good Progress

The Texas Wheat Growers Association, member of the Farmers National Grain Corporation, will handle more than 50 per cent of the entire wheat area in that section harvested in 1933, according to J. Frank Triplett, organization manager at Amarillo.

On January 1, 4,424 members of the Texas Association had pledged delivery to the co-operative of the 1933 crop from their 1,508,000 acres seeded to wheat in the Texas Panhandle and New Mexico counties, an average of 340 acres per member. Last year 2,958,000 acres of wheat were harvested in the Lone Star state.

Establishment of a regional office of the national co-operative at Amarillo has given the wheat growers of west Texas and eastern New Mexico the most advantageous outlet possible for their grain. Farmers National has handling facilities for grain at 62 buying points in the Texas-New Mexico territory. Volume handled by these houses in a normal crop year varies from 30,000 to 1,000,000 bushels, with a total of more than 13,648,000 bushels.

"Our old members are agreed," said Triplett, "that Farmers National sales service in the Texas wheat area has created a better market than they ever had before. Re-collection of some 2,000,000 bushels of wheat delivered by Texas growers but never paid for on account of business failures of various private buyers and users during a recent season is having its influence in turning farmers to their own co-operative."

Farm Bureau Service In Richland County Pays

During the past six and one-half years the Richland county cooperative cream pools have refunded to their patrons $20,579.02. During this time Richland farmers pooled a total of 1,010,821.9 pounds of butterfat. The refund amounted to a little more than two cents per pound. The cream pools have aided non-members also by forcing up prices paid by private cream stations.

The I. A. A. board of directors recently authorized the use of the official I. A. A. emblem to Cook County Farm Bureau, Gardners' Supply Company of Cook county, and to the Illinois Producers Creameries. The latter will use the emblem on cartons containing "Illini" butter.

H. C. Vial Receives Gold Watch At Dist. Conference

Counties Report On Their Accomplishments In Many Fields At Meeting In Wheaton

TAX problems, telephone, and electric power rates, insurance, agricultural extension work, organization and a host of other questions were discussed at the 11th district conference for the Farm Bureau leaders held at Wheaton, March 22. Approximately 50 attended. The meeting was called and presided over by E. Harris of Lake county who represents the district on the I. A. A board.

H. C. VIAL

Farm Adviser Wright reported that the Dupage County Farm Bureau has 920 members and that less than 100 actual Dupage county farmers are now outside the organization. I. A. A. auto insurance is an influential factor in maintaining a strong membership throughout the district. Wright also told of the Farm Bureau's work in securing a 17.5 per cent reduction in taxes this year through co-operation of local assessors and county officials.

President Swayer of Lake county reported that the Farm Bureau now has approximately 50 per cent of the 1200 farmers in the county as members, an increase of 20 per cent in membership in the last four to five years. The Farm Bureau's tax reduction work supported by the county treasurer and assessors he cited as an outstanding service. He felt that the tax program and commercial activities of the Farm Bureau were the life blood of the institution although recognizing the value of extension work. The most permanent members, he said, are those signed by local men and the collections among them are much better.

Against Branding

J. D. Bilsboro of the University of Illinois discussed membership, and state and federal appropriations for extension work.

Farm Adviser Kelley stated that the Kane County Farm Bureau was opposed to branding of feeder cattle because of the harm and shrinkage involved in chasing them all over the yards. Branding with acid only lasts 30 days, he said, and its value is questionable.

H. C. Vial, former director on the I. A. A. board in the 11th district, was presented with a gold watch and chain by Fred Landorf, president of the Dupage County Farm Bureau on behalf of the counties in the district.

On the back of the watch was engraved the I. A. A. emblem and inside the case "Presented by the 11th District to H. C. Vial in appreciation of six years service as Director of the I. A. A."

Additional speakers included Farm Adviser H. C. Gilkerson, who commended the Farm Bureau tax committee for its work with the county board of review in securing a 15 per cent tax reduction in Lake county; President Keslinger of Kane county; Farm Advisers L. H. Braham of Will, W. A. Herrington of McHenry, O. G. Barrett and W. A. Tasher of Cook county; President Dick Nietfeldt, Cook county; A. J. Stahl, Lake county; Vice-President Schroeder of Will county; President Earl Swenson, McHenry county; Clare Bradford, I. A. A. district organization manager; and others.

Suggest Use Unemployed To Build Secondary Roads

A campaign to use the unemployed in building a secondary road system in Illinois was launched recently by the Chicago Herald & Examiner.

"The biggest question before this state, or any other state, at this time is how to obtain something in return for the relief voted and so avoid the dole," says the Examiner.

"Not only the present but much of the future depends on the method used in expending this relief. This can be done, advocates of low cost roads maintain, by the scientific expenditure of the road dollar, instead of the present method of using all the funds on a few high-cost roads which benefit only a few."

Figures are cited showing that in Pennsylvania the average cost of its low-cost roads per mile is $6,000 for a road which will carry from 1,000 to 1,200 vehicles per day. Pennsylvania formerly spent between $50,000 and $70,000 a mile on some roads.

Illinois now has more than 3,800 miles of $30,000 per mile roads which carry less than 1,000 vehicles per day. The situation in Illinois is that the state has only about 25 per cent of its roads paved. There remain more than 70,000 miles of unimproved roads. These roads form the secondary system of Illinois which so far has been completely overlooked.

The Indiana Farm Bureau Co-operative Association is considering the organization of a central co-operative bank to serve farmers' co-operative associations throughout the state.

Exempt Real Estate Mortgages From Taxation

Editor, I. A. A. RECORD:—

As a member of our local Farm Bureau of Richland county I have from time to time read with much interest, the articles on how to lift the mortgage and relieve the burdened farmer. We all agree that the price of farm products is low, and that it is hard to legislate farm prices and products. Why not strike at the proper place, and here is a plan that will help the farmer:

1. There is no better nor safer security than good real estate security.

2. The rate of interest has been too great, for the risk or hazard taken.

3. The holder of the mortgage is taxed (if he gives it in for taxes, and many do not), and the farmer is taxed on the full value of the lands, which is unjust, for he pays on something that he does not own.

Now pass laws reducing interest as follows: that the rate of interest for the loan, when secured by real estate, shall not exceed three per cent per annum; that the note and mortgage securing said loan on real estate shall be exempt from all taxation, state or national. This will give the farmer a low rate of interest, and the money lender can afford to loan the money on good real estate security at three per cent interest, because it is exempt from all taxes.

Many mortgages are never recorded, and many loans are made by requiring the owner of real estate to deed the lands to the party making the loan, and the lender giving back to the landowner a contract agreeing to reconvey when the loan is paid (which is in effect a mortgage), all of which is done by the money lender to evade taxation, which he does. By reducing the rate of interest to three per cent per annum, and making the note secured by mortgage non-taxable, idle money would be loaned on good real estate to the farmer, and the farmer save one-half the interest he is now required to pay at the present rate of interest. This law could be enacted in every state of the Union, and do away with the Federal Land Bank, who sell their loans to the general public, and which are tax exempt, but the rate of interest has been too high, and not satisfactory to the farmer.

R. S. Rowland, Attorney

The Farm Bureau is now aggressively supporting federal legislation to refinance farm mortgages at a low interest rate. Revision of the state constitution is necessary to do away with our antiquated property tax law with its double taxation of mortgaged real estate. The I. A. A. has been working for such revision for a number of years.—Editor.

Farm Organizations Reply To Shannon "Investigation"

Issue Open Letter to Congress Exposing Questionable Conduct of Committee

An open letter to Congress in reply to the report of the so-called Shannon Investigation Committee was recently released by the national farm organizations and co-operatives including the American Farm Bureau Federation, National Grange, National Co-operative Council, National Cooperative Milk Producers Federation, American Cotton Co-operative Association, California Fruit Growers Exchange, Eastern States Farmers Exchange, National Live Stock Marketing Association, Farmers National Grain Corporation, National Wool Marketing Corporation, National Fruit and Vegetable Exchange, American Cranberry Exchange, National Pecan Marketing Association, and Co-operative G. L. F. Exchange. The Shannon committee "investigation" is thought to be a publicity stunt created largely by organized middlemen to spread propaganda against co-operative marketing.

"We are amazed that a committee of the House of Representatives should expose its lack of appreciation and understanding of farm welfare as completely as does the so-called Shannon Committee in that portion of its report which deals with Farm Board operations," said the letter.

One From Rural District

"Apparently four members of the Committee, coming from industrial constituencies and lacking in agricultural information, have been deceived and misled by traders and speculators in farm products. It is noteworthy that the fifth member of the Committee, the only one representing an agricultural district and having an appreciation of farmers' problems, has filed a vigorous minority report.

"We respectfully call your attention to the fact that the Committee's review of testimony shows a long string of witnesses representing dealer and speculator interests, and that the Committee either made no effort to secure adequate testimony from cooperatives and their members, farm organizations and their members, disinterested business men, bankers, economists, etc., or else the Committee has evaded summarizing such testimony beyond brief and vague references.

"The report neglects the testimony of farm organization representatives, but on the other hand, gives much space and emphasis to the opponents. Not only were organized agriculture's representatives not encouraged to present their views, but when they sought to present them, the committee majority endeavored in its report to discredit their testimony by impugning their motives.

"The Committee's recommendations reveal a distressing bias in favor of a class of private farm product dealers who for generations have assumed that they possessed some sort of inalienable right to buy as cheaply as possible from producers and to sell as dearly as possible to consumers, even though producers desire to reserve to themselves the right to form their own handling agencies. The Committee's proposals to do away, in a period of great agricultural distress, with any of the advantages now enjoyed by farmers under the Agricultural Marketing Act not only constitute an insidious thrust at rural welfare but, we believe, are also an affront to the intelligence of Congress. . . .

Against the Co-ops.

"The Committee apparently would deny cooperative associations' access to Farm Board credit (except as dealers are also given credit) and thereby prevent their rapid development in the manner intended by Congress in the Capper-Volstead Act of 1922, the Cooperative Marketing Act of 1926 and the Agricultural Marketing Act of 1929. The effect would be to subject cooperatives to all the unconscionable financial and economic attacks which have characterized the opposition of speculative interests for many years and which were the cause of these Congressional enactments. . . .

"If Farm Board credit is to be denied cooperatives, why should not loans and subsidies be denied to all private business agencies by abolition of the Reconstruction Finance Corporation and by abolition of the preference given industry by the tariff system? Why not deny national banks the subsidy involved in the right to issue currency? Why not discontinue the subsidies for the merchant marine, and for aviation? Why not deny publishers their second class mail bonuses under the postal acts? If Congress ever chooses to repeal all such measures of assistance to business men, then we suspect that agriculture will be willing to yield its access to Farm Board credit, but only then.

"The Committee's proposal to prevent cooperatives from buying any farm products from non-members appears to be an effort (1) to prevent the enjoyment by farmers who are not cooperative members of some of the advantages of the various federal laws; (2) to prevent cooperatives from demonstrating their merchandizing advantages to non-members in order that such non-members may be encouraged to join as members; and (3) to prevent cooperatives from filling out odd lots of stock by open market purchases which facillitate efficient merchandising of members' products. The cooperatives are already adequately restricted by federal law with respect to the amount which they may handle for farmers who are not members.

"The Committee's proposal that cooperatives be subjected to a 'more close and direct supervision' is vague and insidious. What does the Committee mean? Is this proposal anything but subterfuge to hide some scheme of licensing and destroying cooperatives? What more supervision can honestly be expected than that to which cooperatives are already subjected? Is the Committee so poorly informed that it does not know the Secretary of Agriculture and the Attorney General, under the Capper-Volstead Act, already have full power to prevent cooperative enterprises from becoming monopolies in restraint of trade or unduly enhancing prices? Is the Committee ignorant of the fact that the Agricultural Marketing Act gives the Farm Board enormous powers to audit and check all cooperative associations to which it renders a loan service?"

Next District Conference At Bloomington May 24

The Bloomington Co-operative Creamery, collection of dues, and alcohol-gasoline dilution were discussed at the first Farm Bureau conference of the year in the 17th district held at Bloomington, Feb. 27.

The meeting was called and presided over by E. D. Lawrence of McLean county, who represents the district on the I. A. A. board. The next conference will be held May 24 at the same place.

21st District Conference Considers Debts And Taxes

Tax problems, progress report on Sanitary Milk Producers, membership collections, and debt adjustment legislation featured the discussion at the 21st I. A. A. district conference held at Taylorville, March 15. Approximately 40 Farm Bureau directors and county advisers attended the meeting called by Sam Sorrells of Raymond.

Discussion was led by W. F. Coolidge of Macoupin county, Alden Snyder, Montgomery county, Mr. Sorrells, Edwin Bay, Sangamon county, and T. H. Brock, Christian county.

I. A. A. Board Hears Review of Ass'n. Program

Officers And Staff Report On Activities In Two Day Session

A GENERAL review of all the activities of the I. A. A. and the associated companies by officers and staff members featured the two day meeting of the I. A. A. board of directors on Thursday and Friday, March 23 and 24. Each department and company was assigned 20 minutes or more to discuss current activities and future program.

President Smith reviewed in detail recent developments at Washington having to do with the framing of the new Roosevelt administration farm bill. He expressed the belief that the measure, which at this writing has passed the House, would pass the Senate without serious amendment.

Deserves Support

"The emergency agricultural measure pending in Congress is the most feasible, practical farm measure presented to Congress in recent years," he said. "This bill is deserving of the united support of farmers and also those indirectly dependent on agriculture in other lines of business and industry.

"Under its provisions, it is possible to apply different principles of surplus control to each of the several commodities as the peculiarities of the commodity might best justify, thereby removing the outstanding weakness of previous measures."

John C. Watson, Donald Kirkpatrick, and Charles Black reported on state legislation at Springfield. Mr. Watson outlined a proposed tax reduction program with cuts in state appropriations, salaries of state and county officials, and expenditures all along the line. He also discussed the reallocation of the gas tax among counties, townships, and municipalities so as to relieve property from all or nearly all of road and bridge levies.

Review Bills

Mr. Kirkpatrick commented briefly on a large number of bills indicating the progress of measures in which the I. A. A. is most directly interested. These include a chattel mortgage bill, a measure providing for a moratorium on farm loans, tax reduction measures, ice cream and oleo bills, possibilities of a flat rate income tax, and the sales tax.

On Thursday night the board approved the report of the Organization-Publicity advisory committee providing for:

1. A publicity contest among the County Farm Bureaus supervised by the Director of Information.

2. Continuation of collection plan used successfully in past months.

3. Maintenance of seven district organization men who will devote time to collections as well as to organization.

4. Approval of organization campaign in 1933 under which each county, township, and solicitor will be assigned quotas with suitable recognition to reward those achieving the goal.

5. Approval of plan to try out full time man in charge of organization and collection in one or more counties.

6. Approval of experiment of organization plan in one or more counties involving credit to member on his dues for signing new members.

It was unanimously agreed that the volunteer system of solicitation should be maintained but that it might be supplemented with additional effort on a paid basis.

The directors voted unanimously to send a message to the two United States senators from Illinois expressing unanimous approval of the new farm bill and urging their co-operation in securing its enactment.

Seek To Improve Farm Bureau News Service

A County Farm Bureau Publicity Contest sponsored by the Illinois Agricultural Association for the balance of the calendar year beginning April 1 was approved by the I. A. A. board on March 23. Entries are to be made on or before June 1, 1933 and exhibits to be submitted on or before January 10, 1934.

Three cash prizes totaling $150 will be offered to the winning entries, the money to go to the County Farm Bureaus in furtherance of more effective informational service.

The plan calls for the appointment of county committees of three members to work out details of a more effective news service. It is suggested that township or community reporters be appointed to get local Farm Bureau news to the papers and to the Farm Bureau office for publication in the county bulletin.

Exhibits will be judged on the quality and effectiveness of the news service to the local papers, attractiveness, make-up and news content of the official Farm Bureau paper, exhibits, pamphlets, direct by mail literature, etc., and stories in other than local publications. The effect of the publicity program on membership acquisition and maintenance also will be taken into consideration.

The contest is designed to stimulate a more varied and aggressive program of Farm Bureau service and the establishment of an informational service through the local newspapers.

Winners will be recognized and prizes awarded at the annual meeting of the I. A. A. next January.

Horses and mules are the only products of the farm that are bringing better prices than a year ago. In February horses averaged $62 and mules $67 compared with $58.65 a year ago. The price of horses declined from 1918 to 1932.

"And now about that New State Sales Tax"

"THE cities have an unemployment problem we know little about on the farm.

"They were nearly out of funds and the relief commission had reached the end of its borrowing power from the federal government. It was impossible to get enough people to chip in to feed the unemployed, particularly in Chicago.

"So the sales tax was brought out as a solution.

"The bill as originally framed gave the counties having big cities nearly all the revenue. And the state relief commission would have administered it.

"My organization, the Illinois Agricultural Association, studied the bill and suggested some amendments. It proposed that revenue from the sales tax be apportioned among the counties according to population; and that the money be used dollar for dollar to replace property taxes except where the county board by a two-thirds vote decides to use part or all of it for unemployment relief.

"The I. A. A. and our friends in the legislature put through these amendments and now they are part of the law. That's service. That's organization. That's representation. That's one of the reasons why I'm a booster for the Farm Bureau.

"My Farm Bureau membership is the best investment I ever made. The direct savings and indirect benefits are worth far more than the cost."

I. A. A. Sponsors Bills To Reduce Property Tax

Outline Program To Members of General Assembly Following Approval By 1000 Leaders

SPRINGFIELD, ILL., April 19, 1933:—

A legislative program designed to reduce property taxes throughout Illinois at least $60,000,000 annually was launched here today by Illinois Agricultural Association following a dinner given last night to approximately 100 members of both houses of the General Assembly. Lieut.-Gov. Thomas F. Donovan and Speaker Arthur Roe sat at the speakers' table. Edwin Bay represented the Sangamon County Farm Bureau. Rep. Jackson of Toulon led a round of first class community singing.

The measures introduced include one providing for a redistribution of the three cent gas tax back to counties, townships, and municipalities, companion bills to sharply reduce county and township road and bridge levies, a bill to assess income from property not otherwise assessed such as stocks, bonds, mortgages, etc., an occupational tax of 1½ per cent, with $100 per month exemptions, on those earning salaries, wages, fees, and commissions, and a number of measures restoring to county boards the power to fix certain costs and fees within the maximum limits now established by law.

The I. A. A. also is supporting an amendment to the revenue article of the Illinois constitution giving the General Assembly broad powers to enact laws to provide revenue, without present constitutional limitations.

"We are facing a breakdown in government in Illinois," said President Earl C. Smith in addressing the legislators, "because of the inability of the property owners of the state to pay the enormous taxes levied against them. Even with substantial economies which the farmers of the state and our organization greatly desire, the cost of government is still too large for the property taxpayers to bear. This means that there must be new sources of revenue if our governments are to meet their obligations. And that revenue must come from those who have ability to pay but are contributing little or nothing to the support of government."

Explaining the two revenue measures proposed by the I. A. A., Donald Kirkpatrick, general counsel, said that the bills had been framed as a result of the recent State Supreme Court decision on the income tax which held that income is property, hence must be assessed with uniformity.

"This legislation," he said, "does not vote more taxes upon the people, but merely spreads the burden a little more evenly until such time as the constitution can be amended. The two measures proposed will be effective only for two years through the present emergency. Every dollar of revenue raised by these bills when enacted will be used to reduce and replace a like amount of taxes now levied against property."

Speaking in favor of House Bill 579 which allows courts to stay the execution of mortgage foreclosures and judgments in the case of worthy mortgagors until 1935, Mr. Kirkpatrick pointed out that the House had voted to abrogate the life insurance contracts of policyholders involving millions of dollars by preventing them from securing their cash values. Yet there are some who oppose the mortgage moratorium legislation although there is nothing mandatory about it. It merely allows the court to issue orders to delay foreclosures under certain conditions so as to protect the interests of both creditor and debtor.

"You have voted to protect the life insurance companies," he said. "Now let's protect the worthy farm mortgagors and home owners and give them a fighting chance to retain their property."

John C. Watson, director of taxation, explained that the time is close at hand when revenue from motor license fees will pay for maintenance of the nearly completed 10,000 mile state paved road system, for policing the same, and for interest and amortized principal payments on the $160,000,000 of state road bonds. "This will leave the income from the three cent gas tax or approximately $27,000,000 annually, for the improvement of county and township secondary roads, city and village streets, and for payment of interest and principal on county and township road bonds," said Mr. Watson.

"We propose to distribute the gas tax three ways as follows: One cent to the county as at present, one cent to the township for paying off bonds or building new all-weather roads under the supervision of the county highway engineer, and one cent to cities and villages for paying off bonds or building new streets. By so doing road, bridge, and street taxes now levied against property can be substantially reduced and further re-

lief brought to the long suffering property owner."

Chas. S. Black, chairman of the Public Relations Committee, and George Muller of Tazewell county represented the I. A. A. board. Other officers and staff members present included R. A. Cowles, treasurer; A. E. Richardson, and George Thiem.

The legislative program presented to members of the General Assembly who listened attentively to the discussion followed unanimous approval of the proposed measures at a state-wide meeting of more than 1,000 County Farm Bureau leaders at Springfield on April 11.

At that meeting President Smith eloquently reviewed in great detail the history of the state sales tax sponsored by the new administration. He revealed how the Association and its friends in the Senate succeeded in amending the measure when it was slated to pass in the original objectionable form, so as to distribute the revenue equitably among the counties, and to make it primarily a tax to reduce and replace property taxes.

Two-Thirds Vote to Divert

As originally drafted, the measure would have placed all sales tax revenue at the disposal of the State Relief Commission. Only by a two-thirds vote of the county board of supervisors can sales tax revenue be diverted during 1933 and 1934 from replacement of property taxes to the relief of destitute people.

Proposed legislation to restore to the counties the power to determine costs, fees, and salaries of local officials was explained thoroughly at the state meeting of Farm Bureau leaders by John C. Watson. A Supreme Court decision, he pointed out, holds that the county has no jurisdiction over the salaries of probate judges, county judges, and states attorneys. It is possible that this decision may extend to juries' fees. Bills have been introduced in the legislature, he said, to reduce salaries of such officials up to 20 per cent. The I. A. A. favors this legislation, but wherever legally possible it hopes to restore to the counties authority to name salaries, fees, and costs within the maximum limits fixed by statute. Such proposed bills include home rule for fixing blind pensions, costs of publishing county assessments, costs of publishing delinquent taxes, etc.

The I. A. A. also will sponsor a bill to postpone the date for fixing school levies from the first Tuesday in August to the first Tuesday in September. This will give more time to school boards and taxpayers to ascertain the financial condition of their districts.

FILLING UP WITH "HI-BALL" GAS AT TAZEWELL SERVICE STATION, PEKIN

Practical road tests of the new motor fuel composed of 10 per cent anhydrous grain alcohol and 90 per cent Aladdin gasoline are being conducted throughout the Peoria and Bloomington area of central Illinois under the auspices of the I. A. A., Illinois Farm Supply Co., and the County Farm Bureau service companies. Manager Clyde Woolsey, President Walter Frasee, Sec. Storey, and Directors Fasse and Aisle of Tazewell Service Co. were on hand as the first mix of blended fuel went on sale.

Redistribution of the three cent gas tax, along lines suggested will make possible a substantial reduction in county and township road and bridge levies on property. Details of the plan outlined by Mr. Watson at the Springfield conference may be changed and modified as the legislative situation at the state capital directs.

Watching Legislature

The fact that a number of other bills have been introduced germane to disposition of gas tax funds, indicates that modifications may be required to insure enactment of a measure that will bring the maximum possible relief from property taxation. The membership will be kept informed from time to time about developments regarding this important legislation. The Public Relations Committee in Springfield each week will watch this measure and use proper influence to see that the bill finally reported out of committee protects the interests of farmers and provides for maximum replacement of property taxes.

Following an explanation of the proposed gas tax redistribution the County Farm Bureau leaders voted unanimously against abolition of township road districts at this time. It was feared by many that if the township road system is turned over to the county many farmers will be forced to wait indefinitely for the improvement of township roads.

The bill providing for a moratorium on mortgage foreclosures until July 1, 1935 at this writing rests on third reading in the House.

Another bill proposed by the Association will make it possible for farmers owning 10 acres or more of unsubdivided farm lands within the corporate limits of a city or village to detach such land on application to the county or circuit court. A bill to tax butter substitutes containing foreign oils and fats also has I. A. A. approval.

Farm Bureau leaders applauded proposals to take the Supreme Court at its word when it declared that income is property. "If there is a legal way to do it we're going to put income on the property tax rolls," said Mr. Kirkpatrick. "That's the only way to get relief from the burdensome property tax."

Cowles Warns Leaders

Explaining efforts being made to wipe out federal and state appropriations for agricultural extension and experimental purposes, Mr. Smith explained that the I. A. A. is favorable to reasonable economies in government, but that the organization would insist on having something to say as to where the economies are to apply.

Robert A. Cowles, treasurer, warned the County Farm Bureau leaders against losing sight of the purposes for which the Illinois Agricultural Association was formed. "The commercial services developed through the associated companies are a secondary program," he said. "They were developed when the I. A. A. had money to invest in such enterprises. Our children have measured up and

Inflation Move Improves Picture On Farm Aid

Farm Mortgage Legislation Would Lighten Burden On Debtors, Provides Big Refinancing Program

THE legislative picture as it affects agriculture and farm prices is changing so rapidly from day to day at Washington that any forecast as to what may happen in the coming weeks must be largely conjecture.

At this moment, the stock markets and commodity exchanges are in great excitement over the embargo on gold and President Roosevelt's reported statements favoring controlled inflation. Stocks have advanced sharply, wheat and corn futures in the past two days have shot upwards from seven to ten cents per bushel or more, and there is talk that the proposed federal farm mortgage re-financing program will be unnecessary if inflation restores 1928-29 price levels.

GEO. PEEK

The emergency farm bill has been pending in the Senate for more than a month while minority groups have wrangled over amendments. The vote this week to remonetize silver lost by only six votes, and only then when the President announced he would present his own inflation program.

It now seems probable that inflationary legislation may be hooked onto the administration farm bill in the form of an amendment. Sentiment in both houses on the question of controlled inflation is strong enough to indicate prompt and favorable action.

When the emergency farm bill described in the April issue of the RECORD is enacted, Secretary Wallace will need able assistance to help administer such measures as are taken to raise farm prices. Prominent among those being considered for an important post to work with the President and Secretary of Agriculture is George N. Peek of Moline, Ill. who has been an outstanding leader in the fight for farm equality during the past 10 years.

Mr. Peek is an able executive with plenty of courage and drive, qualities that are necessary in the difficult task of restoring pre-war parity prices for agriculture.

The administration of the farm mortgage bill, if and when enacted, will be supervised by Henry Morgenthau, Jr., chairman of the Federal Farm Board, and designated to be Governor of the Farm Credit Administration. This measure has been combined with the emergency farm bill which at this writing is pending in the Senate.

The Farm Mortgage bill provides for the issuance of Federal Land Bank bonds in an amount not to exceed two billion dollars, the bonds to be a joint obligation of all 12 federal land banks. They will bear interest of 4% or less. Payment of interest on bonds is to be guaranteed by the treasury. The banks will have authority to exchange the bonds for approved first mortgages on farm property, or to purchase such mortgages which would bear 4½% interest. The purchase price of any mortgage shall not exceed its face value nor 50% of the normal value of the land mortgaged plus 20% of the value of permanent improvements thereon.

The bill also provides for reducing the interest rate on existing federal farm loans to 4½ per cent. An appropriation is provided for reimbursing the federal land banks to cover loss from reduction in interest rate. Also amortized principal payments on federal farm loans would be deferred for five years. Thus a farmer could keep his federal farm mortgage in good standing by paying only 4½% annually instead of the present 6½%.

Another provision makes possible loans direct to farmers by the farm loan commissioner on the security of farm mortgages, chattels, or crops. The amount of such loans is limited to $5,000 and may not be in an amount more than 75% of the normal value of security pledged. The interest rate on these individual loans is to be 5% or less and they are to be amortized in 10 years. This provision is to help farmers regain possession

(Continued on page 18)

Kirk And Larry At Carthage

D. KIRKPATRICK L. A. WILLIAMS

A mass meeting attended by more than 600 Hancock County Farm Bureau members and their guests was held at the Carthage College field house the night of April 6. The meeting was called by Burton E. King, president of the Hancock County Farm Bureau.

Chief speakers were Donald Kirkpatrick, counsel for the I. A. A., and Lawrence A. Williams, manager, Country Life Insurance Company. Mr. Williams delivered an entertaining and dynamic talk playing up organization as the basis for all farm progress. Mr. Kirkpatrick discussed the state sales tax, the amendments secured by the Illinois Agricultural Association and its friends in the state senate, and other legislation of interest to farmers pending at Washington and Springfield.

Hancock county business men are up in arms against the sales tax and wrongfully accused the I. A. A. of sponsoring the measure. Mr. Kirkpatrick cleared up the misunderstanding by showing that when it became apparent that the administration had the votes to pass a state sales tax the Association strove to amend the bill to make it primarily a replacement tax in downstate counties, and to distribute the revenue equitably among the counties. With the help of friends in the senate, it succeeded in this task.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 S. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. A Constructive Tax Program

THE long-heralded breakdown of the property tax forecast by the I. A. A. more than eight years ago is here. Tax collections in 1933 promise to shrink sharply even from the low returns of last year. Some economies have been effected in government but further cuts can and should be made. Even then assessed property will be unable to bear the cost of needed services under existing tax laws.

The Illinois Agricultural Association offers a constructive program of tax legislation to remove a substantial portion of the burden from farms, homes, and other real estate. That program outlined on page 3 is set forth in greater detail in a folder just off the press.

The I. A. A. proposes to stop the confiscation of real property first by further reducing appropriations and expenditures in the county and state. Next it would distribute the tax load more equitably among people having ability to pay through new revenue legislation. It would shift the cost of building roads, bridges, grade separations, and streets from property to the gas tax as quickly as possible. Lastly it would give the legislature broad powers through constitutional amendment to revise the state's taxing system.

The tax situation in Illinois demands prompt and aggressive action at Springfield. Much can be done before 1935, the earliest possible date for general tax revision if the people approve a constitutional amendment. The situation demands greater vigilance by taxpayers and more decisive action by tax spenders in many counties and townships. Property taxpayers are crying for relief. Their appeal must be heard.

Pass The Emergency Farm Bill

THE strategy of the emergency farm bill which would give the administration broad powers and discretion as to the use of one or more of several plans to raise commodity prices is being borne out by recent developments at Washington. The inflationary amendment most recently proposed is necessary to make the picture complete. With the authority granted by the bill now before the senate, the President will have many weapons to combat the depression. If one doesn't work he can try another. Inflation alone, as the President pointed out, will not solve the farm problem. It will not restore parity prices for agriculture. It will not balance production nor remove crop surpluses. It will bring instant relief from high fixed charges including debts and interest. The outlook for better times grows brighter day by day. Further steps to rout the depression now only await congressional approval of pending legislation. That approval should be given at once.

The Grain Producer Replies

THE grain producers of Illinois resent the tactics employed by certain elements in the grain trade to undermine their efforts at marketing grain co-operatively. During recent weeks farmers have shown their resentment most effectively by helping their state regional, Illinois Grain Corporation, add 14 new elevator members. This splendid increase was obtained in a little more than seven weeks following the annual meeting on Feb. 22 at Peoria. No better answer to grain trade propaganda against the Illinois Grain Corporation and Farmers National Grain Corporation could have been given.

Volume of grain concentrated in farmer-owned and farmer-controlled marketing agencies counts more than verbal or written argument. Mud-slinging, false charges, and innuendo will not head off the development of co-operative marketing. The opposition had better save its energies and money spent for high-priced publicity bureaus and field workers. We farmers are interested in better marketing service and net returns for our grain. We shall judge private handlers as well as our own institutions accordingly.

W. H. Moody of Port Byron Passes Away

W. H. Moody of Port Byron, died suddenly the night of April 20, the Rock Island County Farm Bureau announced in a telegram received at I. A. A. headquarters. Mr. Moody was on the I. A. A. board many years where he served as chairman of the finance committee. Subsequently he became a director in the Chicago Producers Commission Association. His was a familiar face at state and district meetings of the I. A. A. and associated companies. He attended the recent annual meeting of the Chicago Producers at the Sherman Hotel, Chicago and also was a visitor at the district meeting of the Illinois Agricultural Mutual Insurance Co. in Galesburg a short time ago.

W. H. MOODY

Moody was a pioneer in the Farm Bureau movement and held memberships in both the Rock Island and Whiteside County organizations in past years. He served as general agent for the I. A. A. insurance companies in his home county in 1929 and 1930 and invariably took a keen interest in all the new services and companies set up by the Association. He subscribed for $5000 of insurance in Country Life Insurance Co. soon after it was organized. Mr. Moody's service to agriculture in Illinois is worthy of the highest tribute. His kindly greeting and smile will be missed by a host of friends.

Chicago Health Board Drawing In Milk Shed

The Chicago Board of Health on March 28 announced that it would inspect additional dairy herds in northern Illinois closest to the Chicago market. This announcement represents a change in policy. For several years the health commissioner has refused inspection to new dairy farms regardless of their location.

Assurance was given milk producers of Boone and McHenry counties who gathered at the city hall in Chicago that the board was proceeding on its policy of gradually drawing in the area from which milk and cream for Chicago would be obtained.

Exports At 71

A further decrease in volume exports of farm products in February brought the Bureau of Agricultural Economics index of exports down to 71 for that month as compared with a 1909-14 average of 100.

The index of exports of wheat and flour dropped to 25 as contrasted with 89 in February a year ago.

Representatives of cities desiring the next annual meeting of the Illinois Agricultural Association will appear before the I. A. A. board on May 12.

United States corn will meet less active competition in world markets this year because of prospective short supplies in the Argentine and South Africa.

Stocks of old corn have been materially reduced in Roumania and other Danubian countries of Europe. The United States is the only country having relatively large supplies on hand.

"Mac" and "Hank"

W. W. McLAUGHLIN J. H. LLOYD

Walter W. McLaughlin, state director of agriculture, whose appointment was announced in the April RECORD, recently announced the selection of J. H. "Hank" Lloyd as assistant director. Mr. Lloyd has been managing farms in Kane and adjoining counties for the Frst National Bank of Aurora. He began his new work at Springfield April 10.

"Hank" graduated from the University of Illinois in 1911, was instructor in crops for two years at Purdue University, and was employed for 14 years as farm adviser in Hancock county. In 1930 he became manager of the Soybean Marketing Association which he served until 1931 when he moved to Aurora.

Mr. Lloyd will assist in carrying out the many regulatory duties connected with the state department.

Tax Commission Order Is Unconstitutional—Watson

The reported order of the Illinois Tax Commission that personal property be assessed at 100 per cent of fair cash value, while real estate is assessed at a lower figure is not in accord with the uniformity provision in the Constitution of Illinois, according to John C. Watson, director of taxation.

JOHN WATSON

In a recent statement to the McLean County Farm Bureau, Mr. Watson said that if real estate in that county is assessed at approximately 60 per cent of its fair cash value this percentage also should be used in the assessment of all personal property. Watson states that this method of assessing personal property is the only one that can be defended in the courts.

Len Jones, chairman of the McLean county tax committee, reported that his committee would oppose a 100 per cent valuation in that county because such assessment would throw an unfair proportion of taxes on personal property.

The tax committee also went on record against diversion of funds derived from the state sales tax for relief purposes. The McLean County Farm Bureau believes that sales tax revenue should be used to replace and reduce dollar for dollar taxes now levied against property for educational purposes in that county.

Gross Income Tax In Indiana Fair To All

The gross income tax adopted by the Indiana legislature of 1933 has brought about an equitable distribution of the tax burden, according to the Indiana Farm Bureau. "No tax battle has been more bitterly fought nor more decisively won than that fought by the 'artful taxdodgers' on the one side and the 'embattled farmers' on the other," said Lewis Taylor, director of the tax department. "The tax load is now shifted to all citizens on a parity, and although farmers will pay their just share, their load will be greatly lightened, which will enhance their opportunities to save their farms and homes during this critical period."

I. A. A. Opposes Measure To Cripple Motor Trucking

OPPOSITION to unreasonable curtailment of motor truck transportation was voiced before the Senate Committee on Roads and Highways at Springfield on March 29 by L. J. Quasey, director of transportation who represented the Illinois Agricultural Association in the hearing on Senate Bill 316.

The opposition of the I. A. A. was based on the probability of increasing the cost of marketing hogs, milk, and other farm products if the length and tonnage of motor trucks were further reduced at this time.

The I. A. A. took the view that the State Highway Department should first initiate legislation to protect the highways against premature destruction. It was reported that railroads are behind the bill because of the great inroads made by motor trucks on their freight business during the past two years.

"Transportation of products from the farms and materials and supplies to the farms is a matter of great importance to the agricultural industry," said Quasey.

"We are interested in the development and co-ordination of all forms of transportation, each to be given fair opportunity to find its proper place in the transportation field, unhampered by unnecessary, unreasonable, or vicious restrictions.

Reduced Year Ago

"The measure under consideration here seeks to drastically reduce the weights and lengths of trucks and particularly trailers. It will be observed that the lengths and weights of trucks and trailers were substantially reduced by a law passed only two years ago. Since that time there has been no change in design of our hard surface roads, nor are we aware of any change in conditions that would warrant further reductions at this time.

"The State Highway Department has made great progress in highway design—it has developed much information regarding the effect of motor truck traffic on highways. It is charged by law with responsibility of building, maintaining and policing our highway system. Therefore, we are of the opinion that the Highway Department is in the best position to propose necessary highway regulations.

"Since it does not appear that this measure either originated in the Highway Department or is sponsored by it, it is proved quite conclusively that there is no necessity for further reduction in weights and lengths of motor trucks and trailers to protect the highways of the state.

"I respectfully suggest, Mr. Chairman, that the Highway Department be asked to present information pertinent to this matter."

The Association favors reasonable regulation of trucks to preserve paved roads against destruction, but believes such regulation should have scientific backing.

AGRICULTURAL BUILDING AT CHICAGO 1933 WORLD'S FAIR

This huge building will be filled with agricultural exhibits including finished food products and farm implements demonstrating the progress made during the past 100 years.

The Agricultural Building is located on Northerly Island. It is of steel frame construction, 600 feet long, 100 feet wide and 40 feet high, with roof terraces and observation lounges extending the full length of the building. The Fair will open June 1.

Outlook For Cattle And Hogs In Coming Months

The cattle market should continue in a strong position with a rebound in prices expected within the next few weeks, H. M. Conway, market analyst for the National Livestock Marketing Association, reported on April 5.

Any recovery should be taken advantage of by marketing finished steers and butcher cattle. It is no time to get panicky and rush in half-finished stuff. Butcher cattle will continue strong well into May and further strength is expected in the stocker and feeder market. It will be well to avoid the late spring and summer as price and supply changes are expected to be somewhat the reverse of last year. Steer calves should be carried and fully finished for the fall market. Short feeding for the late fall and winter appears good at this time.

While the spring peak in the hog market apparently has been passed, hogs are still in a strong position. Finished hogs might as well be topped out on any upturn and those on feed crowded for as early a market as possible. Fall pigs will be moving quite freely by late May and are expected to continue well into July. Feeding for August and September looks attractive. However, some caution in regard to weight seems desirable. Developments following farm relief legislation should be watched rather closely, as hogs will be particularly affected.

The lamb market continues to have hard going, but improvement is still expected by the middle of the month with a sharp comeback by late April and early May. Western fed lambs are still moving in considerable volume, but this supply can chop off rather sharply most any time. The number was curtailed but they have moved early, thus throwing the full reduction at the close of the feeding season.

New York Considers Fixing Minimum Prices

The Dairymen's League of New York is sponsoring the Smith bill in the state legislature which provides for fixing the minimum price of milk to consumers by a state board charged with the duty of seeing to it that dealers pass these benefits back to farmers.

The control board would be only temporary. The members would serve without salary. The board is authorized to revoke the license of any dealer who does not comply with the provision.

"We believe the Smith bill is the least objectionable to the dairy industry of any thus far presented," said F. H. Sexauer, president of the League. "It aims to stop price cutting by giving the control board power to fix the minimum price at which milk shall be sold to consumers. Abolishment of price cutting will go a long way toward correcting the evils from which farmers are suffering."

Everything to Gain ..Nothing to Lose!

COUNTRY LIFE Insurance Company has only one reason for its existence — to be of service to Farm Bureau members. Now it has extended that service to the wives and children of Farm Bureau members by extending to them for the first time the opportunity to obtain complete life insurance protection at the lowest possible cost through the Country Life Group Insurance plan.

This opportunity is open only during the months of April and May.

Country Life Group Insurance for Farm Bureau members and their families is an answer to the need for low-cost insurance to tide policy holders over the hard times. Right now, with money none too plentiful anywhere, and the need for adequate insurance protection greater than ever before, thousands of policy holders in all companies find it difficult to pay their premiums.

Farm Bureau members are no exception, and Country Life, seeing their need, has made available to them as part of its service to the needs of organized agriculture, a policy that will give complete protection at a price they can afford to pay.

Complete details of the Country Life Group Insurance plan are set forth on the following page. I most earnestly urge every Farm Bureau member to acquaint himself with them and learn at first hand of this exceptional opportunity offered only to Farm Bureau members and their families.

Let me again call attention to the fact that Country Life's offer holds good only during April and May.

L. A. Williams, Manager,

COUNTRY LIFE
INSURANCE COMPANY

Now . . . for the first time

Country Life's Lou C

Is made avail

of FARM B

By enrolling in a class of 50 or more, Farm Bureau members, their wives and children can take advantage of the most sensational insurance offer ever made by **your own insurance company,** Country Life. Complete protection for every member of the family between the ages of 15 and 50, at a cost so reasonable it hardly seems possible. This special offer, **effective only during the remainder of April and the month of May,** applies only to Farm Bureau members and their families. By making it, your own insurance company is helping you to beat the hard times.

Here Are Some of the Advantages of Country Life Group Insurance

1 It is a term policy convertible any time within 12 years to any other standard form of policy at the rate applying to your original or attained age.

2 Policies of $1,000 are issued to Farm Bureau members and their families between 15 and 50 without the formality of a medical examination if their health record is good.

3 Note from the table on the opposite page how reasonable the rate per $1,000 is at your age and how for only a few pennies a day you can obtain complete insurance protection for yourself and your family with absolute safety.

4 Country Life Group policies pay annual dividends starting at the beginning of the third year, thus reducing still further the net insurance cost.

5 Country Life is **your own company,** owned and operated by organized agriculture. Its assets are 100% liquid; its strength unsurpassed by any company anywhere. You can have complete confidence in Country Life.

6 Through Country Life Group Insurance you can safeguard your loved ones during the hard times at minimum cost, and then change to some policy more suited to your needs when conditions improve without sacrificing any advantage of age.

Your Farm Bureau will be glad to cooperate with you in taking advantage of this special offer. They can give you complete information and will assist you in forming a group of 50 if you desire. Just phone them and ask to speak to the Country Life General Agent. Or, if you'd rather, fill out the coupon. In either case you will not be obligated in any way.

Country Life Insurance Co.

608 So. Dearborn St. **Chicago, Ill.**

Cost Group Insurance

Country Life Insurance Company,
608 So. Dearborn St.,
Chicago, Ill.

Please tell me how I can take advantage of Country Life's special group insurance offer for myself and members of my family. It is understood that in making this request I do not obligate myself in any way whatever.

My Name is _____

I am a member of the _____County Farm Bureau.

My address is _____ P. O. _____

My family consists of my wife and _____ children of 15 or over.

Talk Over Problems At I. A. A. District Conference

County Farm Bureau Leaders Find Plenty of Topics To Interest Them, Sales Tax Is Live Issue

THE STATE sales tax and the relative merits of the county commissioner form of government vs. the board of supervisors form were discussed by John C. Watson of the I. A. A. at the 15th district conference in Quincy, April 3. Ray Ihrig, I. A. A. director, called the meeting and presided. Farm Bureau leaders who attended from Adams, Knox, Schuyler, Henry, and Fulton counties got down to fundamentals and exchanged views informally on a variety of subjects of vital interest to the organization.

Mr. Watson stated that the sales tax was not sponsored by the Illinois Agricultural Association, although the I. A. A. did not oppose it. "It became apparent," he said, "in view of the new political lineup that some sort of a sales tax would be passed so the I. A. A. immediately interested itself in getting a tax that was least objectionable to rural people.

Amended Original

"With the help of its friends in the senate, the Association succeeded in amending the original bill to distribute the sales tax funds among the counties according to population and to make the new tax primarily a replacement tax to reduce levies against property."

The commission form of county government, Watson said, has greater possibilities for efficiency but also is more open to rule by political cliques. The county manager form offers the greatest hope for efficient and economical government, he said.

The only legal basis for assessing personal property under the constitution of Illinois, Mr. Watson told the delegates, is at the same percentage of fair cash value as real estate is assessed. He recommended conferring with the county treasurer on personal property assessment, expressing the belief the reported order of the state tax commission to assess personal property at 100 per cent is in error.

Sam H. Thompson, former I. A. A. and A. F. B. F. president, who recently retired from the Federal Farm Board, attended the meeting and discussed general agricultural conditions and pending legislation. He concluded his talk by saying that he returned to Adams county as an ordinary citizen and Farm Bureau member in the ranks and hoped to prove that he could be a good follower. Dudley Myers, president of the Adams Co. Farm Bureau for 14 years who with Mr. Thompson was awarded a medal by the A. F. B. F. for distinguished service to agriculture, expressed the belief that the depression had brought about an awakening among all groups to the farmers' plight and the need for restoring farm prosperity before there could be general prosperity.

G. A. Broman of Henry County reported that money was tight and Farm Bureau collections slow in that county. Farmers are paying insurance premiums, gasoline and oil bills, and neglecting to pay their dues, he said. He suggested that volunteers be directed to look after collections in their respective communities. John Moore of the organization staff outlined several plans for collecting dues.

A. R. Kemp of Knox county recommended school and town hall community meetings as a means of reaching members and keeping them informed on organization activities and accomplishments. Let's spend more time serving our present paid up members, said Kemp, and not so much time on delinquents and figuring how to get new ones. He related how 18 successful "fireside" meetings in members' homes were held where livestock marketing was discussed. Harry Gehring emphasized the need for getting the Farm Bureau story before the people through local meetings and told of school house gatherings promoted with excellent results in two townships in Knox county.

Wm. Brown of Fulton county emphasized the value of 4-H club work to county fairs expressing the belief that this feature had made possible continuation of the fair in his county. "Many farmers are not the right calibre for Farm Bureau members," said Brown, "and should not be invited to join." Increased taxes from unemployment relief, he said, are imposing a heavy burden on farmers.

J. E. Meatheringham of Adams explained his organization plan in which each member would be allowed a discount on his dues for every new paid-up member secured. Thus as membership increased per capita dues would go down and vice versa. "Let's put responsibility on the members for maintaining the organization, but credit the man who signs up his neighbors, with a lower cost membership fee for his effort."

Resolutions were adopted referring the question of appropriation for State Fair to the I. A. A. legislative committee; opposing legislation to wipe out or seriously cripple Farm and Home advisory work; recommending maintenance of 4-H club work on the present basis.

The next meeting will be held after corn planting in Henry county. L. E. McKinzie of Schuyler county, was elected secretary of the district for a two-year term.

Sam Thompson Retires

Sam H. Thompson of Quincy, member of the Federal Farm Board and former president of the Illinois Agricultural Association and A. F. B. F., announced his resignation from Washington on March 29. He was appointed in March, 1931 to complete the unexpired term of Alexander Legge, first chairman of the Board. Mr. Thompson resigned as president of the American Farm Bureau Federation to accept the appointment by ex-President Hoover.

S. H. THOMPSON

Mr. Thompson will long be remembered for his sincere devotion to the welfare of agriculture and for his many years service in the Farm Bureau movement which he entered first as a membership solicitor in his home county, Adams.

Chicago Producers Gain In Percentage Receipts Handled

Money And Prices And Economic Developments Interest Livestock Growers At Annual Meeting

A RISE in commodity prices is the most hoped for solution to the economic predicament affecting the entire world, Prof. F. A. Pearson of Cornell University told approximately 300 members and guests of the Chicago Producers' Commission Association in their annual meeting at the Sherman Hotel, Chicago, April 4. President Henry H. Parke of Genoa presided.

HENRY PARKE

Dr. Pearson presented a mass of statistical data including charts and curves which held his audience with rapt attention for more than three hours. With simple illustrations he clearly outlined the money question and showed how widely prices had departed from their close relation to gold reserves during the 1928-1929 period of inflation.

"Only two courses are open," Prof. Pearson said; "one is deflation, the other reflation. If we wish to go through with deflation we may as well proceed with bankruptcies, foreclosures and public defaults and get them over with. An early postponement by lending some money or attempting to hold up the price of this or that will accomplish little.

"Probably nothing is more universally wished for than a rise in commodity prices. We are willing to have the Farm Board buy wheat and cotton, pile tariff on tariff, lend billions of government money all in the hope that commodity prices may rise, but when any proposal is put forward that will raise the whole price level it is commonly considered sacrilegious. There is probably no other subject on which so many people have formed positive convictions without scientific evidence."

Dr. Pearson traced the history of money and prices since before the revolutionary war, outlined in some detail how European and other countries are attempting to solve the money question. Answering the question, "what price level should be restored?" he said: "That price level to which debts and other relationships are most nearly adjusted. Freight rates, telephone, and similar charges are adjusted to the present price level before the collapse. To bring commodity prices into adjustment with these charges would require a price level of about 40 to 50 per cent above pre-war. If a very prompt recovery from the present situation is desired a higher price is necessary.

"We should not be too disgruntled because so little progress has been made in solving the money question. Past experience guides the action of most of us and only a few ever depart from its teachings. Inertia is such a commanding force in our thoughts and actions that a great change rarely occurs until an unusual event forces it upon us."

In opening the meeting, President Henry H. Parke delivered a well-thought-out address in which he pointed out economic factors which have reduced livestock prices. He condemned the home-buying campaigns as a hindrance to recovery. "We must master the major principles of inflation, deflation, and the gold standard," he said. "Restoration of trade between nations is necessary to bring back prosperity. If deflation is carried on it will be a victory for the creditor class and the bondholder who will take over much property at rock-bottom prices. The nineteen or more countries which are off the gold standard with depreciated currencies are undermining our industries and agriculture.

"Our association came through the year with net profits of $15,683.48," said Mr. Parke. "The fact that we had a reserve was very helpful during the first two weeks of March when the bank holiday was on. This reserve made possible an uninterrupted flow of cash to the country. The result was an immediate increase in receipts.

"The Chicago Producers took the initiative in reducing commissions at Chicago and is now working with the packer and stock yards administration toward securing more equitable rates. The hearing will probably be held in May." In closing he paid a tribute to the Farm Bureau for laying the groundwork that made possible the Producer commission associations.

A complete analysis of the year's operations which showed another gain in percentage of receipts handled, was given by Manager D. L. Swanson. During 1932 the Producers handled 9.3 per cent of all livestock sold on the Chicago market. This compares with 8.4 per cent handled in 1931. While livestock averaged approximately $1,200 per car in 1931, last year a carload averaged only $900 in value. Illinois contributed more than 70 per cent and Iowa 14.07 per cent of the Chicago Producers' receipts.

The mass of statistical data presented by the manager was impressive. It shows that the organization is in constant touch with all details affecting its business and the marketing of livestock.

Mr. Swanson stated that the Producers' subsidiary, the Chicago Stocker and Feeder Co., saved more than $15,000 in actual cash to producers last year, and also had been helpful in maintaining livestock prices, for when animals are shunted over to the Stocker and Feeder Co. that much is removed from competition for sale to killers. "This is an example of a service refund," said Swanson, "in contrast to a cash refund."

He named 16 distinct services the Chicago Producers has developed for livestock growers, few of which he said are available elsewhere. Trucking-in increased 64 per cent during the past year. The Producers sold more than 19 per cent of all trucked-in stock.

L. J. Quasey and G. W. Baxter of the Transportation Department saved Illinois and Iowa livestock shippers more than $75,000 last year by securing modified mixed livestock rates and rulings. More than $7,100 of claims were collected for members last year, a total of $109,395 since the collection service for livestock shippers was started.

Two hundred and sixty-six feeders

borrowed a little more than $400,000 through the Chicago Producers' Loan Service in 1932. Since 1924 the Producers loaned approximately one and two-third millions of dollars of which only a little more than $6,000 was lost. The association carries ample bonds to protect shippers. The organization has investments of $107,627 of which $35,000 is in government bonds, and $64,000 in the stock of associated companies. Net worth at the close of the year was $156,770.85, a gain of a little more than $16,000 for the year.

Chas. A. Ewing, president of the National Association, gave a highly interesting talk in which he expressed optimism over the outlook for agricultural relief from Washington. He lauded the progress made by the new administration, but suggested that organized livestock growers better get ready in the next few years to do their own financing. "Nothing is so uncertain as the uncertainty of politics," he said. "We must not depend too much on any one bill. We must become self-reliant.

"Our biggest job," he said, "is to concentrate terminal and direct marketing. Science has done much for agriculture since the turn of the century, but apparently it has not solved the problem of maintaining prosperity. While the National Marketing Association members increased their business 15 per cent in volume last year the livestock handled brought approximately 46 per cent less money."

Ewing expressed approval of the new farm bill, but believes its most hopeful feature is that concerned with establishing reciprocal trade agreements with foreign countries. He attacked the industrial tariff which, he said, had nursed industries along for more than 100 years. "I agree with Joe Fulkerson of Jerseyville," he said: "If I had a calf that couldn't stand up and suck after 140 years, I would veal it."

Directors chosen to represent the four districts whose directors' terms had expired were as follows: Chas. J. Hearst, Jr., Blackhawk county, Iowa; Earl Gehring, Knox county, Illinois; Frank Snodgrass, Geneseo, Henry county, Illinois, and Theodore Oriez, Washington, Iowa.

Dolomite, or dolomitic limestone, added to complete fertilizers which contain ammonium compounds will prevent them from increasing soil acidity.

The gross income from dairy products last year was $1,180,000,000 or about half the income of 1929. Poultry and eggs yielded $608,000,000 in 1932; a decline of 52 per cent since 1929.

NEW STOCKYARDS ON I. C. AT BLOOMINGTON

The McLean county unit of Illinois Livestock Marketing Association will use these facilities recently completed at Bloomington. There are 28 pens under one roof. Lower view shows unloading platform for trucks.

Direct Shipping of Hogs Cuts Terminal Prices

How direct buying of hogs at local concentration points is undermining terminal market prices was explained by Ray Miller, director of livestock marketing, before the I. A. A. Board March 24.

A recent survey shows that hogs are being bought by local packer buyers for direct shipment at 29 different points in Illinois, said Miller. In many cases these hogs are shipped direct to eastern markets such as Buffalo and Pittsburgh. By shipping direct the buyers make a substantial saving on freight rates, compared with the combined rate from the country point to Chicago or St. Louis, and then on east to destination.

For example, the hog rate from Bluffs, Ill. to Buffalo, N. Y. is 46 cents per cwt. Thus a buyer at Bluffs could secure plenty of hogs within the past week for $3.65 per cwt. He could add a commission of 15 cents and lay these hogs down at Buffalo to the packer at $4.26. Hogs were selling on the open market at Buffalo at considerably more money.

Has Bearish Influence

This district buying has a bearish influence on all the terminal markets according to Miller. The result of the system is to place farmers in direct competition with each other. The seller for the lowest price tends to set the price for all.

Miller stated that farmers today are receiving less than 30 per cent of the consumer's pork dollar. Based on recent prices the Illinois hog crop for 1933 he said will bring the farmer approximately $44,000,000 whereas the consumer will pay approximately $176,000,000 for the finished product. In other words, it will cost close to $132,000,000 to process and distribute the Illinois hog crop. Packers and distributors thus receive three times more for processing and handling the hogs than the farmer receives.

In Denmark where farmers have co-operative packing plants, the producer gets close to 60 to 70 per cent of the consumer's dollar. Before the war Illinois farmers were receiving upwards of 50 per cent of the consumer's pork dollar.

"It is time that livestock growers made a more complete study of packing and distributing their commodities," said Miller, "not so much with the idea of getting into the packing business themselves, but to learn how the excessive cost and waste of getting the finished product to the consumer can be reduced."

Dairy Products Lead In Gross Farm Income

Dairy products assumed first place in the amount of gross farm income during 1932. This position was formerly held by the livestock group, including cattle, hogs, and sheep. Livestock in 1932 was the second largest source of income to farmers of the U. S. and vegetables third.

Gross income from cattle, hogs, and sheep declined from $2,807,000,000 in 1929 to $1,122,000,000 in 1932—a drop of 60 per cent.

Business Men Advocate 75 Per Cent Inflation

Movement To Revalue Gold Gains Momentum, Industry Supplies New Recruits

SEVENTY-FIVE per cent inflation—to be accomplished by raising the price of gold from $20.67 to $36.17 an ounce is being urged by a group of 300 industrial leaders organized as the "Committee for the Nation to Rebuild Prices and Purchasing Power."

Chairman of the directing committee is Frederic H. Frazier, chairman of the General Baking Company. Other members are Vincent Bendix, president, Bendix Aviation Corporation; Lessing Rosenwald, chairman, Sears, Roebuck & Co.; F. H. Sexauer, president, Dairymen's League Co-operative Association; and J. H. Rand, Jr., president, Remington Rand, Inc.

Five Next Steps

The committee now proposes what it calls the "Five Next Steps" to inflate prices, as follows:

1. Reopen the maximum number of banks as rapidly as possible.
2. Continue an embargo on gold exports and suspension of specie payment. Confer with Great Britain with the idea of both countries returning to gold basis simultaneously.
3. Remove restrictions upon foreign exchange dealings which do not involve export of gold. Discontinue efforts to keep the dollar at its former gold parity.
4. Announce at once that prior to lifting the embargo on gold at a future date it will be the policy of the United States to revalue gold. It is the opinion of the committee that the U. S. treasury should raise the price of gold from $20.67 per ounce to a new price of $36.17 per ounce. This 75 per cent increase it is estimated will bring the commodity level to a 1926 base.
5. Create a federal non-partisan board to stabilize the United States price level of wholesale commodity prices at 100. This is the average of the U. S. Bureau of Labor price levels from 1921 to 1930.

These Men Signed

Among the prominent business men signing the report were Philip K. Wrigley, president, William Wrigley, Jr. Company; E. L. Cord, president, Cord Corporation; Gen. R. E. Wood, president, Sears, Roebuck Co.; Carl W. Ullman, executive vice-president, Dollar Savings and Trust Company, Youngstown, Ohio; F. L. Innes, president, Speigel May Stern Company; Prof. Irving Fisher, Yale University; G. R. Meyercord, president, the Meyercord Company; E. M. Allen, president, National Surety Company; Edwin L. Lobdell, vice-chairman, Chicago City and Connecting railways; M. B. Nelson, president, Long Bell Lumber Company; George W. Borg, chairman, Borg Warner Corporation; and Fred G. Wacker, president, Automatic Maintenance Machinery Company.

The committee quoted at length from the recent report of the National Industrial Conference Board to the effect that between 1929 and 1932 the price the farmer received for goods he sold fell from 100 to 41, while the cost of his purchases decreased only to 75.

All Groups Injured

"Debts and interest payments continued unchanged. Taxes increased, the report states. The farmers' income was almost wiped out. The disparity in prices makes it unable for him to buy as formerly from industry in the city.

"This cuts down the volume of freight shipments, closes factories, throws city workers out of employment, and reduces their ability to buy from other industries. The drop in price level thus makes it difficult for one group to carry on business with another."

All economic groups, the committee says, have been injured by the drop in the price level, which has already wiped out approximately $175,000,000,000 of value.

"Until we deal with this monetary cause of the depression, there can be little hope of recovery. Measures to reduce the debt structure or to relieve distress or give employment out of public funds are only palliative.

"The best place where 12,000,000 of unemployed can find work is in their formerly accustomed positions in factory, commerce, and agriculture. Our efforts must be directed to removing the causes which brought this organization to a standstill.

"Our economic system has proved itself the most efficient for production that the world has ever seen. Like a high-powered automobile, it is stalled because the distributor on its magneto has broken down.

"Instead of tinkering with the body of the car we must direct our efforts at the source of the trouble."

Auditing Ass'n To Refund $2020 Cash

The Illinois Agricultural Auditing Association announces that it is ready to issue $3,345 of preferred stock covering 1932 contributions to capital reserve. It will also redeem $2,020 of preferred stock issued on 1927 capital reserve contributions.

From January 1, to April 19, 1933 the Association had completed 115 audits and prepared 20 income tax exemptions, states Fred E. Ringham, manager.

Nine new contracts to audit accounts of co-operatives were secured since January 1, 1933 as follows:

Chadwick Co-operative Produce Assn., Chadwick, Ill.

Illinois Grain Corporation, Chicago, Ill.

Jersey County Produce Assn., Jerseyville, Ill.

Bureau Service Company, Princeton, Ill.

Farmers Creamery Company, Bloomington, Ill.

Winnebago County Farm Bureau, Rockford, Ill.

Farmers Co-operative Dairy Products Co., Davenport, Iowa.

Rees Farmers Elevator Co., Franklin, Ill.

Burlington Co-operative Pure Milk Ass'n, Burlington, Wisc. (Office in Chicago.)

The German import duty on lard was recently raised from $1.08 per 100 pounds to $5.40.

Corn Yield May Again Be Reckoned In Gallons

Hi-Ball Gasoline Containing 10 Per Cent Alcohol Wins Out In New Road Tests

HISTORY is repeating itself in the Corn Belt. Years ago, before the brass rail and the swinging door became obsolete, grain growers of the Middle West would jokingly estimate the yield from their broad fields at so many "gallons to the acre." National prohibition put an end to that.

But today it seems possible that the phrase may again come into circulation. King Corn, whose ultimate destiny has for years been corn meal, corn syrup, starch, beef or ham, may again find his way to the distillery to emerge as alcohol, not for beverage purposes this time, but for use in propelling thousands of automobiles along millions of miles of paved highways, and doing the job better—and possibly cheaper—than it has ever been done before. And as a result the grain farmer may once again come into his own and have something to cheer about after many long years in the Slough of Despond.

For about two months, Illinois Farm Supply Company has been distributing to thousands of motorists "Hi-Ball Gasoline," a motor fuel composed of 90 per cent gasoline and 10 per cent anhydrous (dry) grain alcohol. Careful tests have been made under actual working conditions. Thousands of questionnaires have been distributed in which users of the new fuel have noted their experiences and their conclusions. And the result seems to be that the blended fuel is far superior, not only to regular grades of gasoline, but to the premium grades, and further that its users would gladly pay a premium of two to three cents a gallon if the new fuel were made available to them permanently.

For months scientists and others interested in farm relief had been discussing the possibility of providing a market for surplus farm products from which alcohol might be produced, by blending it with gasoline for a motor fuel. Extensive laboratory tests were made. As is always the case, over-enthusiastic proponents of the idea advanced extravagant claims for it. There was much reference to similar experiments abroad. Some professors thought it would work. Refiners were equally sure it wouldn't. Farmers were hopeful but skeptical and the voice of the promoter was heard in the land, extolling not a chicken in every pot, but a distillery in every township.

At the instance of Earl C. Smith, president of Illinois Agricultural Association, Illinois Farm Supply Company was asked to make a practical test of the plan and get some facts. And the results of that test, conducted in co-operation with the American Commercial Alcohol Corporation and under the supervision of the Federal Bureau of Industrial Alcohol, now are available.

The verdict is overwhelmingly in favor of "Hi-Ball Gasoline." About a thousand questionnaires have been returned giving the results achieved with the new gas, and the unfavorable reports are so few as to make the favorable reaction almost unanimous. For instance, out of 712 users who compared Hi-Ball with ordinary gasoline, 430 reported an increase in miles per gallon. Only three reported a decrease and 279 did not report on mileage. The 430 who did report showed an average increase of 2.66 miles per gallon with the blended fuel. In this same group, 709 reported that they would be willing to pay a premium for the blended fuel if it were produced from the surplus grain crop. Only three said they wouldn't pay a premium.

Another group of 29 made a comparison of Hi-Ball Gas with premium motor fuel of other grades. Twelve did not report any increase in mileage, but the 17 who did reported an average increase in miles per gallon of 3.09 miles with Hi-Ball. All but one favored paying a premium.

In both groups reports were made on the various phases of motor operation and comparisons drawn between the old and new fuels with the result that Hi-Ball's performance was better by a wide margin as regards starting, acceleration, smoothness of operation, anti-knock qualities, power and general motor performance. Only one reported that his motor ran better with regu-

A PERMANENT JOB

Waterway Creates Broader Outlets For Grain

New Facilities at Peoria For Loading River Barges

PLANS to make maximum use of the deep waterway system for the benefit of Illinois grain producers are being developed by the Illinois Grain Corporation and the Farmers National Grain Corporation. Of special interest to Illinois farmers are the new facilities to be erected at Peoria where the Farmers National million bushel warehouse is being remodeled and facilities installed to unload and load large trucks.

Handling equipment also will be established at the Illinois river for transferring grain direct from trucks to barges.

A comprehensive program is being launched by the Farmers National involving the establishment of additional warehouse space at Chicago, Buffalo, and other points necessary to take advantage of low cost waterway transportation.

C. P. Cummings, manager of Illinois Grain Corporation, reports that it is impossible to forecast what's ahead on truck and river transportation of grain. "It is our intention to make available to our member elevators the full benefits of savings in marketing grain over water routes to the markets of the world. Whatever is in store for the country elevator as a result of changes in transportation methods, we intend to work wholeheartedly for the best interests of our member elevators and the grain producers who own them."

The new loading facility at the Peoria elevator will make it possible to unload grain from trucks and store it in the big warehouse for later shipment. This facility will be extensively used when river transportation is closed or when it is not desirable to ship by water.

At the same time the loading equipment at the water's edge will make possible conveyance of grain direct from trucks to the river barges for movement to Chicago and other Great Lakes ports or to New Orleans for transfer to ocean-going ships.

It is contemplated that the plant at Peoria will be built in units, the first to cost about $50,000 and to have a capacity of 100,000 bushels daily. If water transportation proves advantageous, additional handling units close to the river will probably be erected. The present million bushel warehouse at that point is located about a mile from the site now under consideration, C. E. Huff, president of the Farmers National Grain Corporation, announced recently.

"Our handling of several thousand tons of corn by barge from Havana, Illinois to the Gulf, which pioneered in the movement of grain from interior Illinois by use of the new waterway," said Huff, "proved so successful that we have planned expansion of this service on a permanent and comprehensive basis for the benefit of Illinois grain producers.

"The installation of necessary equipment at Peoria, with continuance of our outlet through Havana, together with adequate facilities at Chicago for handling barge grain, constitutes the nucleus from which we expect to develop grain handling service throughout the entire system of inland waterways to give farmers the benefits they have anticipated from water transportation.

"Through the development of these facilities, cities located at strategic points on the vast system of inland waterways will become important grain ports. The system taps one of the world's richest grain areas; with immense acreages within feasible trucking distance, permitting either truck or rail shipment to barge terminals."

Illinois farmers have good prospects for a new market for upwards of 10,000,000 bushels of corn annually on the Pacific coast. Approximately this quantity is now being consumed by the big poultry, egg, and dairy cooperatives in California and other Pacific coast states. Heretofore most of the corn used for feed by Pacific coast farmers has come by rail. By shipping down the Illinois and Mississippi rivers and through the Gulf of Mexico and Panama Canal, corn can be laid down at San Francisco for approximately half the rail rate from interior points. In the same way corn can be laid down at European ports from Illinois by using the inland waterway system at a substantial saving compared with the rail-water rate. All in all the Illinois corn grower has prospects of a much broader outlet for his product.

The waterway system fits in admirably for shipping corn, soybeans, and other Illinois products to farmers and dairymen in the Middle Atlantic and New England states.

The G. L. F. Exchange of New York, for example, which buys and mixes feeds co-operatively for thousands of northeastern dairymen and poultrymen is one of the best customers of Illinois farmers. Hook-ups are being arranged whereby these big farm buying co-operatives will purchase direct from farmers through their own farmer owned and farmer controlled grain selling agencies.

ONE MILLION BU. FARMER-CONTROLLED WAREHOUSE AT PEORIA

This big grain elevator is being remodeled and new facilities installed to unload and load grain from trucks for storage and later shipment by rail or water.

State Watches Motor Fuel Tax Evasion

J. M. Braude, superintendent of the division of motor fuel tax, is beginning to supervise more carefully applications for refunds of the three cent gas tax on motor fuel.

"We ask the co-operation of the Illinois Agricultural Association and the County Farm Bureaus and service companies in seeing that the law is complied with," said Mr. Braude. "The law provides for a 3c tax on fuel used in motor vehicles on the public highway. We have had plenty of evidence that many have been claiming tax exemption for all motor fuel purchased regardless of whether or not part of the gasoline was used in automobiles and trucks. Some have claimed that they purchased all gasoline for their cars and trucks at filling stations and use that delivered to the farm only in tractors and gas engines. This may be true in some instances but we shall insist that applicants for refunds secure and send in receipts for gasoline bought for cars and trucks at filling stations with their applications. Otherwise refunds will be held up. We insist that farmers deduct from total purchases that portion used in cars and trucks when applying for refunds."

Mr. Nudelman, in charge of gas tax inspection, states that a number of farmers he called on admitted that they applied for refunds on all gasoline purchased, although part of it was used in their automobiles.

I. A. A. Sponsors Legislation At Springfield

(Continued from page 4)

rendered a fine service, but don't overlook the fact that membership is the life blood of the organization. These institutions depend on membership. We are just one family and all of our state and county commercial enterprises are part of the program, but their continued success depends to a large extent on the maintenance of a strong parent organization. The I. A. A. has currently met its dues and paid 10 per cent of its receipts from membership each month to the American Farm Bureau Federation needed to carry on the national program. It will continue doing so so long as the members recognize the importance of putting first things first."

Secretary Geo. E. Metzger outlined the membership plan with a quota system for each county designed to increase membership throughout Illinois.

Following an explanation of recent developments in the alcohol-gasoline dilution plan, Mr. Smith stated that a bill would be introduced in Congress shortly which attempts to meet the obstacles toward relief from this source.

Corn Yield May Again Be Reckoned in Gallons

(Continued from page 16)

lar gas than it did with Hi-Ball; aligned against him were 683 who reported that with Hi-Ball their general motor performance was distinctly better. In the premium fuel group 25 had better performance with Hi-Ball, and four could notice no difference.

One particularly interesting experiment was conducted which would seem to indicate that regardless of its higher price the blended fuel may prove to be a real economy for the motoring public should it ever come into general use.

Aldoph Woolner, Jr., a prominent citizen of Peoria, Ill., made this test over a measured course of 128 miles, extending from Peoria to Bureau Junction, back to Sparland, Ill., thence to Mt. Hawley road and back to the starting point. The first test was made with Hi-Ball gas. Mr. Woolner drove over the course, until he had covered 500 miles during which trip his car consumed 40 gallons of Hi-Ball, or an average of 12.5 miles to the gallon. The following day he drove over the course until he had consumed 40 gallons of "regular" gasoline and compared the mileage. He was surprised to note that while 40 gallons of Hi-Ball had driven his car 500 miles, 40 gallons of the regular gas drove him only 380 miles, or an average miles per gallon of only 9.5 miles, as compared with 12.5 for Hi-Ball.

Several days later Mr. Woolner made another test, this time using 40 gallons of ethyl-gasoline. On this occasion he succeeded in making 488 miles on the 40 gallons, or an average of 11.2 miles per gallon as compared with 9.5 for the regular and 12.5 miles for Hi-Ball.

It is interesting to note the cost figures compiled by Mr. Woolner following his test. His Hi-Ball gasoline cost him 18.6 cents per gallon, he bought his regular gas for 14.6 cents per gallon and he paid 18 cents per gallon for Ethyl-gas. At these prices his average cost per mile for gasoline was: regular gas 1.53 cents per mile, ethyl-gas 1.60 cents per mile, Hi-Ball Gas 1.48 cents per mile. The conclusion is inescapable that should the blended fuel come into general use, users who pay th premium per gallon which will be necessary to cover increased blending and refining expense, will more than get it back in reduced gasoline cost per mile in operation of their motor vehicles. All the tests above referred to were made with a Packard car, 1929 model, weighing 5,400 pounds.

There is only one conclusion to be drawn from this test and that is that gasoline, diluted with grain alcohol at a ratio of 10 to 1 and used as a motor fuel works as well in the engine of a Model T Ford on a country road as it did in a shiny laboratory cluttered with tachometers and what not. The folks who said the idea was practical were right. It seems to not only work, but work better than anything else we have today.

Of course, Illinois Farm Supply's test is only the first step. Much remains to be done in the way of overcoming selfish opposition and there are many legislative and constitutional obstacles still to be hurdled. There is also, the matter of inadequate distillery capacity which may require years to correct.

We must not be over-enthusiastic or over-confident. Much remains to be done and alcoholic dilution of gasoline isn't going to make the grain farmer rich over night. But, on the basis of the results obtained in a fair, impartial and carefully conducted test, there seems to be a good deal of hope for better things in the future. Of course we must wait for a little while, but farmers don't mind waiting. We are used to it.

Inflation Move Changes Picture On Farm Aid

(Continued from page 5)

of farms lost through foreclosure within the last year. The Reconstruction Finance Corp. is authorized to advance $200,000,000 to the Farm Loan Commissioner for this purpose.

Under the proposed bill, joint stock land banks would be slowly liquidated. Arbitrary foreclosing of farm property would be stopped. The joints would be permitted to borrow up to $100,000,000 to refinance present mortgages. This would be at the disposal of the Farm Loan Commissioner to take over joint stock farm mortgages at not to exceed 60% of the normal value of farms so pledged.

Another $50,000,000 would be available from the R. F. C. to refinance encumbered lands in drainage, levee, and irrigation districts.

Reports from Washington at this moment indicate possibilities of the congress giving President Roosevelt broad powers to inflate the currency using one or more of several methods.

Number 6 JUNE, 1933 Volume 11

President Roosevelt Signs Farm Bill

Secretary Wallace Plans Early Administrative Action, Loans Begin Under Mortgage Refinancing Section

AS THIS is written, news dispatches from Washington report that President Roosevelt has signed the Emergency Farm-Inflation Bill and Secretary of Agriculture Henry Wallace plans to take steps immediately to do whatever is possible and practicable to apply price-raising measures to the 1933 crop.

The community markets have advanced miraculously now for more than three weeks until on Wednesday, May 17, hog prices at Chicago averaged $5 per cwt. with a top of $5.35 for the day. The grain markets and other livestock have advanced similarly, most of which is psychological in anticipation of coming inflation, although continued wet weather delaying corn planting, and an indicated 50 per cent reduction in winter wheat from winter-killing are having a bullish influence on all grains.

All in all a splendid beginning has been made in the march back to prosperity although the only action taken thus far by the administration was first to restore confidence in banks, and secondly to stop exports of gold which resulted immediately in the decline of the dollar abroad.

The powers given the Secretary of Agriculture to restore parity prices to agriculture, the stated purpose of the bill, may be used in whole or in part. It isn't likely that buying power of farmers equivalent to that enjoyed in the five year period from 1909 to 1914 will be restored in the next few months nor in the next year. President Roosevelt indicated in his radio talk to the people of the United States on Sunday night, May 7, that measures would be applied to bring about a gradual rise rather than a boom. But he did state specifically that "the administration has the definite objective of raising commodity prices to such an extent that those who have borrowed money will, on the average, be able to repay that money in the same kind of dollar which they borrowed. We do not seek to let them get such a cheap dollar that they will be able to pay back a great deal less than they borrowed."

Commenting on the farm bill, the President said: "The farm relief bill seeks by the use of several methods, alone or together, to bring about an increased return to farmers for their major farm products, seeking at the same time to prevent in the days to come disastrous overproduction which so often in the past has kept farm commodity prices far below reasonable return. This measure provides wide powers for emergencies. The extent of its use will depend entirely upon what the future has in store."

Specifically, the bill now enacted into law provides:

1. For reduction in acreage or production of any basic agricultural commodity (wheat, cotton, field corn, hogs, rice, tobacco, and milk and its products) through agreements with producers or other voluntary methods, and to provide for rental or benefit payments in connection therewith.

2. For a tax at the point of processing on basic commodities, or competing commodities if necessary, with which to make benefit payments to producers who co-operate in reducing production. Commodities exported are exempt from the tax.

3. For entering into marketing agreements with processors and handlers for the purpose of raising farm commodity prices.

4. For licensing processors, co-operative associations, and other handlers of farm products to eliminate unfair practices or charges "that tend to prevent the effectuation of the declared policy and the restoration of normal economic conditions in the marketing of such commodities or products and the financing thereof."

5. For revoking any such license after due notice and opportunity for hearing, for violations of the terms or conditions thereof.

The processing tax shall commence on the date of proclamation by the Secretary of Agriculture that rental or benefit payments are to be made with respect to such commodity.

The rate of the tax shall be the difference between the current average farm price for the commodity and the "fair exchange" value of the commodity. (Fair exchange value means that price which will give the producer purchasing power equivalent to that of 1909-1914.) If the tax results in an accumulation of surplus, however, the Secretary may lower the rate.

To administer the Act, the Secretary is authorized to set up the Emergency Agricultural Adjustment Administration in the Department of Agriculture. No officer or employee may receive more than $10,000 per year. The Secretary may establish state and local committees or associations of producers, and may permit processors and co-operative associations when qualified, to act as agents of their members and patrons in distributing rental payments.

The Act may be terminated "when-

PRESIDENT ROOSEVELT SIGNING THE BILL THAT PROMISES A NEW DEAL FOR AMERICAN AGRICULTURE

Grouped about the President in the White House when he signed the Emergency Farm-Inflation Act on May 12 are: left to right, Congressmen Wall Doxey, Miss.; Hampton P. Fulmer, S. C.; Geo. N. Peek, Moline, Ill. (rear); Marvin Jones, Texas, chr. House Agricultural Committee; L. J. Taber, pres. National Grange; Senator Ellison D. Smith, S. C.; Henry Morgenthau, Jr., chairman Farm Credit Administraton; Henry A. Wallace, Secretary of Agriculture; Edward A. O'Neal, president, American Farm Bureau Federation.

ever the President finds and proclaims that the national economic emergency in relation to agriculture has been ended." The President likewise may terminate the application of the act to any basic commodity.

The "cost of production" section providing for fixing minimum prices for farm products was stricken from the bill in conference committee. This section would have made it unlawful for anyone to buy farm products for domestic consumption below a certain price named by the Secretary.

The bill as passed provides for an immediate appropriation of $100,000,000 to administer the Act and make benefit payments. The Secretary of the Treasury is authorized to permit postponement for a period not to exceed 90 days, of the payment of the processing tax.

Farm Mortgage Section

As we go to press, Henry Morgenthau, Jr., farm credit administrator, according to press dispatches, has appointed nine regional loan agents to carry out the provisions of this section of the Emergency Farm Act.

The bill provides for:

1. Issuing up to two billion dollars of 4% federal land bank bonds the interest of which is unconditionally guaranteed by the government. Such bonds may be exchanged for farm mortgages or the proceeds used for making new loans.

2. Reducing the interest rate on present federal farm loans to 4½% and waiving principal payments for five years.

3. Making loans at 5% on farm lands or property up to 75% of normal value of the property pledged. Limit of loan is $5,000 and principal and interest must be paid pack in 10 years.

4. New mortgage loans shall be limited to 50% of normal value of land mortgaged and 20% of permanent improvements thereon, and in no case shall purchase price of any mortgage exceed its face value.

5. $200,000,000 from Reconstruction Finance Corp. for loaning up to $5,000 to farmers on good security as outlined above.

6. Slow liquidation of joint stock land banks and halting of arbitrary farm foreclosures. The joint stock land banks are permitted to borrow up to $100,000,000 from the R. F. C. to refinance present mortgages. Loans may not exceed 60% of the normal value of farm lands pledged as security.

7. Loans up to $50,000,000 from R. F. C. to refinance encumbered lands in drainage districts, levee, and irrigation districts.

Farmers may apply for loans up to $5,000 on farm property at once through the Federal Land Bank of St. Louis.

Organized Farmers Win Long Battle

President Roosevelt Signs Bill Containing Principles Farm Bureau Fought For Since 1921

A NEW deal for agriculture, victory after a 12 year fight marked by broken political promises, the selfish opposition of vested interests, two presidential vetoes of effective farm legislation, and finally a half-way measure, was realized by the signing of the Emergency Farm Act at the White House. This is a victory for organized farmers, a victory for the Farm Bureau which vigorously led the fight at Washington and kept the issue in the forefront during the most trying period in the history of American agriculture.

The seventy-third Congress and the President have finally given not only American farmers but the nation a law with teeth in it granting ample authority to the administration to restore the buying power of farmers and thereby the prosperity of the country.

Now only aggressive administration of the Act, and the co-operation of farmers, handlers, and processors of farm commodities are needed to make it work.

Weeks before the passage of the Act, the well known views of Franklin D. Roosevelt, and his strategic moves to restore confidence in banks and stop exporting and hoarding of gold, began routing the depression and sending prices upward.

Miracles have been happening at Washington. How different from the dark days of the nineteen-twenties when organized farmers were thwarted time after time in the fight for a reasonable share of the prosperity that finally swept business and industry into a whirlpool of profiteering and speculation never before equaled in the history of civilization.

The Farm Bureau movement launched its fight following post-war deflation which hit agriculture the hardest. It battled to wipe out the disparity between farm prices and non-agricultural prices. In this state, the Illinois Agricultural Association simultaneously waged war against high assessed valuations which did not reflect the terrific decline in farm land values until the I. A. A. demanded and secured substantial reductions.

The Farm Bureau gathered facts and evidence to show that agriculture was being discriminated against, that farmers were compelled to buy in a protected market, pay prices fixed by a high protective tariff, although their staple crops, both that consumed at home and that portion marketed abroad, sold at the low world price.

Industrial prices and prosperity rose rapidly beginning in 1922 and 1923 but the farmer lagged behind because of the indifference of successive administrations and their refusal to strike at the heart of the problem, farm surpluses.

The fight for the McNary-Haugen bill, twice vetoed, ended in the passage of the Agricultural Marketing Act which was supported by industrial and business groups including handlers of farm products. Farmers asked for something more effective, and although skeptical of the value of the measure in raising prices, recognized it as better than nothing, and co-operated whole-heartedly in the laudable policy of government support to farmer-owned and farmer-controlled marketing agencies.

The Farm Bureau continued its fight into the 1932 political conventions on a non-partisan basis, and when Governor Roosevelt took a clear and definite stand in favor of effective legislation to give farmers a square deal, they voted overwhelmingly for him for President.

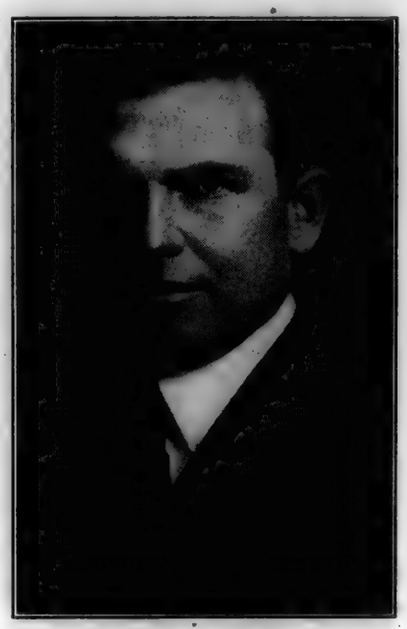
Without effective organization, it is extremely doubtful if farmers would have received any real consideration at the hands of government. The outstanding contribution organized farmers made was to educate not only law makers, but also influential business and industrial leaders about agriculture and the merits of their demands for consideration.

Events of the past few years have eloquently testified to the soundness of the farmers' position. Had the McNary-Haugen bill been enacted and put into operation, many believe the more extreme measures of the present day would not be necessary.

Had national prosperity of the boom years been more evenly distributed and the agricultural population given its fair share, certainly the extreme decline of the past few years would not have gone so far. Millions of dollars were loaned abroad much of which came back through purchases of American industrial products to further stimulate the unhealthy spiral of inflation.

Had farmers been able to store up cash reserves and liquidate debts in the post-war period they might have cushioned the fall of industrial activity with all its attending evils.

Now farmers must continue their organized vigilance so they may offer the administration complete co-operation in putting into action wise measures to restore parity prices for agriculture and with that ultimate return of prosperity to the nation.



A Victory For Organization

The signing of the Emergency Farm Bill by President Roosevelt is the victorious culmination of a 12 year fight of the Farm Bureau for effective legislation to wipe out the discrepancy between farm and non-agricultural prices. The Illinois Agricultural Association took an active and prominent part in this struggle. Previous administrations said co-operative marketing is all you need. Farmers said we want co-operative marketing support but more than that is necessary. We must have equal privilege legislation, an American price for farm products, effective measures to help us dispose of or eliminate surpluses that depress our markets.

President Roosevelt's bill paves the way for a new deal for the farmer. Vigorous administration of the measures permitted under this act will restore farmers' buying power and some of the comforts of life for farm families. The continuous hammering away of ORGANIZATION fighting for a worthy and righteous cause made all this possible.—Editor.

"We Are Going To Raise Farm Prices"

By George N. Peek, Administrator of the Agricultural Act, U. S. D. A.

GEO. N. PEEK

Illinois farmers rejoice in the selection of a fellow Illinoisan and a real champion of agriculture as administrator of the Emergency Farm Act. Mr. Peek, whose home is at Moline, is a member of the Rock Island County Farm Bureau and Illinois Agricultural Association. His driving force and courage, displayed during the long fight for the McNary-Haugen bill, promises an able and vigorous administration of this measure to raise farm prices. Mr. Brand, his co-worker, was former marketing specialist with the Department of Agriculture. He put the finishing touches on the McNary-Haugen bill at the direction of former Secretary of Agriculture Henry C. Wallace, father of Henry A. Wallace. Mr. Brand was banquet speaker at the 10th annual I. A. A. meeting at Champaign in 1925, and will be remembered by many who attended that meeting.

IN ASSUMING responsibility for the administration of the Agricultural Adjustment Act, it is only fair to agriculture, to so much of industry as is affected by its operation, and to the consuming public, to state the principles of that legislation as I understand them and as it is intended to apply them.

CHAS. J. BRAND

In the first place the sole aim and object of this Act is to raise farm prices. Generally speaking, it is to raise them to a point where farm products will purchase as much of industrial products as they did before the war, and to keep farm prices at that level. This is just what farmers through their organizations have been demanding for a dozen years.

To agriculture it should be said that the purpose is not to do something for the farmers. It is to enable farmers to do something for themselves that they have been prevented from doing through many long, painful and distressing years, and that they could not do without this law. It is to enable them to do what all other producing social groups do, and that is (approximately and in the long run) not to produce and send to market more goods than consumers at home and abroad want and have money to pay for.

Unless farmers will work with each other and with government to do that, government cannot maintain fair prices and restore prosperity to them —nobody can. They must help do this particular job. In adopting the law and through the work that will be done under it, the Government goes the limit to help them, but that is the most that it can do or that they in justice and fairness can ask.

To the food and textile industries, I want to make it clear that the spirit and purpose will be to act with as little interference with established institutions and methods—indeed with as little administration of any kind as is consistent with the fixed purpose of the law; namely, to raise farm prices. It is my opinion that much of that purpose can be accomplished by these industries without anything more than the aid that government and agriculture can and will give them.

The first step will be to discuss with industries and trades our purposes, to ask them what they need from farmers and from government, and to call upon them, with the help of those concerned, to work out the difficult task themselves in such manner as will least interfere with their business and established methods, with as little government interference in their affairs as is reasonably possible. But none will be permitted to forget the purpose of the legislation—**to raise farm prices** in the national interest.

To the consuming public it is unnecessary to say that what is to be done is to bring about economic justice — to right a social wrong — which grew up under our economic system in the false theory that the urban half of our population could enjoy the benefits of an artificial, protective system, leaving the rural half largely outside the benefits of that particular device. It seemed to work all right at first, but lately it has resulted in taking the farmer's crop away from him without paying for it. Nobody wants to do that. I am aware of no objection from labor, or indeed from anybody, to this attempt to do what is right.

Agricultural prices are and for a long time have been unduly depressed and ruinously below their fair relation to other prices. Putting them where they belong has the support of all fair-minded people and will not be a heavy burden on any person or class in our country. Agriculture must be restored to its proper place in the Nation's life, not only for the sake of the farmer but for the general welfare.

Upon the request of Secretary Wallace and myself, the President has requested Mr. Charles J. Brand to act with me as co-administrator. Mr. Brand is recognized throughout the Nation by farmers and the food and textile industries as one of our foremost authorities in the marketing of farm products.

In administering this Act, we shall draw heavily upon the advice and assistance of Frank O. Lowden and B. M. Baruch, who have pledged to the President, Secretary Wallace, and to me their cooperation.

1,200 Hear Farm Bill Explained In Grundy

President Smith Expresses Belief That With Vigorous Administration And Co-operation of Producers Measure Will Be Effective

EARL C. SMITH

THE OUTLOOK for agriculture is brighter and more hopeful today than at any time in the past 10 years, President Earl C. Smith told more than 1,200 Farm Bureau members and their guests who came out in spite of a heavy rain to attend a mass meeting in Morris, Grundy county, Wednesday night, May 10.

The meeting was held in celebration of the passage of the Emergency Farm Bill at Washington and to bring latest information to local farmers and their friends from the towns and cities of the county, on the contents and probable operations of the measure.

In addition to discussing the farm bill, Mr. Smith reviewed the economic situation as it affected agriculture before and after the world war, traced the decline of farm income and the terrific rise in taxes, and outlined the legislative program for the relief of the property taxpayers the Association is fighting for at Springfield.

C. V. Gregory, editor of Prairie Farmer, explained the credit sections of the bill, the inflation amendment, and briefly reviewed latest developments in alcohol-gasoline blending legislation.

"The effectiveness of any law depends on its administration and the co-operation of the people it is designed to help," said Mr. Smith in commenting on the farm bill. "With the fullest co-operation of the farmers of America and with vigorous administration from Washington, I have no hesitancy in saying that this measure in time will restore parity prices for farm products and prosperity for the entire nation. It will not only result in farm prices that bring cost of production, but also prices that will restore profits with which to pay debts and buy some of the comforts of life for the farm family."

The purpose of the bill, Mr. Smith explained, is to establish prices for farm products that will give the farmer buying power equal to that he possessed in the period from 1909-1914. He expressed faith in the possibilities of the trade agreement section of the bill under which, for example, it will be possible to control the tonnage of pork marketed by premiumizing earlier selling of hogs at lighter weights, reduce the production of wheat and cotton by cutting acreage and compensating producers therefor, and compelling the handlers and processors of farm products to co-operate toward establishing fair prices and so stop the confiscation of farms through taxation and foreclosure.

A striking picture of what has been happening to the farmer during the past 30 years was presented in figures on farm income and taxes. Net income of American farmers in 1920, Mr. Smith showed, was approximately 9¼ billion dollars. By 1925 it had declined to a little more than 7½ billions. In 1930 it had dropped to around $4,200,000,000 and last year, 1932, net farm income was estimated at only one billion dollars, although national net income was approximately 38 billion. Thus the farmer comprising around 30 per cent of the population received only 1/38th of the national income.

But what happened to taxes during the past 30 years? Total property taxes for state, county, and local government in Illinois outside of Cook county in 1899 amounted to $24,417,020; by 1909 taxes had increased to $39,494,276; in 1919 the downstate tax bill was $89,781,442; and in 1929 property taxes had risen to the enormous total of $144,358,582. In Grundy county, it was shown, property taxes had grown from $187,436 in 1899 to $847,345 in 1929.

The tax problem and its solution alone justifies and demands a strong organization of farmers to head off ultimate confiscation of all property, Mr. Smith said. The public and private debt of the United States has been estimated at 200 billions of dollars which is said to be more than all the wealth of the country. Thus the national debt amounts to around $9,000 for each head of a family, the interest on which approximates the average annual income per family head.

Explaining the important work of the I. A. A. legislative committee at Springfield, Mr. Smith said that 1,500 bills were now under consideration by the General Assembly, 1,000 of which directly or indirectly affect the welfare of the farmer.

Had the emergency relief bond issue not been passed largely through the influence of the Farm Bureau movement, Illinois farmers this year would have paid five millions more taxes, 1¼ millions of which would have been contributed by Farm Bureau members. This alone is more than the total cost of the county, state and national organization for the year by a wide margin.

Farm Bureau members about Tuscola are considering the establishment of a co-operative livestock concentration point there.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

A Victory For Organization

THE Emergency Farm Bill is passed, signed by the President. It began working for farmers, lifting prices, even before its passage because of speculation based on belief in coming inflation. Nearly all, if not all, the principles fought for by the Farm Bureau since 1921 have been enacted into law.

The way has been cleared for reflation, higher farm prices, payment of debts, refinancing mortgages at lower rates of interest, saving farms and homes for their owners, giving new hope to millions. Only lack of vigorous administration of the powers granted and co-operation of farmers in discharging their responsibilities can prevent the realization once more of fair returns to agriculture. With a liberal socially-minded president, with Henry Wallace, Henry Morgenthau Jr., George Peek, and Chas. J. Brand in charge, aggressive administration of the Act is assured.

All this is a victory for ORGANIZATION. Nothing less. These things did not just happen. Organized agriculture **made them happen.** The Farm Bureau led the fight nationally for reflation. Reflation began with the suspension of gold payments by presidential order, and the inflation amendment in the Farm Act. The two are largely responsible for the doubling of farm prices within a few weeks.

Miracles have happened again because there were those who had faith, and backed that faith with organized effort.

Those Gas Tax Bills

TWO principles are involved in the series of bills now pending at Springfield to redistribute state gas tax funds. The I. A. A. is insisting, first, that the state keep its pledge made when the 10,000 mile paved road system was initiated to the effect that on completion of the trunk lines, attention would be given to secondary roads. Secondly, that gas tax revenue gradually be used to reduce and replace levies against property for road and bridge building. The McClure-Hall bills sponsored by the I. A. A. recognize these principles. Other bills do not.

A third principle might be emphasized, namely, that diversion of gas tax funds for other than road purposes be discontinued. The state already has taken $13,900,000 from the motor fuel tax fund to spend elsewhere. Cook county now owes the state approximately $35,000,000, a total of $50,000,000 including 1932 taxes payable this year, and is largely responsible for the diversion of these funds. Such diversion of gas tax funds is a growing menace to the road program and property tax relief. It furnishes another reason for sending this revenue back to the counties, townships and cities expressly designated for road and street purposes.

The thousands located on the 70,000 miles of unimproved roads who also pay auto license fees and gas taxes deserve something. The I. A. A. is fighting for them—not for a paved road past every farm but for gravel or other inexpensive all-weather roads to provide a year round connection with the pavement.

High School Districts

A NUMBER of bills have been introduced in the Illinois General Assembly which authorize under certain conditions the transfer of specified areas in a high school district to an adjacent high school district.

The purpose of this legislation is to correct some of the injustices created during the organization of community high schools. Residents of territory remotely situated from the high school which arbitrarily annexed them are anxious to pull out and join districts where the school is closer.

John C. Watson, director of taxation, is studying these bills at the request of a number of Farm Bureau members. It is at once recognized that any new act will probably not correct the offenses of early community high school land grabs. What is needed is a state-wide plan of redistricting which will take territory out of one district and place it in another high school district where it naturally belongs. Any such action must take into consideration the welfare of the people in the districts affected and obligations incurred in erection of buildings.

Country Life At 50 Months

A RECORD of $1,000,000 of life insurance each month since it was organized early in 1929 or approximately $50,000,000 in 50 months has been achieved by Country Life Insurance Company.

Organized and launched by the Illinois Agricultural Association in February, 1929 to provide safe, dependable protection at minimum cost for the farm families of Illinois, the company has grown in stature and importance until today, according to Manager L. A. Williams, it has approximately one-fifth of all policies in force among the 24 Illinois companies. This record of growth, Mr. Williams believes, has never been equalled in life insurance history.

The wisdom of the Farm Bureau movement in setting up its own life company on a sound basis is emphasized by recent revelations in the life insurance field.

Country Life Insurance Company is controlled and operated by the chosen representatives of Farm Bureau members. It is not a profit-making enterprise. It was founded on the principle of providing a needed service at cost. The moral hazard present in private profit-making enterprises is lacking in this one. No one can get any profits out of the company except the policyholders.

Only one principle guides the officers and management, that is, to make the company serve the farm families of Illinois, offering highest security for their investments and protection for families and estates at minimum cost.

Country Life Insurance Company has kept itself in a position to carry out to the limit its contracts with policyholders. The company is in an enviable liquid condition and will welcome any move to lift the moratorium on withdrawals of cash values. It has an A-1 rating in the insurance world. Country Life represents one of the finest achievements of organized farmers in modern co-operative history. It is a living example of what farmers can do through organization and co-operation to help themselves.

Milk Price Up

THE trade agreement section of the Emergency Farm Act, considered by many the trump card in the new deal for agriculture, is already at work. The price of base milk in the Chicago district was raised to $1.75 per 100 pounds beginning May 15 largely on the strength of this provision. The price of milk was advanced one cent to the consumer but this time the farmer got all the benefit.

A similar move is underway to raise prices in the condensery districts. Processors will be required to co-operate. The purpose of the new farm deal, as Mr. Peek points out, is to **raise farm prices.** That will be good for the entire country. Measures already taken by the administration are proving effective. All indications point to the fact that we are on the road to recovery.

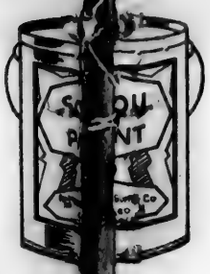
Administering the Act

STATE administrators will be announced shortly by George N. Peek and Charles J. Brand, in charge of carrying out the new Farm Act. Present employees of the U. S. Department of Agriculture will be used wherever possible in the Emergency Agricultural Adjustment Administration. The office force at Washington will be held down to a minimum, and employees will be subject to civil service rules and regulations. Appointments in the field will not be subject to civil service rules except the positions of special county assistants for which an examination will be announced at an early date.

Emphasis is laid on the fact that the majority of the work involving acreage reduction, supervision of trade agreements, etc. will be in the field.

SHELBY COUNTY FARM BUREAU "MAN A MONTH" CLUB

Top Row—H. Bonser, Stewart, Kuhn, Tice, W. Boys, Scheef, Krile, Matthews, Storm, Warner, McGrath, Mitchell.
Center Row—McKinley, McDonald, Baptist, G. Kull, Foley, H. Kull, Lantz, L. Boys, Scott, Smith, Bunning, W. S. Batson, Farm Adviser and Originator of the "Man A Month" plan.
Bottom Row—Hauter, R. Baptist, Anderson, Compton, District Organizer Hornbeek, Parks, Jordan, Ruff, Bonser, Hawk.
Absent Members—Diefenthaler, Lichtenwalter, Renshaw.



SOY

THE introduction of SOYOIL PAINT by the Illinois Farm Supply Company has created a new market for Illinois-grown soy beans. SOYOIL quality is far superior to that of ordinary paint, without any increase in cost. There is a reason for this: the soy bean oil, used in the manufacture of this paint, undergoes special processing and refining. This, in combination with carefully selected pigments, produces a paint that spreads easily, covers well and gives lasting protection with a high gloss finish. Your county service company can supply you with a complete line of interior and exterior SOYOIL PAINTS and ENAMELS. See your truck salesman for further information.

ILLINOIS FARM SUPPLY CO

608 So. Dearborn St., Chicago

OIL

A Century of Progress Paint

THE Illinois Host Building, the State's official exhibit at Chicago's Century of Progress Exposition has been painted inside and out with SOYOIL PAINT.

SOYOIL PAINT is manufactured for the Illinois Farm Supply Company and distributed exclusively through fifty-three associated county service companies.

When you attend the World's Fair be sure to visit this building and inspect this paint.

See Before You Buy

The Illinois Farm Supply Company's new color-card will help you select the SOYOIL PAINT you need for your buildings. It shows the entire SOYOIL line and gives complete directions for applying. One of these cards will be sent you FREE OF CHARGE if you will fill out and mail the coupon. Please act at once; the supply is limited.

Three Sets Of Gas Tax Bills In Legislature

I. A. A. Sponsors Measures To Use Gas Tax To Reduce And Replace Property Taxes

THREE sets of bills providing for the apportionment and use of the three-cent state gas tax are now pending in the legislature at Springfield. One set is advocated by a commission of legislators established by the last General Assembly. Rep. David Hunter of Rockford is chairman of the commission.

The Illinois Agricultural Association is sponsoring another series of bills being handled by Rep. McClure and Rep. Hall in the House.

A third bill is reported to be sponsored by the Illinois Municipal League and was offered by Reps. Doyle and Galvin.

The Commission bill, H. B. 553, would leave one-third of the three-cent gas tax with the State Department of Public Works and Buildings, one-third in the counties as at present on basis of motor license fees, and would give one-third to cities, villages, and incorporated towns. The Doyle and Galvin bills would apportion gas tax revenue in the same way. The McClure-Hall bills, sponsored by the I. A. A., would give one-third of the gas tax fund to counties for state aid roads as at present, one-third to counties for township and road district roads, and one-third to cities, villages and incorporated towns.

The Commission and I. A. A. bills would distribute one-third of the funds to cities and villages in proportion to the population of each municipality. The Doyle and Galvin bills would give the one-third for cities and villages to counties in proportion to motor vehicle license fees to residents thereof to be allotted prior to January 1, 1934 to each city or village in proportion to the population thereof and after that date in proportion to motor vehicle license fees paid by residents of such cities and villages.

The I. A. A. bills would apportion one cent of the gas tax to each county to be distributed to townships and road districts in proportion to total average lawful extensions of road and bridge taxes therein in 1931 and 1932; to be further allotted to each township or road district therein in proportion to the total average lawful extensions of road and bridge taxes in each in 1931 and 1932.

The Commission bill would use the one cent retained by the state for the construction and maintenance of bond issue roads, federal aid roads, highways, belt lines and separation of grades. The Doyle and Galvin bills would use the one cent to the state as provided in the present laws.

The commission bills would have roads built by the counties out of their share of gas tax funds approved by the State Department. The Doyle and Galvin bills would use this one cent for the construction and maintenance of roads and streets subject to approval by the State Department. The McClure-Hall bills supported by the I. A. A., would leave the construction and maintenance of state aid roads by counties as in the present law.

While neither the Commission nor the Doyle and Galvin bills would give any gas tax funds to the townships or road districts, the McClure-Hall bills sponsored by the I. A. A., would apportion one-third of the gas tax revenue for construction and maintenance of all-weather roads or by referendum for paying bonds heretofore or hereafter issued for such construction. Township or road district officials specify the section of road to be improved and the type of construction. The county superintendent of highways must approve such plans and specifications.

The McClure-Hall bills, sponsored by the I. A. A., have for their first consideration the reduction of levies against property for road, bridge and street purposes in the townships and road districts and in cities, villages and incorporated towns. There is no provision for reducing levies against property for road and street purposes in the other bills.

The Commission Bills, H. B. 551 to 559, provide for a county-wide referendum in each county November, 1934, to submit the question of abolishing townships and local road districts and the transfer of such jurisdiction over local roads to the county superintendent of highways. In any county where this proposition is approved the county board is empowered to levy a tax up to 30 cents or by referendum not over 40 cents for construction and maintenance of all state and local roads.

The I. A. A. bills would reduce township and road district taxes by cutting the present maximum of 33 cents to 15 cents, or by referendum to 25 cents. The maximum rate required for the preceding two years to enable any town or road district to secure county aid in building bridges and roads is also reduced to 15 cents.

Would Detach Farm Lands From Villages

Senate bill No. 552 supported by the Illinois Agricultural Association would make it possible for owners of farm lands lying within the corporate limits of cities and villages to disconnect them under certain conditions and thereby escape certain tax levies from which they receive no benefit.

The bill provides that the owner of any tract of land lying within such corporate limits may have the same disconnected if the tract of land: (1) contains 10 acres or more; (2) is used exclusively for agricultural purposes; (3) is not subdivided into lots and blocks; (4) is not located on the border or boundary of the city, town or village; and (5) is not bounded on more than two sides by lands subdivided into lots and blocks.

The owner shall file a petition in the county or circuit court of the county where the land, or the greater part thereof, is situated. The petition must set forth facts in support of such disconnection. If the court finds that the allegations are true, and that such tract is entitled to disconnection under the Act, the tract shall be ordered disconnected.

The disconnection shall not exempt such land from taxation for the purpose of paying any indebtedness contracted by the corporate authorities of the municipalities, but the tract shall be assessed and taxed for unpaid debts as if it had not been disconnected until the indebtedness is completely paid.

Nobody Wants Our Surplus Farm Products

Therefore We've Got To Cut Acreage and Reduce Production Or Else—

FRANKLY admitting the difficulties the administration of the new farm bill faces, Secretary of Agriculture Henry A. Wallace, in an address on May 10 told the Boston Grain and Flour Exchange that the measure could succeed only if farmers, processors, and consumers operated under the measure in a new spirit of interdependence.

The most difficult operation will be that of reducing farm acreage, the Secretary said. "Yet, as you survey the world situation," he added, "and appreciate the prospective demand from abroad for our surpluses, I challenge you to discover any alternative course we might take."

Huge export surpluses would not have bothered us so much before the World War, Mr. Wallace explained, because then we were a debtor nation, and it was possible to move things abroad onto the European market. But today, he continued, we are a creditor nation; other nations want to sell to us, rather than buy from us; and there is no immediate prospect of a substantial foreign demand for our surplus farm products.

Like An Ostrich

"How I wish I could drive that thing home to all the people of the United States," the Secretary exclaimed. "We have hidden our heads in the sand for the last 12 years, refusing to face that fact. It was concealed from us by loaning vast sums of money abroad, $500,000,000 to $1,000,000,000 a year from 1921 up to 1929. Now we have stopped loaning that money abroad, but we have still refused to face in any definite manner the implications of what it means to be a creditor nation.

"I am not accusing any particular group. The farmers do not understand it; the business men do not understand it. We have not learned to act as a creditor nation should. What we really have to do is to change the whole psychology of the people of the United States.

"There is abroad in the land today the feeling that we do not need to face this fundamental fact of a surplus acreage, that inflation is going to keep us from facing it. We do not need to face it, so it is said, because foreign markets are going to be restored by reciprocal tariff agreements. We do not need to face it, it is said, because under the agreement section of the new Farm Bill, it is possible to enter into agreements to smooth out those things that have caused so much trouble.

Reciprocal Tariffs Not Enough

"I am hoping that we will be benefited by the right kind of money control. I am hoping that we will restore a very substantial volume of foreign purchasing power by appropriate reciprocal tariff agreements and wisely administering the trade agreements section of the farm bill. However, as I examine each of those three sources of hope and try to measure them, I feel that there is not enough to turn the trick.

"I do hope that as hard-headed business men, you will not allow yourselves to fall into that contagion which so easily clouds our judgment. We have undoubtedly such an insufficiency of stocks of many kinds that a very real upturn was in the cards, and while we utilize that to the full and keep it going, I trust in the background of our minds we will prepare to take appropriate steps to build a firm foundation to continue it.

Hope In Trade Agreements

"There is an unusual amount of interest in the trade agreements section of the farm bill, I find, among the cotton spinners of both New England and the South. Apparently destructive competition has been almost as remorseless in the cotton textile industry as in agriculture. Under this bill it is possible to discipline that recalcitrant minority which has prevented the entire cotton industry from doing some of the things it has long needed to do. By the terms of the new bill it will be one of the responsibilities of the Department of Agriculture to help the affected industries observe a code of ethics which all believe to be sound, while at the same time the rights of the consumer are adequately protected. It is to be hoped that this can be done in the spirit of cooperation, rather than in the spirit of compulsion."

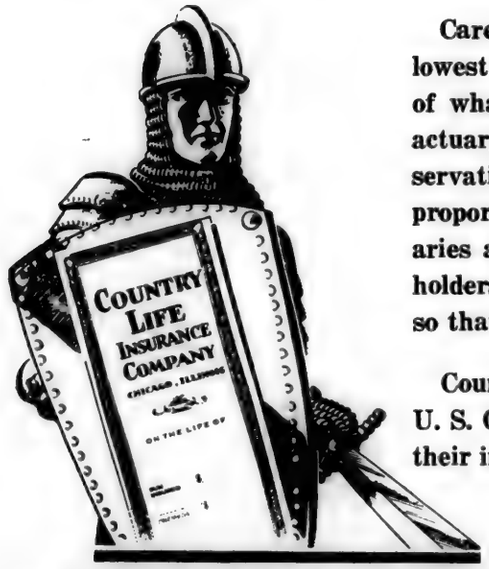
Illinois Farmers May Borrow Up To $5000

Paul Bestor of St. Louis has been selected Farm Loan Commissioner in the new Federal Farm Credit Administration headed by Henry Morgenthau, Jr.

C. W. Carson of Amarillo, Texas has been chosen as assistant and will have charge of the direct loan provisions of the new Farm Mortgage Act. Details of the plan for administering the $200,000,000 made available to the Farm Loan Commissioner through the R. F. C. under the Act are now being worked out. This money will be lent to farmers through 12 offices located in the Federal Land Bank regions. Security required will be first and second mortgages upon real and personal property. Loans are to be made up to 75 per cent of appraised value of property offered as security.

The Act provides that individual farmers may borrow as much as $5,000 at an interest rate not to exceed five per cent annually. Borrowers may use the money for the following purposes: to repay indebtedness, secured or unsecured, of the farmer; to provide working capital for farm operations, and to provide funds to enable any farmer to redeem or purchase farm property owned by him prior to foreclosure which has been foreclosed at any time after July 1, 1931.

Ernest J. Bodman, Federal Land Bank, St. Louis, Mo., has been designated as agent of the Farm Loan Commissioner in charge of such loans for Arkansas, Illinois, and Missouri.



fifty million

On February 1, 1929 Country Life wrote its first Life Insurance Policy. Today, fifty months later, the Company has approximately $50,000,000.00 Life Insurance in force. Since the beginning, Country Life has added to the amount of its insurance at an average rate of a million dollars every 30 days, or about $33,000 every day.

Country Life Has the Confidence of the People It Serves

The fact that Country Life Insurance Company has been able consistently to increase the amount of its insurance while older, better-known companies were steadily running behind in volume as the result of the depression, is proof positive to its policy holders of the strength and stability of the Company to which they have entrusted their savings in the form of Life Insurance Premiums.

Mortality 25%—Dividends Reduce Cost

Careful selection of risks has resulted in Country Life having one of the lowest death rates on record. Last year this rate was less than one-fourth of what reasonably might be expected according to the best available actuary tables. And because Country Life has operated carefully and conservatively, holding its operating expenses to a minimum, its dividends are proportionately greater than those of companies where high official salaries and careless management operate to the detriment of the policy holders. Country Life dividends have reduced the net cost of its insurance so that our policy holders are in a most favorable position.

Country Life's assets are invested in sound securities—many of them U. S. Government issues which offer our policy holders unusual safety for their investment. It is one of the very few companies which, if called upon

COUNTRY LIFE . . . A CONTRIBUTION

in fifty months

to pay the entire cash value of every one of its policies, could do so and still have nearly three-quarters of a million dollars left over.

Country Life Gives Complete Insurance Service

No matter what your particular Life Insurance needs may be, Country Life has a policy that will be of value to you. Its standard contracts include Straight Life, Term Insurance to Age 65, Endowment at Age 65, 20-Payment Life, and 20-Year Endowment policies. It has in addition a 12-Year Term policy available as group insurance to Farm Bureau members and their families. In general, Country Life insures from birth to Age 65.

Country Life Thrived on Hard Times

Country Life is one of the few companies in America, regardless of size, that did not need the insurance moratorium to tide it over the bank holiday and its after-effects. Hard times have been the rule almost constantly since the Company was formed, but there has been no halt in our growth and expansion.

Strength, safety, economy, low net cost of insurance—these are only a few of the advantages of Country Life. The Company's control resting in the Illinois Agricultural Association and the Farm Bureau gives assurance that it will always continue policies which have made it almost miraculously successful.

Country Life Insurance Co.

608 So. Dearborn Chicago

TO THE SCIENCE OF LIFE INSURANCE

I. A. A. Auto Insurance Co. Breaks All Records

All previous records for auto insurance applications were broken during the month of April when the Illinois Agricultural Mutual received 1,472 applications for policies during April and the first seven days of May. Most of the applications were for auto insurance under the surplus fee plan by which the surplus share and premium deposit are waived.

Early reports indicate that a substantial number of the new applicants recently joined the Farm Bureau, probably 10 per cent or more.

Whiteside county led all others in the number of insurance applications turned into the home office. The record for April was as follows: Whiteside, 117; Madison, 77; Cook, 68; Henry, 47; Bureau, 39; DeKalb and LaSalle, 37; Champaign, 36; Kane and Lake, 34.

The 10 high general agents in auto insurance applications for April were as follows: Stanley Castle, Madison, 46; Roy Mitchell, Champaign, 31; Wm. C. Linker, Whiteside, 31; Fred H. Wilson, Kane, 25; Bertram Abney, Lake, 24; A. B. Shubert, Kankakee, 23; Homer Hitchcock, Winnebago, 23; E. B. Young, Montgomery, 21; E. A. Carncross, Cook, J. D. Smith, Sangamon, H. A. Bonser, Shelby, 18.

The 10 high special agents were as follows: Earl Keniston, Whiteside, 16; L. D. Snavely, Whiteside, 13; Ezra McClaughry, Cook, 12; A. H. Booth, Bureau, D. J. Auble, DuPage, and L. W. Wiese, Henry, 11; Loy J. Knox, O. C. Beatty, and L. S. Johnson, Whiteside, and E. L. Wilson, Will, 10.

I. A. A. Men Speak At Stronghurst Meeting

The emergency farm bill and the need for organized action by farmers in solving their problems featured addresses by Donald Kirkpatrick of the Illinois Agricultural Association and L. A. Williams, manager of Country Life Insurance Co. before more than 400 Farm Bureau members and their guests at Stronghurst, Henderson county, the night of May 10.

Mr. Kirkpatrick explained the contents of the new measure which, he said, embodies the principles the Farm Bureau movement has been fighting for over a 12 year period. A group of business men from Burlington, Iowa came as guests of the Farm Bureau seeking further information on the operations of the new relief legislation.

Emphasizing the basic importance of a prosperous agriculture if other interests are to be prosperous, Mr. Williams told the business men that if farmers failed to organize effectively to help themselves maintain a prosperous industry, it would be to the interests of business and industrial groups from a selfish point of view to organize farmers and thereby help place the farm industry on a profitable basis.

How To Market Wool

1. Remove heavy dirty locks before shearing.
2. Shear sheep only when fleece is dry.
3. Remove fleece from animal unbroken.
4. When rolling, spread fleece with flesh side down, fold in from the sides and ends, then roll from tail to neck. Always keep flesh side out.
5. Do not roll too tightly.
6. Tie each fleece separately using only paper twine—never use sisal or hemp twines.
7. Keep burry, seedy, cotted, dead, black and gray fleeces separate from good clear wool.
8. Place fleeces in wool sacks or covered piles.
9. Do not pile nor store in a damp place.

Kankakee Farm Bureau Is Getting Under Way

"The Kankakee County Soil and Crop Improvement Association will soon be known as the Kankakee County Farm Bureau," writes Farm Adviser Geo. T. Swaim in the inaugural issue of the Farm and Home Bureau News of Kankakee county. "We expect that a co-operative organization will control the seed and hatchery business," he says. "Suggestions for the improvement of the organization, the paper, or the activities are open to the membership."

Officers of the Kankakee County Farm Bureau are: President, Len Small; Vice-Pres., Chas. H. Schmidt; Secretary-treasurer, L. B. Bratton.

A. B. Shubert has been appointed insurance manager and W. B. Peterson, manager of the service company. Del George is in charge of the hatchery and Fred J. Osterlee manages the seed department.

Seven Cities Ask For Next I. A. A. Meeting

Springfield, Danville, and Peoria led in the order named when I. A. A. directors finished voting on the place for 1934 annual meeting of the Association at the May board meeting.

Invitations were presented by delegations from seven cities including those above and Decatur, Rockford, Kankakee, and Moline.

"Come to Moline," pleaded Secretary Lydig of the Chamber of Commerce. "'Come out and let the people of the Quad-Cities know what a fine organization you have. Out there where the milk dealers are fighting the producers, they have advertised you as a Chicago group. The thinking people know better, but come out and show 'em. It will have a wholesome influence on everyone."

Otis Kercher, Vermilion county farm adviser, and C. C. Simpson of the Danville Chamber of Commerce extended the invitation for that city. "Eight thousand dollars have been spent on the accoustics of the armory since you were there last," said Kercher.

"It's our turn to have this meeting," said Mr. Coulter of the Springfield Ass'n of Commerce. "You know what we can do."

A cordial invitation to come to Kankakee was extended by ex-Governor Len Small, president of the Farm Bureau, and by Farm Adviser George T. Swaim, and the Chamber of Commerce secretary. Complete coverage of the meeting was promised through the Kankakee County Republican, edited by Leslie Small who accompanied the delegation.

President Dillinger, Secretary Hamilton, and Farm Adviser Fisher of the Macon County Farm Bureau and Mr. McClelland of the Chamber of Commerce presented the arguments for Decatur. Farm Adviser Whisenand and Mike Finn of the Association of Commerce spoke for Peoria, and Farm Adviser Keltner and the Chamber of Commerce secretary for Rockford.

Springfield, it was pointed out, is the most strategic city with ample accommodations for members in the Southern Illinois counties who were compelled to travel far north to Rockford and Peoria the last two years.

Chamber of Commerce secretaries commented that the I. A. A. annual is the cleanest and largest convention in the state. The I. A. A. board will decide on the meeting place after hearing the committee's report at the June meeting.

Talmage DeFrees Heads Illinois Fruit Growers

Talmage DeFrees, I. A. A. director from Smithboro, was re-elected president of the Illinois Fruit Growers' Exchange, at their annual meeting in Centralia on May 10. Seventy-five per cent of the local associations and individual contract holders were represented.

Following the reports of Manager H. W. Day and Fieldman H. W. Cummins, talks were made by Secretary George E. Metzger of the I. A. A. and A. B. Leeper, president of the National Fruit and Vegetable Exchange.

Professors W. P. Flint and R. S. Marsh of the University of Illinois discussed production problems. A. O. Eckert, president of the new Belleville produce market, and L. N. Colp, manager, stated that the new market would probably be in operation June 1. Horace Newell, superintendent of the Division of Standardization and Markets, pledged the full co-operation of the state.

Other officers and directors elected are as follows: Vice-President, R. B. Endicott, Villa Ridge; Secretary, J. W. Cummins, Centralia. Other directors elected are: Prof. J. W. Lloyd, Urbana; Fred Hawkins, Texico; E. G. Kinsey, Centralia; L. R. Allen, Carbondale; L. N. Colp, Carterville; W. L. Cope, Salem; Geo. Adams, West Liberty; Harry Fulkerson, Grafton; Arthur Foreman, Pittsfield; L. L. Anderson, Summer Hill; R. B. Shaffer, Edwardsville; and H. B. Koeller, Godfrey.

Producers Creamery of Champaign Sells Stock

Steady progress is being made in selling stock for the Producers Creamery of Champaign, reports the Champaign County Farm Bureau. The Savoy unit in that county is leading with subscriptions for 40 shares. A plant will be established when enough members are secured to supply at least 850,000 pounds of butterfat annually. This will require cream from approximately 6,000 cows.

The creamery district in the seven counties of the Champaign area contains around 52,000 cows owned by approximately 16,000 farmers.

The quotas assigned by the board of directors to each county in this district are as follows: Champaign county $14,000; Vermilion $7,000; Ford $6,000; Douglas $6,000; Piatt $6,000; Moultrie $5,000; and Iroquois $7,000; total $51,000.

Champaign county had sold 28 per cent of its quota on May 1. The Champaign Chamber of Commerce has endorsed the project and offered to help locate a site for the plant.

PRODUCERS CREAMERY OF PEORIA OPENS FOR BUSINESS

Wilfred Shaw, manager, left, and Fulton Miller of Hanna City who delivered the first can of cream to the new co-operative. The creamery had to buy a new churn the first week of operation to care for the tremendous volume. A total of 119 shippers delivered on the opening day, May 1.

Baseball League Plans Opening Sat. May 20th

More than 20 teams playing in six divisions are scheduled to open the 1933 season of the State Farm Bureau Baseball League on Saturday, May 20. DuPage and Shelby counties have organized teams and will play for the first time this year. The lateness of the Spring has delayed baseball interest and activity and may result in postponement of opening games in several divisions to May 27 or later.

Country Life Rates "A"

Country Life Insurance Company was recently given an "A" rating by the Best life insurance rating agency. Farm Bureau members who own and control the company will be pleased to learn that their high estimate of Country Life is shared by professional life insurance people. This rating was given without the purchase of advertising books, agents supplies, or other forms of petty bribery which recent newspapers report is getting to be something of a racket in the insurance world.

The National Broadcasting Company announces that talks by leaders at Washington will be featured on the NBC chain at 11:30 A. M. central standard time for the week beginning Monday, May 29 and ending June 2.

Latest decisions reached on methods of carrying out the emergency farm act will be explained. Names of speakers will be announced only a short time previous to the broadcasts.

The next American Farm Bureau Federation broadcast on the NBC chain is scheduled for Saturday, June 10 at 11:30 A. M. central standard time. News of Farm Bureau accomplishments throughout the country will be broadcast. A radio tribute to Dudley Myers, former president of the Adams County Farm Bureau, will be read by Secretary M. S. Winder.

Tune in and hear the speaker on the I. A. A. period at 12:45 P. M. central standard time over station KMOX, Monday, May 29. The I. A. A. is furnishing a speaker the last Monday of each month during the noon farm program over the Voice of St. Louis.

Chicago Producers Hits New High In Receipts

During April Chicago Producers' receipts increased 37.8 per cent over the same month a year ago. A total of 721 cars were received by rail and the equivalent of 859 by truck, a total of 1,580.

The Hog Department handled 19.1 per cent of all hogs sold on the Chicago market which represented the highest percentage in Producers' history and an increase of 14.7 per cent over a year ago, although salable receipts on the market fell off 17.1 per cent.

Wool Market Advances Illinois Pool Growing

The National Wool Marketing Corporation recently authorized the Illinois wool pool to advance 13 cents per pound on good grades of wool. The Corporation reported on May 13 that prices have been advancing steadily as a result of depleted wool stocks. "The failure of prices to advance as fast in this market as in producing sections is due to the early sales from non-co-operating farmers at low levels," reports the Corporation. "When stocks of cheaply bought wool disappear, further advances may be expected.

"Buyers have been active in all fleece wool sections. A clip of one-fourth million pounds brought 22½ cents this week in Texas. From 20 to 22 cents has been paid in Montana. In Missouri and northern Texas 21 cents has been freely offered for small clips, while 20 cents is the going price for fine and fine medium combing wool in Michigan, and adjacent territory, and from 20 to 21 cents in Indiana."

Reports from many counties indicate there will be a substantial increase in the amount of wool pooled this year in Illinois.

Smith Heads Conference

President Earl C. Smith has been named chairman of the committee to arrange a program for the annual conference of mid-west Farm Bureau federations to be held July 25, 26, 27 at the Sherman Hotel, Chicago. Mr. Smith will act as general chairman of the conference and will be called upon to deliver the keynote address.

The Emergency Agricultural Relief Bill and its operations will be one of the principal topics to be discussed.

SORTING HOGS FOR SHIPMENT—MACON COUNTY LIVESTOCK MARKETING ASSOCIATION, DECATUR

The co-operative concentration point, nine of which are now operating in conjunction with Illinois Livestock Marketing Association, makes possible selective grading and shipment in carload lots direct to processors or markets where they will bring the most money. Sell your livestock through the Producer Commission companies at the terminals, or deliver to your local livestock marketing association. Only by so doing can farmers hope to gain bargaining power and thereby exercise influence in raising the average level of prices.

500 At Schuyler Meet

"We held our third annual Farm Bureau blow-out last night, April 27," writes L. E. McKinzie, farm adviser in Schuyler county. "We had about 500 present.

"George E. Metzger explained emergency relief legislation and the legislative program of the I. A. A. at Springfield. The rest of the program consisted of 45 minutes of music by Frank Busby and four boys, a poetry box by Laurence Royer and other entertainment."

Gets Check For $25

Unable to secure settlement covering damages following the laying of a pipe line through one of his fields Carl E. Baughman, Macon county, Illinois, appealed to the Illinois Agricultural Association for help.

The I. A. A. Claims Department wrote the contracting engineer who built the line for the Panhandle Illinois Pipe Line Company. A check for $25 was received recently in settlement of the claim.

Booster Club

The Edgar County Farm Bureau announces that 20 members recently joined the Farm Bureau Booster Club. The Club will hold its first meeting on June 6.

Membership cards are being issued. Each member has agreed to secure at least six new Farm Bureau members between now and Dec. 1.

68 County Leaders At Belleville Meet

Organization and publicity problems featured the discussion at the 22nd I. A. A. district conference at Belleville on May 8. The conference attended by 68 Farm Bureau leaders from five counties was said to be the best ever held in the district.

The meeting was called by Talmage DeFrees of Smithboro, I. A. A. director, who arranged the program in co-operation with farm advisers and other leaders in this territory.

Farm Adviser C. A. Hughes of Monroe county discussed "Our Publicity Program for 1933," T. W. May of Madison county told about the "Value of Community Units" in getting information over to farmers.

Following each talk there was a review and discussion led by Farm Adviser L. R. Caldwell of Washington county and J. H. Brock of Bond county. L. B. Eidman of St. Clair county presided.

H. H. Walker, district organization manager, introduced the afternoon session with a talk on organization problems. Secretary George E. Metzger outlined the legislative program of the I. A. A. in the morning session.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 165 So. Main Street, Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rates of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

Road Bills Pass, 58th Assembly Nears End

State Sales Tax Approved in Senate Faces Fight in House, I. A. A. Favors Local Responsibility for Poor Relief

AS WE go to press the 58th General Assembly is rapidly drawing to a close and is expected to adjourn within the next ten days. As in former years, it is faced with another legislative jam with more than a thousand bills in various stages of passage, most of which will get left in the shuffle.

The administration is putting on pressure in these last few days to enact the legislation in which it is particularly interested. Foremost in the administration's program is the two per cent retail sales tax bill and companion measures which distribute the revenue derived from the tax.

The main bill and the companion bills met with considerable opposition in the senate where it appeared for a time that they would not receive the required 26 votes for passage. But at the insistence of the governor according to reports, unwilling downstate members of his party came across, with the result that the bills passed on June 15 by a vote of 26 to 17.

How Senate Voted

The vote was reported as follows:

AYES: Democrats—Boeke, Carroll, Clifford, Gillmeister, Graham, Hickman, Huckin, Kielminski, Kribs, Lee, Loughran, Maypole, McDermott, Williams, Mendel, O'Connell, O'Grady, Shaw, Sieberns, Stuttle and Ward—22; Republicans—Barbour, Leonardo, Roberts and Woods—4. Total 26.

NAYS: Democrats—Behrman, Burgess, Karraker, Lohmann, Mayor, Monroe, Mundy and Penick—8; Republicans—Baker, Benson, Carlson, Ewing, Gunning, Lantz, Mason, Searcy and Thompson—9. Total, 17.

ABSENT OR NOT VOTING: Democrats—Broderick and Kline—2; Republicans—Barr, Huebsch, Paddock, Serritella and Wright—5. Total, 7.

As a result of the determined opposition of the Illinois Agricultural Association to a tax on the bulk sales of farm crops as originally contained in the bill, the senate on June 14 adopted an amendment prepared by the attorney general's office which the administration states will exempt farm products from the tax when sold in the usual course of commerce.

Under this amendment, the administration states, the farmer who occasionally sells corn or small grain to his neighbor for livestock feeding purposes will not be subject to the tax.

Appropriate $25,000,000

The companion bills to the sales tax appropriate $25,000,000 from the occupational tax fund, where sales tax money will be placed, to the Illinois Emergency Relief Commission for unemployment. They also provide that after February 1, 1934, revenue received from the sales tax shall be used to reduce and replace state property taxes.

It is generally conceded that Chicago will get the bulk of the first six months receipts from the sales tax, and many believe that after January 1, 1934, pressure will be brought to bear on the governor to call a special session of the legislature for the purpose of appropriating the balance of the year's tax receipts to the dole.

Policy of I. A. A.

The Illinois Agricultural Association is strongly of the opinion that counties and municipalities should provide their own unemployment relief, President Earl C. Smith announced recently in a public statement. To this end the I. A. A. is supporting a series of bills introduced by Senator Simon E. Lantz of Woodford county to give the cities with over 500,000 population additional taxing power for poor relief, and to give all counties under the commission form of government together with all cities within such counties, additional power to raise revenue.

Counties having the township form of government have had this power many years and through township levies have been taking care of their own unemployed. This series of bills which can be employed either by counties or municipalities for poor relief passed the senate, and at this writing is pending in the house.

For Tax Replacement

"By the adoption of the Lantz bills," said Mr. Smith in a statement released to the press, "all counties and cities will have equal opportunity to take care of their own needy people. The Illinois Agricultural Association still maintains that if a state sales tax is necessary, the revenue derived should immediately be used to reduce and replace property taxes in equitable proportion among all the counties of the state. The I. A. A. has made it known to the governor and members of the General Assembly that it CANNOT and WILL NOT support ANY new revenue legislation unless such legislation provides immediate reduction and replacement of property taxes. We believe that destitute people should be taken care of by the local units of government—that by keeping responsibility for poor relief at home, economy in the admin-

istration of such funds can best be achieved."

This position follows the policy laid down in resolutions passed by the board of delegates at the last annual meeting of the I. A. A. in Peoria.

Experienced legislators say that it is not certain, by any means, that the sales tax bills will be passed in the house where downstate opposition is said to be better organized.

The Road Bills

Of great interest and importance to farmers is the series of road bills sponsored by the Hunter Highway Commission outlining road-building in Illinois for the immediate future.

These bills, as explained in the June issue of the RECORD, were amended by the Illinois Agricultural Association in the House Road and Bridge Committee so as to provide that when the 10,000 mile state paved road system is completed, the state's one-third of the 3 cent gas tax shall be expended on road building and improvement only outside of municipalities which means in rural areas; further that the one-third of the gas tax going to cities and villages shall first be used to build, improve, and maintain the state highways within municipalities which formerly were improved and maintained by the state.

As these bills were originally drawn, it was indicated that the state would spend its portion of gas tax revenue largely in metropolitan areas and was authorized to build and maintain arterial highways within municipalities.

Important Amendments

As amended, no part of the state's portion of the gas tax fund may be spent within municipalities over 2,500 population after January 1, 1934.

The amendments to House Bill 557 inserted at the request of the I. A. A. are of greater importance, however, to the farmers of Illinois. **They declare that each year current expenditures for road purposes shall be equitably distributed among all of the counties of the state.** This bill now provides that as the state takes over additional mileage from the counties into the state road system, estimated at 1,000 miles yearly, such mileage shall be equitably distributed among the different sections of the state. This provision will prevent the concentration of additional state roads in any one section.

The federal government now distributes approximately $3,500,000 annually for federal aid roads in Illinois which the state must match. **Under the I. A. A. amendments this $7,000,000 will be distributed among the rural areas.**

Another I. A. A. provision also of extreme importance is embodied in House bill 1012. This bill prevents further diversion of the state motor fuel tax fund to other than road building purposes. During the past year, state road building in Illinois has been halted because nearly $14,000,000 was removed from the road fund and used for state expenses. This diversion of funds was occasioned by the failure of Chicago to pay its share of state taxes. At this writing it is estimated that Chicago owes the state approximately $50,000,000 including 1932 taxes. This bill passed the senate on June 16 along with the other road measures.

Oleo Bill Vetoed

The Governor vetoed Senator Kribs' bill levying a 10 cent tax on oleomargarine containing imported oils and fats such as cocoanut oil, following an opinion from the Attorney General that the bill was unconstitutional.

Another bill sponsored by the State Department of Health would make it impossible to bring raw milk for human consumption into any municipality having a pasteurization ordinance, from within a five mile zone around city limits. This bill also paves the way for cleaning up pasteurization plants and preventing the spread of undulant fever and other diseases. The measure passed the senate and at this writing rests in the House Committee on Agriculture.

A large number of other bills in which the Association is interested are in various stages of passage. A more detailed report on these will be made by the I. A. A. legislative committee after the General Assembly adjourns.

Horses and Mules Are Coming Back—Robbins

Signs of a horse raising revival in Illinois recall the fact that in 1910 farmers of the state were taking in more than $5,000,000 annually from the sale of surplus horses and mules, according to Prof. E. T. Robbins of the State College of Agriculture.

"In 1910 when Illinois farmers took in more than $5,000,000 from the sale of about 50,000 surplus horses and mules they were doing a good job of farming with about $73,000,000 invested in farm machinery. Farm mortgage debt was only $115,000,000. By 1930 they were paying out money for horses and mules, had more than $160,000,000 invested in farm implements and machinery, and had a mortgage debt of $199,000,000 on owner-operated farms. Many students of the industry believe that part of this increase in debt is a result of farmers failing to maintain their horse stocks."

Heavy Attendance at Farm Bureau Meetings

President Smith and L. A. Williams Address Large Audiences

A MASS meeting attended by an enthusiastic crowd estimated at 1,600 to 1,800 people was held in the Galesburg armory the night of June 2 where President Earl C. Smith discussed state and national legislation of interest to farm people. He outlined economic trends, traced the rise of taxes and the decline of farm income and told what organized agriculture had done and was doing to bring about higher farm price levels and reduce the unfair burden of taxes now resting on real property.

He discussed the Association's policy on the state sales tax elsewhere reported in this issue and talked briefly about other measures of direct interest to farmers before the General Assembly.

The meeting was arranged by the Knox County Farm Bureau. President Harry Gehring presided. Many business men attended. L. A. Williams, manager of Country Life Insurance Co., was the principal speaker at a series of meetings during June in JoDaviess, Stephenson, Lee, Ogle, DuPage and Kane counties.

400 at Stockton

"We had a crowd of around 400 at our meeting in Stockton," reported H. R. Brunnemeyer, JoDaviess county farm adviser. "Larry Williams gave a mighty good account of the organization. His talk was straight from the shoulder and was very well received. The dance after the program, in spite of the heat, was popular and most of the crowd much to our surprise stayed until the end."

Lee County Farm Bureau sponsored a meeting celebrating the victory of farm organizations in passing effective legislation that already has resulted in raising farm prices. More than 500 attended the gathering held in the grandstand on the fair grounds at Amboy. Mr. Williams took full credit on behalf of organized farmers for the legislative victory.

Nearly 600 people turned out for the mid-summer meeting arranged by the Kane County Farm Bureau at Sugar Grove the night of June 16. Mr. Williams addressed the audience on the subject, "The Future of Co-operative Action." He also addressed the annual meeting of Country Life policy holders at Freeport in Stephenson county, the annual meeting of Ogle County Farm Bureau at Oregon, and the annual session of the DuPage County Home Bureau at Wheaton.

Plan Cut In Wheat Acreage

Wallace Announces Application of Domestic Allotment Plan, Await Decision on Corn and Hogs

ANNOUNCEMENT by Secretary of Agriculture Henry A. Wallace that acreage reduction will be applied to the wheat and cotton crops of 1934 indicates that the domestic allotment plan will be relied upon mainly to bring the prices of these commodities up to a pre-war parity basis whereas the trade agreement section of the Emergency Farm Act will probably be used in the case of hogs and milk.

As we go to press, we have seen no official statements regarding the administration's policies, but newspaper reports of a press conference state that benefit payments are to begin September 1, to farmers who sign an agreement to reduce their wheat acreage in 1934 and 1935. The payment will depend upon the amount of the processing tax levied, estimated at around 30 cents per bushel. The date for levying the tax is expected to be announced by proclamation shortly.

It is understood that each state will be allotted a certain acreage from which county and individual allotments will be computed. County wheat production control committees or associations will be formed to see that the plan is carried out. The domestic allotment plan has the advantage, according to M. L. Wilson, wheat administrator, of being self-policing since it will be to each farmer's interest to watch his neighbor to see that he does not put in a greater acreage than the plan calls for and thereby undermine the effort to raise prices.

Pay Sept. 1

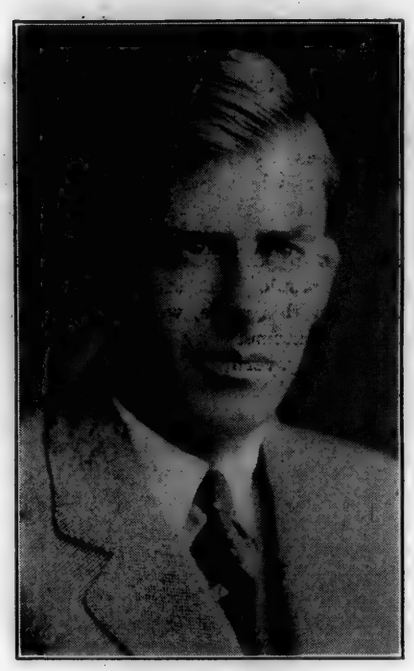
News dispatches announcing developments continue as follows:

"The compensating payments to farmers are to be premised on the farmer's signing a contract to reduce his acreage in 1934 and 1935. Two-thirds of the payment is to be paid the farmer on or about September 1, 1933, and the remaining one-third will be allowed him when he has lived up to his contract to reduce the next planting.

"The basis of allotment of benefit money was outlined by the secretary as follows: Each state will be allotted an amount in proportion to its part of the national average production in the preceding five years. Each county is to be allotted its share on the same basis and each individual farmer will be given his proportionate amount on the basis of his average production in the preceding three years. Only that part of the farmers' produce estimated to represent wheat for domestic consumption will figure in the allotment, however, it being now estimated that that part will amount to about 80 per cent of his crop.

Production Control Groups

"In addition the contracting farmers in each county are to form a wheat production control association, which will supervise operation of the plan in that county. The extension service of the department of agriculture is also to be utilized for this purpose in counties where the number of contracting farmers is too small to warrant formation of control association.



"Operation of the domestic allotment plan, according to the secretary, will serve materially to facilitate the export of American wheat by bringing the exportable surplus more closely in line with the price of the grain in world markets. At the same time, as an adjunct to the domestic allotment plan, the agricultural adjustment administration, created under the farm relief bill, is to make new efforts to expedite the outward movement of wheat from this country."

Conferences Held

A series of conferences with organized producers and dealers representing milk, wheat, and cotton were held during recent weeks both at Washington and at market centers at the call of Secretary Wallace and Geo. N. Peek, farm adjustment administrator.

Representatives of the cotton industry met on June 3 to present their suggestions on the application of the Emergency Farm Act to this commodity.

Charles J. Brand, co-administrator of the Adjustment Act, and Dr. Clyde L. King, arbitrator for the Chicago milk zone, conducted a series of hearings early in June relative to the marketing agreement in the Chicago area.

Henry A. Wallace

Mr. Brand asserted that it is the duty of the adjustment administration under the law to make milk production pay the farmer better, to get milk to consumers without excessive increase in price and see that the distribution system does not get more for its services than it is entitled to receive. "Fairness to the consumer and distributor will be our constant purpose, but not at the expense of the producer," Mr. Brand concluded.

Representatives of the Pure Milk Association, Chicago dealers, and Mrs. W. B. Fribley, president of the Chicago Housewives' League, attended the hearings.

It was announced that when the hearing closes the testimony and statements will be used by the administration to determine whether the Secretary of Agriculture is justified in entering into a compact.

Marketing agreements and price schedules covering five milk marketing areas in Georgia have been filed with the Secretary of Agriculture pending the fixing of a date for hearing. An effort will be made in the Georgia milk area and adjacent regions to work out an agreement giving the producer a better price.

Corn-Hog Administrator

Dr. A. G. Black of Ames, Iowa, was appointed Acting Corn-Hog Production Chief of the Adjustment Administration for an indefinite leave-of-absence period from his duties as head

(Continued on page 12)

Senate Committee Tries To Kill Moratorium Bill

Charges by the Chicago Tribune and others who apparently support indiscriminate mortgage foreclosures, that passage of the moratorium bill now before the Illinois General Assembly would shut off federal farm credit in this state, were denied in a recent statement by Henry Morgenthau, Jr., governor of the Farm Credit Administration.

In reply to a question from the Governor of Arkansas, the latter was informed by Mr. Morgenthau that "the law governing the administration of the land banks indicated no reason for objection to state laws which for a limited emergency period such as two years would empower the courts to grant continuances of mortgage foreclosure sales or confirmation of them, or extend the time of redemption, if the purpose of these statutes is to prevent sales on a markedly unfair and unreasonable basis."

Earl C. Smith, president, and Donald Kirkpatrick, general counsel of the Illinois Agricultural Association, spoke for the moratorium bill, H. B. 579, in the hearing before the Senate judiciary committee. Certain Chicago members led by Senator Ward, the committee chairman, and Senators Graham and Barbour sought to kill the bill in committee, and failing in this prevented passing it out with favorable recommendation by raising the question of a quorum.

The next day Senator Martin Lohmann of Pekin who is handling the bill in the senate, succeeded in his motion to take the bill from the committee and place it on the senate calendar where it now rests in the final passage stage. The bill had previously passed the House by a large majority vote.

The bill is improperly called a moratorium measure because it merely authorizes courts to continue proceedings in foreclosure in the case of worthy mortgagors. It provides for the protection of creditors by virtually making the court receiver for the property, so that rents and income may be equitably applied on payment of taxes and interest. There is nothing mandatory about the legislation. It merely outlines a course of procedure for the guidance of courts. The termination of the length of the continuance, if any, is left to the judge. The bill declares that levy and payment in a foreclosure suit may be stayed for a reasonable time, but no longer than July 1, 1935.

How Farm Land Values Dropped Since 1920

The value of farm lands in Illinois compared with the 1912-1914 value figured at 100 has been as follows since 1920: 1920 @ 160; 1925 @ 115; 1926 @ 109; 1927 @ 99; 1928 @ 96; 1929 @ 95; 1930 @ 91; 1931 @ 80; 1932 @ 66; 1933 @ 54. Trends in other corn-belt states were similar. In the New England States the value of land has been much more constant. Land did not rise as high nor did it sink as low. In Maine, for example the value of farm land in 1930 was @ 142, whereas in 1933 it had sunk only to 94. In the southeastern states, the variation was nearly as large as in the corn belt.

500 Attend Jubilee Celebration in Cook

"Our Jubilee Celebration and barn dance was a great success," reports O. G. Barrett, Cook county farm adviser. "More than 500 Farm Bureau members and their friends attended."

The evening was largely devoted to entertainment with only a few short talks during the evening. The program was arranged to celebrate the passage of the Emergency Farm Act.

"The Farm Bureau, county, state and national, made this legislation possible," said Barrett, "and our members are taking credit for what it already has done to raise prices and bring back better times."

16th District Conference

Farm Bureau members in the 16th district held a conference Saturday, June 7, at the recreation park in East Peoria. The program was largely confined to a discussion of organization and publicity problems.

George B. Muller, I. A. A. director from Tazewell county, presided. Secretary George E. Metzger; district organization manager, R. J. Hamilton; and Farm Advisers, J. H. Whisenand and Wayne Gilbert were scheduled as speakers.

Next Annual Meeting I. A. A. at Danville

The next annual meeeting of the Illinois Agricultural Association will be held next January at Danville, the board of directors decided at their meeting in Chicago, June 16. The I. A. A. held its annual convention in Danville also in January 1929.

Launch Cream Sign-Up In Rock Island Area

Plan To Build Up Production of Local Co-operative Creamery

A MEMBERSHIP sign-up of cream producers preparatory to the establishment of additional cream routes in the Rock Island district is underway, according to Frank Gougler, director of produce marketing. The nine counties in this territory, including Whiteside, Lee, Bureau, Henry, Rock Island, Mercer, Henderson, Warren, and Knox have approximately 19,243 farms which in 1930 marketed approximately 6,500,000 pounds of butterfat.

FRANK GOUGLER

It is planned to haul the cream to the plant of the Farmers Co-operative Dairy Products Company plant in Davenport. The latter is a member of the Illinois Producers Creameries and has been operating successfully since last fall.

"It now requires a total of 219 cream stations in these nine counties to assemble the cream," said Gougler. "The farmer has to pay the cost. The cream station system of assembling frequently results in an inferior product, particularly in hot weather. The producer pays for that. Cream can be assembled by truck cheaper than by stations. The farmer is thus served better, the creamery gets good cream, and as a result makes a higher quality butter."

The Illinois Agricultural Association recently issued a prospectus on the cream marketing project for the use of producers in the Rock Island territory in developing their co-operative marketing program.

The requirements for producers to get more money for butterfat, according to Gougler, are as follows: (1) Large volume creameries for low cost operation. (2) High quality butter made from good cream collected at farm by truck. (3) Farmer-owned plants to reflect prices for higher quality back to producers. (4) Good plant management. (5) A co-operative sales agency to sell their own brand of butter on the best markets. (6) Statewide co-operation for manufacture, sale and purchase of supplies. (7) Adequate capital. (8) The spirit of co-operation. (9) Own test and weights.

Quality Milk Wins Suit At Davenport

Dealers Reported Dissatisfied With Their Leadership, Now Buying Milk From Quality Association

GRADUAL disintegration of the close tieup between the organized milk dealers in the Quad Cities and the "rump" organization which they brought into being, known as the Illinois-Iowa Milk Producers Association, began several weeks ago when the Mississippi Dairy of Rock Island and Midvale Farms of Moline broke away and are now buying milk from the Quality Milk Association. Additional dealers are expected to do likewise.

Distributors who have been seeking to disorganize producer members of the Association received another blow when the justice court at Davenport recently rendered a decision favorable on all accounts to the organized farmers. C. M. Strawman of the I. A. A. legal department assisted in winning the case.

The court held (1) that the Quality Milk Association is a lawful agent of the producers and has a valid contract with its members to receive payment for milk delivered, and may dispense such payment if and when received from the dealers; (2) a membership in a co-operative is not a security and therefore does not come under the Iowa Blue Sky Act; (3) plaintiff (producer, believed to be backed by local dealers) must pay all court costs.

The suit before the Iowa justice was brought against the Association by William Gronewalt, a producer, to collect $9.93 covering milk delivered to one of the contracting dealers during the last few weeks of January. The Quality Milk Association had a contract with the dealers up to February 1 when the latter refused to renew and instead entered into a contract with the "rump" organization in Iowa for their requirements.

The dealers thereupon refused to pay Quality Milk Association for milk delivered by member producers during the two weeks' period, in defiance of their contract. As a result Quality Milk could not pay its members.

The court in its decision showed that the producer, Mr. Gronewalt, under an agreement had appointed Quality Milk Association as his agent to sell his milk and collect the payment therefor.

The court said: "I construe the agreement to be a contract of an agent (Quality Milk) of the producer (plaintiff, Mr. Gronewalt) with the distributor. The intention of the parties as disclosed in the agreement was that the Quality Milk Association will be recognized by the dealer as a sales agent for the milk producers. Therefore a principal (plaintiff Gronewalt) cannot sue his agent (Quality Milk Association) for money that the agent has not received from the distributor.

"In other words I am of the opinion that the agreement was an agreement between the distributor and the agent of the milk producers to accomplish the act of collective bargaining. The contract disclosed that Downing (dealer) was to pay Quality Milk Association as the plaintiff's agent—'all milk producers supplying him with fluid milk shall be paid through the offices of the Quality Milk Association!'

"I am therefore deciding the case that the farmer producer cannot recover a judgment against his agent for money that the agent has not yet received from the distributor.

"Regarding the plaintiff's claim for a refund of $4 for a membership please be informed that I made a thorough search of the Iowa Blue Sky Law and was unable to find any authority to classify the membership in a co-operative company as a 'security.'

"Therefore under the Blue Sky Law a person cannot recover the consideration paid. The defendant (Quality Milk) then being a foreign corporation not licensed to do business in Iowa could not maintain a suit in court to recover the price of a membership. The membership once having been paid, I find no authority authorizing the purchaser to recover the price of the membership since the membership is not a security."

Mr. Gronewalt, the plaintiff, also subscribed for a share of stock in the co-operative creamery of the Quality Milk Association's subsidiary at Davenport for which he gave a note of $12. Then he filed suit to collect the $12 subscription, although the note had not been paid. On this point the judge said: "Regarding the plaintiff's claim for $12 as the value of his note held by the defendant, and the claim as amended for the return of the note, please be informed that a note is a security as defined in the Blue Sky Law, but the plaintiff has not paid the note therefore he cannot recover the price thereof. The plaintiff did not buy a note, he executed and delivered a note. Again, the plaintiff has a valid defense to an action on the note because the defendant was not licensed to do business in Iowa at the time of the transaction.

(Continued on page 9)

A Lesson In Organization

Organized milk producers numbering more than 500 adjacent to the Quad Cities refused to accept defeat when the organized dealers last winter sought to shut them off the fluid market by purchasing their milk from a "rump" organization of outlying producers in Iowa which they set up.

The Quality Milk Association representing the regular producers for the local market began developing their own fluid milk outlets. The members stuck together although it meant a sacrifice temporarily. The organized dealers then waged a newspaper campaign against the Quality Association, and the Illinois Agricultural Association for the aid given its members in that area. An effort was made to prejudice the public against the Quality Association, its members, and dealers friendly to the latter's cause.

Battling against odds, the Quality producers maintained their position and the right of collective bargaining. The recent court decision outlined in the accompanying article upholds the Association and deals a blow to efforts of certain dealers to hurt the organization by illegally withholding payment for milk.

In efforts to obtain fair prices and equitable laws, farmers may receive temporary reverses but they can win eventually by standing together for their rights. ORGANIZATION alone makes victory possible.—**Editor.**

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*

Published monthly by the Illinois Agricultural Association at 105 So. Main St., Spencer, Ind. Editorial Offices, 608 S. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Industrial Control Bill and Agriculture

PASSAGE of the industrial control bill by congress just before adjournment makes it imperative that the emergency farm act be aggressively administered and that farmers co-operate in whatever steps are found advisable to raise farm prices.

The industrial control bill has for its purpose the stabilization of industrial prices at profitable levels with government aid—also reemployment and the raising of wages. This indicates that farmers will have to pay more for manufactured products if the bill succeeds in its purpose.

There is evidence to support the belief that the better organization of industry with control in fewer hands, will enable it to attain a larger measure of success than agriculture in establishing profitable price levels. Some brances of industry have been able to do this without government aid. This much is certain, however. Increased prices will restrict sales and defeat re-employment unless purchasing power, including the farmer's, rises as industrial prices advance.

It is important to agriculture that the unemployed be put back to work so they can buy more meat, milk, butter, eggs, fruits, vegetables and other products of the farm. Both labor and industry have stood in their own light by their resistance and reluctance to accept reasonable cuts. This has prolonged the depression by preventing a free exchange of goods and services between the farmer and these other groups. The necessity for striking the proper balance in the new economic planning is emphasized by past and current experiences. Only by so doing can the new ventures succeed.

Grain Trade Propaganda

MANY farmers elevators in line with most business institutions have suffered losses during the last two years. This reflects economic conditions affecting agriculture and, in fact, the entire country. Shrinkage in inventory of grain and supplies, and slow collections have been largely responsible. Then too, the volume of grain and supplies handled by many elevators has shrunk. Farmers' unwillingness to sell at unreasonably low prices and their inability to buy are the cause.

Grain trade propagandists have seized upon this situation like a drowning man grasping for a straw. They have named several elevators affiliated with the Illinois Grain Corporation which they allege suffered losses during the last year, whereas it was asserted they formerly made money. Their affiliation with the state co-operative was held to be responsible for the losses.

Of course this kind of reasoning is absurd but so is much of the cheap propaganda of the "trade" against the co-operative efforts of farmers who are trying to better their condition.

Charles Schmitt, president of the Beason-Skelton farmers elevator in Logan county answers this charge most effectively by pointing out that "the report of Manager Keys and the audit show that the company had a very successful year with net earnings of $5,459.62. Our company was one of the first to become a member of the Illinois Grain Corp.," continues Schmitt. "The stock we purchased in the Illinois Grain Corporation three years ago has not only paid 7 per cent during the entire period but our company received a cash patronage dividend from the corporation last year amounting to $941.66."

Let's Be Alert

AN important service of co-operative marketing institutions many farmers overlook is their influence in forcing private traders to bid up for farm products. It is entirely possible for a co-operative association that is operating conservatively, to be outbid by a private buyer or commission man, particularly if the latter wishes to make capital out of the high price offered, to destroy farmers' confidence in their own agencies. Let's be alert and not out-generaled by these tricks of the trade. Some co-operatives have been destroyed by such tactics to the everlasting sorrow of farmers who unwittingly contributed to their downfall.

THE fact that a number of state farmer elevator associations have drifted into the hands of mere propagandists against farmer-owned and farmer-controlled marketing in the terminals is a reflection on farmers' elevators everywhere and an outrage upon the co-operative ideals of those who pioneered in the movement.

Farmers' elevators together with township and county mutual insurance companies represent the first successful achievements of farmers in the co-operative field. These service institutions were organized to meet a definite need. They blazed the trail in farmer co-operation and thereby rendered a great service.

The first farmers' elevators came into being more than a half century ago to correct abuses in the handling and grading of grain, and in the purchase of feeds and commodities, at country points. They demonstrated that with competent management and adequate capital, farmers can succeed in reducing the cost of assembling and shipping grain and handling certain supplies. Early successes in this field developed the necessary self-confidence and leadership to bring about further achievements in the co-operative movement.

So it is that many leaders in the terminal grain co-operatives of today secured their training and knowledge to fit them for the larger tasks from their experience in working through local elevators in their home communities. Such men as President Huff, Webb, Johnstone, Peterson, Horn, Hague, and Maddock of the Farmers National Grain Corp. directorate, have served as officers and directors in local elevators.

Likewise in this state the directorate of Illinois Grain Corporation is composed of former or present farmer elevator officers and directors, a number of them such as J. C. Sailor, Geo. L. Potter, E. H. Stevenson, and others, pioneers in the work.

The terminal co-operatives already have demonstrated that there is just as much, if not more, opportunity to render a great service to grain producers at the big markets as at the country points. Therefore it is inconceivable that anyone thoroughly sold on the co-operative idea should hold that the local farmer elevator is all right, whereas the terminal co-operative is all wrong. Yet this is exactly the position held by officers and employees in two or three so-called state farmer grain dealers associations. The inconsistencies of the situation do not seem to bother them. A searching investigation of the reasons for the close connection between the individuals operating such associations, and the grain trade, undoubtedly would develop much interesting information.

The state elevator associations in the northwest, we are told, have degenerated into mere "paper" organizations, without a substantial following. Certain elements in the grain trade apparently have seized these derelicts, manned them with their own hirelings, and now use them to fire broadsides of propaganda against the grain co-operatives in the central markets.

Thus it has been made to appear that farmers are divided in their support of real co-operative marketing. And in reality many sincere grain producers and local elevator boards have been so confused by the malicious and baseless charges against the Farmers National Grain Corporation and its member stockholders that they have hesitated to support the institutions which were expressly created with the friendly assistance of government to help them.

In time, of course, the fabrications of these enemies of the grain producer will fall of their own weight. The atmosphere will clear. The continued growth of the co-operative movement is an indication that this is now coming to pass. The constant demonstration of successful handling of grain by the big co-operatives breeds confidence in itself.

The lesson to be learned from the activities of these renegade farmer elevator associations which work against the real interests of grain producers is that in too many instances boards of directors have ceased to direct. This situation is not confined to farmer boards. In a recent decision, a New York judge held the directors of the International Match Corporation liable for the mishandling of the finances of that organization although they pleaded ignorance, therefore exemption from the consequences of their employees acts. "Boards of directors are supposed to direct," said the judge.—E. G. T.

The Trouble With Hogs

American hog farmers are beset with an excess production problem because of a severe contraction in their export outlet says the Bureau of Agricultural Economics. Where the American hog farmer averaged 20 foreign customers for pork in the 1926-29 period, he had only eight left in 1932. And where he had 40 foreign customers for lard during this same pre-depression period, he had less than 30 in 1932.

The shrinkage in exports during the past year alone was equivalent by weight to approximately a half million market-weight hogs. And the difference between exports last year and our record peace-time exports in 1923 is equivalent to about 8,000,000 hogs. In other words, the decrease in annual exports since 1923 is equivalent to one hog out of every six hogs in the Corn Belt farm feed lots this year.

Germany recently raised the tariff on lard to $9.40 per 100 pounds. Previous to February, 1933, the tariff was only $1.08.

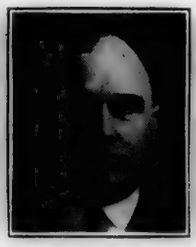
Quality Milk Wins Suit

(Continued from page 7)

"Judgment is therefore rendered in favor of the defendant against plaintiff for costs herein assessed at $12.70."

The effect of the decision is to outlaw further efforts by friends of the dealers to collect money from the Quality Milk Association until dealers have paid the Association for milk delivered during the two week period.

Reports from "rump" organization members indicate general dissatisfaction due to the fact that they received only 79 cents per cwt. for milk, although 75 per cent of their deliveries were reported sold in the fluid milk class. On the other hand the Quality Milk Association which marketed only about 25 per cent of its production locally as fluid milk through the Sturtevant Company, Midvale, Mississippi Dairy and others, paid producer members 84 cents per cwt. by developing an attractive outlet for surplus sweet cream.



In has been reported that the bottle exchange of the of the dealers assessed all members $25 each to fight the Quality Milk Association and that an additional assessment of $15 was made on a second appeal for funds.

Producers point out that when milk was retailing in the Quad Cities for ten cents per quart farmers only realized an average of $1.00 per cwt., whereas milk is now retailing at six cents and the Quality Milk Association has been able to pay its members 84 cents per cwt.

YOUR SALES ORGANIZATION HONORED

These agents of Country Life Insurance Company, who qualified in recent contests, are largely responsible for the Company's record of Fifty Million dollars of insurance written in Fifty Months.

L. A. Williams, Manager

Net Farm Income For '32 Estimated $1,302,000,000

Income Fell Short More Than Billion Dollars of Paying For Labor of Family

A decline of nearly $6,800,000,000 in gross farm income from 1929 to 1932 or about 57 per cent is estimated by the Bureau of Agricultural Economics. Gross farm income in 1932 was $5,-143,000,000. The net farm income after production expenses were deducted was estimated at $1,302,000,000 for 1932.

Farm income last year was the lowest in 23 years. The most drastic decline in expenditures by farmers was for machinery, building materials, and fertilizers.

The Bureau points out that "income available for farmers' capital, labor, and management last year provided no return on investment, and fell short by nearly $1,200,000,000 of paying the farm family for their labor even at the reduced wage rates for hired labor."

There was a sharp reduction in the inventory value of farm capital. All land and buildings which had a value of about $48,000,000,000 in the spring of 1929 were down in value to about $37,000,000,000 in 1932. The value of livestock on farms during this interval declined from about $6,600,000,000 to about $3,500,000,000.

Gross income from dairy products declined less than that for any other major commodity. Expenditures for farm machinery, tractors, and repairs in 1932 were only about 16 per cent of 1929, and for automobiles and trucks only 15 per cent.

The ranking of the principal lines of production in gross value for 1932 was as follows: milk, poultry and eggs, hogs, and cattle and calves. Among the crops vegetables ranked first, cotton and cottonseed second, fruits and nuts third, and grains fourth.

Scott Got His Fence

"The railroad recently repaired the fence along my farm thanks to your help," writes E. B. Scott of DeKalb county in a letter to the I. A. A. Transportation Department.

Mr. Scott tried unsuccessfully for several months to get the Chicago Great Western to repair the fence but without success. Then he appealed to the I. A. A. which secured immediate attention from officials of the company at Chicago.

McLEAN COUNTY SERVICE COMPANY'S NEW SERVICE STATION AND GREASING PALACE

This modern filling station located just off the square in Bloomington was opened May 27. The first two days it sold 8,500 gallons of gas, 125 gallons of oil, greased 42 cars, and had 57 oil changes. Manager Geo. Curtiss, and C. W. Ward, sales supervisor for Illinois Farm Supply, believe this to be one of the outstanding stations in Illinois.

Plan Cut in Wheat Acreage

(Continued from page 5)

of the agricultural economics department at Iowa State College.

Dr. Black will assist with the formulation of initial policies for applying the Agricultural Adjustment Act to corn and hog production and marketing problems. He will collaborate with Guy C. Shepard of Evanston, Illinois, chief of meat processing, who is in charge of trade agreements in the field of processing and distribution of packing house products.

Black has made an extensive study of corn and hog production in the Corn Belt during the past few years. He is a graduate of the University of Illinois and was born near Peoria.

General William I. Westervelt of Chicago has been appointed Director of Processing and Marketing, which completes appointments for the two main divisions of the Administration set-up. Chester C. Davis occupies the comparable position as Director of Production.

General Westervelt is a West Point graduate and has served in a military capacity for more than 25 years, rising to the rank of Brigadier General. Since 1927 he has served as research director for Sears, Roebuck, and Company at Chicago.

Here Is Procedure

The method of procedure for conducting hearings on proposed marketing agreements between producers, processors and distributors was recently outlined as follows:

1. Reading of proposed marketing agreement without comment.
2. Appearance of those who favor the establishment of such a marketing agreement.
3. Those who are opposed to the setting up of such an agreement.
4. Persons favoring detailed provisions of the agreement.
5. Persons opposed to specific provisions, or urging additions or changes.
6. Supporters of the agreement concluding with replies to those desiring changes or additions in the proposed agreement.

The Secretary of Agriculture will tender the decision for or against the proposed agreement within a reasonable time.

News of the progress being made toward the goal of the Emergency Agricultural Act and the restoration of the purchasing power of basic farm commodities to pre-war levels, was scheduled to be broadcast over the NBC chain on the National Farm and Home Hour program daily and Sundays throughout the last half of June.

These programs featuring men in charge of the Adjustment Administration will come on the air at 11:30 A. M. central standard time. Among the leaders who are to appear in the broadcasts are George N. Peek, Charles J. Brand, M. L. Wilson, and Cully Cobb.

Technical advisers to the Administration will also be heard.

Some Facts About Marketing Wool

By Ray E. Miller

WHAT the wool grower wants most are higher prices for wool and lower marketing costs. Higher prices can be obtained by growers through selling collectively and retaining their bargaining ability. Lower costs can be secured by growers selling collectively, thus increasing their volume and decreasing their per unit cost whether that cost be freight, storage or grading, and national, state or local handling charges. What's true of wool marketing is true in principle in the marketing of livestock, cotton, produce or beans. True, volume control will not fix prices but it will help to determine prices and is very instrumental in determining marketing costs.

RAY MILLER

No matter how much we may blame others for the prices of farm products, part of the blame for low prices and certainly a lot of the blame for the high costs of marketing farm products rests squarely on the shoulders of farmers themselves. During the last ten or fifteen years particularly, cooperative marketing machinery has been set up by the more progressive groups of farmers to handle practically all kinds of farm commodities. When judged fairly it can be truthfully said that they have been highly successful. They have demonstrated their ability to affect prices, they have reduced marketing costs or have increased the amount of service rendered. In spite of these facts, there are still only a small part of the growers who are taking advantage of the opportunities open to them. These non-cooperators are not only standing in their own light but they are preventing by their indifference or opposition, other growers from securing the benefits possible through cooperative effort.

Here's What Happened

Take the 1933 wool pool as a specific example. Prices opened around 8c or 9c a pound. The Illinois Livestock Marketing Association started the season with a cash advance of 7c. A great many growers sold out because the price looked higher than it did last season at shearing time. Others, of course, sold because of their urgent need for cash. Prices have continued to advance but unfortunately a great deal of the Illinois clip was sold to buyers at prices ranging from 10c to 15c per pound. Others who held off longer have received more. The Illinois Livestock Marketing Association is advancing 16c per pound, twice as much as a great many growers received for their wool early.

The situation affords a striking example of what the wool growers of Illinois could have saved had they had a little more faith in their own ability to market their own product. We produce in Illinois about 4,000,000 pounds of wool. The growers of the state have easily sacrificed an average of 10c a pound because of the vast number who sold early at ridiculously low prices.

In other words about $400,000 has passed from the pockets of the wool growers to the pockets of the dealers simply because the growers did not use the key which reposes in their own hands, namely, ownership of their own property and the right to market it in any way they choose.

This Is More Serious

As serious as this is it is not the most important part of the picture. The $400,000 which Illinois growers have sacrificed is but a fraction of the net losses resulting from this disposition to cash out at the first opportunity. The buyers who have gotten possession of this wool at low prices are in a position to offer it on the Boston market at less than its present value and still make a handsome profit. No matter how efficiently the National Wool Marketing Corporation may operate nor how skillfully its salesmen may endeavor to mark up their prices in accordance with current values for wool these low priced wools hang like a pall over the market.

If the National asked 30c for Illinois wools there are plenty of wools that have been bought by independent buyers that can be sold at 28c with substantial profit to the purchaser. Thus, the wool grower himself by attempting to match his wits against the experience and superior market information of the buyer has not only deprived himself of a legitimate price for his product but he has contributed to a market condition which prevents all growers from getting fair values for their product. There is only one answer to this situation and that is the united effort on the part of the growers themselves to develop their own marketing machinery.

Private Buyer vs. Co-op.

Someone asks "What's the difference between the private buyer and the cooperative?" That question can be best answered by quoting the reply of an Illinois wool buyer when asked how he determined what to pay for wool. He replied, "Well I read the Journal of Commerce and the Boston wool market and then I start out to buy it as cheap as I can. If some competitor forces me to raise my price I have to raise it, but I don't raise it unless I have to." Contrast this with the policy of the cooperative. Instead of paying the producer of wool, livestock or cotton as little as they can, they pay him as much as they can. Which system holds the most promise for the producer?

The pooling plan of marketing has certain fundamental weaknesses which we shall probably never get away from. In the first place most growers expect the average seasonal prices to be equal to the highest price that is paid for the commodity at any time during the entire season. This is, of course, impossible. If all growers sold or attempted to sell at the peak period no peak period would appear at that particular time. It is easy to look back and see when the peak period was, but it is impossible to look forward and determine when the peak period will be.

Grower Usually Easy Prey

If the individual grower has or feels that he has more knowledge of the markets than the professional dealer in any commodity and if he has no interest in the building of a permanent selling agency under producer control perhaps he is justified in selling as an individual. But if the grower is willing to recognize that he is at a disadvantage about nine times out of ten when he attempts to match his information and experience in selling with that of the professional dealer, and if he does not have any interest in building a permanent selling organization operated on a policy of profits to growers instead of profits to purchasers, then he should participate in the pooling plan of market-

Hear Watson On Tax, Road Bills in 17th

Prof. Case, Cherrill and Others Speak at Bloomington Conference

THE chief concern of the Illinois Agricultural Association is to insure that any new revenue legislation proposed at Springfield contain features similar to those in the previous sales tax bill providing for replacement of property taxes, John C. Watson, director of taxation, told Farm Bureau leaders attending the 17th district conference at Bloomington May 27.

E. D. LAWRENCE

Mr. Watson called attention to the fact that unconstitutional features of the previous sales tax bill were placed there originally without any effort on the part of the I. A. A. He also reported on the progress of the bill now being sponsored in the legislature which provides for a property tax on income from intangible property. As this is written this bill has passed the senate and lies in the House Committee on Revenue. The revenue received from the application of this measure will go to all taxing bodies that receive the general property taxes, and the regular tax rates will apply.

Other Legislation

Mr. Watson also reported on other measures including road bills, and explained the amendments which protect the interests of farmers in future road building. He explained that the I. A. A. is backing the revenue amendment to give the legislature broad powers toward developing a new system of taxation.

Prof. H. C. M. Case of the Illinois College of Agriculture, discussed the farm mortgage situation and the plans of county debt conciliation committees. He showed that the total farm debt tripled during the period 1910-1928 and now totals about $12,000,000,000. About 40 per cent of the farms of the country are mortgaged with an average of about $15,000 per farm. In Illinois the average mortgage indebtedness on farms that are mortgaged is about $7,500, the annual interest payments on which total about $500,000,000.

S. C. Cherrill of the Illinois Livestock Marketing Association pointed out that a large proportion of the livestock grown in the United States is processed by comparatively few firms and that sales are made on the terminal markets by a large number of commission men. This situation, he said, results in a market where the chief advantage rests with the buyers. The large processors have an organization operating in all the large market centers. Thus they are able to take advantage of the situation and buy livestock at the lowest possible price. In order to compete, farmers also must have a large organization to give them bargaining power. It should be so set up that it will be possible to co-ordinate selling operations on the various markets and raise low spots existing on any day.

Cherrill discussed the direct marketing problem and showed how the State Marketing Association is attempting to meet it by the organization of co-operative concentration points.

A. B. Culp told what community information committees were doing in many counties and called attention to the influence of this work on membership.

Forrest Fairchild, manager of the Farmers Co-operative Creamery stated that the local plant had been operating at an annual rate of 1,600,000 pounds of butter during the last two weeks. He said it would be necessary to install another vat and also an additional churn, and to operate at least 20 hours daily to manufacture the large quantity of butterfat being received.

The conference was presided over by Director Ernest D. Lawrence. W. F. Purnell of Ford county acted as secretary. After the meeting the group inspected the Bloomington concentration point operated by the Illinois Livestock Marketing Association.

Settle For $100 More Than Original Offer

A settlement for $175 to cover loss of a two-year old colt, injury to two other horses, and veterinary fees, was secured by the I. A. A. Claims Department recently for Albert Charlier of LaSalle county recently.

The above sum is $100 more than the original offer of the railroad company to Mr. Charlier.

Two colts and an older horse broke through the defective railroad fence along the right-of-way and were hit by a passing train.

Wool Marketing

(Continued from page 13)

ing and other cooperative enterprises.

There will be some seasons in any pooling plan of marketing when some individuals will get more selling on the outside than they would in the pool but on the average the man who will market his wool through a pool whether in Illinois or any of the other states where pools are conducted, over a period of ten years, will secure more dollars through the pool than he will selling as an individual. Not only that, but constant pooling on the part of a majority of the growers would raise price levels for everybody and reduce marketing expense.

The 1932 Pool

In 1932, especially, at shearing time prices for wool were very low. This condition continued for a period of two or three months. In some counties wool was sold for as little as 5c per pound. In other counties buyers refused even to bid on the commodity. Last year the Illinois Livestock Marketing Association made a cash advance of 7c per pound. Final returns resulted in a net to producers of good wool of around 9c per pound. Most of the 1,300 consignors in last year's pool were well satisfied. There were a few, particularly those who had fine wool or burry wool, who were dissatisfied. There were some who could have got more money outside of the pool than they did in the pool but on the whole the 1932 Illinois wool pool resulted in higher prices to the wool growers of Illinois and contributed somewhat to supporting price levels in general.

There have been few seasons in which the circumstances were more favorable for the cooperative plan of marketing wool than they have been in 1933. A tendency on the part of the growers to withhold their wool this season would have actually resulted in increasing returns to Illinois farmers of approximately a half million dollars. We always hear about the cases when the cooperative gets less money. It would be refreshing to hear from some of these same persons who got 8, 9 and 10c, this year when they could have secured much more cooperatively.

There is a valuable lesson to be learned from our experience in wool marketing in 1933. It merely furnishes further evidence of the fact that the producer holds the key to his marketing problem. Acting collectively he can answer to his own advantage the problems of price and marketing costs. Acting individually he never can.

Moving Grain By Truck And Water

Farmers Elevators Can Meet the New Situation by Providing Patrons With Trucking Service

INCREASING use of the motor truck, and prospective expansion of waterway service, in the transportation of grain, not only has aroused considerable discussion in Illinois and other states bordering the Mississippi river, but has led a few persons with private axes to grind to lay down a barrage of misinformation upon country elevator managers.

The purpose of this tirade obviously is to check the development of national co-operative grain marketing. That this effort has signally failed is indicated by the tremendous growth during the last year of Illinois Grain Corp., and other stockholders in the Farmers National Grain Corporation.

The statement has been made by Lawrence Farlow of the Illinois Farmers Grain Dealers Ass'n. that the development of truck and waterway transportation has been inspired by the grain co-operatives with the intent to destroy the business of farmers' elevators. To any one of intelligence the statement is as false as it is ridiculous. For years the use of trucks in hauling freight of all kinds, including livestock, has been steadily increasing. During 1932 trucks hauled more than 40 per cent of all receipts at seventeen principal livestock markets. Similarly, for many years waterway transportation, lake and river, has been used out of leading terminal markets such as Chicago and St. Louis, with railroads participating.

Another Charge Nailed

It has been further stated that because of humid atmospheric conditions grain shipped south was subject to hazards that the country elevator manager could not afford to risk. As a matter of fact, the atmospheric conditions have not offered any serious obstacles to skillful handlers of grain. Of more concern to the country elevator manager and Illinois grain grower, however, is the fact that grain purchased by Farmers National Grain Corporation has been settled for on point of shipment grades, so that regardless of deterioration in shipment, the elevator manager is paid for the quality of corn he delivers.

One of the definite objects of the co-operative marketing movement is to bring to farmers the benefit of every possible saving in the costs of getting their products from the farm to the market. One of the principal items that enters into these costs is transportation, for which the farmer pays. Farmers National Grain Corporation moves grain from points along the Illinois river to New Orleans as cheaply as it could be moved from point of origin to Chicago. In export years, through a movement of this kind, the national co-operative places the grain in a position where it has only the ocean rate between it and the world market, whereas had the grain moved to Chicago, it would have between it and the world market not only the ocean rate but the inland cost of transportation from Chicago to tidewater. In many instances this adds sufficiently to the cost of the operation to prevent our entry into the world markets.

The Farmer Benefits

Delivered prices to any destination are calculated on the cost of the grain, plus insurance and transportation, therefore any saving on transportation increases the possibility of larger volumes of business. This is desirable from the standpoint of the producer, because it enlarges his outlet for grain and lessens the chances of burdensome surpluses at the terminals. From the standpoint of the co-operative, it means lower handling costs per unit by reason of the increased volume. These savings result not only in higher price levels at country points, but in increased earnings of the co-operative and increased dividends to co-operative membership.

Within an actual operating period of about three months Farmers National Grain Corporation handled at Havana, Ill., more than a half million bushels of corn for destinations on the Pacific Coast via the Panama Canal and for export. Present water rates to the Pacific Coast from central Illinois points offer distinct savings over rail costs to Illinois shippers, in some cases 50 per cent or more. Similarly, water rates from interior Illinois points to consuming centers in nearby states, offer even greater savings over rail rates. Coarse grain rates from St. Paul to New Orleans by barge are lower by more than one-half the rail rates between the same two points. Numerous other similar comparisons could be made.

Dealt With Elevators

In its waterway operations Farmers National Grain Corporation has dealt entirely with country elevators. Every bushel of grain shipped via the river was bought from a country elevator. Thus the benefits of water transportation were shared by both producers and country elevators. It is the policy of the national co-operative to continue to market its members' grain as economically as possible. To that end it has acquired facilities in Chicago for the unloading of river barges and is planning facilities in connection with its terminal elevator at Peoria, to make water transportation, with its lower costs, available to grain producers of central Illinois.

Railroad rates, although reduced in some instances, still are generally the same as they were when grain prices were three to five times higher than they are now. The result has been the steady increase in the use of trucks to haul grain from country points to terminal markets and to river ports. Trucks are hauling grain 100 miles or more, in many cases direct to mills, with a consequent threat to the existence of many country elevators.

Everybody Is Trucking

No organization is responsible for this changing situation. Private grain firms are accepting and handling such business. Low prices of grain at the farm are forcing growers, who must pay the freight, to take advantage of the cheapest forms of transportation, just as low prices of all commodities and decreased earnings in industry are forcing increasing use of motor trucks, causing tremendous revenue losses to the railroads.

The situation is both competitive and evolutionary. Development of motor trucking and of waterways is changing the transportation map. Railroads may adjust their rates and meet this competition to some extent. However, there are those who predict that in time railroad freight business will be confined largely to long-distance hauling. It is possible that these developments may, in the course of time, spell the doom of many farmer elevators. Farmer owners of these elevators, however, realize that they were built to perform a service in the marketing of grain, and

many of them express the opinion that if and when economic necessities force the use of other facilities, which render equal or better service at lower cost, the elevators not able to meet changing conditions may pass out of the picture, as handlers of grain.

From the Grain Trade

On this point H. C. Donovan, well known Chicago crop expert, recently had this to say:

"Radical changes continue to beset country elevators because of truck hauling and such elevators that are within one hundred miles of a grain terminal market or a large mill where roads are in good shape, are losing out considerably in the handling of grain, with the prospect that the distance of truck hauling may become still greater, and it seems to me large grain concerns may do a whole lot better to send solicitors among the farmers to encourage trucking and even going so far as to run a fleet of trucks themselves, rather than to operate small elevators along the railroads as they have done in the past or are still doing.

"Many of those small elevators are now dying out, but the towns that they are in are also dying because the stores are closing down and there is little left outside of the post offices and gas stations. This being so, those who may own a string of such elevators and can not rid themselves of them had better develop other resources in which they can put them to use, by not only dealing in farm implements, coal and lumber, but also in many of the staple articles the farmers purchase—such as auto tires, sugar, coffee, heavy hardware and many other of the non-perishable commodities which, if bought direct from the manufacturers on standing orders, could be sold at a profit to the farmers at a cheaper price than they would have to pay in their nearby big town. All of which means—make such elevators more of a selling station than a buying one."

Do It Now!

Similarly, a bulletin issued by Lowell, Heit & Co., discussing the truck development from the standpoint of the country grain dealer, says:

"If there was any grain in this territory that was going to be trucked he should have had whatever little profit there was in it. Right now he should lock up his elevator—leave only the office open where the telephone is located—get in touch with every farmer who is going to sell or ship grain of any kind, and arrange if necessary to forward it by truck. He doesn't have to invest in trucks. There are plenty of them waiting to haul grain. But do the business and don't permit the outside, irresponsible and incompetent grain bootlegger with no money invested to handle the grain business of the community.

"If the railroads do not care for the business of the country grain dealer, then some other method of transportation must be provided if necessary in this emergency. No matter to what terminal nor to whom grain must go—protect your business and arrange to do all the trucking of grain from farm to terminal that is going to be done. And do it now!"

Winnebago Co. Issues Credit Slips to Members

Our service company is issuing credit slips covering patronage dividends to Farm Bureau members advises Charles H. Keltner of Winnebago county. "These credit slips may be exchanged for merchandise, applied to the payment of Farm Bureau dues, or cashed at the Farm Bureau office if dues are paid," said Mr. Keltner. "We do not issue credit slips to any member whose dues are in arrears, although they are made out to the member who may endorse them in the office to be applied on his dues."

NOTICE
ILLINOIS AGRICULTURAL ASSOCIATION
ELECTION OF DELEGATES

Notice is hereby given that in connection with the annual meetings of all county Farm Bureaus to be held during the months of July, August and September, 1933, at the hour and place to be determined by the Board of Directors of each respective county Farm Bureau, the members in good standing of such county Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of the Association, including the election of officers and directors as provided for in the by-laws of the Association.

No annual meetings will be held during July and August.

During September annual meetings will be held in Christian and Jefferson counties.

Signed,
G. E. Metzger, Secretary
June 20, 1933

From a Washington Farmer

Reduction of the interest rate on Federal Land Bank mortgages has created joy in at least one farm household in the Pacific Northwest, a letter received by the Federal Land Bank of Spokane indicates. This immigrant farmer in the State of Washington finds other signs of cheer in the situation, as his letter shows. It was made public without change in the eccentricities of his writing, as follows:

"May 17—1933 Federal Land Spokane Wash

Gentlemen: Im pleased to advise you that I have received your notice of Lower Interest on our mortgage as you will see in your record I stand in a No. 1 in my payments interest and Principal prompt paid Insurance and taxes prompt paid no default. Bot after 3 years of Darknes I can see a little sonnshein I can buy me par of shoe and my wife a dress and me a Schirt I have workt hard and I an mey wife still will ceep on working to pay our honest dept with honest mony. I came to this Country in 1909. I had nothing. I Have now Niecé Farm not big 40 acre we have 16 Beutiful cows jersey we hav big flok chikens. We heve a No 1 beautiful team we do not owe on cent except the Federal reserve Bang. Im the happiest mon on erth I get up 5 A M morning sing a song and go to work. Work is pleasur for me since our President has given us a glass of Beer I can sing better (God Bless Him) I never askt Onkle Sam for help if he give a lift, thanks. Well gentlemen the trubl is with majority of our American People they heve a Perdieis of h Contry and they do not know it. I remain respekful yours."

Fence Was Repaired

The Tazewell County Farm Bureau wrote the I. A. A. some time ago that B. F. Schmallenberger, a member, was unable to pasture some of his land along the Pennsylvania Railroad due to the fact that the railroad fence would not turn stock. It was in very bad condition.

The I. A. A. referred the matter to the proper officials of the company with the result that the fence was quickly repaired.

Mr. Schmallenberger wrote as follows: "Replying to your recent letter will state that the fence along the Penn. Railroad has been repaired, and I wish to thank the I. A. A. for bringing this matter to a finish, which has been hanging fire about two and one-half years."

This service is free to Farm Bureau members.

What Of The New Credit Legislation

The Intent and Purpose of the Act is to Bring Relief to Worthy Debtors in Need

FROM letters reaching headquarters of the Illinois Agricultural Association it is evident that some local farm loan associations are still operating under rules and regulations developed by the federal land banks over a long period of years.

Complaints from members indicate that the intent and purpose of the Emergency Farm Mortgage Act, namely to bring relief to farm debtors, is being disregarded in some counties . . . that the practices of some county farm loan association officials compare with those of hard boiled bankers and loan agents.

For example, a member in a western Illinois county applied for a $5,000 first mortgage loan on a 78 acre farm which cost $12,000 unimproved back in 1920. Since then the land has been improved, the owner advises, the mortgage on the land has been whittled down to $7,000 and the holders of the mortgage are willing to take $5,000, throw off $1,000 and take a second or third mortgage for the other $1,000.

In addition to the income from the farm, the family has an outside income of $800 per year.

Turned Down

We are informed that the local loan association secretary came and looked over the farm, made his report to the board, and the board turned down the loan with the advice that no loans were being made on rolling land.

While we have no first hand knowledge of the merits of this case, we do know that there is nothing in the Emergency Farm Mortgage Act which forbids making loans on rolling land. Nor is there anything in the act authorizing similar regulations which are reported to have become a part of the system.

Going back to the case mentioned above, our member writes that the representative of the farm loan association who called to inspect the farm remarked that the Emergency Credit act "was just so much ballyhoo." Yet, we are informed, this same association made a loan to the owner of a choice 160 acre farm free of all indebtedness who took over a farm to help out a bank. "Now it is up to me to go to the mortgage holders and admit that farm relief is all political propaganda and will give no assistance where actually needed," writes this indignant member. "I am writing this hoping that this policy will be given an airing and that someone besides the owners of 160 acre farms clear of debt will sometime be given assistance."

This case reveals that it's one thing to have a law, and another thing to get proper and sympathetic administration in carrying out the purpose of the law.

Judging from reported statements of the new governor of the Farm Credit Administration, Henry Morgenthau, Jr., he proposes to make the new emergency credit act really bring relief to needy farmers. Numerous statements coming from his office cite cases showing how mortgage debts are being scaled down and refinanced through loans made by farm loan commissioners and land banks.

The fact that the new credit administration hardly has had an opportunity to work out its policies in administering the new act should be taken into consideration. Supplementary legislation necessary to make the credit act a real relief measure was passed only shortly before congress adjourned.

Must Be Patient

Those in charge of administering the federal credit legislation both at Washington and in the Federal Land Bank at St. Louis apparently are sincere in wanting to bring the maximum relief to worthy farm debtors within the limits of the authority granted them. If certain subordinates and local administrators make rules of their own which are clearly not in sympathy with the intent of congress and the administration, such a situation can and undoubtedly will be handled. For the present, patience must be shown both by creditors and debtors.

On the other hand, no reasonable debtor should expect to secure a federal land bank loan for more than 50 per cent of the normal value of the land plus 20% of the improvements. This is the law. If the land was bought in the speculative era at a long price, and the mortgagor is hopelessly in debt, it is too much to expect Uncle Sam to step in and take over a mortgage which the owner would have little chance of paying off even in normal times. Bankruptcy and a new start may be the preferable course if creditors are unwilling to co-operate in scaling down the debt to allow for re-financing.

Cases like the one mentioned here should be brought before county conciliation committees, or a conciliation commissioner authorized under the amendment to the federal bankruptcy act passed in the regular session of congress last winter. Bankruptcy courts are authorized to appoint one or more such commissioners on appeal by 15 or more farmers who certify that they intend to appeal for an extension of their loans.

Two Kinds of Loans

Both in the May and June issues of the RECORD, provisions in the new emergency credit act for refinancing farm mortgages were made clear. Government loans, it should be remembered, are divided into two classes as follows:

1. Federal land bank loans which are limited to 50% of the NORMAL value of the land plus 20% of the NORMAL value of improvements.

2. So-called "farm loan commissioner" loans limited to $5,000 which may equal but not exceed 75% of the NORMAL value of the land or other farm property offered as collateral. The 75% rule applies to the total of all loans on the property offered.

Federal land bank loans bear 4½% interest and principal payments are waived for a period of five years. "Commissioner" loans bear 5% interest and most of them are being made for a period of 13 years with the principal installments waived the first three years.

Governor Morgenthau of the Credit Administration is giving close supervision to the "commissioner" loans through his personal agents stationed in the 12 federal land banks. Loans requested during the three weeks following the passage of the act totalled $9,000,000 and in the week ending June 2 nearly 2,400 requests came in for over 6½ million dollars. St. Louis and St. Paul districts reported the heaviest volume.

Uncle Ab says he does not know whether happy folks are lucky, or lucky folks are happy; but that happiness and luck go together.

Lower Farm Light And Power Rate Now Effective

Minimum Charge Cut to $6, Applies in 61 Illinois Counties

A 33⅓ per cent reduction in the minimum charge for farm electric light and power service affecting rural users in 61 central and southern Illinois counties was secured recently following an appeal for lower rates to the Central Illinois Public Service Co. and the Illinois Commerce Commission by the Illinois Agricultural Association.

The new rate reduction effective June 15 will save farmers in the territory served, an estimated $18,000 annually. The order of the Commission which makes the reduction mandatory, also provides that at the end of two years the minimum charge to farm users shall be reduced an additional one-third which will bring the minimum charge down to $3 per month from the present $9.

L. J. Quasey, director of transportation for the Illinois Agricultural Association, represented the interests of rural subscribers before the Commission in the various hearings.

To illustrate the effect of the new rate schedules, Mr. Quasey cites the following examples:

1. A home with a rating of five rooms with no electric motors, one horse power or more, the charges would be 9c for the 15 k. w. h., or $1.35; 8c for the next 20, or $1.60; 5c for the next 25, or $1.25, making a total of $4.20 for the 60 k. w. h. All energy over 60 k. w. h. would be charged for at 3c. Since this is $1.80 less than the $6.00 minimum, a customer would be entitled to use 60 more k. w. h.s at 3c per k. w. h., or a total of 120 k. w. h.s for $6.00.

2. A customer with a 5 room rating and a one horse power motor would pay 9c for 21 k. w. h., or $1.89; 8c for 26 k. w. h., or $2.08; 5c for 31 k. w. h., or $1.55, or a total of $5.52 for 78 k. w. h. Since this is 48c less than the $6.00 minimum, the customer would be entitled to 16 additional k. w. h. at 3c, or a total of 94 k. w. h. for $6.00.

3. A customer with the same room rating but with a three horse power motor, or an aggregate of three one-horse power motors, would get approximately 71 k. w. h. for $6.00 per month.

4. A customer with a five horse power motor, or an aggregate of several motors, one horse power or over, would get approximately 79 k. w. h. for $6.00.

Commenting on the rate reduction Harry L. Diehl, Ford county Farm Bureau member, wrote recently as follows:

"Accept my commendation on the fine work so far done by your department in securing reduced rates for electricity for farmers.

"How much of a showing would be necessary to secure a reduction of telephone rates? We pay $1.75 per month for a farm 'phone.

"Is there any chance for a lower rate on the price of construction of farm lines for electric light and power? The local company, C. I. P. S., quotes $1,300 per mile with an allowance of $400 for each user who guarantees to pay $9 per month for electricity."

Getting That Extra Cent For Grain Short-sighted

Disappointment awaits the stockholders of a farmers' cooperative elevator who expects to sell where he can get an extra cent. How would he, as an individual, get the extra cent were it not for the competition of his own cooperative? The stockholder who uses his cooperative as a pry-pole, in order to get an extra cent from a competitor, or who uses it as just another place to shop, cannot expect patronage dividends. He cannot expect his elevator to continue as a fair-price insurance factor if his neighbors follow his example. He cannot expect his elevator to meet every trick bid put up against it and, at the same time, return big refunds at the close of the season. He cannot expect his elevator to pay out its capital stock as an added price on grain and still pay the usual dividend. There are many things a grower cannot do to his own cooperative and still be satisfied with results. His cooperative elevator association is, in fact, much like a bank. A man seldom expects to get something out of a bank unless he has put something in.

As Others See Us

The important matter with the farmers is this, writes Arthur Brisbane in the Chicago Herald & Examiner: "They work in isolation, never build up any real nation-wide organization and are always at the mercy of middlemen and conditions.

"They could make their own terms, since the nation cannot live without them, but, apparently, they do not know it."

The Livestock Market Outlook By Conway

The situation now calls for a prompt marketing of low grade fed steers and butcher cattle and also the better grades that are finished says H. M. Conway, market analyst for the National Livestock Marketing Ass'n. He says the situation is favorable for further feeding of half-fat high quality steers. "The cattle feeder often makes his money on what seems to be high priced corn."

A better market for grass cattle also is expected in the fall. Conway states that while quality and finish are what count during the summer and fall, many well-bred heavy grass steers could be given a turn in the feed lot after the grazing season.

He continues to advise heading the lighter weight hogs for the August and September markets. "Many hogs can safely mark time on cheap pasture followed by a short turn in the feed lot. In some areas he predicts that many hogs will be sold prematurely which means rather short supplies for next year. If the normal domestic demand outlet prevailed, this country, he says, would be short on hogs.

Feeder lamb prices are headed for a rather strong early market and the situation calls for some caution in regard to early feeding. Receipts are exceptionally short at many markets, and this year the westerns are in stronger hands.

I. A. A. Opposes Move to Raise Cattle Rates

The Illinois Agricultural Association in co-operation with the National Livestock Marketing Association recently filed a brief in opposition to efforts of the railroads to place stocker and feeder cattle on the same rate basis as finished cattle. Under present regulations the stocker and feeder rate is approximately 85 per cent of the fat stock rate.

The Illinois Livestock Marketing Association had its largest month during May when the nine units handled 273 decks of livestock. A total of 189 decks, all hogs, were shipped direct to packers in the East, and the balance went to the terminal markets with the exception of the small percentage sold to local buyers.

The Illinois Farm Bureau Serum Association reports that volume of sales this year by member counties is running nearly ten per cent ahead of last year for the same period.

Milnor Tells Illinois Grain Board About The Farmers National

We Are Thriving and Growing Constantly, He Says, That's Why the Trade is Fighting Us

A BRIEF report on recent progress of the Farmers National Grain Gorporation was made by General Manager George S. Milnor before the Illinois Grain Corporation board in Chicago June 12.

Mr. Milnor made clear the position of the Farmers National on its loans from the Farm Board and answered what he branded as false charges and propaganda circulated by the grain trade.

"It is true that the Farmers National refunded its $16,000,000 loan from the Farm Board about a year ago to provide for payment over a ten-year period," said Mr. Milnor. "This fact was given plenty of publicity at the time. More recently the grain trade and the newspapers that speak for them have tried to make it appear that there was something irregular about this procedure. The Farmers National secured this loan at a low rate of interest. But under the Marketing Act it was definitely provided that co-operatives should pay the same interest rate as the Federal government paid on its lowest interest bearing securities. Under the law Farmers National could pay no more.

They Were Disappointed

"The grain trade is now boasting about its propaganda having eliminated the Federal Farm Board and the Grain Stabilization Corporation. Apparently they expected the Farmers National to be eliminated along with them and were chagrined when your organization kept right on doing business."

Mr. Milnor stated that the national co-operative will handle approximately one-sixth of all the wheat raised in the United States this year. "This hurts the grain trade," said Milnor. "Much of this business formerly went to private commission men. Now the farmers are doing it themselves through their own agency. The Farmers National is making money. It has always made money, but this money belongs to the producers and is reflected in their growing investments, facilities, and in dividends to the stockholder co-operatives.

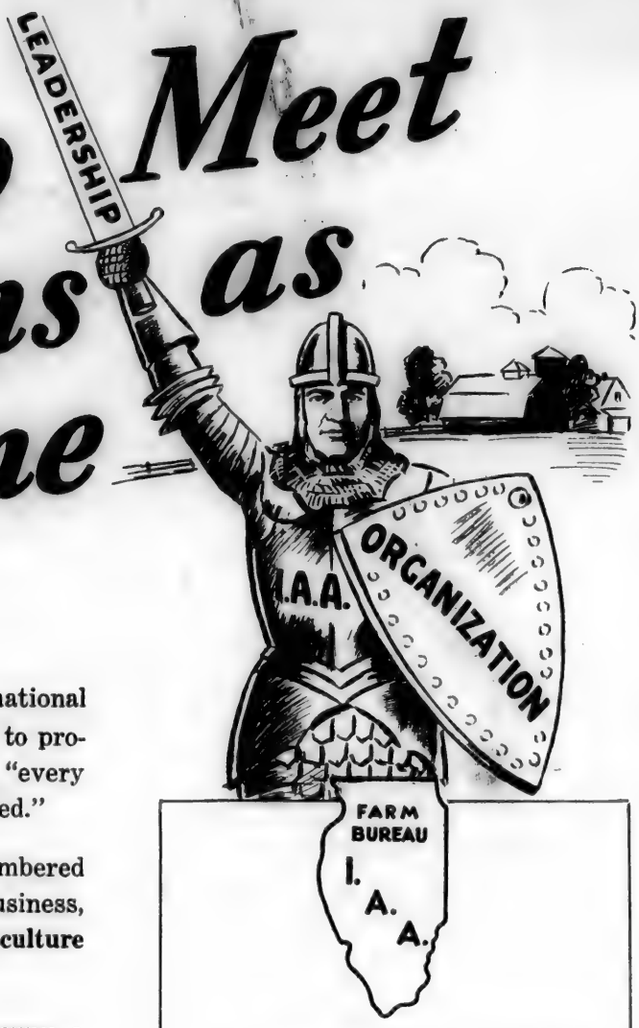
ALADDIN GAS STATION AT ROCK ISLAND

Leslie Smith, member of the Rock Island County Farm Bureau, has installed this filling station adjoining his apple house at 41st street and 6th avenue, Rock Island, where he dispenses service petroleum products to the public.

Gas and oil are obtained through the Henry-Stark Service Company. Smith has been active in both the Henry and Rock Island County Farm Bureaus since he returned from the army in 1920.

"So far as our loans are concerned," said Milnor, "the Farmers National will have liquidated its borrowings from the Farm Board, in my judgment, many years before the government gets back all the money it loaned to railroads and banks. The fact that 125 farmers' elevators in Iowa joined the Farmers National in the past year was another blow to the trade."

Illinois Grain Leads



Milnor stated that the Illinois Grain Corporation had shown the largest growth in volume of grain handled of any stockholder member during 1932. He indicated that this is the reason why propaganda against Illinois Grain and Farmers National is being concentrated in this state. The Farmers National, he said, had met all its obligations to the Farm Board on the day due. Also that the co-operative was borrowing large sums from private banks in New York, Chicago, St. Louis and other cities. "We are the largest grain handling concern in the United States," he said. "And we need large sums of money for working capital. The Farmers National today has about 20,000,000 bushels of grain."

In spite of the outlook for a small winter wheat crop Milnor expressed the belief that application of the domestic allotment plan embodied in the Emergency Farm Act would have to be made to avoid piling up another surplus next year. The carry-over this year, he said, is approximately 360,000,000 bushels, and production for 1933 is estimated about the same. "If we don't export any more wheat than last year (38,000,000 bushels) and consume a normal amount at home, we will still have an estimated carry-over of 260,000,000 bushels of wheat a year from now in spite of the light 1933 crop.

Furnishing Competition

"We at the Farmers National don't claim to be able to bid the highest price for grain all the time," said Milnor. "We can and are meeting competition most of the time," he said. "Moreover the competition furnished by the Farmers National in buying grain all over the country has narrowed the spread between the local elevator and terminal and future prices. You have seen the result of this in Illinois," he continued. "It has been more noticeable in the southwest where the private trade used to take a margin of eight to 12 cents per bushel on wheat in Oklahoma where at present the margin is only three to four cents per bushel. The Farmers National has been responsible for elevating the price of grain in this country compared with the world market. A study of prices during the past five years will convince anyone of this fact."

Ready to Meet the Problems as they Come

THE constant clash of group interests in our national life demands that AGRICULTURE be prepared to protect itself. A famous philosopher once said that "every time a law is passed the national income is redivided."

Agriculture is in the minority. Farmers are outnumbered more than two to one by the combined forces of business, labor, and industry . . . all the more reason why **Agriculture Must Present a Solid Front.**

The farmers of Illinois through the I. A. A. occupy a position of leadership as a state ORGANIZATION. They have demonstrated through many accomplishments the possibilities for self-help through united effort.

Organized farmers are responsible for the passage of the Emergency Farm Act which was followed immediately by rising farm prices. This victory from which the entire country has profited is an everlasting tribute to the value of ORGANIZATION.

With the law enacted, we now have the responsibility of co-operating with the administration to make it effective . . . to establish parity prices for farm commodities. There is work ahead. The Illinois Agricultural Association is ready to do its part. But its effectiveness can be greatly increased with a larger membership.

Number 8 **AUGUST, 1933** **Volume 11**

The 58th General Assembly

With Special Emphasis On What Happened To Legislation of Chief Importance To Farmers

REVENUE reform, reduced appropriations, relief to property taxpayers, the halting of indiscriminate foreclosures on farms and homes, and revision of the road laws of the state were the chief interests of the Illinois Agricultural Association in the 58th General Assembly.

The make-up of the legislature this year was considerably different from that of former years. There were many new faces—a large number serving for the first time. Problems growing out of the unemployment situation and inability to collect taxes in Chicago and Cook county occupied the center of attention during the fore part of the session.

It soon became apparent that Chicago and Cook county leaders were unduly influencing legislation.

Revenue Amendment

The I. A. A. early expressed its interest in securing a constructive amendment to the revenue article of the constitution. It recognized this as of first importance. On several occasions members of the I. A. A. legislative committee suggested to the Governor their willingness and desire to be helpful in securing the passage of constructive revenue legislation and particularly an amendment to the constitution giving the legislature power to revise our unfair and ancient taxing system.

With the General Assembly fast approaching its close and no move made by administration leaders to submit an amendment, the I. A. A. appeared before the Senate Executive Committee on May 6 and supported a revenue amendment which had been introduced by Sen. Carlson of Moline after the latter had agreed to certain changes desired by the I. A. A.

This amendment, known as Senate Joint Resolution 18, in effect would have given the legislature power by majority vote to enact revenue laws based upon ability to pay. This measure received a favorable vote of 6 to 3, but was never reported to the senate by the chairman of the Committee, Senator Graham of Chicago. Chicago influence and the fear of an income tax apparently were responsible for this attempt to defeat it. Therefore a few weeks later, at the suggestion of the I. A. A., a motion was made to take the revenue amendment resolution, S. J. R. 18, from the Senate Committee and place it on the calendar. This motion was lost by a vote of 21 to 20, failing by 5 votes to receive the necessary 26 for passage. The vote was as follows:

The NAYS Against Us

YEAS (for S. J. R. 18 supported by the I. A. A.)—**Baker, Barr, Benson, Burgess, Carlson, Clifford, Ewing, Finn, Gunning, Kline, Lantz, Lee, Mason, Mayor, Mundy, Paddock, Penick, Searcy, Serritella, Sieberns,** and **Thompson.**

NAYS—**Barbour, Broderick, Gillmeister, Graham, Hickman, Huckin, Huebsch, Karraker, Loughran, Lohmann, Maypole, McDermott, Monroe, O'Connell, O'Grady, Roberts, Shaw, Stuttle, Ward** and **Williams.**

Senators who voted against this motion in effect voted against the interests not only of farm people but of all property taxpayers.

The I. A. A. continued discussing with members of both houses of the General Assembly the need for a revenue amendment. Up to the final week of the session the administration had failed to offer one. In the meantime a sub-committee of the Judiciary Committee in the House brought out a proposed revenue amendment known as House Joint Resolution 65. This amendment when brought to the floor of the House won widespread support because it placed a limit of one per cent tax on the fair cash value of tangible property, exempted from taxation homesteads up to $1,000 in value when occupied by the owner, and gave the legislature power by majority vote to pass new revenue laws without present constitutional restrictions.

This resolution passed the House by the overwhelming non-partisan vote of 129 to 5.

Recognizing the importance of amending the revenue article of the constitution, the I. A. A. succeeded in getting certain amendments into H. J. R. 65 that justified the united support of the taxpayers' organizations represented at Springfield, including the Illinois Association of Real Estate Boards, the State Grange and the Illinois Agricultural Association.

On Thursday morning, June 29, the resolution carrying the I. A. A. amendments was placed on special order for a vote at two o'clock that afternoon at the request of the senate majority floor leader. This amendment carry-

ing provisions desired by the I. A. A. was as follows:

HOUSE JOINT RESOLUTION NO. 65

(As Amended in Senate)

Resolved, by the House of Representatives of the Fifty-eighth General Assembly of the State of Illinois, the Senate concurring therein, There shall be submitted to the electors of this State for adoption or rejection at the next election of members of the General Assembly of the State of Illinois, in the manner provided by law, a proposition to amend Article IX of the Constitution by repealing sections 2 and 3 thereof, and by amending sections 1 and 10 to read as follows:

Section 1. The General Assembly shall have power to provide revenue by general law. Except for the payment of indebtedness existing at the adoption of this amendment and of indebtedness thereafter incurred by authority of the vote of the People of the State or municipal corporation incurring the indebtedness, the aggregate of general property taxes for all purposes on any tangible property shall not exceed one per centum of its fair cash value.

The property of the State, counties and other municipal corporations, estates of homesteads to the extent in value of $1,000 when occupied by the owner as a residence and such other property not used with a view to profit and used exclusively for agricultural and horticultural societies, for schools, religious, cemetery and charitable purposes shall be exempt from taxation. In the assessment of real estate encumbered by public easement any depreciation occasioned by such easement may be deducted in the valuation of such property. The provisions of this section as herein amended shall not affect the collection of any taxes levied before January 1, 1935, nor any assessment of property for the purposes of such taxes.

Sec. 10. The General Assembly shall not impose taxes upon municipal corporations, or the inhabitants or property thereof, for corporate purposes, but shall require that all the taxable property within the limits of municipal corporations shall be taxed for the payment of debts contracted under authority of law, such taxes to be uniform in respect to persons and property, within the jurisdiction of the body imposing the same. But the General Assembly by vote of two-thirds of the members elected to each House may by general law provide for the distribution in whole or in part of taxes collected by the State, among the counties and other municipal corporations of the State. Private property shall not be liable to be taken or sold for the payment of the corporate debts of a municipal corporation.

Chicago Ran the Show

Immediately after lunch, the day the revenue amendment supported by the I. A. A. was moved up to final passage stage, the administration, supported by Patrick Nash, Democratic national committeeman from Chicago, and other party leaders, called a caucus of Senate Democrats and as a result a new and very objectionable revenue amendment, S. J. R. 35, was presented by Senator Ward, administration leader of Chicago, when the Senate convened that afternoon.

Sen. Ward asked that the rules be suspended and that an immediate vote be had on his amendment. One senator after another arose and protested against such irregular action. They asked for delay until the Ward amendment could be printed so they might study it. This proved of no avail. Sen. Ward insisted on an immediate roll call and won his point to suspend the rules. Then Sen. Searcy of Springfield moved to substitute H. J. R. 65, the revenue amendment which had I. A. A. support and the support of other taxpayers' organizations, for the Ward proposal, which not only offered no relief to property but required a two-thirds vote of both Houses to enact any revenue legislation not subject to the narrow limitations of the present constitution.

A test vote came on Sen. Ward's motion to lay Searcy's motion on the table, which in effect was a motion to kill the revenue amendment supported by the I. A. A. The vote on Sen. Ward's motion will be found in the table on Page 5.

Those downstate members who voted to table H. J. R. 65 showed a marked lack of independence and disregard of needed relief for the overburdened farm and home owners in their districts.

Same Story in House

When this motion was disposed of the objectionable Ward revenue amendment, S. J. R. 35, was adopted and sent to the House.

The same tactics were used in an effort to force the House to accept the objectionable Ward revenue proposal. Again a Democratic caucus was called. As in the senate, the test vote came on a motion to kill H. J. R. 65 which was offered by Rep. Bederman as a substitute for the Ward amendment, S. J. R. 35. The motion to kill H. J. R. 65 carrying I. A. A. support won by a vote of 75 to 60. This vote will be found in the table on page 5.

When the Ward amendment came up for vote it failed to receive the two-thirds majority necessary for approval, and so the session ended with nothing accomplished toward needed revenue reform.

The First Sales Tax Bill

In line with resolutions approved at the last annual meeting of the I. A. A., the Association took a firm stand when the first state sales tax was proposed to the effect that the proceeds therefrom be distributed equitably among the counties, and that the revenue be used to reduce and replace property taxes.

The I. A. A. succeeded in amending the original administration sales tax in several particulars so as to provide that:

1. The revenue from the tax be divided among the counties according to population.
2. The revenue be used by the counties to reduce and replace property taxes for educational purposes unless by a two-thirds vote of the county board it was decided to divert such revenue or part thereof to unemployment relief.

Administration sponsors of the bill also included a clause to exempt farmers who retail their own products, and retail distributors of motor fuel from the tax.

After being in force only a few weeks this Act was declared unconstitutional by the Illinois Supreme Court.

When this act was declared unconstitutional, the Association proposed that the tax base be broadened by the adoption of an occupational tax measure levying a 1½% tax on the income of persons engaged in some 350 occupations, in excess of $300 per quarter. This bill provided that the revenue therefrom be used to abate the state levy for general revenue purposes. In the face of administration opposition, this measure failed to move in the Senate.

The Lantz Bills

The I. A. A. further advocated that legislation be enacted giving commission-governed counties, and cities within such counties, full power to levy taxes for poor relief in line with

58th General Assembly

(Continued from page 4)

the authority now possessed and widely used for pauper relief in counties having the township form of government.

Three bills to accomplish this purpose were drawn by the I. A. A. and introduced by Senator Lantz. They were Senate bills 683, 715 and 729.

The Second Sales Tax Bill

The administration, however, decided to submit another sales tax, the primary purpose of which was to continue unemployment relief work especially in Chicago. This measure the Association could not support. To win downstate favor, and apparently in an effort to meet the objections of the I. A. A., the new bills provided that after Jan. 1, 1934, revenue derived from the sales tax shall be used to reduce and replace property taxes for State purposes; the income from July 1, 1933, to Jan. 1, 1934, to go to the Illinois Emergency Relief Commission.

The administration also included an amendment which the attorney general stated would exempt certain isolated retail sales of farm products from the tax.

This measure was passed and signed by the governor. It is now in operation.

The I. A. A. did not and does not yet believe the property tax relief feature in the recent sales tax legislation can be made to operate on 1933 taxes. The legislation provides that the state tax rate shall be reduced in proportion to the amount paid into state funds from the sales tax fund at the time the state levy is made. The state levy is made in December but under the provisions of the sales tax legislation all revenue collected in January on sales up to December 31, is to go to the Emergency Relief Commission. It is not until in March, 1934, that any revenue from the sales tax can be paid into any of the state tax funds. The I. A. A. does not believe the sales tax can be made to function as intended by the administration to reduce the state tax rate next year.

The Lantz bills, primarily introduced to give Chicago and Cook county greater authority to levy sufficient taxes locally for pauper relief, passed the senate but were held back in the house while the sales tax had the right-of-way.

While a number of downstate members voted for the sales tax, the first six months' proceeds of which will go largely to feed Chicago unemployed, Chicago legislators in the House bitterly opposed the Lantz bills to enable the metropolitan area to get on a self-supporting basis by Jan. 1, 1934. This opposition was not successful but it indicates that Chicago politicians may strive to continue the dole system next year from sales tax revenue, in part at the expense of downstate people many of whom are paying local property taxes for the same purpose.

The vote on the key bill S. B. 729 giving Chicago and other cities and villages in commission governed counties power to levy taxes locally for poor relief will be found in the table on page 5. Every vote against this measure was a vote against the best interests of farmers and other downstate people.

Lantz Bills Vetoed

Just before going to press, we are informed the Governor vetoed all of the Lantz bills, Senate Bills 683, 715 and 729. The veto message in part as carried in the press states:

"It is not my thought that there will be no needy persons by February, 1934, or that by that time there will be positions and work for all who seek employment. But it is my hope that by that time the necessity for care and relief of these persons will be so reduced that such care and relief can be returned to the local communities.

"The county board of Cook County has, by resolution, requested me not to approve this bill and senate bills Nos. 683 and 729, which are to some extent companion measures."

This statement by the Governor is amazing in that these bills were intended only to provide an opportunity for Chicago, Cook County and all counties under commission form of government to take care of their own

Study Their Records

THE I. A. A. has endeavored since its organization to represent and protect the best interests of farmers in legislation. At the same time it has tried to be constructive, non-partisan, fair, and helpful to successive administrations in working for good government and the welfare of the state as a whole.

This policy was adhered to in the 58th General Assembly just closed. In bringing to the membership a report of that session in the article beginning on Page 3, an effort has been made to present the issues of greatest consequence to agriculture, and to show how the downstate senators and representatives conducted themselves when put to test.

If some voting records look bad the legislators so classified have no one to blame but themselves. We urge that each member study carefully the record of his senator and representatives and retain this issue of the RECORD as a guide for future use.

To place the welfare of constituents above everything else is the obvious duty of members elected to the General Assembly. Farmers have a right to expect that of the men and women they send to Springfield.

Railroad Stupidity

THE Illinois Central railroad has refused to spot cars for loading grain with portable blowers along its right-of-way in Douglas county. It will furnish cars if farmers will resort to the back-breaking scoop shovel to load them. But the mechanical device seems to be obnoxious.

The railroad contends that it has leased space to certain private elevator companies along its lines and that farmers should load and ship their grain through these elevators. This regardless of the toll the elevator wishes to extract from the producer for the service. The railroad hints that the portable blower, likewise, should lease space if it wishes to operate, which raises the question as to whether a railroad is primarily in the business of transportation or real estate.

We might be inclined to dismiss the matter as just another case of railroad stupidity, an illustration of the lack of business enterprise and progressiveness largely responsible for declining income. This is the more charitable view.

But we are also informed that the same railroad permits an old-line grain company to install a grain blower at Thawville in Iroquois county, although the farmers' elevator there has ample facilities for loading grain. Thus, the situation has the aspect of collusion between the railroad and the private grain trade to head off the fast-growing co-operative grain marketing movement in Illinois.

The Douglas County Co-operative Grain Association which has been grossly and unfairly discriminated against is preparing to file a protest with the Illinois Commerce Commission. While the law is taking its course, the farmers are scooping grain and telling the railroad officials that unless they withdraw their stupid regulation trucks will be employed to haul their grain to the terminals.

One would think that the railroads had learned a lesson from their vast loss of freight to the trucks. Apparently not. But this much is certain. The organized farmers of Illinois will not be stopped in their efforts to market their own grain. They will not be cowed by collusion between the grain trade and the railroads to deprive them illegally of transportation service. The railroads may force farmers temporarily to use the scoop shovel when they prefer the blower as a method of loading grain, but by so doing they are building nothing but ill will. And they may expect to reap the consequences of their folly.

58th General Assembly

(Continued from page 7)

destitute people. Eighty-five (85) counties in the state which are under township organization have been operating under the law which provides for no limitation upon taxes that can be levied by townships for the purpose of taking care of their unfortunate and destitute people. In all townships of over 7,000, there is still no limitation on this power.

The I. A. A. fails to understand why 85 counties should, through property taxes and often with the sky the limit, be expected to take care of their own destitute people when at the same time a law should not exist which would enable the other counties, particularly Cook county, to enjoy the same privilege and discharge the same duty.

This action by the Governor furnishes another outstanding instance wherein decisions of State are unduly influenced by authorities of Chicago and Cook county. It also provides most definite reasons why every member of the General Assembly from downstate should refuse hereafter to vote for legislation taxing down-state people for the purpose of furnishing funds to carry a part of the rightful responsibilities of the City of Chicago and Cook county.

The I. A. A.'s one and one-half per cent occupational tax in the face of Chicago's opposition failed to move in the senate.

The Illinois Agricultural Association also had introduced a series of measures to redistribute the state gas tax and insure the use of an equitable portion of gas tax revenue for the improvement of secondary roads and the replacement of road taxes in townships and road districts.

State Road Commission Bills

A commission of legislators and others was authorized by the previous General Assembly to study the state road program and submit legislation embodying its recommendations for the approval of the 58th General Assembly. This commission brought forward a comprehensive road improvement program of great merit, although in the I. A. A.'s opinion it did not properly safeguard nor provide adequately for the interests of rural people in future road building.

The key commission bill made a three-way division of the three cent gas tax after Jan. 1, 1934 as follows: one-third to the state; one-third to the cities and villages according to population; and one-third to counties as at present on the basis of motor license fees. As originally drawn, this bill indicated that the state's portion of the tax would first be used to widen roads in congested areas, construct belt line highways around municipalities, and the balance spent on grade separations and state highways both within and outside municipalities.

The I. A. A. opposed these bills in committee with the result that a series of conferences were held which resulted in amendments later adopted. These amendments are of far-reaching importance to downstate people. They protect the interests of farmers and other rural residents in millions of dollars of road money spent annually. The net result of the revised road bills which passed both houses of the legislature is as follows:

1. The state's portion of the gas tax, also federal road funds coming to Illinois, will be distributed equitably for road building in the different sections of the state, first preference to be given to building and maintenance of state roads.
2. As the state takes over additional mileage for improvement from the counties under the federal-aid plan, such mileage shall be distributed equitably and simultaneously among the several counties and sections of the state.
3. The state's portion of gas tax revenue shall not be spent within municipalities of 2,500 or more population.
4. The one-third portion of gas tax revenue received by cities and villages shall first be used to build and maintain state roads and arterial highways within such municipalities.

The I. A. A. also sponsored a bill, H. B. 1012, which passed both houses of the legislature, to prevent after Jan. 1, 1934 the use of gas tax revenue retained by the state for other than road-building purposes. The I. A. A. proposed this bill because approximately $14,000,000 had been loaned from the state gas tax fund on state tax anticipation notes and used for other purposes with the result that road building was crippled throughout Illinois.

The road bills carrying the I. A. A. amendments passed both houses of the legislature and are now law. The governor vetoed H. B. 1012, however, which leaves the road fund wide open for further borrowing for other purposes and further delay of rural road improvement.

Relief from Mortgage Foreclosures

Early in the session the Association threw a bill in the legislative hopper designed to bring relief to distressed farm and home mortgagors by authorizing courts to stay foreclosures in worthy cases and at the same time protect the interests of creditors in rents and income from the mortgaged property. This bill was amended in Committee at the suggestion of the governor and later passed the House by a vote of 111 to 20.

A powerful lobby of mortgage bankers and real estate operators from Chicago immediately got busy and vigorously opposed this bill in the senate. The Senate Judiciary Committee, largely dominated by Chicago members, sought through unfair tactics to kill the bill in committee, and failing in this refused to vote it out. The next day Senator Martin Lohmann, who handled the measure, moved that the bill be taken from the committee and placed on the senate calendar. This motion was carried. Then Senator Lohmann made a valiant effort to secure its passage but on the final attempt it received only 21 votes, five short of the necessary number for passage. The vote on this bill will be found in the table on page 5.

Contrary to many charges made on the floor of the senate, this bill would not have jeopardized the interests of creditors; in fact, it specifically provided that courts shall protect the interests of creditors in the rents and incomes of distressed property. A statement by Henry Morgenthau, Jr., chief of the Farm Credit Administration, revealed that the passage of this legislation would not hamper the loaning of federal funds on farm lands, as was charged by opponents, but would be helpful until Federal refinancing machinery could be made to function smoothly.

Property Tax On Income From Intangibles

After passing the senate with 32 favorable votes, two measures proposing to place income from intangible property not otherwise taxed on the property assessment list, were held up in the House Judiciary Committee for more than a month. Cook county holders of intangible property again used their influence to dodge their share of the tax burden. As a result this bill was caught in the legislative jam and was stricken from the calendar the last week of the session.

Other Legislation

The Association also assisted in killing a number of bad bills including

one that proposed to place trucks hauling for hire under the State Commerce Commission and compel increases in truck rates in line with the cost of railroad transportation for similar hauls. These bills, which were reported to be sponsored by railroads, would have greatly increased the cost of marketing farm products, particularly livestock, fruits and vegetables, and dairy products.

The Association supported the bill to tax oleomargarine containing imported oils and fats. This bill passed both Houses of the legislature but was vetoed by the governor. Had this measure been approved it would have opened up a broader outlet for domestic oils and fats which the farmer requires to secure a better price for his products.

The Illinois Agricultural Association also vigorously supported all measures which had for their purpose economy in government where conditions warranted such support.

With few exceptions the economy bills as amended called for a 10 per cent cut in salaries of state officials and employees. In the Agricultural Appropriation Bill the appropriation for farm advisers was cut 22 per cent and for home advisers 40 per cent. When this bill came before the senate, Senator Lantz pointed out that the legislature should be consistent and reduce the farm advisers' and home advisers' appropriation not more than 10 per cent in line with other reductions.

Sen. Lantz then offered two amendments to the Agricultural Appropriation Bill so as to cut appropriations for farm advisers and home advisers the standard 10 per cent. The farm advisers' appropriation amendment lost by the close vote of 18 to 17. The vote on the home advisers' amendment was almost the same.

Those who voted to kill Sen. Lantz's amendment were as follows: **Behrman, Clifford, Gillmeister, Graham, Hickman, Huckin, Kielminski, Kribs, Lee, Loughran, Maypole, Mendel, Monroe, O'Connell, O'Grady, Shaw, Stuttle** and **Ward.**

Those who voted with Sen. Lantz were as follows: **Baker, Barbour, Barr, Benson, Boeke, Burgess, Gunning, Huebsch, Lantz, Mundy, Paddock, Penick, Roberts, Searcy, Sieberns, Thompson** and **Williams.**

To facilitate greater economy in local expenditures, the Association also sponsored a bill, S. B. 559, to extend the time from the first Tuesday in August to the first Tuesday in September in which directors or boards of education of school districts are required to certify the amount of money to be raised by special tax for educational and building purposes for the ensuing year. This bill passed the Senate, but was lost in the legislative jam in the House on the last day of the session.

Another bill sponsored by the Association which passed both houses of the legislature allows the detachment of tracts of 10 acres or more of unsubdivided agricultural lands from cities and villages where such lands are not bounded on more than two sides by subdivided property.

The owner may file a petition either with the county or circuit court and if the land described in the application meets the requirements of the Act the court shall grant the request.

Defeat Bad Bills

The I. A. A. also assisted in defeating a bad bill that would make an auto insurance company co-defendent in every suit brought against a policyholder. This bill would not only greatly increase the size of judgments against policyholders, but also would increase tremendously the cost of automobile insurance.

An attempt was made to amend the Uniform Mutual Insurance Act during the session. The I. A. A. has used this Act in the organization of certain of its insurance activities, and has therefore been interested in keeping the integrity of the Uniform Mutual Act intact. H. B. 745 was introduced at the request of certain interests wherein the Uniform Mutual Insurance Act would have been amended to provide for the issuance of a limited amount of capital stock, the holders of such stock being entitled to elect one-half of the Board of Directors.

The Association believed that such a provision in the Act would affect the integrity of mutual insurance as it would make it possible for an inside group of persons to perpetually control a mutual company against any objection of a majority of the policyholders. The Association forced the amendment of the bill to such a form that the control of a mutual company would be kept, at least insofar as the law is concerned, in the hands of the policyholders.

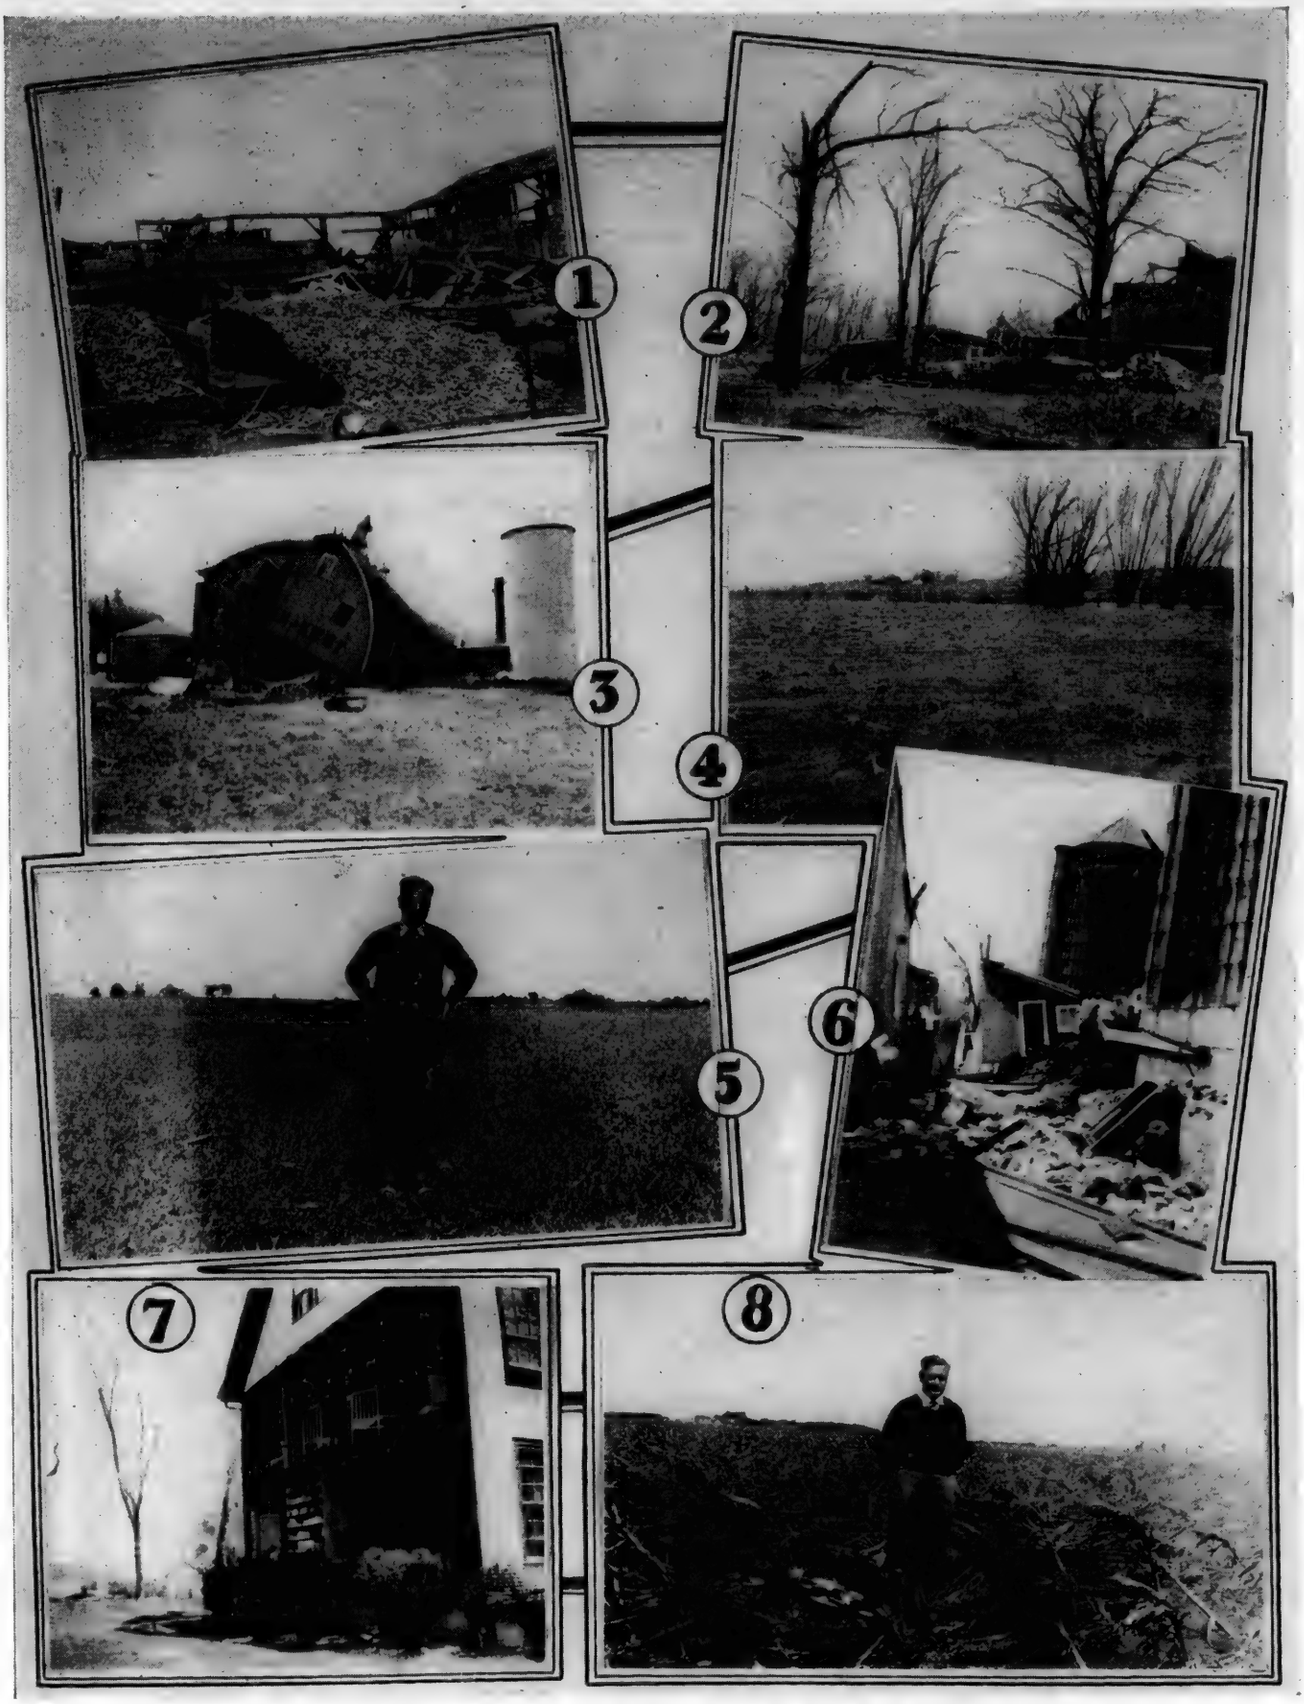
There was sponsored by the state insurance department an insurance agents' bill which was introduced in the House, H. B. 776. This bill would have required all insurance agents to be licensed by the Department. It would have made it impossible for County Farm Bureaus to act as the county agency of any of the Association's insurance activities. Because of substantial objection from all quarters, two bills at a later date were substituted in the House by the Superintendent of Insurance to take the place of H. B. 776.

One of these bills would have required all life insurance agents to be licensed, and while containing many objectionable provisions, was not seriously objected to by the Association. The companion measure, however, which required a license for all fire and casualty insurance agents, had a much larger license fee than the life insurance agents' bill, and had other objectionable features, although both of of these substitute bills changed the provision of the original bill that would have embarrassed the Association in the use of the County Farm Bureau as the county agency.

The objection of the Association and other interested parties was so strong that the casualty and fire insurance agents' bill was never pressed for passage and the life insurance agents' bill was lost in the House by a very substantial vote.

State Department Bills

The State Department of Agriculture at the request of milk producers co-operatives in and adjoining Illinois sponsored Senate Bill 673 which would give the department the power to license milk dealers and thereby enforce trade agreements between dealers and milk producers to establish fair prices for milk on strictly Illinois markets. After passing the senate this bill was approved in the House on June 29 by a vote of 96 to 5. The Illinois Agricultural Association had a representative in the several conferences that resulted in drafting the measure and gave assistance in securing its passage. This bill was vetoed by the Governor.



The Department of Agriculture also sponsored H. B. 827 which would license truck peddlers handling fruits and vegetables. This measure was sponsored at the request of southern Illinois fruit and vegetable growers who complained that itinerant truck merchants have been giving Illinois fruits and vegetables a black eye by selling inferior products and misrepresenting their quality.

The bill carried an appropriation of $25,000, and imposed a fee of $25 on truck drivers who sell other than their own products. Fruit and vegetable growers marketing their own stuff would be exempt from the payment of a fee but would be required to take out a license.

This bill was objected to by House

(Continued on page 12, Col. 2)

AFTER THE HAILSTORM IN NORTHERN ILLINOIS

(Pictures and cut courtesy Farmers Mutual Reinsurance Company and Boone County Farm Bureau.)

(1) Buildings wrecked by tornado on A. R. Ransom farm, DuPage county. (2) Leaves stripped from trees by hail give this scene on the Ruth Nesler farm, Cook county, a wintry appearance. Crops all destroyed, buildings demolished. (3) "The barn can wait until we finish replanting," said Albert Krahn of near Dundee in Kane county. (4) Corn field laid waste on I. R. Hasie farm near Bartlett, Cook county. (5) Barley that was waist high on farm of Bert Hewer, Boone County Farm Bureau director. It was difficult to identify what grain was growing. (6) A crowd gathers to survey the wreckage on Andrew Miller farm near Dundee, Kane county. (7) Walls blown out exposing interior at Yeoman City of Childhood, south of Dundee, Kane county. (8) This corn field was tasseling out on farm of Blake and Reed, southeastern corner Boone county. It looks like a total loss.

Lee J. Quasey Leaves Employ of I. A. A.

Connection Severed After Many Years As Director of Transportation

L. J. QUASEY, director of the I. A. A. Transportation Department for more than 10 years, left the employ of the Association July 1.

L. J. QUASEY

Mr. Quasey came with the Association shortly after it was organized on its present basis in 1919 to assist in managing the office. Soon after he was given charge of the wool pool until the Livestock Marketing Department was organized and took over this work.

Mr. Quasey then began handling claims of various kinds referred to the Association by members. This work brought him into contact with railroads and other public utilities. As a result he with the aid of G. W. Baxter developed a valuable service to members which has expanded under his direction.

With engineering training as a background Quasey studied traffic and public utility law and several years ago completed a night law course at the John Marshall Law School of Chicago. He was admitted to the bar in 1930.

Hearings before the State and Interstate Commerce Commissions in which the Association was represented by Mr. Quasey, resulted in a number of rate reductions and substantial savings for farmers. Similarly, more favorable easement contracts and increased compensation were secured for many Farm Bureau members in connection with pipe lines, telephone and power lines crossing farm lands.

Representation of Farm Bureau members' interests in these problems will be continued as in the past through the Legal Department under the direction of Mr. Kirkpatrick. The handling of loss and damage and other claims, and freight rate service will be continued in the Transportation Division of the Legal Department under the able direction of Guy W. Baxter who has been performing this part of the Association's service for many years.

Arrangements are being made to further reinforce the Legal Department of the Association. A more detailed announcement will be made in the next issue of the RECORD.

About Federal Farm Credit

Editor: The I. A. A. Record.

In your July "RECORD" you ask "What of the new credit legislation?" As near as I can figure it out and from all paper reports, it is just so much bunk to soothe the farming element. And when he wakes up he will have a worse headache than when he went into the coma. In the first place the Federal land bank will have its pound of flesh regardless of where it comes from. You say that some of the practices of county farm loan officers compare with the hard-boiled bankers and loan officers. If they were not hard-boiled they would not be in the employ of the Federal land bank very long, for I have met two or three of these birds. They just up and tell you that they are not working on human sympathy.

The article you printed on page 17 of your July "RECORD" in the first column and part of the second, I think, is not so much the attitude of the home loan secretary as it is the attitude of the Federal land bank. When you come to the expression "worthy farm debtors" you will find very few in this country, for the vast majority of the 40% of farm indebtedness will have to be foreclosed because none are worthy of any more credit than what they have, and the vast majority of those who could get credit don't need it for they are so conservative that they never venture into any enterprise especially if it would help their neighbors. But the trouble is that the whole commodity price from a shoe string to a threshing machine has fallen to ⅓ or ¼ of our 1910-14 average, but our farm mortgages and interest have stayed the same with interest slightly higher than before the slump.—A. O. Behnke, Hancock county, Ill.

58th General Assembly

(Continued from page 10)

members on the ground that it would interfere with farmers who sell their own and perhaps their neighbors' products to consumers in neighboring cities. The bill lost by a vote of 25 to 74.

Study The Records

As a result of the failure of this General Assembly to enact constructive revenue legislation, or to submit a revenue amendment to make possible taxation based on ability to pay, the Illinois Agricultural Association believes that it will be necessary to call a special session of the legislature later in the year to meet the ever-increasing and pressing problems that threaten the very maintenance of government. In line with its well known policy the I. A. A. will hold itself in readiness to work with responsible state officials and others to meet these problems in a manner that is fair and equitable to all interests concerned.

The legislative committee urges that Farm Bureau members make a most careful study of the voting records of their respective senators and representatives on what the committee believes to be important measures affecting farm interests in this state.

All Counties In 16th At District Conference

Legislative activities of the Illinois Agricultural Association at Springfield, together with latest developments in the administration of the Emergency Farm Act occupied the center of attention at the 16th I. A. A. district conference held at the East Peoria recreation camp June 24. All counties in the district were represented.

MR. MULLER

Secretary George E. Metzger called attention to the advance in farm prices which was largely brought about by the inflation amendment and the power vested in the President through the Emergency Farm Act to raise prices. Mr. Metzger stated that the Farm Bureau movement more than any other agency, was responsible for the passage of this far-reaching legislation. On the subject of state legislation he disclosed that the influence of the I. A. A. was used at Springfield to make the first state sales tax primarily a property tax replacement measure and to divide the receipts therefrom among the counties on an equitable basis according to population.

Four-H Club work was discussed by Wayne Gilbert, Stark county farm adviser; "Publicity" by J. W. Whisenand, Peoria county; and "Organization" by R. J. Hamilton, district I. A. A. organization manager. George B. Muller, member of the I. A. A. board, opened the meeting and presided.

Prairie Farms Butter

It's Better Because We Make It From Fresh Cream

By J. B. Countiss,
Director Dairy Marketing

"IF YOU build a better mouse trap than anyone else, the world will beat a path to your door," said Emerson. True enough, but why wait for the world to come to you?

The Illinois Producers Creameries are making the best butter humanly possible to make under present conditions but we are not expecting the world to beat a path to our creameries to get an opportunity to buy it. They do not act that way today. We have got to tell them about its goodness and how good it really is, and why it is good, and what makes "Prairie Farms Butter" better than other butter.

No. 1 All Ready To Go

A good buttermaker under normal conditions with proper equipment can make good butter out of good cream but regardless of conditions or equipment or the expertness of the buttermaker, he cannot make good butter out of poor cream. Therefore, when the group representing Illinois Agricultural Association, Milk Producers Associations, Illinois Produce Marketing Association, and others interested in the program met to formulate the plan of establishing farmers co-operative creameries in Illinois, they all said, "We must make better butter and in order to make better butter we have to have better cream."

So the first principle of our organization has been to get quality cream. After six years' experience in operating cream stations in Illinois, we are convinced that in order to get good cream we cannot wait for producers to come to town and bring it Saturday night or until he gets his can full but we must go and get it and get it often.

Therefore, truck routes were established whereby the cream is picked up regularly twice each week at the farm whether it is one gallon or ten gallons, and the patron's can returned together with his check on the return trip.

Then when it gets to one of these modern creameries at Bloomington, Peoria or Rock Island, it is properly weighed, graded and tested and within 20 hours is made into "Prairie Farms Butter" by expert buttermakers. Clyde Hamlin, buttermaker at Bloomington, operated the University of Illinois creamery for 11 years. Mr. Johnson at Peoria was one of the outstanding buttermakers in Land O'Lakes Creameries before he met Wilfred Shaw, manager of Producers Creamery of Peoria. Mr. Shaw not only met Mr. Johnson but brought him home with him to make "Prairie Farms Butter" at Peoria. At Rock Island, well when I think of good butter I always think of "Louie" the buttermaker at Rock Island who has been making it for years. Good butter is the only kind he really knows how to make.

This butter is then carefully packed in 64 lb. tubs and properly marked with Illinois Producers' Creameries emblem which identifies it as a quality product and shipped in refrigerator cars to Chicago. Here a representative of Illinois Producers' Creameries sells it to buyers who want especially fine butter for select trade. A large percentage of this butter has been sold at a premium over Chicago 92 score or "Extras."

"Prairie Farms Butter," although a new product in the market, is being enthusiastically received by critical buyers and we have permanent outlets for all of this high quality butter we can manufacture because it passes the test or score on flavor, 45 points, body 25, color 15, salt 10 and package 5 when inspected by government inspectors on the market.

Farmers in this state along with others have been unjustly accused of selling cream and taking home "Oleo." This, of course, has happened and the reason has not been that the farmer liked "Oleo" but he has had the sad experience of seeing his can of nice smooth sweet cream which he delivered to the local cream buyer mixed with sour lumpy and sometimes yeasty cream, and he decided in his own mind that he would not want to take home to his wife and kids creamery butter made from this kind of cream. Therefore, he went around to the corner grocer and bought "Oleo," and yet we wonder why the per capita consumption of butter is less than 20 lbs. per year.

"No. 1" On the Job

We believe one way of helping this situation is to get better cream by

Farm Bureaus Bring Relief To Storm Area

Organization Makes Possible Speedy Help To Stricken Farmers

THE hailstorm and tornado that struck northern Illinois early Sunday morning, July 2, was the most severe that ever visited that section of the state. Damage was reported as far west as the Mississippi River, although most of the loss was confined to southernmost parts of Winnebago, Boone, and McHenry and to larger areas in Kane, DeKalb, Cook and DuPage counties.

The storm reached its greatest fury around Dundee in Kane County where it leveled farm buildings and destroyed all growing crops. It reached down into the truck growing regions of southern Cook county where hail beat the vegetation into the ground and necessitated replanting.

Wintry Appearance

Along the state highway north of Elgin farmsteads presented a wintry appearance. Leaves were stripped from trees, corn cut off near the surface of the ground and in some cases even the straw was blown out of barley and oats fields. Considerable damage to livestock and poultry flocks was reported. Very few farmers were protected with growing crop hail insurance, although farm buildings were generally covered against windstorm damage.

The County Farm Bureaus in the affected area immediately became active in bringing relief to the stricken people. Within 48 hours after the appeal for help went out the Illinois Agricultural Association, Prairie Farmer, Pure Milk Association and WLS were all co-operating to see what could be done.

An appeal was made through the Federal Land Bank in St. Louis to reopen the Seed and Feed Loan Division which until May 31 had been making emergency loans up to $400 per farmer. A belated announcement comes from Washington, as we go to press, to the effect that the seed loan service will be opened until July 31 with a limit of $10 for each family. This statement may be in error but if true, the offering will be looked upon as a sardonic joke by hailed-out farmers needing ready cash to buy feed for their dairy cows. Wood Netherland, president of the St. Louis Land Bank, was helpful in relaying the appeal for emergency aid to Henry Morgenthau, Jr., of the Credit Administration. Netherland said that applications for commissioner loans from the storm stricken area would be given prompt attention.

$15,000 For Seeds

The I. A. A. also co-operated with Prairie Farmer, Pure Milk Association and the County Farm Bureaus in asking for a moderate appropriation to buy seed, from the Illinois Emergency Relief Commission. The Commission appropriated $15,000 and approximately that much seed was purchased under the direction of J. H. Lloyd, assistant state director of agriculture, and distributed from the Wilbern Seed Warehouse at Elgin.

A total of 1,800 bu. of corn, 2,500 bu. soybeans, 75,000 pounds of Hungarian millet, 72,000 pounds Sudan grass, 1,000 bu. buckwheat, and approximately 13,000 pounds of garden seeds were distributed beginning July 12. The Gardeners Supply Company of Arlington Heights handled the garden seed order.

The free seed proved very helpful to many farmers who lacked credit to buy seed for replanting. Much of the devastated area was planted to corn for silage and fodder.

In addition to this aid, the DuPage and Kane County Farm Bureaus and possibly others raised money to buy seed and feed for the most needy. The Pure Milk Association also was helpful in aiding members to purchase dairy feed to hold up their base production during the so-called base period.

FARM BUREAU AND I. A. A. OFFICIALS AT 16th DISTRICT CONFERENCE

Front row, left to right: E. I. Culp, Bureau county president; C. W. McMillen, Peoria county secretary; Ralph Allen, Tazewell county secretary; Secretary G. E. Metzger of I. A. A., Chicago; Albert Hayes, Peoria county president; and Edward Schrock, Tazewell county president. In the back row, left to right, are C. E. Bergren, Henderson county president; Ira E. Moats, Knox county president; G. A. Broman, Henry county president; E. E. Stevenson, LaSalle county president; R. J. Hamilton, I. A. A. district organizer; George B. Muller, I. A. A. director for 16th district; and R. J. Stevens, Mercer county president.

This is part of the group that attended the Farm Bureau conference June 16-18 at the Recreation camp in East Peoria.

Farm Bureau Leaders Two-Day Conference

"We have two conferences each year in which the presidents and secretaries of the Farm Bureaus in the 14 counties of R. J. Hamilton's organization district attend," writes Albert Hayes, president of the Peoria County Farm Bureau. "The recent two-day conference was held at the East Peoria recreation park.

"Our December session is devoted entirely to business concerning the Farm Bureau. All problems pertaining to the improvement of the Farm Bureau program are discussed. We get many helpful ideas out of these conferences.

"We always get together for breakfast during the I. A. A. annual meeting and our district is organized with a president, vice-president and secretary.

"The summer conference is not all business but consists of programs, moving pictures and sports. The farm advisers and their families also attend. On Sunday morning church services are held in charge of Ira Moats, secretary of the Knox County Farm Bureau, who was formerly in the ministry. Everyone looks forward to this get-together and a great many warm friendships are made."

An eighteen per cent rise in the price of gold was accompanied by an eighteen per cent rise in farm products.

I. C. Forbids Use of Grain Blower to Douglas Co-op.

COLLUSION between private elevators in Douglas county and the Illinois Central Railroad to prevent farmers from marketing grain through their own co-operative was charged recently by the Douglas County Farmers Grain Association in a statement reported by the Decatur Review.

Considerable feeling has been stirred up between grain producers over the railroad's refusal to supply grain cars which farmers desire to load with a portable blower rather than scoop it in by hand. Although the railroad superintendent contended that the farmers should lease space along their right-of-way for the blower, farmers regard this contention as a smoke screen and a move to compel the producers to market their grain through the private elevators in that county.

The co-operative association in the meantime is reported to have lodged a complaint with the Illinois Commerce Commission pointing to the law which provides that common carriers are required to furnish cars when requested by shippers. The Illinois Central, it is understood, proposes to make a test case out of the controversy and if necessary carry it on up through the courts.

May Use Trucks

The Douglas county grain producers are now threatening to move their grain by truck direct to the terminal markets if the railroad persists in its refusal to spot cars where convenient for loading.

A. Z. Martin, prominent farmer and a director of the Douglas county co-operative, said in an interview reported in the Decatur Review: "Under the railroad's ruling that all loadings made at team tracks must be done with scoop shovels or through established elevators, the farmer is given no choice to market his produce except through such old-line companies as may have a monopoly in the territory. He must sell through this agency and at such margins as the buyer chooses to impose or else haul to more distant points.

"Farm leaders have long recognized the effects of this particular evil, and have encouraged the farmer to organize into co-operative groups whereby the profits ordinarily distributed among the dealers may go back to the producer.

"Quite naturally," said Mr. Martin, "the old-line grain companies which have built expensive grain elevators—monuments that the farmer is obliged to pay for or contribute to their upkeep—dislike the idea of farmers selling through their own co-operative agency. Such dealers thereby lose a chance at the fat profits they have earned off the farmer in years past, and it is no surprise that they have enlisted the aid of the railroad companies to keep the farm co-operatives out of the field as far as possible.

"This action in forbidding the use of a mechanical device to facilitate the loading of grain is but one example of this attitude."

Replaces Six Men

A grain blower, it is estimated, does the work of about six men in loading a freight car. To comply with the railroad's terms Douglas county farmers are using scoop shovels temporarily to load grain.

The Decatur paper states that eight carloads, or approximately 12,000 bushels, were loaded in one week at the Hayes station north of Tuscola. The corn was hauled from the John Black farm, managed by Mr. Martin, on six trucks and loaded into the car in two days.

The co-operative association owns a blower and it could have been moved to the team track there loading the cars quickly and inexpensively, but the railroad prevented its use by its refusal to furnish cars.

"Even by hiring trucks and six men to load the cars," said Mr. Martin, "I saved more money by selling through the co-operative association than I ever did in the 20 years I have been selling corn from the Black farm.

"Naturally I dislike the idea of using scoop shovels, but it is a well known fact that the farmers have been charged too much for elevator service for a long time.

"Ordinarily, Douglas county ships out about 2,000,000 bushels of grain in a year's time. More than a half million bushels have been sold through the co-operative association thus far in 1933. Even when hauled directly to the co-operative elevator in Tuscola and for long distances, the farmers' returns have been higher."

The statement of higher returns, says the Decatur paper, is substantiated by Albert Long, owner and manager of a dozen farms in the county who relates how one of his tenants received a premium of three cents a bushel for two carloads of corn marketed through the association when the tests were advanced one notch at the terminal markets by the inspectors there. Another farmer who hauled his wheat crop to Tuscola in trucks, after his crop was reported to test 54 at one of the outlying elevators, found the test to show 60 and with a corresponding gain in selling price.

"There are other instances of a like kind," Mr. Martin insists, "and they explain why the state-wide grain association (Illinois Grain Corp.) is taking a lion's share of the farmer's business."

The Douglas County Farmers Grain Association was organized last March, the records show, and membership is open to all farmers in the community without fee upon the condition that their grain will be marketed through the association, provided that the price offered by the association equals or is higher than the price offered through another agency.

Prefer Railroads

"It is our plan to continue in the county, giving the farmer the advantage of every possible test and premium," Mr. Martin says. "And so far as possible, we will continue to ship our grain over the already established carrier systems, even if obliged to use old-fashioned methods in loading the cars."

However, the ill-concealed contempt for the railroad's stand in preventing loadings by the more modern methods, may bring about the use of trucks in transporting grain into the terminals. Overtures have been made by managers of established truck fleets, and bids have been received to haul grain directly from the farm to river points for five cents a bushel.

Illinois farm prices advanced 25 per cent during the month ending May 15, and averaged the highest since December, 1931.

"Prairie Farms" Butter

(Continued from page 13)

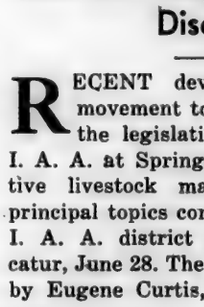
the truck pick-up system and make better butter in our own plants and sell it direct to stores, restaurants, hotels and confectioners in the respective creamery territories.

Bloomington purchased the first sales delivery truck last week and within a few days "No. 1" will be rolling around the territory with a high class experienced salesman calling on the local trade with "Prairie Farms Butter." Farmers should see that their local grocers handle their high quality "Prairie Farms Butter" because in so doing, they are not only helping the grocer but their friends who buy it and themselves because it is made from the best cream in Illinois, which gives it that wonderfully fine delicate flavor found only in "Prairie Farms Butter."

Once each year farmers in Illinois market their grain, probably twice a year they sell a car of livestock but he sells his cream 104 times a year. Co-operative creameries are bringing the consumer of butter and the producers of cream closer together 104 times a year and every time this is done, the producer gets a greater percentage of the consumer's dollar, and the consumer gets a better pound of butter for his money.

Doing It Ourselves

Farmers have invested thousands of dollars in production machinery including farm machinery and livestock, but very little in marketing and selling agencies, consequently "we have been coming out at the little end of the horn." We sell our cream, livestock and grain and buy back Jones' "Homemade" butter; Smith's "Sugar-cured" hams; and Johnson's "Self-rising" flour and wonder why we pay so much and receive so little.



Co-operative creameries in Illinois were established for just one thing—to give the producer a bigger percentage of the consumer's dollar and give the consumer a better pound of butter for his money. It is the one program of farmers in Illinois where we can control our product from the time it is produced until it reaches the consumer. We produce our own cream, haul it to market in our own trucks, have our own men weigh, test and grade it and manufacture it in our own plants which we established ourselves, sell it through our own sales outlets with our own name on it to ourselves, friends and neighbors — not once a year but every day in the year and all savings made are passed back to the stockholders the same as any other creamery except—our stockholdholders are the producers.

If You Have an Accident!

If you are a Policyholder in the Illinois Agricultural Mutual Insurance Company and have an accident in Chicago or nearby while attending the World's Fair this Summer or Fall, call the Home Office, Harrison 4772, during office hours. Should an accident occur at night time or after office hours call Leslie V. Drake, our Chicago adjuster, Village 5016. Immediate attention will be given your claim.

Corn and Hog Plan Discussed in 19th

RECENT developments in the movement to raise farm prices, the legislative program of the I. A. A. at Springfield, and co-operative livestock marketing were the principal topics considered at the 19th I. A. A. district conference at Decatur, June 28. The meeting was called by Eugene Curtis, member of the I. A. A. board. Approximately 50 Farm Bureau leaders represented the eight counties in the district.

EUGENE CURTIS

Speakers included Secretary Geo. E. Metzger, Chas. A. Ewing, president of the National Livestock Marketing Association, Bob Grieser, Illinois Livestock Marketing Association, Mr. Curtis, and others who spoke briefly during the question and answer period.

Mr. Ewing suggested that every effort be made to open up foreign outlets for surplus pork and lard rather than apply a processing tax on hogs, receipts from which would be used to finance corn acreage reduction. The livestock commission companies as well as packers would rather not see the supply of livestock curtailed since their facilities are geared up to handle a heavy volume. It is generally appreciated that the application of the allotment plan to corn and hogs is a more complicated task than in the case of wheat and cotton.

Secretary Metzger reviewed the I. A. A. legislative program at Springfield and also discussed organization problems.

Mr. Grieser stated that the greatest problem of the livestock co-operatives is to secure a heavy enough volume of hogs, cattle and sheep to obtain the necessary bargaining power to raise price levels.

It was voted to hold the next district conference in Sullivan, Moultrie county. Little sentiment was expressed for a district picnic so each county will hold its own.

Farm Bureau Day At State Fair Aug. 25th

Country Life Queen Contest for 1933 is Chief Drawing Card for Annual Get-together

Fifty-four Country Life Queens selected by 54 County Farm Bureaus will compete for the honor of being the Country Life Queen of Illinois for 1933 at the State Fair next month. The contest will be held at Springfield on Farm Bureau Day, Friday, August 25, at 11:00 A. M. "The young ladies will be judged on grace, poise, dignity, sincerity, charm, personality and other qualities that go to make up winsome American womanhood," says V. Vaniman, director of insurance service who has charge of the contest.

"It has been said that the conservation of human beauty is the question of the hour because physical beauty is directly associated with moral beauty, bodily well being, efficiency and intellectual excellence," says Van.

"This year's contest will surpass any Beauty Contest yet held, as the 54 young ladies selected in the 54 county contests were the winners in which there were 850 young ladies competing.

"Agriculture is developing a culture of its own emphasizing qualities of modesty, gracefulness, charm, naturalness, poise, etc.

"Uncultured people live in the world without being conscious that to be alive at all is one great mystery, states an eminent psychologist. Real culture develops self-confidence and independence of environment.

"A mother of one of the young ladies entered in the Country Life Queen contest last year states that the contest gives encouragement and recognition to the young ladies in the country which they should have, and are entitled to. The measure of popularity and interest in the contest held by the County Farm Bureaus and I. A. A. is shown by the fact that in 1931 twelve counties selected County Country Life Queens, in 1932 37 counties, and in 1933 54 counties."

Whiteside Leads State In Fly Spray Contest

ILLINOIS Farm Supply Company's fly spray contest which was in effect between April 15 and June 15 more than doubled the sales of Blue Seal fly spray and Blue Seal fly and insect killer compared to a corresponding period a year ago. More than 30,000 gallons of these products were sold within recent weeks which is approximately 30 per cent more than the entire gallonage sold during the Summer of 1932.

Whiteside Service Company carried off first honors in the contest with Burnie Vos leading the state with 1,216 points covering 341 gallons sold, delivered and paid for prior to June 15. Earle B. Johnson, another truck salesman for Whiteside Service, took second place with 1,007 points, covering 375½ gallons. Vos won the contest because he sold more customers than his teammate. Each sale to a customer counted five points while each gallon of fly spray counted one point and each gallon of fly killer two points. Vos won a pair of high top boots and Johnson an electric alarm clock. The total gallonage sold by Whiteside during the contest period was 954¼ gallons.

Other companies having two or more men qualifying among the 75 high men in the state, each of whom will receive an automatic focusing flashlight, were: Shelby-Effingham Service Company, Will County Farm Supply Company, St. Clair Service Company, Madison Service Company, Peoria County Service Company, Greene County Service Company, Ford County Service Company, Adams Service Company, Randolph Service Company, Champaign County Service Company, Stephenson Service Company, Monroe Service Company, Jersey County Farm Supply Company, Livingston Service Company, Fruit Belt Service Company, Iroquois Service Company, Winnebago Service Company, Lake-Cook Farm Supply Company, and Schuyler Service Company.

The price of Blue Seal fly spray was substantially reduced this season although the killing strength and the repellency of this spray have been decidedly improved. One additional ingredient (which costs $300 per drum, wholesale) has been largely responsible for the improvement over the spray sold last year. This spray is clean, safe, dependable, will not burn, blister, or irritate the skin of the animal, or taint the milk.

Blue Seal fly and insect killer has proved to be one of the most effective sprays for use in dairy barns, milk houses, and in the home. It is essentially prepared for use in buildings where ventilation can be controlled. It is stainless, effective, and deadly to all insect pests but harmless to human beings and animals.

WAYSIDE SERVICE CO. LEADS STATE
This smart-looking aggregation hails from Whiteside county. Left to right; they are (back row): Earl Bollen, Ed. Fullerton, Earl Scribner, salesmen; C. H. Becker, manager; Earle Johnson, Burnie Vos, salesmen.
Front Row, left to right; John Houzenga, salesman; Clayton Delp, station salesman; Lee Coster, warehouseman; Sam Howe, Harry Schipper, salesmen.

Represent Illinois At Des Moines Conference

To co-ordinate the views of corn and hog grower representatives in the different farm organizations and agricultural agencies in Illinois, the following committee was appointed at Bloomington July 8 at a meeting of some 75 leaders, to speak for Illinois at the Des Moines corn-hog conference on July 18:—Dean H. W. Mumford, Earl C. Smith, C. V. Gregory, C. A. Ewing, E. D. Lawrence, J. R. Fulkerson, John W. Armstrong, E. A. Eckert, E. C. Coulter, W. W. McLaughlin, and J. L. McKeeghan.

It was hoped that the Des Moines meeting would crystallize support behind a definite plan to raise corn and hog prices.

NOTICE
ILLINOIS AGRICULTURAL ASSOCIATION
ELECTION OF DELEGATES

Notice is hereby given that in connection with the annual meetings of all county Farm Bureaus to be held during the months of August, September and October, 1933, at the hour and place to be determined by the Board of Directors of each respective county Farm Bureau, the members in good standing of such county Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of the Association, including the election of officers and directors as provided for in the by-laws of the Association.

No annual meetings will be held during August.

During September annual meetings will be held in Christian and Jefferson counties.

During the month of October the following counties will hold annual meetings: Adams, Cass, Cumberland, Ford, Scott, Hancock, Henderson, JoDaviess, Warren, Marshall-Putnam, Menard, White, Montgomery, Pike, Pulaski-Alexander, Shelby, Stark.

Signed.

G. E. Metzger, Secretary
July 20, 1933

Here's How Sales Tax Revenue Is Spent

CHARITY AS A CAREER

Chicago, July 6.—I am hiring salesmen and saleswomen. Last week a man came in to see me, sent by a church organization. He was well dressed and well educated. In time he asked what basis we paid on. When I told him that it was all commission, but that we furnished all the leads, and his customers were strictly his and that we protected him on that, he asked, "Can you guarantee me $19 a week?" I told him that we could not, but that it would be very easy to make that, and he said, "There are four of us in the family, my brother-in-law and his wife, myself and my wife, and we are each on the relief rolls and get $49.50 a week, and we can live very comfortably on that, so guess it will not pay to give up a good thing for such an indefinite proposition."

Are the men and women of Chicago getting so indolent that they will accept charity rather than go to work? No wonder there is a seeming depression. We cannot get business going unless every one gets his hands, feet, and brains working.—CHESTER G. WOOD. Reprinted from Chicago Tribune.

Agricultural Trade Agreements To Wallace

President Roosevelt Makes Decision After Conference With Farm Bureau Leader and Dairy Co-operatives

IT WAS President Edward A. O'Neal and the influence of the Farm Bureau that moved President Roosevelt to turn over the administration of the fluid milk trade agreement to the Secretary of Agriculture rather than to the Recovery Administration, Don Geyer, secretary of the Pure Milk Association, reported in a telephone conversation to C. V. Gregory, editor of Prairie Farmer, recently.

This information was disclosed by Mr. Gregory in a brief talk to the board of directors of the I. A. A. in Chicago July 14.

"I remember when the I. A. A. was organized down at Peoria in 1919," said Gregory, "that one of the things we hoped for was an organization big enough and strong enough so it could go down to Washington and tell the President of the United States what farmers wanted. That seemed like a big order at the time, yet that thing has actually happened. This incident illustrates why farmers need a strong organization ready to speak for them at all times."

Sought Approval

For more than two months dairy groups including the Pure Milk Association and Chicago milk dealers had sought approval of a trade agreement to stabilize the market at Chicago so as to give dairy farmers a reasonable price for fluid milk, stop cut-throat competition of milk peddlers and bootleggers, and at the same time give consumers a pure, safe supply of pasteurized milk at a fair price.

Little progress was made due to a difference of opinion as to which group, National Industrial Recovery, or Agricultural Adjustment Administration under Secretary Wallace should pass on and administer the agricultural trade agreements.

The Industrial Recovery Act gives no authority to the administrator, General Hugh Johnson, to approve price agreements. On the other hand the Emergency Farm Act does give such authority to the Secretary of Agriculture. The dairy organizations insisted that Secretary Wallace administer the milk trade agreement whereas the Industrial Recovery Administration believed it should have jurisdiction.

In the meantime, milk dealers at Chicago were losing business as a result of general price cutting by so-called "independent" dairies and raw milk peddlers. The dealers threatened to cut the price to the consumer from 10 to 9 cents and pass the reduction on to the producer by lowering the base price from $1.75 per cwt. to $1.45.

Farmers threatened to strike unless the trade agreement was approved by Washington and an increase obtained to help restore their buying power and debt-paying ability.

After considerable delay the dairy organizations called on President O'Neal and asked him to accompany them to the White House. This was done and the President announced that the Secretary of Agriculture would be authorized to administer agricultural trade agreements under the Emergency Farm Act.

The importance of this decision may not be apparent to many, but it means that full authority hereafter will be given to the Agricultural Adjustment Administration to establish fair prices for farm products through trade agreements with dealers and processors. The decision established a precedent of far-reaching importance to farmers in the price-raising program.

Evaporated Milk Agreement

The proposed trade agreement offered by evaporated milk companies struck a snag when fluid milk co-operatives recently filed objections on the ground that the agreement did not properly recognize the interests of producers.

B. F. Beach, manager of the Michigan Milk Producers Association, said the agreement was not fair because "the farmers have no voice in fixing the price stated in the agreement."

W. T. Nardin of St. Louis, representing the milk condenseries, said the proposed agreement was a step toward assuring dairymen a larger return for their product. He added that less than 10 per cent of the farmers supplying milk to condenseries are members of organizations.

"The organizations represented by the men who are antagonistic to this agreement are working against the interests of the evaporated milk industries and farmers whose fresh milk we purchase," Nardin said.

The agreement proposes a schedule of prices to be paid producers varying by regions and based on current market prices for butter and in some cases cheese and other dairy products. It also proposes a schedule of wholesale prices both maximum and minimum.

Milk producer representatives assert that the price schedule is not high enough to give farmers a satisfactory return for their product; moreover that the price fixed by the condenseries in the agreement would be a bar to farmers in fluid milk districts obtaining a satisfactory price from distributors.

Meanwhile a committee of butter producers and distributors has been appointed to draw up a trade agreement for this industry. The close relationship of all branches of the dairy industry to each other makes it imperative that each co-operate with the other in advancing prices all along the line.

JUDGING HORSES AT FLOYD GUTSHELL'S FARM NEAR ELMWOOD, PEORIA COUNTY.

Forty-two 4-H Club members competed in the Peoria county 4-H Club contest on July 7. Four classes of livestock, horses, cattle, hogs, and sheep were judged by the Club members.

The team from Elmwood, composed of Carroll Taylor, Paul Thompson, and Manford Harding, will represent the county in the state 4-H Club contest at Urbana August 1.

Number 9 SEPTEMBER, 1933 Volume 11

Submit Program To Raise Hog Prices

A PROCESSING tax on hogs the proceeds of which would be used to encourage the marketing of 4,000,000 pigs weighing from 25 to 100 pounds between now and Oct. 1, 1933 was recommended by the National Corn and Hog Committee following a recent conference in Washington with the Agricultural Adjustment Administration.

EARL C. SMITH

In addition the committee, of which President Earl C. Smith is chairman, proposed that 1,000,000 sows soon to farrow, weighing 275 pounds and over, be encouraged to market by paying a bonus of $4 a head in addition to whatever price they may bring.

This program, it is estimated, will relieve the hog market during the next year of approximately 2,000,000,000 pounds of pork, or around 5,000,000 hogs.

It was also suggested that large quantities of pork might be disposed of by sale to relief agencies under definite agreements that the normal purchase of meat by these agencies will not be reduced.

The lower grade animals could be used for tankage and soap. It is estimated that from $40,000,000 to $60,000,000 will be required to carry out this one year emergency program.

The Corn and Hog Committee suggested that the emergency program be completed by Oct. 1 when a more permanent program can be formulated and launched to reduce the 1934 spring pig crop and corn acreage.

No recommendation was made as to the rate of a processing tax to raise the required sum.

At the general meeting on August 10, all farm organizations represented vigorously supported the recommendations of the committee.

Thomas E. Wilson, Chicago packer, stated that the packing industry was interested in helping farmers obtain an increase in their income and that it would co-operate in the final program offered by the Adjustment Administration.

Department of Agriculture economists advised the Corn and Hog Committee that the increase in pigs farrowed and to be farrowed during 1933 will be approximately seven per cent more than the farrowings of 1932. In terms of tonnage this increase would amount to approximately 700,000,000 pounds of live weight pork.

The committee was also informed that the decrease in normal exports amounts to approximately 500,000,000 pounds. Taken together this presents a problem of removing at the earliest possible time and in the most economical way around 1,200,000,000 pounds of pork production. In addition, some further reduction seems to be essential if a substantial raise in the price of hogs is secured.

The enormous increase in production, coupled with a drop in normal demand, has resulted in holding the price of hogs to approximately 50 per cent of the pre-war parity price level.

To meet this situation the committee recommended the removal from the domestic market of 500,000,000 pounds of pork and pork products between now and January 1, 1934, and a total of 2,000,000,000 pounds during the coming marketing year by any one or a combination of the following methods:

(a) Encouraging the marketing of 4,000,000 pigs of from 25 to 100 pounds average weight between Aug. 15 and Oct. 1, 1933 by paying the following prices:

25 to 40	pounds	$9.00 cwt.
41 - 50	"	8.50
51 - 60	"	8.00
61 - 70	"	7.50
71 - 80	"	7.00
81 - 90	"	6.50
91 -100	"	6.00

(b) Inducing the immediate marketing of 1,000,000 sows above 275 pounds in weight, soon to farrow, by offering a premium of $4 per head, plus the removal of the usual dockage.

It is proposed to dispose of the resulting meat and meat products from the best of these animals by the sale on a moderate basis to relief agencies, under definite agreement that their normal purchases of meat will not be reduced. The balance of the lower grades of meat resulting from this type of marketing should be condemned, tanked, and such salvage realized therefrom as would be possible without serious inconvenience or injury to the immediate demand of this kind of product.

To make this program effective the committee recommended that a very substantial or restrictive processing tax be placed upon all hogs of 235 pounds live weight, other than packing sows at the earliest practicable date.

It is further proposed that the revenue necessary to make prompt payment to farmers for their marketings of this class of animals, according to the suggested price schedules, be provided by a processing tax on all hogs marketed in the usual way during the next 12-month period.

In addition, this program will provide very substantial and necessary cash for the present owners of millions of pigs and brood sows, who live in distressed areas where drought and insect pests have destroyed necessary

feed, thus giving to the farmers engaged actively in the hog producing and feeding industry very substantial benefits.

In making these recommendations, the committee stated that it is fully aware of their temporary character and they are being made only to meet the present emergency. "They will be followed, not later than Oct. 1, by recommendations of a much more permanent and, we believe, effective character with the one purpose in mind of getting corn and hogs into a parity price relationship, and keeping them on such a basis," says Mr. Smith.

Mr. Smith explained to the conference that the present potential supplies of pork were more serious than indicated in the official report of the committee. In addition to the seven per cent increase in pigs farrowed and to be farrowed in 1933 over and above that of 1932, and the decrease in exports the past year of around 500,000,000 pounds, he asserted that the present stocks of processors amounted to approximately 1,000,000,000 pounds which is far in excess of normal stocks for this time of year. Informed students of the subject, he said, agree that unless drastic measures are adopted immediately to curtail production, hog prices in the next few months will fall substantially below present low levels.

He also set forth clearly that the suggestions and recommendations of the committee in no way implied destroying the meat from the better class of pigs and sows marketed under the proposed plan.

The committee has been assured, he declared, that those in charge of the disposition of national relief funds could arrange to take all such meat on a moderate price basis and place it in channels that would insure its consumption by the millions of destitute people in America without in any way decreasing the present purchases of meat for that purpose.

It was most definitely indicated that if farmers of the corn and hog belt give their immediate and wholehearted support in putting into effect this emergency program there can be but one result, namely, that farmers who now own pigs and brood sows in drought and insect stricken areas will receive substantial benefits by marketing their sows and pigs and that farmers living in more favored areas who desire to continue their feeding operations on a lighter weight basis than during the past year may expect a substantial increase in the price of hogs. Millions of destitute people now receiving little or no meat also would be benefited under the provisions recommended by the committee.

The suggested program does not call for a processing tax in the immediate future. Later a processing tax would be levied to provide the necessary revenue to balance all costs of the operation over and above market values received. The processing tax necessary to accomplish the intended purpose will be very nominal when compared with the results to be obtained in raising hog prices.

Around 250 representatives of producers and farm organizations, packers, local butchers and retailers, livestock commission merchants, and livestock exchanges attended the meeting at the Willard Hotel in Washington on Aug. 10.

Not a single proposal was offered at the close of the conference other than that of the National Corn and Hog Committee, and the meeting went on record in favor of the committee's report with only one dissenting vote, that of a representative of eastern retail butchers.

The Adjustment Administration was urged to put the emergency program into effect at the earliest possible date because of the acuteness of the situation.

The conference unanimously adopted a resolution offered by President Smith to the effect that every proper official of government, particularly the Secretary of Agriculture and the administrators of the Adjustment Act, put forth every effort to dispose of pork and pork products in the export markets of the world.

The official report of the National Committee submitted by Mr. Smith, the chairman, was also signed by Edward A. O'Neal, president of the A. F. B. F., C. V. Gregory, editor of Prairie Farmer, and Ralph Moyer and Roswell Garst of Iowa.

Pledges of support for the program were voiced by S. S. McCloskey of the National Grange, E. E. Kennedy, Farmer's Union, Chas. E. Hearst, Iowa Farm Bureau Fed., A. Sykes of Iowa, Corn Belt Meat Producers Ass'n., A. H. Baker, Missouri, for the National Livestock Exchange, C. B. Crandall, So. St. Paul, for the Central Co-op. Livestock Commission Ass'n., Thos. E. Wilson, Chicago, prominent packer representing the American Meat Packers Institute, J. H. Mercer, Kansas Livestock Ass'n., Chas. A. Ewing, pres. National Livestock Marketing Ass'n., Geo. R. Collett, American Stockyards Ass'n., Kansas City, John B. Gage, U. S. Livestock Ass'n. Milo Reno of the National Farmers Holiday Ass'n., pledged the support of his organization to "any emergency program which will give production costs to the farmer."

See Your Friends, State Fair Friday, Aug. 25th

Preparations Complete For a Big Farm Bureau Day. Quincy Band To Play

AS WE go to press preparations are being completed for Farm Bureau Day at the Illinois State Fair, Friday, Aug. 25. The I. A. A. tent will be erected in approximately the same location as last year, south and a little west of the farm machinery exhibits. It will be ready for visitors by Saturday, Aug. 19, the opening day of the fair.

The tent will have plenty of chairs, a rest room for women and children, a check room, and drinking water.

The coliseum on the Fair Grounds has been secured for the personality contest sponsored by the I. A. A. and County Farm Bureaus. Fifty-four young women representing as many counties—all winners of county contests—will compete for the cash prizes and the honor of being crowned Country Life Queen of Illinois. Pictures of the girls will be found on pages 14-15.

V. Vaniman announces that the Quincy High School band will play before and after the contest. Earl Smith, president of the I. A. A., will open the program in the coliseum with a short address at 10:30 A. M. Mrs. Chas. Sewell of the American Farm Bureau Federation will deliver the principal address.

The Farm Bureau headquarters tent will display a series of decorated Illinois maps and charts illustrating the many services and accomplishments of the I. A. A., County Farm Bureaus, and Associated Companies.

Members are invited to come and bring their friends, both to their headquarters tent and to the beauty contest in the coliseum.

Wheat Production Control Campaign in Illinois

By R. R. Hudelson, Extension Economist, University of Illinois, Acting State Manager, Wheat Adjustment Campaign

THE campaign to sign up the 100,000 wheat growing farmers of Illinois so that they can get the benefits of the wheat program of the Agricultural Adjustment Act is now in full swing in every county of the state.

If all Illinois wheat growers come in on the plan, approximately $4,771,691 would be added almost immediately to their cash income and purchasing power and more lasting benefits would be expected to come later through adjusting the supply of wheat to the effective demand. Cash benefits also are to be paid in 1934 and 1935, in addition to the approximately four and three-fourths million dollars which would be paid on this year's crop.

DEAN H. W. MUMFORD

The task of directing the educational and preliminary organization work of the campaign has been assigned by the Agricultural Adjustment Administration to the extension service of the College of Agriculture, University of Illinois, including county farm advisers. Where there is no county farm adviser or where the number of growers in the territory is so large as to make it impossible to get the work done on time, an emergency agricultural assistant has been put on special civil service appointment for the work.

County Associations

Later on, the administration of the wheat program in the various counties will be passed over to the county wheat production control associations which will be organized after the campaign is a little farther along.

The broad economic purpose of the wheat program is to balance production with effective demand and, in the public interest, to stimulate the buying power of agriculture. This stimulus to farm buying power will be brought about by bringing the price of domestically consumed wheat to parity, or, in other words, by giving it the same purchasing power which it had in the pre-war period, 1910-1914. Briefly, the plan is the domestic allotment one. About 54 percent, or that part of the country's wheat which is used in the United States for human consumption, is put under a processing tax, and the fund thus raised is used to guarantee the producer a parity price for his proportionate share of the wheat which is consumed at home. Thus the plan is self-supporting and not a drain on the Federal treasury.

Most people mistakingly believe that the government's wheat program is necessary because farmers have been "making two blades of wheat grow where one grew before." As a matter of fact the wheat crisis has been brought about not so much by any blind overproduction on the part of American farmers but rather because the foreign market for wheat has largely disappeared and exports have dwindled to far less than they used to be.

Plan Is Voluntary

The plan is entirely voluntary, and any wheat grower, regardless of whether or not he is a member of any farm organization, may make application for taking part. To this end, county farm advisers already have made up mailing lists of every wheat grower in their counties. County campaign committees of seven to nine men also have been appointed in practically all counties to assist the farm advisers. Community meetings already have been held in some counties to explain the plan to growers, and the remaining counties will hold such meetings immediately. Once the plan is explained to farmers in these community meetings, they will start sending in their applications for acreage adjustment contracts. Signup stations will be set up in each county to which farmers can go a few days after their community meeting and turn in their applications.

In his application each grower will give his acreage and total production for each of the three years, 1930, 1931 and 1932. The average acreage for these three years will be the standard base for figuring each farmer's acreage adjustment. Similarly, the average production for these three years will determine each farmer's allotment. Under exceptional conditions, five-year averages may be used instead of three-year. However, the decision on this will rest with the county allotment committee which is appointed later in the program.

Each farmer's allotment upon which he will get the compensation payment for acreage adjustment will be approximately 54 percent of his average production for the base period, 1930-1932. The idea, as was explained, is to give the farmer a parity price for that proportion of his wheat which goes into domestic consumption, and that proportion has been figured out as 54 percent.

The rate for the compensation payments will be approximately 28 cents a bushel. Twenty cents of this will be paid soon after September 15 and the remainder next spring upon satisfactory proof that the farmer has carried out his acreage adjustment contract.

$160 On 1,000 Bu.

The total allotment for Illinois is 17,041,754 bushels. If all farmers in the state came in on the plan, the total cash benefits on this year's crop would amount to $4,771,691. For the individual grower with an average production of 1,000 bushels, the cash benefits would be about $160, of which $108 would be paid this fall.

As fast as applications come in from growers of each community, they will be checked by a community committee and then passed on to the county office. After all the applications for the county are in, there will be a series of community meetings at which wheat growers who filed applications will vote for a permanent community committee of three members. One of these three will be a member of the board of directors of the county wheat production control association. This board of directors will then meet and elect officers, including the county allotment committee. This allotment committee and the board of directors will be the final authority on individual acreage and allotments.

Paddle Your Own Canoe Governor Tells N. Y. City

Gov. Lehman Turns Down Request To Tax Farmers and Upstate People For Relief of Cities

A FIRM refusal to tax upstate people for the relief of New York City was the response of Governor Herbert H. Lehman to an appeal by Mayor John P. O'Brien for aid.

In a recent message to the New York legislature, Gov. Lehman recommended that New York City and any other city in the state be authorized, during the emergency period, to levy taxes on its own people for such purposes as it deems necessary for work and home relief. The cities now are unable to do that because of legal restrictions.

"I recommend to your consideration," the governor also said, "general legislation authorizing the governor, in the event of a default on the part of any county, town, city, village or special improvement district, to set up a financial agent or agents with authority to limit any expenditure of public funds by such municipality, or the incurring of any debt by it.'

Would Get 41 Million

The Governor flatly turned down Mayor John P. O'Brien's request for doubling the state sales and stock transfer taxes, the proceeds to be turned over to the cities. New York would get $41,000,000.

"To that request I do not accede," the governor said. "I so notified the city of New York when its petition reached me."

The message showed he has not wavered from his original proposal that New York must pull itself out of its own financial difficulties.

The governor would have the legislature go no further than to permit the city to raise the money it needs by imposing its own taxes, without state financial aid. The governor declared in favor of economies in all units of government throughout the state. He promised to send messages on other topics.

Logan Leads

Logan county has the highest five-year average wheat production of any county in Illinois, and will probably secure the largest amount of benefit payments in the acreage reduction program. St. Clair county is second.

Other leading counties in wheat are Mason, Madison, Morgan, and Sangamon.

Gov. Herbert H. Lehman of New York

Wheat Production Control Campaign in Illinois

(Continued from page 5)

Farmers who have made application and who have decided to take advantage of the cash payment on their assigned allotment sign a contract to reduce their acreage for the 1934 and 1935 crops, if so required. The exact amount of this reduction will not be announced by Secretary of Agriculture Henry A. Wallace until August 24, but the reduction will not be more than 20 percent of the farmer's average seeded acreage during the three years of the base period.

Six Advantages

There are at least six advantages to the plan. First, it offers crop insurance in that the grower gets the cash compensation payments in 1933, 1934 and 1935 regardless of what hail, flood or other disasters do to his wheat crops. Second, growers are assured a parity, or higher price for that portion of their crop which goes into domestic consumption. Third, land taken out of wheat production can be put to other uses, thereby making it possible for the farmer to build up his soils and better adjust his cropping systems. Fourth, production costs can be reduced. Fifth, there is a possible allowance because the required acreage reduction may not be as much as 20 percent.

Illinois is said to be in one of the strongest positions of any state in the government's wheat production control campaign, because of the agricultural adjustment conferences which have been held annually throughout the state since 1928 under auspices of the College of Agriculture, University of Illinois, and at the instance of Dean H. W. Mumford. One official of the wheat administration declared that these adjustment conferences had put Illinois seven to eight years ahead of other states in the matter of acreage adjustment.

Illinois Leads

In this connection it is recalled that Illinois farmers, guided by the College of Agriculture, University of Illinois, have made a 26 percent adjustment in their wheat acreage in the past four years, the acreage having been reduced from 2,093,000 in 1929 to 1,549,000 in 1932. Furthermore, farmers of the state have adjusted their acreage of corn and other crops so radically that the acreage of soybeans in Illinois has been multiplied 44 times in the past 14 years. Also, the 288,000 acres of alfalfa grown in Illinois in 1932 represented a 50 percent increase over the 1928 acreage, while the state now grows almost 900,000 acres of the soil building sweet clover crop, whereas not so long ago this legume was considered a worthless weed.

Having already made these adjustments, Illinois farmers, in the main, will not be required to reduce their present wheat acreages, whereas farmers in those sections where the acreage has been mounting will be obliged to cut down their plantings in order to comply with the terms of the government's program.

Trade With Russia Seen As Aid to Farmers Here

Restoration of trade between the United States and Russia is advocated by ex-Senator Brookhart of Iowa who has been investigating possibilities for selling surplus farm products abroad.

Brookhart stated that the Russian government is seeking credit on a seven year basis. The Reconstruction Finance Corporation already has loaned the Amtorg Trading Company, Russia's commercial representative here, $4,000,000. Part of the $200,000,000 available to the Agricultural Adjustment Administration, it is said, may also be used to stimulate exports of surplus American farm products to Russia.

Brookhart stated that Russia is in need of large quantities of American cotton and livestock products including beef and lard. The Russian foreign minister announced that his country is ready to buy up to $1,000,000,000 in foreign goods and raw products provided long-term credit is extended.

The potential annual trade with Russia is estimated at $500,000,000. The Russian government during recent years has acquired an excellent reputation for meeting all its obligations, and the fact that many large corporations both here and abroad are trading with Russia indicates that her credit is satisfactory.

Former Gov. Lowden Is Honored In Broadcast

Awarded Medal For Distinguished Service to Agriculture

A TRIBUTE to Frank O. Lowden of Oregon, Ill., recently awarded the Distinguished Service Medal of the American Farm Bureau Federation for "distinguished service to agriculture" was delivered by President Earl C. Smith, over 57 radio stations in the NBC chain Saturday noon, Aug. 12.

"On behalf of the American Farm Bureau Federation, I am highly honored in being afforded this opportunity to pay its tribute and respect to a great national leader on this occasion when it publicly confers upon the Honorable Frank O. Lowden, Illinois farmer and former Governor of this great state, its highest award for distinguished service," said Mr. Smith.

"It is pleasing, indeed, to know that farmers and their friends throughout the United States are listening in on this broadcast and are in full accord with the speaker as we honor this great leader and statesman.

"I keenly recognize my responsibility in choosing the words to confer this honor, as words seem meager, indeed, to express my innermost feelings to and of Mr. Lowden for his great service and sacrifice in behalf of justice and equity to the farm people of this nation.

His Words Prophetic

"For many years as a farmer, later as a Congressman and then as Governor of Illinois, he has never failed, whenever opportunity would afford, to express clearly and definitely that the nation could only enjoy permanent prosperity to the extent that its agriculture was recognized as the basic industry of all and those engaged in farming pursuits were allowed to receive incomes commensurate with the importance of the industry and on a plane of equality with that enjoyed by the other citizens of the nation.

"Throughout his career, he has proven himself an advanced student of taxation and other public policy matters. He was the first citizen of national prominence in saying to the nation that government policy toward its agriculture must be changed, so that the surpluses of agricultural commodities which our bountiful soil was providing be not allowed to depress the domestic price levels for such commodities.

"For many years, from the platform and through the press, he pleaded with those controlling public policy for the enactment of laws necessary to secure for the American farmer, for that portion of his production consumed in the American market, a price in line with American standards of living and society. He insisted that unless this were done the whole economic fabric of America would break down, that we would find ourselves in a state of chaos and great unemployment because the greatest buyers of all—the American farmer and those dependent upon farmers—were being forced out of the buying market for the products of other industries.

Frank O. Lowden

Made Great Contribution

"Had his pleadings been heard and his counsel and advice followed, we in America would not today be struggling to restore the millions of unemployed people to their former jobs—the American farmer would not today find himself burdened with debt and the nation as a whole facing a total debt of $200,000,000,000 which is more than the value of all the property in the United States.

"He contributed more than any living American in efforts to awaken the citizens of this great country to the seriousness of this situation and we are forced to recognize the soundness of his predictions when he said, 'unless this great farm problem is squarely met and properly solved, it will ultimately undermine the economic welfare of the nation.'

"No sacrifice has been too great for him to make in expressing these honest convictions and forewarning the nation, even possibly sacrificing what is nationally termed the greatest honor of all—the presidency of the United States.

"The consistency with which he has for so many years championed the cause of agriculture and the welfare of the United States, could lead the Awarding Committee of the American Farm Bureau Federation to no other conclusion than selecting him as the outstanding citizen and farmer in the United States to receive its highest award for distinguished service.

"In closing, I want to say to Mr. Lowden, if he is listening in, that I am sure I voice the heartfelt feelings and sentiments of the thinking people of the United States when I say—we not only love you and honor you, but shall esteem your memory as long as the present generation may survive."

Debate Price of Cream In Ice Cream Code

Farmers Represented by I. A. A. and Co-ops. in Conferences with Manufacturers

THE Illinois Agricultural Association and the milk producer co-operatives in Illinois set up by the I. A. A. and County Farm Bureaus are trying to get farmers a better price for sweet cream through the adoption of a code for the ice cream industry that protects the interests of producers.

J. B. Countiss of the I. A. A.; Don N. Geyer of the Pure Milk Association, Chicago; A. D. Lynch, Sanitary Milk Producers, St. Louis; Wilfred Shaw, Illinois Milk Producers Association, Peoria; Forrest Fairchild, McLean County Milk Producers; and Wilkie Lee, Mid-West Dairy Company, Rockford, represented producers at a recent conference in Chicago with Illinois ice cream manufacturers.

The producer representatives insisted on a provision for a substantial premium price over the Chicago 92 score butter market that gives full recognition to extra labor and expense involved in producing high quality sweet cream for the ice cream trade.

A national code for the ice cream industry was considered at a hearing before the Agricultural Adjustment Administration at Washington on August 10. The marketing agreement submitted by the Ice Cream Manufacturers Association is now on file with Secretary Wallace. It includes minimum price proposals, the set-up of the governing committee, terms of discounts and fair trade practices, and a sample of a tentative marketing agreement for the different state units to submit so as to co-ordinate the whole industry.

The national ice cream manufacturers' agreement proposes minority representation for producers. The I. A. A. objected to this provision when submitted by Illinois manufacturers and will insist on equal representation for farmers on the national control board when sweet cream and butterfat price schedules are considered.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

The Difference

FARMER-OWNED grain marketing co-operatives are primarily interested in getting the farmer a better price for grain.

The so-called grain trade is primarily interested in commissions and profits from handling the farmer's grain—the larger the volume the better.

This is the chief difference between the co-operative and the old-line system.

Directors of the Illinois Grain Corporation and Farmers National are emphatically on record in favor of higher prices for grain thru acreage reduction under the domestic allotment plan.

Grain trade papers and official spokesmen are denouncing acreage reduction and the Farm Act, not because they are afraid of a wheat famine as they would have us believe, but because a smaller volume of grain to handle means fewer commissions, lower profits.

It should be easy for growers to decide which system to support.

Good Work In Illinois

THE timeliness and value of the agricultural adjustment conferences sponsored during recent years by the University of Illinois College of Agriculture under Dean H. W. Mumford is emphasized by the wheat acreage control campaign now underway throughout the country.

The fact that Illinois farmers have substantially reduced their wheat acreage since 1929 largely as a result of this work, puts them in a favored position to comply with the government's program with a minimum of rearrangement.

Illinois corn and oat acreages, likewise, were cut in favor of the more profitable crops of soybeans and alfalfa. Had other states been as forward-looking the evils of price-depressing surpluses would have been less pronounced.

The Grain Price Bubble

THE mid-July price crash on the Chicago Board of Trade has its good points. Speculators were run to cover. Exchange officials demonstrated again their inability to keep pure gambling and trading in privileges under control without government regulation. The resulting wild market broke a lot of little speculators and some big ones, brought easy money to others, which has its disadvantages, and threatened to smash the wheat acreage reduction program which alone offers the farmer a way to a permanent satisfactory price level. With proper regulation the market again will reflect the true value of grain, and farmers may intelligently apply needed remedies.

Gov. Lehman To Mayor O'Brien

"I DO NOT accede to that request," was the terse reply of Gov. Herbert H. Lehman of New York to Mayor John P. O'Brien's request that state sales and stock transfer taxes be doubled and the proceeds turned over to New York City and other cities for unemployment and work relief.

In a recent address to the special session of the legislature at Albany, Gov. Lehman said it is wrong in principle to tax the people of one community for the benefit of people in another community. He asked the assembly to give the cities emergency power to levy their own taxes that they may pull themselves out of their difficulties.

It is to be hoped that Gov. Lehman's wholesome and sound policy will be followed hereafter in other states including Illinois.

THE futility of relying on speculation and pegged markets for higher farm prices is amply illustrated by recent experience. The grain exchanges which a few weeks ago were loudly acclaiming what they had done for the farmer are strangely silent now. A short time ago board of trade officials were taking much credit for pegging grain prices, doing exactly what they previously condemned in the Farm Board. As this is written they are disclaiming responsibility for such action and are looking in vain for a goat.

Observations

IN A recent press conference at Washington, Henry Morgenthau, Jr., Governor of the Farm Credit Administration, disclosed some of the things he is up against in the farm mortgage refinancing program.

Knowledge of some of these problems may influence many to be less critical and more charitable toward those in charge of the farm credit machinery.

As Mr. Behnke of Hancock county pointed out in the July RECORD, the whole trouble lies in the fact that the commodity price level is still far below the average of 1921-1929 when most farm debts were contracted. Inflation and farm surplus reduction work have not gone far enough yet to bring sufficient relief. And land bank officials along with private bankers are still smarting from the blows of the depression which drove farm land values down in many cases below the face value of what a few years ago were considered conservative mortgages.

"In June and July alone we received 114,000 applications for loans representing about $400,000,000," Mr. Morgenthau told the press. "And to give you something to compare with that, for the last six months of last year we had only 10,000 applications representing $45,000,000.

"On my recent trip to Illinois, Iowa, Wisconsin, Kentucky and South Carolina, I found our boys working 18 and 20 hours a day to catch up on this job," he continued. "It's a terrific job. On the first of April the whole land bank system had only 210 appraisers, and an appraiser can do only about one and one-half farms a day. On the 28th of July we had 803 appraisers working and 802 in training. And we have to build this force up to 2,500 or 3,000 men if we are just going to keep up with the demand.

"Everywhere I went we told the people that it would be 60 to 90 days until money would begin to flow into these states. It would take that long until they appraise and title search and all that. But there are two things I got out of this trip, one, that the people in the banks are doing everything humanly possible to take care of this sudden deluge of business. There is nobody loafing. And the other thing is that the demand is so much greater than we had any conception it would be."

The administration, Mr. Morgenthau said, is making a special campaign in five states, one of which is Illinois, to refinance farm mortgages and loans whether held by banks or private parties. In Illinois they expect to have at least 100 special appraisers soon at work in addition to the local farm loan secretaries. The new men have instructions "to take care of everybody who wants his mortgage refinanced whether in closed banks, open banks, or no bank. Before we leave a county we will take care of every application from any farmer who wants to be refinanced," he said.

The land banks in all the states have about $90,000,000 on hand and another $100,000,000 has been promised by the R. F. C. After this money is used up in exchange for mortgage paper, the Administration will be forced to sell land bank bonds to the public unless more loans can be secured from the Reconstruction Corporation.

Applications for land bank loans and so called "commissioner's" loans are now being received on one blank. Land bank loans at 4½% are being made up to 50% of the appraised normal value of the land and 20% of the buildings, Mr. Morgenthau said. Commissioner loans are made on second mortgages on land and on chattels up to 75% of the appraised value. The Credit Administration has opened an office in the State House at Springfield, Ill. and is working with the State banking department particularly in refinancing frozen paper held by State banks.

Quality Milk Ass'n. Sells New Dealers

THE Quality Milk Association is supplying three additional milk distributors on the Quad-Cities market, and reports that it now has approximately 50 per cent of the local fluid milk outlet.

The association recently boosted its price to the dealers to 95 cents per cwt. Members of the Quality Milk Association are now receiving a higher price for milk than the outlying producers who are supplying non-co-operating dealers. The price to the consumer continues at six cents per quart.

A protest against extension of the Quad-City milk shed beyond the limits of the trade territory was voiced at the last meeting of the board of directors.

Speaker Rainey Favors Recognition of Russia

Devaluation of Gold Necessary For Higher Price Level, Says Pearson

SPEAKER of the House Henry T. Rainey of Illinois, a member of the Greene County Farm Bureau and the I. A. A., declared in a recent address before the International Apple Association in Chicago that the Roosevelt administration expected to re-establish price levels at or near those for the year 1926.

HENRY T. RAINEY

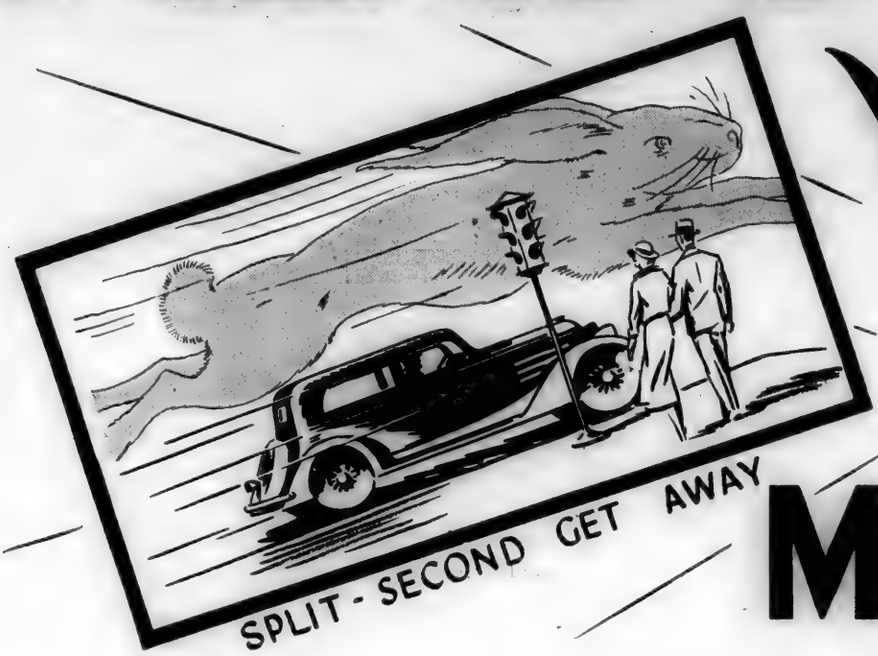
Congressman Rainey asserted that devaluation of the dollar is the quickest and most effective way to restore the 1926 level of prices.

He also urged recognition of Russia to stimulate export trade and provide an outlet for American products. Russia is one of the few nations in the world which has not lifted tariff barriers against the United States.

"Russia needs everything we produce," he said, "and we should not continue to withhold recognition from the country whose government has been in power for 14 years and which today has a strong central authority."

Prof. F. A. Pearson of Cornell University whose immediate superior, Dr. Geo. F. Warren, is close to the Roosevelt administration, expressed the belief that substantial increases in farm commodity prices would not be brought about until the administration definitely acted to reduce the value of gold. He asserted that the nation's attempt to manage the price level is fully justified and will not result in wild inflation.

"Devaluation of the dollar is the simplest way to restore commodity prices," he said. "But this will not insure the future stability of that price level. Stability can only be accomplished by varying the price of gold."



The Reconstruction Finance Corporation recently announced that it will finance the cotton option program of the Agricultural Adjustment Administration for 2½ per cent. The R. F. C. originally offered Secretary Wallace money at four per cent but he turned down the R. F. C.'s offer and obtained $30,000,000 at 2½ and 2⅛ per cent from commercial banks in New York City.

Code Would Clean Up Board of Trade

Administrator Peek Warns Grain Exchanges To Measure Up or Face Stringent Regulation

THE wild speculation of mid-July when the grain market crashed on the Chicago Board of Trade would be done away with as a result of the new grain code ordered drawn up by Geo. N. Peek, chief of the Agricultural Adjustment Administration.

GEO. N. PEEK

Under the terms of the code originally submitted margins required for open contracts up to 250,000 bushels shall be 10 per cent of the market price. On open contracts up to 2,000,000 bushels the margin shall be 10 per cent on the first 250,000 bushels and 15 per cent on the remainder. On all trades over 2,000,000 bushels the rate shall be 20 per cent.

Exchange authorities are given wide authority to examine any and all tickets, records, contracts, accounts and papers of any Exchange member.

Mr. Peek objected to the code submitted suggesting that the exchanges should exclude from membership all persons actively engaged in trading and speculation.

Some exchanges, he said, now have conduct committees from which active traders and speculators are excluded, but the Chicago Board of Trade is not one of them.

Mr. Peek outlined several suggestions for inclusion in the grain exchange code, as follows:—

1. That they do a more thorough job of cleaning up their own organization and practices.

2. That business conduct committees exclude speculators and traders and that they be selected as to warrant public confidence.

3. That trades be policed by specialists hired for that purpose.

4. That exchanges co-operate fully with the grain futures administration at Washington and with local representatives of the administration in the cities where located.

Before the grain code was considered Peek warned the grain men that they faced the most drastic government control if the code proposed was not satisfactory.

He said: "We have one responsibility under the law. That is to get the farmers' prices up to parity and to keep them from falling below that point. You gentlemen operating the market also for the farmers' grain also have a responsibility. Under the law we are going to exercise every power that we have, if it is necessary, to accomplish the purpose of the law.

"Unless we can get these farm prices up—I don't mean after the farmer has sold his grain, but before he has sold his grain—I anticipate that you will face legislation next winter which may make what we are talking about now fade into insignificance compared with the restrictive provisions that will be placed upon you.

"I say that with all the candor in the world, because I am interested primarily in preserving the social order under which we have all grown up and prospered to a greater or less degree.

"With the number of strikes all over the country — the coal strike in Pennsylvania, the milk strike in New York, the lumber strike throughout the entire lumber regions, and others —if you don't keep the farmer conservative, then he is going with the other crowd. He isn't going to stand still and be dispossessed of his home and his property through no fault of his own.

"It is in the interest of the nation, I think, that everything that can be done shall be done to keep him conservative.

"That has got to be changed, and if this code doesn't go far enough to correct the abuses on the exchanges, then I urge you with all the sincerity I have in my heart to undertake to do whatever is necessary to clean your own house and justify your existence as the market for the farmers' grain."

In the meantime the Grain Futures Administration is making a complete investigation of the grain markets and will report to the Secretary of Agriculture with recommendations for further regulation if necessary.

The grain code was ordered to prevent recurrences of the 30 cent drop in wheat prices in two days caused by one speculator, "Doc'" Crawford, obtaining 13,000,000 bushels of corn alone on margin contracts besides several million bushels of other grain.

When prices started on the toboggan and Crawford was unable to put up any margin he had to be sold out.

This selling out process meant in effect that his brokers, 17 in number, would be compelled to dump this huge quantity of grain and thereby cause a severe break in grain prices.

It is known that Crawford traded in a large volume of grain privileges or indemnities which is purely gambling. At one time the government barred this practice and the new grain code also will stop this kind of speculation.

Since the sharp break in the market Board of Trade spokesmen have been strangely silent. Only a few months ago they were loudly berating the Farm Board, the Department of Agriculture, the Grain Futures Act and farmer-owned and farmer-controlled co-operative marketing institutions demanding absolute freedom against any kind of regulation. As a result the grain exchanges were given a free hand with the result noted.

An unregulated speculative market is not only a nuisance but also a detriment to the grain grower. He doesn't know whether the crop will bring enough to pay the threshing bill and taxes or not. With such an unreliable market it is impossible for him to plan ahead. The speculative system is directly opposed to planned production and price stabilization provided for in the Agricultural Adjustment Act.

On July 31 the grain market dropped to the limit set by the Exchanges at the direction of the Secretary of Agriculture. On August 1 the market went to the other extreme with but few trades in between.

The supposition is that a few big speculators were pushing it up or down at will. Incidentally, during the moratorium on speculative trading a few months ago cash prices steadily advanced. Many believe that if a six months moratorium were placed on future trading and speculation, the farmer would be benefited. In such an event the public would be forced to turn to horse racing, or the stock market to satisfy its gambling instincts, and the grain brokers would miss their lucrative commissions, but farmers would be in a better position to work out an orderly production and marketing program which in the end is the only way to re-establish and maintain reasonable prices for farm products.

Farmers Can Win Through Organization

By J. B. Countiss and Frank Gougler

EVERY time you see the name "Prairie Farms," or the emblem of Illinois Producers' Creameries, you should be reminded that another mile post has been passed by organized farmers in their efforts to secure a greater share of the consumer's dollar and give the consumer a better quality butter for his money.

To get more money back to the producer for his butterfat it is necessary first, to produce good cream; second, to get it to the creamery while it is still fresh; and third, to manufacture this cream into butter of superior quality in economically operated plants.

Now Illinois farmers in addition to producing and processing their cream are going a step farther. They are selling their product under their own name and trademark to stores, hotels and restaurants. They are offering the consumer a high quality butter at a reasonable price.

This is the new deal in Illinois for cream producers. All savings in procurement, manufacturing and selling of his product go directly to the producer.

Three centralized co-operative plants are now operating at Bloomington, Peoria and Rock Island. Four more similar units are being organized.

The plants now making butter at the rate of three to four million pounds annually are supplied with fresh cream picked up at the farm at least twice a week by a fleet of 70 trucks.

Contrary to expectation experience shows that procurement costs have been reduced by this method and the quality of butter decidedly improved over that resulting from the cream station method of assembly.

The annual production of butterfat in Illinois approximates 50,000,000 pounds. The value of this crop can be stepped up easily two cents per pound by more frequent marketing and manufacture into a higher quality butter. Not counting the additional savings possible through efficient and economical plant operations and sale of the finished product, this price advance alone would amount to $1,000,000 more annually to Illinois farmers if applied to their entire output.

Here is one more way in which farmers can win through organization.

The Claims Department of the I. A. A. collected a total of $263,068.79 in loss and damage and other claims from 1920 up to July 1, 1933.

Milk Producer Co-ops. In Illinois Organize

Co-operative milk producer associations operating in Illinois organized a state federation and considered the details of a milk trade agreement for the state as a whole at a meeting in the I. A. A. offices Tuesday, August 15.

As soon as adopted, the trade agreement or code will be submitted to the Agricultural Adjustment Administration for consideration and approval.

Meet With Truckers

Ray E. Miller, director of livestock marketing, and G. C. Storey of the Chicago Producers met with livestock truckers and producers in the Marshall-Putnam Farm Bureau office, Henry, on Aug. 10.

The following day Miller, Storey, and E. T. Robbins, extension specialist, attended a cattle feeders' tour sponsored by the M.-P. Farm Bureau.

"Go into the history of any law enacted for the benefit of farmers and you will find in the background the farmer's own organization."—Ralph Snyder, President Kansas State Farm Bureau.

"The rugged individualism of farmers has helped the organized consuming world buy its foodstuffs at the cheapest price. The result has been disastrous both to the other fellow and to farmers, but to farmers first. The only logical system in sight so far by which the farmer can bargain collectively—and effectively—for the sale of his products, in a highly organized society of buyers, is through co-operative marketing."—Senator Arthur Capper.

Paul E. Mathias Added To I. A. A. Legal Staff

PAUL E. MATHIAS, first assistant to DeWitt Billman, executive secretary of the Legislative Reference Bureau at Springfield, during the past five years, was recently employed by the I. A. A. as assistant counsel in the Legal Department. He began work with the Association on Aug. 1.

Mr. Mathias was born near Rochester, Indiana where he attended the rural schools, working on his father's farm during vacation until he finished college.

He took his pre-legal and legal work at the University of Chicago where he received his LL. B degree in December, 1926. Since that time he has been employed by the State of Illinois in drafting bills for introduction in the legislature, and doing legal work for the legislature, the Governor and the executive departments.

PAUL E. MATHIAS

Mr. Mathias attracted the attention of I. A. A. officials while engaged in drafting measures introduced and sponsored by the Association in recent sessions of the General Assembly. He comes to the Association highly recommended and with years of successful experience in his field. He addressed the state association of county officials, supervisors and commissioners at their recent meeting in Danville, on legislation passed in the last General Assembly affecting their interests.

Mr. Kirkpatrick, general counsel and head of the Legal Department, with his associates, will handle all public utility, transportation, and right-of-way matters in addition to other legal matters referred to the Association by members and associated organizations.

Mr. Guy Baxter will direct the claim work, and rate service to members and associated companies as head of the transportation division under the general supervision of Mr. Kirkpatrick.

"The Farmers National Grain Corporation was built largely out of facilities already owned by grain growers, and today either owns or controls 75,000,000 bushels of terminal, sub-terminal, and country elevator space."—C. E. Huff.

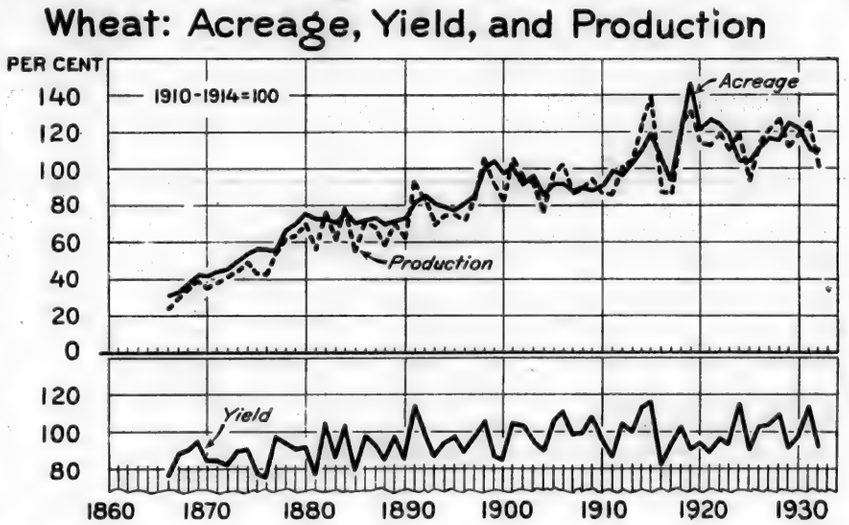
Acreage Regulates Production In Long Run

Department of Agriculture Presents Arguments For Wheat Acreage Reduction Campaign

IN the long run acreage and not the weather man regulates wheat production, according to the U. S. Department of Agriculture. It is true that the wheat crop will be short this year, the Department says, but a study of production in the past ten years shows that weather has had much less to do with piling up surpluses than increased acreage. The accompanying chart reveals how closely production and acreage have gone along since 1866. In the same period it has been shown that the yield has been comparatively stable.

As a corrective to inferences that may be drawn from the May winter wheat forecast, which indicated an outturn nearly 30 percent below that of last year and nearly sixty percent below that of 1931, the Department draws attention to the trends of production and acreage during the last 40 years. Production increased about 80 percent and acreage about 60 percent. The difference is attributable to a gain of more than 20 percent in yields per acre. But this gain is as much a man-made factor as the acreage. It reflects the improvement of varieties, of better farm practice, and of pest control.

The accompanying graph shows the trends of production, acreage, and yields per acre in the United States. Acreage and production from 1890 to 1930 moved upward together, with the former increasing its lead as the yield per acre rose. Taking the country as a whole, the production per acre was surprisingly uniform from year to year. From 1905 to 1930 the average yield was 14.5 bushels. The highest yield was only 17 bushels and the lowest 12.2. Seasonal influences affecting yields had obviously a small influence as compared with the acreage in determining the volume of production. Locally and seasonally the effect of the weather and of insects and diseases often seemed preponderant. But these influences varied in opposite directions from year to year and canceled out, whereas the influence of a growing acreage remained constant.



Price developments in the present crop season do not necessarily betoken a permanent improvement in our wheat situation, the Department declares. They reflect inflation buying, as well as heavy winterkilling, an abandonment of nearly a third of the acreage, and the probability of the smallest crop in 29 years. This country's wheat acreage jumped from 50,185,000 in 1913 to 73,099,000 in 1919, and was 12,000,000 acres above pre-war as late as 1929. It totaled 55,177,000 acres last year. With a carryover three (360,000,000 bushels) times the normal and a tremendously reduced foreign demand, this acreage was heavily excessive. Normal production next year on an acreage as large as that seeded this year would give us more than 800,000,000 bushels, and this, in view of the great decline in exports, would mean a substantial addition to the domestic carryover.

It would be a dangerous mistake, the Department says, for farmers to conclude from the immediate crop and price situation that a reduction of acreage is unnecessary. Such a view would virtually ensure heavy overproduction next year. Unless steps are taken to prevent it, the winter acreage abandoned this season will be planted again next fall. Indeed, the acreage will tend to be increased. That is the usual sequence when a partial crop failure boosts prices. But it is not usual for generally low yields to come in succession. Hence on the acreage that the ordinary course of events would bring into production for the crop year 1933-34, a surplus above marketing possibilities would be virtually a certainty.

Relying on nature to correct surplus difficulties has another serious drawback in that it increases the farmers' unit costs of production. When bad weather, pests, and diseases cut down production, rising costs incurred in anticipation of a normal yield frequently more than counterbalance any resulting rise of prices. This is particularly true of wheat in the United States when it is on an export basis; for low yields associated with high unit costs in this country may run against high yields and low unit costs in competing countries. Profits in agriculture, as in other industries, depend on the margin between production costs and prices. It is necessary when overproduction exists to reduce production by methods that do not increase costs. Depending on the destructiveness of diseases and pests to regulate the output is uncertain and inefficient.

In the case of this season's winter wheat crop, the rise of prices that has taken place already offsets the effect of the reduced yield. The farm price of wheat in April averaged 43.1 cents a bushel, as compared with 31.6 cents in December last. Certain of the effects of reduced yields lower the farmer's expenses. His outlay is less, for example, for threshing and handling the crop. Present indications are that the winter wheat growers will get as large a gross income from their production this year as they got for their much greater output last year. On many previous occasions, reduced yields have not been adequately compensated by a rise of prices.

Farmers cannot expect a repetition of this conjunction of circumstances favoring a rise in price. On the contrary they should expect, in the absence of production control, a distinctly opposite result. Yield statistics covering the last half century seem to warrant the prediction that the sharp drop in the yield per acre will be compensated next season by a sharp rise. Acreage statistics warrant the prediction that, if nothing is done to restrain the tendency, the acreage too will rise. Hence the existing situation tends to throw the balance between the supply and demand elements still further out of adjustment, rather than to put it right. Should things work out that way, only an inflationary price rise or a big increase in the foreign demand could prevent wheat from becoming still more a drug in the market.

Less Wheat In Nine Countries

Wheat production in nine countries that grow more than 30 percent of the world crop outside Russia and China is forecast at 983,891,000 bushels in 1933 against 1,154,221,000 bushels harvested in 1932, by the Bureau of Agricultural Economics. These countries produced 1,421,961,000 bushels in 1931. Seeding is almost completed in Australia and is proceeding under fairly favorable conditions in Argentina.

Of the nine countries—United States, Mexico, Spain, Algeria, Morocco, Tunis, Egypt, India, and Japan—only three countries—Mexico, India, and Japan—expect increased production this year over last. The crop in India is forecast at 347,162,000 bushels compared with 339,621,000 bushels last year.

The bureau reports favorable wheat prospects but probable reduced yields in Germany, an early harvest in France, better than average wheat condition in Czechoslovakia, some deterioration of the crop in Poland, and above average condition in Sweden. The 1932-33 crop in Uruguay will be insufficient to meet domestic consumption requirements.

Secretary Wallace is expected to announce the percentage of wheat acreage reduction for 1934 on or about Aug. 24. To get benefit payments growers must reduce their acreage the specified percentage.

Magic Aladdin Gas Is New Motor Fuel

County Managers Meet at Chicago and Springfield to Launch Sales Program

ILLINOIS FARM SUPPLY COMPANY, and the 53 cooperative county service companies affiliated with it in supplying petroleum products and kindred farm supplies to more than 75,000 Illinois farmers, on August 15 introduced a new gasoline, Magic Aladdin, to its customers. Indications are that the new motor fuel will enjoy widespread popularity. Officers of Illinois Farm Supply Company confidently predict that all gasoline sales records will be broken as soon as the company's customers have had an opportunity to try out the new fuel.

L. R. Marchant, manager of the Illinois Farm Supply Company, says regarding the new product:

"Constant improvements have been made in our Aladdin gasoline ever since Illinois Farm Supply Company was organized, but the greatest improvement has taken place within recent weeks. The most modern methods of blending and refining have produced an outstanding motor fuel — Magic Aladdin — a high-compression, anti-knock gasoline that is clean-burning and free from sulphur, gum and the gum-forming ingredients that multiply motor ills.

"Most ordinary gasolines burn with extreme rapidity under the temperature and pressure of modern, high-compression engines. The sudden expansion of gas causes a distortion of piston heads and cylinder walls, producing the familiar 'knock,' which greatly reduces engine power and eventually results in mechanical injury to the motor. In Magic Aladdin, our customers have a real knockless gasoline that has the additional advantages of instant pick-up, split second get-away, and greater power and mileage. The new Magic Aladdin is to be sold to our customers at no increase in price; that is, they have the opportunity of obtaining this new power-plus fuel at exactly the same price they have been paying for Aladdin regular."

Magic Aladdin was "launched" at meetings of service company managers and directors held at Chicago on August 11 and at Springfield on August 14. Practically every company in the state was represented at these meetings which were presided over by F. E. Herndon of McDonough county, president of Illinois Farm Supply Company.

NOTICE
ILLINOIS AGRICULTURAL ASSOCIATION
ELECTION OF DELEGATES

Notice is hereby given that in connection with the annual meetings of all county Farm Bureaus to be held during the months of August, September and October, 1933, at the hour and place to be determined by the Board of Directors of each respective county Farm Bureau, the members in good standing of such county Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of the Association, including the election of officers and directors as provided for in the by-laws of the Association.

No annual meetings will be held during August.

During September annual meetings will be held in Christian and Jefferson counties.

During the month of October the following counties will hold annual meetings: Adams, Cass, Cumberland, Ford, Scott, Hancock, Henderson, JoDaviess, Warren, Marshall-Putnam, Menard, White, Montgomery, Pike, Pulaski-Alexander, Shelby, Stark, Macon.

Signed,
G. E. Metzger, Secretary
August 20, 1933

Larry Williams Addresses County Bureau Picnics

Lawrence A. Williams, manager of Country Life Insurance Co., reports excellent attendance and widespread interest in acreage and crop reduction plans at Farm Bureau picnics he has addressed during recent weeks.

700 at Meeting In McHenry County

More than 700 McHenry County members and their guests attended a county-wide meeting held at Woodstock the night of Aug. 10. Secretary Geo. E. Metzger substituted for President Earl C. Smith who was scheduled to speak. Mr. Smith was unavoidably detained in Washington by developments in the hog reduction program which he submitted to a general conference called by Chief Administrator Geo. N. Peek on Aug. 10.

McQueen With AAA

W. C. McQueen of Elgin, formerly president of the Kane County Farm Bureau and first president of the Pure Milk Association, has been employed by the Agricultural Adjustment Administration to serve in an advisory capacity on milk trade agreements.

LaSalle County Grain Growers Meet Mendota

Hear President Huff of Farmers National, Secy. Geo. E. Metzger and C. P. Cummings

THE Farmers National Grain Corporation's job is not merely merchandising a car of grain on any market to which it may happen to be shipped but to so organize its efforts that this grain may be moved as directly as possible from the point of surplus to the areas of need and that this be done as cheaply as possible, C. E. Huff, president of the Farmers National Grain Corporation, told more than 400 farmers and their wives at a meeting in the Mendota high school July 17.

"We are building a marketing organization," said Mr. Huff, "to help the farmer secure a price for what he has to sell on a parity with the price of commodities he has to buy. The Farmers National will handle 15 to 20 per cent of all the wheat marketed in the United States this year."

Mr. Huff explained that of the $15,000,000 borrowed from the Farm Board approximately $5,500,000 had been loaned on good security to country elevators, and approximately the same amount has been used to buy terminal facilities which have proved very profitable; and a little more than $4,000,000 is in a liquid position for use in transacting business. This loan, he says, benefits more than 300,000 farmers and is less than one-fifth as much as a single bank in Illinois secured from the government.

Secretary George E. Metzger of the I. A. A. reviewed the program of the I. A. A. in the recent General Assembly.

"The value of representation by organized farmers at Springfield in the last session was not determined so much by the bills that were passed as by the bad bills the I. A. A. helped to kill," said Metzger. He predicted that organized agriculture will have a battle on its hands next winter in preventing Cook county from driving through new legislation taxing downstate people for the relief of unemployed in the metropolitan area.

C. P. Cummings, general manager of Illinois Grain Corporation, asserted that the Illinois regional handled more than 15,000,000 bushels of grain last year which undoubtedly was the reason so much opposition was shown to the co-operative marketing program in Illinois which returns the profits in handling grain to the producer.

E. E. Stevenson, president of the LaSalle County Farm Bureau, presided.

Chicago Milk Shed Gets First Trade Agreement

But Legal Battles Loom as Roadside Stands Refuse To Abide By 10c Price

TO the fluid milk industry in the Chicago milk shed goes the honor of securing the first trade agreement under the Agricultural Adjustment Administration. The agreement was initiated by the Pure Milk Association and Chicago milk dealers. It was delayed for weeks while the Agricultural Adjustment Administration (Geo. N. Peek) and the National Recovery Administration (Gen. Johnson) argued as to which should have jurisdiction. Finally the matter was taken to the White House where President Roosevelt decided for the A.A.A.

D. N. GEYER

The influence of President Ed. A. O'Neal of the American Farm Bureau Federation was mighty helpful in getting our agreement administered by the Adjustment Administration, said Don N. Geyer, manager of the Pure Milk Ass'n.

The agreement prescribes among other things that the producer shall receive $1.75 per cwt. for base milk and that the retail price shall be 10 cents per quart to the consumer. The so-called "independent" dairies and roadside milk stands which have been retailing unpasteurized milk, often in unsanitary and germ-breeding surroundings, at 6 to 9 cents a quart or less, are contesting the agreement and propose to carry the question up to the Federal Supreme Court. They insist on the right of selling milk for less than 10c when the consumer comes after it. Meantime the State Department of Agriculture has started to prosecute a number of milk stands for violation of sanitary regulations under the state pure food laws. Until these questions are settled the Chicago market will continue in an unstable condition, with the regular dealers threatening to lower the price to save their business unless the unfair cut throat competition of the roadside stands and "independents" is eliminated. At the same time organized dairymen are demanding that the trade agreement be amended at an early date to give them a 50 to 75 cent increase in the base price so they can pay interest and taxes and maintain their farms.

Honor Frank I. Mann

More than 300 friends of Frank I. Mann, noted soil and crop expert of Gilman, Iroquois county, gathered at his home Sunday, July 30, in recognition of his contribution to the betterment of Illinois agriculture.

Robt. A. Cowles, treasurer, represented the I. A. A. The picnic in honor of Mr. Mann was arranged by Prairie Farmer and the Iroquois County Farm Bureau. Ex-Gov. Warren T. McCray of Indiana, Dean Mumford, Prof. Lehmann and Dr. Bauer of the University of Illinois, Congressman Chas. Adkins of Decatur, C. V. Gregory and Floyd Keepers of Prairie Farmer, Eugene Funk of Bloomington, and many others including Farm Bureau member delegations from central and eastern Illinois counties attended.

Scale Down Debts, Get Commissioner Loans

Examples of How Farmers Are Being Refinanced

"Reports from the Commissioner's agents show that much assistance already is being extended to farmers in the numerous ways made possible by their loans, including forestalling foreclosures, scaling down of debts and reduction in interest rates," says a recent statement from the Farm Credit Administration.

"A Commissioner's loan of $900 recently made to a farmer in Louisiana whose total debts practically equalled the appraised value of his farm made it possible for him to scale down a $726 second mortgage bearing 8 per cent to $450, to settle his $161 tax bill for $147 cash, and to pay off $662 of other debts for $165 cash and have something left with which to carry on his farm operations for the current year. He secured a scale-down of approximately $724 on his indebtedness or about 25 per cent.

"Another farmer in North Carolina had a first mortgage amounting to $3,751 on 126 acres appraised at $4,213. This farmer secured a Federal Land Bank loan for $1,700, and a Commissioner's second mortgage loan for $1,200. He used the Federal Land Bank loan and $702 from the Commissioner's loan to retire the first mortgage, securing thereby a scaling down of about 33 per cent. Of the Commissioner's loan, $451 was used to pay off a second mortgage amounting to $994. The balance was used to pay other debts.

"A Commissioner's loan of $2,500, made to a farmer in Minnesota, paid off a loan of $2,906, other indebtedness amounting to $54.20, and taxes of $148.53. This farmer secured a scale-down in his debts of approximately $638, a slight reduction in interest and had funds left for farm operations during the current year.

"Another loan made in Missouri resulted in a scale-down of about $300, or 10 per cent on the first mortgage and a reduction in the interest rate to the borrower from 6 to 5 per cent. This farmer obtained a Commissioner's loan for $3,000. His farm was valued at only $3,200 and he had a first mortgage on it for $3,300, bearing 6 per cent. Obviously, it was necessary for the Commissioner to secure other collateral than that of the farm for a loan of this size. A chattel mortgage for $411, and a crop lien of $189 on 42 acres of crops gave the Commissioner's agent the required amount of collateral.

"A Commissioner's second mortgage loan of $5,000 on a 98-acre farm in Massachusetts, and a $10,000 Federal Land Bank loan enabled a farmer to wipe out his first mortgage of $23,000.

"Of course, not all farmers getting Commissioner's loans are able to secure a scale-down in the amount which they owe, but in nearly all cases there has been a reduction in the rate of interest from that which they have been paying. Several reports on loans made in the Middle and Far West indicate that the borrowers have been paying 8 per cent interest. Commissioner's loans carry an interest rate of 5 per cent. They are made for a longer period of years than most of the loans which are being replaced. Usually, they are for a 13-year period and during the first 3 years no installment on the principal is required."

Tomato Prices Boosted

Tomato prices to farmers were boosted 25% by several large processors at the request of Chas. J. Brand, co-administrator of the Adjustment Act. The Campbell Soup Co. announced that the price of firsts in Eastern States was raised from $14 to $17.50 a ton and seconds from $8 to $10.

H. J. Heinz increased its contract price in New Jersey from $11 to $13.

C. S. Love, farm adviser in Clay county for the past several years, has been employed as adviser to succeed T. R. Isaacs in Mason county.

Number 10 | OCTOBER, 1933 | Volume 11

It's Time To Mobilize For Action!

County Leaders at Decatur Unanimously Endorse Fall Campaign For Greater Unity of Agricultural Forces, Higher Farm Prices, Lower Taxes, Adequate Credit the Goal

MORE than 2000 Farm Bureau leaders representing every organized county in the state unanimously voted to launch a statewide campaign beginning Oct. 1 "For the Mobilization of Illinois Agriculture," at a mass meeting in the Decatur Armory, Monday Sept. 18.

Meeting at the call of President Earl C. Smith, leaders from every section of Illinois had arrived by noon. The armory, gaily decked with huge signs bearing slogans suggesting the objectives of the drive, and banners for each organized county, was nearly filled by 12 o'clock. A band provided entertainment while the leaders assembled under the banners of their respective counties and waited for the call to order which came shortly after 12:30 by President Smith.

To Fight for These

"Give Us a Price and We'll Buy the Nation Back to Prosperity," "Cut Property Taxes in Half," "Make the Farm Credit Act Effective Without Delay," "Mobilize for Crop Planning, Co-operative Marketing, Lower Taxes, and Higher Prices," were the challenging slogans which not only expressed the aim of the drive for greater organization, but also the spirit and determination of the conference to fight for their achievement.

Following short opening remarks by the President, Secretary Geo. E. Metzger read the report of the Board of Directors of the I. A. A. to the boards of directors and executive committees of Illinois County Farm Bureau as follows:

Serious problems confront the agricultural people of the United States. Illinois has its share of these difficulties. A new deal is on nationally which contemplates raising price levels of agricultural commodities with the consequent widening of industrial margins and increasing wages.

Trade agreements and industrial codes are a part of the program and are now being worked out by industrial and producer groups for approval by administrative heads in Washington. Practically all these codes and trade agreements in so far as industry is concerned are being handled by trade organizations. Usually these trade organizations are in a position to appoint a small committee that is in position to speak for its industry. Agriculture faces a serious handicap in this respect.

Why Organization?

Agriculture's danger may be set forth briefly under five heads:

1. That trade agreements involving the practices, ethics, method of handling and price of agricultural products may be largely worked out by processor or handlers of agricultural products without proper producer representation.

2. That if there are to be higher price levels, the price of manufactured and processed products may rise out of all proportion to the price of agricultural products, because of the better organization in those industries.

3. National legislation enacted by the Congress and intended to restore agriculture contemplates a parity price on the farm, but farmers are not in position to assist in the administration of these laws which make a parity price at the farm possible, without strengthening their organizations and action through them.

4. New Federal agricultural credit legislation has been designed to refinance agriculture through long time, intermediate and short time credit at lower rates of interest. The aim and intent of the law is that farmers should ultimately own and control their credit machinery. Apparently administration of the Act is failing to get underway with the result that many mortgages are being foreclosed and many farmers are losing their homes and their property, most of which appears to be unnecessary and uncalled for.

5. Illinois farmers are in danger of losing such advantage as they have gained in their past organized tax programs and have additional taxes loaded on them unless immediate organized effort is made to curb public expenditures and spread the tax base so as to make possible drastic reductions in the present taxes imposed on agricultural property.

To this end the Board of Directors of Illinois Agricultural Association sets forth for your consideration and your approval A FALL MOBILIZATION CAMPAIGN FOR 1933 with the specific purpose of raising farm prices, lowering property taxes and speeding the administration of credit legislation; so that agriculture can be placed on a parity with increased price levels and wages in other industries.

The Farm Bureau is the dominant farm organization in Illinois. The Farm Bureaus and Illinois Agricultural Association for years have had a program which would justify a much larger membership than we have experienced. The time is here when the Association and the County Farm Bureaus should take an aggressive lead in mobilizing the agriculture of Illinois for its economic betterment.

Therefore, the Board of Directors strongly recommend that a campaign be launched for the purpose of arousing the farmers of Illinois to the existing situation and take the responsibility of pointing out to unorganized farmers the need of their immediate support in order to measure up to the grave situation confronting agriculture.

The Board of Directors of Illinois Agricultural Association authorized the call of Farm Bureau leaders and recommends to County Farm Bureaus the following plan for the immediate mobilization of agriculture throughout the State:

Here is the Plan

(a) That improvement of farm prices be obtained through co-operation to the fullest extent with existing federal agencies, and the more complete development of our co-operative marketing machinery.

(b) Immediate, effective and sympathetic administration of the Farm Credit Act to the end that farmers may ultimately control credit machinery and be benefited by lower interest rates intended by the Congress.

(c) To mobilize the man power in the industry of agriculture in Illinois in an organized way to the end that the property taxes be limited and public expenditures reduced.

That a suitable petition be circulated among the farmers and property owners in the State of Illinois, petitioning his Excellency, the Governor of Illinois, to call a special session of the Legislature

Part of the audience of approximately 2,000 in the Armory at Decatur, Monday afternoon, Sept. 18. C. V. Gregory, editor of Prairie Farmer, is speaking on farm credits. The Farm Bureau leaders pledged 100 per cent co-operation in the Fall Mobilization Campaign to speed the realization of Parity Prices for Agriculture, Property Tax Limitation and Credit Relief.

for the purpose of submitting to a vote of the people, in November, 1934, needed amendments to the Revenue Article of the Constitution, which will make possible the broadening of the tax base and place upper restrictive limits on property tax rates.

To promote this program of education, to circulate the petition for tax reform and to execute the campaign of mobilization, the Board of Directors of the Illinois Agricultural Association recommends for your consideration the following plan:

That there be appointed by the President of the Illinois Agricultural Association, from the staff and/or affiliated companies, a Campaign Committee, of which the President and Secretary of the Illinois Agricultural Association shall be members. That this Committee employ for a period of from four to six weeks a special campaign director who shall have active charge of the campaign under the direction of the Campaign Committee. That under the campaign director there be appointed from the staff of the Illinois Agricultural Association and/or affiliated companies, three regional directors, who shall have charge of respective territories allotted to them by the Campaign Committee. That in each county there be selected a Campaign Captain, to be selected and appointed by the chairman of the Campaign Committee, subject to the approval of the County Farm Bureau President. That within the several counties co-operating in the campaign there be selected by the county captain, by and with the advice of the County Farm Bureau, a force equal in number at least to the number of townships in the county, these selected men to be known as lieutenants. The lieutenants to be selected from men in the organization who have shown their ability to mobilize man power and influence men to take constructive action.

The circularization of the petition shall be a part of the work of the county field force and every farmer residing within the respective counties shall be interviewed.

To partially compensate the field force, the Board of Directors of the Illinois Agricultural Association have authorized the execution of a memorandum of agreement allowing reasonable compensation for their time and efforts.

Further, that a proper publicity campaign be arranged which will set forth the necessity for such mobilization within the state.

That if this plan for a Full Mobilization Campaign meets the approval of a substantial majority of the County Farm Bureau Boards, that each County Farm Bureau Board of Directors approving the plan pass proper resolutions authorizing their respective officers to execute suitable memoranda of agreement with the Illinois Agricultural Association as may be necessary to expedite the campaign and contribute in making it a success.

Authority In The Law

President Smith followed the report by briefly outlining the tremendous decline in net farm income from around seven billions to one billion dollars in 1932, the sharp rise in taxes from 24 to 144 million dollars in the state, and the consequent increase in debt not only of agriculture but of all groups. Total indebtedness in the United States, he said, approximates our national wealth as now appraised.

We have the authority of law to put agriculture prices up and relieve the distress of farm debtors, said Mr. Smith, but the trouble comes in its interpretation and administration.

The time has come for greater unity of Agricultural forces.

We are witnessing organized labor stepping out and insisting that their increased cost of living be met by higher wages. Their demands are being met. Shorter hours, and minimum wage scales are being reflected in higher prices for the things farmers must buy. Farm prices have not kept pace with farmers' increased costs.

What are we going to do about it? What is the answer? Shall we oppose what others are doing for themselves, or shall we work constructively for the advancement of our own cause?

President Roosevelt has said that farm prices must rise first, the farmers' buying power must be restored to lead us out of the depression. The intent and purpose of the administration to accomplish this, I believe, is sincere but realization of the goal is not coming as rapidly as we would like to see.

Reflecting the widespread criticism of administration of the new farm

credit act, it was pointed out that relief is not getting back to needy farmers who are trying to save their homes. Farm loan officials are disregarding the "Normal Value" clause in appraising farms for which applications for federal loans have been filed.

Even where appraisals are being made, such appraisals, speakers from the floor said, are being made at the rate of only 25% of the normal value of such farms, contrary to the law which allows 50% of normal appraised value plus 20% of normal value of buildings.

It is up to us to organize, to be militant in demanding that Agriculture be rehabilitated not only for our sake but to save America itself, said Mr. Smith. Even the industrial East, he said, has changed its attitude about the need for restoring agriculture to a profitable basis. The New York Times which fought the McNary-Haugen plan years ago, recently stated editorially that the hope of the country rests upon the restoration of agriculture and farm buying power and went so far as to suggest that the leaders of Tammany Hall go out and organize the farmers more effectively so they may help themselves, and so help the nation.

Predicts Inflation

Clifford V. Gregory, editor of Prairie Farmer, received a fine ovation when introduced to discuss farm credits. "It's important to be able to borrow money," he said, "but it's more important to be able to pay it back. We need higher prices. I believe the answer to our problem is inflation. It is worth more than all the others—NRA, AAA, etc. I believe we will have inflation within the next 60 to 90 days.

"But it is up to farmers to reduce production enough to make up for our lost foreign markets. Even if everyone was employed and could buy our products, we would still have too much to supply domestic needs. Unpopular as acreage and crop reduction is, we must co-operate."

Speaking of the Farm Credit Administration, he said, apparently there is no Santa Claus. We are not going to get much help from that source. The only way for agriculture to get proper credit is for a strong organization like the Farm Bureau and I. A. A. to go down in every county where needed and organize local credit associations to supplement the banks. Remember that most of the credit administration officials have a banking background. They are afraid the money loaned will not be paid back.

"Only the things we do ourselves are the things that are sure to be done."

OFFICERS AND DIRECTORS OF I. A. A. AT DECATUR

They unanimously adopted and submitted plans and resolutions to state-wide conference of County Farm Bureau leaders, for approval.
LEFT TO RIGHT STANDING are Directors Harris, Black, Endicott, Sorrells, DeFrees, Ihrig, Curtis, Lawrence, Marshall, Muller, Bamborough, and Dennis.
SEATED, LEFT TO RIGHT are Directors Lambert, Cope, Secretary Metzger, Vice-President Wright, President Smith, and Treasurer Cowles.

Stop Tax Raids

Donald Kirkpatrick made a brief but vigorous plea for a more powerful mobilization of agricultural forces to stop tax raids by the metropolitan area of Chicago on downstate for unemployment relief.

A large part of the wealth of Illinois is concentrated in Chicago and the metropolitan area, he said, but Cook county still owes the state between 40 and 50 million dollars and downstate people have been compelled to make up in higher state taxes for Chicago's delinquency.

Downstate people through the sales tax are being levied upon to care for the unemployed in Chicago, besides caring for their own through local tax levies on property.

Chicago has levied comparatively nothing for local pauper relief, said Kirkpatrick. "Downstate people must stand together and say to Chicago, 'You shall not have further opportunity to sidestep your responsibility.' We are suggesting a constitutional limitation through a new amendment to cut property taxes in half, a tax limitation of less than one per cent of fair cash value."

This Idea Pleases

"The suggestion has been made that all our problems would be solved if farmers would work from 8 to 4 instead of from 4 to 8, and 50 per cent of all public office holders were removed," said President Smith. This idea apparently appealed to the imagination of the county leaders for they responded with enthusiastic applause.

Then Secretary Metzger explained the memorandum of agreement between the state organization and county Farm Bureaus for the mobili-

(Continued on page 18)

Stop Diversion Of Gas Tax Funds Now

Give Chicago Full Authority To Levy Taxes Locally For Poor Relief Is Sentiment at Decatur Meeting

TWO resolutions outlining the position of the Illinois Agricultural Association on tax and legislative matters of current interest, were presented by John C. Watson, director of taxation before the County Farm Bureau leaders at Decatur Sept. 18. Both were adopted without a dissenting vote.

The resolutions are as follows:

I

It appears from newspaper reports that a special session of the General Assembly is to be called on October 3rd, 1933, to make further provision for relief of the unemployed; that the State Administration will propose a property tax levy against which tax anticipation notes will be issued to provide immediate funds; that a state bond issue for at least $20,000,000 will be submitted to the voters in November, 1934, and if the bond issue is approved, the proceeds of the bonds will be used to retire the tax warrants and the state property tax will thus be cancelled.

If the bond issue fails of adoption, the state property tax will be levied and collected in 1935. It appears to be further proposed that these bonds shall be retired from the counties' portion of the gasoline tax, each county to pay in proportion to the relief received from this source. About 80% of this money will probably be expended in Cook County.

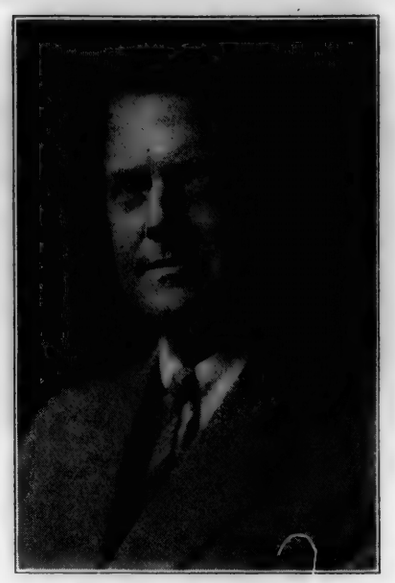
Approximately $25,000,000 of the counties' portion of the gasoline tax funds are already pledged for retirement of the principal and interest of the $20,000,000 state bond issue voted in 1932. Several million dollars more of county gasoline tax moneys have been used by the counties to provide direct relief. In addition more than $43,000,000 have been advanced to Illinois by the Federal Reconstruction Finance Corporation, which amount is to be deducted from future allotments of Federal aid road funds to this State. Competent engineers state that more than 90% of all moneys used in road building ultimately go directly or indirectly as compensation for labor. Reports of the Illinois Emergency Relief Commission indicate that approximately 8% of its moneys are used for administrative expenses and approximately 92% are used for direct relief. It appears that road building provides practically the same amount of money for employment as direct relief provides for the relief of unemployment.

Downstate townships and counties have raised, by property taxation, large sums of money to provide relief for their residents while in Cook county the townships have no power to make any levy for this purpose and but a very small portion of the total county levy has been used for relief purposes.

Therefore, it is the sense and recommendation of this State Conference of Farm Bureau leaders:

1. That any further diversion of gasoline tax funds from the maintenance and construction of roads should be opposed.

2. That until all local communities have drawn reasonably upon their own resources, any further extension of the principle of state support for the unemployed should be opposed.



3. The General Assembly should be urged to enact the legislation necessary to enable the appropriate taxing districts in Cook County and other commission-governed counties to care for the unemployed and destitute residing therein.

II

In view of the grossly unjust burden laid upon owners of tangible property for support of State, County and local government, the adverse effect of such burden upon the values of property, and the rapidly increasing delinquency in the payment of taxes, this Conference of Farm Bureau leaders earnestly urge the officers and Board of Directors of the Illinois Agricultural Association to take such action as they may deem advisable or necessary to secure the calling of a special session of the Fifty-Eighth General Assembly and the submission, by that body, of an amendment to the Revenue Article of the State Constitution, to be voted on in November, 1934, embodying the following principles:

1. Removal of all restrictions which prevent a broadening of the base of taxation and the establishment of an equitable system of taxation.

2. The imposition of restrictions upon the taxation of property which will relieve tangible property, both rural and urban, of at least one-half of the burden now laid upon it.

LUCIUS E. WILSON

Mr. Wilson who will direct the Mobilization Campaign during the next 60 days has had wide experience throughout the United States as an organizer and business executive. Born on a farm in Livingston county, Michigan in 1878, he taught country school and later graduated from the Detroit College of Law. Who's Who says of him: "He organized the movement for new city governments or chambers of commerce in more than 100 cities up to 1921; executive secretary Greater Des Moines Committee 1906-1910; director Dayton, Ohio Citizens Committee 1913 during which time government by city manager was adopted; executive director Detroit Board of Commerce 1911-1912; founder 1914 and managing director American City Bureau Summer Schools for Commercial Secretaries; manager American City Bureau 1914-1921; president General Organization Co. from 1921 to 1929.

Dairy products since 1925 have constituted an ever increasing portion of total farm income. In 1925 14.51 per cent of farm income came from dairy products, whereas in 1931, 23.36 per cent of farm income came from the dairy cow.

Soybean Growers To Meet Decatur 29th

The Annual Meeting of the Soybean Marketing Association will be held at Decatur, on Friday, September 29th, where complete reports of officials of the organization will be made to the members.

As previously announced, the pool plan will be abandoned this year and all sales will be handled on a daily bid basis with the grower making his own arrangements with his local elevator to ship to the organization.

The fact that the crop is short this year and the trend of grain prices higher indicates a substantial improvement in soybean prices compared with going prices at this time last year.

Charles P. Cummings, manager of the Illinois Grain Corporation, will give his personal attention to the soybean marketing program throughout the marketing period.

Daily prices will be posted with the elevators by the Soybean Association, these bids to be the best prevailing legitimate bids in the state.

A series of meetings has been held in the soybean region to explain the marketing plan and solicit the support of members in delivering their crop.

At the county meetings, the Councils named delegates to the Annual Meeting on September 29th.

The Association contemplates buying non-member beans also. It hopes to secure a large enough volume to justify the payment of patronage dividends at the close of the marketing season.

Illinois Farm Supply Annual Meeting Decatur

The seventh annual meeting of the Illinois Farm Supply Company will be held in the Orlando Hotel, Decatur Tuesday, October 17.

Earl C. Smith. and I. A. O'Shaughnessy, president of the Globe Oil and Refining Co., Minneapolis will be the principal speakers.

In addition to reports of officers and the manager, nine directors from the various districts will be elected. Present directors whose terms will expire with the coming meeting are Grant Broster, J. M. Eyman, Frank J. Flynn, Fred E. Herndon, president, H. A. Keele, H. R. Neal, Thos. J. Penman, E. E. Stevenson, secy., and Geo. F. Tullock, vice president.

The manager's report will show that the company had the best year in its history in 1933.

"We'll Distribute Our Own Milk"

This is the Answer of Organized Producers at Peoria to Local Dealers

AN overwhelming vote to go into the business of distributing their own milk was the answer of 700 militant organized milk producers to dealers' efforts to shut them off the market given at a meeting held in the ballroom of the Pere Marquette Hotel, Peoria, Saturday night, September 16th.

The members came on a 24 hour call by President Ryland Capron from all sections of the Peoria milk shed to voice their sentiments on which way to go in solving the controversy which began September 1st. On that day, the Illinois Milk Producers Association, comprising more than 1,000 producers who have always supplied the Peoria market, voted unanimously to withhold their milk until the dealers either cease their discrimination against members of the Association or else submit their differences to a Board of Arbitration on which the producers would have fair representation.

When it became apparent that there would be no ready solution to the controversy because of the dealers' unwillingness to cooperate toward securing a fair settlement, the producers took the only course left open to them and that was to vote to distribute their own milk.

Subscribe $9,000 Stock

The producers backed their faith and enthusiasm by subscribing for more than $9,000 worth of stock in the new proposed subsidiary, temporarily named "Producers Dairy of Peoria."

The meeting opened with a review of all that has transpired before and after the action of September 1 by the organized producers in withholding their milk. President Capron briefly reviewed how the larger dealers during the past year have been acquiring herds and placing cows out on shares until one dealer, he said, is reported to have approximately 1,000 cows under his control, the milk from which he has insisted all go into Class 1 at $1.65 per 100 lb.

"The Association," said Mr. Capron, "insisted that this move was one to undermine the organization and force the milk of members of the Association into the surplus classes. We thought it no more than fair that the milk from these cows be treated just like the milk from members' herds; that it bear its share toward assuming surplus burden of lower prices."

MASS MEETING, ILLINOIS MILK PRODUCERS, PEORIA

Voting unanimously to distribute their own milk rather than lose their market, members subscribed for more than $9,000 worth of stock to equip a plant, at their meeting Sept. 16.

The dealers not only refused to listen to the producers but they also refused to arbitrate in line with suggestions made by Governor Horner looking toward an equitable solution of their differences. They agreed to arbitrate only if the organized producers were limited to one man in five on an arbitration board. The dealers reserved the right of selecting three men of the committee of five, the organized producers one man, and the Peoria Medical Association one man.

Dale Morgan, attorney for the Milk Producers Association, gave a clear presentation of the issues involved, told of the conference of dealers and producers with the Governor, and outlined how the proposed arbitration had failed because of the obstinacy of one Bruce Roszell, distributor, in submitting the controversy to a fairly selected arbitration board.

Other speakers included Archie McPfedderan, president of the LaSalle-Peru Milk Producers Association and of the Mississippi Valley Milk Producers who gave a short, fiery address in which he urged the members to stick together for their rights. "I have milked cows for 35 years," said Mr. McPfedderan. "I know the toil and hardship that goes with the business. Farmers have never had enough to pay them for their hard work in milking cows. There is no justice in a situation where the dealers get 7c a quart for bottling and distributing and the farmers get 3c or less of the consumer's 10c."

"Rather than be deprived of a retail outlet for your milk, a market for which you have been producing for many years, you had better go all the way and put your product on the doorstep of the consumers in Peoria," said J. B. Countiss, Dairy Marketing Director of the Illinois Agricultural Association. "Dealers have refused to submit to fair arbitration; they insist on dictating the terms on which they will cooperate and so far as I can see, there is only one thing left and that is to go into business for ourselves," he continued.

The producers responded unanimously with applause to this and similar suggestions made by McPfedderan, Morgan, Albert Hayes, President of the Peoria County Farm Bureau, and officers of the Association.

Joe Morris, former President of the Tazewell County Farm Bureau, was one of the first to respond by signing an application for 4 shares of 6% stock, $25.00 par value, for which he paid cash.

A Big Job

Both Mr. Capron and Wilfred Shaw, Manager of the Association, emphasized the difficulties in the way of launching into the distributing business. "Let's not kid ourselves," said Mr. Capron, "into believing that our problems will be solved when we make this decision. There will be plenty of work and trouble ahead. We ought to have at least $50,000 to go into business in a big way. We probably can get along with less but don't forget that it takes plenty of capital. We are not urging you to do this. If we go into business for ourselves, our milk checks will probably not be as large as we would like to have them the first year or two. We will have plenty of competition. Yet, I believe this is one way out and perhaps the only way to maintain our organization and protect our interests in this market."

Both Mr. Morgan and Mr. Shaw spiked false rumors and propaganda circulated by the dealers to shake the confidence of members in their officers and organization.

Albert Hayes read from the platform a statement received from the Roszell Dairy in which they pointed out the amount of the check-off each

(Continued on page 16)

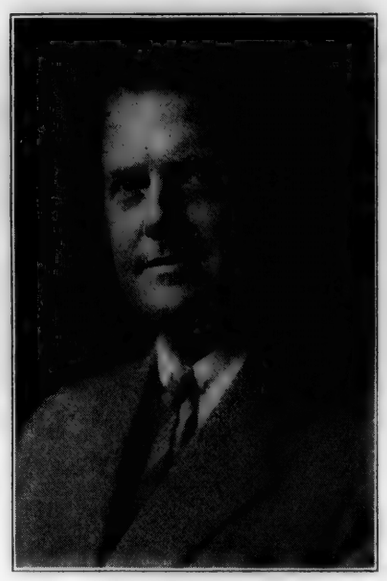
Approximately $25,000,000 of the counties' portion of the gasoline tax funds are already pledged for retirement of the principal and interest of the $20,000,000 state bond issue voted in 1932. Several million dollars more of county gasoline tax moneys have been used by the counties to provide direct relief. In addition more than $43,000,000 have been advanced to Illinois by the Federal Reconstruction Finance Corporation, which amount is to be deducted from future allotments of Federal aid road funds to this State. Competent engineers state that more than 90% of all moneys used in road building ultimately go directly or indirectly as compensation for labor. Reports of the Illinois Emergency Relief Commission indicate that approximately 8% of its moneys are used for administrative expenses and approximately 92% are used for direct relief. It appears that road building provides practically the same amount of money for employment as direct relief provides for the relief of unemployment.

Downstate townships and counties have raised, by property taxation, large sums of money to provide relief for their residents while in Cook county the townships have no power to make any levy for this purpose and but a very small portion of the total county levy has been used for relief purposes.

Therefore, it is the sense and recommendation of this State Conference of Farm Bureau leaders:

1. That any further diversion of gasoline tax funds from the maintenance and construction of roads should be opposed.

2. That until all local communities have drawn reasonably upon their own resources, any further extension of the principle of state support for the unemployed should be opposed.



3. The General Assembly should be urged to enact the legislation necessary to enable the appropriate taxing districts in Cook County and other commission-governed counties to care for the unemployed and destitute residing therein.

II

In view of the grossly unjust burden laid upon owners of tangible property for support of State, County and local government, the adverse effect of such burden upon the values of property, and the rapidly increasing delinquency in the payment of taxes, this Conference of Farm Bureau leaders earnestly urge the officers and Board of Directors of the Illinois Agricultural Association to take such action as they may deem advisable or necessary to secure the calling of a special session of the Fifty-Eighth General Assembly and the submission, by that body, of an amendment to the Revenue Article of the State Constitution, to be voted on in November, 1934, embodying the following principles:

1. Removal of all restrictions which prevent a broadening of the base of taxation and the establishment of an equitable system of taxation.

2. The imposition of restrictions upon the taxation of property which will relieve tangible property, both rural and urban, of at least one-half of the burden now laid upon it.

LUCIUS E. WILSON

Mr. Wilson who will direct the Mobilization Campaign during the next 60 days has had wide experience throughout the United States as an organizer and business executive. Born on a farm in Livingston county, Michigan in 1878, he taught country school and later graduated from the Detroit College of Law. Who's Who says of him: "He organized the movement for new city governments or chambers of commerce in more than 100 cities up to 1921; executive secretary Greater Des Moines Committee 1906-1910; director Dayton, Ohio Citizens Committee 1913 during which time government by city manager was adopted; executive director Detroit Board of Commerce 1911-1912; founder 1914 and managing director American City Bureau Summer Schools for Commercial Secretaries; manager American City Bureau 1914-1921; president General Organization Co. from 1921 to 1929.

Dairy products since 1925 have constituted an ever increasing portion of total farm income. In 1925 14.51 per cent of farm income came from dairy products, whereas in 1931, 23.36 per cent of farm income came from the dairy cow.

Soybean Growers To Meet Decatur 29th

The Annual Meeting of the Soybean Marketing Association will be held at Decatur, on Friday, September 29th, where complete reports of officials of the organization will be made to the members.

As previously announced, the pool plan will be abandoned this year and all sales will be handled on a daily bid basis with the grower making his own arrangements with his local elevator to ship to the organization.

The fact that the crop is short this year and the trend of grain prices higher indicates a substantial improvement in soybean prices compared with going prices at this time last year.

Charles P. Cummings, manager of the Illinois Grain Corporation, will give his personal attention to the soybean marketing program throughout the marketing period.

Daily prices will be posted with the elevators by the Soybean Association, these bids to be the best prevailing legitimate bids in the state.

A series of meetings has been held in the soybean region to explain the marketing plan and solicit the support of members in delivering their crop.

At the county meetings, the Councils named delegates to the Annual Meeting on September 29th.

The Association contemplates buying non-member beans also. It hopes to secure a large enough volume to justify the payment of patronage dividends at the close of the marketing season.

Illinois Farm Supply Annual Meeting Decatur

The seventh annual meeting of the Illinois Farm Supply Company will be held in the Orlando Hotel, Decatur Tuesday, October 17.

Earl C. Smith, and I. A. O'Shaughnessy, president of the Globe Oil and Refining Co., Minneapolis will be the principal speakers.

In addition to reports of officers and the manager, nine directors from the various districts will be elected. Present directors whose terms will expire with the coming meeting are Grant Broster, J. M. Eyman, Frank J. Flynn, Fred E. Herndon, president, H. A. Keele, H. R. Neal, Thos. J. Penman, E. E. Stevenson, secy., and Geo. F. Tullock, vice president.

The manager's report will show that the company had the best year in its history in 1933.

"We'll Distribute Our Own Milk"

This is the Answer of Organized Producers at Peoria to Local Dealers

AN overwhelming vote to go into the business of distributing their own milk was the answer of 700 militant organized milk producers to dealers' efforts to shut them off the market given at a meeting held in the ballroom of the Pere Marquette Hotel, Peoria, Saturday night, September 16th.

The members came on a 24 hour call by President Ryland Capron from all sections of the Peoria milk shed to voice their sentiments on which way to go in solving the controversy which began September 1st. On that day, the Illinois Milk Producers Association, comprising more than 1,000 producers who have always supplied the Peoria market, voted unanimously to withhold their milk until the dealers either cease their discrimination against members of the Association or else submit their differences to a Board of Arbitration on which the producers would have fair representation.

When it became apparent that there would be no ready solution to the controversy because of the dealers' unwillingness to cooperate toward securing a fair settlement, the producers took the only course left open to them and that was to vote to distribute their own milk.

Subscribe $9,000 Stock

The producers backed their faith and enthusiasm by subscribing for more than $9,000 worth of stock in the new proposed subsidiary, temporarily named "Producers Dairy of Peoria."

The meeting opened with a review of all that has transpired before and after the action of September 1 by the organized producers in withholding their milk. President Capron briefly reviewed how the larger dealers during the past year have been acquiring herds and placing cows out on shares until one dealer, he said, is reported to have approximately 1,000 cows under his control, the milk from which he has insisted all go into Class 1 at $1.65 per 100 lb.

"The Association," said Mr. Capron, "insisted that this move was one to undermine the organization and force the milk of members of the Association into the surplus classes. We thought it no more than fair that the milk from these cows be treated just like the milk from members' herds; that it bear its share toward assuming surplus burden of lower prices."

MASS MEETING, ILLINOIS MILK PRODUCERS, PEORIA

Voting unanimously to distribute their own milk rather than lose their market, members subscribed for more than $9,000 worth of stock to equip a plant, at their meeting Sept. 16.

The dealers not only refused to listen to the producers but they also refused to arbitrate in line with suggestions made by Governor Horner looking toward an equitable solution of their differences. They agreed to arbitrate only if the organized producers were limited to one man in five on an arbitration board. The dealers reserved the right of selecting three men of the committee of five, the organized producers one man, and the Peoria Medical Association one man.

Dale Morgan, attorney for the Milk Producers Association, gave a clear presentation of the issues involved, told of the conference of dealers and producers with the Governor, and outlined how the proposed arbitration had failed because of the obstinacy of one Bruce Roszell, distributor, in submitting the controversy to a fairly selected arbitration board.

Other speakers included Archie McPfedderan, president of the LaSalle-Peru Milk Producers Association and of the Mississippi Valley Milk Producers who gave a short, fiery address in which he urged the members to stick together for their rights. "I have milked cows for 35 years," said Mr. McPfedderan. "I know the toil and hardship that goes with the business. Farmers have never had enough to pay them for their hard work in milking cows. There is no justice in a situation where the dealers get 7c a quart for bottling and distributing and the farmers get 3c or less of the consumer's 10c."

"Rather than be deprived of a retail outlet for your milk, a market for which you have been producing for many years, you had better go all the way and put your product on the doorstep of the consumers in Peoria," said J. B. Countiss, Dairy Marketing Director of the Illinois Agricultural Association. "Dealers have refused to submit to fair arbitration; they insist on dictating the terms on which they will cooperate and so far as I can see, there is only one thing left and that is to go into business for ourselves," he continued.

The producers responded unanimously with applause to this and similar suggestions made by McPfedderan, Morgan, Albert Hayes, President of the Peoria County Farm Bureau, and officers of the Association.

Joe Morris, former President of the Tazewell County Farm Bureau, was one of the first to respond by signing an application for 4 shares of 6% stock, $25.00 par value, for which he paid cash.

A Big Job

Both Mr. Capron and Wilfred Shaw, Manager of the Association, emphasized the difficulties in the way of launching into the distributing business. "Let's not kid ourselves," said Mr. Capron, "into believing that our problems will be solved when we make this decision. There will be plenty of work and trouble ahead. We ought to have at least $50,000 to go into business in a big way. We probably can get along with less but don't forget that it takes plenty of capital. We are not urging you to do this. If we go into business for ourselves, our milk checks will probably not be as large as we would like to have them the first year or two. We will have plenty of competition. Yet, I believe this is one way out and perhaps the only way to maintain our organization and protect our interests in this market."

Both Mr. Morgan and Mr. Shaw spiked false rumors and propaganda circulated by the dealers to shake the confidence of members in their officers and organization.

Albert Hayes read from the platform a statement received from the Roszell Dairy in which they pointed out the amount of the check-off each

The Issue In Unemployment Relief

IN THE editorial reprinted on the opposite page the Decatur Herald seeks to defend the persistent dodging of responsibility in certain communities, particularly Chicago, in raising funds through taxes or otherwise for local unemployment relief.

In doing so the editor makes certain serious charges and erroneous assertions which demand answer and correction.

It is charged that the Illinois Agricultural Association proposes to use its influence to prevent starving people from being fed.

This statement is absurd. The editor knows better. The Association from the beginning has used its influence toward finding ways and means of providing for destitute people. It assisted in giving Chicago and commission-governed counties a constructive program through the Lantz bills for raising money to feed their poor. The Governor stated publicly that these were good bills and should pass, yet when Cook county politicians remonstrated he later vetoed them.

The Association never has opposed reasonable measures for unemployment relief. It has looked with disfavor on the frequent trips of Chicago politicians to Washington and Springfield after easy money while not a finger is raised to tap the wealth at home.

Rich Chicago, with millionaires by the score, her banks and safety boxes overflowing with cash and valuable securities, a city able to finance a great world's fair to which the entire country pays tribute with its presence and money, this city where politicians treat themselves so liberally, able but unwilling to care for its unfortunates. Fifteen billions of untaxed intangibles lie in Cook county strong boxes, tax experts testified in Judge Jarecki's court. Poor Chicago!

The Herald editor states that there will be no proposal to put a tax on farms to feed people in the cities.

Wrong again. The proposal already has been made to levy an additional tax on property one-third larger than the $30,000,000 desired on which anticipation warrants will be issued. It is true that it is proposed to submit a bond issue for the desired amount, interest and principal to be redeemed by payments from the state gas tax. But there is no assurance that the people of Illinois will approve such a bond issue. The approval of the bond issue last year cannot be regarded as proof that voters, alarmed by repeated demands for relief funds, will approve another one.

Gasoline tax allotments already are pledged up to nearly $25,000,000 for the previous bond issue and interest. Several million dollars more of gas tax funds were taken under the Meents Act for direct aid before July 1, 1933.

The Reconstruction Finance Corporation allotted more than $43,000,000 to Illinois against future allotments of Federal road funds. This sum will be further increased by interest.

Thus a total of more than $75,000,000 have been taken from present and future road funds in Illinois for direct relief.

Is not the Herald editor shortsighted when he advocates stopping future road building? Does not his program produce the very condition it is intended to relieve? Competent authorities declare that more than 90% of all road improvement costs are paid directly or indirectly for labor.

The editor says, "We now have a very satisfactory network of improved roads in this state."

The road system is not satisfactory to more than three-fourths of all farm residents who still live on dirt roads and are cut off from the hard road system part of every year.

It is alleged that "rural areas are not taking care of their own."

The facts are that 32 counties have taken care of their own wholly at their own expense. Others have asked and received comparatively small amounts from the State Relief Commission. Very

(Continued on page 9)

The Issue In Unemployment Relief

(Continued from page 8)

little of the funds given any county have been used in rural areas.

The reference to subsidies is beside the point. Farmers have been paying subsidies to the cities in supporting high protective tariffs on the things they must buy, for a half century. Only a small amount of appropriations in the Hoover administration came to Illinois. A substantial part of the money lost in the price-pegging program for wheat and cotton went to speculators in the cities. Most of the money loaned co-operatives has been or will be repaid.

The editor refers to current administration measures to give farmers parity in their purchasing power. Is it fair to refer to such measures as providing subsidies for farmers? When the farmer gets a dollar where does it go? To town, to the cities of course, for debts, taxes, and merchandise to create more employment. Are not such measures designed to benefit urban residents equally by increasing manufacturing, transportation, and labor?

The editor completely ignores the vital issue. That issue is this. Is it fair for one-half of the people of the state, concentrated in a single county and largely in a single city, to continue to support their unemployed chiefly at the expense of the rural road system of Illinois?

The vital issue is not whether the poor and unemployed shall be fed. The issue is, shall any community be allowed to sidestep its responsibility and duty to the full extent of its ability?

Shall any community be permitted to wreck the rural road program thereby shutting down employment in order to spare its own taxpayers and tax dodgers?

On these issues, the Illinois Agricultural Association is fighting for the City of Decatur as well as for the farmers of Macon county.

Illinois Crop Yields

Yields per acre in Illinois for 1933 as indicated by reports from farmers up to Sept. 1 are estimated as follows: Corn 27½ bu., oats 18½ bu., winter wheat 16 bu., barley 15 bu., tame hay 1.15 tons.

Illinois now has 86 modified accredited counties in tuberculosis eradication, or 84.3 per cent of all counties in the state. More than 2,000,000 cattle are under supervision.

Views From The Press

Those Lantz Bills

GOV. HENRY HORNER admits that a "serious" situation confronts the state in the matter of relief for the unemployed this winter. Most of these are in Chicago. The governor should have thought of this when he vetoed the three Lantz bills passed at the regular session of the general assembly. These measures would have permitted Chicago and Cook county to levy a pauper tax to take care of its own, just as downstate is doing. But the governor vetoed these bills and that's that. At the time of the veto the federal government was pouring relief money into Illinois and the sales tax bill had been enacted. The latter was expected to furnish something like $80,000,000 per year. Both have been disappointments. The federal government has tightened up and announced that it will furnish only $1 in relief funds for every $3 furnished by the state itself. The sales tax in its first month brought in only $2,000,000 or at the rate of $24,000,000 per year, and Chicago has been averaging around five million dollars expenditures monthly. The governor admits a special session of the legislature likely to furnish relief. He most surely will urge an extension of the sales tax for relief purposes after Jan. 1. It can be so used only on a vote of the general assembly. After the new year the sales tax becomes a replacement tax. **Downstate should answer Gov. Horner's plea for an extension of the sales tax by re-enactment of the vetoed Lantz bills placing the burden of furnishing relief on the metropolitan area.** The unemployed must be taken care of this winter, **but Chicago is not and has not been meeting its responsibilities. Legislative enactment should compel them to.** The coming special session before the end of the year promises to be one of the most important ever held by the general assembly, and will probably witness a tightening of the lines between the metropolitan area and downstate particularly over relief matters. —Peoria Star.

THE OTHER SIDE

Ungracious and Short-Sighted
(From Decatur Herald)

"THE ILLINOIS AGRICULTURAL Association will go before the special session of the legislature Oct. 3 with a program of tax legislation to enable Chicago and other municipalities to care for their unemployed this fall and winter, at the same time protecting rural areas from taxation for other than local poor relief."

So announces John Watson, director of taxation for the Illinois Agricultural Association. Mr. Watson has worded his statement to make it sound well. Most persons reading it in this form will respond with an automatic "Yes, yes," without any critical effort to examine its real meaning. Supposing we put the thing in another way, to show just what it does mean. It would read like this:

"The Illinois Agricultural Association proposes to do everything in its power to prevent any assistance being given to men, women and children who are threatened with starvation this winter."

Make no mistake, this is precisely what it does mean, and if the Illinois Agricultural Association goes ahead with this announced program, exerting the political power it has, there is more than an even chance that freezing and hunger will be the result for the most helpless and innocent of the needy. The stronger, of course, will take care of themselves, although the consequences may be more costly for "rural areas" than Mr. Watson contemplates.

There will be no proposal before the coming session of the legislature to put a tax on farms in order to feed people in cities. Probably there will be a proposal to permit the use of gasoline tax funds to be used for this purpose. It is this presumably that Mr. Watson and his organization propose to fight.

The arguments have been heard before. They run like this: "Farmers pay a part of the gasoline tax—not a large part, but some fraction of it. This tax orginally was intended for road building purposes, and it ought to be used exclusively in building roads past farms. If it is used for relief in the cities, some gasoline tax money paid by farmers will be spent to feed people in towns. This is rank injustice. Let the cities take care of their own needy, as rural areas take care of theirs."

The answer to all this might be put into one statement: When human beings and neighbors are without food, an extraordinary emergency exists and it is necessary to feed them with whatever fund can be found. It's no time for debates about technicalities.

If this humane principle is not enough, the specific contentions can be met one by one. It is true that gasoline tax money was originally intended for road building, but there is no sacred commandment that compels using it eternally for that one purpose.

If the people of Illinois need it more desperately for some other purpose, it is the prerogative of the people to give up the building of new roads for a time. We have now a very satisfactory network of improved roads in this state.

It is true that use of gasoline tax funds in relief would necessitate spending some money paid by farmers in city relief. The amount of farm money carried into the city in this way would be microscopic, in comparison with the amount of gasoline tax paid by city motorists for the improvement of highways in the country. After years and years during which money has flowed out from cities in hundreds of millions for road building, who has a right to kick if possibly as much as one million collected in country filling stations goes to meet an emergency in the cities in the next year?

There remains the contention that rural areas take care of their own poor; the cities should do likewise. This assertion has been heard in the legislature a thousand times in the past; it will be repeated over and over again in the session just to come. The only thing the matter with it is, it isn't so.

Rural areas are not taking care of their own. There isn't a township in Illinois that is taking care of its own. One and all are demanding heavy subsidies in order to live. The subsidies come mainly from the cities, for unfortunately there are few income tax payers on farms. Half a billion dollars was appropriated during the Hoover administration for the relief of farmers. The Roosevelt administration has only begun, with appropriations to buy four million pigs, with heavy taxes upon the consumers of cotton, of bread and of meat and of milk, all for the benefit of farmers.

People in cities have not raised a voice in opposition to these taxes laid upon them for the relief of the people in rural areas. The need of the farmer is recognized, and everybody will be happy if only the schemes will work to restore prosperity on the farms.

But a little of the spirit of reciprocity is in order. Unemployment is a disaster peculiar to cities. At the moment cities are tormented by misfortunes they can not meet alone. Decatur has not been able to support its unemployed; Chicago naturally is less able to. In the long run they will be able to pay back all that they receive but in this moment of crisis they must have the help of national and state credit.

If the Illinois Agricultural Association undertakes to say that cities shall not have this help in their time of emergency, that their people shall be left to go hungry first, the Illinois Agricultural Association is not only selfishly ungracious. In the long run it will find the policy expensively short-sighted too.—Decatur Herald.

Iowa Governor Favors Minimum Farm Prices

Governor Clyde Herring of Iowa recently telegraphed President Roosevelt urging that the federal government immediately fix minimum prices for farm products.

Governor Herring said the NRA program already has raised the general wage level of workers and the retail price of manufactured products, and that farmers are at a distinct disadvantage because the price of farm products is lagging behind.

The price on farm products should be pegged, Herring said, at a level high enough to cover cost of production and show a fair profit.

Set Up Farm Credit Unit At Champaign

The first Crop Credit Association to be organized under the new Agricultural Credit Act was set up at Champaign, Illinois on September 20. C. R. Arnold, of the Farm Credit Administration, assisted in starting operations. Farm Adviser C. C. Burns was active in getting the new Association underway. According to Mr. Burns, local farmers have been hard pressed to obtain adequate financing, particularly loans for longer than 70 to 90 days. A number of rural banks in Champaign county, he said, are still closed and farmers are unable to secure needed credit.

Seek To Get World Reduction Of Wheat

The International Wheat Advisory Committee organized to help bring about reduced world surpluses and raise prices, held its first meeting in London beginning September 18. An attempt is being made to work out export quotas for each major wheat growing country.

United States representatives are Robert W. Bingham of Kentucky, ambassador to Great Britain; John Van Antwerp MacMurray, recently appointed American minister to the Balkan states, and Frederick E. Murphy, publisher of the Minneapolis Tribune.

Country Life Makes New Gains In 1933

Company Employs New Actuary, Agents Hold Picnics at Pontiac and Pana

At the end of August, 1933, Country Life Insurance Company had gained more in insurance in force than it did the entire twelve months' period of 1932 according to Manager L. A. Williams. Country Life's total in force is approximately $53,000,000 at the present time.

The Company wrote $1,211,000 of new business in the month of August alone.

The agents of Country Life Insurance Company dedicated September as "Manager's Month" and pledged $2,500,000 for that occasion. Mr. Williams completed just five years of service with the Company at the end of September, 1933.

Agents of Country Life Insurance Company and their wives attended picnics at Pontiac and Pana on September 5 and 6. Approximately 700 people were present for the two gatherings. The object of the picnics was to celebrate the part that the agents played in putting Fifty Million of business on the books, and having it in force at the time the Company was 50 months old.

The outstanding agent for production in the month of August was R. R. Barr of LaSalle County.

Country Life Insurance Company has a new addition to its official family in Howard Reeder, who has been appointed the Company's actuary. He comes from the Royal Union Life of Des Moines, Iowa.

Every county in the state has produced some business in 1933. The pledges for Manager's Month included pledges from all but five counties, and it is believed that three of those will have pledges in within the next few days.

Du Page county signed 85 new members since Jan. 1 according to Clare Bradford, district organization manager. This county had secured approximately 75% of its quota by Sept. 15.

The AAA recently increased the maximum number of pigs to be bought by the government from 4,000,000 to 5,922,000. The marketing period ends September 29. Permits are granted only to original owners by telegram or letter which must accompany shipment.

Speaker Rainey Critical Of Credit Administration

Sees Influence of Eugene Meyer in Failure of System to Help Farmers

CONGRESSMAN Henry T. Rainey of Carrollton, speaker of the house, made a sharp attack on Henry Morgenthau Jr., governor of the Farm Credit Administration, at a recent meeting in E. St. Louis sponsored by the Home Owners Loan Corporation.

According to the St. Louis Globe Democrat, Rainey asserted that Morgenthau "is perpetuating reactionaries of the Eugene Meyer school who believe in making peasants of the American farmer." Rainey predicted that the course which he ascribed to Morgenthau would seriously affect the success of the administration plan for farm recovery.

"In combating the present unprecedented depression, we must assure people that their homes are safe," Rainey declared in his address. "Revolutions commence always with the land. The situation in Russia is due entirely to the fact that for a long time the nobility of Russia expanded their properties until a few owned all the land. The freeing of the serfs did not do any good as long as they did not own real property.

"When they revolted, they disposed of the land owners very simply. There were so few that they were all killed or exiled. Now all the people own the land, which is not any more satisfactory than the other way. Communism can never obtain much headway as long as the people preserve their homes.

Farmers Must Liquidate

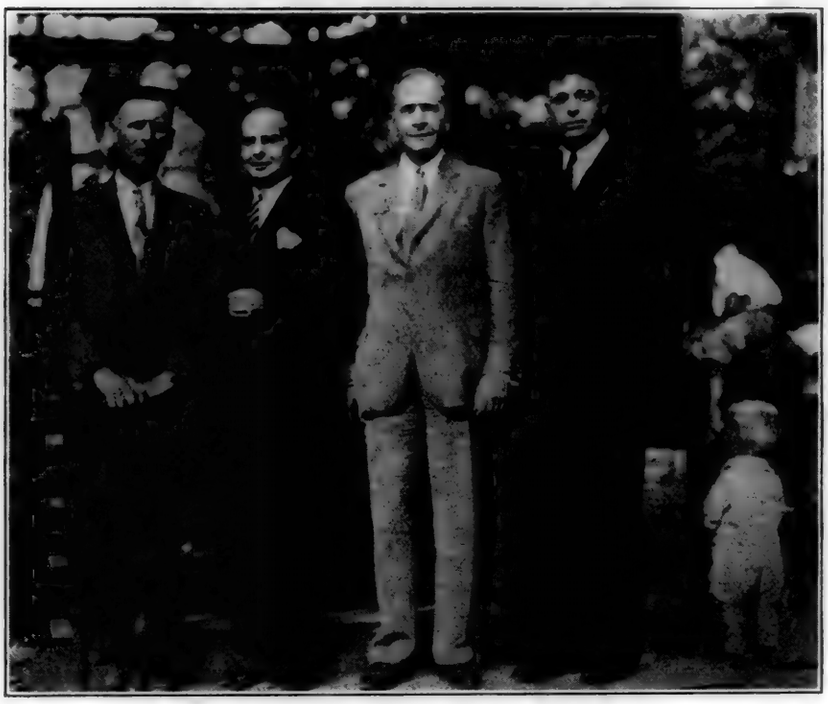
"Up to March 4 of this year, the United States was making greater progress toward Communism than any other country ever made except Russia. The Federal Land banks were taking over the farm lands at forced sales, following the policy of Eugene Meyer.

"This situation was forced by the Federal Land banks, who followed the Wall street viewpoint of treating farms and homes just as one would treat a business that is unprofitable. The values of homes and land can never be determined without taking into consideration the human element. Homes do not earn income of themselves. They furnish a place for people to live while they earn their incomes in other places.

"Estimating values on a basis of returns never ought to be the method of establishing values for homes and farms. The farmer is just a laborer. He gets his wages when he sells his crops.

"It has been necessary in the past months to resort to unusual methods to raise the prices of farm products, and the price of living in cities has been rising as a consequence. We believe that the increased money in the farmer's hands will lead him to buy the products of the city factory, and bring the city to prosperity."

Roar of Disapproval



Following a hurried trip by airplane to Washington, Mr. Rainey on Sept. 13 issued a public statement reiterating previous criticism of the Farm Credit Administration.

"Farmers are having the same difficulties in obtaining mortgage relief that they had when Eugene Meyer and his crowd directed that whenever a mortgage was in default it should be foreclosed.

"There is just a roar of disapproval in the farm belt. All they can do is kick. A few loans are being made but they are not enough. And the land is being appraised at ridiculously low figures—not enough to carry the loans."

Herbert Gaston, deputy administrator under Morgenthau, in reply to Mr. Rainey said the administration closed $5,000,000 of loans in August and hoped to step this up to $15,000,000 in September.

"There ought to be a great jump from now on," said Gaston, "now that we have our organization prepared to dispose quickly of the applications."

URGE SUPPORT OF AAA AT PEORIA

Edward A. O'Neal, president of the American Farm Bureau Federation, speaks at Peoria County Farm Bureau picnic attended by more than 2,000 members and their guests. Left to right are: Albert Hayes, president, Farm Bureau; State Senator Carl Behrman, Mr. O'Neal, and Congressman E. M. Dirksen. Dirksen lauded Mr. O'Neal and the Farm Bureau for effective work in securing the passage of the new farm legislation.

Sells $1500 Of Dairy Stock In 3 Hours

Charles Cameron, member of the board of directors of Illinois Milk Producers Association, Peoria, went out calling on his neighbors Tuesday morning Sept. 19, and in about three hours sold $1500 worth of stock in the "Producers Dairy of Peoria," organized to distribute the milk of members at that market.

The new co-operative expected to raise at least $25,000 by the end of the week. Many members who signed up for stock at the initial meeting Sept. 16 expressed a willingness to raise their subscriptions should additional money be needed.

The New York state college of agriculture has designed a fruit washer that can handle from 50 to 60 bushels an hour and can be built at home for about $150.

Auto Accident Prevention

By V. Vaniman

FARM Bureau members in Illinois for the past three years have been doing some real thinking on auto accident prevention. One of the reasons for this is that they appreciate the effect on their pocket books, the consequent reduced rate in the cost of their automobile insurance. A more important motive, however, is to be considered, namely, the saving of human lives and the prevention of human suffering.

The fact that 29,500 persons were killed in auto accidents and nearly 1,000,000 injured in the United States in 1932, makes us realize that it is high time for serious thought on the subject of auto accident prevention when traffic experts state that 80% of the auto accidents are preventable.

Reasonable Care—If a person should take a revolver and shoot promiscuously somebody would do something about it because somebody would likely get hit and that somebody might be you. Without using reasonable care in making left hand turns, passing cars on curves and grades, stopping on the highway, someone is likely to be killed or permanently injured.

Accident Talk—"Bad tires," "slippery pavements," "poor lights," "brakes slipped," "I thought I could get by," are no longer reasonable excuses nor do they indicate that reasonable care is being used in driving a car.

Things To Think About—Crutches, hospitals, inquests, cripples, nurse, doctor, poor house, death, disability—all are the result of careless driving.

The A B C of Accident Prevention—The A B C of accident prevention is ALWAYS BE CAREFUL. There is everything to be gained and nothing to be lost.

Fundamental Principles of Accident Prevention—The biggest thing in auto accident prevention is to really get people to THINK; not only the drivers but the pedestrians. The following figures indicate human actions of drivers that produce death:

Driving too fast	35.31%
On wrong side of road	12.25
Did not have right of way	11.92
Drove off roadway	18.84
Improper passing, turning, signaling	7.69
Miscellaneous	13.99

Human actions of pedestrians that produce death:

Crossing between intersections	28.83%
Crossing at intersections	23.52
Walking along highway	13.81
Children playing in street	10.77
Miscellaneous	14.11

Reverse Psychology—Reverse Psychology has a definite part in making people think. The ridiculousness of the following statements indicates what is meant by reverse psychology:

Never stop on entering a main highway; there's no chance of you being hit by an oncoming car.

Always pass cars on turns or grades; there couldn't be a car coming from the opposite direction, and if there was they would slow down and let you by.

Never signal in making left hand turns—other motorists will know what you intend to do and will be careful not to hit you.

Your brakes never need attention. If they don't work just right it will stimulate your wits as to what to do when you really need them.

If you can't stop within the distance you can see ahead, step on the gas and knock out of the road anything that is in your way. It will keep you from growing old.

Dart in and out of traffic—there is no chance of you getting hit. Besides it will demonstrate what a wonderful driver you are.

A New Germ—The report has been received that in Missouri the State Board of Health is claiming credit for discovering the germ of a new disease. The malady is termed "speeditis auto-mobilitis" and the name of the offending microbe is the micrococcus "speeditis auto-mobilitis."

Speeditis is principally a disease of young life, however older persons readily acquire it. There is no doubt about the result of this dreaded disease. A serum that can be manufactured quite easily for the driver of the automobile to overcome this dreaded organism is CAUTION and COURTESY.

The September auto accident prevention campaigns are getting results. Mr. Richardson, manager of the Illinois Agricultural Mutual Insurance Company, which has 30,000 policies in force, states that the accident curve for the month of September, when the greatest number of auto accidents occur, is straightening out.

Heard In Union Co. Farm Bureau Office

Non-member: "Mr. Bierbaum (farm adviser) What does it cost to belong to the Farm Bureau?"

Mr. Bierbaum: "Mister, if you use it, it won't cost you anything, and if you don't it will cost you $15 a year."

Sangamon and Will counties, as we go to press, are engaged in the final series for the championship of the Illinois Farm Bureau baseball league. The two teams are playing a three game series for the State championship.

Sangamon County won the first contest at Springfield on September 16th, when it nosed out Will County by a close score of 4 to 3. Sangamon's new star hurler, J. C. Honn of Pawnee, struck out 15 men and allowed only two walks. Nevertheless, it was a close game, Will County making six hits to Sangamon's eight.

The second game of the series is scheduled to be played at Manhattan on September 23rd. If a third game is necessary, the two teams will flip a coin to determine where and when the game shall be played.

In the semi-final play-off, Carroll County eliminated Woodford in a hard-fought game at Eureka on September 9th. "Carroll County played the best defense game of any team we competed against in the semi-finals," wrote H. A. deWerff, Farm Adviser. The score was 5-1. Had Woodford County won, it would have been a three-cornered tie for the State title between Sangamon, Will and Woodford. Lake County was defeated by Sangamon the same day at Springfield.

Middlemen Take Advantage of AAA.

George N. Peek, agricultural administrator, recently announced that steps would be taken to safeguard the farm recovery program from being jeopardized by unreasonable prices to the consumer.

Evidence of profiteering by wholesalers, retailers as well as manufacturers has been uncovered by Dr. Fred C. Howe, consumer's counsel for the Administration.

When a farmer or laborer buys a pair of overalls for $1.41, Dr. Howe pointed out, he makes a contribution of about eight cents as a tax toward the Administration's cotton campaign. When a customer buys a loaf of bread for eight cents about one-half cent goes to the wheat farmer through the processing tax.

Pyramiding of these taxes and misrepresentation of the taxes are causing much uneasiness in Washington.

AAA Rewrites Meat Packers Agreement

Officials of the Agricultural Adjustment Administration recently rejected the marketing agreement submitted by the meat packers. They are writing a new one demanding that accounts and records of packing plants be made accessible to Secretary Wallace.

The change is being made in the interests of both producers and consumers in an effort to determine whether the spread in processing and distribution can be narrowed.

Watson Studies County Expenditures In Adams

John C. Watson, director of taxation, recently made a study of public finances and expenditures in Adams county at the invitation of the Adams County Farm Bureau. Evidence of extravagance and needless expense was presented by Mr. Watson before Farm Bureau officials and members of the board of supervisors.

The investigation reveals the need for Farm Bureau tax committees to become better informed on the statutory provisions regarding fees and county expenditures and to learn how to gather evidence so they may carefully check and help root out illegal charges and waste.

"The county records are public property," said Mr. Watson, "and are open to inspection during office hours."

Comparatively few members of county boards of supervisors are familiar with statutory laws governing fees and expenditures of public funds. This situation makes it possible for dishonest public officials to run up bills and practice petty graft resulting in higher taxes.

St. Louis Milk Agreement Slated For Hearing

Secretary of Agriculture Wallace has issued formal notice of a hearing on a milk marketing agreement proposed by the Sanitary Milk Producers, Inc. of St. Louis. The hearing will take place in Washington, D. C., on September 25 at 9:30 A. M.

Production prices for Class 1 fluid milk are set at $1.94 in the tentative schedule which St. Louis parties have submitted for hearing. Class 2 milk is paid for on the basis of 3.5 times the price of 92 score Chicago butter plus 20 percent plus 15 cents. A September minimum price of $1.20 is proposed for Class 2. Class 3 price to producers would be 3.5 times 92 score Chicago butter plus 15 cents.

Retail prices quoted from the tentative schedule are 11 cents per quart for standard milk and 7 cents for pints. On the basis of Class 1 producer price of $1.94 per hundred pounds this means that the producer would get 4½ cents and the distributor would get 6¾ cents of the quart price at retail. The Sanitary Milk Producers, Inc. and 75 percent of the dealers offer the agreement.

Producers Seek $2.05 Milk

As we go to press the Pure Milk Association and cooperating milk distributors are hopeful of securing Secretary Wallace's approval to an amendment to the milk marketing agreement providing for an eleven cent market, an advance of five cents a quart in 18 per cent cream, and a base price of $2.05 per cwt. to the producer for milk.

St. Louis Producers Beef Club Show Oct. 19th

The St. Louis Producers will hold their tenth annual baby beef club show show and sale at East St. Louis October 19. Charles M. Hay will speak at the banquet that evening. Mr. Hay ran for the United States Senate from Missouri and is now city counselor for St. Louis.

National Committee Busy On Corn-Hog Program

As we go to press the National Corn and Hog committee is in session in Chicago in an effort to work out a permanent program for securing and maintaining hog and corn prices on a pre-war parity level. "We expect to stay in session until we have a definite program to submit to the agricultural adjustment administration," said President Earl C. Smith who is chairman of the committee. Following its meeting in July the committee pledged itself to submit a permanent program by October 1.

Hudelson Succeeds Dean Rankin

Assistant Dean F. H. Rankin of the Illinois College of Agriculture retired September 1 after 32 years of service. Dean Rankin has a host of friends among farmers and graduates throughout Illinois.

R. R. Hudelson, a member of the college staff for the past eight years and now in charge of the wheat adjustment campaign, has been appointed to succeed Dean Rankin.

Country Elevator Code Submitted For Approval

A code for country elevators was recently presented by the newly organized national federation of country grain elevator associations. Maximum work hours of 48 hours a week are established on an 180 day average. A minimum wage scale also is provided. The code outlaws a number of trade practices including over and under grading, over and under docking, gratuities and free services, sales or purchases which represent an intentional loss, free storage of grain unless provided for by state law, and buying and selling of grain by persons or firms engaged in transportation for hire and not owning or operating grain handling facilities.

30 Day Trial Plan For Milk Adopted By AAA

An emergency plan providing for a 30-day trial period has been worked out for fluid milk trade agreements by the AAA. During the 30 day period there will be no fixed schedule of retail prices although a maximum retail price will be established. Dealers and distributors will be required to make reports on uniform forms during the first 30 days. The administration will have full access to the books of distributors, dealers, and stores to aid in its study of the price spread between producer and consumer. Subsequent amendments to the price schedule will be based on the information obtained during the 30 day period.

Hog Control Plan Raises Prices In Netherlands

The Netherlands Hog Control plan initiated in August, 1932 has resulted in substantially higher prices than before the act was passed, reports the Foreign Agricultural Service of the U. S. D. A. Essential features of the plan are price fixing on bacon hogs, complete control of exports, imposition of a slaughter tax on hogs for domestic consumption to offset losses incurred in exports, control of imports including the levying of import duties to equalize the price of domestic and foreign ports, and hog production control. The plan has been in effect about a year. It was enacted to give Dutch farmers at least cost of production.

The Illinois Agricultural Association and associated companies began operating under the NRA early in August. All clerical help is operating on a 40 hour week.

Things To Think About

ON the last day of August, this year, organized grain growers of Saskatchewan, Canada, paid the final installment on an original debt of $11,061,269, thereby gaining clear title to 451 country elevators, several terminals, a head office building at Regina, a transfer house or two at Buffalo, and other property purchased in 1926 from the old Saskatchewan Cooperative Company. Here is proof again that farmers can acquire title to all the machinery they need in a complete marketing program when they support their cooperative unflinchingly through the years. When the obligation was assumed seven years ago, the critics were free to predict the debt never would be paid. It has been paid in full by ordinary deductions from the wheat of growers; deductions that would have been made had they sold their grain through any other channel. Farmers in Illinois who sell their grain through the Illinois Grain Corporation and the Farmers National Grain Corporation are acquiring physical facilities in the same way. **Organization** makes it possible.

WAGES for skilled workers in this country once ranged from $6.75 to $10.50 per week, with hours from "sunrise to sunset," says a booklet recently issued by the United States department of labor for distribution at A Century of Progress in Chicago. Organization has increased wages, shortened hours and improved working conditions, says the booklet, which, by comparing the status of laborers then with their position now, shows clearly the great progress the labor movement has made. Paralleling that progress, to those who know the abuses that used to exist in the distribution of farm products, is the rapid advancement of the farmers' own cooperatives and the big improvement in marketing practices that has followed as a result. Both movements were called into being by abuses, and both, in spite of mistakes and setbacks, have gained title to better things for their supporters. One must know conditions as they used to exist to appreciate and correctly appraise the truly remarkable achievements of either group.

AT the head of its editorial page, the Northwestern Miller carries a paragraph demanding repeal of the processing tax on flour, declaring it unfair and a burden to distressed consumers. It should not stop there, suggests Harry N. Owen, editor of a farm paper in St. Paul, Minn., but should demand the repeal of all tariffs, which do to the distressed people exactly what it says the processing tax does. If the principle of the protective tariff is correct—increasing the cost of goods to the people in order that manufacturers can pay higher wages—then there can be no quarrel with the processing tax, Mr. Owen continues. The processing tax seeks to increase the farmers' incomes so they can buy more of the products of protected factories so the owners can, if they feel like it, pay their workers more. The processing tax, he concludes, is an attempt to extend to agriculture some of the special privileges that have been granted industry for more than a century.

IN dismissing recently the petition for injunction against Henry A. Wallace, secretary of agriculture, to prevent him from enforcing the Chicago milk agreement under the Agricultural Adjustment Act, Justice D. W. O'Donoghue, of the Supreme Court of the District of Columbia, said: "The court finds that a national emergency exists and that the welfare of the people and the very existence of the government itself are in peril. The day has passed when absolute vested rights in contract or property are to be regarded as sacrosanct or above the law. Neither the necessities of life nor commodities affected with public interest can any longer be left to ruthless competition or selfish greed for their production or distribution." Milk dealers who sought the petition have served notice of appeal to the United States Supreme Court. And that tribunal, incidentally, when it convenes again, is faced with making the most momentous decisions it has been called on to make in this century.

Hold "Fireside" Meeting In Sam Sorrells Home

Eighty members and prospective members and their wives attended a county-wide "fireside" meeting at the home of Samuel Sorrells, I. A. A. director from the 21st district, the night of Sept. 18.

Talmage DeFrees, I. A. A. director from the 22nd district, Sid Cherrill and Bob Grieser of the Illinois Livestock Marketing Association, M. E. Roberts, field insurance, E. B. Young, general agent in Montgomery county, H. H. Walker, district organization manager, Mr. Sorrells, and others spoke informally.

"It was one of the peppiest meetings I ever attended," said Mr. Walker. "We are planning other meetings like this one in our district."

Make Progress In Co-op. Creamery Financing

By Frank Gougler

Since cream producers have their rush of farm work out of the way, they are putting forth new effort in raising funds to finance co-operative creameries.

Organization work is underway in the Champaign, Mt. Sterling and Olney districts. The Champaign district is making excellent progress in all counties. In this district they have set out to raise at least $25,000 in cash to finance this project. Champaign county is raising a large block of this money.

On August 15th a meeting was held of fifty or more workers in Champaign. J. B. Countiss addressed this meeting. At the close of the meeting President G. C. Williams of the Champaign County Farm Bureau announced the following prizes to be given away September 15:

To the person selling the greatest number of shares of stock by September 15th, a handsome gold watch. This was won by Cecil Pittman, Mahomet, for selling 29 shares. The second winner was John Douglass, Urbana, who was given a fine Parker pen for selling 21 shares. Similar prizes were given to winners for the sale of stock for the period August 15 to September 15. Francis Jackson, Fisher, won a gold watch for selling 29 shares of stock and Ira B. Burgfield, Sidney, was given a fountain pen for selling 14 shares during the month.

To date more than 300 shares have been sold in Champaign county and the campaign goes on. At the meeting held Sept. 15, President G. C. Williams announced additional prizes to be given to those selling the most stock by Oct. 2. In order to qualify, a minimum of three shares must be sold.

In the Mt. Sterling district all counties are carrying on active stock selling campaigns and Scott County is the first in the district to raise its entire quota. This district is going forward with its campaign without outside assistance. Farmers are determined to get these plants operating at the earliest possible date.

Money at 65

will YOU *have any?*

$1.00

SAVED

NOW

WILL

MEAN

A

COMFORTABLE

FORTUNE

WHEN YOU NEED IT MOST

START **now** to save systematically for a substantial monthly income starting when you are 65 years of age.

One dollar or two dollars saved weekly while you have youth and health will grow into a sure, unfailing income, sufficient to keep you in comfort—even luxury—during old age.

> The exact amount of your weekly savings and of the monthly income your premiums will purchase depend on your present age. The younger you are the more your money will buy.

While you are saving and assuring yourself a comfortable old age, you have the added advantage that should you die before 65, your dependents will receive the face value of your endowment policy to keep them in comfort after you are gone.

This systematic plan of saving for the inevitable "rainy day" that comes with declining years is called the Country Life Endowment at 65. It is the safest, surest, easiest way to assure yourself a comfortable happy old age.

You will want to know more about this plan. Just fill out the coupon and mail it to your County Farm Bureau or to the Home Office direct. Mail it at once. Tomorrow may be too late.

COUNTRY LIFE INSURANCE CO.

608 So. Dearborn St. Chicago. Ill.

O'Neal Pleads Before President For Speed

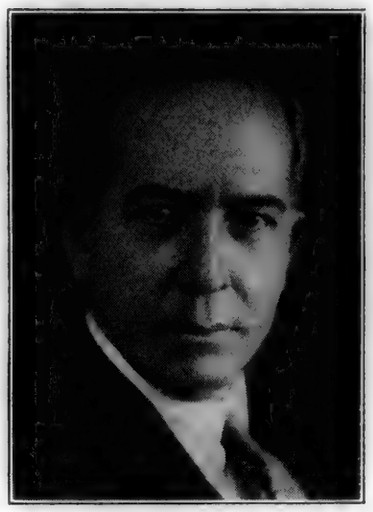
Asks For Inflation and Honest Dollar in National Radio Broadcast Sept. 9

A plea for quicker action in raising farm prices and approving farm loans under the AAA and Farm Credit Administration was delivered by President Ed. A. O'Neal of the American Farm Bureau Federation to President Roosevelt in Washington recently.

Lagging farm prices coupled with higher retail prices resulting from wage and minimum hour agreements under the NRA, Mr. O'Neal pointed out are placing farmers at a further disadvantage in arriving at the goal of pre-war parity.

In a national radio hookup on Sept. 9, President O'Neal strongly urged that the President use the power given him by the last Congress to bring about an Honest Dollar through inflation.

Farmers are struggling with debts, interest, and taxes which they cannot meet because the purchasing power of the dollar in terms of farm commodities is still far greater than it was when their debts were contracted, and taxes raised, said Mr. O'Neal. A commodity dollar that restores farm purchasing power to pre-war parity is still far from being realized, and while there has been some improvement from the low point last year, no substantial relief has yet been had.



We'll Distribute Our Own Milk

(Continued from page 7)

member paid into the Association. "Roszell did not tell you," said Hayes, "how much check-off the dealers are taking out of the price paid by the consumer. He failed to say that the dealers took 70% of the consumer's dollar, while the dairymen only got 30%."

Without any urging, the members surged forward, following the announcement by President Capron that applications for stock could be made at the front of the room following adjournment. Due to the lateness of the hour, many members took the blanks home with them, saying they would sign and bring in their applications the following week.

Unless later developments make it advisable to act otherwise, the Association will probably install bottling equipment in the plant now occupied by the Producers Creamery of Peoria. If the offices are moved out, there will be ample room to take care of the new machinery.

Edward A. O'Neal

Russia Encourages Dairying

With the slogan "a cow for every collective farmer," the Soviet government has launched a campaign to encourage the breeding of cattle by creating a fund of 35,000,000 roubles (nominally $17,500,000) to be loaned to those collective peasants who are unable to buy their own, the Associated Press reports from Moscow. One million cowless collective members are to be helped in this way to buy one calf each. The government hopes to improve the lot of the peasant, and gradually to build up the country's cattle herds. Collective farmers owning more than one cow are to be called on to sell to the less fortunate.

New Process Promises Cheaper Phosphates

Cheaper phosphates for farmers are expected to result from a new process for treating rock phosphate with water vapor and silica at high temperatures recently discovered by the Bureau of Chemistry and Soils. The method is a radical departure from that now used to produce superphosphate. When the rock phosphate is heated to 1400° C. the fluorine which locks the phosphorus is driven off within 30 minutes and the residue after being ground is ready for the spreader.

8,185 employees have been added to the pay rolls of Sears Roebuck & Company since July 29, General R. E. Wood, President of the Company, announced recently. The increase in employment was partially due to the increase in business and partially to the effect of the NRA code.

Whiteside Man Wins Soyoil Paint Contest

Biggest 60 Days Sales In History of Company Completed Aug. 15

THE World's Fair SOYOIL Paint Contest began June 15 and closed August 15 during which period the 53 county service companies associated with Illinois Farm Supply Company purchased 35,444½ gallons of SOYOIL paint, 6,601 gallons of roof coating, and 540 pounds of roof cement.

The winner in the contest was Earl B. Johnson, truck salesman for Whiteside Service Company, who scored a total of 2,003 points, based upon the number of sales and the number of gallons of the different grades of paint.

Laclede Holcomb, truck salesman for St. Clair Service Company, won second place with 1918½ points.

Ernest C. Costley, truck salesman for Macoupin Service Company, was third with 1887 points.

Mr. Johnson was awarded four books of Century of Progress tickets consisting of general admission and various attractions on the grounds; Mr. Holcomb received three books; Mr. Costley two books. The 50 other high ranking men, each of whom received two souvenir general admission tickets to A Century of Progress, are as follows:

A Call For Action

By Henry Morgenthau, Jr.,

Governor, Farm Credit Administration

I AM addressing here publicly every officer and employee of the Farm Credit Administration and every individual in any way concerned with the work of putting into effect the Emergency Farm Mortgage Act of 1933. I include not only every officer of every land bank, from the president and the board of directors down to the newest clerk or stenographer, but every officer and every member of a farm loan association. I wish especially that what I have to say be read and understood by land appraisers and loan committees.

In passing the Emergency Mortgage Act, Congress expressed its confidence in the land bank system and reposed faith in that system as an agency proper and fit to carry out the task of bringing speedy relief to debt-burdened American farmers. The President in his consultations with members of Congress before the passage of the act and in signing it gave expression to the same faith and confidence.

Do Everything You Can

You officers and appraisers of the Land Bank Division, you directors, officers and employees of land banks and you officers and members of National farm loan associations have each and all been charged with a great duty and responsibility by the Government of the United States. That duty and responsibility are to do everything that you can to extend the benefits of the Emergency Mortgage Act as speedily as possible to all to whom it can be of service.

I realize as well as you do that the job is a huge one and the responsibility is great. The land banks never before have been called on to do a job even comparable to this. Applications for loans received since the Emergency Farm Mortgage Act was passed last May amount to about three-fourths of all the outstanding loans of the land bank system, which has been doing business since 1917.

We can take some credit for the speed with which we have built up our organization to deal with this situation, but we can't take time out to pat each other on the back. With a back log of some 185,000 applications for loans hanging over us and new ones coming in at the rate of 17,000 or more a week we are a long way from having the job licked yet.

Farmer Wants Action

The fact that we have increased the number of appraisers at work from 210 when the law was passed to nearly ten times that number at present means little to the farmer who has been waiting sixty or ninety days to learn whether he can get a loan. He knows there has been delay; he doesn't know why and it wouldn't help him to pay his debts if he did. He wants action; and so do I. So, I believe, do you.

This is an emergency. We have been busy, but we've got to get busier. Every man and woman must get results or give way to somebody who will. I mean that. It's too serious a job for me to mince words. I intend that every employee and every agent shall have fair and considerate treatment, but we've got to get results.

We have been hiring appraisers and other help as fast as we thought the system could absorb them, but it hasn't absorbed them fast enough. We've got to take on men at an increased rate and train them efficiently. Every appraiser, every chief appraiser, every reviewing appraiser must seek and find ways to increase the output of appraisals—but it must be done without slighting the job of making an accurate and fair appraisal.

The Word "Normal"

What is a fair appraisal? Our answer to that question will determine how far we can go to help those whom we want to help. Congress has given us one word as a guide, leaving the rest to our experience and judgment. The word is "normal." Appraised value is to be "normal" value. In defining this word we have said that distress sales in these recent bad years do not fix normal value and that neither do high sale prices of boom years. Normal value is somewhere between. The Agricultural Adjustment Act, passed by Congress as a part of the same bill that included the Farm Mortgage Act, indicates that the years 1909 to 1914 inclusive were years of normal price relations as between farm crops and consumers' goods. So we have been using farm commodity prices of 1909-14 as a principal guide in determining normal value of farms.

There have been complaints that this principle was not being faithfully applied—complaints that many appraisals since the act was passed have been too low. We have had special examinations made of many of these complaints. We have had investigations by soil experts who have no connections with the land bank system, which are continuing.

The reports I have already received convince me that some of these complaints—perhaps many of them—are well founded. I have not sufficient information to say that appraisals are generally too conservative; some may even be too high. But I am convinced that some appraisers have not understood properly the rule of value that we have instructed them to apply.

A land bank loan has a maximum limit of 50 per cent of the appraised normal value of the land for agricultural purposes, plus 20 per cent of the value of permanent, insured improvements. The purpose of that 50 per cent margin is to give protection against declines in value and these may be due either to special causes which affect the particular property or they may be due to price declines and bad business conditions that affect all farm property. In the midst of such a depression period it is illogical to impose the same strict rules as to farm earnings as a determinant of value that we would impose in a prosperous period. That would mean exacting a double margin of safety which would block us from lending to many able farmers who deserve credit. That was the reason for the phrase "normal value" in the act. It is the basis for the explanations we have given with respect to appraisals.

Must Make Sound Loans

Both the land banks and the National farm loan associations are required to make sound loans, but they need not exact excessive security. Members of associations as well as land bank officials know that the character and ability of the farmer who gets the loan has much to do with its soundness. The Emergency Mortgage Act does not instruct you to make loans to open up new areas to the plow or to establish more people on farms. It was drafted to take some of the burden of debt from the backs of experienced, capable farmers, established on the land, and to release funds to rural communities by refinancing farm mortgages and other debts on terms which the farmers might reasonably be expected to pay over a period of years out of the products of the soil.

A loan to such an experienced, capable farmer, to permit him to retain the homestead he has farmed successfully, may be made more safely than to a newcomer, inexperienced

(Continued on page 18)

Earl Smith Talks At Southern Ill. Meetings

Approximately 1200 Farm Bureau members, business men, and their guests from Wabash, Edwards, White, and Wayne counties attended a rousing meeting in the High School Gym at Grayville the night of Sept. 19 reports L. F. Brissenden, district organization manager.

President Earl C. Smith was the principal speaker.

The Williams Colored Quartet from Carrier Mills were enthusiastically applauded when they sang negro spirituals and folk songs.

About 800 attended a similar meeting in the afternoon of the same day at the Fair Grounds in Marion, Williamson county where Mr. Smith also was the principal speaker.

The colored quartet from Carrier Mills provided entertainment at Marion too, under the auspices of the Saline County Farm Bureau which led with 39 new members signed by quota men since Jan. 1.

At Grayville, the Mercury-Independent published a special edition advertising the meeting and welcoming farmers from the four counties, to Grayville. Local merchants joined in the welcome with paid advertising. The meeting was sponsored by the Farm Bureaus from Wabash, Edwards and White counties, and by the Wabash Valley Service Co.

It's Time to Mobilize

(Continued from page 5)

zation campaign. It provides for a state campaign committee with Earl Smith as chairman. The state chairman will select county organization captains on recommendation of the county presidents. The county captain will select lieutenants so there will be at least one for every township or community in the county. The mobilization campaign will be directed toward obtaining new members and bringing present members into good standing.

Each county under the agreement shall appoint a county organization committee if one is not already in existence to work with the campaign captain and his lieutenants.

The I. A. A. will furnish publicity which the local counties many supplement, and has retained Mr. Lucius Wilson, a trained sales and organization director, for a period of six weeks to take charge of the state-wide campaign. He will address county and district meetings of organization workers, and direct the movement all along the line.

"McDonough county is ready to go along and put the job over," said Fred Herndon, president of the Farm Bureau who was first to respond to an invitation by President Smith for comment from the floor.

"I am authorized by our board to pledge the co-operation of Pulaski, Alexander county," said President Lingenfelter.

"We'll do our best to make this a success in Mason county," responded President Chas. Borgelt.

"We're going to put it over in our county," said President Williams of Champaign county.

"We've needed this for a long time," asserted an official of the Will County Farm Bureau.

"We're ready to go along in Cook county, all except Chicago," said Dick Nietfelt, president of the Cook County Farm Bureau, amidst a burst of applause.

"It's time to organize more effectively. We're ready," said a spokesman for Vermilion county.

"During the past two years or more our membership has shown an increase every month. We'll be with the I. A. A. 100 per cent in this program to mobilize farm support," said President John Miller of Madison county.

So spoke many others. Finally someone suggested that all in favor rise with their county banners. "This reminds me of Kansas City in 1928 and Chicago last fall," commented Mr. Smith as the county banners were waved on high in response to the suggestion. "The sentiment seems to be unanimous. Now I'd like to receive recommendations very soon from every Farm Bureau president for a campaign captain for his county. And let nothing but fitness of the man for this particular job influence us in his selection."

A Call For Action

(Continued from page 17)

in farming in that particular area.

It was to take care of such experienced, capable farmers who stood in danger of losing their farms that the Commissioner's fund of $200,000,000 was provided from Federal funds by the Emergency Mortgage Act. This permits the refinancing of farmers deeply in debt without imposing undue risk on the land banks and the farm loan associations. If not more than $5,000 is required from this fund in any one case, a farmer may be refinanced up to 75 per cent of the normal value of his farm and farm property. If normal value has been fairly fixed, creditors of a farmer who owes more than 75 per cent will often find it to their advantage to reduce their claims so that all debts may be liquidated by land bank and commissioner's loans.

The Next Few Months

We shall have to give an accounting to the President and to Congress of what we have accomplished in the administration of this Emergency Farm Mortgage Act. We have an accounting to make also to the people of the United States. What we do in the next few months will determine how good an accounting it is to be. Let me summarize my ideas of what we must do to make ours a good report.

1. We must increase our forces; we must find more efficient methods; we must speed up the work.

2. We must interpret "normal value" fairly, so that, without making unsound or excessive loans, we may extend the benefits of refinancing to as many farmers as possible.

3. We must study every application sympathetically and patiently and strive to find a way to help the applicant out of his difficulties with one or more of the means at our command.

I congratulate all of you on the opportunity to render a great service. Let's not muff it.

New York City To Care For Its Own Destitute

Tammany Hall, in control of the administration in New York City, recently devised an emergency tax program to care for their unemployed.

The program provides an increase of 50% in the water tax, a 5% tax on each taxi ride, a 5% tax on the gross incomes of brokerage houses with a 4% share tax on stock transfers, a tax of 1½% on the gross income of all public utility companies and a tax of one quarter of one percent on the value of investments of savings banks and life insurance companies.

With the city coffers all but empty and more than 50% of its total taxes due in 1933 still uncollected, the Tammany administration was forced either to find new sources of revenue to appease the bankers' demands for a sound credit position or cut down city expenditures sufficiently to balance its budget.

Unlike the situation in Illinois, Governor Lehmann of New York flatly refused proposals of the Tammany leaders to place the burden of unemployment relief in New York City on the people of the whole state through state-wide taxation.

Governor Lehmann told the Tammany leaders to go home and work out their own tax program in New York City to care for their destitute people.

Imperative To Raise Farm Price Levels At Earliest Possible Moment—Smith

By
EARL C. SMITH, PRESIDENT,
Illinois Agricultural Association.

Practically all students of national affairs and economics agree that it is imperative to raise farm price levels at the earliest possible date. They recognize that farmers and those dependent upon farmers constitute approximately one-half the total buying power in the Nation They agree that if this buying power can be restored thru increasing farm incomes as a result of normal prices for farm products that farmers could and would be effective in absorbing the products of mills and factories. Such buying would furnish a necessary outlet for increased production of mills and factories that must be had if increased employment in industrial regions is to be realized.

How to raise farm prices is the problem. Were it not for the tremendous surpluses of farm crops this would be a comparatively easy task. The Farm Bureau movement of Illinois [illegible] has for many years insisted that proper control of crop surpluses must be had if reasonable price levels were to obtain for that portion of farmers production consumed in the domestic market.

McNary-Haugen Bills.

The McNary-Haugen Bills of 1926-27-28, were directed at the heart of this question. Many yet believe that had this legislation been enacted into law and effectively administered, America would not now be in the throws of distress. The problem then presented was very different and comparatively simple to that which exists today. At that time it was merely a matter of providing ways and means for surplus production to flow into world channels of trade on a world price level basis while maintaining price levels for the large portion of production consumed in the domestic market on the basis of American standards of living.

At that time there was almost unlimited export outlets for surplus farm crops. Today such outlets are greatly reduced, in some cases almost non-existent. The American farmer has continued to produce far beyond the possibilities of consumption in the United States. This changing condition was largely the cause of farm organizations supporting the Agricultural Adjustment Act with its wide and varied authority placed in the Department of Agriculture to increase price levels of farm crops to parity, at least for that portion consumed at home.

President Roosevelt and Secretary of Agriculture Henry A. Wallace, have repeatedly told farmers that the only way they could expect substantial improvement in price levels necessary to restore the purchasing power farmers had in the average of the years 1909-1914, was to plan their production so as to remove the tremendous surplus now coming to market.

Means A Reduction.

In effect, this means a substantial reduction in the production of the many basic farm commodities. A vast majority of the students of the agricultural problem agree that this is the first essential to restore farm prices, at least until such time as normal export outlets may be established thru reciprocal trade agreements and international understandings.

Based upon the general principle of planning commodity production to the needs of the domestic market, the Secretary of Agriculture and administrators of the Agricultural Adjustment Act have developed and are putting into effect, programs which they believe are addressed to the peculiar problems presented by the several basic farm commodities and which they believe will effectively result in substantial improvement of farm price levels to the full extent farmers will respond and cooperate.

The wheat control program which has been underway for several months needs no further explanation. Undoubtedly, there are inequities or inequalities in the application or effect of this program upon many farmers. The outstanding fact remains, however, that practically every student of the situation confronting wheat farmers agree that it is necessary to reduce total wheat production in this country from 20% to 25% if we are to have any substantial reasons for expecting parity prices for that part domestically consumed.

Very definite price-controlling plans are underway for the dairy farmers in the larger milk sheds in the United States.

The temporary production control program for the cotton farmers in the South was accepted by them in a very large way. More permanent plans to maintain reasonable prices for this group of farmers is well underway.

Hog Program.

A temporary program for the hog farmer is about completed. An intermediary program for corn-hog farmers coupled with a more permanent program, has been recommended to officials at Washington by the National Corn-Hog Committee. Much publicity has been given to the details of these plans. Every farmer should fully understand the complexities of the corn-hog problem that he may be prepared to understand the reasons underlying the proposed solutions.

Many leaders of national prominence in the political and business world have contended that nothing could be done to stimulate corn and hog prices except improvement in general economic conditions. They appeared in large numbers before the committees of Congress when the Agricultural Adjustment Act was under consideration and stated in the proceedings of these hearings that the delicate and peculiar relationships existing between corn and hogs made it economically and practically impossible to successfully do anything to improve and maintain the price levels of these commodities.

The Illinois Agricultural Association assumed the leadership in insisting that any National agricultural program would break down that failed to effectively include corn and hogs because taken together, they constitute the largest cash crop of the American farmer. Economists have stated that hog prices could not artificially be raised that to do so would decrease pork consumption with the result that the large increase in the tonnage of hogs coming to market would force a break-down in such a program.

The National Corn and Hog Committee has attempted in its recommendations which have gone forward to Washington, to meet every economic problem that the peculiarities of the commodities of corn and hogs present.

Problem Summed Up.

Summed up, the problem presented disclosed a decrease in the exports of pork products of more than five hundred million pounds during the last year, coupled with an estimated increase in pigs farrowed of around seven per cent. The temporary program, although drastic, called for the immediate marketing of six million pigs or approximately one-third of the numbers that would have normally come to market during the next six to eight months' period. This effort has now been fully accomplished.

The recommendations now under consideration in Washington call for an immediate improvement of price levels which should result in parity prices on all hogs below 220 pounds by November 1st. The levying of a $2.00 processing tax on all hogs reaching market, $1.00 of this tax to be returned to all farmers who contract to reduce their corn acreage twenty per cent in 1934 under that of the average of 1932 and 1933; also to pay such co-operating farmers on a basis of 30c per bushel on the normal yield of acres taken out of corn production, such acres to be allowed to go to pasture or cut for hay.

The other revenue derived from the processing tax, it is recommended, be used to remove from normal market channels the percentage of hog receipts above that which can be consumed in the domestic market on a basis of parity prices to the producer. The hogs so purchased would be processed into an edible and wholesome sausage upon which a low price could be fixed uniformly throughout the United States. Such a program will make available on a lower price basis than exists at the present time, a pork product for citizens with reduced incomes.

Calls For Cooperation.

This program calls for the cooperation of a large percentage of the corn-hog farmers of the middle west. Practical men in all lines of the meat industry, including producers, packers and retailers, agree such a plan can be so coordinated as to result in parity prices for approximately 90% of the estimated pork tonnage to come to market during the next eight months.

The question resolves itself into the following:

Shall corn-hog farmers do nothing and as a result of their lethargy be prepared to expect even lower prices than have prevailed during the last year, or shall they organize and fully cooperate so as to have reasons to expect parity price levels for approximately 90% of their normal production of hogs and 80% of their normal production of corn.

Less than 10% of the farmers in the United States thru organization have made possible this far-reaching federal law.

A much larger percentage of farmers are required in organization if they are to expect effective and successful administration of the law.

Farmers are now in a position to secure reasonable and fair prices for wheat, corn, hogs, dairy products, cotton and tobacco. Other farm commodity prices have and will seek comparable price levels.

Through organization and organization alone can these results be obtained.

I appeal to every farm family in the State of Illinois to do their part by getting into organization harness; force farm price levels to a parity basis and with such increased incomes, assist in buying the Nation back to prosperity.

STOP! THINK! ACT!

Information reaching the offices of the Illinois Agricultural Association discloses that the efforts now being made to successfully admminister the Agricultural Adjustment Act are being resisted by various groups of processors of different commodities. These people are effectively organized. They are presenting almost solid fronts to protect what they call their rightful interests. In many cases this means to protect abnormal margins of profit in the processing or the later handling of the products of the American farmer.

It is well known that many processors of farm commodities are appealing to and getting support from unorganized farmers to offset or break down the efforts and influences of farm organizations.

To which camp do you belong?

With the processors and other handlers of farm crops in the channels of distribution, or in an organization fighting shoulder to shoulder with your neighbor producer?

There is no middle ground. There can be no middle ground. The Illinois Agricultural Asso[illegible] asks every farmer in the State of Ill[illegible] to STOP, THINK and ACT.

IAA LEGISLATIVE COMMITTEE IN STATE CAPITAL

The legislative committee of the Illinois Agricultural Association was on hand at Springfield this week when the General Assembly convened in special session.

The I. A. A. is attempting to protect the interests of farmers, in fact, all downstate people against unfair legislation that may be proposed by Chicago political leaders in the interest of poor relief.

ON PROPERTY

ELF— BY JOINING IN ORGANIZED AGRICULTURE'S FIGHT FOR YOU

Three Point Program Can Be Achieved With United Support Of Farmers

Agriculture Faces Crisis As Farm Prices Lag While Others Go Up—Minimum Prices For Farm Commodities Seen As Solution To Immediate Problem.

With a challenge to all Illinois farmers to organize more effectively to speed the arrival of higher farm prices, lower property taxes, and immediate federal credit relief, the Fall Mobilization Campaign sponsored by the Illinois Agricultural Association and County Farm Bureaus will swing into action in every county on Monday, October 9.

"With more powerful organization of agricultural forces all three of these things should be vigorously insisted upon," said Earl C. Smith, president of the I. A. A. and chairman of the state campaign committee.

The fact that farm prices are lagging behind while well organized labor and industry aided by the NRA are reducing hours of labor, setting minimum wage scales and boosting retail prices all along the line, is cause for [illegible] a further disadvantage in exchanging their products for finished commodities, but the whole recovery program is threatened unless farmers unite to demand quicker action in boosting farm prices, and then co-operate in reducing surpluses.

Farmers as a group constitute the largest consuming class in the country. Their buying power must be raised or the whole recovery program will break down. By failing to lend their influence and support unorganized farmers are holding back the realization of parity prices for farm products, prices that would give them buying power equal to that enjoyed in the 1909-1914 period.

Immediate Relief Asked.

The situation first may call for fixing of minimum prices for certain farm products to provide immediate relief. This is nothing more nor less than organized labor and industry are doing with or without government aid.

Secondly, it calls for wholehearted support by farmers of the acreage and crop reduction program. This will provide permanent relief when followed up with intelligent production in line with market needs in future years.

Here is a job for organization. Here is reason for powerful mobilization of agricultural forces in Illinois. Farmers are being so hedged about by codes in industry and labor that they will be lost unless they demand equal privileges in fixing their own prices.

Plan Under Fire.

The same old opposition that fought the McNary Haugen bill, that opposed all past efforts of farmers to control surpluses and raise prices is working again, this time largely under cover. The hog control plan is under fire. Enemies of agriculture are centering their attack on the whole agricultural adjustment program because nearly 6,000,000 pigs were removed from market channels.

They forget, or perhaps are not interested in the fact that our foreign markets which once took one hog out of six produced in this country have nearly vanished; that it is suicide for farmers to go on producing for a market that no longer exists.

City consumers are interested primarily in cheap food. Commission men, processors, and speculators are chiefly interested in volume and margins. They protect their margins regardless of what the farmer gets for his produce.

Agriculture is facing a crisis. Will farmers rise up as a unit, will farmers mobilize to protect what has been gained, to support sound measures of acreage and crop reduction for their own good? Will those who have been withholding their support now join and back the Illinois Agricultural Association and Farm Bureau in their determination to protect the farm industry?

Everywhere, even in Illinois, a minority of farmers are carrying the load. The unorganized majority, apparently indifferent to their opportunities, are holding back while labor and industry, better organized, forge ahead under the NRA minimum wage and price-boosting program.

Farmers are not a unit—not

(Continued on Page 2, Col. 4)

TAX OBJECTIVES CAN BE ATTAINED SAYS JOHN WATSON

Must First Revise The State Constitution To Secure Fair Tax Laws.

By JOHN C. WATSON
Director of Taxation.

Cut present property taxes 50 per cent!

Broaden the tax base and distribute the cost of government among all the people of Illinois having ability to pay.

Remove from property, both rural and urban, at least half the burden it now bears and has unjustly born for so many years.

This is the job Organized Farmers through the I. A. A. and Farm Bureaus have set out to accomplish, a job which requires and deserves the support of every farmer and landowner if it is to succeed.

To this end the Illinois Agricultural Association submitted general provisions for a proposed constitutional amendment, to nearly 2,000 county farm bureau leaders who met at Decatur on Tuesday, Sept. 18.

The leaders unanimously endorsed the resolution favorable to such an amendment and also authorized the circulation of a petition among Illinois farmers asking the governor to call a special session of the general assembly to approve and submit such an amendment for vote in the next general election.

The Resolution.

The resolution adopted at the Decatur conference is as follows: "In view of the grossly unjust burden laid upon owners of tangible property for support of State, County and local government, the adverse effect of such burden upon the values of property, and the rapidly increasing delinquency in the payment of taxes, this Conference of Farm Bureau leaders earnestly urge the officers and Board of Directors of the Illinois Agricultural Association to take such action as they may deem advisable or necessary to secure the calling of a special session of the Fifty-Eighth General Assembly and the submission, by that body, of an amendment to the Revenue Article of the State Constitution, to be voted on in November, 1934, embodying the following principles:

1. "Removal of all restrictions which prevent a broadening of the base of taxation and the establishment of an equitable system of taxation.

2. "The imposition of restrictions upon the taxation of property which will relieve tangible property, both rural and urban, of at least one-half of the burden now laid upon it."

Billions Untaxed.

"No equitable system of taxation can be initiated in Illinois until the legislature is given full authority to revise our revenue laws so as to bring into the taxpaying class those who are now

(Continued on page 2, column 7.)

nded Farm Credit Aid Worthy Farmers

COMPOSITION AND EXTENSION," which was approved March 3rd by the President.

No agreement, however, was reached by this Congress in regard to providing the source of funds needed in funding such obligations, and for new finance.

Honorable Tom D. McKeown, member of the Committee on Judiciary, House of Representatives, has prepared an excellent digest of Section 75 of the Amendment mentioned, which appeared in, and is here reproduced by courtesy of the United States News.

How Secure Relief.

"How can the farmer burdened with debts secure relief from the Government without going into bankruptcy?

"Under a law enacted March 3, Congress created a system of debt relief for the individual, making special provision for the farmer.

"Section 75 of the bankruptcy law now provides that 15 or more farmers in any county may get together and petition the Federal District Court to appoint a referee or conciliation commissioner to handle their debt problem.

"How can the farmer obtain relief, when a conciliation commissioner has been named by the court?

"At any time within five years, the law provides, the farmer may file a petition with the court, stating that he is insolvent or unable to meet his debts as they mature, and that he desires a settlement or an extension of time to pay his debts. The fee charged in filing the petition is $10. The petition must show a list of debts owed by the farmer. It must be in duplicate, and one copy will be submitted to the conciliation commissioner by the court, if the petition is approved.

"Within ten days the farmer must file a list of his assets with the commissioner, who then is required to call the first meeting of creditors.

"They will be notified that the farmer proposes to offer terms for a settlement or for additional time and will receive a statement of the farmer's debts and the names of creditors.

"If the creditors wish, they may examine the farmer at the first meeting, and they may name a committee to submit to the commissioner a supplementary inventory of the debtor's estate. The commissioner will determine the final inventory of the debtor's estate.

Farmers May Apply.

"If an agreement is reached with a majority in number of all creditors whose claims are a majority in amount of all claims that have been allowed, the farmer may apply to the commissioner for confirmation. The commissioner will send the order to the court, with the following facts:

"1.—Acceptances of creditors.

"2.—Proofs of claims which have been allowed and those which have been disallowed;

"3.—List of debts having priority;

"4.—List of secured debts, with a description of the security of each;

"5.—Final inventory, with list of exemptions;

6.—Certificate showing that deposit has been paid;

"7.—Report of the commissioner recommending or opposing confirmation and, in the case of an extension, stating to what extent, if any, it would be desirable for the court, after confirmation, to retain control over the farmer and his property.

"The judge will fix a date and

THE SPECIAL SESSION

A special session of the Illinois legislature was called by Governor Horner to convene on Oct. 3. The chief purpose, as expressed in the call is "To enact laws to provide funds for the Illinois Emergency Relief Commission to be used for the relief of persons who are destitute and in necessitous circumstances." These funds are needed principally for Chicago and Cook county.

At a special session the legislature may consider only those subjects designated in the governor's call for the session. Again Governor Horner seems to have been persuaded or to have decided to perpetuate the present scheme for relief under which the county board of Cook county appropriated and levied but $253,000 for the year 1933, slightly more than $20,000 per month, for relief purposes while the Illinois Emergency Relief Commission was spending more than five million dollars per month in Cook county for relief.

The money appropriated by the county board has merely been levied, none of it has been collected, as tax collections are more than a year behind in Cook county. Chicago and the townships in Cook county do not raise any money for relief purposes.

It is reported, however, that the purpose of the session is to follow the scheme adopted in 1932, and to submit a state-wide bond issue for 30 million dollars to the voters in 1934, the principal and interest on these bonds, if the bond issue is approved, to be paid from the cities' and counties' portion of the gasoline tax, each county to pay in proportion to the amount of relief received from this source.

Pending approval of this bond issue, in order to provide funds immediately, the general assembly would levy a state-wide property tax for possibly 40 million dollars and would issue state anticipation notes against this tax levy, these anticipation notes to be retired from the proceeds of the bond issue after it is approved in November, 1934. If the bond issue is not approved, the state-wide property tax would be collected in 1935.

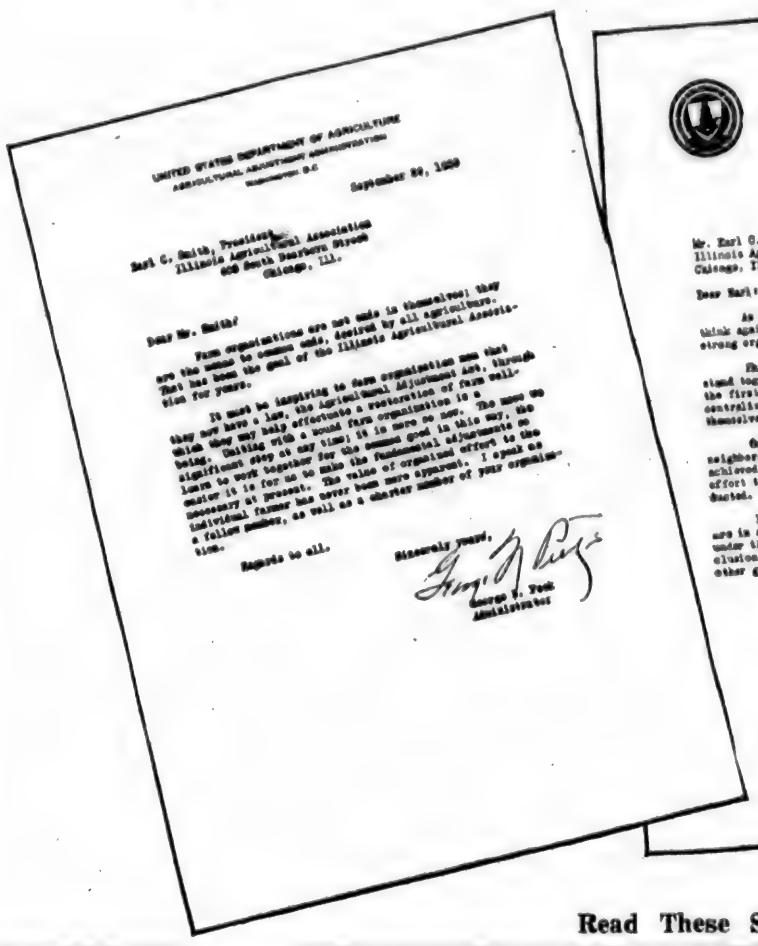
Governor Horner has said again and again that local communities should be empowered to care for their poor but this call does not contemplate such legislation, in fact it attempts to forestall it. At the rate of $5,000,000 per month, the $30,000,000 will provide relief for six months. No provision is made beyond that time.

The state conference of Farm Bureau leaders which met in Decatur in September adopted a resolution opposing any further extension of state credit for the benefit of Cook county or any other community until that community had drawn reasonably upon its own resources. Chicago and Cook county have not done this.

The Illinois Agricultural Association has always recognized that all citizens of Illinois should be properly fed and housed. It has insisted and will continue to insist that the initial responsibility rest with the local communities or counties to take care of its own destitute or unemployed. It still believes that this is the most economical and effective way to accomplish these ends.

The Association has attempted to secure the enactment of laws, first, to make it possible for each county to assume this responsibility; and secondly, to force each county if necessary, to accept this responsibility before any attempts are made to place upon all citizens and property of the State an increase in the property tax burden for unemployment relief.

We also have insisted that the known billions of hidden wealth (intangible property) should be taxed on an equitable basis with real property before an added tax for any purpose is placed upon property.



During the special session and possibly in succeeding sessions, the Illinois Agricultural Association will continue to use every reasonable and proper effort and influence to protect the property taxpayers of Illinois against any further inroads of taxation, since it is well known that a very large portion of revenue from such added taxes would be spent in one county which has assessed and collected less taxes for this purpose, population considered, than possibly any other county in the State of Illinois.

PARITY PRICES THROUGH ORGANIZATION

The passage of the Agricultural Adjustment act last spring is the culmination of 12 years' effort led by the Farm Bureau to control surpluses and raise farm prices. This is the most far-reaching piece of legislation ever secured by farmers.

It provides for the establishment of parity prices which means prices that will restore to farmers the purchasing power equal to that had in the 1909-1914 period.

A Time For Far

Read These Special Mess

It provides for farm credit relief, for lower rates of interest.

It authorizes the president to establish an honest dollar, for currency inflation by requiring the federal reserve banks to purchase federal securities in the open market; devaluate the dollar up to 50 per cent; issue U. S. notes (greenbacks) up to $3,000,000,000; accept up to $200,000,000 in silver on allied war debts; coin silver in unlimited quantities.

It authorizes trade agreements with processors and distributors to raise prices; it embodies the domestic allotment plan of surplus farm crop control.

All these and more are provided in this measure, the enactment of which was made possible by Organized Farm Effort.

Largely as a result of this legislation certain farm prices are up 50 to 100 per cent over extreme low levels of last year.

Organized agriculture can justly take credit for much of this gain. Friends of agriculture for the most part have been placed in control of administering the Farm Adjustment act.

But parity prices have not yet been realized. There is work ahead and much of that work must be done by farmers themselves.

Price depressing surpluses must be removed. Acreage and tonnage of wheat, corn, hogs, milk and other products must be reduced until foreign outlets are regained. Temporarily the situation may call for the fixing of minimum farm prices to keep agriculture in line with other price levels. There is nothing impossible about this situation. Parity prices [illegible] stronger organization and effective cooperation is the only answer.

THE PRESIDENT ON COMMUNITY RESPONSIBILITY

Speaking before the annual convention of the American Legion in Chicago recently, President Roosevelt in the presence of local public officials again emphasized that it is first the duty of each community to provide for its destitute people.

"If he (the individual) has not the wherewithall to take care of himself," said the President, "it is FIRST OF ALL the duty of his community to take care of him and next the duty of his state. Only if under these circumstances his own community and his own state are unable, after reasonable effort, to care for him, then, and then only, should the federal government offer him hospitalization and care."

The President's position has been that of the Illinois Agricultural Association on the question of unemployment relief, from the beginning. It seems to us that any other stand is indefensible. Easy money is as bad for local governments as it is for individuals. It promotes extravagance, dependence, and irresponsibility. It leads to moral and financial bankruptcy. Let each community make a reasonable effort to help itself. Having done this neither the state nor the federal government should or will deny necessary aid.

Views From The Press

FARM ASSOCIATION OBJECTS
(From Moline Dispatch)

The Illinois Agricultural Association has gone on record formally against further taxation of the other counties of Illinois to finance Cook county's distribution of food.

It sets forth the record of the regular session of the general assembly in which the Lantz bill was passed, authorizing Cook county to levy taxes to support her own unemployed. This bill was backed by the farmers, and the association's bulletins have said repeatedly that Governor Horner expressed himself as satisfied with the measure.

Then the governor exercised his power of veto, giving as his reason therefor that the county board didn't want the power.

As long as Cook county's paupers can be fed by funds from the state government and from the national government, of course, it does not desire to tax itself as the rest of the state has to do.

It probably is right in the present conditions for a city having as many unemployed as Chicago has to receive aid from both the state and the national governments. It is not reasonable, however, that it should escape without levying a single cent for support of its own. It should be known that during the three years in which other localities have been paying rising local taxes to support their unemployed, Chicago has not paid a cent of local taxes for this purpose.

Chicagoans first go to Springfield and dangle a red riot before the legislature and then they take their little riot down to Washington and dangle it there. Results have been obtained every time.

"The association will resist any further efforts to put over the new state taxes which all the people of the state must pay, to spare the metropolitan area from assuming its rightful responsibilities," says the bulletin of the Illinois Agricultural Association.

HENRY A. WALLACE

FARMERS SHOULD STAND TOGETHER

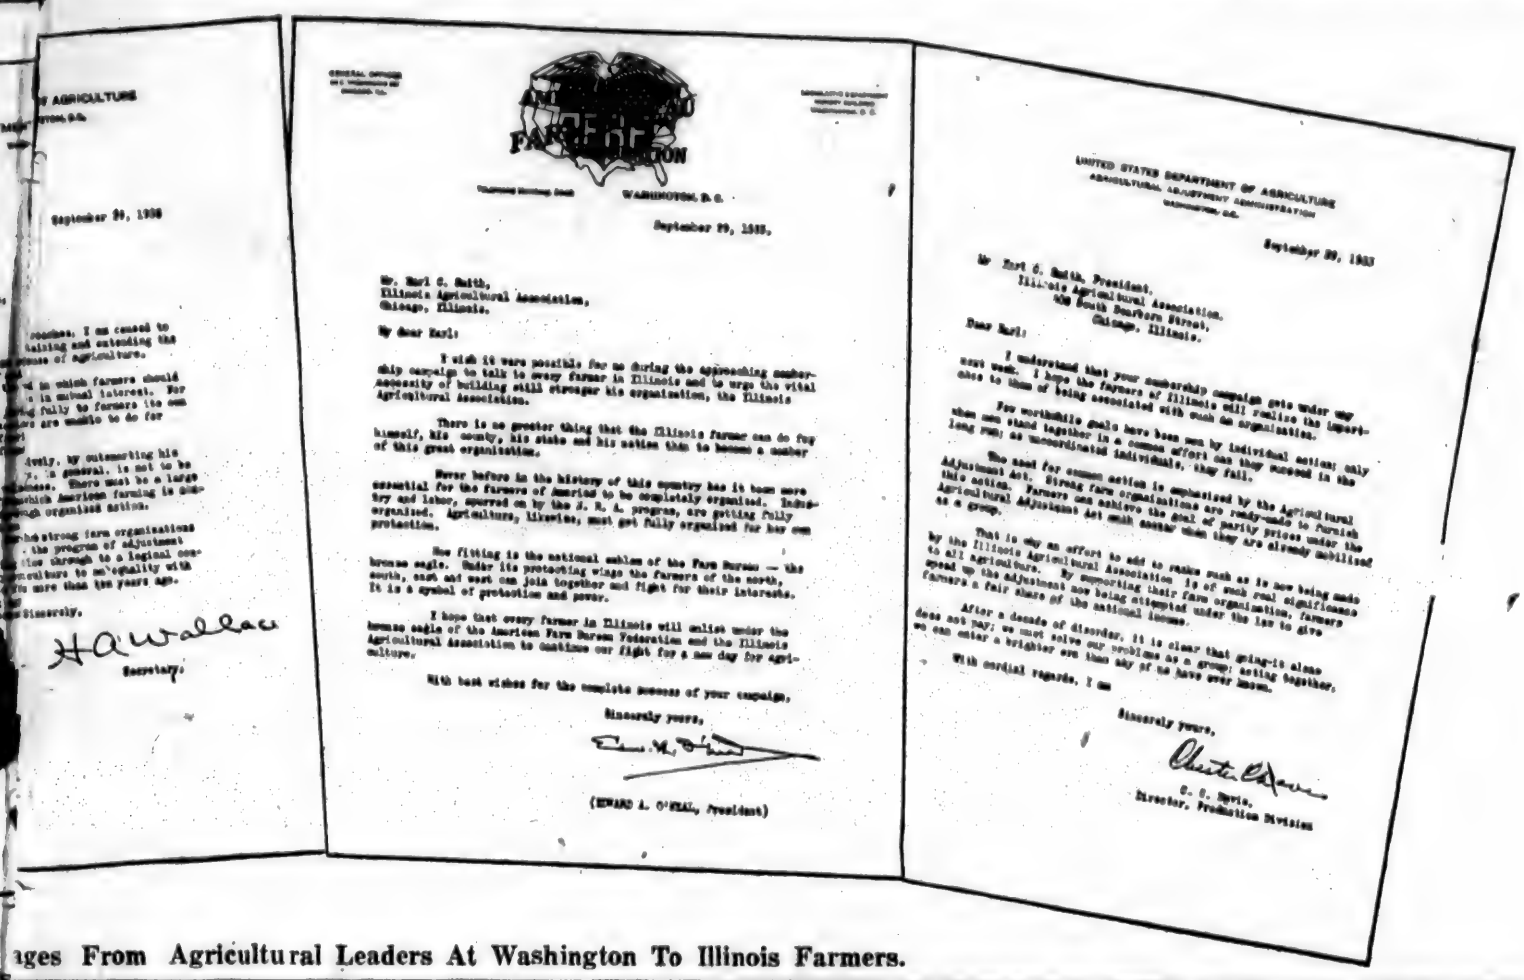
By HENRY A. WALLACE
Secretary of Agriculture.

As your membership campaign approaches, I am impressed [illegible] and extending the strong organizations devoted to the cause of agriculture.

This, of all times, is a period in which farmers should stand together in strong organizations in mutual interest. For the first time, government is offering fully to farmers its own centralizing powers to do what farmers are unable to do for themselves, individually.

One farmer may succeed, relatively, by outsmarting his neighbors, but prosperity for farmers, in general, is not to be achieved simply by individual shrewdness. There must be a large effort to raise the whole level on which American farming is conducted. This can be done only through organized action.

It is particularly fitting that strong farm organizations are in a position to help carry out the program of adjustment under the Farm Act. This is to follow through to a logical conclusion a campaign for raising agriculture to an equality with other groups, begun by farm leaders more than ten years ago.



CHESTER C. DAVIS

GOING IT ALONE DOES NOT PAY—

By CHESTER C. DAVIS
Director, Production Division Agricultural Adjustment Administration.

I understand that your membership campaign gets under way next week. I hope

...mers To Stand Together

...ages From Agricultural Leaders At Washington To Illinois Farmers.

...l Mess

...he farmers of Illinois will ...realize the importance to ...them of being associated with ...such an organization.

Few worthwhile goals have ...en won by individual ac...n; only when men stand ...together in a common effort ...y they succeed in the long ...n; as uncoordinated indi...viduals, they fail.

The need for common ac...tion is emphasized by the Ag...ricultural Adjustment Act. Strong farm organizations are ready-made to furnish this action. Farmers can achieve the goal of parity prices under the Agricultural Adjustment Act much sooner when they are already mobilized as a group.

That is why an effort to add to ranks such as is now being made by the Illinois Agricultural Association, is of such real significance to all agriculture. By supporting their farm organization, farmers speed up the adjustment now being at...ted under the law to give ...rmers a fair share of the national income.

After a decade of disorder, it is clear that going-it alone does not pay; we must solve our problems as a group, acting together, we can enter a brighter era than any of us have ever known.

TAX OBJECTIVES CAN BE ATTAINED

(Continued from Page 1)

...escaping their just share of the ...burden of government.

The evils of the present property ...ax, which it is estimated bears at ...least 85 per cent of the cost of ...state and local government, lie in ...he fact that billions of dollars of ...personal service income are not ...axed, and other millions of dol...ars of property in the form of ...stocks, bonds, and other intangi...bles escape assessment. Nor has ...here ever been any effective ...method devised of taxing intangi...bles as property. They can be taxed successfully only on the basis of earnings.

By constitutional amendment, the I. A. A. would place a tax limit of around one per cent or less on the fair cash value of tangible property, both in the city and on the farm. And then if more revenue is needed to carry on necessary government it proposes to raise it through other forms of taxation based on ability to pay.

Can Be Achieved.

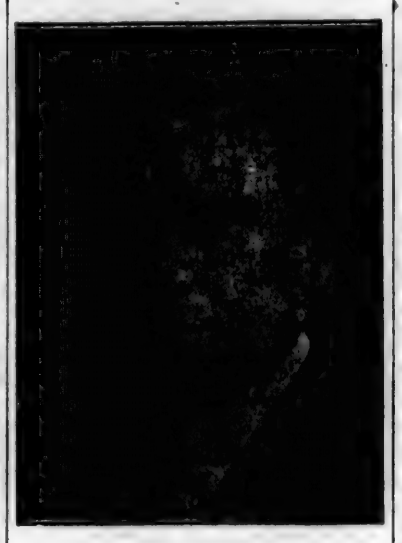
I am confident that with the support of all Illinois farmers this program can be accomplished.

The property tax has broken down and all but paralyzed government in many communities. Particularly is this true in Chicago where inability to pay coupled with open rebellion by property owners against the tax gouging of public officials has resulted in putting Chicago deep in the mire of financial distress.

Chicago now owes the state upwards of $30,000,000 in back and delayed taxes. Yet I am satisfied that this city has more ability to pay its just assessments than many downstate communities where tax collections are up to 90 per cent or more.

There never was a time when farmers needed to be more on the alert to protect their interests in state government than now.

There never was a time when they needed stronger ...ation than now.



The things that have been accomplished toward solving our tax problems have been made possible by the organized minority

How much quicker and surer could we attain the reasonable objectives announced here with more powerful organization.

Co-op Marketing Makes Big Gains In Six Months

During the first six months of 1933 Illinois farmers shipped 1,582 more cars of livestock than were shipped to the same cooperative agencies during the first six months of 1932. A comparison of shipments from Illinois counties to producer agencies cooperating in the joint state-wide field service program follows:

	1932	1933
Chicago	4,806 cars	5,898 cars
Indianapolis	909 cars	769 cars
St. Louis	3,562 cars	3,973 cars
Peoria	1,729 cars	1,860 cars
Cincinnati	190 cars	221 cars
Buffalo	264 cars	161 cars
Pittsburgh	48 cars	41 cars
Illinois Livestock	144 cars	360 cars
National Order Buying Co.	51 cars	2 cars
	11,703 cars	13,285 cars

GEORGE N. PEEK

VALUE ORGANIZED EFFORT APPARENT

By GEORGE N. PEEK, Administrator Agricultural Adjustment Administration.

Farm organizations are not ends in themselves; they are the means to common ends, desired by all agriculture. That has been the goal of the Illinois Agricultural Association for years.

It must be inspiring to farm organization men that they now have a law, the Agricultural Adjustment Act, through which they may help effectuate a restoration of farm well-being. Uniting with a sound farm organization is a significant step at any time; it is more so now. The more we learn to work together for the common good in this way, the easier it is for us to make the fundamental adjustments so necessary at present. The value of organized effort to the individual farmer has never been more apparent. I speak as a fellow member, as well as a charter member of your organization.

EDW. A. O'NEAL

ENLIST NOW UNDER THE BRONZE EAGLE

By EDWARD A. O'NEAL, President American Farm Bureau Federation.

I wish it were possible for me during the approaching membership campaign to talk to every farmer in Illinois and to urge the vital necessity of building still stronger his organization, the Illinois Agricultural Association.

There is no greater thing that the Illinois farmer can do for himself, his county, his state and his nation than to become a member of this great organization.

Never before in the history of this country has it been more essential for the farmers of America to be completely organized. Industry and labor, spurred on by the N. R. A. program, are getting fully organized. Agriculture, likewise, must get fully organized for her own protection.

How fitting is the national emblem of the Farm Bureau —the bronze eagle. Under its protecting wings the farmers of the north, south, east and west can join together and fight for their interests. It is a symbol of protection and power.

I hope that every farmer in Illinois will enlist under the bronze eagle of the American Farm Bureau Federation and the Illinois Agricultural Association to continue our fight for a new day for agriculture.

3 POINT PROGRAM CAN BE ACHIEVED

(Continued From Page 1)

presenting a solid front. Too much is being left to Washington. The indifference of the many is discouraging not only to leadership but also to the minority of farmers to whom is due the credit for all accomplishment yet attained.

By powerful organization and combined action, farmers could put prices up within a week.

The I. A. A. and Farm Bureau offer unorganized farmers an opportunity to join with their neighbors in fighting for the realization and maintenance of parity prices for farm commodities, at least a 40 per cent reduction in property taxes, an Honest Dollar, and a permanent and adequate farm credit structure, at a rate agriculture can afford to pay.

Will you do your part?

70,000 MILES OF ROADS IN ILLINOIS YET UNIMPROVED

Illinois has a little more than ...000 miles of public highways, according to Frank T. Sheets, former superintendent of state highways.

Of the 10,074 miles in the "state bond issue system," 8,987 miles had been improved at the time of the last report.

The "state aid road system" contains approximately 17,000 miles of which 7,078 miles have been surfaced leaving 9,922 miles unimproved.

Of the 70,000 miles of township secondary roads, according to Mr. Sheets, 11,890 miles have been improved as "all weather" roads leaving 58,110 miles still unimproved.

Thus there is a total of 69,119 miles of farm to market dirt roads in Illinois most of which are impassable certain months of the year.

LET GEORGE DO IT?

Wallace's Farmer and Iowa Homestead, recently commented as follows in regard to Farm Bureau work: "A short time ago we heard a man say, 'Why should I pay annual dues for membership in the Farm Bureau, when I can keep in touch with its work and secure all the benefit there is to be derived therefrom as a non-member?'"

What if everybody assumed that attitude toward farm organizations? Then there could be no organizations and no one to speak for agriculture. We hear much nowadays about bringing the profits of agriculture up to the level of those of other industries. But how is that to be brought about if each one said, 'let George do it?'"

In Illinois many direct benefits are confined to members who take advantage of I. A. A. —Farm Bureau Services.

Sign This Tax Relief Petition When Your Neighbor Calls. It Is the Opening Gun of the I A A's Tax Reduction Drive.

Recognizing that it is impossible to relieve real property of its disproportionate burden of taxation and to secure a modern equitable revenue system under the present provisions of our State Constitution, and that such relief is of vital importance to every farmer and home owner of this State, the undersigned citizens and electors of the State of Illinois request action as follows:

We respectfully request the officers of the Illinois Agricultural Association to urge upon his Excellency, Henry Horner, Governor of Illinois, the imperative need of calling a special session of the Fifty-eighth General Assembly for the exclusive purpose of proposing proper amendments to the revenue article of the State Constitution for adoption or rejection by the electors at the general election on November 6, 1934.

We further respectfully petition and request the Fifty-eighth General Assembly, when called into special session for this purpose, to propose amendment of Sections 1, 2, 3, 9 and 10, of Article IX, the Revenue Article, to provide:

REMOVE INEQUITABLE LIMITATIONS

1. That the present limitations which prevent an equitable distribution of the tax burden be removed.

CUT PROPERTY TAXES IN HALF

2. That the total general property taxes shall not exceed $1.00 on the $100.00 fair cash value unless the excess is approved by referendum vote.

RESTRICT FUTURE INDEBTEDNESS

3. That no further indebtedness shall be incurred by a taxing district without a referendum vote.

DIVIDE STATE REVENUE EQUITABLY

4. That the General Assembly may by two-thirds vote distribute State revenues among any taxing districts.

They COULDN'T

THE PROBLEM

1923 Organized farmers asked for equal privilege legislation to control surpluses and make the tariff effective on American farm products consumed at home. Bitter opposition developed. Cities feared higher priced food. Many said, "This legislation can never be passed."

1929 Surplus problem remained. Became national issue. Organized farmers contended that unless farm prices were raised, all industry and national prosperity in America would be undermined.

1930 Beginning of deflation and depression.

1931 Many businesses collapsed causing great unemployment.

1932 Surplus problem still unsolved. Every industry in America suffering from destroyed farm buying power due to national neglect of agricultural problem. Farmers continue fight for surplus legislation and opportunity to own, control and direct farm credit machinery. Demand commodity dollar.

1921 Foresighted Illinois farmers saw the dire need for eradicating tuberculosis from live stock. Strong opposition developed. Opponents said: "It couldn't be done."

1922 Organized farmers demanded legislation making it possible to organize along genuine co-operative lines with limited returns on capital and with excess earnings returned to patrons in the form of patronage dividends. Strongly organized opposition attempted to defeat this legislation.

1921 Terrific drop in value of farm lands. Taxes exhorbitant. Organized farmers insist that State Tax Commission and county officials sharply reduce assessed land valuations. "It's no use," said many.

1927 Continued tax studies showed inequalities in many counties. Vigorous opposition to equalization. I. A. A. insists on further cuts by State Commission.

1926 Farmers demanded completion of state bond issue road system to be supplemented by secondary roads. Asked for state gas tax to provide revenue. Powerful opposition developed. Many said: "It couldn't be done."

1931 Organized farmers insisted that property taxes be reduced and demanded tax on incomes to replace part of the property tax. I. A. A. insisted that Governor's Revenue Commission include state income tax and recommendations to General Assembly. Powerful opposition by organized owners of hidden wealth. "The income tax cannot and must not pass," they said.

1932 Compromise legislation enacted by General Assembly to provide $20,000,000 for state unemployment relief. Bond issue submitted to remove $25,000,000 in taxes from property. Many business, civic and political leaders said it couldn't be passed.

1933 Organized agriculture continues fight for property tax reduction. Urges enactment of legislation to tax income from intangible property. Urged legislation requiring each county to take care of own destitute people.

They Also Said Farmers Couldn

1924 Farmer boards of directors needed dependable audit service to protect their investments in co-operatives. Opponents said it couldn't be provided, couldn't succeed.

1924 Because of legal limitations placed on local farm mutual fire insurance companies, farmers needed state-wide reinsurance company to make possible fire, hail and windstorm protection on cost basis. Strong opposition developed. "You'll never succeed," they said.

1923 Hog cholera serum was costing farmers from $1.00 to $1.25 per 100 c. c. Farmers demanded lower cost vaccination. Strong opposition said it couldn't be done.

1926 Survey disclosed that a comparatively small percentage of farmers carried auto insurance. Increasing hazards on highways seriously endangered farmers' investments. Rates for such insurance seemed exhorbitant. Farmers demanded lower costs. Strong opposition supported by propaganda said it "couldn't be done."

1926 Power farming rapidly increasing. Tractor motors being ruined by inferior oils and lubricants. Farmers demanded products of uniform high quality at lower costs. Organized opposition said it "couldn't be done, farmers can't succeed in business."

1928 Farmers demanded legal reserve life insurance at lowest possible cost. Strong opposition said costs couldn't be lowered and that farmers could not successfully operate such a company.

1929 Farmers demanded development of truly co-operative, state-wide grain sales agency. Strong organized opposition said it couldn't be done.

ILLINOIS AGRICULTU

THE ANSWER

ATIONAL

1924 First McNary-Haugen bill is introduced in Congress to control farm surpluses. Defeated.

1926 Second McNary-Haugen bill introduced. Secured strong support but was lost.

1927 McNary-Haugen bill **passed by Congress.** Vetoed by President.

1928 McNary-Haugen bill passed by Congress second time. Vetoed by President. Effective farm relief legislation became prominent issue in presidential campaign. Farmers failed to gain adequate farm plank in platform of successful party largely through lack of powerful organization. Later Congress conceived and passed Agricultural Marketing Act.

1932 Farm surplus problem continues as prominent issue in presidential campaign.

1933 **Agricultural Adjustment Act** passed by Congress authorizing; (1) parity prices for farm products; (2) extension of credit machinery and $2,000,000,000 to refinance farm mortgages on long-time basis at lower interest rates; (3) far-reaching monetary powers given President to inflate credit and currency and establish commodity dollar. The program of organized agriculture all in one act.

STATE

1923 Organized agriculture secured the passage of a state tuberculosis eradication act with appropriations to carry it out.

1933 Approximately 85 counties are modified accredited areas with herds practically free of tuberculosis.

1923 Co-operative Act of Illinois enacted providing for organization of genuine co-operatives.

1933 More than 200 successful co-operative institutions formed under this act through the efforts of the I. A. A. and County Farm Bureaus.

1923 Tax Commission cut valuations $220,256,863 from 1920 figures. Lowered farm taxes $2,163,733

1931 Farm property paid a total of about $6,500,000 less in all taxes on 1931 valuations than it would have paid if 1920 assessments had remained.

1927 Two-cent gas tax law enacted. Courts declared invalid.

1929 Three-cent gas tax law enacted.

1933 State bond issue system nearing completion. A total of 7,078 miles of state aid roads improved—nearly 70,000 miles of secondary public roads still unimproved.

1931 State income tax passed senate. Defeated in house by two votes.

1932 Legislature passed state income tax. Later declared unconstitutional by Supreme Court.

1932 Illinois Agricultural Association asked to assume leadership in organized movement to secure approval of bond issue in general election. Adopted by overwhelming vote thereby removing $5,000,000 in taxes from farm property in 1933.

1933 Bill to tax incomes from intangibles passed senate. Delay in Judiciary Committee in House resulted in its defeat.
Lantz bills to place all counties and communities on same basis in providing for local poor relief passed General Assembly with more than 90 per cent of members outside Cook county voting for it. Assured necessity for all counties to make equal effort to care for own unemployed before requiring state assistance. Vetoed by Governor.

ldn't Successfully Run a Business

1924 Illinois Agricultural Auditing Association organized.

1933 Has 305 members receiving high grade regular and uniform audit reports AT COST.

1925 Farmers Mutual Reinsurance Company organized.

1933 24,250 policies in force with $54,400,000 of fire, hail and windstorm insurance on a cost basis.

1924 Illinois Farm Bureau Serum Association organized.

1933 Volume handled, 288,750,000 c. c. Average price to farmer now approximately 45 cents per 100 c. c.

1927 Illinois Agricultural Mutual Ins. Co. organized for Farm Bureau members only.

1933 30,426 policies in force with liquid assets of $985,700. Premiums lowest of any state-wide company saving members several hundred thousand dollars annually.

1927 Organized Illinois Farm Supply Co.

1933 This company with its 53 affiliated county and district service companies has handled 151,453,000 gallons of high quality petroleum products having a value of $9,413,000. Savings to Farm Bureau member patrons approximately $2,142,000.

1928 Country Life Insurance Company organized.

1933 50 months old with $51,500,000 of low cost legal reserve insurance in force held by 32,700 policyholders. Dec. 31, 1932, published list of security holdings disclosed outstanding investment position.

1930 Illinois Grain Corporation organized.

1933 Has handled 35,000,000 bu. grain for 145 elevator stockholder members. Largest regional grain corporation in America.

COUNTY CAPTAINS DIRECT SIGN-UP LIEUTENANTS AID

State Campaign Director Sees Job As Fundamental To Bring Economic Betterment.

The men who will direct the state-wide mobilization campaign in their respective counties are listed below. These men have been designated as "captains" and each will be assisted by a squad of lieutenants sufficient in number to canvass every prospective member in the county. Delinquent members also will be seen regarding payment of back dues.

In a letter to County Captains, Lucius E. Wilson, state director of the Fall Mobilization Campaign said:

"In accepting the captaincy of the county for the mobilization campaign, you are doing the one fundamental thing within your power to bring actual economic betterment to yourself and your farm neighbors.

"With the Federal government appropriating millions of dollars for agricultural adjustment and manifesting a willingness to go as far as representative farm opinion desires, no farmer can justify his failure to participate now in shaping the course of legislation this fall and winter.

"Don't forget that every farm home with children should stand ready to make whatever present sacrifices are necessary and not let the New Deal for agriculture fail—else there is no future for boys and girls."

Sangamon County Wins Farm Bureau Baseball Title

Sangamon county won the championship of the Illinois Farm Bureau Baseball League in the final game of the title series played at Manhattan September 23.

J. C. Honn, Sangamon county's star hurler, allowed only seven scattered hits and scored a shutout 4 to 0. Will county's four errors aided Sangamon in winning the game.

Sangamon won the first of the series by a score of four to three at Springfield September 16. In this game Honn struck out 15 Will county men and allowed only seven hits. Will county's errors again proved costly.

Nineteen Farm Bureau teams in five districts played in the league during the season. More than 300 men and boys took part in the sport.

APPROVAL BOND ISSUE CUT FARM TAXES $5,000,000

Pass the emergency relief bond issue and take $25,000,000 in added taxes from property.

Remove at least $5,000,000 in extra taxes from farm lands and property alone.

This was the task Illinois farmers and other tax payers were faced with a little more than a year ago.

The state legislature had reluctantly voted to impose an additional state property tax in 1933, if necessary, to pay back expenditures of nearly $19,000,000 by the Illinois Emergency Relief Commission around 90 per cent of which went into Cook county. A levy of approximately $25,000,000 would have to be made to assure enough collections to take care of the debt.

However, the property tax would not need to be levied if the voters would approve a bond issue in the general election of November 1932 the proceeds to go for emergency relief and the bonds to be retired from the proceeds of the state gas tax.

When this proposal was discussed in the General Assembly it was freely predicted that the people would never approve it.

Earl C. Smith, president of the Illinois Agricultural Association was made chairman of the statewide campaign to pass the bond issue. Fred W. Sargeant, president of the Chicago Northwestern railroad, was placed in charge of the campaign in Cook county with Douglas Sutherland of the Chicago Civic Federation acting as secretary.

Downstate, the I. A. A. and County Farm Bureaus assumed leadership in the campaign. Farm Bureaus vied with each other for the honor of delivering the most votes for the proposal. Daily and weekly newspapers, Prairie Farmer, WLS and other radio stations gave it wholehearted support.

This constructive effort led by organized farmers resulted in securing approval of the measure both in Chicago and downstate.

Every owner of a quarter section of land was spared on the average between $25 and $30 in added taxes.

Does it pay for farmers to have a strong organization? Is it worth while to contribute a modest membership fee which comes back to you many times over?

"There may be arguments against Farm Bureau membership," said one member, "but I don't know any of them."

FANCY PRAIRIE IN MENARD COUNTY GETS A BREAK

The Chicago and Alton railroad agreed to reinstate its station agent at Fancy Prairie in Menard county following a recent hearing before the Illinois Commerce Commission at Springfield.

The commission previously had ordered the station closed when little or no opposition to such action appeared. Farm Bureau members and local merchants appealed to the I. A. A. for help. The commission was petitioned for a reopening which was granted. About 30 farmers and local merchants attended the hearing the second time.

"This showing made quite an impression on the C. & A. attorneys," said G. W. Baxter of the I. A. A. Transportation Department, "and we came to an agreement before the case was heard.

"This little incident is an example of what organization can do. When the whole group came in together with the support of the Farm Bureau and I. A. A. they got results.

"Those attending the hearing were certainly happy when they went home last night."

Pool Buying Of Serum Saves Over Million Dollars

How the pooling of orders for hog cholera serum by more than 70 County Farm Bureaus through the Illinois Farm Bureau Serum Association brought down the price from $1.25 to an average of approximately 45 cents per 100 c. c. throughout the state today, is one of several striking examples of the value of organizing farm bargaining and buying power.

The fact that many farmers today are immunizing their own pigs with safe, dependable serum obtained through the Farm Bureau is due largely to the fact that they can do it at minimum cost. Many livestock growers are now protecting their herds through vaccination who formerly took chances on losing or lost their entire herds.

Since its organization in 1924 the Illinois Farm Bureau Serum Association has handled 288,750,000 c. c. of serum and virus for Farm Bureau members at a saving conservatively estimated at more than a million dollars. All livestock growers obviously have profited by the reduced costs of serum and immunization brought about by the Farm Bureau.

IAA. ORGANIZES MORE THAN 200 CO-OPERATIVES

The tremendous growth of cooperative marketing and purchasing in Illinois during the past ten years is revealed by the large number of such associations organized with the aid of the I. A. A. legal department.

The legal department has prepared papers and incorporated more than 200 cooperatives under the 1923 Illinois Cooperative Act during this period. These are in addition to three large state-wide insurance companies organized and operated by the association.

The cooperatives include farmers' elevators, County Farm Bureau oil companies, cream pools, livestock shipping and marketing associations, fruit and vegetable marketing associations, milk producer organizations, cooperative creameries, and others.

The savings and patronage dividends of all these institutions set up with the assistance of the I. A. A. and Farm Bureaus run into millions of dollars annually. All this was made possible by farmers working together through organization.

AMERICAN FARMER FACES SEVERE TEST SAYS FARM WRITER

Sees Same Opposition At Work To Destroy Present Effort For Agricultural Betterment.

By BILL STAHL

American farmers today are facing their most severe test. New and far-reaching governmental policies, designed to improve agricultural incomes and living conditions, daily challenge the ability of farmers to maintain a solid front. Those who oppose agricultural organization, legislative and cooperative, already are deriding the farmer and are asserting that he is too shortsighted and too greedy to cooperate with his neighbor in the building of a better and a happier agriculture.

Some economists are insisting that the future of agriculture is that of peasantry, because the farmer will refuse to take advantage of the opportunities offered him, through organized effort, to build the machinery that will give his industry.

The same forces that in the past have been exerted to defeat farmer organization, both general and cooperative, now are being exerted to defeat the crop reduction program being pushed by the Agricultural Adjustment Administration. They are the same forces that for years have persistently proclaimed that American farmers would not give their support to programs developed by their own leadership.

What They Say.

The Chicago Tribune declares that farmers themselves will defeat their own program.

"It is significant," says the Tribune, "that farmers have been swamping the markets with their young pigs, but the receipts of sows have been disappointing. That can only mean that the farmers propose to take advantage of the government's offer by raising more pigs than ever. * * *

"We are on the way to learning that it is futile to attempt to raise prices by giving bounties for reduced production. There is no certainty that the production will actually diminish and every reason to expect the farmers to exert their brains to defeat the scheme."

The Chicago Journal of Commerce indicates its belief that farmers are too stupid to see the need of crop reduction, are too selfish to work with other farmers in carrying out the plan, and are crooked enough to deal dishonestly with the government.

"Those corn belt growers of pork, both on the hoof and the husk," says the Journal of Commerce, "who were so precious an object of Secretary Wallace's sympathy—are not as scrupulous as they might be. * * * When he read Mr. Wallace's noble offer to buy four million pigs, producing a shortage and raising the price generally, Mr. Farmer got a gleam of anticipation in his eye. He went out to his pig pen, poked around with a clinical thermometer and a blood pressure tester. Those pigs which he found below par, with a slim chance of claiming much mazuma on the open market, were selected and shipped to the government for a price above the market."

A Misstatement.

"Actually," says the current issue of Wallaces' Farmer, "runts were thrown out by federal inspectors. The misstatement of facts is not so important, however, as the frank statement of the belief that the farmer will always conspire to evade a plan drawn up by his own representatives for his own benefit.

"It is evident that the opposition is attempting to destroy farm solidarity by trying to make every farmer believe that his neighbors are a set of half-witted scoundrels who will use every chance to cut their own throats—and his own—by wrecking any plan brought forward. This is a libel on the character and the intelligence of the farmer."

In many parts of the country the end of the harvest season marks the beginning of the farm organization building season. In many states and communities farmers are preparing to strengthen their organizations, both general and cooperative. The extent to which they increase the membership of their general organizations and develop their bargaining power by increasing the volume of their commodities marketed through their cooperatives, will be their answer to the challenge hurled in their teeth by those who profit through keeping farmers disorganized, through the disruption of farm organizations and through the doubt that they can create in the minds of farmers as to the sincerity of their leadership and the integrity of their associations.

Throughout the years that farmers have struggled to build their marketing and general organizations succeeding generations have found themselves confronted by much the same problems. They have been ridiculed, subjected to boycott and discrimination, and branded as the easy prey of those who, for selfish reasons, oppose farm organizations. Their answer, throughout these years, has been slow but steady building.

No Disintegration.

During the long depression the end of which, we hope, may now be in sight, farmers often have been pinched to meet even the reasonable costs of organization. It has been our privilege to attend many conventions of farm organizations in recent years and we have been struck by the vigorous actions and enthusiasm that uniformly have attended these meetings. They presaged not the disintegration of farm organizations but their future development on a larger scale than ever.

Hard times have left farmers undaunted, more determined. This determination has found expression not only in the development of the legislation that now gives promise of changing conditions for the better on American farms, but in the building of great national cooperatives and the strengthening of local cooperatives through which the products of those farms may be marketed under producer control. Agricultural legislation, cooperative marketing, equitable farm taxation, wherever they have been brought about, have been the product of farm organization.

"The future of the American farmer," says one writer, "is the characteristic one of all peasants for whom, in our present system of society, there is no hope." He doubts the ability and the willingness of farmers to meet today's test, believes that great industries which want cheap food for their workers, so that low wages may be paid, will continue to oppose the farmer's plans and that these industries will be able not only to set the consumer against the farmer but to poison the minds of many farmers against their own programs.

Farmers Who Join.

What Wallaces' Farmers has to say about the farmers' crop reduction program will apply with slight modification to every program on which the farmer embarks.

"In every permanent program," says this publication, "farmers who join will get more than those who stay out. In every case, success depends on the willingness of the participating farmers to trust and work with their neighbors.

"The farmers who are working on the reduction programs are like men working against time to build a levee before the flood waters roar down the river bed. There are those who cry to them: 'There won't be any more floods!' There are those who whisper: 'Those fellows up the levee are stealing sandbags!' There are those who roar: 'Lets not do this hard work! Let's demand that the president issue a proclamation telling the flood water to go back!'

"Those economists are right who say this is the hardest test American agriculture has ever faced. They are right when they say no group of farmers has ever made a change in national policy without years of suffering. But they are wrong when they declare that American farmers are not wise enough or unselfish enough to meet the issue.

100 Per Cent Sign-Up.

"For the corn belt, the test will come when farmers have the chance to pledge a reduction in corn and hog production for next year. Let's throw a 100 per cent sign-up in the teeth of those who claim the farmer is too dumb and too greedy to use the new farm act to save himself."

And let's start with another 100 per cent sign-up in our farm organizations, without which the opportunity now offered to save ourselves never would have knocked at our doors.

MAKING FARM ACT EFFECTIVE IS NEXT JOB SAYS O'NEAL

Cites Accomplishments Of American Farm Bureau Federation In Twelve Years.

Farm Bureau members in Illinois can join with [illegible] members in every section of the country this year in a great celebration of victory for organized agriculture, declared Edward A. O'Neal, president of the American Farm Bureau Federation in a special message prepared for the Record.

"Great progress has marked the development of the Farm Bureau's program during the past 12 months," pointed out Mr. O'Neal. "Agriculture today moves forward on a new plane and occupies a place of economic equality, recognized as the nation's source of life and prosperity. This victory is, in a great measure, the fruit of the program developed and sponsored through the past years of our Farm Bureau organization.

"Since 1920, the organized farmer, through the American Farm Bureau Federation, has been carefully and consistently taking the leadership and educating the people of the United States to the understanding of the needs of agriculture. It has been a slow, heart-breaking job but we have continued diligently in our fight and have gained most of the legislation asked for. Now we must work together to make it effective.

Prices Higher.

"Already much progress has been made in restoring the farm commodity price level. During the past six months, the average wholesale price of all commodities has risen to nearly the average of pre-war level. Certain commodity prices still lag behind and the problem of raising price levels particularly of corn, hogs and wheat can and must be solved.

Mr. O'Neal explained that the Agricultural Adjustment Act opens the way for a nationally planned agriculture. "It confers upon the Secretary of Agriculture broad powers whereby the farm purchasing power is to be restored to normal, the pre-war period being called a normal period," he said.

"Under its far-reaching powers, we can make a public utility of agriculture. It lays the foundation for bringing about a balance between production and consumption of farm products under a voluntary national program to be adopted by the farmers—a program which will reward those who cooperate in the plan. Those who stay out of the plan must bear the economic consequences of their noncooperation.

"The AAA gives the farmers an instrument whereby they can adjust their production to market demands and obtain a fair price for their products."

A New Policy.

The Farm Bureau's cotton-planter-president pointed with pride to the fact that this new program is the result of the efforts of the American Farm Bureau Federation. "This is a broad, far-reaching program—a new policy for our nation," he stated. "It marks a new era in American life. It is the results of years of effort on the part of the Farm Bureau and other farm groups. It is evident now that the primary job of farm people is to organize fully and to cooperate to make this program a success."

Mr. O'Neal traced briefly some of the accomplishments of the American Farm Bureau Federation through its legislative and general nation-wide cooperative effort, during the past twelve years. First, he cited the fact that the Farm Bureau had backed and

d to write the "New Deal" fo griculture in the form of the on bus farm bill signed by Presi- de Roosevelt, May 12, 1933, re- ga ed as the most far-reaching an sweeping legislation ever en- act l by Congress.

Save $4,000,000,000.

her Farm Bureau accomplish- me ts made possible by the com- bin d action of national, state and co nty organizations are:

ecured passage in 1922 of the Capper-Volstead Act legaliz- ing cooperative marketing.

n 1920 secured a reduction in railroad valuation used in de- ter mining freight rates that has an ually saved American farmers $1 0,000,000; defeated a proposed 55 per cent rate increase that wo ld have added an additional $30 0,000,000 freight bill to Americ agriculture. This one ac- com plishment in 10 years (1920- 193 0) saved American agriculture $4, 000,000,000.

n May 9, 1921 the first farm blo c was organized in the Wash- ing ton offices of the Farm Bu- rea u, resulting in more legislation of benefit to agriculture being la dled hundreds of freight ra e adjustments resulting in sav- in s from $3.00 to $50.00 a car, to alling an annual saving of $50,- 00 ,000. Has repeatedly blocked at mpts at freight increases af- fe ting millions of dollars in an- n al savings for farmers.

Aided in lifting the $30,- 00 ,000 annual phantom freight bi , caused by Pittsburgh-Plus sy tem, from agriculture.

n 1920, 1924, 1929 and 1932 re presented organized farmers at Re publican and Democratic na- ti nal conventions and wrote re- co mmendations into party plat- fo rms.

Pres. Roosevelt On Higher Prices And Honest Dollar

Higher farm prices and the commodity dollar, both fought for by the Farm Bureau and provided in the Agricultural Adjustment Act, were supported by President Roosevelt in recent public statements.

On higher prices, the president said:

"It is not sufficient to escape from present evils, but it is our duty to consider together how to avoid a recurrence in the future.

"The first task is to restore prices to a level at which industry, and above all, agriculture can function profitably and efficiently.

"The second task is to preserve the stability of this adjustment once achieved."

And on the subject of the commodity dollar, he said:

"Old fetishes of so-called international bankers are being replaced by efforts to plan national currencies with the objective of giving to those currencies a continuing purchasing power which does not greatly vary in terms of the commodities and needs of modern civilization... The United States seeks the kind of dollar which a generation hence will have the same purchasing power and debt-paying power as the dollar value we hope to attain in the near future."

What Prominent Leaders Say Of The Farm Bureau

President Roosevelt, speaking at the eleventh annual convention of the A. F. B. F. in 1929 said: "Without the cooperation of the farm organizations in New York we could have gotten nowhere. The Farm Bureau is to be congratulated on the perfectly magnificent work you have carried on. The influence of the Farm Bureau can be found anywhere. More power to you."

At the thirteenth annual convention of the A. F. B. F. in 1931, Frank O. Lowden, former governor of Illinois, said: "Cooperative marketing seems to be the remedy for this unbalanced condition. Wherever cooperative marketing is furthest advanced, whether in the United States or abroad, there you find agriculture in the best estate; violent fluctuations in the market lessened; better prices to the producers without increase in cost and sometimes with an actual decrease to the consumer; an approach to standardization of products; a more intelligent effort to adjust production to probable demand; a finer and more satisfying community life."

Gen. John J. Pershing, at the ninth annual meeting of the A. F. B. F. in Chicago in 1927 stated: "Nothing about the activities of the Farm Bureau has impressed me more than the work of training the youth of the farm, through your boys' and girls' club work, for the places they are to fill in their country's future. These young men and women are the most important products of the American farm."

The late Calvin Coolidge, at the national convention of the Farm Bureau in 1925 said: "The most important development of late years has been the cooperative movement. With a production influenced by information from the United States department of agriculture, with adequate storage, supplied with necessary credit and the orderly marketing effected through cooperatives, agriculture could be placed on a sound and independent basis."

Tune In KYW

CHICAGO, Oct. 4.—(Special)—Direct contact between American Farm Bureau Federation headquarters here and members of the Illinois Agricultural Association is provided on the second Saturday of each month through the chain radio facilities of the National Broadcasting Company.

Special news of the Farm Bureau in Illinois is always included in the news flashes which are featured on the program.

Illinois listeners hear the American Farm Bureau Federation's NBC program over radio station KYW at 11:30 a. m. Central Standard Time on the second Saturday of each month.

If You are a FARM BUREAU MEMBER *You Get*

FIRE—LIGHTNING TORNADO—HAIL INSURANCE AT COST

ORGANIZED AGRICULTURE has made it possible for Illinois farmers to obtain dependable fire, hail and windstorm insurance AT COST.

The Farmer's Mutual Reinsurance Company was sponsored by the I. A. A. and the Farm Bureau because legal limitations on local farm mutual companies made it impossible for farmers to get sufficient protection against damage by the elements to their crops and buildings at a mutual rate. Because they were forced to turn to the old-line companies for the protection they needed, farm insurance was costing too much.

This Company was founded in 1925. Today, in spite of organized opposition it has 24,250 policies in force, amounting to $54,400,000 of insurance, ON A COST BASIS.

Farmer's Mutual Reinsurance Company demonstrates the effectiveness of ORGANIZATION. It is one more reason why every Illinois farmer should co-operate with his neighbor to his own and his neighbor's advantage through membership in the Farm Bureau and the I.A.A.

FARMER'S MUTUAL REINSURANCE COMPANY

608 SOUTH DEARBORN ST., CHICAGO, ILL.

SAVE MONEY THRU RATE, CLAIM AND UTILITY SERVICE

Powerful Organization Farmers Only Hope In Fight For Lower Transportation, Power And Telephone Costs.

The transportation department of the Illinois Agricultural Association has been serving Farm Bureau members since 1920. Through these years there have been booms and depressions. The aftermath of the world war and government administration of the railroads brought about many general increases in freight rates. Through organized Farm Bureau effort many of these high rates have been lowered.

It is the purpose of this I. A. A. service to see that the Illinois farmer does not pay more than his fair share of transportation costs; that he may meet the competition of producers of the same commodities in other states to the same markets; that he is given the benefit of his advantage of physical location with reference to markets; that he be accorded the same consideration in every phase of transportation.

The association has assembled, over a period of years, a file of over one thousand rate tariffs. We are, therefore, in a position to quote and check rates on all farm products of members.

Advance data is received which enables us to determine all proposed rate increases and public hearings involving matters in which farm interests should be represented.

Constant Vigil Necessary.

Illinois has for many years been a "buffer" state between eastern or official classification territory and the western territory. The Illinois classification governing state traffic generally reflected the lower of the two classifications depending upon competitive conditions. Naturally, each freight association seeks to include Illinois in its territory and efforts of the Illinois Agricultural Association in opposing rate increases has resulted in saving the Illinois farmer thousands of dollars in his transportation costs.

Continual study and rate surveys are necessary in order to keep informed of existing rate changes. A number of hearings have been attended before the Illinois Commerce Commission and the Interstate Commerce Commission on matters involving rates on agricultural products.

Personal Contacts Made.

Personal contacts have been made with railroad traffic executives over a period of years and the aim and purpose of this organization has been sold to them, thus making the work of the de- effective. We want feel free to call on our organization for information and cooperation. Their understanding of our program is helpful to them in making decisions on our requests.

In the interest of economy, the railroads have in many cases petitioned the Illinois Commerce Commission for permission to close local railroad stations; take off trains and abandon portions of their lines. There are some cases of this kind pending. Where local interest is shown, this department has assisted Farm Bureau committees in maintaining needed services.

Railroads are required by law to maintain adequate fences along their right-of-ways, and to cut obnoxious weeds. As a result of defective fences live stock gets out on the right-of-way and is sometimes killed or injured. Fire started by railroad locomotives or section employes sometimes spreads to adjoining fields causing considerable damage. If a member has the misfortune to suffer losses of this kind, all he has to do is give the facts to his organization for handling.

Considerable service has been given members in the past on matters involving private farm crossings, drainage, and repairs to railroad stock yards.

Aid Live Stock Grower.

Large numbers of stocker and feeder cattle, calves, sheep and hogs are purchased by Illinois farmers in the range territory of the west and southwest. A high freight rate may mean a loss to the feeder. The association has used its influence to keep these rates on feeder stock down to a minimum. Feed-in-transit rates have been secured by organized farm effort. Members should avail themselves of this I. A. A. service before making shipment to determine the actual transportation expense.

Claims for loss or damage in transit, such as dead and crippled animals while in railroad cars; delay in transit, such as missing the market for which it is intended, and shortages are also handled by the association.

Since 1920 we have collected over $264,000.00 in claims against railroads and public utility companies. We also assist and represent various affiliated cooperatives in quoting rates, giving assistance on leases, routing shipments, auditing freight bills, and various other matters involving railroad transportation.

The Illinois Agricultural Association and affiliated companies represent one of the largest users of railroad transportation in the state of Illinois and control the routing of thousands of carloads of farm and other products, which places this organization on a parity with other industries in seeking fair and equitable rates for its members. Without organization, the individual farmer would receive little or no consideration.

Public Utilities.

High tension lines have been steadily extended until they form almost a complete network over the entire state.

Electricity on the farm has been urged and experimented with by power companies and educational institutions. As a result, a large number of farms are using electricity. We find, however, that there is lack of uniformity both as to conditions under which lines for farm distribution were built and the rates charged for the energy used.

The I. A. A. has secured some reductions in rates and minimums during the past year and is now seeking others, complaints on which will be heard in the near future.

Transmission lines have sometimes been proposed over farm lands without regard to rights of property owners. In numerous instances the I. A. A. has collaborated with county farm bureaus in protecting the interests of members. Routes have been changed, contracts made more equitable for the landowner and compensation for damages increased as a result of this organized effort.

Pipe lines to serve the large cities with natural gas have been built across farm lands in various parts of the state. In several instances the I. A. A. has secured highly important changes in easement contracts to assure the property owner of adequate compensation for damage to farm crops. Extensions to pipe line laterals are being proposed for the near future in several parts of Illinois. Members should consult this department before signing any easement contracts.

PLAN THOUSAND MEETINGS SAME NIGHT USE RADIO

582 Livestock Growers Attend Five Short Courses In September.

Five hundred and eighty-two leaders from 85 counties throughout Illinois recently attended a series of live stock marketing short courses just completed. The meetings were arranged by Ray E. Miller, director of live stock marketing, aided by producer agencies on the terminal markets. The attendance was as follows:

Place	Counties Represented	Attendance
Charleston	9	41
Chicago	22	99
Monmouth	8	73
St. Louis	34	195
Peoria	12	174

It was agreed by those who attended the conferences that live stock producers generally have given little serious thought to actual problems involved in marketing their products. They have not paid much attention to the underlying factors which determine prices. It was the consensus of opinion that the major problem in carrying forward a cooperative program was one of information.

Information Is Need.

In order to meet this need a plan for a state-wide live stock marketing program of information was adopted. One meeting is to be held in each county to which a selected committee of live stock producers from each township or community of the county is to be invited.

This county meeting is to be followed by local meetings held in various townships or committees throughout the country all on the same night. The series of local meetings in all the participating counties is to be carried out simultaneously. It is expected that there will be from 1,000 to 1,500 local meetings held on the same night throughout the state.

As a part of the program for local and community meetings arrangements are being made for a special radio broadcast.

At each of the live stock marketing short courses four major subjects were presented and discussed. Professor R. C. Ashby of the University of Illinois, presented results of studies which he has made in live stock marketing, particularly those factors which are important from the standpoint of price determination. The manager of the producer agency serving the territory in each instance presented recent developments in connection with the operations of that agency and of the market on which located. A representative of the National Live Stock Marketing Association discussed the national program in live stock marketing as it is being carried out by that organization.

Corn-Hog Program.

Ray E. Miller, director of live stock marketing for the I. A. A. presented the Illinois program and led the discussion as to methods of extending the service of the cooperatives to more Illinois farmers. The emergency corn-hog program as well as the wide variety of other subjects were presented and discussed at the various meetings.

There has never been a time in which Illinois live stock producers were more intensely interested in the cooperative program. It is generally recognized that through the establishment and operation of cooperative sales agencies some of the things can be done for the live stock producers which are being done by the NRA for the various industrial and labor groups.

GET HOGS IN EARLY IS EXPERTS ADVICE

Sharp seasonal reduction in hog receipts has strengthened the market and prices are expected to hold steady to strong well into October, according to H. M. Conway of the National Livestock Marketing Association. Storage stocks, the market analyst says, are particularly heavy so it seems advisable to keep hogs well topped out and crowd the early supply of spring pigs for October or early November.

Lower prices seem likely in December but a sharp come-back is expected in the late winter. The fall pig crop has been greatly reduced and similar reduction which is unofficially reported, will take place in the pig crop thus making for a sharp downward swing in hog production.

Despite relatively high corn prices the situation is becoming more favorable for live stock feeders, particularly so in the case of cattle. Short supplies are now in sight and it is a year when it will pay to emphasize quality and finish. Rather wide price variations are expected thus making for more attractive margins.

ASK PRESIDENT ROOSEVELT TO SPEED FARM AID

Farm Bureau Leader Heads Delegation In Call At White House.

Led by Edward A. O'Neal, president of the American Farm Bureau Federation, leaders representing farm organizations and publications made three definite recommendations to President Roosevelt on Sept. 25 to speed agricultural relief. They called on the president and submitted to him resolutions adopted at a meeting called by the American Farm Bureau Federation, Sept. 18 and 19 at Chicago which was attended by 16 representatives of general farm organizations, cooperatives and farm papers.

Embodied in the recommendations were these three principal propositions:

"1—Harmonizing the NRA and AAA so that progress of the former will not result in too rapid increase of farm costs of operation prior to the effects of the latter in increasing prices of farm products. Controlled inflation will undoubtedly be very effective in speeding up the effects of the AAA on farm prices.

"2—More effective and quicker service in regard to the farm mortgage debt of the nation by Farm Credit Administration.

"3—A more definite recognition of organized agriculture, both in regard to general farm organizations and farmers' cooperative associations."

NRA Boosts Costs.

The resolutions presented to the president were emphatic in pointing out that the first step in any program of national recovery is to restore farm purchasing power, according to Mr. O'Neal. They pointed out that this opinion is also shared by many leaders of industry as well. "While entirely sympathetic to the objectives of the NRA act, farm people are convinced that its operations today have worked to the disadvantage of agriculture, in that the disparity which has for years existed between the exchange value of farm commodities and the goods and services that farmers must buy has actually been increassed," said a resolution.

It was pointed out that restoration of price parity, which is the objective of the AAA, would prove the salvation of agriculture in this time of emergency and would likewise be of tremendous benefit to the nation as a whole. "If this restoration of price parity or proper exchange value of farm products is not accomplished at an early date, it is the opinion of this group of farm representatives that the entire recovery program is in grave danger," the resolution warned.

"It is easily possible to secure immediate action in applying the rules and regulations of the NRA. The application of the AAA involves greater difficulties because of the nature of the farming business. This fact explains why wages can be quickly increased and the price of non-agricultural commodities quickly raised, both to the great disadvantage of the farmer until such time as the price level of farm products can be brought to a proper price parity."

Ask Inflation.

The farm leaders explained that the president has the power to harmonize and unify the advantages of both acts and urged as the quickest and easiest way to bring about this action, that the president immediately launch a program of inflation along the lines which have been repeatedly suggested by farm organizations. "Further delay," they said, "threatens the success of the recovery program and destroys the hope which has been the sustaining force in agriculture during the past three years."

The group expressed approval of the steps taken by the Farm Credit Administration but felt that progress in administering the benefits of the farm credit act has been rather halting to date. "In the endeavor to establish perfectly safe methods of financing, the Farm Credit Administration may feel justified in making progress slowly," it was stated. "However, it is our opinion that the critical condition of agriculture at this time justifies great tolerance in the formulation of credit requirements and justifies all possible speed in relieving a very acute situation."

It was recommended by the group headed by the Farm Bureau's national president that the Farm Credit Administration and federal land banks base their policy of the probability of price recovery and so insure that the benefits of recovery shall accrue to present owners of farm land instead of to those money lenders who are rapidly acquiring farms through foreclosures.

"The term 'normal' as applied to appraised values should be redefined on a much more liberal basis," a resolution explained. "Valuations and loans must be high enough to prevent the majority of good farmers from being dispossessed. Unless farm prices are quickly restored to a parity, the whole economic structure will collapse. The Farm Credit Administration should do its full part to avert that collapse."

The resolutions declared that inasmuch as farmer cooperatives are the only agencies engaged in distributing farm products which are sincerely striving to increase commodity price levels, these associations should be given special consideration in determining credit policies.

Adequate credit accommodations were particularly recommended for the sound cooperative organizations.

"It is our observation," said the third resolution, "that under the NRA the government is giving full recognition to organized labor through insisting that all industrial codes shall recognize the right of labor to organize and engage in collective bargaining.

"We urge and insist that the officials of our federal government now proceed to give the same degree of approval and recognition to organized agriculture, both to general farm organizations and the farmers' cooperative associations, that is now being given to organized labor."

FARM CREDIT FOR WORTHY FARMERS

(Continued from Page 1)

place for a hearing, at which any creditors opposing confirmation may state their opposition.

"If the judge does not confirm the proposal he may dismiss the proceedings or refer the specifications to the commissioner for testimony and report, and then may confirm the proposal or dismiss the proceedings.

"After a settlement or extension has been confirmed, the judge may set it aside and reinstate the case if fraud has been discovered.

"The filing of a petition pleading for relief under the new law places the farmer and his property in the exclusive jurisdiction of the court, and he can not be put into involuntary bankruptcy or sued on any debt.

"No execution can be levied on a judgment of foreclosure nor any writ to oust the farmer even under a tax sale.

"No levy can be had touching his home without consent of the Federal judge until action is terminated on the farmer's petition."

(Copyright, 1933, by The United States News)

Since our new President has assumed the duties and responsibility of the office of President of the United States, and a Special Session of Congress has been convened and adjourned, giving to farmers the "EMERGENCY RELIEF AND PRICE INFLATION ACT," and the "FARM CREDIT ACT," proposed by the Congress to directly address our basic problems in agriculture, together with other major legislations needed in the present day grave emergent situation.

Through enactment of the laws mentioned, the Congress intended to provide adequately and expeditiously for all reasonable needs of funding farm debts.

Through the Farm Credit Act the Congress intended to make available to farmer cooperatives and farmers, cooperative credit and funds needed to carry on farming and marketing operations, at lower rates of interest and according to reasonable needs. "Farm Credits" are now centralized by legislation under the "FARM CREDIT ADMINISTRATION" with its Governor, Deputy Governor and Commissioners, and with twelve regional divisions. We have the banks for cooperatives—the "Central Bank for cooperatives" and twelve regional "Banks for Cooperatives." We have twelve regional "Production Credit Corporations," and "Production Credit Associations," as and when chartered by the Governor of the Farm Credit Administration. These new institutions are in addition to the Federal Land Banks now "liberalized" by authority of Congress and intended to be so administered in reason, and also the Intermediate Credit Banks. Other emergency credit agencies, heretofore created, are continued for the present, to which has been added new emergency financing, "LAND BANK COMMISSIONER'S LOANS."

Congress intended, through First Mortgage Federal Land Bank Loans and Land Bank Commissioner's Loans, at lower rates of interest, to provide funds from which the worthy debt-ridden farmer might fund his indebtedness, subject to reasonable requirements of rules and regulations protecting and assuring the permanency of these institutions.

Congress intended that Production Credit should be freely available, in reason, to farmers, through "Production Credit Associations," and at reasonable rates of interest particularly in the absence of many country banks and by reason of light deposits and present day requirements on banks with respect to keeping assets liquid.

We appreciate the unprecedented demands made on Federal Land Banks and National Farm Loan Associations, immediately on enactment of the legislation by the Congress in a Special Session, putting the Land Banks in funds and actively in operation again, with no other source of funds available for farm loans. Normal valuations of farms for loans were to be determined on a new basis, "the value of the land for agricultural purposes shall be the basis of appraisal and the earning power of said land shall be a principal factor." The Land Banks were without trained personnel in numbers to take care of applications; resulting in delays, discouragements, disappointments and criticism.

Farm Loan Commissioner's Loans were well "advertised" by the Press Service of the Farm Credit Administration and literature on the subject distributed, encouraging and leading many distressed farmers to believe such loans would be freely available; resulting in disappointments and criticism.

We are now witnessing the formation of the first Production Credit Associations in our State. These institutions are intended to be permanent, providing cooperative credit for farmers, and are needed, particularly at the present time. The Association has offered its services intending, within its limitations, to be helpful to the Deputy Governor, of the Farm Credit Administration, in connection with the setting up of the Production Credit Corporation of St. Louis and local production Credit Associations. In this connection it was stated by your officers that we regard it as essentially important, if the Production Credit Corporation and local Production Credit Association are really to serve farm people, that the regional administration is free to formulate reasonable rules and regulations that are suitable, and are sound, for the guidance or limitation of local Production Credit Associations. Equally important in our judgment is the selection of properly qualified and informed personnel that is both wise and sympathetic, to conduct the business of the local Association. The services of the Association were proffered in the interests of all farm people in Illinois, which follows the established policy of the Association in such matters.

Congress intended that the full benefits available through these credit institutions should reach worthy farmers. Administration of these acts, as organization is perfected in the Administration will determine the permanency of these institutions and their real usefulness to farmers. Our farmers in Illinois through organization, their Association, should cooperate in developing the full value of these institutions, as intended by the Congress.

ILLINOIS FARM SUPPLY COMPANY

and its 53 Associated Service Companies

STAND FIRMLY BEHIND

The Fall Mobilization Campaign

Illinois Farm Supply Company's state-wide organization stands 100 per cent behind the 1933 Fall mobilization campaign of the I. A.-Farm Bureau. Not ony that, but the 53 associated service companies and their employes pledge their active support and co-operation during the active period of the campaign. We shall do everything in our power to widen the scope and influence of Organized Agriculture

The Illinois Farm Supply Company grew out of the Farm Bureau movement. Last year Farm Bureau members received a patronage refund of more than $500,000.00—the result of buying Petroleum products from their own co-operative company.

It will be to the interest of every Illinois farmer to extend the influence of Organization as widely as possible so that a constantly increasing number of farmers can participate in the advantages—and the financial returns—resulting from Farm Bureau membership.

ILLINOIS F

Would Never Have K

AUTO INS

SHOULD

Until the ILLINOIS AGRICULTURAL MUTUAL INSURANCE COMPANY was started by the Illinois Agricultural Association, Illinois farmers had no way of knowing what their automobile insurance should cost.

Old line companies, operating solely for profit, had failed to give the farmer—who is a preferred risk for auto insurance—the rate to which he was entitled. In other words, the farmer who rarely has an accident, paid as much, or nearly as much for protection as the city driver, whose accidents are much more numerous.

Organized Agriculture started the ILLINOIS AGRICULTURAL MUTUAL INSURANCE COMPANY.

Organized Agriculture operates the Company today. And because it does operate its own Company, with insurance for members at cost, Organized Agriculture in Illinois can buy complete protection for less money. Farm Bureau members save

As an example of the low rates availlable under our Surplus lowing: One of our members insures his 1927 Buick agains age for a premium of $3.95 every six months; another insur collision (both moving and stationary objects), public liabi $6.38; public liability and property insurance on a 192 six months, and one member has a 1928 Pontiac insur for a semi-annual assessment of only 45 cents. The County you can save on your insurance. Call them TODAY.

ILLINOIS AGRICULTURAL M

Organization FARMERS e Known What Their NSURANCE D COST

money on automobile insurance because of organization. In many cases, this saving runs as high as 30 per cent.

Through its auto insurance company, Organized Agriculture saves Farm Bureau members thousands of dollars every year. In hundreds of cases, the saving on automobile insurance alone is enough to pay the member's annual Farm Bureau dues.

For this reason, if for no other, every farmer in Illinois should be a member of his County Farm Bureau. The amount of annual dues is negligible when compared to the benefits to be derived. And remember that safe, sound, economical automobile insurance is only one of the services available to every Farm Bureau member.

If you are not now a Farm Bureau member, JOIN TODAY! If you are already a member get your neighbor to JOIN. Get him to do it NOW, because the greater numerical strength the Farm Bureau can muster, the greater the benefits that accrue to all.

They All Drive the Car

Which will have the First Accident?

YOU DON'T need to list the names of all the persons authorized to drive your automobile if you are insured in the Illinois Agricultural Mutual Insurance Company.

In our Company, you are fully protected so long as the driver is more than 15 years old and has your permission to drive the car.

This elimination of troublesome listing is only one of the advantages of Farm Bureau automobile insurance. Some of the others are dependable coverage, low cost, fair adjustments and prompt payment of claims.

Did you know that if you are a farmer you are entitled to a lower automobile rate than if you live in the city? If you are not getting it, call the Farm Bureau in your county at once. They can tell you how to save money on automobile insurance.

Don't drive without adequate, dependable automobile insurance. Even the most careful drivers have accidents. Yours may happen tomorrow. Protect yourself; call the Farm Bureau.

Many Join In Campaign

Captains And Lieutenants Report Progress In First 10 Days Work.

THE Mobilization campaign is speeding up. More than 1,000 new members were reported signed the first ten days. Approximately 2,000 members were brought into good standing. Reports indicate that between 50 and 55 counties are working satisfactorily and that others are getting under way.

"The differences in results among counties are due more to captains and lieutenants than to conditions," said Secretary George E. Metzger. The accomplishments of individual captains and lieutenants seem to bear out this belief. Otto Steffey of Henderson county, for example, wired: "October 19 largest day in Henderson county. Seven teams, 19 lieutenants working. Made 45 calls, signed 25 new members. Nine of remaining favorable. Lieutenants Earl Brokaw, Ray Louden, Clifford Thompson of Media township, saw 10 men and signed them all. Nothing can stop us now."

32 Out of 36

In Woodford county Ellis Sharp was high man in collections with 32 out of 36 in two days. Edward R. Schertz signed five new members in the first three days of the campaign. Ben Roth signed three in Roanoke township in one day. One township has three times as many members as it had two years ago.

Twenty-five new members joined in Kendall county during the first week.

Whiteside signed 38 new members and brought 40 present members into good standing the first week, Capt. Lowell S. Johnson reported. This is the best record of the first week's work.

Knox county signed 34 and collected 57 items.

Capt. Houghtby of DeKalb county reported 17 lieutenants working, 10 new members signed and 48 delinquents restored to good standing. "The campaign is gaining momentum," he writes. "We expect to keep right on going. Some of the lieutenants haven't started yet, but they will as soon as the corn is harvested. Tax petition going over in fine shape."

17 In One Township

J. W. Whisenand writes from Peoria county that Frank Graham, John Griggs and Paul Harker of Elmwood township worked together and signed 17 in that township. "The secretary of our mail-carriers' association received one of the special issues of the I, A. A. RECORD," said Whisenand. "He is very much pleased with the I. A. A. road program and states that he is recommending that mail-carriers join the Farm Bureau. He himself has joined." Peoria has 96 new members.

"We have 50 lieutenants actually working, 6 new members signed, 66 delinquents collected. The outlook is brighter," writes Capt. A. P. Cooper, Coles county.

"Six of our lieutenants have reported nine new members," reports G. O. Carlson from Mercer county. "We do not want our members sold entirely on the commercial services as there is a bigger objective in farmer organization. After a man once becomes a member his dues are a small factor if he makes any use of the Farm Bureau."

John L. Hawker, Clark county, reports eight new members and nine collections with the campaign gaining in momentum.

From southeastern Illinois reports show that farmers are generally favorable to the I. A. A. and Farm Bureau and that new members are being signed. Shortage of ready cash seems to be the only obstacle to a widespread signup.

William Stevenson of Henderson county interviewed 22 prospects and signed 18.

In Mason county Captain Keith and Lieutenant Hall wrote 19 members in two days, John C. Moore reported. Forty-one had been signed in this county by Oct. 19. "We are doing our best to get Mason county's quota," writes Keith.

Ten lieutenants working in Macon county, reports Capt. Emory Parks. Three members signed on Oct. 18. Other reports in brief are as follows: Ogle county—8 members signed, 17 delinquents restored.—L. D. Carmichael; B. D. Gate, Saline county, reports 21 members signed with 10 lieutenants working; Eugene Curtis, Champaign county, wired on Oct. 16: "11 new members from October ninth through 14th and collected $1,181 cash."

In St. Clair county Oscar Grossman reports 17 new members signed, 10 delinquent memberships collected; Walter H. Scott of Scott county reports 16 signed; Rock Island county six new members, 11 delinquents collected.

21 In Hancock

M. G. Lambert from Hancock county reports 21 new members signed and many delinquent memberships restored. Twenty-five lieutenants working.

George W. Deppert, Tazewell county, reports 12 new members and 12 collections. "Our campaign is just getting a good start," he says. "The boys seem to be enthusiastic about their work."

In Morgan county David Reynolds reported 24 members signed, 33 collections made with 15 lieutenants working.

Harry L. Leeper of Fulton county

(Continued on page 4 col. 3)

Joe Fulkerson Tells Why He's A Member

Agriculture Has Great Opportunity to Get an Even Break, He Says

"Although we hear a great deal more about the NRA it is no more important than the AAA. Those in the NRA, that is the miners, manufacturers, jobbers, wholesalers, retailers and laborers are simply better organized than those in the AAA," said J. R. "Uncle Joe" Fulkerson, president of the St. Louis Producers' Livestock Commission Association, in a radio address from Station KMOX, St. Louis, October 10.

"If we farmers want to get our share of the new deal we must get into some farm organization," continued Mr. Fulkerson. "The Administration wants to help us farmers if we will try to help ourselves, but they are not going to force prosperity on us if we do not show enough interest in the matter to organize and cooperate.

"Agriculture never before had such an opportunity to get an even break with industry. From a personal letter I received from President Roosevelt recently, I quote the following paragraph:

"'Other measures are also being taken to restore a better balance between agricultural and industrial prices, and to restore as soon as possible a larger measure of purchasing power in the distressed agricultural areas.'

"Secretary Wallace also has the interest of the farmer at heart as no other Secretary of Agriculture has had in years. He comes from the heart of Iowa, out where the tall corn grows. He owns and operates a farm, so speaks our language and has felt some of our jolts.

"Congressman Henry T. Rainey, Speaker of the House, had a shipment of hogs to the Producers' Commission Association last week that topped the East St. Louis market, selling at 20 cents above the Chicago top that day. This speaks well for Mr. Rainey both as a feeder and a co-operator. He, too, lives on his farm and speaks the farmer's language. Again I say, never in the past 14 years has agriculture had as many powerful friends and such an opportunity to get back on its feet.

"Now that we have discussed the AAA and the NRA, let's consider the I. A. A. I. A. A stands for Illinois Agricultural Association, the State Farm Bureau. This undoubtedly is the most outstanding State farm organization in the country. It played an important part in organizing the Producers' Livestock Commission Association at the National Stock Yards, which is now serving thousands of members in the corn-belt states, having turned back to them in refunds and reduced commissions over $1,200,000.

"The I. A. A. is sponsoring a mobilization campaign to get Illinois farmers to work together for their own interests. I have been a member of the I. A. A. and my County Farm Bureau ever since they started, because I want to know that when the legislature meets at Springfield and the Congress at Washington, someone with ability and authority is there looking after my interests. I want to know there is someone there working to reduce my taxes, working to adjust the difference between agricultural and industrial prices, working to save our farm homes. Now, if your neighbor asks you to join the Farm Bureau don't tell him you'll think about it. Get in now and do your part. Not next week nor next month, but NOW!"

STATE CHAMPION FARM BUREAU TEAM FROM SANGAMON COUNTY

Left to right, front row: Lyman Easley, pitcher; Bill Mathews, outfielder; Lauren Davis, pitcher; Preston Wilson, manager; J. C. Honn, pitcher; Richard Dunkel, third base.

Left to right, back row: Steve Simko, outfielder; Norman Davis, shortstop; Bert Jarrett, infielder; Arnott Smith, outfielder; Wayne Carruthers, outfielder; Carl Kuelper, first base; Wm. Carson, second base.

Kesley Crain, catcher, and Norman Wilson, pitcher, not in picture.

Let's Get Greater Unity

Awaken farmers of our land,
The time for action is at hand,
No time in peace or war have we
Had greater need for unity.

We have a program now at hand
To right the errors of our land
Let's put it into action men,
By getting all our neighbors in
To help each other work our cause
And not depend on Santa Claus.

It can be done we will agree,
If we get greater unity
Let's therefore not forget that we
Are pledged to get that unity.

GEO. FLECKENSTEIN,
Dillon Twp. Director Tazewell
County Farm Bureau.

Many Join In Campaign

(Continued from page 3)

reports 12 signed, 14 collected, 20 men working; In Greene county Norman Davis reported 5 new members.

McDonough county seven signed, three collected; Marion county one signed, two collected; Pike county five signed, four collected. Richland county five signed, 27 delinquent memberships restored; White county one signed, 10 memberships collected; Edwards county two signed, one collected.

L. W. Williams, manager of Country Life Insurance Company, and A. E. Richardson, manager, Illinois Agricultural Mutual Insurance Company, are jointly awarding prizes of a 30 gallon barrel of Penn Bond or Blue Seal motor oil to the general or special insurance agent selling the largest number of members and old collection items in his congressional district. The minimum amount on which a prize will be awarded will be ten new sales or old items collected.

The general or special agent, other than the captain, who writes the largest number of members in the entire state also will be honored in a fitting way as one who made an outstanding contribution to agriculture.

The AAA Corn-Hog Plan

Immediate Relief From Low Prices May Come If Government Starts Substantial Buying To Feed Unemployed

The long expected plan to raise corn and hog prices has at last been announced by Secretary Wallace. It will be placed in operation beginning November 5 when the processing tax on hogs goes into effect.

The plan provides for bonus payments by the government of $5 per head on 75 per cent of the average number of hogs farrowed annually on farms of contracting producers and sold by each during 1932 and 1933, provided the farmer reduces the number of litters farrowed and hogs sold at least 25 per cent in 1934.

The first payment of $2 per head is to be made on acceptance of the contract, $1 about Sept. 1, 1934, and $2 about Feb. 1, 1935.

Farmers who agree to reduce their corn acreage in 1934 to not less than 20 per cent of the average annual production in 1931-32-33 will receive benefits in the form of a rental of 30 cents a bushel minus administrative costs on the three-year average production of the contracted acreage; 20c per bushel to be paid soon after acceptance of contract and the remainder following fulfillment of contract after Aug. 1, 1934.

How It Will Operate

The plan as announced will operate about as follows: Farmer A during the past three years has been producing 100 acres of 50 bushels an acre corn, and raising two litters of pigs a year from 16 sows (32 litters) from which he has sold about 160 market hogs. To come under the plan he must cut his corn acreage (20%) to 80 acres or less, the number of litters (25%) farrowed to 24 or less and the number of hogs marketed to 120. If he carries out this adjustment program he will receive from the government 30 cents per bushel (minus local deductions) on 1,000 bushels of corn, the average production on the 20 acres left idle. He will also receive a bonus of $5 per head on 120 hogs (75% of the average number farrowed on farm and sold). Thus, roughly, he will be paid cash benefits for his co-operation in the corn-hog adjustment plan approximating $900. The cost of operating the county control association will be deducted from the computed payments to local growers.

In addition he will receive the income from the 24 litters of pigs and 80 acres of corn. The market price of both corn and hogs should be raised considerably in time if the crop reduction program is carried out as planned and if non-co-operating farmers do not take advantage of the situation to step up production in the hope of individual profits.

The grower who fails to fulfill his contract forfeits his final payment and must surrender also the initial payment.

Basis of Allotments

Allotments of corn and hogs will be made to the various states and counties on down to the individual farmer.

On the basis of information already available through the Department of Agriculture, each State will be allotted for the purpose of determining payments:

(a) That number of acres of corn which represents its proportion of the total number of acres to be withdrawn from corn production for the United States. County allotments will be determined on the same basis in relationship to the State. Within the county, allotments to individual farmers who have signed contracts will be made by the County Corn-Hog Production Control Association, and these allotments will be published in the county press.

(b) That number of sows to farrow, litters farrowed, and numbers to be marketed, which will be proportionate to the corresponding totals for the United States. County allotments will be determined on the same basis as the State. Individual allotments will be made by the Corn-Hog Production Control Association, and publication will be made in the same manner as on corn.

(c) A County Corn-Hog Production Control Association which will choose its own directors and officers. Any salaries or expenses which the association is authorized by its directors to incur will be withheld pro rata from the adjustment payments to be made within the county. Extension service agencies will be used wherever available to assist in the educational and organizational work. These may be supplemented by temporary emergency workers appointed to serve in counties where additional help is required.

Government Buying

In addition to the above proposals the government promised further support to the market by subsequent purchases of hogs and pork products for poor and unemployed people through the Federal Emergency Relief Corporation. The extent of these purchases may determine whether or not any immediate improvement will be felt in the hog market.

To raise the funds for bonus payments to farmers the government will place a processing tax on all live hogs beginning November 5, of fifty cents per cwt. Many predict that this processing tax will result almost immediately in a lower price to the grower. According to an announcement by Secretary Wallace, the processing tax will be increased to $1.00 per cwt. by December 1; $1.50 by January 1 and $2.00 on February 1. The tax also will be placed on products held by packers and wholesalers on November 5, but will not apply to floor stocks of retailers. Tax collections on live hogs through the two-year period are expected to total $348,000,000. Hogs butchered on the farm for use by the farm family and employees will be exempted from the tax.

In addition there will be a 28c per bu. tax levied on processed corn and later it is possible that a processing tax will be applied to beef and other products competing with both hogs and corn. The competitive condition of corn and hogs will also be protected against imports.

Every effort will be made to extend foreign markets. Land rented by the government and taken out of corn production may be used for pasture, meadow, soil improvement and erosion prevention crops subject to the regulations of the Secretary.

As we go to press the Agricultural Adjustment Administration through Administrator Geo. N. Peek is quoted as stating that loans will be made to corn and wheat growers through the Commodity Credit Corporation, where grain is warehoused under bond; that loans would be made at a rate "that would increase farm prices."

Pres. Smith Comments On Corn-Hog Plan

Urges Government Loan on Corn of 60c Per Bu. Chicago Basis to Provide Immediate Relief

"The permanent corn-hog program announced recently by Henry A. Wallace, Secretary of Agriculture, and George N. Peek, administrator of the Agricultural Adjustment Act is substantially different, is much more conservative, and in my judgment, its price improvement effect on hogs will be much less immediate than the provisions of the program recommended by the National Corn-Hog Committee," said President Earl C. Smith in a recent statement.

"As Chairman of the Committee, I feel sure I reflect its position in expressing regret that the Administration program fails to recognize the great importance of definitely and immediately raising and maintaining hog prices until the effects of a tonnage reduction policy can be made to operate.

"While the announced program, if fully supported by farmers, will, undoubtedly, be very effective in improving the price level of hogs in the spring, summer and fall of 1934; yet its immediate effect on hog price levels will be determined by the amount of continuous and aggressive support given the hog market by the Administration through purchases of hog products for the Federal Unemployment Relief Administration. Every influence will and must be brought to bear to keep such support of the hog market operating to the full extent and while doing so, farmers must speedily cooperate with the local committees that will be authorized to assure the needed reduction in hog tonnage during 1934, so as to justify the government in relieving the over-burdened markets throughout this coming fall and winter.

"If proper co-ordination of all efforts—both by the Administration and by farmers can be had—hog price levels can and will be raised and stabilized. That part of the program having to do with reducing future corn production is substantially in line with the recommendations of the National Corn-Hog Committee.

"To secure substantial improvement in the price of corn, we are urging government support to the corn market through a system of loans on state farm warehouse receipts on a basis of 60 cents per bu., Chicago. In my opinion, such a program is both defensible and fully justified to meet the present crisis by getting improved price levels now and to keep them improved until the effect of the corn reduction campaign can be made operative.

"In the future our efforts will be largely confined to securing and maintaining government support to the corn and hog markets during the winter, so as to assist farmers in the present hour of great need for increased income."

First Checks To Corn Belt By January

Secretary Wallace Comments on Permanent Corn-Hog Plan

Farmers who co-operated in the pig control plan received around $31,000,000 Secretary Wallace announced in a radio talk over NBC Oct. 18. More than 100,000,000 pounds of pork —50 or more train loads—were turned over to the Relief Administration. More than 600 carloads of this meat has been ordered shipped to relief agencies in 40 states.

Discussing the more permanent corn-hog control program recently announced, Secretary Wallace said, "we expect to have the first checks in the hands of farmers in the corn belt sometime in January. . . . . .

"I suppose we have spent ten times as much time and mental labor in developing this corn-hog program as we have spent on any of the major programs previously announced, but in spite of this the complexities of the problem are such that I do not feel entirely satisfied with the plan. . . ."

After discussing the details of the program as presented elsewhere in this issue the Secretary said: "I do not underestimate the difficulties and complexities, but I am inevitably more impressed by the difficulties and complexities that will surely confront the corn belt if corn and hog producers go ahead without any program. For if nothing is done, if farmers refuse to co-operate we will then continue to grow those 15,000,000 of surplus acres of corn just as though gasoline had not displaced ten or eleven million horses and mules, and just as though we had made no improvements in recent years in the number of bushels of corn required to produce a 100 pounds of pork.

"If nothing is done, we will then be continuing in amazing ignorance of the fact that Germany now has a tariff on lard of more than $15 a hundred pounds, that our share of the British pork market is no longer the usual 20 per cent, but only six per cent, and that the total decline in our export trade has left us with an unsaleable, unusable surplus of perhaps seven million head of hogs. The cost of a do-nothing policy might be reckoned in terms of 10-cent corn and two-cent hogs next year, and the resulting social stability would likewise be worth just about that much. . . . . .

"Many people resent the idea of restricting production so long as people are hungry. They call it wicked—and so do I. Fortunately, we have a President who shares these views. Under the policy he has recently announced, the hungry will be fed, and it will be possible for farmers to continue to produce not only for all who can afford to buy, but for all in this country who need food."

Corn-Hog Committee Plan Compared

The corn-hog control plan adopted by the AAA differs considerably from the plan recommended by the National Corn-Hog Committee of grower representatives.

The committee recommended that prices be fixed through agreements between the Secretary and processors so as to reach parity at Chicago by November 1, 1933. This means about $8 hogs which would include the proposed processing tax of $2 per 100, this price to be maintained until June 1, 1934. The committee also proposed a benefit payment of $1 per cwt. on all hogs weighing less than 220 pounds sold between Nov. 1, 1933 and June 1, 1934 by contracting growers.

Thus, under this plan contract signers would have received around $7 per cwt. for top hogs f. o. b. Chicago and would have been required to reduce their 1934 hog tonnage a minimum of 20 per cent.

The corn acreage reduction proposal of the national committee is similar to that adopted by the AAA.

It is believed that the committee plan as applied to hogs would have raised prices immediately. The AAA plan will depress prices on the other hand, and the producer will receive little or no benefit until a year from now unless the government comes into the market and buys substantial quantities of live hogs and pork products for poor relief.

The milk trade agreement proposed by the Sanitary Milk Producers and St. Louis distributors would pay the producer $1.95 per cwt. f. o. b. dealers' plants for class 1 milk.

Chicago Gets Its Way In Senate Vote

Downstate Senators Swing Over Under Administration Whip, Pass Bill For $38,000,000 State Levy On Property

AS WE go to press the State Administration program to continue the "dole" in Illinois on the present scale is being considered in the House after being forced through the Senate under the patronage whip.

The Illinois Agricultural Association is insisting that the Streeper-Green bills in the House, identical to the Lantz bills, be passed as introduced. These bills carry a mandatory provision that would insure Chicago and Cook county and commission-governed counties levying taxes locally, as 85 township-governed counties are now doing, to provide at least in part for their destitute people.

The Lantz bills were to be offered in the House as substitutes for the Administration measures.

The I. A. A. vigorously opposed the Administration measure, Senate Bill No. 1 which passed the Senate on October 18 by a vote of 36 to 13. It did not compromise on this position. This bill provides for a state tax on property of approximately $38,000,000 "for the relief of residents of the state of Illinois who are destitute and in necessitous circumstances." If this tax is levied farmers will pay around $7,500,000 more taxes next year.

How They Voted

The following senators voted for this measure: **Barbour, Barr, Benson, Boeke, Broderick, Burgess, Carroll, Finn, Gillmeister, Graham, Hickman, Huckin, Huebsch, Karraker, Kielminski, Kline, Kribs, Lee, Loughran, Leonardo, Maypole, McDermott, Mendel, Monroe, Mundy, O'Connell, O'Grady, Penick, Roberts, Serritella, Shaw, Sieberns, Stuttle, Ward, Williams, Woods.**

The following voted in the negative: **Messrs. Baker, Behrman, Carlson, Clifford, Ewing, Gunning, Lantz, Lohmann, Mason, Mayor, Paddock, Searcy, Thompson.**

When the State Administration's $30,000,000 bond issue program failed the first time to receive the necessary votes in the State Senate administration representatives offered to pass the Lantz bills with certain amendments prepared by Corporation Counsel Sexton of Chicago at the Governor's direction. Without having the text of these amendments read, a number of senators accepted this offer and voted for the bond issue program and afterwards to amend the Lantz bills.

When the Senate convened on Thursday, October 19, Senator Lantz, after studying the Chicago amendments, and conferring with downstate senators made the following statement:

The Chicago Amendments

"The Chicago amendments to the Lantz bills are not acceptable to the downstate senators who opposed the State Administration's Thirty Million Bond Issue program for the following reasons:

First: It is questionable whether the amended bills are within the Governor's call for the special session because they leave to the discretion of the local officials whether the funds realized shall be turned over to the Illinois Emergency Relief Commission. The call states as its first purpose, "To enact laws to provide funds for the Illinois Emergency Relief Commission to be used for the relief of persons who are destitute and in necessitous circumstances."

Second: The language used in the amended bills is not expanded to unquestionably permit local authorities to care for the unemployed. As introduced the Lantz bills provided relief for all poor and indigent persons including those "who are destitute and in necessitous circumstances by reason of unemployment or otherwise." The amended bills include only "poor and indigent persons." It appears this is an attempt to divide poor relief into two classes (1) pauper relief under ordinary economic conditions and (2) unemployment relief. If localities are not empowered to care for the unemployed this burden must be carried by the State. **We cannot agree to this because we contend that the duty and responsibility of caring for the unemployed is primarily a local problem.**

Probably Unconstitutional

Third: The classification of cities, villages and incorporated towns used in the amended bills is identical with the classification held invalid by the Attorney General in his opinion on the similar bills passed at the regular session and vetoed. He pointed out that a classification of municipalities according to the population of the county in which they are located is unconstitutional. Many attorneys agree that of the objections to the earlier bills raised by the attorney general, this objection is the only one that is fairly established as a legal proposition. This unconstitutional classification of the regular session bills was corrected in the Lantz bills as introduced in this special session, but is again incorporated in the amended bills.

Fourth: The amended bills empower Cook County to levy taxes for poor relief up to the constitutional limit of 75 cents on the $100 for all purposes. This will permit an additional levy of approximately 20 cents on the $100 assessed value, which with the 25 per cent reduction in assessed valuations of real estate will not produce much more than $5,000,000 per year and is entirely inadequate in view of expenditures of $4,000,000 or more per month for relief purposes in that county. The bills as amended do not require Cook County to draw reasonably upon its own resources and will afford only a small measure of relief.

We are convinced that all communities should be required to draw reasonably upon their own resources before appealing to the State for aid. And all localities should be placed upon the same basis with reference to relief taxes. Chicago and the townships in Cook County should be required to levy taxes for relief purposes just as downstate townships are now required to levy taxes for this purpose."

Voted With Chicago

After reading this statement, Senator Lantz moved to strike his bills as amended from the calendar. Ordinarily, this privilege is accorded without question. However, Chicago senators with the support of a few downstate senators who had voted for the bond issue program kept the bills on the calendar, but permitted Senator Lantz to withdraw as sponsor. The amended bills were then called by Senator Monroe for passage, but failed to receive

Corn Hog Plan

THE administration plan to raise corn and hog prices is out. It is offered as the best judgment of officials charged with responsibility for improving farm buying power in the corn belt. It involves substantial cuts next year both in the acreage of corn planted and the numbers of hogs marketed. Whatever success the plan may have in raising future prices depends on the achievement of this goal. Thus, it offers another great test of farmers' ability and willingness to work together for their mutual welfare.

The program as announced is probably not perfect. Secretary Wallace, himself, stated publicly last week that he is not altogether satisfied with it. It seems apparent that the plan, as pointed out by President Smith, fails to recognize the need for immediate relief. But action can yet be taken to overcome this weakness and others which may develop.

The attitude of every corn and hog grower toward the proposal should be clear. Whole-hearted co-operation by every Illinois farmer in reducing production is imperative if reasonable prices are to be realized. Nothing less will suffice. The job is a challenge to organization. It's our turn to demonstrate that we are in earnest.

Brazil Destroys Coffee

BRAZILIAN coffee growers have learned that they cannot sell all the coffee they produce at a fair price. They can sell a limited quantity at a good price to yield a profit. Instead of dumping their huge surpluses in the markets of the world, they are dumping them in the ocean or burning them. During the past two years the government has destroyed more than three billion pounds of coffee which equals the world's annual consumption. At present prices that coffee would bring around $200,000,000. Yet if this surplus were allowed to enter trade channels it would so demoralize the price level that the larger quantity would probably bring much less than the limited supply now marketed.

The President On The Radio

THE President's definite promise to raise farm price levels and bring about parity between agriculture and industry reiterated in his Sunday night radio address is heartening. "If we cannot do it one way we will do it another," he said. "Do it we will." This statement together with that in support of "a dollar which will not change its purchasing and debt paying power during the succeeding generation" comprises two of the principles Organized Farmers have been fighting for. To have the chief executive of the nation adopt and support these principles is at once encouraging to all farmers and a tribute to the value of organized effort. With faith and persistence, farmers through organization eventually will secure justice and equity.

Nearly T B Free

THE AUGUST, 1933 report of bovine tuberculosis eradication work in Illinois shows that 95 counties are designated as modified accredited areas where all cattle have been tested at least once and the reactors removed. Nearly 11,000 herds were tested during August. A total of 241,298 herds are under supervision, 5,854 of which are accredited and 87,649 herds have gone through at least one clean test.

The report shows that reactors are comparatively few in numbers. Only 261 cattle reacted out of 101,915 tested during the month of August.

The Illinois Agricultural Association and the County Farm Bureaus were largely responsible for securing the necessary state appropriations and pushing this work beginning ten years ago when tuberculosis eradication was very unpopular in certain sections.

At that time Illinois had a reputation as a center for infected cattle, particularly the northern counties. The T. B. test was denounced as a fake and many said T. B. could never be controlled. Yet today the state is relatively free from bovine tuberculosis and cattle breeders have the satisfaction of knowing that this state has gained in reputation as a source of clean tuberculosis-free breeding stock.

David Lloyd George, the British political leader, once said, "Americans are a docile people." He might not say that were he an observer here to-day. Strikes, mass meetings, picketing, and the like, of which we have seen much, and may see more, express the resentment of a people who have been divested of their farms, homes and jobs many through no fault of their own.

They are rebellious of a system which takes away the little they have while others have more than plenty. No one appreciates this more than President Roosevelt. With a less progressive man in the White House, revolution might have broken out before now. His recent assault against high salaries is a recognition of one of the things that breeds resentment and anger among under privileged people.

It was the concentration of wealth and privilege in the hands of the few that brought on the Russian revolution and produced the Soviet Union which despite all its critics at least seems to be holding together. In America the concentration of wealth has been proceeding at a dangerous pace, and that process, allowed full sway, would eventually produce an uprising against the very rich similar to that of Russia.

The present administration wisely is giving attention to social problems. Whether they succeed or not, the projects underway are designed to distribute wealth more evenly among the people. The communists tell us that capitalism sows the seeds of its own destruction; that its greed knows no bounds; that it allows the strong to plunder the weak. In this country we are not convinced that capitalism should go, but we are fairly well agreed that returns on capital should be limited and that gouging of the public should be stopped. The rich, of course, fight all government policies which disturb their wealth. Hence the income tax, particularly the graduated rates and surtaxes on huge incomes, is unpopular. So is any tax on intangibles.

The securities act is not liked by many financiers. It protects the small investor and places more responsibility on the promoter and borrower than heretofore. During the period of exploitation which preceded the depression, many promoters were very free with other people's money. If the projects succeeded they made the big profits, if the enterprise failed, the lowly bond and stockholders stood the loss. So this act is under fire and the clever argument is being used that new enterprise is being stifled and reemployment retarded.

Some students of social movements are proclaiming that co-operative organization offers the greatest hope for building a happier and more contented America; that co-operatively-owned plants, co-operative marketing and co-operative buying and distribution should be vigorously pushed as the solution to a growing social problem. There is evidence that most of the world is headed in the direction of leveling off the wide inequalities between people. As President Roosevelt suggests, his ideal for America is "a temple which when completed will no longer be a temple of money-changers or of beggars, but rather a temple dedicated to and maintained for greater social justice."—E. G. T.

VIEWS FROM THE PRESS

Farmers Must Organize

The farmer is America's outstanding exponent of rugged individualism, a reminder of the pioneer days of the Republic when industry and labor were also individualistic. In labor and industry that earlier period has been succeeded by a grouping and combining of forces to which the individual has yielded authority and entrusted his financial welfare.

If agriculture, the industry which produces food, the most vital of all needs, is to command its own markets and insure its own profits, there must be a change of working policy. Individual independence of action must be surrendered to delegated authority which has full and unrestricted powers. Powerful opposition to commodity price advances must be overcome by the combined power of the producers of foodstuffs, an organization strong enough to keep its own members from rocking the boat. It must have market control and crop control. Its recalcitrants must be disciplined.

Such an organization is being sought to-day by the national administration at Washington, which is seeking earnestly to alleviate the sufferings of the farmer and restore his prosperity. Unless the farmers of America can organize and create an all-powerful central authority and stop the confusion of council, the present strenuous effort to restore commodity prices may fail or be seriously delayed.—**Gibson City Courier.**

When Farmers Prosper Everyone Prospers

"There are so many super-minds making experiments and seeking ways and means to get the nation back to normalcy that it would be very presumptuous indeed for any of us cracker-box philosophers to offer any suggestions. But we can ask questions.

"How can our factory employes get off the relief lines and back into their factory jobs until the farmers of America have money to buy factory products? How can the farmer ever become a buyer when everything he produces sells so cheap and everything he buys is going up in price? How can the farmer survive the terrible burden of mounting taxes, with his credit shut off and his income almost at the vanishing point?

"The Lee County Farm Bureau, in concert with other farm bureaus in Illinois is staging a drive for membership and a campaign for tax relief. This movement deserves the wholehearted support of every citizen of the state, regardless of whether he lives in the town or country. . . . . The nation as a whole cannot ever be prosperous while the buying power of the farmer is so universally stifled.

"The movement in Illinois must have the cooperation of every farmer to be a success. The Telegraph bespeaks the support of all residents of the county, urban or rural, in the Lee County Farm Bureau's effort to gain membership and secure tax relief."—**Dixon Evening Telegraph.**

Use Gas Tax Money To Build Roads-Stuart

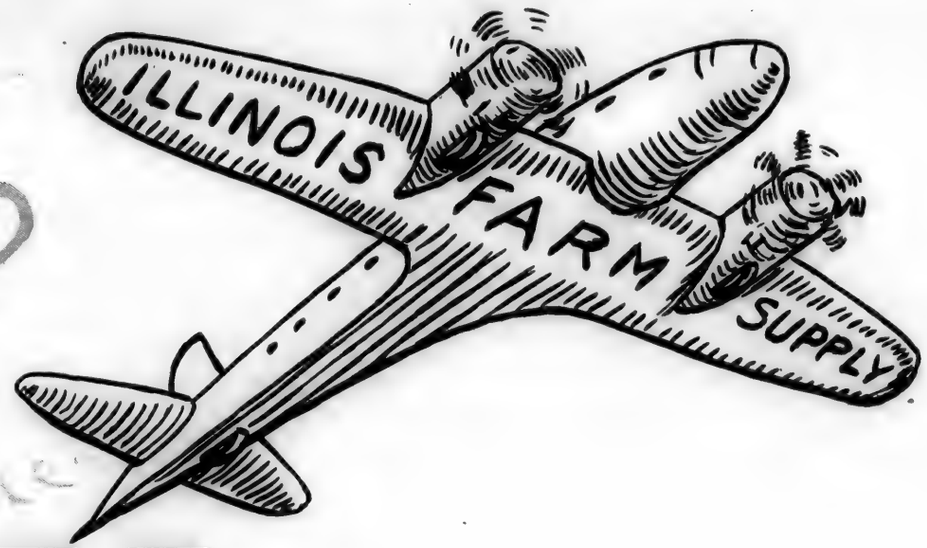
"If the state gas tax were properly expended in the building of roads, instead of being diverted to finance more bonds and pay more doles, there would be work for an army of Illinois men now on the relief rolls," writes William H. Stuart, prominent political reporter in the Chicago Evening American.

"The state might build roads by day labor, which would eliminate road contractors who hire cheap labor from other states with Illinois money on Illinois projects.

"We are entitled to new ideas, new policies, new methods from the ILLINOIS EMERGENCY RELIEF Commission, not simply requests for more money for the Illinois dole, which dole Speaker HENRY T. RAINEY declares is the greatest dole per capita paid anywhere in the whole world, England not excepted."

Climbing to new heights in cash

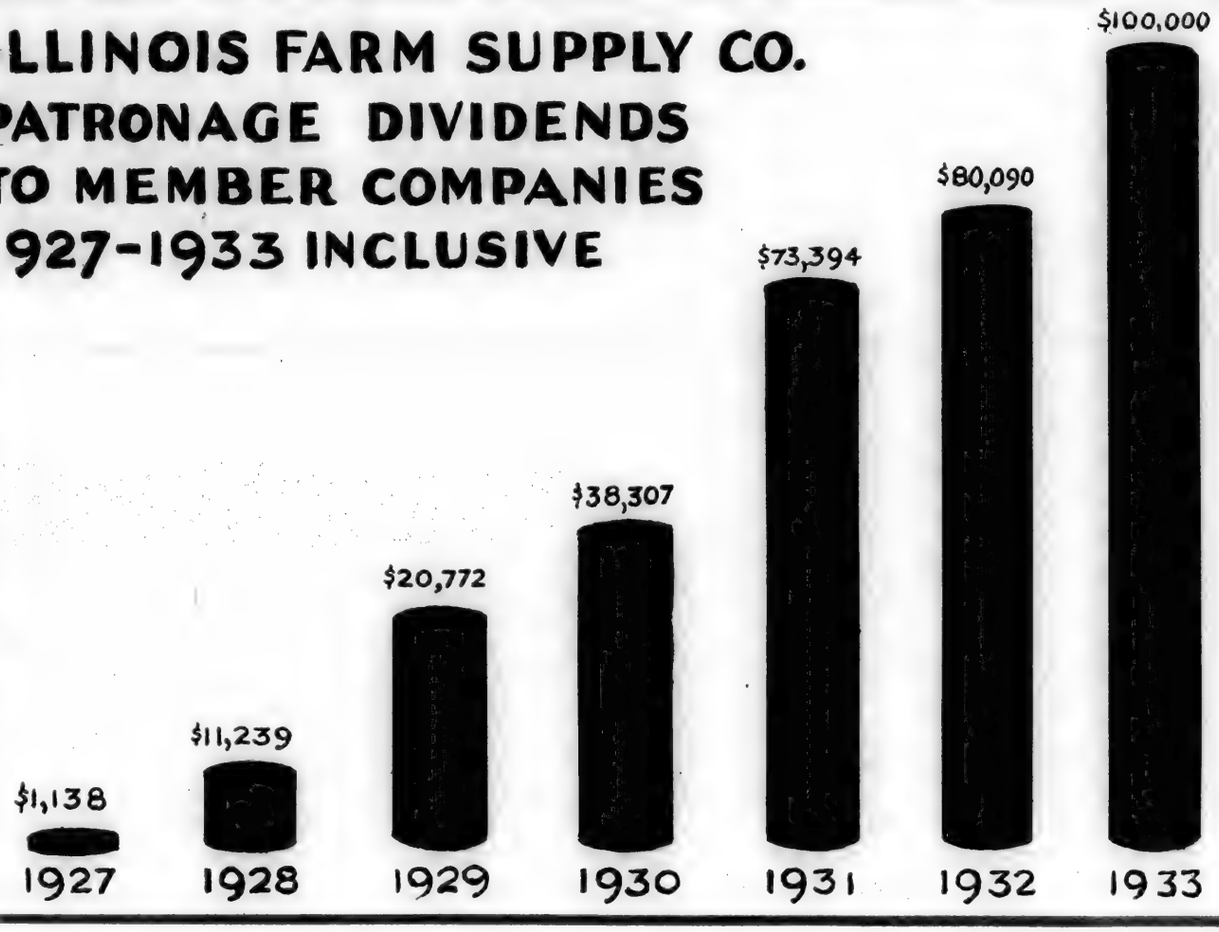
$100,000



FOR the seventh consecutive year, the Illinois Farm Supply Company has made a new record. The chart tells the story.

In 1927 the Illinois Farm Supply Company returned $1,138.21 to 11 associated county service companies on their purchases of 1,979,334 gallons of petroleum products—in 1933, $100,000 was returned to 54 county service companies on their purchases of 40,000,000 gallons of petroleum products.

This cash saving goes back to the Farm Bureau members' pockets through patronage dividends from local service companies which totaled more than $500,000 each of the past two years.



This record of achievement is an outstanding example of organized endeavor.

Chicago Gets Its Way In Senate Vote

(Continued from page 7)

the votes necessary to pass as emergency measures, effective immediately. **The emergency clause was stricken and the bills passed by the Chicago bloc with the aid of downstate senators Barr of Will County, Burgess of Wayne County, Finn of Marion County, Hickman of Edgar County, Karraker of Union County, Monroe of Madison County, Mundy of Clark County, O'Connell of Grundy County, Penick of Adams County, Shaw of Lawrence County, Stuttle of Montgomery County, and Williams of DeWitt County.**

In addition to the objections stated by Senator Lantz, the bills as passed, since the emergency clause has been stricken, cannot become effective until July 1, 1934. By that date the Chicago 1934 tax levy will have been made and a poor relief levy cannot be made in Chicago until 1935. Instead of enabling Chicago to support her poor and unemployed, the amended bills as passed by the Senate made it impossible for Chicago to help herself until 1935 thereby forcing continued appeals to the State and National governments.

I. A. A. Policy

The Illinois Agricultural Association has repeatedly declared that it is not opposed to but favors proper measures for emergency unemployment relief. It is opposed to enactment of the relief bills which passed the State Senate.

These bills involve the gravest danger that the State obligations proposed will fall upon property. If the legislation providing therefor should be sustained by the courts and if bonds are approved to finance relief funds, to be repaid out of gasoline tax allotments to the counties and municipalities, they will necessarily lead to the following results:

1. Money will be provided for only a few months, thus permitting another emergency to arise, requiring that the General Assembly again be called into special session early in 1934 to provide additional relief funds.

2. Gasoline tax funds will be further diverted from highway and street improvement and maintenance in most of the counties, thus either depriving the people of such improved facilities and reducing the employment so urgently needed in providing them, or throwing the burden of supplying such facilities back again on property.

3. The City of Chicago, if again successful in opposing legislation immediately effective to enable and require her to assume some portion of the duty, to the extent of her ability, to care for her own unemployed, will continue to demand legislation enabling her to use the credit of the State or to draw upon the resources of the people of the entire State.

4. Downstate counties and communities more and more will demand "easy" money for relief provided by the State, thus dulling a proper sense of community responsibility, continuing the waste of funds inevitable in the present State Relief system, and fastening the dole more tightly upon the people of Illinois.

Many Counties Get Credit Associations

Production credit associations have been or are being organized in a number of counties including Champaign, Vermilion, Livingston, McLean and others. The production loan division of the Farm Credit Administration is pushing organization work.

Loans may be made for crop production, the purchase of feeding cattle or sheep, financing breeding herds and for advances on grain in storage.

Farmers who borrow must purchase Class B stock in the local association to the extent of five per cent of each loan made. The rate of interest will be determined by the rate at which debentures may be sold to the investing public by the Intermediate Credit Bank which rediscounts collateral offered by the local associations. Money loaned to farmers by the Production Credit Association is not government money, but is obtained through the sale of bonds to the public.

The associations will be helpful in communities where there are no banks or where banks are restricting their loans to 60 and 90 days. The production credit associations propose to make longer term loans than some banks are willing or able to make. There will probably be no saving in interest.

From A Friend

"We are receiving the Illinois Agricultural Association RECORD and are enthusiastic over the publication. We are using some of the material in our publication, especially to get it to non-Farm Bureau members in our community.

"You may count on this publication and its staff for whole-hearted support in your work. Any Hancock county farmer will tell you of our stand for the farmer."—M. Clausen, Editor Hamilton Press.

Organized Labor Is Against Inflation

The American Federation of Labor adopted a resolution in its recent convention opposing inflation of the currency.

Indorsing directly Green's statement at the opening of the convention that unrestrained and unregulated inflation would harm the worker, the 600 delegates then approved a resolutions committee report saying:

"Whether minimum wages are fixed by codification through the national recovery act, or by voluntary collective agreements between organized workers and associated employers, the fact remains that they are fixed and subject to change only after the most persistent and aggressive pressure on the part of wage earners.

"If our currency is to be allowed to fluctuate at random, and the level of money values is permitted freely to lessen, it must be apparent that with wages remaining at their fixed denominational values, there will then be experienced a corresponding lowering of the wage levels and earnings. Such a condition must not be allowed to take place."

Wheat Signup Grows

A reduction of 6,600,000 acres for 1934 had been pledged up to Oct. 4 by American wheat growers. This represents about 70 per cent of the nation's total wheat acreage. A full signup would mean 9,000,000 less acres planted.

The main wheat states, according to estimates, will sign up about 90 per cent, states immediately east of the Mississippi, including Illinois, about 70 per cent, and eastern states about 50 per cent. Many seriously doubt that there will be any substantial reduction in wheat production next year unless adverse weather cuts the yield.

At the time of the last report Illinois growers had signed 18,600 applications covering 691,077 acres.

The validity of Grain Futures Act was upheld by the Supreme Court of the United States on Oct. 9 when it refused to review the decision of the Seventh District Court of Appeals sustaining the law. The ruling ended the fight of four Chicago grain brokerage houses to escape the provisions of the Act requiring brokers to report their transactions in futures to the government.

Let's All Do Our Part

Radio Address Delivered By Donald Kirkpatrick, General Counsel, Illinois Agricultural Association, Station WLS, October 11

THE mobilization campaign now under way throughout the state is not a movement to build a powerful organization for the sake of organization. Organization is not an end in itself. It is merely a means to an end—a means to accomplish certain things that can be achieved in no other way.

George Bernard Shaw, the British philosopher, once said: "Every time a law is passed the national income is redivided." Farmers have come to learn the truth of this statement by bitter experience.

Because farmers comprise a substantial part of the tax-paying class they have a large stake in government. What the General Assembly and the Congress does affects all of us, our business, our income, our standard of living. Because legislation is often influenced by money and organization, because laws frequently take money away directly or indirectly from one group and give it to another, is reason why farmers comprising a minority of all the people, must stand together to protect their industry or take the consequences.

The Special Session

We have a current illustration of what I mean in the special session of the Illinois General Assembly now convened at Springfield to consider unemployment relief. The State Relief Commission, we are told, is out of funds and requires $30,000,000 to operate between now and July 1, 1934. Most of this sum it is generally conceded will be spent in Chicago and Cook county. The question is not whether destitute people shall be given food and shelter, but how shall the funds be raised. Every farmer, every land owner and every property taxpayer in downstate Illinois will be affected by the way this problem is finally settled.

The Illinois Agricultural Association has believed from the beginning that care of the poor and destitute is primarily a local problem; that money for poor relief should be raised for the most part in the community where needed. Downstate counties under the township form of government have to a large extent been caring for their own unemployed through levying taxes in each township for this purpose. Although the Illinois Emergency Relief Commission has been in existence for approximately two years, 32 downstate counties have taken care of their own destitute people entirely at their own expense. Others have asked for and received comparatively small amounts from the State Relief Commission. Very little of the funds given any county have been used in rural areas.

Under our present statutes Chicago and Cook county, and the commission-governed counties in downstate Illinois do not have sufficient authority to levy taxes locally for this purpose. They do not have the same right and opportunity to care for their own through property taxation. As a result, Chicago and Cook county leaders have made successful efforts to place the burden not on their own people but on the people of the entire state and nation.

$75,000,000 Taken

Altogether a total of more than $75,000,000 has been taken from present and future road funds in Illinois for direct unemployment relief. Chicago and Cook county got most of it. Yet there are still 70,000 miles of unimproved farm-to-market roads in Illinois. And when road and gas tax funds are diverted to other uses, it means loss of unemployment and more taxes on property if these roads are ever to be improved.

Now it is proposed by Chicago administration leaders that an additional state tax levy of $38,000,000 be authorized on all Illinois property next year in the interest of unemployment relief. If a proposed bond issue of $30,000,000 payable out of gas tax funds is approved by the voters in 1934, the levy against property will not be necessary. But what if the bond issue fails? There is nothing certain about the people of Illinois approving such a proposal. Many legislators seriously doubt its passage.

The State Relief Commission has asked for this sum to carry on its work up to July 1, 1934. Where are funds to come from after that? No one has indicated. Presumably the road fund will be raided again. Chicago apparently is determined to continue indefinitely taking all the money it can pry loose from road funds and from the federal and state government. When will it start raising its own relief funds at home as many rural communities are doing? Probably not until the people from rural Illinois stand together and call a halt.

It is one thing to assist a community in its relief work after it has made a serious effort to help itself. It is another thing for all the people of the state to run the risk of paying $38,000,000 additional taxes to aid a community which makes absolutely no effort whatsoever to discharge its responsibility.

15 Billion Untaxed

Only this week Mayor Kelly of Chicago told how millions of dollars had been brought to Chicago by visitors to the World's Fair. More than a year ago competent authorities testified in Judge Jarecki's court that there were approximately $15,000,000,000 of untaxed intangibles, mostly stocks and bonds, lying in Chicago and Cook county strong boxes. Here we have a picture and evidence of great wealth in the metropolitan area; yet practically nothing has been done in this city to raise funds for its poor people.

For this reason the Illinois Agricultural Association is supporting a series of bills that lay the same mandatory duty upon the City of Chicago and upon the townships outside of Chicago in Cook county to levy taxes for poor relief and give the same taxing power therefore that now exists in 85 counties of the state. These bills introduced by Sen. Lantz and up for final vote in the senate also give an additional tax rate up to 15 cents to the commission - governed counties downstate to be used exclusively for poor relief.

All such additional taxes both in Cook county and in the commission-governed counties are to be paid over to the State Unemployment Relief Commission. In all such counties the Commission is required to spend in each taxing unit taxes collected therein for relief.

We believe the position of the Illinois Agricultural Association in support of the Lantz bills is eminently sound and fair. The same position was supported by President Roosevelt last week in addressing the American Legion convention in Chicago when he said:

"If he (the individual) has not the wherewithal to take care of himself it is first of all the duty of his community to take care of him."

Many are predicting that until

every city and every county is made to assume responsibility for its worthy poor who are in need there is no hope for an end to the "dole." That is the real danger in the present situation. Many are asking the question: "Are we perpetuating a permanent class of unemployed? Are we creating a class of people who will always be content to live on charity?" The easier it is to obtain funds and the farther away from home they are raised the more wasteful will be their distribution. And the longer will this problem be with us.

A Few Questions

The question for farmers to decide is "Shall Chicago and Cook county be given everything they ask regardless of who pays the bill? Shall the credit of the state be made available, and our farms and homes jeopardized through additional taxation to provide relief for the metropolitan area when that community does nothing to help itself? What is to prevent Chicago and Cook county going to Springfield again and again for relief? What is to prevent the metropolitan area attempting further tax raids for all sorts of things now that this beginning has been made?"

Nothing except the determination of rural people working together through organization. Downstate people are grateful to those state senators who yesterday opposed and defeated the attempt to put over the bill authorizing $38,000,000 additional taxes on all Illinois property next year.

The three-point program established as our goal in this campaign is first, parity prices for farm products; second, quicker farm credit relief; third, a 50 per cent tax cut on property. To attain these objectives demands and deserves the united support of farmers.

Higher farm prices through effective administration of the Agricultural Adjustment Act is not impossible. We must not quit now that we are half way up the hill.

Immediate farm credit relief as intended by the Congress can be obtained. We must continue our fight until we get it.

A 50 per cent cut in property taxes is entirely possible if farmers will organize powerfully and effectively enough to do the job.

There are those who will tell you that these things cannot be done. But organized farmers in Illinois are accustomed to doing things that others have said could not be accomplished.

For 12 long years we fought to obtain far-reaching legislation to control crop surpluses. After many reverses we obtained the Agricultural Adjustment Act which contains nearly all if not all the principles we fought for.

To pass a state income tax measure in Illinois was considered impossible and yet such legislation finally received the required votes in the General Assembly.

We were told that farmers could not successfully run an automobile insurance company, yet we have been operating our own for the past six years at half the manual rates saving Illinois Farm Bureau members several hundred thousand dollars annually.

We were told that farmers couldn't organize and operate a life insurance company, yet we did organize such a company which in 50 months had more than $50,000,000 of life insurance in force at new low rates with a strong investment position.

Farmers were told that they could not successfully operate an oil distributing company, yet during the past seven years we have developed such an organization on a co-operative basis supplying high-quality petroleum products and returning to Farm Bureau members more than $2,000,000 in patronage dividends.

Against the opposition and the predictions of those who said it couldn't be done tuberculosis has been practically driven out of our herds of livestock in 85 per cent of our counties. Also the state gasoline tax to assure the completion of our splendid primary road system was passed—both sponsored and vigorously supported by the I. A. A. and County Farm Bureaus.

Through organized action we have lowered the cost of immunizing our pigs against cholera to less than half of the former cost; we have set up a state-wide grain sales agency, the Illinois Grain Corp., which has handled 35,000,000 bushels of grain for 145 elevator stockholder members.

All these things have been gained by a minority of farmers working through organization. How much more could have been accomplished with united support. The objectives of the present mobilization campaign in Illinois can be realized. Let's all do our part to make them effective.

NOTICE
ILLINOIS AGRICULTURAL ASSOCIATION
ELECTION OF DELEGATES

Notice is hereby given that in connection with the annual meetings of all county Farm Bureaus to be held during the months of November and December 1933, at the hour and place to be determined by the Board of Directors of each respective county Farm Bureau, the members in good standing of such county Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of the Association, including the election of officers and directors as provided for in the by-laws of the Association.

During November annual meetings will be held in Boone, Lawrence, Monroe, St. Clair, Clay, Schuyler, Madison, Moultrie, Washington, Clinton, Marion, Williamson, Logan, Gallatin, Macoupin and Brown counties.

During the month of December the following counties will hold annual meetings: DeWitt, Clark, Tazewell, Edwards, Pope, Johnson, Jersey, Randolph, Union, LaSalle, Kendall, Rock Island, Bureau, Richland, DuPage, Effingham, Jackson, Kane, Morgan, Iroquois, Vermilion, Coles, Lee, Crawford-Jasper, Champaign, Massac, Edgar, Livingston, Grundy, Wabash, Piatt, Stephenson, Saline, Henry and Cook.

Signed,

G. E. Metzger, Secretary
Oct. 23, 1933

Relief Commission Urges Chicago Plan

The Illinois Emergency Relief Commission, temporarily an arm of the state government, is directing local relief workers and committees in downstate counties to influence state senators and representatives in support of the administration program desired by Chicago political leaders.

A two-page letter signed by Wilfred S. Reynolds, secretary of the Commission, was sent out with a news story for local editors. The letter urged the county committees to play up their relief needs before luncheon clubs, women's and labor organizations, Farm Bureaus, chambers of commerce, ministerial associations, etc. It was directed to counties where legislators opposed the $38,000,000 levy on property and continued diversion of gas tax funds away from roads.

1c Per Pound Tax On Butter Coming

A one cent per lb. processing tax will be levied on butterfat part of which will be used to buy surplus butter for unemployment relief and part to pay bonuses to farmers who reduce their dairy production according to an announcement by the AAA.

There were about 100,000,000 lbs. more butter in storage in September than a year ago. The government has been supporting the butter market for the past several weeks, buying for the account of the Federal Emergency Relief Corporation.

Illinois Farm Supply Company Has Record Year

600 Attend Annual Meeting, Decatur, Urge Government Support Corn Market

IMMEDIATE support by government of the corn market with loans on the grain stored in state sealed warehouses was advocated by President Earl C. Smith at the annual meeting of Illinois Farm Supply Co., at Decatur, on Oct. 17. Approximately 600 Farm Bureau leaders, managers and directors representing all the affiliated county service companies attended.

Mr. Smith pointed to the fact that the government had given such support to the cotton market pegging the price at 10c per lb. A corporation could be set up quickly, he said, and with a small force could operate at small expense giving much needed immediate relief.

He urged the leaders assembled to make known their thoughts and wishes regarding market support for corn, to government officials and representatives at Washington and to ask local business men and leaders to do likewise.

Need Immediate Relief

Speaking on the corn-hog plan, Mr. Smith stated that the National Corn Hog Committee recommended a plan for immediate relief to hog growers which is the chief point of difference between the committee proposal and that adopted by the administration.

He stated that any immediate relief in raising hog prices under the AAA proposal would have to come from government buying of hogs and pork products for feeding the unemployed —that with this one exception, the government plan was a long time program looking to curtailment of production first and higher prices sometime in the future.

Speaking on the subject, "Organization Dividends," Mr. Smith placed among the first accomplishments of the Farm Bureau movement the development of leadership and mass thinking and action throughout the organized counties. The real organization is out in the counties, he said, and the strength of our movement lies in the fact that it is built from the grass roots up, not from the top down.

Pointing to the huge gains recently made by labor organizations in building membership, he asserted that the great need of agriculture is a majority of farmers working together through membership in their organization. "We must preserve the morale of the farm people to save America," he said, "and in order to preserve the morale we must organize and stand as a unit, thinking and acting together for justice and equity."

Fred E. Herndon of McDonough county, president of the Supply Company, asserted that Illinois farmers had demonstrated their ability to operate successfully a farmer-owned and farmer-controlled purchasing and distributing organization with increased earning and profits throughout the years of depression while many large business institutions were showing losses.

"It was our ambition to establish by 1933 a $3,000,000 business," said Herndon. "We have far exceeded that amount, in fact, have nearly doubled that volume. The company is making a larger patronage distribution than ever before.

"In my opinion our greatest need is more common stockholders, Farm Bureau members, that we may be able to expand our business and keep within the co-operative law under which we are operating. Let us charge ourselves with that responsibility to sell the whole Farm Bureau program and to co-operate to the fullest extent with other affiliated organizations."

Manager's Report

Manager L. R. Marchant reported that gross operating income for the year was $170,565.32, an increase of 17.17% over last year. Net operating income of $124,162.12 with additional income from interest on investments resulted in a net income of $128,287.31 or 75.21 per cent of gross operating income.

The earnings represent a profit of 127.96% on paid-in capital stock which compares with 85% in 1929, 93.5% in 1930, 115% in 1931, and 112% in 1932.

The company is paying to member companies a total of $100,000 patronage refunds which compares with only $80,000 last year, and a little more than $73,000 the year before.

The capital stock holdings of the state company and the 54 affiliated county service companies now totals $919,059.00 which represents Illinois farmers' financial interest in the largest co-operative association of its kind in America.

Other interesting information reported by the manager follows:

In less than five years and in the face of the most severe panic the world has ever known, 38 companies were organized and placed in operation. This necessitated selling stock in the amount of $639,826.00 to adequately finance the business. This sum, subscribed by the farmers in these various communities, is 69.6 per cent of the paid-in capital stock of all member companies as of August 31 this year. Fifty-four companies, 143 bulk storage stations, some 400 service trucks, and over 500 retail outlets with operations in 90 different counties and not less than 75,000 patrons—a five million dollar business transacted annually, and an average patronage refund per member, in the territory served, of $15.95—an outstanding example of organized endeavor—describes the condition of the organization at the close of the year.

A New Record

In referring to the volume of petroleum products sold during the period ending August 31, 1933 we find that the aggregate of all petroleum products handled has established a new record of 40 million gallons. This figure towers well above the 35 million mark established in 1932. Each commodity shows a substantial gain in spite of all handicaps. The statistical records show the following total purchases for the period ending August 31, 1933:

Gasoline	25,909,773 gallons
Kerosene	9,661,299 gallons
Distillate and fuel oil	3,404,899 gallons
Lubricating oil	865,209 gallons
Grease	709,041 pounds

In comparison to the totals of each commodity purchased last year, gasoline shows a gain of 9.302 per cent or 2,205,133 gallons, kerosene 10.35 per cent or 906,722 gallons, distillate and fuel oil 53.6 per cent or 1,188,672, lube oil 6.66 per cent or 58,413 gal-

lons, and grease 7.61 per cent or 50,-174 pounds.

At this point it should be mentioned that there were only two membership applications received and accepted during the year. One of these—Kankakee Service Company—became affiliated early last Winter, and the other—Bureau Service Company—was organized and placed in operation under the management of LaSalle County Farm Supply Company, late last Spring.

According to all information assembled to date, Illinois Farm Supply Company holds a record for returning to its member companies the largest percentage of gross operating income of any state purchasing agency in existence today, notwithstanding the fact that the Company operates on a lower rate of brokerage and trading income than some other organizations rendering a similar service.

From the earnings for the year capital stock dividends in the amount of $6,853.57 will be paid to member companies. This amount represents 4.02 per cent of gross income, and the addition of $18,307.15 to surplus 10.73 per cent of gross income.

The balance, less Federal income tax, will be distributed to the member companies on the basis of patronage purchases, less any necessary deductions to cover subscription for stock and interest charges.

The upward trend of the patronage refunds paid to the member companies in the past, and the amount made payable by the action of the board for the period ending August 31, 1933 follows: 1927—$1,138.21; 1928—$11,239.71; 1929—$20,772.74; 1930—$38,307.89; 1931—$73,394.82; 1932—$80,090.43; 1933—$100,000.00.

Unorganized Farmer Takes What's Offered

"Keep your eye on the farm cooperatives," advises the Western Farm Life, Denver. "The average farmer," it continues, "has learned that noncooperation is another word for sheriff's sale. He must sell his products in highly organized distributive channels. The buyer is going to buy at the lowest possible price—the unorganized farmer takes what is offered or goes without a sale. Fair prices are possible only when the selling and buying groups meet on equal grounds—when the cooperative faces the middlemen. Industry's plans for recovery are all wisely based on cooperation—on enlightened self-interest. And the farmer is in exactly the same position."

Federal Court Upholds Adjustment Act

The federal district court at San Francisco recently upheld the constitutionality of the Agricultural Adjustment Act in a far-reaching decision of interest to farmers throughout the country.

Federal Judge St. Sure granted a permanent injunction restraining the Calistan Packers, Inc. from violating the license provisions issued to enforce the California peach agreement.

The Calistan Packers was cited for greatly exceeding its allotment of production and sale of canned peaches, for failing to pay into the control fund the sums assessed against canners for the purpose of buying from farmers at a fair rate all their surplus peaches and thus preventing glutting the market and breaking down prices; and for failure to permit the AAA to examine its books, records and papers.

In giving its opinion the court said:

"The power to regulate interstate commerce is granted in broad terms to the National Congress and this power should not be restrictively construed, rather it must be construed to give the Congress the power to regulate any and all commerce which may seriously affect the interstate trade. **This court, with propriety, cannot make the narrow holding that the legislative body, under this and analogous statutes, is without power to regulate intrastate commerce.** In this and other respects this power to regulate must be construed to effectuate the broad purposes of the constitutional grant and of the national policy.

"Upon the constitutional question greatest reliance is placed upon the contention that the statute, agreement, and license before the court violate the due process clause, a proper respect for the deliberate judgment of the co-ordinate legislative branch of the government requires that the court do not hastily pronounce important legislation invalid. The Congress made a legislative finding that a national emergency exists. This court, upon that finding and upon its own judicial notice of the economic distress throughout the nation, here arrives at a similar conclusion.

"In the cling peach industry and in other industries, due to great overproduction and ruinous competition, the members of that industry and the trade and commerce thereof have been near the point of ruination. In particular due to the foregoing factors and to the great disparity between the prices of commodities purchased by the farmers and the prices they have received for their own products, the farmers have been reduced to a condition bordering upon economic servitude. In the past few years the price for their peaches has been precipitously reduced from around $20 a ton to as low as $6.50 per ton. Overproduction and glutted markets travel hand in hand with ruthless competition.

"It is needless to point out that the welfare of the nation has been seriously handicapped by these conditions and the country's trade and commerce has been vitally affected. Under conditions such as these the court is bound to arrive at the conclusion that the peach industry is affected with a national public interest and that the Congress has the constitutional power to adopt appropriate legislation to cure these evils. The due process clause in such a situation cannot properly be construed to obstruct the national policy. Neither the constitution nor the due process clause requires the perpetuation of conditions which impair the national vitality.

"To adopt the view that the constitution is static and that it does not permit change from time to time to take such steps as may reasonably be deemed appropriate to the economic preservation of the country is to insist that the constitution was created containing the seeds of its own destruction. This court will not subscribe to such a view."

Farm Prices Compared

The index of prices of farm products on September 15 was 70 compared with 49 at the low point last February and 59 on September 15 a year ago.

Farmers' purchasing power measured by the ratio of prices received to prices paid was 61 on September 15 compared with 56 a year ago and 49 last February, the low point this year. These figures are based on 100 as the average of prices and farm buying power during the five pre-war years.

Second Glances At The News

FOR months the National Syndicate Service, of Chicago, a news bureau, has centered its fire on farm organizations, county agricultural agents and co-operatives. Its daily "service" has consisted almost entirely of the collection and dissemination of printed and spoken statements and articles attacking general farm organizati ns and co-operatives, regardless of the accuracy or inaccuracy of such statements.

Who pays for the propaganda against farm organizations has long been a moot question. The question is answered, in part at least, in the following article appearing in the Chicago Herald and Examiner recently.

"Dull days which have gripped the Chicago Board of Trade intermittently the last few years and reduced members to such a state that payment of dues hardly left $2 to place on a horse in the third at Lincoln Fields, after the arduous duties of filling orders had been completed, will reign no more.

"An economy wave swept into the institution yesterday.

"And is everybody happy?

"When you, or you, or you, look for a safe investment and finally put your bankroll into 5,000 bushels of wheat, the broker in the pit who hunts for someone to reluctantly fill your desires gets paid for it. That's the way he gets $2 to place on a horse in the third at Lincoln Fields. He gets just 75 cents for that job.

"All of which is very fine when a lot of you's are buying wheat. He may even get enough to play a pony in the fifth at Belmont.

"But when markets start to sink back a move develops to cut expenses, so that dues can be cut, and horses won't run without some sort of encouragement.

"Many thousands of dollars have been spent by the Board of Trade each year to tell the story of the grain market, to spread the seed of brotherly love between the broker and the farmer. Of course, annoyances which might arise from organizations like the Farmers National and The Grain Stabilization Corporation were overlooked by the press agents.

"Press agents always overlook things like that. So—reasoned 120 members yesterday—why have a press agent? (City editors have asked this question for years.)

"And this group, which hasn't been in a handbook for days, asked directors that Edward J. Dies and his National Syndicate Service be removed and the money saved, for why should press agents need money when some of them are former newspaper men and newspaper men never play the ponies.

"Deep and solemn deliberation was given the subject by the directors. But here arose an obstacle. How would newspapers get news of the grain markets without a press agent? It didn't seem possible. A compromise!

"Mr. Dies' contract was renewed for another year. And he will get only $33,000 instead of $36,000. Which will reduce expenses of each of the 1,700-odd members by $1.75, only 24 cents short of enough for a ride on a pony in the third at Lincoln Fields.

"So what?"

The Herald and Examiner reporter might have added that when a farmer or farmers' elevator places an order for a 5000 bushel trade the commission is $12.50, which leaves a substantial margin, after the broker is paid, with which to play a favorite across the board at either Lincoln Fields or Belmont.

"Farm Prices Must Be Raised"

The Democrat is in receipt of the Illinois Agricultural Association Record with a headline "Farm Prices Must Be Raised" across the front page? And with this sentiment all must agree, for there is no denying the fact that farmers never have received prices great enough to allow interest on investment, cost of maintenance and operation, plus a fair profit. No business can be run very long unless there is a profit. Yes, the price of farm products should be increased, but the way to do it is the problem which has worried wise men of past generations and they are still trying to solve the problem. If conditions were normal the old theory of "supply and demand" should rule, but with demand all shot to pieces with the system which destroyed our foreign markets, we must look to some other theory and practice. The Roosevelt administration, with the aid of farmers' organizations, is trying to solve this problem, and it begins to look as if success may be attained. Let's hope.—Shelbyville Democrat.

Smallest Corn Crop

The Oct. 1, government crop survey reports an indicated Illinois corn crop 40% short of last year and 28% below average. This is the smallest crop since 1887. Probable yield per acre is 26.5 bu.

Tax Relief Petitions Get 100% Action

Tax Relief Petitions are being signed by 100% of the voters in many school districts according to John C. Watson, director of taxation. No difficulty is experienced in getting signatures and in most cases entire school districts are being completed in a few hours.

To give sufficient time for circulating the petitions in all communities, an extension of time was recently announced by Mr. Watson to Nov. 7 when all signed petitions are to be sent to headquarters of the Illinois Agricultural Association in Chicago.

787 Cars Grain To I. G. C. In September

Illinois Grain Corporation and Farmers National together handled 787 cars of grain during September, and 7332 cars since Jan. 1. Mason, McLean, LaSalle, Knox and Lee counties are leading in shipments to the state and national co-operatives.

Tune In WENR Nov. 3 Livestock Program

One thousand radio parties are being organized in Illinois for Friday night, November 3 to arouse interest in co-operative marketing and the government's plan for adjusting corn and hog production and raising price levels.

Between 8 and 9 P. M. the marketing code for corn-hog farmers will be discussed by local leaders as producers gather around the radio, and at 9 P. M. they will tune in on station WENR, Chicago for the broadcast. Speakers will include Earl C. Smith, C. V. Gregory, and Chas. A. Ewing.

Bank For Co-operatives

The Central Bank for Co-operatives was established at Washington September 13 with initial capital of $50,000,000 subscribed by the government. The bank will have jurisdiction over loans to co-operatives borrowing more than $500,000 and also all loans to co-ops operating on a national scale.

Machinery Men Organize

Machinery and equipment dealers of the nation met in Chicago Oct. 21 to complete the organization of a trade association and begin framing a code for the industry. Concerns interested are those which buy and sell industrial and construction machinery.

Propose Tax For Benefit Payments To Milk Producers

A proposed processing tax to be levied on milk and its products was considered at a hearing on Oct. 16 in Washington. Funds from the proposed tax would be used to pay benefits to farmers who co-operate in the production control plan.

In his recent address before the National Co-operative Milk Producers Association in Chicago, Chester C. Davis, director of production for the AAA, said:

"While the details of our program remain to be worked out it is becoming increasingly clear that it must take into consideration all milk which goes into commercial channels whatever the final product. Unless we do that we shall find that while we have improved the situation with respect to one dairy product we have only increased the surplus of the others.

Feed Little Grain

"I cannot emphasize too strongly my conviction that many dairy farmers will find it profitable to change their system of farming to one in which they would keep most of their land in permanent grass and legumes and feed very little, if any, grain. The pastures and other roughage would be the base ration and grain would be fed only when the resulting increase in reduction could be obtained at a profit."

Experiments carried on by the Bureau of Dairy Industry Davis said, show that cows fed a ration of roughage entirely will produce about 70 per cent as much milk as when fed roughage supplemented by a full grain ration which means one pound of grain to three pounds of milk produced. When fed one pound of grain to six pounds of milk cows will produce on the average about 93 per cent as much as when fed a full grain ration. These results were obtained when a good quality of roughage such as silage and alfalfa were fed.

Net Returns Greater

Net returns from cows fed roughage alone were greater than when fed either a partial or full grain ration. This held true through the entire range of butterfat prices, from 20 cents a pound to 70 cents a pound, though the differences were most marked when the price of butterfat was low. Thus dairy farmers would find they would actually make more money by doing less work.

Mr. Davis quoted statistics showing that production of milk from the United States went from 87,069,000,000 pounds to 101,863,000,000 pounds in 1932 in spite of the fact that the depression sent prices down to low levels in 1931 and 1932.

The shift of many farmers toward dairying during the past ten years due to better returns in this field than from other farm crops is responsible for the large milk surplus characteristic of all dairy and milk marketing sections.

Erosion Control Work By C C C Saves Soil

Eight erosion control camps of approximately 200 men each operated in Illinois during the past season. In the erosion control work by the Civilian Conservation Corps trees were planted both for soil binders and to put some of the badly damaged land back to work growing timber. Soil-saving dams were built of brush, concrete, logs, woven wire, rock, earth or combinations of these. Land was revegetated with grass, vines, trees, etc., to hold the soil. Land owners signed contracts agreeing to maintain the works.

In Illinois as in other states applications by farmers to permit erection of erosion control dams on their farms and requiring their maintenance by farmers came in slowly. Later in the season, however, many decided that the heading off of gullies eating into rich fields is a practical necessity and entirely feasible, and more requests for erosion control work came in to camp superintendents and state foresters than could be taken care of.

This work will be continued through the winter in the Southern States. Most of the camps in the mid-west states have been broken up and moved south.

1500 At Bloomington Mass Meet Oct. 16

A resolution urging the federal government to loan up to 60 cents a bushel on corn and $1 on wheat was adopted at a mass meeting of 1,500 Farm Bureau members and their friends in Bloomington, Oct. 16. C. E. Huff, president of the Farmers National Grain Corp., and L. A. Williams were the principal speakers.

The resolution presented by Ernest D. Lawrence, I. A. A. director of McLean county, was dispatched to administration officials at Washington. The next day government buying of wheat for the unemployed started prices on the up-grade.

AAA officials are reported to be devising a plan for loans on corn in state bonded warehouses.

Industrial Leaders Demand Inflation

The "Committee for the Nation," representing leading industrialists of the United States, recently addressed a telegram to President Roosevelt urging the U. S. government to exercise control of its own currency, to shake off British domination of the world price of gold, and to "take immediate command of the price of gold and the exchange value of our dollar and through these raise our price level of wheat, commodities and securities so that as a nation we may control our economic destiny independently of Great Britain."

"We are fearful of the consequences of further postponement of monetary action at this crucial stage of our recovery program," the telegram said.

The directing committee of the "Committee for the Nation" is composed of J. H. Rand, Jr., president of Remington Rand; Frederick H. Frazier, chairman of the General Baking Company; Vincent Bendix, president of Bendix Aviation Corporation; Lessing J. Rosenwald, chairman of Sears, Roebuck & Co., and F. H. Sexauer, president of the Dairymen's League Co-operative Association.

Pres. Roosevelt Orders Commodity Credit Corp.

The Commodity Credit Corporation was recently set up at the direction of President Roosevelt to loan 10 cents per pound to cotton producers on the unsold portion of their crop.

Organized by Secretary Wallace and Henry Morgenthau, Jr., the corporation is empowered to make loans or purchase agricultural or other commodities that may be designated by the President.

An initial loan of $250,000,000 has been procured from the Reconstruction Finance Corporation. Additional funds will be available if needed. If similar loans are made on corn and wheat, the business may be handled through this corporation.

North Dakota Stops Shipment of Wheat

North Dakota's embargo on wheat got under way October 20 when Governor Langer notified all sheriffs to order elevator and warehouse men to refuse acceptance of spring and durum wheat. It was ordered that shipment of both be discontinued.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 165 So. Main Street, Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rates of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

AAA Aids Corn-Hog Prices

45c Per Bu. Loan at Farm and Support of Hog Market Follow Request of Organized Illinois Farmers

THE request of organized Illinois farmers for a higher loan on corn and government support of the hog market voiced in the meeting of 8,000 farmers at Peoria called by the I. A. A. on Oct. 27 met an immediate response from the Agricultural Adjustment Administration at Washington.

The sentiment of the meeting expressed in a resolution unanimously adopted was carried to Washington by President Earl C. Smith the next day.

EARL C. SMITH

"I found Secretary Wallace, Administrator Peek and his assistants all responsive to this constructive request on my arrival in Washington," said Mr. Smith.

"During my four days' stay in the capital, the Agricultural Adjustment Administration was busy working out final details of the permanent corn-hog program.

Quick Action

"Corn loans as indicated by press statements will soon be available, and this week the government is calling for bids on 75,000,000 pounds of pork products from hogs weighing from 100 to 215 pounds. All these products will be used in feeding the unemployed so as to improve rather than interfere with the competitive market. Other substantial purchases of pork products have been authorized at intervals throughout the winter until at least 300,000,000 pounds have been purchased.

"In my judgment, these accomplishments are both a tribute to the constructive efforts of organized farmers and to the earnestness and responsiveness of the Administration at Washington. With patience and persistence, farmers, through organization supported by a friendly administration at our national capital, can and will bring about a steady improvement in farm buying power."

On November 9 the AAA announced that the Commodity Credit Corporation with the approval of the President had obtained a commitment of $150,000,000 for loans at the rate of 45 cents a bushel at 4% interest at the farm again. t merchantable corn properly stored and warehoused. This definite commitment is the second step taken within the past few weeks to raise farm buying power and supplement the $350,000,000 corn-hog adjustment program for the coming year.

Buy Live Hogs

Government support to the hog market took a new turn the second week in November when packer buyers, and livestock commission companies at Chicago got into a deadlock over hog prices. When packers attempted to break the market below $4.50 the Chicago Producers Commission Assn. with the co-operation of other commission companies resisted with the result that large supplies were held over. The packers countered by increasing their purchases in the country direct from farmers. Then the government came to the rescue by buying large numbers of live hogs at the $4.50 price which will be processed by low bidders and the meat turned over to the unemployed through the Federal Surplus Relief Corporation.

Harry L. Hopkins, federal relief administrator, in a public statement was quoted as saying: "We are doing our own buying in the hog market because packers are apparently refusing to pay the Chicago market price. The situation there was bad. Packers were not taking the farmers' offerings and consequently storage charges were growing larger all the time.

"In buying hogs from the commission men at a higher price than the packers are willing to pay, we are helping the farmer to get a better price. This policy will be applied to purchases of cattle and other livestock, if necessary, to hold up the market. There is danger that the packers will control the livestock market unless something is done." Before this emergency arose the government had been negotiating with the packers to furnish processed hogs for unemployed.

Loan Regulations

In all cases only farmers who agree to take part in the Administration's corn control program calling for a reduction of 20 percent in acreage planted next year, will be eligible for loans.

To allow for variations in moisture content, a standard measure of 2½ cubic feet instead of the customary 2¼ cubic feet will be regarded as the equivalent of one bushel. Any corn eventually delivered to markets in settlement of loan notes, however, will be taken at the regular shelled market rate of 56 pounds per bushel.

Loan regulations specify that the storage at public warehouses for this purpose shall not exceed one-fourth cent per bushel per month of storage and not more than two cents per bushel handling charges.

However, in Illinois, which has a state warehouse ac passed at the request of the I. A. A. several years ago, loans will be made on marketable corn sealed in cribs on the farm. Warehouse boards are to be set up in

(Continued on page 4, Col. 1)

Unemployment Relief Session

A Review of Legislation Before the Recent Special Session of the Illinois General Assembly

THE first Special Session of the 58th General Assembly, which adjourned on November 9, was convened chiefly to provide additional state funds for relief of the destitute.

The call issued by the Governor limited the General Assembly to the provision of relief funds for the Illinois Emergency Relief Commission. This limitation was at once recognized by the metropolitan press as an attempt to bar consideration of any legislation such as the Lantz bills, passed last June and vetoed by Governor Horner. These measures, sponsored by the Illinois Agricultural Association, were intended to give Cook County and sixteen downstate commission-governed counties additional taxing power to carry out the mandatory duty of providing poor relief and to permit the city of Chicago and all outlying townships in Cook County to use the same taxing power for relief which is mandatory upon all townships in the remaining 85 counties of the state.

The issue in the Special Session was not whether additional funds for relief should be provided, but the most desirable method of providing them. Practically every one, including representatives of the I. A. A., agreed that the emergency, clearly foreseen last summer but having been allowed to arise, demand emergency legislation.

Administration Bills

In the special session, the State Administration sponsored the six so-called bonding bills, all of which passed and have now become law. The key measure levies a state tax of $38,000,000 on the 1934 valuations of all Illinois property, to be paid in 1935, thus more than doubling the 1934 tax levies for all state purposes made in the regular session last June.

Existing laws authorize the sale of state anticipation tax warrants up to 75 per cent of any levy, thus permitting the sale of $28,500,000 in warrants on the new emergency levy. When and if certain serious legal questions involved in some of the enacted bills are upheld by the courts, such state warrants will doubtless be sold from time to time as funds are requested by the Emergency Relief Commission.

Companion measures of the tax levy act provide for the submission of a State Bond Issue in the amount of $30,000,000 to be voted on in November, 1934. If the proposed State bonds are approved by a majority of all votes cast for members of the General Assembly, the $38,000,000 levy on property is not to be made. In this case the state anticipation tax warrants and accrued interest thereon will be redeemed out of the proceeds from sale of the State bonds. Provision is further made for payment of the bonds and accrued interest, as they mature, out of allocations of gasoline taxes, one-half out of the share allocated to each county obtaining funds from this source and one-half out of the share allocated to cities and villages therein, in proportion to the expenditure of relief funds in each county and in each city and village therein.

The I. A. A. Bills

The Illinois Agricultural Association prepared and sponsored five bills which were introduced by Senator Lantz, a somewhat simplified form of the bills passed last June and vetoed by Governor Horner. In order to bring them within the terms of the call of the special session, it was necessary to provide that any funds raised under the provisions of the new bills should be paid over to the Illinois Emergency Relief Commission. However, the principle of local responsibility was preserved by the provision that such funds could be expended by the Relief Commission only in the taxing districts levying and paying the taxes therefor.

The new Lantz bills proposed elimination of Cook county as the taxing district responsible for relief and making this duty mandatory upon the City of Chicago and upon all townships in Cook county outside of Chicago. The new bills used the same mandatory language as is used in the statute applying to all townships in 85 counties of the state. They also proposed giving the sixteen commission-governed counties downstate an additional tax rate up to 15 cents, to be used exclusively for relief purposes.

They Are Responsible

The new Lantz bills were revised to meet all objections raised by the attorney general and by Governor Horner when he vetoed them last summer. They all carried the emergency clause to give them immediate effect upon passage and approval. This would have made possible immediate supplemental levies by any taxing district in Cook county or in the 16 commission-governed counties, and tax anticipation notes issued against these supplemental levies would have provided funds immediately.

Responsibility for the passage of the administration relief program must be

(Continued on page 8)

Aids Corn-Hog Prices

(Continued from page 3)

every eligible county in states with farm warehouse laws. The county corn-hog production control associations to be organized will be designated as warehouse boards wherever established and each is to select one or more official sealers to be appointed by the State Department of Agriculture and placed under bond.

The loan regulations will permit any bank, co-operative association or other agency to lend money to producers on eligible farm warehouse certificates. Thus, the plan contemplates that an eligible borrower may take his receipts to a local bank, fill out a note and sign the loan agreement, the bank notifying the Commodity Corporation of the granting of the loan.

Will Rediscount Notes

At any time up to July 1, 1934 the Commodity Corporation will buy the note from the loaning agency at the face amount plus accrued interest at four per cent. Banks and other financial agencies handling notes and loan agreements are not permitted to make special handling charges.

The borrower may retire the note at any time on or before the maturity date. He may dismiss his application by turning over to the Commodity Corporation the number of bushels of corn originally stored if the market price of corn should be less per bushel than the loan amount per bushel. There will be no recourse to the original maker of the note or to any subsequent endorser provided the loan agreement including acreage reduction is fulfilled and provided there is no misrepresentation of fact made by the borrower in securing the loan.

Applications for loans will be received by the time this issue of the RECORD is in the mails, according to an announcement from Washington. The last day for accepting applications will be March 1, 1934.

Half Taxed and Half Free

A COMPLETE report with voting records of senators and representatives on unemployment relief legislation before the recent session of the General Assembly is published in this issue of the RECORD.

In line with the Association's long established policy, the issues and voting records are presented without political bias or favor. At certain times during consideration of this legislation, representatives of the I. A. A. were charged with political motives and party discrimination. The non-partisan vote disclosed by a careful review of the voting records herein contained will show the unfairness of such charges.

There never was any question about the need for reasonable unemployment relief. That was not the issue. The real issue was whether or not the burden of relief should be distributed equitably among all the taxpayers of the state; whether Chicago should be allowed to escape local tax levies for its destitute people while the townships in 85 downstate counties are compelled to levy taxes for their poor.

The Chicago delegation voting as a unit with the aid of 49 downstate legislators won their fight. Thus substantially one-half of the property owners of the state are taxed locally for unemployment relief and the other half go tax-free. How long will the people of downstate Illinois allow this inequitable and unfair situation to exist? Until this inequality is ironed out, unemployment relief will remain a controversial issue and the present wasteful and extravagant system under which several million dollars per year are paid in salaries and wages for disbursing relief will be perpetuated.

Country Life—A Shining Exception

THE depression has written a dark chapter in the history of most of the life insurance companies organized in Illinois. Not so with the company organized by the Illinois Agricultural Association and County Farm Bureaus. Country Life Insurance Company is a shining exception and an outstanding example of what farmers can accomplish by organized effort. The splendid record of progress of this farmer-owned and farmer-controlled legal reserve company is published elsewhere in this issue.

Every year since 1929 when Country Life was launched, straight through the depression, it has gained substantially in assets, strength, and insurance in force. Because the company has always invested its funds in government bonds and other high grade securities it is in an enviable liquid condition. It offers policyholders a very high degree of safety. At the close of last year the company hadn't suffered a single default in interest or principal on any of its many holdings. Probably no other company can say as much. Fortunately, Illinois life insurance laws were greatly strengthened in the last regular session of the General Assembly until they are now considered more strict than those of any other state.

A few years ago many people were saying, "farmers can't successfully run a business." They aren't saying it any more. Every one of the companies associated with the I. A. A. met its obligations last year and is operating on a sound basis.

A Wise Land Policy

FOR every new acre brought under the plow, take out of production an area of poor land of equal productive capacity.

That briefly is the new land use policy of President Roosevelt recently announced by Secretary Wallace. This sensible plan put into action and consistently followed along with present efforts will eventually solve the farm surplus problem. The program of reclaiming desert and swamp lands through government irrigation and drainage projects has been too long continued. While farm surpluses were piling up higher and higher following the war the reclamation service went blithely on despite corn-belt protest, building irrigation dams and ditches in the West to add to agriculture's oversized plant. And all with government subsidy.

The new policy, as the Secretary suggests, may involve a resettlement of America but if fertile acres replace marginal lands turned back into forests and wild life preserves, both the people who are shifted and the country in general will be better off. The President promises to start something of far-reaching benefit and importance to agriculture in future generations. This is statesmanship of the highest order.

More About Corn-Hog Reduction Program

Contracts Expected To Be Ready Latter Part of November

AS WE go to press the corn-hog administration has completed a series of meetings with agricultural college and farm organization officials throughout the corn belt at which details connected with carrying out the crop reduction program were discussed. Dr. A. G. Black, Claude Wickard, Director of Extension Warburton and several economists from Washington presented the details of the tentative plans.

A tentative contract to be offered the producer was read at the meeting in Chicago Nov. 10 and suggestions and criticisms were invited.

All suggestions are being taken under advisement and many will be adopted and incorporated in the final agreement which is expected to be ready for distribution the latter part of November.

The corn-hog program with reference to reduction requirements refers to acres of corn and numbers of pigs, it was explained. This means that the grower who co-operates must reduce his corn acreage at least 20 per cent and the number of pigs marketed a minimum of 25 per cent. He may cut production more than the minimum requirement, however, and be compensated therefor as explained in the November RECORD.

Yields By Fields

The land taken out of production may be used only for such crops or purposes as may be designated by administration rulings which will probably be that the land may not be used for hay, pasture, or for any cash crop sold off the farm. Corn acreage reduction is to be 20 per cent below the average acreage planted in 1932 and 1933. The estimated yield on the fields taken out of production will be based on average yields over a period of years, not necessarily the last two or three years.

The farmer will be required to give a record of the crops and yields produced on the different fields taken out of production, during the past five years. The county committee will inspect these records and estimates of the contract signers.

Hogs slaughtered for home use will be deducted from the base number of pigs allotted to the producer. In computing allotments and reductions, the rule will be followed that the acreage of corn follows the farm and the production of hogs follows the farm operator. Thus, if a tenant moves from one farm to another his average production of hogs goes with him. But corn reduction will be based on the average acreage grown on the farm he goes to.

May Not Feed More

If a farmer produces less than four litters of pigs and 10 acres of corn annually he will probably be allowed to come under one provision or the other without reducing below these amounts. The man who buys and feeds hogs may not buy nor feed more than the customary number to come under the hog provision requiring a 25 per cent reduction of litters produced on the farm and pigs marketed therefrom.

If the hog grower quits farming entirely after signing up he will probably not get the benefit payment. The corn-hog program is a one-year program only. The signed contract will state the basis of division of the benefit payments of the landlord and tenant.

The provisions suggested above are subject to change and the rulings on the various knotty problems will not be known until the final contract is presented and the accompanying rules and regulations decided upon.

Land Bank Loans To Illinois Farmers

Illinois farmers obtained 489 land bank loans totaling $1,756,000 during October, according to Wood Netherland, general agent of the Farm Credit Administration at St. Louis.

During October 1,868 applications for loans in Illinois were received, contrasted to 2,443 applications during September.

Netherland reports that the number of appraisals has been increasing steadily and during October land bank appraisers handled 8,421 applications compared with 5,329 in September.

The Credit Administration at Washington states that production loan associations have been organized or shortly will be organized to cover 60 Illinois counties. These local associations will discount their paper with the Federal Intermediate Credit Bank of St. Louis to secure money for crop and livestock production loans to farmers. The loans at present bear six per cent interest and the borrower must pay the cost of inspection which may not exceed 1% of the loan. He must also subscribe for five per cent of the amount borrowed in B stock in the local association.

Keep Up the Fight

Editor, I. A. A. RECORD:—

I have been reading the "Illinois Agricultural Association RECORD" for quite a long time. The November, 1933, number was so extremely interesting that I read every word from cover to cover. Although I try to make myself an extremely busy man with my school work, and especially amongst the rural schools, I find it very profitable to take time off and read every number of your splendid farm magazine.

The subject matter in the November number certainly ought to reach the hearts of every farmer in Illinois. I agree with every word that was said in this November number. I do sincerely hope you will keep up the valiant fight for the welfare of the farmer and especially the children who, I believe, will always be the bulwark of the American government.

Assuring you that I shall continue to read the RECORD with a great deal of delight, I am,

Loyally for the best citizenship possible,

L. A. Tuggle, Vermilion county, Ill., Co. Supt. of Schools.

100% Back of You

Illinois Agricultural Association,
Chicago, Ill.

This is a message from central Illinois. We highly appreciate the untiring efforts of the I. A. A. in its fight for Agriculture. We are 100 per cent in back of you.

Ben Komnick,
Macoupin County, Ill.

The Illinois Agricultural Association has arranged to secure surety bonds for treasurers of county wheat control associations at the rate of $10 per thousand of insurance.

Legislative Report

(Continued from page 4)

placed primarily upon 18 downstate senators and 49 downstate representatives who supported the solid vote of Chicago and Cook county.

The voting record of all downstate senators and representatives on the key bill to levy $38,000,000 on property is given on Page 5. Voters are urged to study this record carefully, together with the records of legislators on measures before the regular session of the General Assembly, published in the August RECORD. Only by so doing can members vote intelligently for future candidates for office.

Distinguished credit is due to 13 downstate senators and 45 downstate representatives who really represented the state as a whole, as well as the downstate, by opposing the passage of the so-called bonding bills.

The Illinois Agricultural Association bills from introduction faced bitter Chicago opposition. Early on October 11, a week before the tax levy bill passed the senate, certain Chicago senators spread the report that an agreement had been reached under which both the administration and the Lantz bills were to be passed, the latter to be first amended to the permissive form passed in the regular session and vetoed by the governor. Neither representatives of the Association nor Senator Lantz nor any other supporter of the Assocation bills had made any such agreement or had even sat in a conference for this purpose. This fact was quickly made known and the report of the agreement failed in its obvious purpose to secure votes enough to insure passage of the administration bills.

Fast Work Here

The administration then directed that amendments to the Lantz bills be prepared to restore thereto the permissive powers to levy relief taxes. Before these amendments were printed, or even read, they were offered and adopted and immediately thereafter sufficient votes became available and the administration tax levy bill was passed. Strange as it may seem, when the administration amendments to the Lantz bills were examined, it was found that they restored even the provision which had been pronounced unconstitutional by the Attorney General.

In view of the futility of the bills as amended, Senator Lantz tried to have them stricken from the calendar. His motion was defeated by the close vote of 19 to 21, in which Senators Finn, Hickman, Karraker, Monroe, O'Connell, Stuttle and Williams, all from downstate districts, aligned themselves with Chicago senators. Senator Lantz then asked that his name be stricken from the bills, which was granted. Senator Monroe asked permission of the senate to sponsor the amended bills, which was also granted. These bills were all finally passed without the emergency clause which would have made them effective at once.

How They Voted

Voting with the Chicago senators in each case were downstate Senators Barr, Burgess, Finn, Hickman, Karraker, Monroe, Mundy, O'Connell, Penick, Shaw, Stuttle and Williams. Senators Boeke and Sieberns had voted for the first Monroe bill with the emergency clause. When the emergency clause was removed, Senator Boeke did not vote on the bill and Senator Sieberns voted against it. Both voted for two of the four later Monroe bills after the emergency clause had been stricken. Senator Boeke did not vote on the other two later bills; Senator Sieberns voted against them. Senator Huebsch of the Cook county district had voted for Senator Lantz' motion to strike all of the bills from the calendar. When they were called for passage, Mr. Huebsch voted against all of them. As passed by the Senate, these emasculated bills were worthless for purposes of immediate relief, since they would not have permitted any levies in Cook County until 1935.

Bills identical with the Lantz bills in the senate had early been introduced in the House by Representatives Streeper and Leroy Green. When the Lantz bills were ruined by amendments in the senate, Streeper-Green bills, at the request of I. A. A. representatives, were advanced to passage stage. The bonding bills and the Monroe bills, likewise, were advanced. All three sets of bills remained ten days in deadlock.

In order to dispose of the useless Monroe bills and thus prevent any danger of their being passed by the administration forces and used by them to give downstate legislators an excuse to vote for the bonding bills, supporters of the Streeper-Green bills led by Representative McClure, of the majority party, offered and secured the adoption of amendments completely restoring the Monroe bills to their original form.

Called for passage on November 1, the first of the restored Lantz bills did not have a Cook county vote and so failed to receive the necessary two-thirds vote of the House. This was on the same day that the administration tax levy bill failed on second attempt, by seven votes. When the administration, by the utmost use of its power finally succeeded in passing the tax levy and bonding bills in the House on November 7, Representative McClure, of Knox county, recognizing the impossibility of passing the Lantz bills with the emergency clause, now that the bonding bills had passed, presented a motion to strike them from the calendar. He explained his motion as intended to give no downstate representative a chance to vote for the Lantz bills as an alibi for the vote he had just cast for the tax levy and bonding bills. His motion was carried with a shout of ayes against a few feeble noes.

Unsound and Unwise

The Illinois Agricultural Association regards the administration relief legislation enacted in the special session, largely by downstate votes, as unsound and unwise. It is admitted, even by its supporters, that this legislation is temporary in character and that provision for further relief funds must be made within a few months. The bonding program perpetuates the injustice of exempting Chicago and Cook county from providing by local taxation for any substantial portion of their own expenditures for relief. Thus further demands upon the credit of the state are probable, if not inevitable. This system of relief, if found legal, will further divert gasoline taxes from their intended use in improving and maintaining highways and streets, thereby decreasing the employment so much needed and increasing the destitution the legislation enacted is supposed to relieve.

Several novel features of the new legislation are of doubtful legality. The diversion of gasoline taxes for payment of the bonds and interest of the $20,000,000 bond issue approved in November, 1932, is now under attack in the courts. If this feature, or any other provision of the present administration relief program, is found invalid at any time after sale of the anticipation warrants and before approval of the bond issue, or if the bond issue is not approved, an additional tax levy of at least $30,000,000 and more probably of $38,000,000 will be required on property in the single year 1934. If any provision is found invalid after approval of the bond issue, it will require additional tax levies on property over a period of 20 years aggregating $30,000,000 for principal of the bonds and about $13,500,000 in addition for interest thereon. Such levies on property could be avoided only by the difficult expedient of the General Assembly meeting again and providing funds from other sources.

Membership Growing

More Than 1,000 Radio Meetings Tune In on Nov. 16 Broadcast.

A TOTAL of 2,091 new members had been signed in the County Farm Bureaus and the I. A. A. by Nov. 11 just five weeks after the fall mobilization campaign was launched on Oct. 9. In addition, approximately 3,500 delinquent members were restored to good standing.

A brief report of progress to date was broadcast during the half hour organization radio program over station WENR, Chicago, the night of Nov. 16. It is estimated that more than 1,000 radio gatherings in homes of members and public meeting places were tuned in on the program.

Last minute reports received by telephone and telegraph credited Peoria county with 128 new members, Mason with 121, Henderson 99, Edgar 88, Whiteside 83, Adams 81, McHenry 77 (including 28 who never belonged heretofore, telephoned Lester Siedschlag, captain), Christian 76, Kendall 68, Knox 65, Logan 61, Woodford 61, Randolph 60, Morgan 51, St. Clair 50, Shelby 43, etc.

Will See Them All

"Our drive in Mason county will not be considered complete until all prospective members are interviewed," telegraphed Captain Leonard Keith of Mason county.

"We are dividing the county into four areas with three sub captains," wired Effingham County Farm Bureau in reporting 17 new members. "Another intensive campaign starts in 10 days. Watch Effingham county."

In most counties the campaign for new members was coupled with efforts to restore present members to good standing. In Schuyler county where 31 new members were signed sides have been chosen for the continued membership contest to end January 1, winners to eat turkey and the losers beans.

In LaSalle county where J. R. Bent is captain, a splendid record was made with 19 new members signed, 273 delinquents restored, and $4,076 collected. In Livingston county 52 members were signed and 304 delinquents restored to good standing with nearly $3,000 in back memberships collected. In Champaign county where 38 new members were signed collections totaled $3,394, in Madison $2,701, Woodford $1,920, Christian $1,900, Ford county 37 new members and $1,966 collected, Montgomery county 12 new members, $904.50 collected, Morgan $1,600 collected, Knox county $1,779, Boone $1,271.

Mr. Smith Speaks

In his radio address on the WENR program President Earl C. Smith called attention to the accomplishments made possible by a minority of farmers working together through organization. "It has taken long years of struggle," he said, "for less than 10 per cent of the farmers of the United States, through organization, to finally get full recognition by government of the seriousness of the farm problem and its relationship to the welfare of all other business and industry of the nation. This could have been accomplished much more quickly with 90 per cent of the farmers in organization. It will be more difficult to secure and maintain full and effective administration of the present law to raise farm prices, refinance farm loans on a long-time basis at low rates of interest, and revise our monetary system on a sound basis.

"The greatest contribution farmers can make to speed the day of agricultural recovery is for each and all to do their part in building and maintaining an effective and efficient organization," continued Mr. Smith. "While government may do much temporarily to assist farmers in improving their condition, yet farmers should recognize that all government policies are subject to change on short notice.

"The more dependable and permanent way would be for farmers to fully recognize that with every phase of industry, labor and finance thoroughly organized, they too must organize more completely and maintain their rightful strength and influence around every council table, in every legislative hall, before the congress of the United States and upon all the market centers of America."

Metzger Cites Opportunity

In his radio talk Secretary George E. Metzger emphasized that farmers must look ahead to the time when temporary plans for raising farm prices are no longer in existence. "What then will happen," he said, "to agriculture when aggressive government assistance now available is no more? Will farmers organize and administer their own production control plan with the idea of obtaining fair prices for their commodities? Will they organize to the point that they can demand and secure reduction of at least 50 per cent in taxes on real estate? Will they organize and demand a monetary system providing for stable purchasing power in terms of commodities?

"The opportunity is here for farmers to work together with government assistance for a planned production and reasonable prices. The time is here when farmers can through organization determine whether the industry is to go forward with an income that will support a good school system, adequate rural churches, and reasonable conveniences that make for a higher standard of living on the farm. The alternative that will surely follow a lack of proper organization is cheap food and cheap materials for an industrial nation, unbearable farm taxes, exorbitant prices for supplies farmers must purchase, and a dominated peasant agriculture."

Here are three of the men who assisted in putting Peoria county at the top in the Farm Bureau mobilization campaign.

Left to right: Thurman Scott, Glasford, who signed 25 members in one township and still working; H. S. McNaughton, county captain; and Leonard Strope, Hollis township, who signed 23 members in one of the smaller townships. Up to Nov. 11 Peoria county had signed 128 new members since Oct. 9.

Danville Producers Organize Milk Co-op

Consider Future Course of Action At Meeting Nov. 20

For many years producers in the Danville milk shed have felt that they were not receiving a fair share of the consumer's milk dollar. Recently they have been receiving a base price of $1.75 and a surplus price of butterfat or about 75c per cwt. The consumer pays 10c per qt. The dealers have been telling the farmers how much goes into base and the percentage into surplus. The producers felt that their interests could best be served by organizing so they recently formed the Danville Milk Producers Association. Within 48 hours after the plan of organization was submitted, ninety per cent of the milk going to pasteurizing dealers was signed up. About 300 producers are members. Otis Kercher, Farm Adviser, and the Vermilion County Farm Bureau have been active in promoting the organization.

The following officers were elected at the first meeting:—

R. R. Bookwalter, Danville, pres.
George W. Lenhart, Georgetown, vice-pres.
William Leverich, Danville, sec'y-treas.
Grace L. Metzger, Covington, Ind.
Chas. T. Delong, Potomac.
Peter Markunas, Westville.
L. J. Bremer, Danville.
L. C. Faust, Covington, Ind.
W. D. Britt, Danville.

Purpose of Organization

The purpose of the organization is:

1. To sell the milk of its member producers to the milk distributors on a classified or "use" basis at a reasonable price. To have the right to check the amount of milk used as fluid, manufactured into ice cream and sold as surplus for churning purposes.

2. To work out a quality improvement program so that the producers will be paid for high quality milk at a premium commensurate with its grade.

3. To employ a tester to recheck all butterfat tests of all milk sold on the market.

4. To stabilize the market by establishing a base for each producer which will correspond to his fair equity in the market's fluid sales and have a sound surplus control program rather than pay each producer half base and half surplus regardless of his production.

5. To advertise the use of fluid milk in Danville thus helping both producers and dealers.

6. To supply Danville consumers with the best possible quart of milk at a fair and reasonable price.

"These things can only be accomplished with the co-operation of both dealers and producers," said J. B. Countiss, dairy marketing director. "Thus far, however, the dealers have refused to co-operate. They insist that they are not in favor of the producers organizing and contributing a check-off to operate their Association. In other words, after they buy the milk they want to tell the producer how, when and where he can spend his milk check.

"The producers contend that they will deliver to the dealers' platform the amount of milk the respective dealers agree to buy at a reasonable price and that the dealers have no right to dictate the kind of organization they have or how their funds should be spent.

Refused to Buy

"It is reported that one of the dealers refused to buy milk from 26 of the producers after he learned they had joined the organization," said Countiss.

"Other members have come into the office and reported that they had already got their membership dues back through increased tests and a higher percentage of base. Presumably this was done to make producers better satisfied. The producers in this market previous to this time have had no voice whatsoever regarding prices they received for their milk, the price the consumers pay, the amount of milk put in the surplus class at butterfat prices or weights and tests."

A mass meeting was scheduled to be held at Danville Nov. 20 to consider the dealers' ultimatum and formulate a future plan of action.

Mr. George Besore who has been manager of the Champaign Milk Producers Association has been employed as manager of the association. He will manage both associations, thereby cutting down expenses and paying producers more money.

Co-operation Pays Utah Egg Producers

The Utah Poultry Producers' Co-operative Association, only 10 years old, handled 88.9 per cent of the market eggs of the state in 1931. In 1922 Utah imported part of its egg supply from other states. Today it is selling well over a half million cases of high grade eggs at premium prices on a market nearly 2,500 miles away. Early this year there were 7,830 producers co-operating as members.

Sam H. Thompson Is Honored In Radio Program

Sam H. Thompson of Quincy, former president of the American Farm Bureau Federation and the I. A. A., was honored during the A. F. B. F. party-line program over the NBC radio system on Nov. 11. He was awarded the distinguished service medal by the Federation more than a year ago.

SAM H. THOMPSON

In paying tribute to Mr. Thompson, President Edw. A. O'Neal said: "To me he is a typical representative of the corn-belt farmer, with great earnestness and integrity and zeal for the cause of agriculture. As his contribution, he stood in the front ranks in our great fight for equality for agriculture, standing up before the nation fearlessly and honestly advocating our cause, and it was a great joy that I had the opportunity to fight under his leadership in those past days."

Dubuque Producers Open New Dairy Plant

On November 9 the Dubuque Milk Producers Association opened their new surplus plant for fluid milk producers in that milk shed. Approximately 20% of the members are Illinois dairymen. About a year ago they became dissatisfied with both the amount and the prices received for surplus milk and rented a brewery building for a surplus plant. Since beer came back they sold their lease and moved their plant to a new location down town. New equipment has been installed and they plan not only to handle surplus milk but also establish cream routes and churn this cream into butter.

About 300 producers attended the meeting. J. B. Countiss of the I. A. A. discussed the Illinois plan of handling surplus milk and pool cream and the advantages of a combination plan of this kind as it is being carried on at Rock Island, Peoria and Bloomington.

Dubuque producers are now receiving $1.20 per 100 lbs. for 3.5% milk sold as fluid milk. The retail price is 7c per quart.

A code is being prepared for this market which will materially increase prices to producers. One provision of the code is that the producers will handle surplus in their own plant.

Producers Can Get More of Consumer's Dollar

by Frank Gougler

FIGURES released by the United States Department of Agriculture show that the gross farm income for 1932 was only slightly over five billion dollars. Yet it reported that the consumer paid fifteen billion dollars for these same commodities for which the farmers received five billion dollars. In other words, there now exists a spread of 200% between what the farmer receives for his products and what the consumer pays.

Every farmer knows that this spread is entirely too wide and that it should be narrowed. Experience proves that the most effective way to correct this situation is through co-operative effort. Individually the farmer can in no way correct this situation—collectively he can.

In order to improve the situation for Illinois farmers in the sale of butterfat, a state-wide plan for establishing co-operative creameries was launched a year ago. Creameries are now operating in the Rock Island district, the Peoria district and the Bloomington district. Others are being organized in the Champaign district, Olney district, Mt. Sterling district and Carbondale district. Each of these co-operatives now being organized must raise $30,000 cash for equipping the creamery plant. The Champaign district is nearing its goal in the raising of this amount of money.

Our plants now operating at Rock Island, Peoria and Bloomington, have not operated a year; therefore, it is not possible to give information as to their accomplishment, except to say that they will process far more butter at the end of the year than was anticipated.

It is of interest to note what co-operative creameries in adjoining states where conditions are no different than here in Illinois have accomplished over a period of years. Reports from two creameries located in Indiana furnish interesting information as follows:

	Crawfordsville, Indiana.		Columbus, Indiana.	
	Lbs. Butter made	Refunds	Lbs. Butter made	Refunds
1924			385,673	$ 12,186.23
1925			590,942	23,850.85
1926			836,673	24,012.35
1927	574,075	$ 12,317	864,125	28,577.74
1928	795,009	20,454	858,724	32,081.95
1929	1,215,304	35,074	852,580	46,632.57
1930	1,508,590	46,662	943,440	50,335.56
1931	2,090,265	61,640	1,212,175	61,278.59
1932	3,197,259	74,152	2,024,528	67,000.00
	9,384,502	$250,299	8,571,859	$345,956.34

Figured on a poundage basis for the above two creameries, the value of these refunds amounts to 3.3c per pound. But, this does not represent all of the gains. The Crawfordsville plant with equipment is today valued at $110,000, all of which is paid for except $2,000. This value represents another cent per pound butterfat. The total gain then amounts to 4.3c per pound gain thru co-operative effort. Suppose we apply this gain to the entire butterfat production in Illinois, which is over 50 million lbs. annually. Fifty million pounds times 4.3c per lb. amounts to $2,150,000 additional income which may be gained by Illinois producers through the efficient operation of their own plants. Looking at it from another angle, it should be noted that the refunds reported above amount to more than enough to finance the initial cost of establishing a co-operative creamery once each year during the period these plants have been operating.

One of the major factors in the 200% spread between the price the producer receives and the consumer pays is large profits made on farm products after they leave the producer. The way to get some of these profits is to take the commodity a step or two nearer to the consumer.

Program For A. F. B. F. Annual Convention

Earl C. Smith, A. R. Wright and Geo. F. Tullock are the three voting delegates of Illinois to the American Farm Bureau Federation convention, Chicago, December 11-12-13. Alternates are Charles S. Black, C. E. Bamborough and Samuel Sorrells, all members of the I. A. A. board. The entire board is expected to attend the convention.

This year's meeting, according to President Edward A. O'Neal, will feature the agricultural adjustment program, farm credits, and taxation. Speakers will include Secretary of Agriculture Henry A. Wallace, Administrator George N. Peek, and Chester C. Davis, director of the Production Division of the AAA.

Governor Paul V. McNutt of Indiana will tell how that state recently shifted a big share of the tax burden from real property forcing other interests to help bear the load. The Indiana Farm Bureau had a big part in bringing about this change.

Von T. Ellsworth of the California Farm Bureau will discuss their experience in securing an equitable distribution of the tax burden in that state.

Other speakers will include Governor John G. Winant of New Hampshire who will tell what a state government can do in promoting the welfare of agriculture; A. S. Goss, Land Bank Commissioner of the Farm Credit Administration, and M. L. Wilson, director of subsistence homesteads in the Department of Interior.

Farm women will be interested in the talk by Miss Connie J. Bonslagel, state home demonstration agent in Arkansas. Other features will include singing and music, a quartet contest, and a nation-wide public speaking contest.

Boggess, DeFrees Recovering From Accident Injuries

C. P. Boggess who was seriously injured in an automobile accident several weeks ago while serving as captain of the mobilization campaign in Bond county, is slowly recovering from bone fractures.

Talmage DeFrees, I. A. A. director from the 22nd district, has fully recovered from facial lacerations and bruises received in the same accident. He attended the I. A. A. board meeting in Chicago, Nov. 17.

The car in which they were riding was hit by a switching freight train at an unguarded crossing.

Co-op Creamery Makes $346,000 Profit In 9 Years

Marketing and Legislation Feature District Conference at Sullivan

Co-operative marketing, and legislation pending before the General Assembly were the principal subjects considered at the 19th district I. A. A. conference called by Eugene Curtis, I. A. A. director, and held at Sullivan, Moultrie county, Oct. 16.

Reporting on the progress in co-operative produce and dairy marketing, Frank Gougler, director of produce marketing, stated that the co-operative creamery at Columbus, Indiana had made a profit of $346,000 in nine years' time—that the co-operative was paying 25c per lb. butterfat while the going price in other sections of the state not subject to co-op competition was 16c per lb. Illinois cream producers have an opportunity to own and control their own creameries and thereby secure a maximum share of the consumer's dollar for butter, Gougler said.

Speaking on the growing disparity between prices received by livestock farmers and the price paid by consumers for meat, Ray E. Miller of the I. A. A. staff stated that in the period from 1909 to 1914 the consumer paid $12.52 for 62 lbs. of pork when live hogs were selling at $7.83 per cwt. whereas in 1932 for the same amount of pork consumers paid $12.83 although the farmer received only $3.70 per cwt. for hogs.

This means that $425,000,000 was taken away from the purchasing power of the hog farmer in one year, Miller said. With better control of volume, he continued, farmers could recapture the 56% of the consumer's dollar they enjoyed in 1913 which compares with only 35% today.

J. Fred Romine, member of the Illinois Grain Corporation board, reported that the Farmers National Grain Corp., contrary to propaganda, was in a thriving condition, and that its influence had been exerted successfully to raise the price level of grain in many parts of the country. Romine expressed the opinion that a futures market was no more necessary in handling grain than in handling soybeans, livestock, or other farm commodities.

Chas. S. Black, chairman of the I. A. A. public relations committee, reviewed legislation being considered at Springfield and emphasized the importance of close co-operation of the County Farm Bureaus if farmers are to exert proper influence in securing equitable treatment in legislative matters. Other speakers included Manager Fullerton of the Douglas County Grain Co., Mr. Curtis, and Chas. B. Shuman, president of the Moultrie County Farm Bureau. The next meeting will be held in Piatt county. Farm Adviser J. H. Hughes acted as secretary and wrote up the minutes of the meeting.

Nearly 300,000 Sign Tax Relief Petitions

John C. Watson, director of taxation for the I. A. A., reports that nearly 300,000 signatures to the Tax Relief Petition have been received at the I. A. A. office. The petition was circulated in every school district in most of the counties in Illinois. A number of counties are still to be heard from.

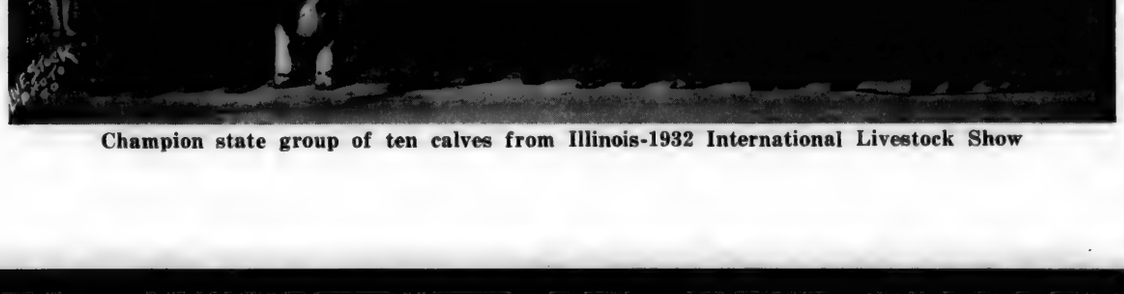
In a recent letter to Governor Horner, President Earl C. Smith advised the Governor of the overwhelming demand by rural voters expressed in the signed petitions for an early special session of the General Assembly to consider a proposed revenue amendment to the State Constitution.

At the request of the administration Association representatives are drawing up the form of an amendment which will be submitted to the newly appointed revenue amendment commission made up of five state senators, five representatives, and five citizens.

Livestock Show In Chicago, December 2-9

Illinois farmers and stock breeders will be prominently represented with exhibits at the International Live Stock Exposition which will be held for the 34th year at the Chicago Stock Yards December 2 to 9.

According to B. H. Heide, secretary-manager, the Exposition has one of the largest entries of livestock and crops this year in its history. The entry list which closed November 1, shows that in Illinois alone 57 cattlemen are listed among the exhibitors, 26 sheep breeders, 34 swine breeders, and eleven will exhibit draft horses.



There is a heavy entry in the International Grain and Hay Show, in which Illinois farmers will figure prominently. Nominations were received from 30 states and seven provinces of Canada for the crops show.

Another division of the Exposition in which Illinois will take an important place among the states is the Junior Live Stock Feeding Contest. Fourteen states will be represented, Illinois boys and girls numbering 126 being in the largest number. Last year the state champion group of ten calves was awarded to Illinois in the junior show, and three calves shown by Sangamon county boys were the reserve champion county group of three animals among all those competing.

Unusually low rates, some only 1c and 2c per mile, will be in effect on all railroads during the Exposition.

Federal Loans Speed Up

Sam F. Russell, farm adviser in Adams county, reports that federal loans have been going through at a faster rate in that county during the past month. Twenty-two loans, he said, were approved in three days and loans on land are being made at a more reasonable rate than was true a few months ago.

Champion state group of ten calves from Illinois-1932 International Livestock Show

Country Life Steps Ahead During 1933

By L. A. Williams, Manager
Country Life Insurance Co.

AS THE year draws to a close, it is certain that by Jan. 1, Country Life Insurance Company will have in force close to $54,000,000 of insurance, and this after less than five years of operation. The current year again has seen Country Life make new gains in spite of low farm buying power.

L. A. WILLIAMS

The first Country Life insurance policy was written in February 1929. The company was organized late in the fall of the preceding year, but had not been able to get the preliminary details arranged in time to begin actual selling until that time. And these preliminary details seemed at first to be almost insurmountable obstacles.

No Trained Agents

In the first place, there were no trained agents available. Our sales organization had to be built completely from raw material. It was recognized from the start that the "high-pressure" type of insurance salesman would not be compatible with the ideals of Country Life. For that reason inexperienced men were the only ones available. They were selected from the various counties on their records, and a series of intensive training schools conducted, not only to teach them the advantages of Country Life, but to instill in their minds the very fundamentals of life insurance practice.

Officials of the Illinois Agricultural Association were not interested in building their foundations half way. They knew the need of the Illinois farmer for a sound, stable life insurance, and they believed the farmer would take advantage of his opportunity to obtain such life insurance, once it was presented to him. For that reason they built the foundation to support a truly big company, in every sense of the word. Today the wisdom of such a course is evident to the most casual observer.

Not only had Country Life to build a sales organization, in the old days, but it had also to overcome doubts that existed among farmers themselves. Old line insurance companies, some of whom were planning on getting a large amount of farm business, spread propaganda against the idea. Even some Farm Bureau members were doubtful whether in such a specialized, complicated business as life insurance it would be possible for a co-operative farm organization to succeed and it took months to prove to them that their attitude was a mistaken one.

Complete Confidence

Country Life has enjoyed the complete confidence of Illinois farmers, and while there are scores of cases that could be cited where Farm Bureau members signed policy applications, largely from a sense of loyalty, the great majority had confidence in the Illinois Agricultural Association which made the company possible. As Country Life has continued to grow and develop doubters have been convinced of its soundness and merit and have taken out two and even three additional policies, largely on the strength of the Country Life record.

The opposition of other insurance organizations has all but disappeared. They needed only to be convinced that Country Life was a sound, conservative organization, and that it was not founded on the promotional idea as so many companies have been in the past, companies, by the way, which have almost wholly disappeared due to the increasing stringency of state insurance laws and state insurance supervision.

At the close of the year 1929, in which we had about 11 months of actual operation, Country Life Insurance company had in force approximately $19,000,000 of insurance. The increasing efficiency of its sales force, and the growth of public confidence in the organization was revealed at the close of 1930 when Country Life's insurance in force had increased to $35,000,000. In 1931 it had further increased to $43,000,000; in 1932 it totalled $47,500,000 and the figure this year, according to present indications, will approximate $54,000,000 or more, an increase of about $7,000,000 during one of the worst business years in the country's history.

Term To Age 65

Some of this increase, doubtless, has been due to the fixed policy of Country Life that its sole reason for existence is to serve its policyholders. In 1932 the officers of the company realized that due to the declining prices of farm products, it was becoming more and more difficult to write life insurance. The demand for insurance was growing every day, farmers particularly realized the value of protection for the family in the case of death. Economic conditions, however, were such that they could not afford to pay premiums, no matter how urgently the protection was needed. In response to this need, Country Life brought out and made available its so-called "Term to Age 65" policy. This policy enabled the applicant to obtain complete protection through a term insurance policy at an exceptionally low rate and under the contract convert his policy at any time before he reached 65, to some other standard form more adapted to his particular needs.

Know Farmer's Needs

Today the agents of Country Life Insurance company number about 3,200 individuals, located in virtually every county in Illinois. In each county, in addition, where there is an organized Farm Bureau, this Bureau acts for the company in the capacity of general agent. The individuals include general and special agents, the former devoting their full time to life insurance work, the latter working on a part time basis. A majority of these general and special agents, either are farmers at the present time, or they have been farmers at some period during their lives. This type of agent has been found to be the most successful for the reason that he understands the purposes for which the farmer needs life insurance, he understands the problems of the farmer from a standpoint of paying premiums, and he is able therefore to select the most equitable and advantageous contract for his prospect, and the one which will in all probability be of the most value to the policyholder.

By the end of 1931, the Country Life Insurance program was so far advanced that it had come to the forefront among the largest and most successful of Illinois companies, and during the year 1932 it gained the distinction of making the largest proportional gain in life insurance of any life company in the United States.

One of the factors in Country Life's success, which has attracted nation-wide attention among life insurance executives, is its amazing mortality record. During 1932 this record of death claims amounted to only about one-fourth of the average expectancy—that is, death claims totalled numerically about one-fourth of what the average would be in the entire United States. This is due to the sound policy of the medical department of the company under the direction of Dr. John A. Boland.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL MUTUAL INSURANCE CO.

NOTICE is hereby given that the annual meeting of the members of Illinois Agricultural Mutual Insurance Company will be held on Wednesday, the 24th day of January, 1934, at the hour of 1:00 o'clock p. m., at the New Hotel Wolford, Danville, Illinois, to elect directors, receive, and if approved, confirm the report of the board of directors of the company for the fiscal year ending December 31, 1933, and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the company; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, November 20, 1933.

GEORGE F. TULLOCK, Secretary.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL AUDITING ASSOCIATION

NOTICE is hereby given that the annual meeting of the members of Illinois Agricultural Auditing Association will be held on Wednesday, the 24th day of January, 1934, at the hour of 10 o'clock a. m., at the New Hotel Wolford, Danville, Illinois, to elect directors, receive, and, if approved, confirm the report of the Board of Directors of the Association for the fiscal year ending December 31, 1933 and to consider and, if approved, ratify and confirm all the acts and proceedings of the Board of Directors done and taken since the last annual meeting of the members of the Association; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, November 20, 1933.

GEO. E. METZGER, Secretary.

NOTICE OF ANNUAL MEETING OF ILLINOIS FARM BUREAU SERUM ASSOCIATION

Notice is hereby given that the annual meeting of the members of Illinois Farm Bureau Serum Association will be held on Wednesday, the 24th day of January, 1934, at the hour of 10:00 o'clock a. m., at the New Hotel Wolford, Danville, Illinois, to elect directors, receive, and, if approved, confirm the report of the Board of Directors of the Association for the fiscal year ending December 31, 1933; and to consider and, if approved, ratify and confirm all the acts and proceedings of the Board of Directors done and taken since the last annual meeting of the members of the Association; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, November 20, 1933.

RAY E. MILLER, Secretary.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL HOLDING COMPANY

NOTICE is hereby given that the annual meeting of the stockholders of Illinois Agricultural Holding Company will be held on Wednesday, the 24th day of January, 1934, at the hour of 11:00 o'clock a. m., at the New Hotel Wolford, Danville, Illinois, to elect directors, receive, and, if approved, confirm the report of the board of directors of the company for the fiscal year ending December 31, 1933, and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the company; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, November 20, 1933.

GEORGE F. TULLOCK, Secretary.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL ASSOCIATION

NOTICE is hereby given that the annual meeting of the members of ILLINOIS AGRICULTURAL ASSOCIATION will be convened at the New Hotel Wolford, in Danville, Illinois, on the 25th day of January, 1934, at 9:00 o'clock a. m., for the following purposes:

For the consideration and vote upon approval and ratification of the reports of the president, secretary and treasurer of the Association, and the acts of the board of directors and officers in furtherance of the matters therein set forth, since the last annual meeting of the members of the Association.

To approve, ratify and confirm the several purchases heretofore made by this Association of stocks and evidences of indebtedness of corporations whose activities will directly or indirectly promote agriculture or the interests of those engaged therein.

To secure consent and authorization to acquire on behalf of this Association, by purchase, certain stocks and evidences of indebtedness of corporations whose activities will directly or indirectly promote agriculture or the interests of those engaged therein.

To elect eight members to the board of directors for two-year terms.

To elect a president and vice-president.

To consider any proposed amendments of the articles of association or of the by-laws of Illinois Agricultural Association as may be properly submitted.

For the transaction of such other business as may properly come before the meeting.

Dated at Chicago, Ill., November 20, 1933.

GEO. E. METZGER, Secretary.

NOTICE OF ANNUAL MEETING OF ILLINOIS FARM BUREAU BASEBALL LEAGUE

NOTICE is hereby given that the annual meeting of the members of Illinois Farm Bureau Baseball League will be held on Wednesday, the 24th day of January, 1934, at the hour of 9:30 a. m. at the New Hotel Wolford, Danville, Illinois, to elect officers and directors, receive, and, if approved, confirm the reports of the officers and executive committee of the League for the fiscal year ending December 31, 1933 and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the League; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, November 20, 1933.

E. G. THIEM, Secretary.

FARMERS MUTUAL REINSURANCE COMPANY ANNUAL MEETING

The annual meeting of the Farmers Mutual Reinsurance Company will be held at the New Hotel Wolford, Danville at 3:00 P. M. Wednesday, January 24, 1934.

The annual reports of officers will be made and directors elected for the coming year. Policyholders are cordially invited to attend the meeting.

By Oct. 16 the A. A. A. had distributed nearly $90,000,000 to southern cotton growers as benefit payments for acreage reduction. It is estimated that approximately $111,000,000 will be paid out.

Plan New Regulation of Buses and Trucks

Farmers Hauling For Hire Would Come Under The Proposed Act

A new motor carrier law has been prepared by the Illinois Commerce Commission to license and regulate motor truck and bus operators, also contract haulers. It will probably be introduced in a special session of the General Assembly.

Under the proposed law the commission would have power and authority, and the duty, to supervise and regulate every motor bus and truck hauling for hire in Illinois, to fix or approve rates, fares, charges, etc. and to establish rules and regulations pertaining thereto.

Each regular motor carrier would be required to obtain a permit and to submit to the regulations of the commission.

The commission would have full power and authority, and the duty, to supervise and regulate all "contract haulers" which would include farmers or others who contract to haul livestock, grain, fruit and vegetables and other farm products for hire. The bill would not apply to farmers who haul their own products.

The motor carrier would be required to pay a $20 application fee and contract haulers would be required to pay a fee of $10.

In addition to all other taxes and license fees a tax would be imposed upon motor carriers, interstate carriers, and contract haulers at the rate of one mill per ton mile of travel.

Each motor carrier or contract hauler also would be required to file with the commission a sworn statement and a security, indemnity or bond guaranteeing the payment by such carrier of damages resulting from accidents due to the negligent use or operation of the vehicle.

The I. A. A. was represented by G. W. Baxter at a hearing on the bill in Chicago Nov. 6. A further hearing was set for Nov. 20. The I. A. A. legal department is studying the proposed legislation and will participate in further hearings.

Substitution of dolomitic limestone for sand as filler in mixed and nitrogenous fertilizers which contain acid-forming ammonium salts, helps to prevent the harmful increase of acidity in many soils that are already too acid, according to the U. S. Bureau of Chemistry and Soils.

Come To The Annual Meeting

Prepare For Victory Celebration at 18th I. A. A. Convention in Danville, Jan. 24-25-26

CORN loans, the corn-hog adjustment program, the money problem, plans for wheat acreage reduction in 1934, farm credits, and the question what is in store for the farmer in the next five years are among the leading problems that will be discussed at the coming 18th annual meeting of the Illinois Agricultural Association and associated companies in Danville, Jan. 24-25-26.

When the convention opens, congress will have been in session several weeks, and by that time the future plans of the administration and congress toward restoring parity prices for farm products will likely be more clearly defined.

The program of the convention, therefore, will be built with the idea of bringing up-to-date information to Illinois farmers on current issues and problems, on the administration of the Agricultural Adjustment Act affecting this state, on government efforts toward restoring an honest debt-paying dollar, and on federal farm credits.

The coming meeting promises to be a real victory celebration with an outpouring of members from every part of the state which contributed so heavily in influence, money, and man power toward securing the enactment of the Agricultural Adjustment Act. With aggressive administration it is believed that the act has far more possibilities for restoring farm prices than have yet been tried.

As this is written, it is still too early to make definite announcements regarding speakers and other details of the program. Chester C. Davis, Administrator of the Agricultural Adjustment Act, will speak at the annual banquet on Thursday night. Edward A. O'Neal, president of the American Farm Bureau Federation, will be another banquet speaker. Mr. O'Neal will undoubtedly come from the national capital where he will be when congress convenes directly after New Year's Day. Other speakers will be announced later.

Reservations

Do it now. Send in reservations for delegates and members from your county to Otis Kercher, farm adviser, Danville, Ill.

Otis Kercher, Vermilion county farm adviser, reports that all will be in readiness to take care of a record crowd. Danville is a hospitable city with plenty of excellent hotel accommodations. It is situated on main highways both north and south, and east and west. It is also easily reached by train from all sections of the state being on the main line of the C. & E. I. between Chicago and the south, and on the Big Four east and west.

There will be little variation in the schedule of meetings of associated companies and organizations on Wednesday, Jan. 24. The annual meeting of the State Farm Bureau Baseball League tentatively is being set for 1:00 P. M. instead of the customary 9:30 to 10:00 A. M. The Serum Association and the Auditing Association are expecting to start their meetings in the morning. Country Life Insurance Co. will have a conference for agents, and Illinois Farm Supply Co. will sponsor a get-together and conference for managers and directors of county service and supply companies.

The annual meetings of the Illinois Agricultural Mutual Insurance Company and Farmers Mutual Reinsurance Company are scheduled for Wednesday afternoon, and on Wed-

I. A. A. Proposes Revenue Amendment To Constitution

Board of Directors Approves Principles of Measure Submitted To State Commission

THE board of directors of the Illinois Agricultural Association recently approved the principles of a proposed amendment to the revenue article of the constitution and authorized the officers to make such changes in the wording as they thought advisable before sending it to the State Revenue Commission recently appointed by Governor Horner.

The amendment proposed by the Association is as follows:

RESOLVED, BY THE ..... OF THE FIFTY-EIGHTH GENERAL ASSEMBLY OF THE STATE OF ILLINOIS, THE.....CONCURRING HEREIN, That there shall be submitted to the electors of this state for adoption or rejection at the next election of members of the General Assembl·· of the State of Illinois, in the manner provided by law, a proposition to amend Article IX of the Constitution, by amending Sections 1, 2, 3, 9, 10 and 12 thereof and by adding Section 14 thereto, these amended and added sections to read as follows:

ARTICLE IX

Sec. 1. The General Assembly shall provide such revenue as may be needful, in such manner as it shall, from time to time, direct by general law, uniform as to the persons, property, subjects or objects of taxation, or class or sub-class thereof, upon which it operates.

Sec. 2. The property of the State, counties and other municipal corporations, and such other property as may be used exclusively for agricultural and horticultural societies or for school, religious, charitable or cemetery purposes, and any other property or any class or sub-class thereof, designated by general law, may be exempted from taxation. In the assessment of real estate encumbered by public easement, any depreciation occasioned by such easement may be deducted in the valuation of such property.

Sec. 3. Except for the payment of indebtedness existing at the adoption of this amendment, and of indebtedness thereafter incurred by authority of a vote of the people of the State, county or other municipal corporation incurring the indebtedness, the aggregate of general taxes upon tangible property for all purposes for any one year on any such property situated within any city, village or incorporated town shall never exceed one per centum of its fair cash value, and on any such property not situated within any city, village or incorporated town shall never exceed four-fifths of one per centum of its fair cash value.

The General Assembly, shall, by general law, provide for an equitable allocation of the tax rates for taxes which may be levied upon tangible property for general purposes, among the several taxing bodies authorized to levy such taxes, and for proper supervision of tax levies, expenditures and the power to incur indebtedness.

Sec. 9. The General Assembly may vest the corporate authorities of cities, towns and villages with power to make local improvements by special assessment, or by special taxation of contiguous property, or otherwise. For all other corporate purposes, all municipal corporations may be vested with authority to assess and collect taxes; but such taxes shall be uniform in respect to persons, property, objects and subjects of taxation, or any class or subclass thereof, within the jurisdiction of the body imposing the same.

Sec. 10. The General Assembly shall not impose taxes upon municipal corporations, or the inhabitants or property thereof, for corporate purposes, but shall require that the municipal corporations impose taxes for the payment of debts contracts under authority of law, such taxes to be uniform in respect to the persons, property, objects and subjects of taxation, or any class or sub-class thereof, within the jurisdiction of the body imposing the same. But the General Assembly, by general law passed by vote of two-thirds of the members elected to each House, may provide for the distribution in whole or in part of taxes collected by the State, among the counties and other municipal corporations of the State. Private property shall not be liable to be taken or sold for the payment of the corporate debts of a municipal corporation.

Sec. 12. No county, city, township, school district, or other municipal corporation, shall be allowed to become indebted in any manner or for any purpose, to an amount, including existing indebtedness, in the aggregate exceeding five per centum on the value of the taxable property therein, to be ascertained by the last assessment for State and county taxes, previous to the incurring of such indebtedness. Nor shall any indebtedness be incurred unless a proposition therefor is first submitted to a vote of the people of such county, city, township, school district, or other municipal corporation, and is approved by a majority of those voting on such proposition. Any county, city, school district, or other municipal corporation incurring any indebtedness as aforesaid, shall before, or at the time of doing so, provide for the collection of a direct annual tax sufficient to pay the interest on such debt as it falls due, and also to pay and discharge the principal thereof within twenty years from the time of contracting the same. This section shall not be construed to prevent any county, city, township, school district, or other municipal corporation, from issuing their bonds in compliance with any vote of the people which may have been had prior to the adoption of this Constitution in pursuance of any law providing therefor.

Sec. 14. In order that no inconvenience may arise from sections 1, 2, 3, 9, 10 and 12, as herein amended and that adequate time may be given for the enactment of legislation based upon such amendment and for judicial determination of the validity of such legislation, no law based upon the amendments herein made shall take effect prior to January 1, 1936, except insofar as may be necessary to provide for putting such law into effect on such date and for the administration thereof. None of the provisions of sections 1, 2, 3, 9, 10 and 12 as herein amended shall invalidate or in any way affect any tax levied or indebtedness incurred prior to January 1, 1936.

$25,000,000 For Putting Unemployed On Land

A total of $25,000,000 has been appropriated under the NRA to take people out of industrial centers and place them on the land on small farms for self-support. M. L. Wilson, former wheat administrator, has been placed in charge of this work.

Some people believe that the big cities are more in need of city relief than the rural sections are in need of farm relief, Prof. Wilson said in a recent address. We hope to shift the unemployed in the industrial centers to good farm land so they may provide their own subsistence.

An experimental area of 1,200 acres has been secured near the coal fields in West Virginia which is being divided into small plots of three to six acres each. A factory building has been erected where the new settlers may work part time in producing needed factory products when they are not busy producing food for their own use.

The Peoria Producers Dairy

This Fast-Growing Co-operative Is the Farmers' Answer to Dealer Domination

By "Jack" Countiss, Director Dairy Marketing

AS this is written, organized milk producers in the Peoria milk shed have one of the fastest-growing milk distributing co-operatives in the country with 17 or more trucks on the street daily and are pressing for third place among the distributors in this thriving city of 100,000 people.

All this has been accomplished in the short time of four months or less, and grew out of the unreasonable demands of certain dealers who refused arbitration apparently because they are out to swell their profits to unreasonable heights at the expense of the farmers.

On Dec. 1, the Producers Dairy was bottling milk at the rate of 3,000 quarts per day and volunteer solicitors were calling on Peoria consumers daily picking up new business.

"We have practically no complaints on either quality of our milk or upon service," writes Wilfred Shaw, manager. "We rarely have a customer quit and all we need is additional volume of business which is gradually being obtained through solicitors who are being provided at no expense to the company, by members of our various local units.

"There is no doubt that at the present rate of growth this dairy will soon be the third largest in the city and possibly the second largest by the first of the year."

The story of the Illinois Milk Producers Association, the farmers organization, which set up and made possible the Producers Dairy is an interesting one. Organized by the Illinois Agricultural Association and County Farm Bureaus in the Peoria territory about seven years ago, the association was effective as a collective bargaining organization for many years in getting reasonable prices for the farmers who belonged. The base and surplus plan was followed from the beginning in an effort to control production in line with market demands.

Dealer Activities

In the beginning the Association sold milk to eleven dealers but one dairy, Roszell, began buying up other dairies until recently there were only four left. In the meantime, the Roszell Company not only eliminated a lot of competing dairies but became part of National Dairy Products Corp., the national chain.

Dairy farms were established in the milk shed which were directly or indirectly controlled by the dairies through financing, contracts, or direct ownership. These farms refused to deal with the farmers association because they received base price for all of their milk and association members were forced to sell approximately 50% of their milk at butterfat prices or about 1¼c per qt.

The Association members who had purchased cows and necessary equipment for producing high quality milk did not believe it was fair to their membership to have the dealers put in cows and compete with them on a market they were endeavoring to hold up by taking surplus price, or about 75c per 100 lbs. for 50% of their milk. In the meantime the dealers had insisted that the Association should get rid of the "straw stack" farmers, a name they applied to small producers the Association was attempting to take care of.

They insisted that if it were not for the tremendous amount of surplus which the Association insisted on selling to them at 75c per 100 lbs. or about 50c per 100 lbs. net at farms, they thought they could pay more than 3½c per quart for base milk which they were retailing for 10c per quart. They even informed the Association's management that unless some disposition was made of the "straw stack" farmers they would

PART OF THE FLEET OF TRUCKS OF PEORIA PRODUCERS DAIRY

Only a few months old, the Peoria Producers' Dairy owned and controlled by the organized milk producers has shot ahead as an important factor in the Peoria milk market. At present rate of growth it will soon rank third and promises to rank second within a few months. More than 3,000 quarts of milk daily are being sold direct to the consumer.

be forced to charge them 15c per 100 lbs. for separating this milk. This would mean the farmer received a gross price of approximately 75c per 100 lbs. for one-half of his milk delivered to the dealers platforms, less 25c for hauling, less 15c for separating and he would have net at the farm, approximately 35c per 100 lbs. for his milk.

The Pet Farms

At the same time, the dealers were assisting in the development of certain farms which were receiving the so-called "base price" for all of their milk. Thus, in order to protect the interest of the so-called "straw stack" farmers, the Association was forced to equip a surplus milk plant for its members to handle this milk. Separators, churns, vats and all necessary equipment was installed. The milk was separated, the cream churned into high quality butter and the skim milk was either returned to the farms or manufactured into casein. By such a system the farmers' organization was in a position to pay much more than 35c per 100 lbs. net for the members' milk.

After handling this milk for a few weeks the dealers decided they could pay more money for this milk. The Illinois Milk Producers Association was set up not to operate plants unless forced to do so but to market high quality milk of their members for the most money possible, thus, when the dealers agreed to pay more money for surplus milk than our own plant could pay, the Association let them have it. But in the meantime the dealers had forced the farmers to equip a plant to handle their surplus milk. It then became necessary to supply this plant with sufficient butterfat to operate it economically and in such a way that it could operate and make money for its farmer owners. It is so equipped that it can handle all of the milk on the market if necessary.

The Spare Tires

This situation along with the Rock Island controversy, had tremendous influence in the launching of a state-wide chain of co-operative creameries and surplus milk plants, known as the Illinois Producers' Creameries which now has plants in active operation in the Rock Island area, Peoria and Bloomington.

Although the Peoria market was being supplied with an abundance of high quality milk, and the producers were agreeable to a program of selling all of their milk to the dealers and taking surplus prices for 50% of it and $1.65 for remaining one-half, the dealers continued their "cow deal." In addition they insisted on going outside the milk shed and buying 38,000 lbs. milk daily, using this as they said for a SPARE TIRE.

Our members said they didn't see anything wrong with a fellow carrying one spare tire but when they insisted on carrying a whole set of tires as "spares," it wasn't a normal state of affairs. Either the driver had in mind getting off the straight wide smooth road and getting into a crooked rocky road among the hills, or he expected to blow off the tires he had.

The Association believed that the Peoria market should be maintained for the nearby producers and that there should be no "pet farms" receiving all base price but that all producers should share the market equally and that this market should not be replaced by milk brought in from outside the trade territory to further reduce the small proportionate amount of remaining base which the members had.

The dealers continued these tactics and after weeks of unsuccessful negotiations in which the producers agreed to arbitrate the entire matter, they were forced to find a market for their milk other than that of the local distributors who were buying milk from farms 75 miles away.

The Members Voted

The members were called together and told that it was their milk, their market and they were the ones that received the milk checks; that the board and management had been unable to get any kind of a deal with the dealers; that their last and most powerful weapon had not been used—that of putting our own milk on the doorstep of the consumer. The members, nearly 1,000 strong, were unanimous in their decision to follow this latter plan.

Nine thousand three hundred dollars worth of stock was purchased that night and within 10 days $28,000 of Peoria Producers Dairy stock had been bought by the members. A small plant and business known as "The Little Brown Dairy" was purchased by the producers. The I. A. A. and the Mississippi Valley Milk Producers (a federation of milk co-ops.) again endeavored to get the groups together but after two weeks negotiations in which both dealers and producers had agreed on an 11c retail price and $2.00 to producers for base milk with all farms on an equal basis, the dealers walked out and refused to even discuss the proposition further.

During these negotiations, meetings had been held between the Mississippi Valley Milk Producers, and the Illinois Milk Dealers Association, for the purpose of jointly working out a milk code for the State. We were informed by their secretary that they would not co-operate on this program until the Peoria situation was satisfactorily settled, yet they could not find time to go to Peoria "at our invitation" to render any assistance in settling the controversy. Thus, the interest of other fluid milk markets was jeopardized because of this "stalling" program of the State Dealers Association.

Thus, the only course left open to the producers was to go in business. Loyal members came to town and solicited from house to house. Within a few weeks volume was increased 300%. It has become necessary to install more equipment and move the office headquarters to another building. Ei hteen trucks are now carrying a full line of Peoria Producers milk, cream, cottage cheese, butter and eggs direct to the consumers. This is another example of where greedy distributors have forced the producers against their will to go direct to the consumer with his products.

Co-op. Creamery In Rock Island Area Debt Free

In a recent letter to Western Illinois Farm Bureaus, F. J. Watson, manager of the Farmers Co-operative Dairy Products Company, one of the three co-operative creamery plants associated with Illinois Producers' Creameries, which is serving the Rock Island territory, stated that the cost of the plant equipment as it stands is approximately $13,000.

"We met with some disappointments as most individuals and business concerns did during the epidemic of bank failures," said Mr. Watson. "Our loss was a little more than $5,600. Along with this and other unavoidable expenses due to dealer opposition in our territory we have still been able to forge ahead, have covered all losses, met all our obligations and at present we have only one more payment to make and our plant will be clear of all indebtedness. We could write this check tonight and still have some working capital left.

"This is what can be done with volume and a loyal membership. A loyal membership is the greatest asset a co-operative can have.

Edw. O'Neal Re-elected President of A. F. B. F.

Earl C. Smith Re-elected Director From Illinois at National Convention In Chicago

EDWARD A. O'NEAL of Alabama was re-elected president of the American Farm Bureau Federation and Charles E. Hearst of Iowa, vice-president at the annual meeting of the organization in Chicago Dec. 11-12-13.

Directors elected or re-elected for a two-year period include C. R. White, New York; Geo. Putnam, New Hampshire; Earl C. Smith, Illinois, M. L. Noon, Michigan; Murray Lincoln, Ohio (director at large); J. F. Holsinger, Virginia; and R. W. Blackburn, California. Mr. Holsinger is the only new director chosen. Holdover directors are W. H. Settle of Indiana; J. F. Porter, Tennessee; W. T. Spargo, New Jersey; A. J. Olson, Minnesota; L. E. Freudenthal, New Mexico; J. D. Yeager, Nevada; and Frank Dimmick, Louisiana.

The convention was one of the best ever held in the history of the federation. While there has been a loss in membership during the past two years delegates reported that membership is on the increase. It was a harmonious gathering. Secretary of Agriculture Henry A. Wallace; Administrator Geo. N. Peek; and Governor W. I. Myers of the Farm Credit Administration spoke to a packed house in the ballroom of the Sherman Hotel, Dec. 12. President O'Neal read a special message from President Roosevelt on the opening day.

Secretary Wallace covered much the same subject matter and repeated statements made in previous speeches heretofore reported. The address of Geo. N. Peek is reproduced elsewhere in this issue.

President O'Neal's annual message was a carefully prepared and ably presented review of the Farm Bureau's part in securing the far-reaching legislation enacted by the Congress last spring. Other interesting addresses were made by Gov. McNutt of Indiana. Prof. M. L. Wilson, C. V. Gregory, Albert S. Goss, Miss Mary Mims of Louisiana, and Connie J. Bonslagel of Arkansas.

At the board meeting following the convention, a committee of three including Earl Smith of Illinois, R. W. Blackburn of California, and C. R. White of New York were chosen to work with President O'Neal in revising the budget and making recommendations to the next meeting of the board. No action was taken regarding the suggestion that headquarters of the Federation be moved to Washington, D. C.

Resolutions adopted by the board of delegates the last day of the convention largely reiterated previous declarations of the organization. Support was given the monetary policies of President Roosevelt. While appreciation was expressed for the "sincerity of purpose generally shown by those charged with administration of the Agricultural Adjustment Act," one resolution stated "that delay in administering certain provisions of the Act is resulting in the bankruptcy of many more farmers and cannot be further condoned." Taxation, farm credits, freight and utility rates, bank guaranty of deposits, tariffs and exports, direct buying of livestock, grain exchanges, T. B. eradication, roads, agricultural education, production control, licensing power under the AAA of processors, and export debentures were among the more important subjects covered by other resolutions. The complete resolutions are published in the A. F. B. F. weekly news letter and copies may be had by writing the office at 58 E. Washington St., Chicago.

C. P. Cummings Goes To Farmers National, Peoria

Chas. P. Cummings, formerly general manager of the Illinois Grain Corporation, has been employed by the Farmers National Grain Corporation as manager of their Peoria office and plant, one of the important branches of the nation-wide co-operative organization. President G. C. Johnstone has been acting as manager pending the appointment of a successor. Mr. Harrison Fahrnkopf will continue to direct organization and field activities.

Mr. Cummings, a grain man for more than 25 years, won the confidence of farmers elevator managers and producers throughout the state as shown by the constantly increasing volume of grain marketed co-operatively through the Illinois and Farmers National Grain Corporations. Last year the two organizations handled together more than 15,000,000 bu. of grain from this state.

Mr. Fahrnkopf assisted by F. D. Barton and O. D. Brissendon has been a tireless worker in the acquisition of elevator members with the result that approximately 150 country elevators are now members of Illinois Grain Corporation.

In his new position, Mr. Cummings will be in a position to maintain close contact with managers of member elevators and render assistance in securing the best possible prices for grain.

Come To The Eighteenth I. A. A. Annual Meeting

(Continued from page 3)

nesday night, the annual dinner for Farm Bureau presidents and farm advisers will be held as in past years, for which Mr. Kercher is planning some special entertainment.

Members of the Illinois Agricultural Association have a supreme voice in the affairs of the organization. Theoretically all membership institutions, corporations, mutual insurance c- ıpanies, etc. are controlled by their members, policyholders, or stockholders. Actually many of them are run by a few individuals for their own selfish ends.

But the I. A. A. and all the associated companies are real co-operatives, co-operative in operation and principle. The members elect the board of delegates. The delegates choose the elective officers and half the board of directors annually. Further, every member has an opportunity to come to the annual meeting and offer suggestions or criticism for the good of the organization.

This year as in past years, Thursday afternoon will be set aside for sectional conferences the time of which will be largely given to a discussion of the various policies and projects of the association by members.

The printed reports of the I. A. A. and associated companies with complete financial statements will be distributed at the close of the Thursday morning session following the annual address of the president, and the secretary's and treasurer's reports.

The annual banquet is scheduled to be held Thursday night in the Danville Armory where the larger general sessions also will be held. The Armory has been remodeled inside to make it easy for speakers to be heard. In addition it will be equipped with a public address system. Headquarters for the meeting will be the Hotel Wolford.

For every four families who in 1929 had earnings of less than $1,200 a year in Birmingham, Detroit and Pittsburgh there were 11 families below that level in 1932, according to the U. S. Public Health Service.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Corn Loans Going Out

CORN loans at 45 cents per bushel by the Commodity Credit Corporation are bringing the first substantial relief to many Illinois farmers under the Agricultural Adjustment Act. By Saturday night, Dec. 16, the Reconstruction Finance Corporation at Chicago had sent out a total of $1,121,000 in cash on corn loans into Illinois and Iowa farm communities. And this is only a beginning. Combined with wheat benefit checks now coming into Illinois, and the first cash payments for corn-hog reduction which should start flowing early next year, this new money promises to put new life into trade throughout the corn belt. The effect is already apparent. Downstate bankers and merchants report increased activity in buying and payment of debts. Another important index is Farm Bureau membership which has improved perceptibly in the past two months. The livestock feeding sections are still suffering from abnormally low prices but these, it is hoped, will soon be benefited by the corn and hog adjustment payments which for this state are estimated at nearly $40,000,000. Thus with $2,618,000 of wheat checks, a potential $45,000,000 of corn loans, and $40,000,000 of corn and hog payments coming in the next 15 months the value of the Agricultural Adjustment Act, which is largely the result of the Farm Bureau's 12 year fight for government recognition, can no longer be doubted.

There Must Be A Job Ahead

THE only excuse for organization is to get things done—to accomplish some worthy end. Failure to observe this simple principle is the primary reason why so many organizations die. Reporting her experiences in organizing farm women before the recent A. F. B. F. convention, the state home demonstration agent of Arkansas, Miss Bonslagel, gave epitaphs collected from the graves of organizations she has known. Following are a few of them: "We mistook the means for the end," "I was talked to death," "I died of serious and learned papers," "Leadership from outside the group proved fatal," "I died of program jitters, trying to save the world all at once," etc.

Organization receives its greatest support when it is striving to accomplish something, particularly if the members are taking an active part in the project. Organization fails when it has no program. It must know what it wants and fight, if necessary, to achieve the goal. Having accomplished, it cannot rest on its laurels. It must go on to new fields of endeavor or decay will result.

Debts And Stable Money

ANOTHER lesson the last few years have taught us is that we are often too ready to go in debt. There is much truth in the quip, "people run in debt and crawl out." Until some measure of stability in prices is secured through a commodity dollar, or otherwise, careful investors will not buy farms or any other costly property, on a shoestring, particularly in periods of prosperity. Recent experience certainly justifies experimentation toward establishing an honest dollar that does not greatly fluctuate in buying and debt-paying power. The human misery caused by every sharp decline in prices and income is a challenge to statesmanship. The right of property ought to be protected, but ownership should be the result of honest work and thrift, not mere speculation.

Overproduction In Holland

HOLLAND'S famous flower bulbs, once the pride of the nation, are now a drug on the market after having made fortunes for many growers, reports the Reader's Digest. Recently, in the Haarlem region, hundreds of thousands of tulips, hyacinths, and narcissi were destroyed—the object being to reduce the supply and increase prices. The Netherlands had a boom in bulbs comparable to our stock market and Florida real estate speculations. Prize bulbs sold for fabulous sums. More and more people went into growing bulbs to get rich quick. And with the usual result. The purebred livestock industry in this country had a similar experience during the post-war period. Whenever the price of anything gets out of line with its normal utility value, watch out.

To Speed Corn-Hog Checks

PLANS to speed the first payments on corn and hog reduction contracts, announced by Dr. A. G. Black of the A. A. A., is welcome news to Illinois farmers. By signing a "rider" sheet in which the grower agrees to accept any corrections and adjustments in his production figures as may be found necessary, prompt mailing of checks is made possible. Otherwise payments would be held up pending a thorough check-up both in the county and at Washington. Benefit payments will be particularly welcome to hog producers because of present low hog prices in which the processing tax of $1.00 per cwt. is reflected.

Farm Advisers Report Many Ask For Loans

Reconstruction Finance Corporation, Chicago, Sends $1,121,000 In Cash Into Illinois And Iowa First Week

Reports from county advisers received by the I. A. A. Record indicate that thousands of farmers in all of the major grain producing counties are taking advantage of the federal loans of 45 cents a bushel on corn stored in sealed cribs on the farm.

Estimates as to the percentage of farmers holding corn who will apply for loans vary in the different counties from one up to 75 to 80 per cent.

J. E. Harris, farm adviser of Mercer county, believes that the loan of $1125 on 2500 bushels of corn made to E. R. Pattison through the Seaton State Bank on December 11 is the first loan to be cleared in the state.

Guy Husted of Cass county estimates that 75 per cent of farmers having corn will apply for loans in that county.

Edwin Bay of Sangamon county estimates that 30 per cent will apply for loans; R. J. Laible of McLean county estimates 50 to 75 per cent. "If the price of corn stays low for another two or three weeks probably 25 or 30 per cent of our farmers will apply for loans," writes G. F. Hoover of Douglas.

C. E. Johnson of Iroquois county estimates that 60 per cent of farmers having corn there will apply for loans; A. A. Olsen, Warren county, estimates 50 to 60 per cent; S. S. Davis put the figure at 50 per cent for Piatt county; H. M. Christian, Massac county, not to exceed five per cent; Shelby county around 50 per cent of those holding corn; Livingston county 50 per cent; McDonough 25 per cent estimated by R. C. Doneghue; Henderson 65 per cent; Mason county 50 per cent, according to C. S. Love; R. N. Rasmusen, DeKalb county, estimates that 15 per cent in that county will apply for loans; Alfred Tate, Scott county, estimates 15 per cent; F. H. Shuman, Whiteside county, 20 to 25 per cent. Shuman reports that sealing started Dec. 11 when 150 farmers had applied for loans.

In Tazewell county G. H. Iftner reports that 95 had applied for loans on Dec. 14. A. B. Schofield, chairman of the Ford County Warehouse board, stated that applications for sealing ran close to $100,000 the first day the board met. "It looks like 80 per cent of the corn in Ford county will be sealed for loans. Farmers throughout Illinois should appreciate the work of the I. A. A. in securing the enactment of the State Warehouse Act, continued Mr. Schofield. We estimate that our farmers will net about 6¾ cents a bushel more for corn than farmers in Indiana and other states which do not have such an act."

A total of 420 farmers in McLean had applied for sealing of cribs on Dec. 14 when 110 loans had already been made on 250,000 bushels.

A number of county advisers reported that banks were hesitant about taking the corn loan paper because they were not familiar with the procedure for discounting the loans through the R. F. C.

The Reconstruction Finance Corporation in the Federal Reserve Bank Building, Chicago, has been swamped with work for more than two weeks. Paper is being cleared as rapidly as possible, however, and money being sent out into rural communities.

On Saturday, Dec. 16, a total of $1,121,000 in cash had been sent out on corn loans mostly in Illinois and Iowa. Forty employees were busy checking paper sent in by country banks and other local loan agencies. The loans are charged to the Commodity Credit Corporation but all details are being handled by the R. F. C.

In extreme northern and southern Illinois comparatively few corn loans will be made judging from farm advisers' reports due to the fact that nearly all corn produced will be used for feeding.

3860 New Members Count Since Dec. 9th

Complete reports as of December 9 indicate that from October 9 to December 9, a total of 3860 new Farm Bureau members were signed and paid for in the State Farm Bureau Mobilization Campaign states Secretary Geo. E. Metzger. In the organization of the campaign, the state was divided into three sections, Northern, Central and Southern. New members, according to sections, are as follows: northern 1489; central 1191; southern 1180.

Several reports have been turned in to the office since December 9. These have not been included in the figures above. Marshall-Putnam is now getting busy, signing members and collecting dues. Henderson county in the week ending Dec. 16 signed 26 new members, making a total of 175 new members—the state record. Mason county signed 12 new members last week, bringing its total during the campaign to 160. Leonard Keith, captain in Mason county, says they are going to reach the 200 mark by January 1. C. H. Wishop, captain in Winnebago county, reports that 23 new members were signed and 39 delinquents restored since the first of December. Cumberland county signed 13 new members last week, bringing its total for the campaign to 53 new members.

Captains should see to it that their membership campaign is wound up under the present agreement on December 31, says Mr. Metzger. Captains and lieutenants, however, may continue until January 6 to sign new members who pay their dues at once and to collect post-dated paper due and payable on or before December 31.

LET'S BUILD FOR STRENGTH

Let's Have More Fun Along with Our Work

By T. W. May, Farm Adviser,
Madison County, Ill.

FARM BUREAU COMMUNITY MEETING MADISON COUNTY

The whole family turns out for an evening of entertainment, recreation, and information.

MANY people wishing to see the Farm Bureau strengthened have expressed the opinion that more should be done to develop social and recreational activities among farm people, and that our program should be balanced to appeal to the entire family.

A number of Illinois Farm Bureaus have been holding successful community meetings with programs designed to interest farm people of all ages. Folks will come to worth-while and entertaining programs. A series of seven meetings held this fall in Madison County was attended by a total of 2,600 people, from grandpa down to the little tots (find 'em in the picture).

The equivalent of 2,606 years of time which would otherwise be spent in growing corn, hogs and wheat will be released to Illinois farm families during the coming year alone as a result of the Government's agricultural adjustment program, according to one statistician. Recreation and leisure are becoming a real possibility for many farm families as the adjustment program goes forward.

Farm life needs more social activity and recreation. A controlled-crop production, quoting Secretary Henry Wallace, and a retreat from surplus acres and surplus toil, will give the whole family not only more money but more time in which to live. Most farm folks, once the opportunity is afforded, will discover within themselves a wide variety of stimulating and pleasant things to do. County Farm Bureaus, through their community leaders, should be encouraging this new development by enlarging their social activities.

Well-planned community meetings can be a decided help in building Farm Bureau membership. Non-members and their families should be invited and urged to attend; it is a lot better for the organization for them to be at the meeting learning what is going on than just staying at home. A program that will include recreation and mix up the crowd after the talks are finished can furnish an opportunity for contacts between members and non-members that is certain to lead to a better understanding. Even when there is no direct attempt to approach the non-member on the matter of membership (indeed this may often be the better policy), he can not help being impressed by being with a large crowd of enthusiastic folks who believe in organization.

Most of us don't realize how few opportunities our farm families have to get together for good entertainment and discussions of matters important in running their business. Too many times we have taken for granted that the women and children would not care to listen to a farm talk. Several of our visiting speakers have had the jitters upon entering a hall crowded with entire families, later to become inspired by the universal interest and attention. The meeting is better in every way if the whole family is there, and the next day when they all talk it over, what one doesn't remember another will. Isn't that better than, at the breakfast table, "Well, Pop, did you learn anything last night while we had to stay home?"

Meetings should be carefully planned in advance. Start on time, and hold the program to an hour and a half. The talks should be about something of practical importance, with a few good licks for organization, agricultural adjustment, and the extension program. Then have something for the folks to do after the program; don't just get up from the seats and go home. Have some kind of recreation, depending upon what the community wants, that will keep the people there and get them better acquainted with each other. Use local talent on the program, with occasional outside speakers of ability. Arrange programs that will pack 'em in, and tell the papers how many attended, so the stay-at-homes will know that "somebody is interested in this Farm Bureau business and we might as well find out what it is all about."

Let's develop the social possibilities of our organization, for in so doing we can help all the other projects, and have some good times, too.

McLean County Wins National A. F. B. F. Trophy

The McLean County Farm Bureau was awarded the custody of a handsome loving cup and a check for $100 for having the largest membership of any county Farm Bureau in the United States. The record for McLean county showed a total of 1,507 paid up members on Nov. 1. Los Angeles Co., California, was a close competitor with 1,501 members. McLean county now has 2122 members, according to Farm Adviser Laible, with more than 1700 in good standing. The silver trophy will become the permanent possession of the county winning it three times. Los Angeles County won last year's contest and San Joaquin County, California, won in 1930 and 1931.

The contest for the honor of a Farm Bureau having the greatest percentage of farmers in the county enrolled went to Nassau County, New York, for the second successive year. But of the 579 farmers in that county, 457 are members of the county Farm Bureau, or a percentage of 78.9. Ventura County, California, was second with 651 farmers enrolled, out of 1,656. The prize in this contest is a cup which becomes the property of the winning county.

To August Berger, of Jasper, Indiana, went the honor of being the champion membership solicitor. Mr. Berger, a voluntary worker, signed up 152 members. Sidney Smith of Altamont, New York and Walter Armstrong of the same place were tied for second place, with 128 memberships. The prize is a handsome medal and a trip to the American Farm Bureau Federation convention.

1933 Experience Shows Value Co-op. Marketing

Harry Day Reports On Sales of Fruits And Vegetables During Past Season

EXPERIENCES of fruit and vegetable growers in Illinois during the past season emphasize the value of co-operative marketing, reports H. W. Day, director of fruit and vegetable marketing for the I. A. A.

Growers who market strawberries, peaches and watermelons through co-operative associations generally secure more money for their products than other growers, he said. The price level of cantaloupes during the past season was low but the fact remains that growers who belong to the Poag and Beardstown co-operatives marketed practically all their cantaloupes while a substantial part of melons grown by non-members were not sold. The officers of our Beardstown association state that if they had not had a marketing association undoubtedly only a very small percentage of the crop grown in that community would have been disposed of.

H. W. DAY

Day states that the truck situation is creating a problem that grows in intensity from year to year. The 1933 peach crop was produced in a limited area of southern Illinois overrun by truck buyers. About 1,000 carlots of peaches were moved by truck from southern Illinois during the past season. Truck peddlers also hauled out large quantities of strawberries, cantaloupes, watermelons and apples. Trucks have largely destroyed the orderly marketing of perishable products with the result that it is becoming increasingly difficult to adjust the supply of fruits and vegetables to market demands in the various cities.

New Co-ops.

The Illinois Agricultural Association established several new co-operatives during the past season including the Edgar County Strawberry Growers Association at Paris, and the Beardstown Melon Growers Association. Assistance was given to other local groups.

The Edgar county association has 44 members involving around 200 acres of berries. The sale of the crop this year was handled through the Illinois Fruit Growers Exchange from a central point in Paris. Approximately 15,000 cases were sold. Eleven cars or around 4,600 cases were shipped by rail and the balance was sold to truck buyers.

PACKING MELONS AT BEARDSTOWN

Careful selection, and packing in standard size crates carrying melons of uniform high quality is an important part of the program of this co-operative organized by the I. A. A. and Cass County Farm Bureau.

The average sale price was $1.40 per 25 quart cases f. o. b. Paris. In the Centralia section more than 5,000 cases of berries were marketed for growers through the Exchange; all were sold to truck buyers.

The Poag Growers Association in Madison county has 33 members and during the past season assembled, graded, packed and sold 45,000 bushel boxes of cantaloupes from their new packing shed. The Beardstown association with 98 members whose acreage totaled around 700 of cantaloupes and watermelons sold more than 20,000 bushel boxes of cantaloupes and the equivalent of 37 carloads of watermelons.

Peaches Sell Well

The Illinois Fruit Growers Exchange which was organized by the I. A. A. 12 yrs. ago handled 309 cars of peaches and an additional 15,000 bushels were sold direct to truck buyers. The crop in the Centralia area was only medium in size and prices were generally satisfactory. The price level ranged from 90 cents to $1.85 per bushel at shipping point. Carlot shipments went in all directions. No market was in a position to take a great number of cars except at low prices.

If Illinois had had an additional 500 acres of peaches available, according to Mr. Day, the price level would have been much lower.

The Exchange marketed 52 carloads of apples. The 1933 crop was one of the shortest ever produced due to unfavorable weather and unusually bad insect and disease conditions. Substitutes for arsenate of lead proved ineffective in controlling the Codling Moth.

Other commodities handled include 10 cars of cabbages, 13 cars of pears and a few cars of other miscellaneous commodities.

The Exchange succeeded during the past year in securing credit for growers, to buy spray materials, packages and other supplies. The loans were repaid out of the proceeds received for products handled through the Exchange.

Mr. Day concludes that if the greater percentage of fruits and vegetables grown in Illinois of standard commodities could be sold co-operatively net returns could and would be substantially improved.

Tobacco Growers Get More Money For Crop

Flue-cured tobacco growers are expecting to receive approximately $75,000,000 more for their crop this year than they received for the 1932 crop and around $60,000,000 more than they got for the 1931 crop, as a result of crop reduction efforts.

In the preliminary sign-up 95 per cent of the growers pledged themselves to sign formal agreements to reduce production to requirements in 1934 and 1935.

Dealers Seek To Break Red Top Seed Co-operative

The M. M. Schultz Seed Company recently circularized members of the Egyptian Seed Growers Exchange and supplied them with the necessary forms to make it convenient for the red top seed growers to withdraw from the Association.

The material sent out included a letter apprizing the members of their opportunity to withdraw between the first and 20th day of October, an envelope addressed and ready for mailing to the co-operative at Flora, and a card addressed to the Exchange carrying the following statement:

"I am informed that a notice has been mailed by you to different seed dealers that I am a member of the Egyptian Seed Growers Exchange as above.

"If I am a member this is to demand of you that such membership be cancelled and further notice that membership is withdrawn and any claimed marketing agreement with me is null and void. This demand shall be effective as provided by the agreement."

Only a small number, less than 100 of the nearly 3000 members of the Exchange, withdrew and most of these had not been co-operating in the sale of their seed.

This is one of the many efforts made during recent years by the old-line seed houses to destroy the growers' organization. The Egyptian Seed Growers Exchange has been successful since it was organized by the I. A. A. 12 years ago in forcing local buyers to bid up for seed. This has seriously interfered with their profits and has resulted in both members and non-members getting a higher price for Red Top.

Illinois Fruit Growers Object To Regulations

The Illinois Fruit Growers Exchange recently adopted a resolution, which has the support of the Illinois Agricultural Association, urging the U. S. Department of Agriculture to allow further leeway to fruit and vegetable producers in the form of a three-year moratorium on the enforcement of drastic regulations concerning minimum tolerances of arsenous oxide and lead, the residue from sprays, on fruits and vegetables.

The resolution asks that the moratorium be extended until such time as producers of fresh fruits and vegetables are able to devise cheaper and more simple means of removal of the spray residue, or until effective substitutes are discovered for lead arsenate.

Illinois fruit growers contend that there is no sufficient evidence of injurious results from spray residue on fruits to justify such drastic regulations.

Farm Advisers Resign

F. A. Fisher, farm adviser in Macon county, resigned recently to take charge of erosion control work in Illinois under the civil works administration.

It is reported that J. H. Checkley, farm adviser, has tendered his resignation in Logan county to give full time to his work as secretary of the local national farm loan association. H. E. DeWerff also is reported to be leaving his work as adviser in Woodford county due to ill health. Lloyd Welch, formerly farm adviser in Hancock county, has taken a position as district farm supervisor for a large life insurance company.

Country Life Queen Contest At State Fair

Uniform regulations governing Country Life Queen contests conducted by County Farm Bureaus were recently recommended by V. Vaniman, director of insurance service. The regulations provide that only girls between the ages of 16 and 24 inclusive be eligible; that contestants be limited to young women who come from the families of Farm Bureau members in good standing living on the farm, and that all the girls who enter be required to make their own dresses.

The state contest for county winners selected at the Christmas parties the night of December 16 will be held at the Illinois State Fair next year rather than at the I. A. A. annual meeting as was previously suggested.

New Home For Knox County Farm Bureau

A new Farm Bureau home is being constructed opposite the Y. M. C. A. in Galesburg by the Knox County Farm Bureau. The Service Company is erecting a modern oil service station close by. The building will be ready for occupation early in 1934.

The Farm Bureau building will be a two-story, fire-proof, brick structure, with offices on the first floor and an auditorium above.

The board of directors had such a home in mind 12 years ago when they started operating on a planned budget, comments the Knox County Farm Bureau Bulletin. Each year a small reserve fund was set aside. This fund has accumulated throughout the years until now the building is being constructed out of savings and will be entirely free of indebtedness when finished.

The building will cost $13,673.96. The heating and plumbing was let in a separate contract for $2,150.

By H. M. Conway, National Livestock Marketing Ass'n.

The winter hog market now (Dec. 13) should be around its winter low, and while supplies will continue large for the next four to six weeks the late winter reductions should soon be discounted by government buying for relief and by a stronger storage demand on the part of packers. Much of the normal improvement of prices will be offset by the increasing processing tax.

It seems advisable to market hogs only as they are fully finished, holding the lighter end for later marketing. Feeding the lighter weight pigs for late March and April looks best. As to feed prices a year from now, they are likely to be favorable for hog feeding and production.

Supplies of fed cattle are still too large for any sharp price advance. There is still a carryover of old crop steers that must be sold before the full effect of the reduction in the new crop becomes apparent. Choice light steers will continue scarce for some time, and by late winter weight should be an asset when combined with finish and quality.

Heifers are moving freely to feed lots, and in general too many steers and butcher cattle are in sight for the late spring and early summer, especially at the time when prices were best this year. The government loans on corn are now discouraging cattle feeding, particularly the finishing of the better grades for the summer and fall markets. Purchases of fleshy choice feeders next spring should prove profitable when fully finished for the October market.

Lambs continue in a favorable position with a rather strong consumptive demand in the East and with relatively high wool prices. Some caution has been suggested as to marketings in early January, but no material weakening in prices at that time is expected. There is nothing to greatly improve the livestock situation outside of monetary inflation and a lower spread between producer and consumer prices.

Achieving Equality

Remarks by GEORGE N. PEEK, Administrator, A. A. A., before the American Farm Bureau Federation, Chicago, Dec. 12, 1933

I'M back home here again, in my own State, among my old friends, to talk over a few things—some new and some old. Since I took the job as Administrator of the Agricultural Adjustment Act last spring this is the first time I've left my desk to do any talking except over the radio. I came out here to find out how you feel about certain things, to let you know how I feel about them, and to tell you about some of our activities. To me agriculture is the most important industry in the country. It is the bed-rock upon which national prosperity rests. It must be made more profitable for the farmer. Later on I will discuss the profit motive more fully, but right now I want to say to you that if our profit system is to remain, I believe individual effort must be encouraged and rewarded, just as I believe that the profit system must be controlled and that it can be maintained only with honesty and decency. I further believe that under any system of government individual effort must be encouraged and the property rights of the individual protected.

GEO. N. PEEK

Seven months ago yesterday the Farm Act was signed by President Roosevelt, and the Agricultural Adjustment Administration was organized. We haven't been able to do all that we had hoped to in that time, but we have done quite a bit. I shall begin by giving you an account of what we have accomplished to date, and why; and then go on from there.

Getting Action Now

You can't hurry the sun. And you can't hold it back. In the long, slow swing of the seasons which governs agricultural operations, seven months is no time at all. Much corn that was being planted when the President signed the Farm Act is not yet in the crib. We had to wait for another season before we could properly get at the critical economic ache here in our Middle West. And, in the circumstances prevailing, that has seemed, as you know, and as some of you have not hesitated to say, a long time to wait.

The Administration is getting into action now out here in the agricultural heart of the country. I believe that the Middle West will be feeling better soon, and that its improved condition will be reflected throughout the Nation. But I don't want to be interpreted as saying that the doctor is here at last with his little black bag, and that everything is going to be all right from now on.

The situation that was dumped into the laps of the present Administration on March 4 of 1933 was at least 12 years in the making. Our present farm situation is still a long way from satisfactory, but if you compare it with the way things were at the end of last winter, it makes the spot where we are now seem almost comfortable. We have hope now, and reason for hope. And conditions a year ago, whether you looked at the thing as a farmer or as a city man, promised absolute ruin.

For nine years, from 1920 until late in 1929, our open country was drained of money and of its best blood-stock by an unmerciful and uneven deflation. For three years on top of that, from 1929 on through 1932, the open country was racked by price disparities which widened as the depression deepened and spread. For nine years general business in this country was a soaring, pumped-up superstructure, which seemed not to touch agriculture, the foundation, at any point. Many people used the apparent industrial prosperity as a sign reading, "Farm buying power no longer necessary for national prosperity." The neglected foundation sagged. The entire structure of false, unshared prosperity toppled. And it was agriculture, the foundation, which took the hardest punishment. Farming as a business was all but shattered in the depression that followed the general crash of 1929.

Farm Deflation

In 1928 the prices paid to farmers averaged around 50 percent above pre-war. By early 1933 they had dropped 50 percent below pre-war. The prices that farmers had to pay for things they bought was, in 1933, down to the pre-war level, but not below it. Thus, early in the year 1933, farmers had only about half of their pre-war unit purchasing power. Gross farm income from crops produced in 1932 was only half the 1929 income. Interest and taxes had to be paid at the old levels.

Capital value in agriculture stood at 79 billion dollars in 1919. By the beginning of 1929 it had shrunk to 58 billion dollars. By the beginning of 1933 another 20 billion dollars in farm capital values had been drained away; the total stood at only 38 billion dollars. From a 79 billion dollar valuation down to a 38 billion dollar valuation, in 12 years! The fields and farm homes of this Nation were bled white.

It may be asked how a business so brutally deflated managed in those same years to maintain that great flood of overproduction which by 1933 had raised the cotton carry-over in this country to two and a half times its normal height, and piled up a wheat carry-over three times normal. Curiously enough, the disparity between city and farm prices which we have been trying to offset is a situation that brews its own poison, leading to still wider price maladjustments, if left alone. As the President has said, we were a Nation half busted and half booming. The busted half, paying boom prices for interest, for taxes, and for all things purchased from town, had to grow more and more stuff for less and less money. It takes twice as much 40-cent wheat as 80-cent wheat to meet a tax bill. It takes twice as much 5-cent cotton as 10-cent cotton. It takes twice as many 3-cent hogs as 6-cent hogs. And so on, to the bitter end.

In consequence, last spring we found ourselves, as a Nation, with some 40 million acres more in crops than were cropped before the War; and this was in a changed world which for the present at least had shut down on the importation of our products, as we had on theirs.

Distribution High

Disorganized overproduction was only part of the trouble. Lack of foreign markets was only part. Distribution tolls were too high. With agriculture prostrate at the end of 1932, and with the cities sharing at last in the depression, many distribution margins were still just as wide as they had been in 1929. In the last three years of the Old Deal, from

1929 through 1932, city incomes fell one-third; farm prices already perilously low, fell two-thirds; and the distribution spreads stayed wide. There was still good money in farm crops, if you didn't happen to be growing them. Of the 15 leading corporations in point of earnings in 1932, nine dealt in food and tobacco.

The first job of the New Deal is an orderly transfusion of income; a redistribution of buying power; not so much a sprinkling of money in dribbles from the top down; but a growth of spending from the grass-roots up. We have been putting money into overall pockets on the farm and in the factory. We already have evidence that when this is done, the money moves, restoring broken circuits of business everywhere. And we are not giving that money away, either; we are getting something for it, something that ought to prove a force for permanent stability and progress.

We are getting a thoroughgoing reorganization of both production and distribution, through which to avoid, in the future, the immense social losses of ungoverned, cut-throat competition.

The Farm Act makes such a groundwork reorganization of agriculture possible. It makes possible an adjustment of farm production to going demand, at home and abroad. This and other new legislation make possible an effort toward adjusting distribution methods and costs; and provide for an adjustment of debts, with an adjusted dollar, if need be.

You can't change farm routine around the way you can in a factory. Changes take time. I sometimes hesitate to call what we have done toward correcting our national farm production schedules, a "program." As often as not we were in the middle of the thing before we had much time to choose and deliberate; we were pushed on from behind. The situation was desperate. The pressure of a driving necessity was behind us. Many of our former opponents of farm legislation were in the front line in this push from behind. And all the time crops came along, ripening, in their own good time, as always, regardless of our wishes.

The Cotton Deal

Cotton was ripening in the southern part of the Cotton Belt when we still were setting up our organization last May. We had to go into action fast. We organized the cotton growers into county production control associations, plowed under 10½ million acres of cotton, a quarter of the entire crop, and seeded $110,000,000 of new cash spending power in the cotton South. The weather fought against us, it fought for a surplus; but we prevented another year of 5-cent cotton that otherwise would have been a certainty.

To protect farmers against forced marketing, we are lending 10 cents a pound on Middling or better cotton now. And there is one interesting thing about this lending program of the Commodity Credit Corporation that I would like to mention. As soon as the Government made its lending intentions known, the banks down South came to life, and made like loans, privately. Only about one-third of the money so far loaned on cotton has come from the United States Treasury; the other two-thirds was loaned by banks, privately. That just goes to show that when there is assurance of the farmer getting a reasonable amount for his crop, the private business structure of the community begins to get some confidence and to function again, naturally and healthfully. I observe the same tendency beginning to operate out here as a result of our program of 45-cent loans on corn.

Reducing Surpluses

The 1934 cotton program calls for doing the job of reduction by taking the cotton out before it is planted. We are going to reduce the national cotton acreage from 40 million to 25 million acres in 1934, and make compensating adjustment payments to cotton growers that probably will total 125 million dollars.

To adjust the national wheat acreage to the diminished overseas demands was an even bigger undertaking, but we had more time. With world accord, we have signed up about four-fifths of the entire American acreage for a three-year adjustment downward, with a 15 percent reduction of acreage this year. The first of $100,000,000 adjustment money has gone out to the farmers. Wherever that money has reached, distress and tension have been relieved and hopes have been renewed.

As an auxiliary device in clearing up the wheat surplus situation we arranged to export to the Orient Pacific Northwest wheat which otherwise would have been forced East to burden the domestic markets heavily. In this way we were able to ship some of our surplus wheat off the top of the pile, at the same time that we were cutting in under the pile by production control.

We have used, and shall use, every practical device for reducing this and other surpluses. Efforts have recently been launched, for instance, to get the distillers back as a market for American grain.

It seems that since prohibition, processes have been developed for manufacturing alcohol from blackstrap molasses, and from a synthetic process in the cracking of gas. Whether or not we favored repeal, repeal is here; and we think the grain-growing farmer should have the benefit of that market which he had in the pre-Prohibition days.

The activities of the Surplus Relief Corporation in moving surpluses that otherwise would be worse than wasted, directly to the hungry and needy within our own borders, are developing into a very valuable form of surplus-removal; and one which no one, I am sure, will disapprove. That use of surpluses is to me, personally, one of the most heart-warming things that has happened since our work started. The Agricultural Adjustment Administration does not have direct responsibility for this activity. It is under the direction of Mr. Harry Hopkins; but we are certainly behind it 100 percent.

Similarly, the Agricultural Adjustment Administration cannot claim credit for the recognition of Russia but the reopening of that market for our products should absorb some of our surpluses. The whole question of further foreign trade will reward, I believe, a very careful looking-into. There has been set up an inter-department Trade Commission to study the entire question of possible exports and imports; and on this commission agriculture is represented.

When it comes to codes and marketing agreements, we have some outstanding successes, and a number of considerable steps in progress to report. I consider the flue-cured tobacco agreement especially oustanding. By agreement with the big companies we have assured farmers a price 40 percent above the price prevailing when Governors were closing markets last summer. Further agreements, some of them coupled with a production control attack, are now in the works for fire-cured, air-cured, and Burley tobacco growers.

Milk Agreements

As to milk agreements, our progress has been less uniform. We have made, on the whole, slow progress, often against the meanest sort of opposition from within the industry and from without. But within the past month or so we have closed a number of milk agreements, and have moved

(Continued on page 16)

Third premium dividend on $5000 policy is $13

Fourth premium dividend on $5000 policy is $14

Fifth premium dividend on $5000 policy is $15

Sixth premium dividend on $5000 policy will be announced shortly

ANOTHER DIVIDEND COMING SOON

Country Life is a cooperatively owned, legal reserve participating life insurance company. Economical management, low overhead, careful selection of risks, and a sound investment policy have resulted in the company earning substantial profits. These profits are shared with policyholders in the form of dividends. Under our present dividend schedule, starting with the third premium, a dividend of $2.60 per thousand of insurance is given. Fourth premium dividend is $2.80 per thousand. Fifth premium dividend is $3.00. Now, another dividend is ready, details of which will be made public shortly. These dividends applied to payment of our low premiums have materially lowered the net cost of Country Life Insurance year after year.

ASSETS INCREASE 30%

1933 was one of the best years in Country Life's remarkable history. In the worst year of the depression, with corn down as low as nine cents, a bank moratorium, and an insurance moratorium, Country Life has forged ahead. Insurance in force has increased $7,000,000. Assets have increased 30%. Every dollar of investment made by the company during 1933, representing reserves, is in obligations of the U. S. Government. Thus, Country Life accomplishes the truly amazing feat of acquiring greater strength and security during the lowest income period in memory, giving protection at record low cost.

ENJOY LOW COST PROTECTION

Accept please, without obligation, the coupon offer. Thousands are turning to Country Life for their insurance needs because of its unsurpassed strength, security, low premiums and generous schedule of dividend payments. 90% OF COUNTRY LIFE'S INVESTMENTS ARE IN GOVERNMENT, STATE, AND MUNICIPAL BONDS. This strong liquid position assures prompt payment of claims. Your nearest Farm Bureau office is our agent. There you will be given complete information about Country Life's money-saving policies in a helpful, neighborly manner. Or, if you prefer, USE COUPON, and full data will be sent direct to your home.

Achieving Equality

(Continued from page 14)

toward others, some of which definitely tend to close the spread and get the farmer more money without costing the consumer another cent.

Our temporary stabilization action as to butter supported the market at a time when the need to do so was desperate. And for butter, as for wheat, we have managed to pry open a foreign outlet for a little of the surplus, at least. We have disposed of some butter to the War Department for use in the Philippines. This was done in competition with foreign countries. . . . . .

The corn and hog problem is the biggest one in the whole farm picture, and the program we are now putting into action is the biggest we have undertaken so far. Because of the intricate inter-relations between corn and hogs, the thing is very complex and difficult to settle. It is going to take a lot of hard work, and some painfully hard thinking, to put this $350,000,000 program over, and to make it stick for permanent good effect. It will mean a drastic cut in production, for the time being, anyway; and that is something nobody likes. But I have no doubt at all that the thinking farmers of the Corn Belt (and those, I should say, would mean pretty nearly all surviving farmers here) will go through with this corn-hog program, triumphantly.

We have no panaceas or cure-alls to offer. To reduce corn acreage a fifth, and farrowing a fourth, is a difficult and trying job. But we have some concrete evidence that it is a sort of procedure which has worked wonders in the other parts of the country where it was first tried. And hundreds of millions of dollars seeded in directly at the grass roots in cash adjustment payments, make the treatment rather easy to take. With the corn-hog production control program I think should go a marketing agreement with packers. . . . . .

Before passing on to the final stage of my remarks, I want to say a word about the spirit with which the Nation as a whole has accepted our program. The surprising thing, to me, is not that we have encountered opposition; but that we have encountered so little.

The country was ready to see this thing done. Most criticisms levelled against us have not been against our plans, but against our pace. The complaint was not against what we were doing, but that we weren't doing it fast enough. We at Washington have been just as much aware of this apparent slowness as you have. We accept the responsibility. Our only answer is that we have been working just as hard and as fast as we could in the circumstances.

There has also been a limited amount of opposition on the part of city people who fear that adjustment payments are a subsidy of one class as against another. They have somewhat the same fears as to the NRA. I think that is a short-sighted view to take. The short excerpts from reports that I have read you prove, I think, that more money for farmers to spend means more money circulating quickly in town. It is just as true that great industrial activity and larger city payrolls mean more money for farmers. It is just as disastrous to break the circuit of spending in cities as it is to break it off at the edge of cities and try to keep the farm families on another and inferior income and standard of living.

Chicago Farm Capital

Here in the Middle West, which is my home, the need of a continued movement of trade between farm and town should be, by this time, especially apparent. Chicago is the great commissary of the naturally richest expanse of farming country on earth. The whole history of Chicago's growth is the history of the growth of the Mississippi Valley. When anything stifles that growth, trade in Chicago stagnates. When this great Valley blossoms forth in prosperity again, then and only then, will Chicago be back in stride.

Now for the final part of my talk: about the profit system, and its detractors. All through this land there is constant discussion of the so-called new functions of Government, of Government plans for this or that, of what the Government is going to do next. What is Government?

This is what has been going through my mind. Our Government is not some mysterious device handed down from above or dug up from below. It is of our own making. In setting up our original Government our forefathers followed the English guild system of local self-sufficiency. As local governments expanded and interests crossed, overhead governments were set up, resulting in county and State governments.

The Federal Government was supposed to intervene only in such matters as could not be settled by the States themselves. The foundation of the whole structure from the first has been a respect for private property rights, and the sacredness of contracts.

The Profit System

There is great apprehension in the minds of many business men today about the relations of government to business. There is grave concern over the expressions of a few ultra-liberals about the Government taking over private business. If you want my opinion — personally, not officially, mind you—I would say that this apprehension is unwarranted. Unless it hustles, the Government has more hay down now than it will get up before it rains.

Legitimate profits have always been regarded in this country as a proper reward for individual initiative, industry, and thrift. I know of no substitute for such traits. I am in favor of the profit system; but I am in favor of starting with the farmer.

There is abroad in the land a propaganda of more or less importance for doing away with the profit system. This means no more and no less than doing away with the institutions under which we have all grown up and prospered more or less. I am against the racketeers of high finance as much as I am against the racketeers in the underworld. But the remedy lies not in destroying our institutions. It lies in reaching these racketeers in high places under the laws of our land. If these laws are inadequate, they should be revised and extended so that no guilty man shall escape. I am dead against the malpractices of the so-called monopolies; I say "so-called" to differentiate between "malefactors of great wealth" and the millions of heads of business, large and small, performing a useful service.

Government owes no man a living. But it is the duty of government to intervene on behalf of any man who is prevented from following his ordinary lawful pursuits in an effort to support himself and his family. That is why I have said for a dozen years that it is the duty of the National Government to intervene on behalf of the American farmer, for against the farmer barriers have been set up, and these barriers have resulted in millions of our worthiest people losing their homes and their lands through no fault of their own.

Farm Strike Futile

I do not criticize the farmers for protesting at delays in relief from such conditions. I have protested, myself, as long as any man within the reach of my voice. I do not protest against the hot impatience of some farm leaders. I do protest against

(Continued on page 18)

Farm Bureau Services Not Fully Appreciated

Talmage DeFrees Discusses Achievements of Organization In Bond County Address

THE real service of the Farm Bureau movement is frequently not recognized by the average member President Talmage DeFrees of the Bond County Farm Bureau said recently in addressing the annual meeting in Bond county. "This major service comes by reason of the great numerical strength of the state and national organizations which are today the largest and most influential organized group of farmers in the world. It would seem that every farmer thinking of his interests would desire to be affiliated with such a group. I have no doubt that if farmers were all properly informed such a result would come about almost automatically.

TALMAGE DEFREES

"The work of the tax department of the Illinois Agricultural Association in the passage of legislation, and the prevention of the passage of bills inimical to the farmer's interest has been the means of saving the farmers of Illinois millions of dollars. The only group at Springfield during the sessions of the General Assembly, that is actively engaged in safeguarding the interests of the farmer, and I will add the interests of the small home owner in the small towns and villages as well, is the able committee composed of President Earl C. Smith, Legal Counsel Donald Kirkpatrick, Tax Expert John C. Watson, Chas. Black and others representing the Illinois Agricultural Association. Your membership in the Farm Bureau makes possible this kind of work. Had there been no Illinois Agricultural Association it is difficult to estimate what the burden of taxation on the Illinois farms would be today.

"The influence of this great body does not stop at the boundaries of our state, but by reason of its strength coupled with the fact that its President, Earl C. Smith, is probably the most influential and outstanding man in the whole field of agriculture today, its influence is felt in the halls of congress at Washington. The other night in a radio address which doubtless many of you heard, Clifford Gregory, editor of Prairie Farmer, spoke of the fact that a number of the governors of the mid-western states were in Washington seeking some sort of relief for agriculture, and Mr. Gregory said that it was his belief that Earl Smith single-handed could accomplish more in Washington than this entire group. The other day 8,000 farmers assembled in Peoria on a two-days' notice of President Smith. Among those who addressed this gathering was Henry T. Rainey, Speaker of the House. Mr. Rainey spoke of the fact that at the present time when his office and the office of the President of the United States desired information on farm problems they called into conference Earl Smith, and I happen to know that Mr. Smith is in Washington a great deal at this time.

"Friends, this whole gigantic program for agricultural rehabilitation has come about as a result of the efforts of organized agriculture. Most of the things advocated and being tried out by the present administration are the things that our organization has been preaching for the last 12 years. We have gone a long ways, we have accomplished much, but we are constantly forced to think what we might accomplish if we had the support of all the farmers of this great state."

Alex. Legge Endows Research Foundation

Sudden Death Brings To Light Legacy For Improvement of Farm Life

A BEQUEST of $500,000 was left by Alexander Legge, president of the International Harvester Company and former chairman of the Federal Farm Board, who died recently, to endow the "Farm Foundation." Prior to his death Mr. Legge had already contributed $400,000 to the foundation which is to be a philanthropic organization to carry on research and experimental work for the improvement of farm life.

ALEX. LEGGE

Frank O. Lowden of Oregon, Ill. is chairman of the board of trustees of the foundation. Other members are as follows: Bernard M. Baruch, George McDonald, Clarence Poe, Mary Harriman Rumsey, John Stuart, Clifford V. Gregory, Charles C. Teague, Roy Johnson, W. E. Riegel, R. E. Lambert, Melvin A. Traylor, Owen D. Young, Robert E. Wood, Ralph Budd, Dan A. Wallace, Frank E. Mullen, Chris L. Christensen, A. R. Mann, and F. D. Farrell.

The trust agreement by which the trustees agreed to establish the foundadation, according to newspaper statement sets forth the following purposes:

1. To encourage and develop co-operative effort and community organization and consciousness as means of improving the social, economic, educational, and cultural conditions of rural life.

2. To stimulate and conduct research and experimental work for the study of any economic, social, educational or scientific problem of importance to any substantial portion of the rural population of the country, including problems of production, marketing,

Upholds "New Deal" In 4-H Club Address

I. A. A. And Associated Companies Entertain Illinois Club Champions In Chicago

Dean H. W. Mumford of the College of Agriculture, University of Illinois, upheld the underlying principle of the "new deal" to "restore to the common people an equal opportunity," in addressing the annual dinner given by the Illinois Agricultural Association and associated companies to Illinois 4-H Club champions at the Great Northern Hotel, Chicago, the night of Dec. 6. More than 200 club members, club leaders, county advisers, I. A. A. officials and their guests attended.

DEAN MUMFORD

Speaking specifically to the 160 club members Dean Mumford said: "You should concern yourselves with what you can contribute to the new deal, not alone with what the government can do for you. No government can do for you what you can and must do for yourself. You will not have everything to your liking. In a sense you can raise yourself by your own bootstraps."

Earl C. Smith, president of the I. A. A., congratulated the club members on their achievements and voiced the interest in and support of the Association to 4-H Club activities. In introducing Dean Mumford he commented on the friendly relationship and co-operation which has existed for many years between the State College of Agriculture Extension Service and the Farm Bureau movement in Illinois.

OFFICERS AND DIRECTORS ILLINOIS FARM SUPPLY CO.

First meeting of new board following annual meeting. The board re-elected its officers. Left to right around table: Harry Ebbert, Effingham County; J. M. Eyman, Macon County; H. A. Keele, Macoupin County; R. A. Cowles, treasurer; Geo. F. Tullock, Winnebago County, vice-president; Fred E. Herndon, McDonough County, president; E. E. Stevenson, LaSalle County, secretary; L. R. Marchant, manager; Mrs. Dawson, secretary to manager; Frank J. Flynn, Morgan County; Thos. J. Penman, Kendall County; Grant Broster, White County.

and purchasing and the sound co-ordination of the agricultural with the industrial, financial, and mercantile life of the country.

3. To encourage, aid or finance any university, institution, corporation or persons in the conduct of such research or experimental work.

4. To disseminate educational and useful information developed as a result of any such study, in such a manner as to be of practical value to the farming population.

5. To promote and enlarge the intellectual and cultural interests and opportunities of the rural population through community action.

The trust agreement provides that a sum up to 10 per cent of the total endowment may be used to set up buildings and laboratories for farm experimental work. The trust agreement was drawn last Feb. 10 and provides limited terms of office for the respective trustees, running from one to five years.

Heart Attack Fatal

Mr. Legge passed away very suddenly on Sunday, December 3, from a heart attack. He was 68 years old. He had been out on his farm south of Hinsdale planting shrubbery. Overexertion is thought to have caused his sudden death.

Mr. Legge became widely known to farmers as chairman of the Federal Farm Board. He spoke at the annual meeting of the Illinois Agricultural Association in Springfield, January, 1931.

Mr. Legge was a close friend of President Earl C. Smith and visited the I. A. A. offices on many occasions during recent years. He was generally regarded as a sincere friend of agriculture. His strenuous work as chairman of the Farm Board undoubtedly shortened his life.

$9,000,000 In Loans To Illinois Farmers

During November Illinois farmers received 1,030 loans amounting to $4,306,900 from the Federal Land Bank of St. Louis. Since May 1 the St. Louis Land Bank has made 2,227 loans for nearly $9,000,000 to Illinois farmers chiefly for refinancing farm mortgages and notes.

During November, 1,933 new applications for nearly $14,000,000 in loans were received from Illinois. October applications totaled more than $12,000,000. Loans are of two types: The regular land bank loans and the commissioner's loans. The regular land bank loans may be used for buying or improving a farm, for purchasing livestock, equipment, or fertilizer, for refinancing farm mortgages, bank notes, and for paying other old debts. The commissioner's loans can be used only for refinancing or paying old debts and for redeeming or repurchasing farms lost through tax sales or foreclosure. Most of the loans made by the Land Bank at the present time are for refinancing farm mortgages and notes.

NOTICE OF ANNUAL MEETING OF ILLINOIS PRODUCERS CREAMERIES

NOTICE is hereby given that the annual meeting of the stockholders of Illinois Producers Creameries will be held on Wednesday, the 24th day of January, 1934, at the hour of 1:30 o'clock p. m. at the New Hotel Wolford, Danville, Illinois, to elect directors, receive, and, if approved, confirm the report of the board of directors of the company for the fiscal year ending December 31, 1933, and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the company and to amend the By-Laws with reference to notice of meetings; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, December 18, 1933.

ELERY A. LEFFERS, Secretary

Achieving Equality

(Continued from page 16)

their methods, because I think they are futile. And I protest against a strike aimed at the President of the United States and his Administration—an Administration which honestly is endeavoring to do all that agriculture has asked of previous Administrations: that is to say, restore equality to agriculture.

The farmer is naturally capitalistic. But he can be driven so far that in desperation he will turn to radicalism, and fight with any weapons he can lay hands on to save his home. Farmers have been close to that point, not the hotheads only, but the great conservative, thoughtful mass of them, these past few years. So close to it that now things have eased a little, and look better, it would be stupid indeed to overlook the lesson that is to be learned from it all.

It is this: You can't build a profit system and leave the foundation out. We tried it and it just about wrecked us all. The masses of the people must be benefited. They must not be made servile to a few overlords. I certainly don't want to be an alarmist; but I do want, with all possible emphasis, in concluding, to say this:

The only possibility of security for the property owners of this country is to have a large majority of our people as property owners, large or small, and to see that they are secure in the ownership of their property. They should not be permitted to lose it through no fault of their own. Upon this promise rests the only security for the Nation. When this condition prevails and not until then will farmers realize in full their part in the New Deal.

I am not committed to any one method of farm adjustment. I have not yet seen the perfect system either for the farmer, for the laborer, or for industry. I feel that fundamental plans should be discussed and understood before adoption; that new methods of social control should be clearly outlined, and that the people as a whole should have the right and duty to make the ultimate decision. For (to quote Mr. Justice Holmes)—

"When men have realized that time has upset many fighting faiths, they may come to believe * * * that the ultimate good desired is better reached by free trade in ideas—that the best test of truth is the power of the thought to get itself accepted in the competition of the market, and that truth is the only ground upon which their wishes safely can be carried out. That, at any rate, is the theory of our Constitution."

Best Annual Meeting In History

So Said Many Who Attended 19th Annual Convention At Danville

NEVER has the I. A. A. had a greater nor more enthusiastic convention than the 19th annual meeting held Jan. 24-25-26 at Danville.

This was the consensus of opinion expressed by many Farm Bureau leaders as they departed for home Friday afternoon after a busy, eventful three-day session.

In attendance the meeting was estimated to be larger than any held for several years but in spirit and enthusiasm it was outstanding, reflecting the new hope and feeling that better days are in store for the farmer in the immediate future. Local observers estimated attendance at between 4,000 and 5,000 people. All hotels were taxed to capacity and the overflow was taken care of in the homes of Danville's hospitable people.

Each of the 95 County Farm Bureaus were represented by delegations running up to 100 or more per county. Many came in their own cars and in specially chartered buses. Others took advantage of the attractive low rail rates on all western lines.

There was unbounded faith expressed in the possibilities of improving the welfare of agriculture through organization and co-operation. There was pardonable pride in the fact that Illinois farmers have developed the largest state farm organization in America with a long record of achievement in legislation, tax equalization, marketing and buying co-operatives, and money-saving insurance service.

There was appreciation for the successful efforts of organized agriculture aided by a friendly administration in securing the Agricultural Adjustment Act, corn loans, and benefit payments for crop reduction to bridge the gap pending improvement in farm prices.

The different speakers appeared as scheduled, Chester C. Davis and Edw. A. O'Neal aided by the Pawnee Four providing a highly interesting banquet program. Their addresses are reported elsewhere in this issue.

J. M. Huston of St. Louis gave an enlightening talk on production credit associations and Dr. F. A. Pearson of Cornell University handled a difficult subject, "Gold and Revaluation of the Dollar," in a vigorous, clean-cut, and understandable way, on the Friday morning program.

Featuring the Thursday morning program was the annual address of President Earl C. Smith and the reports of Secretary Geo. E. Metzger and Treasurer Robt. A. Cowles. The treasurer's report showed a gain in the assets of the Association from $293,476.70 a year ago to $325,476.70 at the close of 1933 with an excess of income over expense for 1933 of $44,-719.57 compared with a deficit of $13,-145.84 for the year 1932.

Clifford V. Gregory, editor of Prairie Farmer, made an interesting talk on the money question and significance of the dollar devaluation program of President Roosevelt, before the Auditing Association annual meeting on Wednesday. The Illinois Farm Bureau Baseball League had one of the best meetings ever held where Carl Lundgren, baseball coach at the University of Illinois and former pitcher for the old Chicago Cubs, led a highly entertaining and valuable discussion on the less understood rules in baseball.

All of the insurance meetings were well attended. Illinois Farm Supply Co. sponsored a conference for directors and managers of county service companies where so much enthusiasm was generated that it broke out in ap-

SENDS GREETINGS

FRANKLIN D. ROOSEVELT

President Franklin D. Roosevelt received a great ovation from nearly 3,000 delegates, members, and visitors who crowded into Danville's big armory at the annual I. A. A. banquet Thursday night. The occasion was a telegram from the President extending his greeting to the convention.

The message received and read by President Earl C. Smith is as follows:—

"In wishing the Illinois Agricultural Association a successful meeting I feel that I am addressing a body which has always been one of the mainstays of organized agriculture. It is encouraging to hear from so many sources that the American farmer today faces the future with new hope. We must, however, continue relentlessly to face facts and unitedly go after the obstacles in our path. To get out and stay out of the economic shambles requires patience and calls for collective effort such as America has seldom known in times of peace; but it can be done."

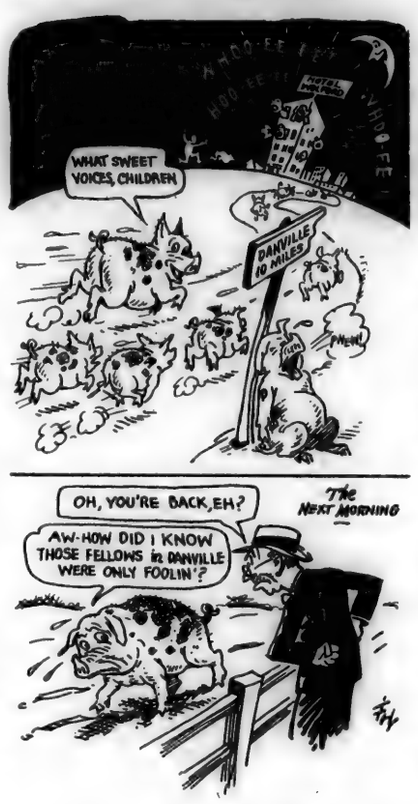
Franklin D. Roosevelt.

plause whenever the company, or its outstanding record during the past fiscal year, were mentioned.

The addresses of Secretary Geo. E. Metzger, Frank Gougler and J. B. Countiss before Illinois Producers Creameries annual meeting revealed that the organized butterfat producers in Illinois are going places. Three big co-operative creameries organized, operating and making money, and others on the way presents a rosy outlook with great opportunity for further development in 1934.

As in past years, the I. A. A. convention was orderly and business-like. There was a total absence of roughhouse, drinking, and noisy all night parties in hotel rooms which mark many such gatherings. Dissipation took the form of impromptu hog-calling contests in the Wolford Hotel during the night much to the amusement of local people as well as convention delegates.

Cliff Simpson, secretary of the Danville Chamber of Commerce, President Lenhart, Farm Adviser Otis Kercher, and the arrangements committee of the Vermilion County Farm Bureau left nothing undone to accommodate everyone and run off the convention smoothly according to schedule. Considerable delay was experienced in getting the crowd seated and served at the banquet in the armory partly due to the extremely heavy attendance. The food was good, however, and the inconvenience was soon forgotten.



Presidents and Advisers Dinner A Happy Session

The Farm Bureau presidents' and farm advisers' get-together on Wednesday night, Jan. 24, was an enthusiastic session with tap dancing and other entertainment furnished by Farm Adviser Otis Kercher of the Vermilion County Farm Bureau and the Danville Chamber of Commerce. More than 250 people sat down to the excellent meal furnished by local business men.

Clif Simpson, secretary of the Chamber of Commerce, which provided the dinner, delivered a rousing welcome in which he invited the people to spend as much money as possible and come back soon again. "I'm going to be frank," he said. "We invited you to Danville to get your business and I hope you'll all spend at least $50 each before you leave." (Applause)

Membership acquisition and future organization policies, curtailment of importations of blackstrap molasses, suppression of the use of oleo by farmers and other questions figured in the discussion from the floor.

W-H-O-O-E-E-E

Otis Kercher Has Troubles Hog Callers Responsible

As an aftermath of the recent I. A. A. convention, Otis Kercher, Vermilion county adviser, has been deluged with 'phone calls and letters of complaints from hog growers in the vicinity of Danville. They report that their hogs got no sleep during the three days of the meeting and that at the present writing many are asleep on their feet and have lost an average of five pounds a day answering phony calls. Local farmers state that while they do not mind a bit of polite hog calling for contest purposes, it is evident that some of the more leather-lunged hog callers got a bit serious in their efforts and kept all the hogs in the township up for four nights. Moreover the hogs are skeptical about answering their masters' voices which seriously interferes with normal feeding operations. Otis says he will write a letter to the newspaper explaining the situation and may ask the I. A. A. to get a law passed gagging hog callers or something.

Many Guests Attend

Guests at the annual dinner included Dean H. W. Mumford, J. C. Spitler and Dr. W. L. Burlison of the University of Illinois; Walter McLaughlin and J. H. Lloyd of the State Department of Agriculture; Walter L. Rust, president, Federal Land Bank, St. Louis; E. C. Hewes, publisher, Danville Commercial-News; Samuel R. Guard, editor, Breeder's Gazette; N. W. Allen, president, Nat'l Fruit and Veg. Exchange; the various speakers mentioned elsewhere, and officers and managers of a large number of co-operative organizations closely associated with the I. A. A.

The 137 quota men who had signed six or more new I. A. A. Farm Bureau members always were introduced as guests of the Association.

Smith and Wright Re-elected To Posts

Five New Directors Chosen on I. A. A. Board at Annual Meeting

Earl C. Smith of Pike county was unanimously re-elected president, and A. R. Wright of Marshall county was unanimously re-elected vice-president at the business session of delegates following the speaking and entertainment program Thursday night. Donald Kirkpatrick, general counsel, presided.

Bliss Loy, of Effingham county, who placed the name of Mr. Smith in nomination, said that the I. A. A. had risen to new heights in accomplishment and prestige under his able leadership, that he was recognized nationally for his sincere and untiring efforts in behalf of the people and the industry he was elected to serve.

In nominating Mr. Wright, Homer Curtis of Jo Daviess county called attention to his many years of faithful and successful service as vice-president, and chairman of the finance committee which with the treasurer has great responsibility in investing and conserving the funds of the I. A. A. and associated companies.

Five changes were made in the board of directors. E. E. Oughtby of Shabbona, DeKalb county, was elected to succeed Geo. F. Tullock of Rockford, the oldest man in point of service on the I. A. A. board. Albert Hayes of Peoria county was chosen to succeed Geo. Muller of Tazewell in the 16th district. Otto Steffey of Henderson county succeeds M. G. Lambert in the 14th district. Mont Fox of Vermilion county replaces W. A. Dennis of Edgar county in the 18th district. And Alvin O. Eckert of St. Clair county was chosen to succeed Talmage DeFrees of Bond county in the 22nd district. Chas. S. Black of Morgan county was re-elected in the 20th district, and Chas. Marshall of Johnson county was again chosen in the 24th district.

Left to right: Chester C. Davis, Administrator, Agricultural Adjustment Act; President Earl C. Smith; Secretary Geo. E. Metzger; and Edward A. O'Neal, president, American Farm Bureau Federation.

More Income Ahead for Co-operators

Chester Davis, AAA Chief, Explains Dairy, Hog, and Beef Cattle Situation

A CLEANCUT and searching analysis of problems facing American farmers and the Agricultural Adjustment Administration, a brief review of accomplishments of the AAA, and a word about the farm program of the administration in 1934 and 1935 were given by Chester C. Davis, chief of the adjustment administration who spoke before a full house in the big armory at Danville Thursday night, Jan. 25.

Mr. Davis, well known through his former association with the I. A. A., was given a warm ovation, led by Farm Adviser J. H. Checkley, following his introduction by President Earl Smith.

Programs already under way provide for distribution in the form of benefit payments to co-operating farmers of $762,000,000 in 1933 and 1934, Davis said. Commitments of $85,000,000 for removal of surplus bring that total to $847,000,000, and if general programs now contemplated are adopted for the dairy and beef industry, the figure will exceed one billion dollars.

The speaker frankly discussed the three major problems and questions of chief interest to corn belt farmers, namely, future plans for improving prices for milk and butterfat, who pays the processing tax on hogs, and what can be done to help the beef cattle men.

Davis admitted that the milk trade agreements operating on the larger milk markets had been disappointing. In this effort, he continued, we sometimes tried to lift milk prices far our of relation to the price of competing milk sold for manufacturing purposes. This situation decreased the consumption of fluid milk and piled up higher surpluses of butter, cheese, and condensed milk.

"A price improvement that is lasting must give not only producers for fluid milk markets a fair return," he said, "but also butterfat producers. Our attempts to fix milk prices to consumers taught us that the government cannot fix resale prices and enforce them, unless it goes further and assumes the power and responsibility of regulating the intermediate steps between producer and consumer. In other words, the milk industry would have to be dealt with as a public utility.

"Our new dairy policy is based on the lessons we learned from experiences with these two objectives. Briefly that policy is this: **We are ready to go into any market with the consent of producers, and license all distributors under the requirement that they pay producers a uniform price for whole milk. We will put that price at the highest level that can be justified and sustained in the light of all economic factors in the industry and that can be enforced in the face of competition from other milk producers.** It must be an enforceable price. It must be a price that will not unduly disturb producers for other markets. Having done that, we want milk producers to cooperate in adjusting milk supply to the current demand so that prices for the entire dairy industry can be raised toward the parity level which the Agricultural Adjustment Act sets as our objective.

"Our obligation is to the entire dairy industry and in arriving at enforceable prices the whole industry must be considered. Establishment of bases for those prices must be the function of the Agricultural Adjustment Administration which cannot be delegated to another agency if federal enforcement is to result.

Treat All Alike

"Our policy treats the dairy industry as a whole: not as unrelated parts. The new marketing agreements are relied upon to bring stability into the whole milk market, while we all work in unison toward higher price levels. The prices that we can establish and enforce for whole milk are not as high as we all would like to see them set. I am sorry that this is the case. **If by any other means producers themselves can maintain better prices, we wish them every success.**"

Within a short time we expect to go before the country with a complete general program for the dairy industry, Davis said, and present it at regional conferences with dairy producers.

That Processing Tax

Answering the question, "Who pays the processing tax on hogs?" the administrator admitted "that when supply rather than demand dominates the market the tendency is to take the processing tax out of the price to producers. **That is what is happening in hogs now," he continued.** "The situation is different as to cotton and wheat because here the export market is the determining factor. But pork is a perishable commodity with little export demand and when the supply is relatively large the tax cannot be passed entirely on to the consumer."

Davis asserted that as soon as farmers cut pork production and remove the surplus the processing tax

can be passed on to the consumer, and not before. The processing tax, he explained, is part of the price farmers receive for hogs that is temporarily withheld, and that it will be paid back later to co-operating farmers in the form of checks from the government.

He stated that the government is now purchasing 20,000 hogs per day for relief distribution and that "we would buy more if we could get the packers to process more at a fair margin."

Referring to the beef cattle situation, Davis explained that we are now at the high point of production of a seven-year cycle with consequent low prices, and that this condition coupled with low consumer purchasing power has resulted in a serious over-production of beef, "the most serious we have ever had."

Must O K It

He stated that it has been suggested that congress appropriate $200,000,000 for the cattle and beef industry to solve the surplus problem but warned that cattle would not be included in the adjustment act nor a program put into operation unless beef cattle men support it.

Reviewing the accomplishments of the AAA, the speaker stated that approximately a half million wheat growers had received already more than $40,000,000 in benefit payments with 8c per bu. still to come. The reduction in acreage of 7.2% under the three year 1930-32 average, he stated, would be increased by growers who expect to plow up part of the acreage seeded before they had signed contracts.

He showed that the cotton price had been raised from 5c to 10½c per lb. by the plow-up campaign in the south and that around one million cotton farmers had benefited by the program.

Similarly flue-cured tobacco growers received for their 1933 crop 2½ times as much as for the 1932 crop and twice the amount they realized from the 1931 crop.

The Real Objective

"Our real objective," he said, "is not to distribute benefit payments, but to adjust production to demand so that prices may rise toward parity as rapidly as possible."

In closing, Mr. Davis answered the small rebel minority of the farmers holiday movement who are against everything that is being done, yet have nothing constructive to offer, by saying, "if you insist on having agricultural prices fixed at parity without regard to the quantity you produce, then fire your farm leaders; discharge those of us who are temporarily trying to serve you at Washington—and hire some magicians. We don't know how to do it."

FRIDAY A. M.

Prof. Pearson's Big Blowout

Just to prove there are queerer noises than a hog caller at two A. M., Prof. Pearson, afflicted with a cold, gave his own special brand of nose-tooting in the Danville armory Friday morning, and with loud speaker amplifications. It was without a doubt the biggest blow heard in these parts for many a year and it stands out as the "big noise" of the convention.

The Delegate Gets A Room For the Night

An elderly gentleman approached the desk in the Wolford Hotel and asked politely about reservations for Kankakee county. He was told that Kankakee county had a reservation in the name of Mr. Swaim, the farm adviser. Well then, was there room with Mr. Swaim, asked the gentleman. No there wasn't, replied the clerk. The elderly gentleman looked about uncertainly. "Hello there, Governor," cried someone. The gentleman nodded a greeting. The clerk looked on. More delegates stepped up to shake the elderly gentleman's hand. "Who is he?" asked the clerk. "Why that's Len Small," he was told. The clerk routed out the manager, who looked up Otis Kercher, who did a little rearranging. And so ex-Governor Len Small, president of the Kankakee County Farm Bureau, got a bed for the night and went to the I. A. A. convention.

Randolph, Madison, Peoria Win Contest

Awarded Prizes By I. A. A. For Publicity Work

The Randolph County Farm Bureau was awarded the silver cup and cash prize of $75 for placing first in the 1933 County Farm Bureau Publicity Contest sponsored by the I. A. A. Madison County Farm Bureau won the second prize of $50, and the Peoria County Farm Bureau third prize of $25.

The awards were made by Secretary George E. Metzger at the annual I. A. A. banquet at Danville, January 25.

Judges of the contest were Wm. L. Stahl, director of publicity, Farmers National Grain Corp.; Floyd Keepers, managing editor, Prairie Farmer; and Fred Koenig of the Koenig Advertising Agency, Chicago.

Each County Farm Bureau was asked to enter an exhibit of newspaper clippings, copies of stories released to the press, a complete file of the County Farm Bureau bulletin for 1933, copies of letters and special literature sent to members, etc. The increase or decrease in membership for the year also was taken into consideration.

In making its award the committee of judges said: While one county may have obtained a great deal more publicity than another as measured by volume of clippings, the effectiveness of such publicity should be measured by the way it was linked up with Farm Bureau activities and effort. Some of the counties supplying the largest amount of publicity fell a little short, we think, in showing what part the Farm Bureau had in the organization of the activity mentioned in the press. Another county may have had a little less publicity but the stories were more effective because the Farm Bureau angle was outstanding.

"To merely send to the papers a press release dealing with a certain subject and not show in what way that subject is related to the Farm Bureau program weakens the story from an organization standpoint. It happened that while one county excelled in one particular phase of the contest another county perhaps excelled in another phase.

"The exhibits were judged on the basis of all the points mentioned in the announcement explaining the contest sent out by the Department of Information of the I. A. A. early in the year. The prize winners were among those who submitted exhibits touching on each phase of the contest."

Gold and the Commodity Dollar

Prof. F. A. Pearson Tells How Commodity Prices Can Be Raised By Gold Revaluation

ONE of the highlights of the three-day session was the address of Prof. F. A. Pearson of the New York State College of Agriculture before nearly 3,000 people Friday morning. He presented a difficult and intricate subject clearly and interestingly with the aid of mimeographed copies of numerous charts, tables, as well as his remarks which were distributed to everyone in the large audience before he began speaking.

Left to right: Prof. F. A. Pearson, Ithaca, N. Y.; C. V. Gregory, editor, Prairie Farmer; and Walter L. Rust, president, Federal Land Bank, St. Louis, speaking to Treasurer Robt. A. Cowles of the I. A. A.

"Coming down from Chicago to Danville on the train," the professor said, "I noticed that most of your barns and buildings need paint. I saw no new construction work. Many buildings are in need of new roofs and repairs. Since I left Illinois more than ten years ago (he was formerly on the staff of the Illinois College of Agriculture) I notice two big changes. You have more hard roads and you get up earlier in the morning to call hogs."

The great obstacle to rapid business recovery is the low level of public and private construction, Dr. Pearson said. He heartily endorsed the world-wide policy of raising the price of gold to raise commodity prices.

The speaker reviewed many phases of the gold question, touching on the present crisis, supply and demand for gold, price and value of gold both here and abroad, the relation of debtor to creditor, and rebuilding of the price structure.

This low level of construction, he said, results from reduced national income caused by collapse in commodity prices. Decline in property values, he added, plays havoc in enterprises with large capital investment and slow turnover. "If bonds of the federal, state, and other governmental units are eliminated, most capital of the creditor class is now invested in mortgages and bonds in enterprises of this type.

"When creditors cannot collect," Dr. Pearson said, "they are very cautious about making new long-term commitments. Restoration of commodity prices will increase national income and enable creditors to collect. When this occurs, bank credit will be easy to obtain, and long-term capital will be readily available for new investment, public and private.

"The capital of life insurance companies, endowed colleges, hospitals, public libraries, research organizations, welfare agencies, banks, the white collar class, and others is invested in the bonds, mortgages, and other forms of credit which are extended to home owners and farmers and to industry and transportation. When capital moves freely from debtor to creditor, and when interest and principal payments flow from debtor to creditor, the nation proceeds on an even keel."

Dr. Pearson said "it is to the advantage of the creditor class that prices should be increased to and maintained at a level where the incomes of the debtor class will be more than sufficient to (a) take care of subsistence and an ever-increasing standard of living, and (b) to meet the increasing cost of expanding public services.

"The collapse in commodity prices so reduced the national income that it became impossible for the creditor class to collect. Remedial legislation was drafted to protect the creditor as well as to relieve the debtor."

It was commonly believed, Dr. Pearson continued, that the creditor class gains when paid in dollars that are more valuable. These apparent gains, he added, are small compared with losses of principal that invariably accompany a collapse in commodity prices. He said it is now commonly believed that creditors will lose by a restoration of a balance in the price structure, and that the slight loss in purchasing power of the creditors' income is more than made up by the elimination of huge losses of principal from which the creditors would otherwise suffer.

"Therefore," Dr. Pearson concluded, "a policy to raise the price of gold to re-establish a balance in the price structure and thereby restore incomes and profits is of inestimable value to the creditor class of this country."

Concerning commodity prices, he said, one of the most spectacular advances in history occurred from April to October, 1933. He pointed out that in only one six-months' period, during the World War, did prices of basic commodities show a larger percentage advance.

Dr. Pearson credited the American crisis to the collapse in commodity prices. "Never before in the peace-time annals of American history," he said, "has this country experienced a 54 per cent decline in prices of basic commodities in 41 months." He said it could be explained in one of four ways: a decrease in demand for goods, an advance in the supply, or a change in the supply of gold or in demand for gold.

Dr. Pearson discarded the idea of decreased demand and increased supply of goods as the major cause of the price decline. He said decreased demand arose from lower incomes which, in turn, resulted in under-consumption of some commodities. "The United States and the world suffer from malnutrition due to under-consumption of goods," he stated.

"Neither was the collapse due to a great shortage of monetary gold," he added. "From 1914 to 1928, commod-

ity prices were much higher than the ratio of gold stocks to production of other commodities demanded. During this period the world monetary stock of gold increased 38 per cent; world volume basic production also increased 38 per cent. If the 75-year pre-war relationship had continued, pre-war prices would have been expected.

"Why were prices so high from 1914 to 1929?" he asked, and answered that the reason, apparently, was due to the low demand for gold. "When the World War broke out, most of the European countries abandoned the gold standard. Gold was no longer in demand, and it drifted to the United States and other neutral countries. This reduced demand for gold made it cheap and, as a result, commodity prices in terms of gold rose in the few countries that remained on the gold standard. It was the gold and not the commodities that changed. After the war was over, the return of one country after another to the gold standard increased the demand for gold so that its value rose, and commoditity prices fell.

"The world is now conducting a gigantic experiment in varying the price of gold to overcome the devastating effects of the rising value of gold and declining commodity prices. **Thirty-four countries, including the United States, have abandoned the attempt to maintain their fixed legal prices for gold and are raising their buying price for the metal. When this experiment is over, some of these nations may have money units variable in weight but stable in value. No nation has had wild inflation when it had a high metallic reserve. The solution to the world situation lies in reducing everything to the price level or increasing the price of gold. The world has found it expedient to adopt the latter course."**

A scientific money, Dr. Pearson continued, is one with a constant buying power for all commodities rather than a fixed weight of one commodity. Our whole tax and credit structure rests on commodity prices. If this structure is to be kept sound, he said, for both creditor and debtor, commodity prices must be kept stable and not the weight of gold in dollar exchange. He declared that by changing the price of gold a country can establish any price level it wishes independent of other countries, and by that act establish its internal business conditions which, in turn, affect securities.

During the last ten months of 1933, he stated, the price of gold in the United States rose 56 per cent; in the United Kingdom 5 per cent. At the same time prices of commodities rose 56 per cent in America and 15 per cent in the United Kingdom. This comparisons was based on prices of 15 identical commodities.

Mayor Claude Madden of Danville in his spirited welcoming address on the opening program of the I. A. A. convention said "Danville is one of the two cities in the United States in which all the banks opened the morning the bank moratorium was called off." He received a great ovation from the crowd when he told the members the town was theirs for the duration of the convention. "Park your cars on the streets all night and stay as long as you want to," he said.

"In the general advance in farm prices," Dr. Pearson said, "that accompanied the rising price of gold, most products advanced but not at a uniform rate." He said this happened because the gold price is only one of the four major factors affecting the price of a commodity. The price of a commodity in large demand and short supply advances much more rapidly than the price of gold and conversely he stated, the price of a commodity of low demand and large supply will not advance so rapidly as the price of gold.

We should not be too disturbed because so little progress has been made in the past toward obtaining a stable measure of value. Inertia is such a dominant force in our thoughts and actions, that great changes rarely occur until an unusual event forces them upon us. The unparalleled peacetime rise in the value of gold forced the issue and very rapid progress is now being made. As a result of the unparalleled chaos of the last three years and the present widespread knowledge concerning the problem, it is possible that we may get a stable measure of value so that our children and our children's children will not suffer from the violent fluctuations in the value of gold which this generation has experienced. If we get it, the price we are paying, although high, is cheap in terms of human progress.

Messages Read At Annual Banquet

In addition to messages from President Roosevelt and Speaker Henry T. Rainey, President Smith read telegrams and letters of greeting to the convention from W. I. Myers, governor of the Farm Credit Administration, State Senator Simon E. Lantz who was unable to attend because of illness, and Sam H. Thompson of Quincy, former A. F. B. F. and I. A. A. president. Chester Davis brought a personal message from Secretary of Agriculture Henry A. Wallace who addressed the meeting last year.

Informational Service Emphasized in Conference

More Than 500 Hold Lively Session Discussing Organization, Information, and Collections

BETWEEN 500 and 600 delegates, members and farm advisers attended the organization-information conference held Thursday afternoon, Jan. 25, in the Wolford Hotel, Danville. The session was devoted to shop talk on publicity, organization and collection problems.

An effective County Farm Bureau publicity program is broad and varied and seeks to inform not only members about the work and benefits of the organization but also attempts to interest non-members, George Thiem, editor of the I. A. A. RECORD, told the conference. He stated that there are still many farmers in Illinois who apparently know very little about the part organization has played in bringing about benefits through federal and state legislation.

He suggested that County Farm Bureau bulletins be filled with more live news written from a local angle and telling what the organization and its members are doing. He advocated community and township meetings, such as those now being held over the state to explain the corn-hog program, as a means of informing more people about Farm Bureau services. He stated that the County Farm Bureaus in Illinois that were doing effective publicity work were the ones that were gaining in membership; that the organizations which gave very little attention to news releases and informational service were losing members and going down.

George E. Metzger, director of organization, emphasized the necessity for Farm Bureaus cutting off service within a reasonable time after dues become delinquent. When the County Farm Bureau is not making progress,

(Continued on page 18)

Auditing Association Has Good Meeting

Clifford Gregory Makes Interesting Talk on the Money Question

FARMERS should take a great deal of satisfaction out of the fact that many of the leaders in national affairs have come from their ranks, C. V. Gregory, Editor of the Prairie Farmer, said in addressing the annual meeting of the Illinois Agricultural Auditing Ass'n at Danville, Jan. 24.

The president of the United States, the secretary of the treasury, the secretary of agriculture, as well as many other federal officials are farmers and Farm Bureau members, Mr. Gregory said. Farmers and agricultural professors are now exerting their influence in the national capital. The honest dollar, for which organized agriculture has been fighting, is now in prospect, far in advance of the time any one expected that it could be accomplished.

The speaker pointed out that money and credit constitute the life blood of a nation and that its control is now being taken away from the big bankers of Wall Street and given to the treasury of the United States. Naturally, the bankers do not like it, he said, but there is little, if any, possibility of back-tracking. Whatever group is in control of money and credit is in position to take profits. For many years, the banking group has been the favored class. Several months ago, the country went off the gold standard. This was done quietly and very little effect was noticed by industry. There were some rather rapid advances in farm prices, and to meet such advances sometime ago, the Government began to buy gold at prices higher than the established monetary value. The President's chief financial adviser, Dr. Warren, has stated that as gold goes up, prices also go up. If the price of gold is doubled, the price of commodities should double. A level between the two will inevitably be reestablished, although the commodity price advance has been slow. This is due to the restriction on the natural flow caused by the falling off of export trade. Mr. Gregory stated that the present foreign trade situation is unnatural. All countries have established high protective tariff walls, which has delayed the recovery program.

The total result of the public works and civil works, and the entire line of public spending, Gregory said, is a form of inflation, the effect of which will be to raise the price of everything. Prices that went down quickest and farthest will go up first, except in the cases where the supply is so great that the normal laws do not apply.

We have been hearing a great deal about the "boloney dollar," but the only "boloney dollar" that I know anything about, he said, is the "boloney dollar" that we've been getting for our hogs.

Every step that President Roosevelt has taken has been leading up to ruin, according to certain groups. We were warned by the financial "geniuses" that one of the first effects of the President's monetary policies would be the refusal of investors to buy government securities. The government's credit would be ruined. However, the recent issue of $900,000,000 was oversubscribed four times and within the last few days, the Federal Reserve Bank has agreed to underwrite the entire ten billion dollars needed to carry on the government's planned program. (The day of the meeting, a one billion dollar, 2½%, issue was oversubscribed five times.)

Now that it is evident that the government is going to get the funds necessary to finance the recovery program, we are told that prosperity will not last long because the 32 billion dollar debts will have to be repaid. The way to pay it is to pass the hat, he said. In 1933 we had 35 to 40 billions less income than in 1929. Under the present program, the national income should go back to about 75 or 80 billions and if it does, the bill can be paid.

Mr. Gregory reminded his audience that back in 1919, nine-tenths of the mail received by Prairie Farmer was letters from farmers asking questions about income tax. He believes that the farmers will not object to paying taxes if they get reasonable income.

In closing he said, "organized farmers are responsible for much of the progress made but they must not rest on their laurels. They must continue their efforts when the government gets control."

The officers and management of the Illinois Agricultural Auditing Association submitted reports for the year 1933 showing that a strong financial condition has been maintained and that the results of operations during the year were very satisfactory. Seventeen new membership and service agreements were entered into during the year and a total of 308 agricultural organizations are now being served. Approximately 2,700 audit and other service engagements have been completed during the 9½ years that the Association has been in existence. Operating economies have enabled the Association to lower its rates, and the cost of service in 1933 was less to member companies than in any preceding year. Officers and directors selected for the ensuing year are—Albert E. Heckle, Quincy, President; Jesse L. Beery, Cerro Gordo, vice president; Geo. E. Metzger, Chicago, secretary; R. A. Cowles, Bloomington, treasurer; R. H. Voorhees, Jerseyville, director; C. R. Hays, Normal, director; Paul Harker, Peoria, director.

More than 300 attended the meeting which was the largest held for many years.

AT THE ANNUAL BANQUET THURSDAY NIGHT

Left to right: E. C. Hewes, general manager, Danville Commercial-News; Wm. S. Bradley, director, corn loan division of AAA; and Dean H. W. Mumford, College of Agriculture, University of Illinois.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Resolutions Adopted by Board of Delegates, 19th Annual Convention, Illinois Agricultural Association, Danville, January 25-26, 1934

I.

WE APPROVE the principles of legislation embodied in the Agricultural Adjustment Act and believe its immediate and effective administration will substantially increase the price level of basic agricultural commodities.

We urge immediate and more complete use of the licensing and regulatory provisions of the Act; particularly should this be done for the proper control and regulation of the meat packing industry. There should be no further delay in the use of the power to license and regulate meat packers in order to immediately discontinue the excessive profits made upon very low priced meat animals during the last six months as reflected in the statements of income and dividends of the respective meat packers. We further urge that immediately upon the levy of processing taxes upon any basic agricultural crops, equivalent increases in import duties on all foreign commodities that compete with such basic agricultural commodities be imposed, as is provided for and authorized in the Agricultural Adjustment Act. We pledge to Secretary Wallace, Administrator Davis and their associates, the support and cooperation of the Illinois Agricultural Association in the simplest possible and practical administration of the Act in such manner as will increase prices to producers at the earliest possible time.

II.

We believe the permanent solution of the farm surplus problem will be found in securing part or all of the following objectives:

1. **New industrial uses for farm commodities;**
2. **Reciprocal trade agreements with foreign Nations;**
3. **Removal of marginal and sub-marginal lands from production and their restoration to the public domain;**

We request the Board of Directors of the Illinois Agricultural Association to take such steps as may appear to be necessary to accomplish these ends.

Particularly we urge that every reasonable effort be continued to secure universal use of motor fuel blended with not less than 10 per cent (10%) of Ethyl alcohol made of corn or other agricultural products grown in the Continental United States. We also urge efforts to stimulate by every reasonable means the use of paint containing a large proportion of Soybean Oil.

We further commend and approve continued study and investigation to develop new industrial uses of farm products.

III.

Experience in the present depression has demonstrated more clearly than ever before the absolute necessity of establishing and maintaining a complete system of farm credits which will at all times and at reasonable cost meet all proper credit needs of farmers and farm owners. We commend the efforts of the Federal Government, both in the past and at the present time, to make more suitable forms of farm credit available. We urge that every proper effort be further made to simplify the procedure in making any kind of farm loans, to reduce the rate of interest as far as conditions permit, and reduce appraisal costs wherever it is possible to do so.

IV.

The continued importation of tropical fruits and oils which compete with domestic fruits, oils, and fats increases the difficulties of restoring a proper price level for a number of our domestic products. We authorize and direct the Officers and Directors of the Illinois Agricultural Association to **use every effort in behalf of measures to conserve the domestic market for our domestic products.**

V.

Packer buying of livestock direct from farmers has had disastrous effects upon price levels. It is one of our major problems in marketing. The Illinois Livestock Marketing Association was established as one means of combating this weakness of our marketing system. Its object is to enable livestock producers to deal collectively in assembling and moving livestock from country points without permitting the packer or his representative to become in effect the sole abriter as to price, weight, grade and conditions of sale. Its policy is to correlate all parts of our cooperative marketing machinery.

Thousands of Illinois farmers have pledged themselves recently not to sell direct to packers. This movement is serving a valuable purpose in calling national attention to the emergency which exists in livestock marketing and in

encouraging the careful consideration of all factors involved by farmers and Government alike. However, a sectional movement cannot solve a national problem.

The Illinois Agricultural Association stands ready to co-operate with organized groups of live stock producers in this and other states in working out a satisfactory and permanent solution of this problem. We urge the Department of Agriculture of the United States to exercise its full authority in the speedy development of proper measures either to control or to eliminate the buying of livestock by packers direct from farmers.

VI.

Because of the imminent threat of invasion of Illinois by the corn-borer, we urge the Officers and Directors of the Illinois Agricultural Association to support the continuance of reasonable governmental appropriations for research and investigation of means to combat and control this destructive pest.

VII.

In order to relieve the disproportionate burden imposed on property by the provisions of our present constitution, we propose that the constitution be amended to empower the General Assembly to distribute the cost of government and to impose taxes according to ability to pay; to fix a Constitutional limitation upon property taxes which will reduce present taxes on property one-half and that such limitation shall not exceed one per cent (1%) of the fair cash value, exclusive of taxes levied for payment of principal and interest on bonded indebtedness; to require a referendum vote before indebtedness is incurred by any local government and to authorize legislation providing for uniform budgeting, auditing and publication of local governmental expenditures.

VIII.

We commend the efforts of the legislative committee of the Illinois Agricultural Association in opposing legislation before the First Special Session of the Fifty-Eighth General Assembly providing for an increase of Thirty-eight million dollars ($38,000,000) in the State Tax levy upon property, coupled with the submission of a bond issue to the voters next November. We are forced to recognize that this legislation has been enacted and that unless the bond issue is approved by the voters at the polls, the property taxpayers of the State will be forced to meet and pay an increased tax of $38,000,000 in 1935, we, therefore, favor the passage of this bond issue when submitted but serve notice that in the future, bond issues of this or a similar character will have the determined opposition of this organization, at least until such time as the General Assembly imposes equal and uniform responsibility for poor relief upon every community and county of the State.

IX.

We re-affirm our belief in the principle that each local community should draw reasonably upon its own resources before state aid or credit is extended for relief purposes and we direct the Officers and Directors of this Association to continue to urge and seek legislation which will place all communities upon the same basis and enable them to draw upon their resources and we oppose the continuation or any extension of state aid or credit to any community until that community has made a reasonable effort to provide for its destitute.

X.

Inasmuch as the Illinois primary road system is practically completed but only thirty per cent (30%) of the total mileage of the State has been improved with an all weather construction and seventy per cent (70%) of the farmers still reside upon dirt roads, we oppose any further diversion of gasoline tax moneys from road building whether by investment in State antipication notes or otherwise, and direct the Officers and Directors of the Association to exert every effort to preserve these moneys for road building, the purpose for which the tax was imposed.

XI.

We reaffirm our belief in the legislation providing for a moratorium on mortgages, heretofore sponsored by the Association and of the nature recently sustained by the United States Supreme Court, and direct the Officers and Directors of the Association to seek the enactment of such legislation at the next special session of the General Assembly.

XII.

To reduce the charges in connection with chattel mortgages, we authorize and instruct the Officers and Board of Directors of the Illinois Agricultural Association to seek the enactment of legislation which will permit chattel mortgages for farm production and other purposes to be filed at nominal cost in the offices of County Recorders instead of recorded, necessarily at considerably higher costs, as at present, and to request that this subject be included in the call for the next special session.

XIII.

In order to more effectively combat organized crime, we favor legislation authorizing an adequate state police force, free from political domination, empowered to enforce the criminal laws and to apprehend criminals in any county or municipality of the state.

XIV.

We favor amendment of the Agricultural Adjustment Act to provide that if and when two-thirds of the producers of any basic commodity voluntarily respond and co-operate with one another to reduce production of such commodity in line with a policy announced by the AAA, that the Secretary of Agriculture be given authority by proclamation or otherwise to limit production of such commodity by non-co-operators to the base production provided in the adjustment program for the commodity.

Two additional resolutions offered from the floor at the business session Friday afternoon were unanimously adopted. One urged that the Agricultural Adjustment Administration take steps at an early date to solve the beef surplus problem and as part of the program that the U. S. government withdraw public domain lands from grazing.

In this connection, it was explained by President Earl Smith that the American Farm Bureau Federation and the I. A. A. are now supporting an amendment to the Agricultural Adjustment Act to include beef cattle as a basic commodity.

The other resolution suggested by Cook county vegetable growers urged that farmers avoid planting fruits and vegetables on lands not under contract as well as on acreage under contract, and thus prevent further surpluses from piling up.

A proposed resolution urging state legislation to raise the minimum butterfat content in fluid milk from 3 to 3.5% and in cream from 18 to 22% was referred to the I. A. A. board of directors for further study at the request of delegates from the northern Illinois dairy district.

The resolutions committee composed of A. R. Wright, Varna, chairman; M. Ray Ihrig, E. D. Lawrence, W. A. Dennis, Geo. Muller, Chas. Marshall, R. B. Endicott, H. C. Irwin, E. R. Reeves, Frank Gallaway, Harry Bergener, and John Hanna, was assisted by Donald Kirkpatrick and Paul Mathias of the legal department, and John C. Watson of the department of taxation.

Pres. Smith Reviews Agricultural Problems

Sees Acreage Reduction as Emergency Measure Only, Outlines Work For Future

Any Room in the Wolford at the I. A. A. Convention.

"I REGARD national efforts now in the making to restore parity prices of farm crops as of an emergency character. Owners of fertile farm lands must not longer than necessary be asked to maintain but keep idle large portions of their respective acreages," President Earl C. Smith said in his annual report and address at the opening session of the I. A. A. convention in the great armory at Danville, Thursday morning, January 25. He spoke to a full house with many seated in the gallery.

"It is my belief," he continued, "that the ultimate and permanent solution of the farm problem embodies three major objectives: (1) restoring and maintaining agricultural exports in proper relationship to industrial exports through trade agreements with foreign nations; (2) the immediate development of new and large industrial uses for the raw materials produced on American farms; and (3) national planning on a basis that will take from production large areas of marginal lands which never have been or never will be profitable from an agricultural standpoint; but could be much better utilized by restoring to the public domain and used in reforestation or otherwise by the Federal and State Governments.

"The development of these three policies again presents a challenge to farm organizations and to the statesmanship of the country.

"In the meantime," continued Mr. Smith, "we have cause to be thankful that at last we have full authority for federal assistance and that efforts are being made to increase price levels of farm commodities." He characterized the Agricultural Adjustment Act as the most far-reaching legislation enacted by Congress during the present generation, in reviewing the long fight of organized agriculture for effective legislation to remove the disparity between agricultural and non-agricultural prices.

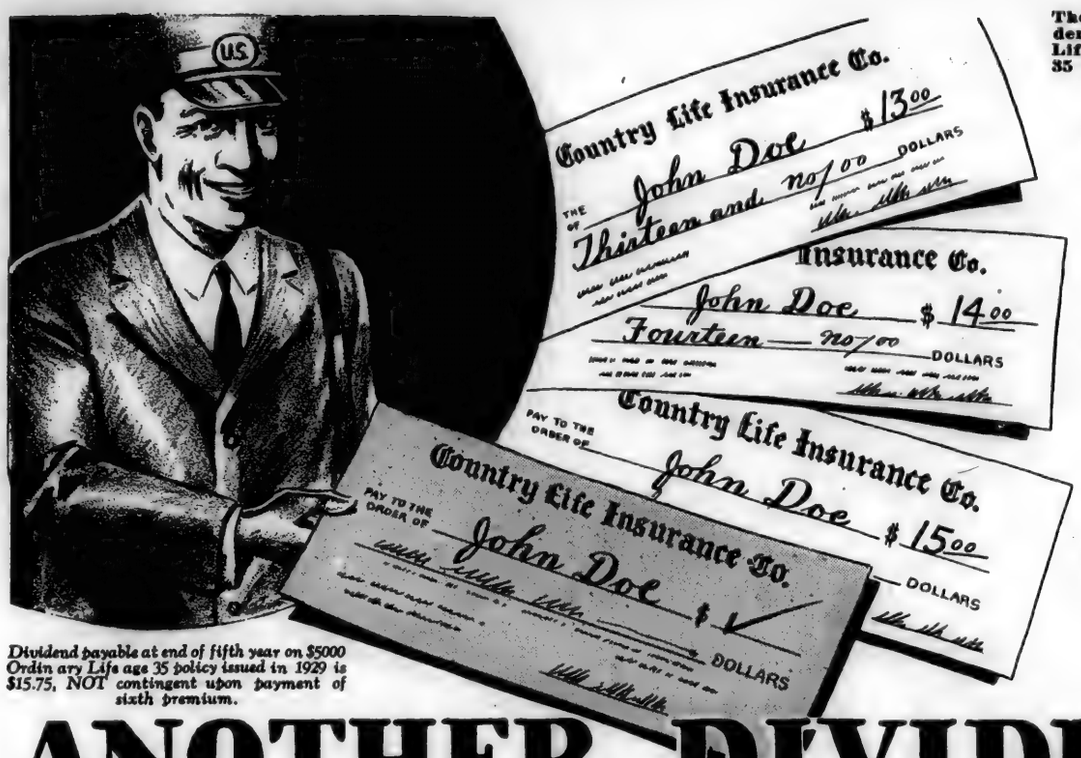
He paid tribute to the leadership of Frank O. Lowden in bringing the farm issue to the front in the years 1926 to 1928. "It probably should and does bring deep and lasting satisfaction to be able to say on this occasion," he continued, "that it now seems the forgotten man will ultimately be given an equal and just opportunity with his fellow men."

Mr. Smith reviewed in detail the accomplishments of the commercial organizations during the past year, the activities of the organization in state legislation, discussed at length the national economic situation, outlined the contents of the Agricultural Adjustment Act, and spoke of efforts made since the enactment of this legislation to improve wheat, corn and hog prices.

Referring to the corn-hog program he said: "Corn and hog farmers at last have their first opportunity largely to determine the future price levels of these commodities. Their action will largely determine whether their future sales of hogs and corn will show a loss or profit. If enthusiastic co-operation and support of farmers is given, future production of these commodities will be profitable. Without the combined effort and support of farmers no policy of government can permanently influence and maintain price levels."

Speaking of the corn loan policy of the administration, he said, "The Association took a leading part in securing from the government the adoption of a price-supporting policy for corn and in a lesser degree for the hog market. At the time this effort was initiated the average country price for corn in Illinois was 23 cents and seemed destined to go lower. . . .

"The Association believed that if the government was justified in many of its other price and wage-supporting policies, it was only fair and just that the price of this important basic commodity should be supported and maintained. Although the price of corn is yet far from parity it has been greatly stimulated as a result of this service.



"More than $70,000,000 have been loaned upon corn in sealed cribs on the farms in mid-western corn states on a basis of 45 cents a bushel. It has been carefully estimated that this temporary service has already increased by $150,000,000 the current values and incomes of farmers in the middle west. This amount will be much greater if and when farmers respond in the 1934 program to reduce corn acreage and thereby create a deficit in production that will allow normal consumption of the accumulated surplus of corn."

Mr. Smith commended the efforts of western Illinois livestock growers in organizing against direct buying methods of the packers. He referred to a study being made by the Secretary of Agriculture of the price effect of direct selling of hogs and other livestock to processors. "While as an institution the I. A. A. could not lead farmers to believe that any sectional effort of this character would result in permanently higher price levels," he said, "yet it has repeatedly urged action by the Department of Agriculture and pledged its support to a corn-belt program for the curtailment, regulation, or removal of these practices."

Reviewing state legislative activities during the past year the speaker stated that "the Association does not regard the present occupational tax as a fair tax, but does regard it as fairer than the general property tax in that an occupation tax can reach more than one-half of the population of the state who cannot be reached by property taxes. Until the people of the state vote for constitutional changes to permit an equitable taxing system, the occupation tax, with amendments to make it apply as much to the rich as to the poor, which it does not do now, ought to be continued for the exclusive purpose of replacing, dollar for dollar, taxes now levied on property. This principle of property tax replacement was introduced and has been continuously supported by the Illinois Agricultural Association.

"With the approval of the board of delegates the I. A. A. will fight for an amendment placing a reasonable limitation upon property taxes and removing all present restrictions upon

(Continued on page 14)

These are sample dividends on an Ordinary Life Policy taken at age 35 and issued in 1929

Third premium dividend on $5000 policy, $13

Fourth premium dividend on $5000 policy, $14

Fifth premium dividend on $5000 policy, $15

Dividend payable at end of fifth year on $5000 Ordinary Life age 35 policy issued in 1929 is $15.75, NOT contingent upon payment of sixth premium.

ANOTHER DIVIDEND IS HERE!

Country Life Insurance Company again pays an increased dividend with all policies participating. Now the policy that is two years old receives a dividend not contingent upon the payment of the third premium and annually thereafter the dividend will NOT be contingent upon the payment of the next premium due.

As illustrated above, on a policy issued in 1929 on the Ordinary Life plan at age 35, the FIRST dividend was paid at the end of the SECOND year upon payment of the THIRD premium. Annually, the step-up has been as pictured above. This resulted in three dividends in five years. Now, the new method of paying dividends gives the SAME increase as illustrated but brings FOUR dividends in FIVE years, or 19 dividends in 20 years. In the above illustration, please note that the FOURTH dividend check on a $5000 policy will be for $15.75.

ASSETS INCREASE 35%

This steady increase in dividends is made possible through low overhead and operating costs and a sound investment policy plus the increasing confidence of Illinois farm people and their friends in Country Life's legal reserve, profit-sharing type of structure. In spite of low farm prices and general unrest, Country Life proved again the soundness of the co-operative principle by increasing its insurance in force $6,697,557 to a 1933 total exceeding $54,000,000. All claims were paid promptly. Assets increased 35% to $2,468,476, with more than 90% of all reserve funds invested in government, state and municipal bonds. With a strong cash position, low selling expense and careful selection of risks, Country Life starts a new year bringing even greater strength, security and protection to its policyholders at steadily lowering costs.

ENJOY LOW COST PROTECTION

Accept please, without obligation, the coupon offer. Thousands are turning to Country Life for their insurance needs because of its strength, security, generous dividend payments which reduce the net cost of protection. Careful investing of funds assures a strong liquid condition and prompt payment of claims. Go to your Country Farm Bureau office for rates. There, you will be given all details of Country Life's various policies in a helpful, neighborly manner. If you prefer, USE COUPON and full information will be sent direct to your home.

Pres. Smith Reviews Agricultural Problems

(Continued from page 12)

other sources of revenue and their use to replace taxes now levied upon property. Such an amendment would furnish real reasons for taxpayers to fight for and secure its adoption at the polls. We do not believe that any amendment will be approved by the people, unless it has such provisions."

Reviewing the position of the I. A. A. on unemployment relief he continued: "Without exception, responsibility for the defeat of constructive revenue legislation and the failure to submit a reasonable and just amendment to the revenue article of the constitution rests upon Chicago politicians and certain down-state legislators, who with their support made the efforts of Chicago political leaders successful. Certainly the time has arrived when the voters of Illinois must distinguish between statesmen sincerely endeavoring to serve the interests of the people and politicians representing selfish interests. The citizens of Illinois will not and cannot have just and fair revision of the state's revenue laws until radical revision of the revenue article of the constitution is had. We find that, in large part, the delay in getting the submission of such an amendment is caused by the selfish interests enjoying protection and advantages under the restrictions of the present revenue article.

"Although in the minority, the politicians that represent these special interests have resorted to every kind of intrigue and appeal, and through subtle amendments to practically every constructive revenue law or amendment proposed, have been successful in defeating the efforts of those members of the General Assembly who have sincerely endeavored to serve the interests of the people.

"A careful review of the voting records of the members of the General Assembly on all revenue matters will easily disclose the distinction as between statesmen and politicians to which I refer. The property taxpayers of this state will win this battle, if and when and just to the extent they refuse to support for reelection, regardless of their party affiliation, those who through compromise, influence or vote, have failed to put forth every reasonable and proper effort in support of equitable and just revenue reform. (Applause)

"Shall we meet the challenge that confronts us? If the desire for home and other property ownership is to be restored and maintained, the selfish interests that have for so long been protected at the expense of property owners, must be met and overcome. There is no individual group or institution in Illinois as well prepared as the Illinois Agricultural Association to assume leadership in this fight to take from the politicians and restore to the people their rights under fair and equitable revenue laws."

Macoupin County Delegation at 2 A. M.

Referring to diversion of gas tax funds for other purposes Mr. Smith said: "This should be stopped. Only about 30 per cent of the farms of the state are located on improved highways capable of all year use. The remaining 70 per cent of the farms are located on dirt roads difficult or impossible for motor vehicles to use for considerable periods of time every year. I also find that only about 30% of the highways of the state are improved. At least until a secondary road system is laid out and completed, every reasonable and proper influence of the Farm Bureau movement, community, county and state, should be used to secure the discontinuance of using this revenue for other than the building and maintenance of highways and streets."

Mr. Smith concluded his address by saying: "Whatever have been our accomplishments and attainments, they are the result of the impelling force of the united thinking and action of the membership.

"The voice and the influence of the institution cannot and will not be stronger than those for whom it speaks. So let us not lose sight of the thing that has made all pronouncements of the institution possible. Without group action, we would have accomplished nothing. Without organization, our recent achievements as well as those of earlier years would not have been realized. Organization, like a machine, is merely a means to an end; yet the productiveness of the machine and its ability to do the job for which it was designed and built depends on how well it is maintained. The organization machine must rest on a solid foundation of membership. The united strength and support of the members hold it up and give it power and influence to cope with the great problems affecting the present and future of agriculture. It must be adequately financed.

"Sometimes we hear that to increase the membership, the membership fee should be reduced. In every state where this has been tried, it has resulted in a substantial decrease in membership. We, in Illinois, have a higher membership fee than in any other state; yet we have the largest supporting Farm Bureau membership of any state in the Union. (Applause) There is a reason, and that reason can be expressed in a single word—service. While we as members have put more in, we have also taken more out. It has been said that a Farm Bureau membership in Illinois costs nothing, if the member uses the organization. It merely costs $15 per year for non-members who join but fail to use or participate in its services.

"Farmers are not interested nor should they be interested in maintaining an organization just for the sake of organization. The only excuse for organization is to accomplish a worthy end and get things done. If I thought that the work of a state association was finished or that the problems confronting farmers were greatly reduced, I would be the first to recommend that we disband and prorate back to the members whatever assets have been accumulated. On the contrary with each succeeding day, we see and witness ever-increasing problems confronting the farmers of state and Nation.

"If Government could or would, regardless of who happened to be in control, restore to agriculture a fair share of the national income and legislate fairly for farmers without their being heard, then we could be less enthusiastic about the need of organization. If we were justified in believing that our present marketing system is perfect, that the farmer is getting as much of the consumer's dollar as he is entitled to, we could say, Let's forget about our marketing problems and activities—let's stay home on the farm, produce and let others market our products for us.

"If we could rest content in the belief that we have a perfect taxing system and that the tax burden would be equitably distributed and that farm property would bear no more than its just share, we could say, Let's dispense

Macoupin County Boys Get Vaniman's Balloons

The attending nimrods had a fine opportunity to test out their pin shooting marksmanship on Vaniman's balloon exhibit. The best record was made by a delegate from Macoupin county who finally managed to hit four balloons in five tries. Other delegates declared this to be unfair inasmuch as the Macoupin delegation stayed up three nights to make the record when other people were in bed, though not sleeping, thanks to the yodelers from Macoupin.

Hog Haven Brown's Plan For Paying His Debts

H. E. (Hog Haven) Brown came to the convention with his debt-paying formula that has stumped financial experts and legal experts. At any rate it has enabled "Hog Haven" to be the first borrower in the United States to make a payment on a new farm loan taken out in October 1933. In explaining the formula, all who listened said it went something like this—"Hog Haven" sells hogs to himself at a low price and buys them back when prices go up. Then he takes the profits of the sale, pays his debts and still has the hogs. It certainly sounds sure-fire.

Pres. Smith Reviews

(Continued from page 14)

with the Tax Department and quit or do something else with the money now spent on tax problems.

"Did we believe there is no need for farmer representation before rate-making bodies, that we as farmers can always depend upon fairness from those who fix prices on the services and commodities that farmers must buy, we could say there is small reason for organization. But we are forced to recognize that we are living in a highly organized world, a world in which power and influence are concentrated in huge corporations and trade groups. You know and I know that the complexities of our economic and social order are such that, without a powerful voice speaking for farmers, without the influence of organization behind that voice, agriculture would gradually drift into and remain in a condition of poverty that would be as bad for the Nation as for those engaged in the business of farming.

"We must not only maintain the organization but greatly strengthen it if we are to perpetuate the recognition thus far accorded agriculture by Government.

Cites Farm Bureau's Part in New Deal

Pres. Edw. A. O'Neal Makes Stirring Address On Banquet Program

In a stirring address delivered in his customary colorful style, Edward A. O'Neal of Alabama, president of the American Farm Bureau Federation, discussed the philosophy behind the Agricultural Adjustment Act and cited numerous incidents illustrating the contribution being made by organized agriculture to the relief program. He spoke at the I. A. A. annual banquet in Danville the night of Jan. 25.

After reviewing the benefits already received by cotton, tobacco, and wheat farmers and the payments to be made to corn-hog producers in the next year, Mr. O'Neal said: "We are living in history-making days. Out of the ruins of the old order we are building a new order. In this national reconstruction the Farm Bureau is playing a leading part. It has educated public sentiment and brought about a national consciousness that the nation cannot prosper unless agriculture is prosperous. It has aroused the nation to action."

Constructive criticism is one of the jobs of organized agriculture, he said, and we are not hesitating to point out the holes in the program as they appear. He stated that the Farm Bureau is insisting that American grain be used in the manufacture of alcoholic beverages rather than imported blackstrap molasses. The tariff is one of our big problems, Mr. O'Neal said. American agriculture cannot afford to to go on a national basis. Our future lies in the restoration of international trade and we are supporting the work of the administration through George Peek and others in working out reciprocal trade agreements with foreign nations and finding outlets abroad for our surplus farm products.

Mr. O'Neal paid tribute to the Illinois Agricultural Association for its outstanding work and its contribution in building public sentiment which led to the New Deal program for agriculture. He praised highly the set-up of the Illinois Agricultural Association and the effectiveness of its organization which he said constituted "an inspiration to the entire Farm Bureau movement."

He also gave high praise to President Earl C. Smith, for his "outstanding qualities of leadership" not only in his own stage but nationally. Recalling Mr. Smith's prominence in the long struggle for equality for agriculture, and his constructive part in formulating the new program, and advising with the national leadership in carrying out the program, he gave much credit to Mr. Smith for getting such a large part of the Farm Bureau program carried out.

Summarizing the program which the American Farm Bureau Federation has recommended, Mr. O'Neal declared: "That program, for the large part, is now being carried out. The Farm Bureau, however, is seeking additional legislation to strengthen the program for agriculture. It seeks to broaden the Agricultural Adjustment Act to include additional commodities as basic commodities, particularly beef cattle and sugar.

"Among the other recommendations which it favors are: the appropriation of a fund not less than 200 million dollars to be used for benefit payments to dairy farmers and beef cattle producers, to supplement benefit payments that are paid out of processing taxes; the further reduction of interest rates on farm mortgages and on production credit, the government to guarantee the principal as well as interest on bonds to provide funds for farm mortgage relief at low interest rates; the strengthening of the marketing agreement section of the A. A. A., in order to require processors and distributors to co-operate if they refuse to cooperate voluntarily in the program for agriculture; a provision to penalize non-co-operating farmers who refuse to co-operate in the acreage reduction program adopted by the majority, but no requirement to put every farmer under a license; and the completion of monetary reform by establishing the value of the dollar at a normal level, based on the index of all commodities, so that it will be a stable medium of exchange."

Mr. O'Neal praised President Roosevelt for his steadfastness in carrying out the policy of restoring agriculture to prosperity as the essential prerequisite to national prosperity.

Production Credit Explained By James M. Huston

President of Credit Corporation, St. Louis, Describes Operation of Local Associations

Government plans for production credit associations, which promise to form the foundation of the future cooperative banking system for farmers, were described by James M. Huston, president of the Production Credit Corporation of St. Louis, before the large Friday morning audience the closing day of the recent I. A. A. convention in Danville.

Mr. Huston stated that local credit associations are being set up on a permanent basis and are not temporary emergency organizations although they are filling emergency needs.

There has been a shrinkage of 40 per cent in commercial banks since July 1, 1928, he said, furthermore the credit situation in the country became even worse than is indicated by these figures. There seems to be plenty of credit available for short time cattle feeding loans but credit for periods of 12 months or longer is almost nonexistent in rural communities. The production credit association will fill this gap and provide money at reasonable rates to farmers having no local banks open who are now at the mercy of loan sharks.

To get a production credit loan, the borrower must file an application and statement of his financial condition. He must give, in most cases, collateral in the form of a chattel mortgage on livestock, crops, the property to be purchased and additional security if demanded. He may give other kinds of security in lieu of a chattel mortgage. At present the rate of interest is 6% and the borrower must pay a minimum inspection fee of $2. Such fee may not exceed 1% of the loan. He must also pay for recording the chattel mortgage, and for other expenses if any are incurred in examining title, etc. But no official of the local association, employee, or agent is allowed to make any ch rge for assistance in preparing applications, notes, mortgages, etc., unless such assistance requires employment of persons not regularly employed by the association.

Illinois is the first state to be completely organized, Huston said, with production credit associations, 38 of which have been or will soon be set up and ready for operations.

The full text of Mr. Huston's address will be published in the Illinois Agricultural Association Section of the February Bureau Farmer, since it clearly sets forth full details about this less understood branch of the federal credit system.

DUE to the limited space available in this issue of the RECORD, additional reports on the recent annual convention of the I. A. A. and associated companies at Danville are being published in the Illinois Agricultural Association Section of the Bureau Farmer for February. Read both the RECORD and Bureau Farmer for February to get a complete report on the annual meeting.

Auto Insurance Co. In Thriving Condition

Annual Meeting Authorizes Insurance Company Offering Different Kinds of Service

Enthusiasm and optimism reached an all time peak when more than 500 agents and County Farm Bureau directors and members who attended the 19th I. A. A. convention met for the annual meeting of the Illinois Agricultural Mutual Insurance Company, held in the Danville Armory on Jan. 24. The remarkable showing and strength of the company as reported by A. E. Richardson, manager, along with the highly inspirational and instructive address delivered by Lawrence H. Wood, merchandising counselor, Chicago, imbued listeners with a new spirit that promises even greater accomplishment for farmer-owned and controlled automobile insurance in 1934.

Mr. Wood, who is a business adviser to all types of merchants, said that, "friendship, enthusiasm and persistency are the main factors in the makeup of any successful salesman and do not forget that while you may not have the title of a salesman you are really one regardless of the activity you are following. Everyone in this world has something to sell and if you are friendly, enthusiastic and persistent you are in a position to accomplish great things."

Business is entering a new era, said Mr. Wood, and the farmer should realize that he is a merchant just as much as anyone else in business. Turning to "high pressure methods," he said, "salesmanship is persuading a person to accept your viewpoint. . . . You agents and salesmen of farm company insurance should be convinced that you are in an excellent spot to do the farming industry a great good. Forget high pressure methods as they are worthless. Supplant them with salesmanship of facts."

In reporting on the 1933 accomplishments of Illinois Mutual, A. E. Richardson said that at the year's end the company had 32,992 policies in force, assets of $990,794.49, and a surplus over liabilities of nearly a half million dollars. During the year more than $47,000 was added to surplus, approximately $200,000 was paid out to Illinois farmer policyholders on more than 6,000 claims. The average claim amounted to $33.37 as against $33.50 for 1932.

Deviating from his report upon the company's condition, Mr. Richardson made some interesting remarks regarding the superiority of mutual companies during the depression years. "Experience shows," he said, "that 60 per cent of all mutual fire and casualty companies have survived since organization, whereas only 25 per cent of stock companies and 14 per cent of attorney-in-fact companies have continued in operation. During the past three years, 20 per cent of all stock companies writing fire and casualty insurance have retired from business while during the same period only 4.2 per cent of mutual companies were forced to quit. During the past quarter century the premium income of mutual insurance companies in the field mentioned has increased 286 per cent while stock companies gained only 129 per cent."

Ratification and delegation of authority for the organization of a new company was given the board of directors. This new company will offer a complete casualty and liability service including such forms as compensation, public liability, mistaken delivery of petroleum products, fidelity bond, accident insurance, etc.

President Earl C. Smith gave the annual report of the board of directors. R. A. Cowles submitted the treasurer's report. V. Vaniman made the report on acquisition and also emphasized the good the year's campaign on accident prevention had in reducing the average claim paid. G. R. Williams and M. E. Roberts talked briefly on field service. Following the summary of the year's business, there was general discussion of plans and business policies for the coming year.

Greatest In the World!

Some delegate remarked about the big sign strung across the street from the Wolford Hotel. He said the line read, "Greatest State Farm Organization In the World." Actually it read "in America." But it's a good idea. So next year we'll take in some more territory. And why not?

The other night going home on the Elevated I clipped this item out of the Chicago Daily News

MOTOR SPARK

By JAMES BRADEN

Motorists are advised that specific information concerning automobile insurance companies may be obtained by inquiries sent to Frank L. Bowen, insurance editor of The Daily News. Following are inquiries of this kind and the answers:

I am carrying automobile insurance in the Workmen's Mutual Insurance Company of Milwaukee, Wis., and would like to know how the company is rated and something about its financial status. P. J. H.

I cannot give you any rating on the Workmen's Mutual Insurance Company of Milwaukee, as the company was organized in 1930 and has not been in business long enough to get a rating. The only financial statement I have is a very abbreviated one as of Dec. 31, 1932, showing admitted assets of $18,946 and surplus of $4,026. C. H. Johnson, secretary-treasurer of the company, is formerly Wisconsin insurance commissioner. The company reports a maximum of $2,500 on a risk and insures the excess with the General Reinsurance Corporation of America.

Will you kindly inform me whether the Automobile Mutual Insurance Company of America, Providence, R. I., is a reliable company? J. M. E.

The Automobile Mutual Insurance Company of America, Providence, R. I., is an exceptionally strong, ably managed and prosperous concern. It has an "A" plus standing as an underwriter and an "A" rating financially. While this company is a mutual it now issues nonassessable policies and is practically stock company in its rates, following the establishment of a guaranty fund of $250,000 in 1928. The company, as of Dec. 31, 1932, had total admitted assets of $2,914,342, net cash surplus of $2,914,342, guaranty fund of $250,000 and a voluntary reserve of $350,000. Forty-two per cent of its total admitted assets were in United States government bonds.

Please give me some information about the financial condition of the Workmen's Insurance Company of Milwaukee. J. R. C.

The Workmen's Mutual Insurance Company of Milwaukee is a very small concern, which was incorporated in Wisconsin [illegible] began business on July 12 of that year. [illegible] young for a rating.

Can you give me information as to the reliability and soundness of the Illinois Agricultural Mutual Insurance Company, which writes insurance covering automobile accident—public liability and property damage. This company is either sponsored by the Illinois farm bureau or supported by them and writes all insurance for farm bureau members at much lower rates than charged by regular line companies. L. A. T.

The Illinois Agricultural Mutual Insurance Company of Chicago is a thriving, capably managed concern, with a first-class standing. It has the reputation of paying just claims promptly. The company's surplus is ample for contingencies and its reserves for outstanding claims appear to be adequate. Underwriting results for recent years have been favorable. Investments of the company are of very good quality and yield a good return. The company has a good reinsurance treaty on all public liability in excess of $5,000-$10,000 limits and also carries reinsurance on catastrophe hazard for fire, windstorm and tornado for all losses in excess of $5,000 and not exceeding $50,000 which might occur in any twenty-four-hour period.

Chicago Daily News Dec. 28, 1933

It tells more completely than anything I might say how informed people outside the Farm Bureau regard your Company. Read it!

A. E. Richardson, Mgr.

ILLINOIS AGRICULTURAL MUTUAL INSURANCE Co. 608-S-DEARBORN ST. CHICAGO

Reinsurance Company Makes Progress In '33

Adds to Surplus, Reduces Fire Losses, Has More Volume In Force

When more than 300 agents and county Farm Bureau directors met in the banquet room of the Danville Armory for the annual meeting of Farmers Mutual Re-Insurance Co., Wednesday, January 24th, they heard their president, George F. Tullock, report on the financial condition of the company which he declared to be excellent. Due to a sharp decrease in farm fires and to conservative and sound investments, Farmers Mutual finances are in a highly liquid condition thus offering greater security to policyholders.

Manager J. H. Kelker in making his report on the year's business said, "At the end of 1933, Farmers Mutual showed an increase in fire, hail and windstorm insurance in force of more than $10,000,000. In spite of adverse economic conditions the company has added $13,500 to its surplus, which compares with a loss of $12,000 last year, and has written $12,400,000 of fire, $9,000,000 windstorm, and $1,680,000 of growing crop hail insurance. The company closed the year 1933 with total insurance in force in all classes of $58,854,952.

"Windstorm losses," said Mr. Kelker, "during the year were greater than in any year of the company's history, but fire losses were $10,000 less with an exposure of approximately 20 per cent greater."

Speaking of efforts by the company to educate policyholders on fire prevention methods, Mr. Kelker said, "During the past year we have stressed fire prevention methods through direct-by-mail publicity and advertising and through a program of personal inspection of risks. We believe the constant placing before our policyholders of the need for five prevention measures has been of immense value in the reduction of fire losses. Incurred losses were 71 per cent of net premiums in 1933 and 74 per cent of earned premiums, the best experience for several years."

Farmers Mutual closed the year with assets of $109,939.99, nearly $100,000 of which is in government securities and cash. Totals in the different classes of insurance at the close of 1933 were reported at the meeting to be as follows: fire (gross in force) $32,957,434; windstorm $21,806,241; hail on buildings $2,409,549; growing crop hail $1,681,728.

Other speakers on the program were Howard Jokisch who delivered the secretary's report; V. Vaniman, who reported on acquisition and fire prevention publicity, and R. A. Cowles who submitted the treasurer's report for the year.

Following a general discussion of 1933 accomplishments, the annual election of officers of Farmers Mutual Re-Insurance Co., was held. George F. Tullock, Rockford, was reelected president; L. E. Lingenfelter, Pulaski county, was chosen first vice-president; and J. J. Hornung, La Salle county, second vice president. Howard Jokisch, Cass county, was reelected secretary and R. A. Cowles, Chicago, was renamed treasurer.

EDGAR COUNTY CHAMPS

Zeis Gumm, left, and Chester Boland of Paris township, Edgar county, signed 109 new Farm Bureau members during the mobilization campaign beginning Oct. 15. Moreover, these two men assisted solicitors in many other sections of the county to put Edgar up among the leaders in the state.

Informational Service Emphasized in Conference

(Continued from page 8)

he said, the thing to do is to analyze the situation and determine what is wrong. Better record systems both in County Farm Bureau offices and in the I. A. A. office must be set up, he said, to aid in confining service to paid-up members.

Robert A. Cowles, treasurer, commented on the splendid collection work in many counties and emphasized that the County Farm Bureau officer who is charged with responsibility for the collection of dues, should not accept the position unless he expects to discharge his responsibilities in a business-like way.

Discussion from the floor was unanimously in favor of restricing service to paid-up members and for the institution of a better system of cutting off service when dues become delinquent more than 60 days.

Impromptu talks were made by Farm Advisers E. C. Secor, T. W. May, J. W. Whisenand, and Edwin Bay on County Farm Bureau publicity. Secor, who won the silver I. A. A. trophy in the County Farm Bureau publicity contest, said that during 1933 he had made publicity one of his main interests and gave much credit for the substantial increase in membership (125% of quota) to their publicity work. Last year he initiated the policy of meeting with the clergymen of the county once a year to explain the Farm Bureau program. He has appointed Farm Bureau reporters in every community and mails stories to the seven newspapers in the county weekly. He also sends frequent letters and cards to members and prospects.

Mr. May expressed the belief that informational service is indispensable in maintaining and increasing membership. He reviewed some of the things he has been doing in Madison county to build organization through effective publicity.

Mr. Whisenand said that the effect of publicity multiplies the work that the Farm Bureau does and is essential to securing new members as well as holding present members.

Edwin Bay expressed approval of the plan of appointing Farm Bureau reporters in each community and said that this would be done in Sangamon county during the coming year.

Measuring Crib Corn And Grain In Bin

In determining the capacity of corncribs figure on 2½ cubic feet of storage space for each bushel of cleanly husked ear corn. To calculate the capacity of a crib in bushels of ear corn, multiply the volume in cubic feet of storage space by 4 and divide by 10.

A bushel of small grain or shelled corn occupies approximately 1¼ cubic feet of space. To calculate the capacity of grain bins in bushels, multiply the volume in cubic feet by 8 and divide by 10.

Auto Company Gains In Insurance In Force

The Illinois Agricultural Mutual Insurance Company wrote more than 6,000 policies during the year 1933. This was a net gain of approximately 3,000 policies over the number in force January 1, 1933. Nearly all of the automobile policies written were on the surplus fee plan.

FEBRUARY, 1934, E

THERE'S PLENTY

Counties Report

Swing Into Action To Achieve Goal Of Twenty-Five Per Cent Increase

Whiteside and Jersey First To Go Over the Top — Farm Bureau Leaders Express Confidence in Membership Campaign.

Plans for strengthening membership in the Farm Bureau and I. A. A. throughout the state were reported to the RECORD from many counties just before going to press.

In Effingham county Bliss E. Loy, president of the Farm Bureau, states that corn-hog sign-ups are the big activities of the day, but Farm Bureau sign-ups for membership are close behind. "Effingham county is expecting to add 150 new members by April 1," writes Mr. Loy. "We are striving for a larger paid-up membership in 1934 and prospects are the best ever.

"Captain Kelly and his lieutenants were out early Feb. 1 and are working full speed ahead. K. O. Woody, one of our lieutenants signed up 11 new members in 10 days during the month of December. All lieutenants have started the new year with increased vim and enthusiasm and we are going to increase our membership at least 25 per cent."

George F. Gabel, president of the Gallatin County Farm Bureau and county captain, reports recent comments from different members of the Farm Bureau, as follows: "One said, 'I received [illegible] my oil refund to pay my Farm Bureau dues, and had some left, didn't cost me a cent to belong to the organization.' Another said, 'I received more than I anticipated. If I did not belong to the Farm Bureau would have received nothing, so why not belong to an organization that helps me.'

Increase Farm Prices.

"There have been quite a few men make the following statement to me about the corn loan program: 'If it wasn't for our organization we would be getting about 25 or 30 cents for our corn instead of 45 cents. Forty-five cents is what the elevators are paying in this county now and there are many who realize why it has reached that price.

"As I said in the beginning of my letter, the hog callers are beginning to wake up and when they once get their eyes opened wide enough to see how the fellow on the other side of the fence has been treating him, they will be ready to jump across the fence and go down the road with the fellow that is fighting for him."

C. T. Kibler, farm adviser in Jersey county, where the Farm Bureau has secured its 25 per cent quota since January 1, reports that credit for this splendid record belongs to the mobilization committee. "The campaign was in charge of Martin Fitzgibbons, 11 township captains and 41 lieutenants selected for the drive which started January 18 following a training school with V. Vaniman and H. H. Walker," writes Kibler.

Signs 10 Out Of 11.

A report meeting was called on January 20 at which time 77 new members were signed. Reports made January 23 brought this total to 121. Lloyd Day, vice-president of the Jersey County Shippers Ass'n., signed 10 new members on January 23 out of 11 interviewed."

Kibler reports that the drive will be continued until April 1 when they expect to secure at least 200 new members. "Morale is much higher among farmers than any time during the past five years," he says. "Farmers are now realizing that if any improvement is to be had it will come through farm organization and cooperation."

The story of the wonderful record made by Farm Adviser F. H. Shuman, Captain Lowell Johnson and 26 lieutenants in Whiteside county has already been told. In two days with the temperature below zero they went out and signed 161 new members, two more than necessary for their 25 per cent quota.

Henderson Co. Signs 150.

From Henderson county comes the report from Ernest D. Walker, farm adviser, that at least 150 more members will be signed within the next few weeks. Walter Cochran of Biggsville has been appointed captain.

President Wilbur Gibbs of the Scott County Farm Bureau states that "As the new programs for recovery are getting under way the need for our Farm Bureau is greater than ever. Farmers must stand together if they are to secure a fair share of the national income."

In Pulaski-Alexander counties comes the report from Harold H. Gordon that 43 new members have been signed, and plans are being made to continue membership work along with the corn-hog campaign. "Henry P. Wiesenborn, Grand Chain, signed 10 members and states that he will secure 10 to 12 more between now and summer," writes Gordon. "E. H. Bryden of Tamms signed six and feels that the time is ripe to strike for a larger membership. 'A man cannot afford to stay out of the Farm Bureau,' said Bryden. The feeling among farmers is strong that agriculture is going to have a better income from now on. They realize that much of the credit should be given to farm organization."

Sangamon county reports Edwin Bay, farm adviser, has its regular membership campaign scheduled for 1934 when they expect to resign their present large membership and many new ones. Since last October the Sangamon County Farm Bureau has added 60 new members.

Edgar Co. Beats Quota.

"Things are different in Edgar county these days," writes A. E. Staley, president of the Edgar County Farm Bureau. "Never has the Farm Bureau received more favor than in the past three months. Beginning with the mobilization campaign in October our lieutenants have gone out and told the story of organized agriculture. Many of our members were not aware of the immense amount of work which had been done by their county, state, and national organization. With every member fully informed we can win the victories which should be ours.

"Edgar county surpassed her quota before January 1. At the February directors' meeting, it was agreed to increase our membership 25 per cent over the January 1 number. During recent weeks $21,600 was distributed by our County Wheat Control Association. Two hundred ninety-one corn loans were made prior to February 9 on 443,238 bushels, totaling $190,212.42."

Appreciate Efforts.

Carl F. Frey, president of the Iroquois County Farm Bureau, states that never before have the farmers of that county shown greater appreciation of the Farm Bureau than today. "Iroquois county is looking for a 50 per cent increase in membership. The corn-hog program is well under way and the Service Company recently paid a graduated dividend of from eight to 15 per cent."

"We are proud of our record in Shelby county," says Captain R. C. McKinley. "We will respond to President Earl Smith's call for a 25 per cent increase in membership. Farmers here are coming to realize that the Farm Bureau program has largely been made President Roosevelt's program. President Roosevelt is a Farm Bureau member himself and we are all working close together."

"I believe DuPage county has the largest membership for its size in the state," reports Leo Pauling, captain. "We now have an average of 111 members per township. Bloomingdale, the largest, has 138 members, and York township, the smallest has 84.

"DuPage county is primarily a dairy section where the wheat, corn-hog and corn loan programs have not been as important as in many other counties." The many forms of service developed by the County Farm Bureau and the I. A. A. are responsible for the big membership in this county.

Mercer Signs 121.

From Mercer county comes the report that a 25 per cent increase in membership will be secured at a very early date. "We signed eight new members today, making our total 121 new members," reports Captain J. O. Carlson.

With 85 new members already in the bag, Moultrie county is going out to improve on this record in the next few weeks. An oyster stew was held for all members and their families on Feb. 8.

In DeKalb county 80 new members were signed, R. N. Rasmusen, farm adviser, reports.

Captain Elery A. Leefers of Macoupin, reports that an earnest attempt will be made to meet the request of President Earl C. Smith for a 25 per cent increase in membership. "We have secured over 150 new members during the past three months," he writes. "We expect to put each non-member on the spot and give him a chance to show his colors in the present fight for the rights of agriculture.

"I should like to appeal to those worthy farmers of the State of Illinois who are members of their respective County Farm Bureaus and ask their help in enlisting their neighbors in the ranks of organization.

"I should like to ask those who are not members to consider carefully the many benefits that have been secured directly and indirectly as a result of the organized effort of member farmers."

Glad They Joined.

Chris Powers, vice-president of the Macoupin County Farm Bureau, believes that the time has now arrived when every farmer should get in and do his part through membership in the Farm Bureau. "I have signed a good many," he says, "and they are all glad they joined. One member whom I signed said that he got his dues back the first week by insuring his car and buying serum."

"Sixty-five new members," is the encouraging report from Mark F. Cooper, captain in Vermilion county. "Membership drive extended two weeks. Prospects good."

NEED POWERFUL VOICE

"You know and I know that the complexities of our economic and social order are such that without a powerful voice speaking for farmers, without the influence of organization behind that voice, agriculture would gradually drift into and remain in a state of poverty that would be as bad for the Nation as for those engaged in the business of farming."—Pres. EARL C. SMITH, at Danville, Jan. 25, 1934.

I.A.A. TO WATCH LEGISLATION IN SPECIAL SESSION

By JOHN C. WATSON

In the third special session of the Fifty-eighth General Assembly which convened on Feb. 13, the Illinois Agricultural Association is committed by resolution, adopted in the recent annual meeting in Danville, to sponsor or support proper legislation on two subjects included in the call.

1. To permit the filing of chattel mortgages, at moderate cost, instead of requiring that they be recorded, necessarily at much higher cost to mortgages.

The enactment of legislation for this purpose is necessary if the new production credit provided for farmers is to be made available to them without excessive costs. In many other states a chattel mortgage can be filed in the office of the county recorder for as small a sum as twenty-five cents.

2. To permit courts to continue suits for foreclosure from time to time for a limited period, under conditions prescribed by the court, whenever the mortgagor has made and continues to make every reasonable effort to pay his obligations.

Court Upholds Act.

[illegible] of this character supported by the Association was defeated largely on objections to its constitutionality, in the regular session of the present General Assembly. Such objections were recently brushed aside by the United States Supreme Court in a notable decision upholding the validity of a Minnesota Act very similar to the bill defeated last June in this state.

In addition to the two subjects of legislation described above, the Illinois Agricultural Association is necessarily interested in any legislation which may be introduced under several other subjects included in the call for the third special session. Among these are any measures changing the school laws, providing for consolidation of political subdivisions, clarifying the provisions concerning delinquent taxes and property forfeited for taxes, providing for regulation of trucks, and modifying the present statute limiting purchases of substitutes for butter and lard to 25 per cent of the oil and fat requirements of state public institutions.

Asks Special Session.

The Assbciation, having sponsored and secured the enactment of the law limiting the use of butter and lard substitutes in state institutions, has a special interest in this Act. The Association will maintain its usual constructive attitude toward any legislation on this subject or on any other subject of legislation in the third special session of the General Assembly. It will study with especial care bills, if any, which aim to impose heavier taxes on farm property.

The call for the third special session does not include among the subjects named for consideration amendment of the revenue article of the state constitution. The Association has long believed this to be the most important needed legislation in the state and asked that this subject b. included in the call for the third special session.

MARCHIN

In Group Plann Of Illinois F

The most promising year that they have had since 1929 is ahead of Illinois farmers as they begin to plan their operations for 1934, according to the College of Agriculture, University of Illinois.

"During the past year the inauguration of plans for agricul- [illegible] dairy [illegible] corn-hog [illegible] corn loan [illegible] programs [illegible] have [illegible] been [illegible] as [illegible] important [illegible] as [illegible] in [illegible] many [illegible] other [illegible] counties."

Lake County Man Gets Bureau Dues From One Service

A request was made of the IAA Transportation Deportment recently to collect a claim for three cattle killed on a railroad right-of-way. This Lake county farmer was not a member of the Farm Bureau so he was advised by G. W. Baxter of the IAA that the claim could only be handled on a commission basis. The commission would have amounted to more than the annual dues of the Farm Bureau so the man became a member. The claim was collected in the amount of $120. This one service from the organization saved more than this annual dues.

RCHING ON TO VICTORY

United Action Necessary To Continue Policies For Welfare Of Agriculture

Outlook Is Brighter But Only A Beginning Has Been Made—Farmers Must Protect What They Have Gained and Tackle Problems Yet Unsolved.

With thousands of new members enlisted in the ranks of the Farm Bureau and Illinois Agricultural Association in the last three months, nearly every county is planning to continue the job of consolidating its gains and adding additional members.

The challenge to the County Farm Bureaus made by President Earl C. Smith at the recent annual I. A. A. convention to try for at least a 25 per cent increase in membership during 1934 has been generally acccepted.

The past successes of organized farmers and the many problems ahead present overwhelming reasons why every effort should be made at this time to further strengthen the ranks.

While the outlook for agriculture is brighter than it has been for some time, only a beginning has been made toward restoring the industry to normal prosperity. Careful observers looking into the future see many obstacles and probable clashes in national and international policy affecting the future of American farmers.

The Agricultural Adjustment Act, recognized as the most far-reaching farm legislation ever enacted, expires in less than two years. What then?

Farmers must be ready to fight for the continuation of policies that prove to be for the best interests of agriculture. They must be on the job to see that organized opposition does not thwart the president and his administration

Farmers Must Help.

They must also give constructive aid, counsel and cooperation to expedite the administration of the program to raise farm prices.

How else can this be accomplished except through full strength organization?

Among the most important problems ahead is the future tariff policy of the United States. Organized farmers long have believed that high industrial tariffs have put American agriculture at a serious disadvantage. In the first place high tariffs have increased the cost of many farm supplies particularly machinery and building materials. Secondly, the American tariff policy has greatly restricted international trade and foreign outlets for surplus American farm products.

Tariff Fight Coming.

A letting down of the tariff walls, it is generally conceded will not be accomplished without overcoming powerful opposition of highly organized industrial groups which will not give up the advantages they long have enjoyed, without a struggle.

Unless farmers are on the job to meet such organization with equal organization, and are ready to battle for the policies they believe to be fair to their industry, there is little likelihood of victory.

Future national policies on taxation present another problem of vital interest to farmers. A widespread campaign of propaganda which has the support of many metropolitan newspapers and commercial and wealthy interests is now under way to discredit the federal income tax, and taxation based on ability to pay. A concerted effort is being made to remove the tax burden from the rich and saddle it on people of small and moderate means through various kinds of sales taxes.

What It Means.

Such a shift in taxation will mean that farmers will pay federal taxes on almost every article, piece of equipment, building material, or other commodity necessary to carry on their business. It will mean that the cost of nearly everything the farmer purchases would go up, while owners of great wealth in the form of stocks, bonds, and other intangibles would go virtually tax free.

Unless farmers watch carefully and thoroughly analyze such legislation, unless they are represented through powerful organization, and speak out with a voice backed by large membership, selfish interests will work their will by skillfully covering up the real intent and purpose of tax reforms offered under the guise of benefiting the masses.

Escapes Taxation.

In Illinois, owners of intangible wealth who are profiting by the apparent impossibility of taxing authorities to assess and collect taxes on much personal property, have successfully forestalled efforts to remove constitutional limitations to equitable taxation.

The property tax hits farmers and home owners heavily because their property is tangible and easily assessed. The personal property tax in the cities is not being enforced hence intangible wealth is not bearing its fair share of the tax burden.

Selfish interests have in the past and will in the future bring every influence to bear toward slowing up progress toward more equitable taxation. Farmers and real estate owners will have a tough job at best, even when completely organized, to secure enactment of fair, tax laws. Without complete organization, their case is hopeless, and the state will continue to operate under the antiquated revenue laws passed in 1870 which discriminate against farmers and home owners.

Nearly all the progress made during the past toward organized purchasing and co-operative marketing is directly traceable to the general farm organizations such as the Farm Bureau and Illinois Agricultural Association.

Denmark's Plan.

In Denmark where farmers aided by the government have taken the initiative in setting up cooperatives both in the marketing and processing field, agricultural producers secure approximately two-thirds of the consumer's dollar. In the United States the cost of distribution is so high, that the farmer receives on the average only about one-third of the consumer's dollar.

Further progress in this direction in Illinois will be in direct proportion to the backing farmers give the County Farm Bureau and Illinois Agricultural Association.

An important beginning has been made in America toward building a credit system adapted to the needs of farmers. Yet while agriculture is the most fundamental, sound, and necessary industry, farmers still have to pay higher rates of interest on borrowed money than do most other businesses.

From Soil To Sale.

"One of the first steps in the cooperative movement in Denmark," writes Dr. Fred C. Howe, consumers counsel of the A. A. A., "was to secure credit for the farmer and by the farmer. The Danes realized that farmers could not depend on a banking system designed for industrialists, so farmers have their own. The local unit, or "baby bank" in their community helps them buy tools and machinery, stock their farms, build new barns, and improve their projects."

Through persistent organized effort Illinois farmers, too, can carefully study banking reform and build a credit system better adapted to their needs.

Counties Respond To Pres. Smith's Plea For Action

PRESIDENT EARL C. SMITH

Planning Lies Future Hope nois Farmers—Dean Mumford

ear that is ahead ey begin or 1934. of Agri- nois. the in- agricul-

recovery has created new among farmers and has ght a reversal in the long nward trend in prices of farm ducts," Dean H. W. Mumford he State College of Agriculture "While such measures pre- e certain restrictions upon the erating farmers, they are by no means a substitute for their own planning. They serve rather to emphasize the need for group planning, not only in order to adopt the farm program to the emergency situation, but also to assist in the more permanent adjustment of farm production to market demands."

CALLS I. A. A ONE OF MAINSTAYS OF ORGANIZATION

"One of the mainstays of Organized Agriculture," is the way President Franklin D. Roosevelt characterized the Illinois Agricultural Association in his message to President Smith at the recent annual convention.

"In wishing the Illinois Agricultural Association a successful meeting I feel that I am addressing a body which has always been one of the mainstays of organized agriculture," the telegram from President Roosevelt said.

The fact that the I. A. A. is the largest and strongest state farm organization in America; that it has contributed most heavily in influence and support to the 12 year fight of organized farmers for effective legislation to farm prices is well known throughout the country.

The I. A. A. office in Chicago, is one of the stopping places of foreign students and delegates sent to this country to study the farm cooperative movement. Representatives from Great Britain, Germany, Russia, Sweden, and other countries have visited the Association offices during recent years.

UP TO $40,000,000 IN CORN-HOG CHECKS POSSIBLE IN ILLINOIS

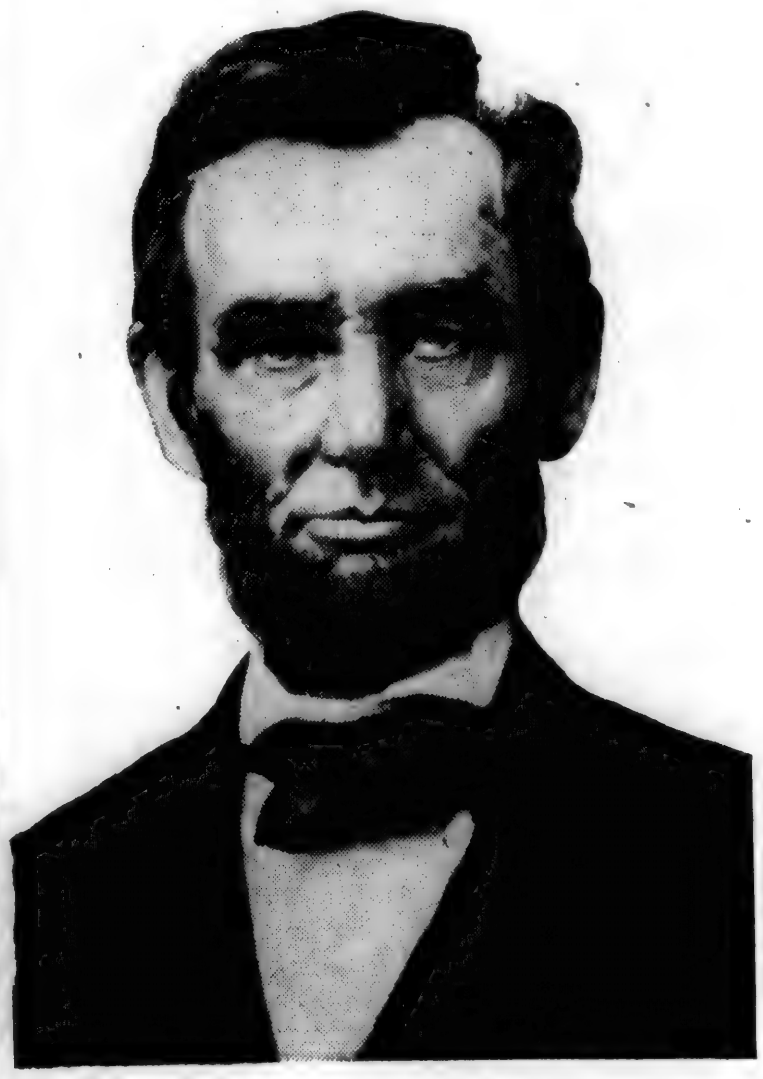
The corn-hog program made possible by the efforts of the Illinois Agricultural Association and organized farmers in other states, promises to result in distributing up to $40,000,000 in cash benefit payments to Illinois farmers during the next 15 months.

Farmers who sign and carry out the contract will receive 30c per bushel of corn and $5 per head of hogs on their base allotments, less the cost of putting the plan into effect.

Iroquois County Takes Advantages Of Corn Loans

Iroquois county corn growers were among the first to take advantage of the corn-loan program. C. E. Johnson, farm adviser, reports that 1,262 farmers in that county had received loans by February 7. The total amount of money involved is $803,012.85.

"Since there are 3,800 farmers in this county, and assuming that at least one-half of our corn is fed, around 66 per cent of those who had a surplus had corn sealed," writes Mr. Johnson.



Iroquois county is going ahead with its membership campaign and has set the goal for 500 new members. A meeting of the captain and lieutenants was held on February 12 to start the drive.

Tazewell County Growers Apply For 451 Corn Loans

Four hundred fifty-one applications on corn loans in Tazewell county up to Feb. 8 is the news telegraphed to the I. A. A. RECORD by Farm Adviser George H. Iftner. The 451 applications represent 747,154 bushels of corn and $336,218.85.

Tazewell county was well represented at the big I. A. A. mass meeting in Peoria where more than 8,000 Illinois farmers unanimously went on record in favor of the administration's corn loan program.

"The Farmer's Interest Is

ABRAHAM LINCOLN

"THE farmer's interest is most worthy of all to be cherished and cultivated. If there ever be inevitable conflict between that interest and any other that other should yield."

ABRAHAM LINCOLN,

HENRY T. RAINEY

In his message to the recent annual convention of the I. A. A. at Danville Henry T. Rainey, Speaker of the House of Representatives, expressed the belief that the rapidly increasing population in the United States will within the next half century provide a market for all of the production from acres now being taken out of cultivation. "We cannot wait so long for relief, however," he said. "And that's why the emergency program to adjust production to present outlets is necessary. **We must all be patient with the recovery program. It cannot be accomplished over night. It will take time. But we absolutely cannot get along without such organizations as the Illinois Agricultural Association. This great Association operates as a balance wheel."**

By ALEXANDER LEGGE
Former Chairman Federal Farm Board

"Perhaps the soundest advice we can give to agriculture is contained in the one word, 'Organize.'

"Properly organized I cannot see any reason why agriculture might not go even farther than industry, inasmuch as most farm products are consumed every day and several times a day and the consumption must be fairly continuous if we are to live.

"The greatest difficulty we have to contend with, is that in some mysterious way, through legislative action or otherwise, the handicap under which agriculture is suffering, will be removed, and the position of the farmer made secure without any action on his part. My friends, this is not even a good dream. It is currently believed that dreams sometimes come true, but this one never will.

ALEXANDER LEGGE

"You have one of the greatest and most representative organizations of agriculture anywhere. We need more organizations like yours. **You can do almost anything when you are properly organized. If farmers don't organize, others will, and they'll take care of** their own interests first."

By GEORGE N. PEEK,
Asst. To President Roosevelt.

"Farm organizations are not ends in themselves; they are the means to common ends, desired by all agriculture. That has been the goal of the Illinois Agricultural Association for years.

"It must be inspiring to farm organization men that they now have a law, the Agricultural Adjustment Act, through which they may help effectuate a restoration of farm well-being. **Uniting with a sound farm organization is a significant step at any time; it is more so now.** The more we learn to work together for the common good in this way, the easier it is for us to make the fundamental adjustments so necessary at present. **The value of organized effort to the individual farmer**

KLIN D. ROOSEVELT,
vention, Illinois Agricultural Association,

FRANK O. LOWDEN

"I AM more convinced than ever that organization is the greatest need of the farmers of this country.

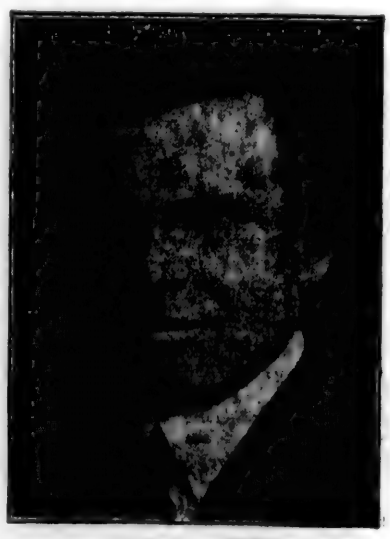
"If history teaches anything, it teaches that permanent prosperity cannot come without farm prosperity. **We cannot have a balanced agriculture, nor get agriculture back to a state of balance with other industries, without organization.** This is a business man's problem as much as the farmer's. No nation has long survived the decay of its agriculture."

FRANK O. LOWDEN,
Before a meeting of Illinois bankers in 1927.

ernment is offering fully to farmers its own centralizing powers to do what farmers are unable to do for themselves, individually.

"One farmer may succeed, relatively, by outsmarting his neighbors, but prosperity for farmers, in general, is not to be achieved simply by individual shrewdness. There must be a large effort to raise the whole level on which American farming is conducted. **This can be done only through organized action.**

"It is particularly fitting that strong farm organizations are in a position to help carry out the program of adjustment under the Farm Act. This is to follow through to a logical conclusion a campaign for raising agriculture to an equality with other groups, begun by farm leaders more than ten years ago."
—In statement Sept. 29, 1933.



ARTHUR M. HYDE

By ARTHUR M. HYDE,
Former Secretary of Agriculture.

"One general answer to farm problems is organization. Organization to control marketing, to standardize output, to eliminate waste and duplication of a marketing and distributing system, which generally speaking, absorbs two dollars for every one dollar it returns to the farmer. Thus the farmer can approximate the position of industry, or of other groups.

"By the long arm of his own organization, **the farmer can make himself felt beyond his line fences** and in the markets of the world. Through his organization, the farmer can get information as to commodity supplies, can bring his production within the limits of demand, can control the surplus problem by preventing it. By organization the farmer can take control of his own industry; re-establish the independence of his calling; win his own place in the sun of economic equality, and having won it, hold it against all the changing vicissitudes of the future."

GEO. N. PEEK

has never been more apparent. I speak as a fellow member, as well as a charter member of your organization."
Statement Sept. 29, 1933.

By CHESTER C. DAVIS,
Chief, Agricultural Adjustment Administration.

"Few worthwhile goals have been won by individual action; only when men stand together in a common effort can they succeed in the long run; as uncoordinated individuals, they fail.

"The need for common action is emphasized by the Agricultural Adjustment Act. Strong farm organizations are ready-made to furnish this action. Farmers can achieve the goal of parity prices under the Agricultural Adjustment Act much sooner when they are already mobilized as a group.

"After a decade of disorder, it is clear that going-it alone does not pay; we must solve our problems as a group, acting together, we can enter a brighter era than any of us have ever known."
Statement Sept. 29, 1933.

CHESTER C. DAVIS

TAXPAYERS SHOW VALUE OF GROUP EFFORT IN 1933

Tax Committees In Counties Watch Levies and Expenditures to Cut Burden.

Heavy decreases in nearly all commodity values in the year ending April 1, 1933, are reflected in the reduction of 10.14 per cent in the total 1933 assessed valuations of personal property. This is more than twice the percentage of decrease in valuations of lands and more than three times the percentage of decrease in valuations of town and city lots in the same year. Such decreases in valuations are found in most of the counties and are usually substantial. Twelve counties, however, increased their assessments of personal property, such increases usually being small, but exceeding five per cent in Pulaski county, eight per cent in Franklin county, ten per cent in Moultrie and Williamson counties, and seventeen per cent in Mason county. Such increases are justifiable if they represent assessments of additional personal property or equalization of all assessments.

Reductions in valuations of lands and occasionally of personal property were due in some counties to the Farm Bureau and other organizations. In some counties they seem to have been due to action by the boards of review wholly on their own initiative.

As in most years since 1922, the Illinois Tax Commission did not equalize valuations among the various counties of the state. This was doubtless due in part to recognition of the difficulty of obtaining satisfactory information upon which to base equalization. The expected omission of part or all of the 1933 state tax on property probably also was influential. Since equalization by the State Tax Commission can be effective only for state taxes, the omission of all state taxes on the 1933 valuations of property has removed for this year the urgent need of equalization of such valuations among the various counties. Unless further action is taken to provide state revenue from other sources than property taxes, the need of equalization will return in 1934 and will become even more urgent in 1935.

Effect On Taxes.

In every year since 1921, the I. A. A. Tax Department has estimated the reduction in taxes levied on property due to reduction in valuations resulting from equalization. In 1932 it was estimated that the taxes on farm property for that year were at least $6,500,000 less than the total which would have been levied if the high state and county valuation of 1920 had not been heavily reduced by equalization of valuations. It was shown in 1931 that farm property had shrunk from about 31.50 percent of valuations of all classes property in 1920 to about 20.35 per cent in 1931, resulting in a saving of $3,175,000 in state taxes on farm property in the year 1931. It was further estimated that such reductions in valuations had further cut taxes on farm property for all county and local purposes to a total of $3,325,000 less than it would have been if the old high valuations of 1920 to 1922 had remained unchanged. The I. A. A. is the only organization that has been consistently representing farmers in tax matters before the State Tax Commission since 1921.

Reductions In Levies.

The omission of all levies on property for 1933 wholly removes the effect on state taxes caused by reductions in valuations, but in no way lessens the effect of such reductions on valuations for county and local purposes. In view of further reductions in valuations, therefore, both in 1932 and in 1933, the department estimates that county and local taxes on farm property for 1933 will be at least $3,500,000 less than they would have been if the high valuations of 1920 to 1922 had been maintained.

In most of the counties of the state, taxpayers again demonstrated the good results of organization in exercising more effective control over tax levies and expenditures. Demand for greatly increased township levies for some purposes, especially for poor relief, revived so much interest among taxpayers that attendance at town meetings surpassed all recent records. Similar interest was manifested in school levies, especially in districts where needlessly large balances were being carried over from year to year.

Cull Poor Sows And Be Ahead Of The Game—Wilcox

Under present price conditions most Illinois farmers could well afford to cull out and sell five out of every 10 sows on the farm if this culling leaves five sows that will wean three more pigs to the litter than the average of the 10, according to R. H. Wilcox of the Illinois College of Agriculture.

This statement is borne out by investigations of 106 cost records kept by 34 to 37 central Illinois farmers over a three-year period. Figures from these farmers show that 29 per cent of the sows weaned spring litters averaging four or less pigs, while another 20 per cent weaned spring litters of seven or more.

Future Achievements Depend On Constructive Thinking And Action Of Militant Membership

Whatever have been our accomplishments and attainments, they are the result of the impelling force of the united thinking and action of the membership, President Earl C. Smith said recently in reviewing the progress of I. A. A. activities during the year 1933.

"The voice and the influence of the institution cannot and will not be stronger than those for whom it speaks. So let us not lose sight of the thing that has made all pronouncements of the institution possible," continued Mr. Smith.

"Without group action, we would have accomplished nothing. Without organization, our recent achievements as well as those of earlier years would not have been realized. Organization, like a machine, is merely a means to an end; yet the productiveness of the machine and its ability to do the job for which it was designed and built depends on how well it is maintained. The organization machine must rest on a solid foundation of membership. The united strength and support of the members hold it up and give it power and influence to cope with the great problems affecting the present and future of agriculture. It must be adequately financed.

Reduce Fee?

"Sometimes we hear that to increase the membership, the membership fee should be reduced. In every state where this has been tried, it has resulted in a substantial decrease in membership. We, in Illinois, have a higher membership fee than in any other state; yet we have the largest supporting Farm Bureau membership of any state in the Union. There is a reason, and that reason can be expressed in a single word—SERVICE. While we as members have put more in, we have also taken more out. It has been said that a Farm Bureau membership in Illinois costs nothing, if the member uses the organization. It merely costs $15 per year for non-members who join but fail to use or participate in its services.

"Farmers are not interested nor should they be interested in maintaining an organization just for the sake of organization. The only excuse for organization is to accomplish a worthy end and get things done. If I thought that the work of a state association was finished or that the problems confronting farmers were greatly reduced, I would be the first to recommend that we disband and prorate back to the members whatever assets have been accumulated. On the contrary with each succeeding day, we see and witness ever-increasing problems confronting the farmers of state and Nation.

Here Are Problems.

"If Government could or would, regardless of who happened to be in control, restore to agriculture a fair share of the national income and legislate fairly for farmers without their being heard, then we could be less enthusiastic about the need of organization.

"If we were justified in believing that our present marketing system is perfect, that the farmer is getting as much of the consumer's dollar as he is entitled to, we could say, 'Lets forget about our marketing problems and activities—lets stay home on the farm, produce and let others market our products for us.'"

"If we could rest content in the belief that we have a perfect taxing system and that the tax burden would be equitably distributed and that farm property would bear no more than its just share, we could say, 'Lets dispense with the Tax Department and quit or do something else with the money now spent on tax problems.'"

Must Strengthen It.

"Did we believe there is no need for farmer representation before rate-making bodies, that we as farmers can always depend upon fairness from those who fix prices on the services and commodities that farmers must buy, we could say there is small reason for organization. But we are forced to recognize that we are living in a highly organized world, a world in which power and influence are concentrated in huge corporations and trade groups. You know and I know that the complexities of our economic and social order are such that, without a powerful voice speaking for farmers, without the influence of organization behind that voice, agriculture would gradually drift into and remain in a condition of poverty that would be as bad for the nation as for those engaged in the business of farming.

"We must not only maintain the organization but greatly strengthen it if we are to perpetuate the recognition thus far accorded agriculture by Government and are to further develop and make more effective present government agricultural policies. We must be strongly organized to maintain proper representation of agriculture around the council tables State and Nation. The accomplishments and program of the Farm Bureau in county, state and nation, coupled with the results the membership mobilization campaign of recent months should stimulate each and every leader of the Farm Bureau movement Illinois to further action. We must not feel content until every farmer in Illinois not only knows of but understands the purposes the policies and the program the organization.

Constructive Action.

"After all, everything we hope to accomplish in the future will depend upon the constructive thinking and action of a large and militant membership.

"I want to take this opportunity of extending to every Farm Bureau members in Illinois, the deep appreciation of the officers, the board of directors and the staff of the Illinois Agricultural Association and associated companies for the continued confidence and support they have given to our efforts to serve the best interests of the farmers of Illinois and America.

"To this service, we rededicate every rightful effort and purpose of the Illinois Agricultural Association in 1934."

Wins First Prize As Member Getter

CLAUDE HICKS

Last October, when the call was issued for Country Life agents to go out and increase Farm Bureau membership, there was one who was so sold on the Farm Bureau movement, on collective effort and the need for Illinois farmers to unite for group action to solve their problems, that in 20 days 102 Livingston county farmers signed up largely as a result of his enthusiasm and reason.

Yessir! Livingston county thinks a great deal of its general agent, Claude Hicks, who established the best record for soliciting memberships of anyone in the Country Life organization.

This year Claude is going out to better his record. The runners-up to Mr. Hicks are out to take his place as "head man" among the "go getters." It looks like a merry tussle among the boys and may the best man win.

"PRAIRIE FARMS" EGGS TO BE MARKETED IN CARTONS CO-OP WAY

In the public mind butter and eggs go together. To that end, the butter produced and marketed by Illinois Producers Creameries under the trade name, "Prairie Farms Butter" will soon be joined on dealers' shelves and in homes by "Prairie Farms Egge."

According to J. B. Countiess, sales manager of Illinois Producers Creameries, the success made in marketing "Prairie Farms Butter" during 1933, when not one cent was lost on any sale, will be achieved during the coming year, he believes, with the new product.

Marketed in attractive cartons comparable to those used in packaging the butter, "Prairie Farms Eggs" will build its distribution through the butter outlets already established. This promises profitable response at the outset, as there will be little or no added expense involved in establishing a market.

The original distribution will be made out of Bloomington, Peoria and Davenport where last year a total of 1,824,741 pounds of butter was made. New cooperative points are in the process of formation and officials promise that Prairie Farms butter and eggs will be available to housewives in a much wider area than had been considered possible several years ago.

NEW CARTON FOR EGGS

"Prairie Farmers" Fresh Eggs Will Soon Be Going from Producer to Consumer Direct Through Illinois Producers Creameries.

SUCCEED IN NEW FIELDS OF FARM CO-OPERATION

The power of the organization is never more apparent than when it achieves success in a comparatively new field. While fire insurance has long been offered by local mutuals there has been less progress in other field of insurance by farmers. When Illinois Agricultural Mutual Insurance Company was formed by the Illinois Agricultural Association, the express purpose was to insure members' automobiles at lower cost than available elsewhere.

Operating smoothly from the first, Illinois Agricultural Mutual presented a 1933 financial statement which was the strongest in its history, and, in addition, increased its policies by 3,000. This company has saved Farm Bureau members more than a quarter million dollars on auto insurance when compared with the cost of similar insurance in any state-state-wide company.

In a year when many life insurance companies were unfortunate, Country Life Insurance Company increased its insurance in force to a new high of $54,065,000. This represents an increase of $7,000,000 over 1932. Country Life's financial statement shows that over 90 per cent of its investments are in government, state and municipal bonds, an extremely liquid position, fully justifying the confidence placed in it by policyholders.

Illinois Producers Creameries, a comparative newcomer to Illinois farmer-owned activities is showing increasing strength in the produce marketing field. From plants in Bloomington, Peoria and Davenport Illinois Producers Creameries marketed nearly 2,000,000 pounds of butter without the loss of a single cent on any sale, and with 98 per cent of all sales at a premium over the Chicago market. Using the trade name, "Prairie Farms," this cooperative will shortly market "Prairie Farms Eggs" through outlets already established.

Soybean Marketing Assn. Influences Prices Upward

Probably less understood and appreciated than any I. A. A. sponsored cooperative endeavor is the Soybean Marketing Association. With a short crop last year, the importance of the marketing association's function was lost sight of by many.

However, the Soybean Marketing Association is largely responsible for the increase in price received by members throughout the state. Its plan of marketing is flexible, enabling any member at his own choosing to deliver beans at any time and get the best price available in the state.

Future plans of the Association are being given attention by the board of directors and the management and full details of the 1934 program will be announced in due time.

I. A. A. COMPANIES' SUCCESS TRIBUTE TO FARM BUREAU

Comparison Justifies Confidence and Judgment Of County Leaders.

The various business corporations, which throughout the years have been developed, organized, financed, controlled and directed by the County Farm Bureaus and the Illinois Agricultural Association, have continued their notable record of progress and service during the year, President Earl C. Smith reported in his recent annual message.

Under the general management of the Illinois Agricultural Service Company, better known as the "service board," every avenue of approach to the business problems before them has been carefully scrutinized," he said. The respective records of accomplishments of these companies, coupled with their financial condition at the close of the year, best attest the manner in which the interests of their respective participating members have been represented and safeguarded. With but one exception, they all closed the year in splendid financial condition, having in each case met every obligation and in addition, substantially improved their financial condition by increasing their respective surpluses.

Ability Proved.

"It would seem that nothing more could or need be said as to the ability of farmers through organization to own, control and direct corporations furnishing services generally needed by the farmers of the state. The larger of these corporate activities have been in existence since 1927 and have recorded further progress and achievement with each succeeding year. Comparison, and comparison alone, of the development and the condition of these respective companies controlled and directed by the Farm Bureau movement in Illinois, with those of a competitive character in the so-called old line field, justifies the confidence and judgment of the leaders of the County Farm Bureaus who years ago authorized the organization of these enterprises.

"While at times we hear reports of an existing feeling that too much centralized power or control is vested in those charged with the general management of these corporations, yet I again repeat what I have stated on former occasions, that I regard this centralized management as a first essential to the continued progress and success of these companies, and more particularly, to keep in balance the greatly expanded activities of the Illinois Agricultural Association."

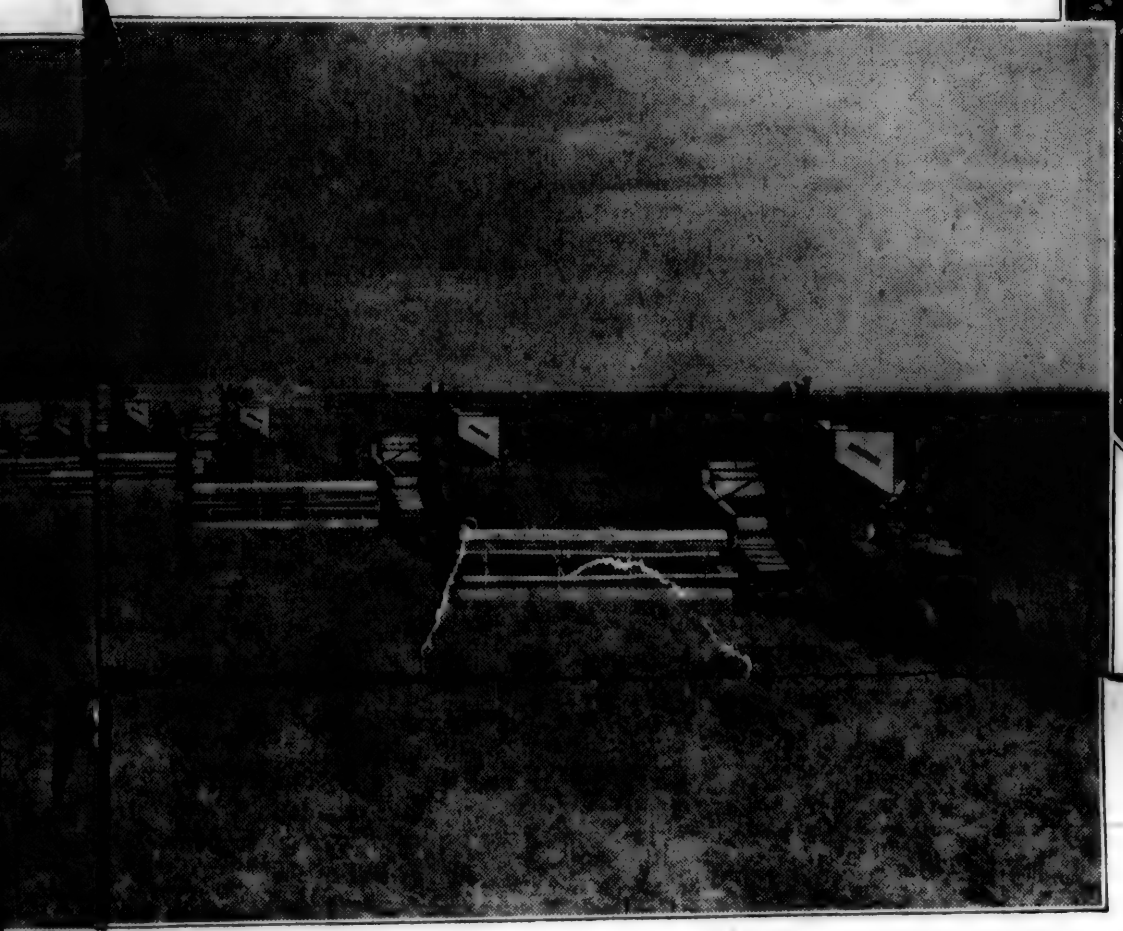
PUBLICITY AIDS IN RANDOLPH

Secor Tells How Membership Was Boosted In County Since 1923.

E. C. Secor, farm adviser in Randolph county, who won first prize and the I. A. A. silver cup for effective Farm Bureau publicity work during 1933 started work in Randolph county Nov. 1, 1923. Previous to that, and after graduating from the University of Illinois in 1914, he farmed in Greene county, where he assisted in the organization of the Greene county Farm Bureau. There he served for six years as secretary, and still maintains a membership.

E. C. SECOR

"When I came to Randolph county the membership dues were $10 per year and the morale very low," said Mr. Secor. "When we held our first reorganization campaign, we spent what little reserve we had signing 515 Farm Bureau members at $10 per year. Three years later, in 1928, we put on a membership campaign and raised the dues to $15 per year. We signed up about 415 to begin Jan. 1, 1929. Three years later, in 1931, we signed about 450 at $15 per year. We now have practically 600 members on the $15 basis."



$120 Ahead By Belonging To Farm Bureau

"The fondest hope that the agricultural industry has today is the equalizing of the disparity between agriculture and industry, and the more equitable distribution of national resources and income. This can only be brought about through organization.

"Through Country Life insurance, auto insurance, common stock dividends of the service company, and savings on vaccination of hogs and cattle, I have saved $120 per year over my Farm Bureau dues. The benefits from the tax and legislative work of the I. A. A. are all extra. The greatest kick I get out of membership is in knowing that I belong to the best farm organization in the world, namely, the Farm Bureau, and the I. A. A., which is a member of the American Farm Bureau Federation. I sincerely hope that all the farm people of this country will soon see the great benefits of organization.

S. M. BECHTEL

RGANIZATION ets Things Done!

th a cradle couldn't make much headousand acres of wheat. But 12 powers make short work of it.

one has little influence in solving the s of agriculture. Only the mass acsands thinking and working together job.

at 45 cents per bushel, the corn and n, wheat checks, federal farm loans, support to the hog market, farm tax evaluation and honest money, dependce at a saving, patronage dividends, oads, farmer-owned marketing ma, higher prices for farm commodities. of all these benefits? What made e?

armers! Farmers working together unty Farm Bureau—thru the Illinois Agricultural Association—thru the American Farm Bureau Federation.

We are not out of the woods yet. But the only way we'll ever get out and stay out is through CO-OPERATION.

We have made a start toward working out our national and international problems. Are we smart enough, and persistent enough to stick together and enlist our neighbors in this great effort to bring about a better agriculture?

There's work ahead. Plenty to do. Farm prices, the money question, taxes, tariffs, utility rates, freight rates, marketing costs, legislation all command our attention.

Unorganized we are helpless.
Organized we can accomplish much.

Let us take courage from our past successes and carry on.

THE THIRD SPECIAL SESSION

As we go to press, the third special session of the 58th Illinois General Assembly is about to convene. Aside from the measures outlined in the article by Mr. Watson on page one, Illinois Agricultural Association representatives at Springfield will watch carefully any new revenue bills proposed by various interests. Tax matters promise to overshadow all other issues. There is talk of diverting more gas tax funds away from roads. It is rumored that the organized teachers will be there with a powerful lobby and an extensive program seeking new forms of taxation for schools. Railroad interests will probably be present to support proposed further taxation and regulation of motor trucks. Other organized groups will have their special interests to look after.

The I. A. A. in line with its past policies reaffirmed at the recent Danville convention, opposes further diversion of gas taxes and insists that such taxes be used to build secondary roads. It further insists that the proceeds of new revenue laws be used to reduce and replace taxes on property. An important beginning promises to be made in this direction in the coming year when revenues from the [illegible] entire state tax on property. This association believes that this principle should be adhered to in future revenue legislation. Our legislative representatives will be on the job to fight for the rightful interests of farmers and property taxpayers. The influence of the organization in this and other matters will be directly proportionial to the size of the membership and the active support given by the members in their respective counties to the association program.

THE CHALLENGE TO ORGANIZATION

There is far more work for organized farmers to do than has yet been done. Nationally we have only scratched the surface in planning and carrying out a program to establish agriculture, in fact our whole economic order, on a firm basis of prosperity. Any careful observer cannot escape such a conclusion. The temporary measures which have brought some relief for the time being, must be followed up with more permanent plans, and aggressive action to put them into effect. When the money received from corn loans is spent, when the wheat and corn-hog benefit checks have been converted into tax and interest receipts and needed supplies, when the present Adjustment Act expires, what then? Farm problems will still be with us.

The future of agriculture is inseparably linked with national policy on tariff, foreign debts, land use, stable money, consumer demand for our produce, development of industrial outlets for farm products, and others. President Smith expressed the belief in his recent annual address that "the ultimate solution of the farm problem embodies three major objectives," namely, restoring and maintaining agricultural exports in proper relationship to industrial exports through trade agreements with foreign nations; development of new industrial uses for the raw materials produced on American farms; and removal of large areas of marginal farm lands from production. He has well said that "the development of these three policies presents a challenge to farm organizations and to the statesmanship of the country."

The progress that is made toward working out these problems will be in direct proportion to the persistency, and power and drive farmers put behind the movement, now started, through solid organization.

What the Members Say

FARM BUREAU POLICIES PREVAIL

"Ever the right comes uppermost and ever is justice done."

After years of apparent failure when at times organized agriculture seemed to be striving against insuperable difficulties; after being, at various times, ignored, ridiculed, and resisted by the so-called big interests of the nation, the policies and economic principles, which have long been advocated and upheld by the Farm Bureau, are today standing out as the heart of the nation's political policy—the hope of a stricken people. Why has this happened?

To my mind it is because the farmers have all the time had the national viewpoint. We have striven to help ourselves by helping all. While we recognize Agriculture as a fundamental unit in the industrial economic machine, we also recognize other units and have sought a proper balance between all rather than an advantage over others. It is the soundness and justice of this position that has enabled the agricultural program to take precedence over all others in the battle against depression.

Every Farm Bureau member has contributed to what is now the program of the government of the United States, having for its object, victory over the greatest depression in our history. Immediate monetary returns from membership are desirable and to some extent necessary, but to have made a definite contribution to the welfare of the nation in a time of great distress, a contribution which may call forth the favorable comment of the ages, should and will swell the pride of every man and woman who has helped work out and initiate this program which, though voluntary, yet, promises to be effective.

Let our apparent success clinch our resolve to continue our policy of seeking scientific solutions to our problems, solutions that will be fair and just to all; that contemplate a fuller and better life to all men—rural as well as urban, and finally, solutions that will substitute for the selfish profit motive, that sort of personal ambition that finds its happiest satisfaction in general usefulness.

GEORGE F. HAYES,
President Henry-Stark Service Co.

FROM A CHARTER MEMBER

Reviewing the many benefits he has received from the Farm Bureau during his 20 years' membership, A. Nierstheimer, Jr., a charter member of the Tazewell County Farm Bureau, says "In the birth of the organization little did we think that perhaps 20 years later it would be necessary to have an entirely different program than that pursued at the beginning. The fast changing times made it necessary to develop new projects. In former years our Farm Bureau taught us how to grow two blades of grass where only one grew before. Also in those good old days there never existed a surplus. In fact, there was fear then that we could not produce enough to feed everyone."

Mr. Neirstheimer points out the growing inequality between agricultural and non-agricultural prices following the world war and why farmers were forced to organize insurance companies, oil companies and other projects to make their dollars go farther.

He regards the Farm Bureau's tuberculosis eradication as one of the most valuable services ever initiated in this state.

"After the great war we farmers found ourselves in a serious predicament," he said. "We had paid too much attention to production and not enough to organization. Other groups in the meantime organized solidly and they were able to uphold prices. But a chain always breaks at its weakest link, so prosperity broke because agriculture was unable to hold up—morale, 'united we stand, divided we fall'."

He gives great credit to the Farm Bureau automobile insurance company for making worthwhile savings, pointing out that a member pays only $18 for full coverage on a Buick, while a non-member must pay for the same coverage in an old-line company, $74.

"The Farm Bureau was instrumental in organizing the Producers Commission Association which not only saves in commissions but has eliminated "trick" methods and raised prices by increasing competition," he says. He lists the following benefits he has received which he credits to the Farm Bureau as follows:

April 30, 1933—Service Co. refund	$15.55
State refund on tractor gas	22.98
July 31—Producers refund	12.17
Dec. 13—Service Co. refund	23.55
(Which is only 10 % of the 15% declared—hence the exact [illegible]	11.77
Difference on car in auto insurance	56.80
Total	$142.82

These items, he says, were of only minor importance. The major benefits came from the legislation program of the I. A. A. and the Farm Bureau in the state and nation. "Our watch dog is constantly on the alert for measures detrimental to agriculture," he said. "In numbers there is power, so let us join our Farm Bureau and the I. A. A. and unite our influence and support."

LET'S INCREASE MEMBERSHIP

"President Roosevelt said in his message to the I. A. A. annual meeting that the success in the solution of the agricultural problem will depend on the collective effort of the agricultural people of this country. It seems to me this statement from the head of our nation is sufficient reason for farmers to get into the organization. Inasmuch as the AAA expires July 1, 1935, membership should be greatly increased before that date, in order that farmers may 'carry on' for themselves what the government is now helping them to do."

O. P. HAMM, President,
Champaign County Farm Bureau.

ALL CAN AFFORD TO BELONG

"All farmers ought to belong to the Farm Bureau for they need an organization to represent them in legislation, taxation, etc. The farmers wouldn't be where they are today if it hadn't been for the leadership of the American Farm Bureau Federation and the Illinois Agricultural Association who were responsible in a large measure for getting all the farmers a loan on corn of 45 cents, in addition to the new deal in acreage reduction which is the farmer's only salvation.

"There isn't a farmer who cannot afford to belong to the Farm Bureau. I used the Champaign County Service Company products and received $66.10 patronage refund this year. The average of our county was $21.26 for 824 Farm Bureau members which more than paid for all the Farm Bureau dues. Besides, I received first quality merchandise.

"If a person actually takes advantage of the auto insurance, livestock shipping association and other services he is privileged to benefit from, he can save his membership dues several times. I think all farmers ought to join the Farm Bureau for their own good. H. J. WILSON, Member,
Champaign County Farm Bureau.

"Farm organization has accomplished great results in a county, state and national way. It requires an even stronger organization to administer legislation already enacted." FRANK J. FLYNN,
President, Morgan County Farm Bureau.

"Our intensive Morgan County Campaign of Monday and Tuesday, February 12 and 13, was successful due to the cooperation of one hundred men in the field. We are building for the future."
DAVID R. REYNOLDS,
Captain, Morgan Co. Mobilization Campaign.

I get the most satisfaction of knowing that the program of the A. F. B. F., as outlined in their resolutions of the year 1933, has been worked into the administration's program almost to the letter and that the substance of this program is that of the Farm Bureau. BENJ. A. FRELS,
Ex. Committee Henry Co. Farm Bureau.

Full Strength Farm Bureau Is Greatest Need

By M. S. MORGAN
Pres. Henry County Farm Bureau.

Every organization has a cost and, if it is to survive, must have a value.

The cost of our Farm Bureaus amounts to $15 a year per member plus the time we spend. It can and has been shown that the costs to most of us are more than paid by the value of the services rendered by our organization and its subsidiaries. Practically all of us could assure ourselves of a profit on our dues by taking full advantage of the benefits offered to us. Our Farm Bureaus liquidate, every year, all the monetary obligations which they assume for membership dues paid.

Many of us are attracted by the larger aspects of the Farm Bureau. This viewpoint has to do with the inherent right of every American to a fair share of our National income; a share commensurate to services rendered. We all have painfully in mind the great debacle which started in the fall of 1920, and ended in March 1933.

During the ten years before 1920 the Farm Bureaus had been organized and had been given their initial momentum through a large membership and sound plans. After 1920 we were by all odds the dominant organization among farmers. No other group had the power and leadership necessary to stand in our state and national councils and present effectively the case of agriculture and in reality the case of America. The brains of our own leaders were pitted against the best intellects of finance, industry, and certain representatives of the science of political economy. Whose judgment would eventually prevail took thirteen years to find the answer.

"The mills of the Gods grind slowly but they grind exceeding fine."

In 1921 some of those in the seats of the mighty said America could continually prosper without and in spite of a prostrate agriculture. In substance they told farmers and farm leaders to go to the hot place. Through thirteen years they fought us. We well remember the long struggle for the equalization fee; the apparaent victory and then the veto at the hands of the president of the United States.

We have in mind the desperate efforts in 1929 to write into a bill before congress, clauses which would make it possible for the Farm Board to initiate policies which would be both sound and effective. These efforts were blocked and thwarted at every turn through the influence of those in high places, and finally resulted in substantial failure.

Our farm leaders warned time after time of the dire results which must eventually follow the reactionary policies of those thirteen years. At last came national disaster and the threat of revolution [illegible] in November 1932 America vindicated the judgment of our Farm Bureau leaders. At the same time the voters repudiated the pirates of high finance and the exponents of a policy of letting things drift.

During the past year we have witnessed a strong start toward the regeneration of agriculture and the return of a measure of hope and happiness to the forgotten citizen of America.

Our organization has fitted into the picture as one piece of a carefully mortised joint fits into the other. Is it too much to say that the Farm Bureaus, along with President Roosevelt, Secretary Wallace, Secretary Morgenthau and others are the special instruments of Providence working toward an America which shall again be a country "Of the People, By the People and For the People"?

In the future our organization will be of greater value to us than it has been in the past. "No Man Liveth to Himself Alone." This quotation will find its counterpart in an axiom that no group or class of people may live to itself alone. A closely knit Farm Bureau composed of 75 per cent or more of the farmers of America; strong labor unions; organized finance, but not as powerful as it has been in the past; associations of manufacturers and distributors; and last, organized consumers. These form the groundwork of a sketch of the future.

We see each group electing representatives and these people meeting around a common council table, collecting data, discussing and planning the economic welfare of America. They are not there in the spirit of hostility or avarice but all are willing and expect to forego advantages when the whole will be better served by so doing. Agriculture will find a new and ever increasing need for her Farm Bureaus to act as her spokesman in this future congress of the nation's interests.

Organization Is Stressed In Sales Work Of Companies

That organization is stressed in every phase of the sales work of the various companies affiliated with the county Farm Bureaus and Illinois Agricultural Association, is amply borne out by the methods used to stimulate the efforts of all agents and salesman. The offering of prizes and inducements for acquisition of business and members is one of the best forms of building organization and loyalty.

It is only through organization and the constant stressing of collective effort that insurance acquisition will attain the volume necessary for low net cost protection. It is equally true with the oil company that larger mass purchasing through increased Farm Bureau membership will make possible lower cost petroleum products.

The managers show their keen appreciation of the importance of organization when they challenge every salesman to greater sales records, which in turn creates new customers and greater power in purchase and sale.

IATT WALKS OFF WITH FIRST PRIZE IN BIG CONTEST

Calling upon school superintendents to preach the gospel of accident prevention and obtaining the finest kind of cooperation from every newspaper in the county, Benj. A. Jones, general agent of Piatt county made the best record in the state and walked off with the Accident Prevention cup presented during the I. A. A. meeting at Danville, Feb. 26.

Every school superintendent in the county responded 100 per cent, and the movement received more editorial comment than any county subject that has come up in years. According to Mr. Jones, winning the cup was largely a matter of talking up the need for accident prevention, which he did at any and all times. The board of directors of Piatt county, Farm Adviser, various committees and the Farm Bureau members became imbued with the spirit so ably spread by Mr. Jones and the net result was that Piatt county was completely behind the campaign.

With such intelligent effort, winning the cup was a foregone conclusion. Collective efforts did it just as it is solving the major problems of agriculture wherever it is properly applied.

MORE NEWS ABOUT CORN LOANS FROM CO. FARM BUREAUS

MACON COUNTY—397 corn loans on 703,497 bushels. "We are charging one-fourth cent per bushel up to 3,000 bushels and $7.50 maximum on all corn under one cover. Three-fourths of the fee to the sealer and one-fourth to the Warehouse Supervisory Board for expenses."

GRUNDY COUNTY—663 loans, $400,000. Seventy-five per cent of farms represented, 575 corn-hog contracts completed, reports Farm Adviser Watson.

LEE COUNTY—Many farmers still making corn loans, total now $602,659.80. Signed 22 new members in two days, reports County Captain F. W. Peckham. Collections coming along very well.

MORGAN COUNTY—175 farmers got loans for $120,000. Ten per cent of corn on farms represented.

WAYNE COUNTY—15 corn loans, total $2,861. Sixteen new members signed reports C. R. Richison, county captain. "My efforts will be dedicated to the sincere request of President Smith for 25 per cent increase in membership in this county. Edgar Koontz, a new member, states that he lost $100 by not being a Farm Bureau member last year."

OGLE COUNTY—320 corn loan certificates issued, total bushels 427,292. Corn-hog sign-up going well. Ninety men on local committees holding about 70 sign-up days week Feb. 9 and 17.

DOUGLAS COUNTY—386 corn ns totaling $367,782.30. "We imate that one million bushels l be sealed by March 1."

SCHUYLER COUNTY—189,729 bushels corn sealed for approximately 90 people. "At our recent meeting the captain and lieutenants agreed to add at least 100 members in the next 60 days," writes Farm Adviser L. E. McKinzie.

WHITE COUNTY—69 farmers have received loans amounting to $31,422.60. We estimate that approximately seven per cent of the corn on farms is represented."

Jersey County Makes Quota

C. T. KIBLER
Farm Adviser.

Mr. Kibler gives entire credit for Jersey county's recent membership record to the County Organization Committee.

WINNERS EAT STEAK, LOSERS EAT BEANS, GENE CURTIS SAYS

"Thirty-two lieutenants have agreed to visit every non-member in the county in support of the Farm Bureau and our great national program," reports Captain Eugene Curtis of Champaign county. "In townships where members are few we are sending in extra men. A report meeting will be held the first week in March. "Prizes are offered to lieutenants who sign six or more. Our lieutenants are divided into groups, each having a leader. The groups signing the most members will be given a steak dinner by the Farm Bureau. The losing group eats beans. We expect to increase our membership easily 25 per cent."

It is dangerous to buy abnormally cheap clover and alfalfa seed. The U. S. Department of Agriculture found that "half-price" alfalfa seed in one case contained only 42 per cent of seeds that could grow. Ask your County Farm Bureau's advice if you are not sure where to buy good seed.

THE WAY TO GET IT ACROSS

ALPHABET QUERY JUST PART DAY'S WORK FOR OTIS

The Vermilion County Farm Bureau has taken over a few of Noah Webster's duties, according to Farm Adviser Otis Kercher. What with the government running "alphabetical" relief campaigns, there is confusion amongst farmers in the counties as to whether they are signing up with the government or a new radio station.

Mr. Kercher was trying to make sense out of a query turned over to him by a Farm Bureau member who had received it from his landlord. There was some difficulty, it seemed, in regard to what would happen when the landlord signed the A. A. A. corn-hog reduction program when he was already getting some benefit from CWA work in the neighborhood. The landlord would not sign up with the AAA because it would, by some alphabetical means, force him to lend tools to the CWA. There was some to-do also about the U. S. A. turning his acres into CRG (community relief gardens) to be worked by the poor.

It all turned out well, due entirely to Mr. Kercher's remarkable handling of the alphabet in his reply to the landlord. He explained that the CWA relief gardens, etc., were in no way connected with the AAA, the "A" in CWA notwithstanding, and that the corn-hog reduction program was filled with benefits for the farmers who sign the agreement and co-operate in the program.

With a sad touch, Otis signed the letter, "O. K. Vermilion County FA."

Put Limestone On Idle Acres, Save Soil With Legumes

The opportunity to improve soil fertility on Illinois farms through liming and the growing of alfalfa, sweet clover, and other legumes was never greater than it is today, and County Farm Advisers are giving special attention to this part of the Farm Bureau program.

With thousands of acres being left idle as a result of the corn-hog and wheat acreage reduction programs, many farmers plan to improve these lands by spreading from two to five tons of agricultural limestone per acre and sowing the sweetened soil to nitrogen gathering crops.

The Illinois Agricultural Association as in past years has entered into contractual relationships with a number of reliable limestone companies whereby special discounts will be given to Farm Bureau members.

The object of such soil improvement work is not to increase total production but to make production more efficient; to farm fewer acres but to make those acres produce more at less cost.

Liming and growing of legumes not only improves the nitrogen content of the soil, but also tends to prevent erosion and washing away of valuable soil minerals. This is becoming increasingly important on rolling ground where erosion is a big problem.

There were 8½ per cent fewer cattle on feed in the corn belt on Jan. 1, 1934 than there were a year ago. In Illinois there were 20 per cent fewer cattle on feed, Indiana 18 per cent less, Ohio 20 per cent less, Iowa and Nebraska 3 per cent more, and Missouri only 2 per cent less.

An Approach To A Farmers' Utopia

How the Danish Farmers Lifted Themselves and Their Country Out of a Depression

BY DR. FRED HOWE, CONSUMERS COUNCIL, AAA.

While we are carving footholds on the slippery banks of the Slough of Despond, it is encouraging to think of Denmark.

Fifty years ago that sturdy little country was in the same boat we were in last winter. Agriculture was in a state of collapse. Everybody was in despair, because they thought it must be an incurable collapse—that political disorder was bound to follow soon.

Look at Denmark today. There are few millionaires. There aren't any slums, city or country. There is equality between the sexes. There is no illiteracy; the average Dane is highly educated. Not only do the young people go to excellent schools, but their parents continue their cultural progress at the Danish Folk schools. The classes of people who usually have the most limited and sordid existence, physically and spiritually, live—in Denmark—a full and comfortable life.

The "great unwashed" public is well washed, well fed, well paid, and well read.

How did this Utopian set-up happen, when fifty years ago Denmark was facing ruin?

The answer is that it did not happen. It was built. And it was built by farmers. No ready-made organization was laid on them from above. They organized themselves from the ranks. They built themselves into such a strong, large, united proportion of the public that they became an integral part of the country's economic and political structure.

The result is that Denmark is a true democracy. Its main interests, the interests of its biggest population, are the interests served by the government.

Cooperation is the key of the whole structure. The cooperative movement is nationwide. It started with the farmers, has gone on to include the city people too.

Producers cooperate and handle their products from soil to sale. Consumers cooperate and through the experts of their buying associations make their purchases from the world's best markets.

A Danish farmer is often a member of a dozen different cooperatives which take care of all his products and supply all his needs. His eggs are tested and graded and shipped and marketed by his own egg cooperative. His pork is slaughtered and cured at a cooperative slaughter-house within reach of his farm. His finances are in the safe hands of his own cooperative bank.

One of the first steps of the cooperative movement in Denmark was to secure credit for the farmer and by the farmer. The Danes realized that farmers could not depend on a banking system designed for industrialists, so farmers have their own. The local unit, or "baby bank" in their community helps them buy tools and machinery, stock their farms, build new barns, and improve their projects.

Another essential of the movement was the establishment of grades and standards for their farm products. The private distributors had rejected the plan but the farmers saw the advantage of building an organization which would keep the level of their produce high and thus protect their reputation and their markets. So they built it, and it works. Danish bacon, Danish eggs, Danish butter, stamped with the certificate of quality, brought to the best breakfast tables by the farmers' own cooperatives, command the highest prices at home and abroad.

Along with this new economic security, another rich harvest was reaped from the soil. That harvest was in broader interests, intellectual curiosity, a real culture with its root in the ground. When the farmer began to think of himself as part of one great society, the forces of that society affecting him began to take on new meaning and he began to reach out for knowledge and understanding.

Denmark is just one-fifth the size of Nebraska. The Danish soil is not nearly as fertile as that of our middle west. Yet by applying progressive scientific principles all the way from fertilizer to philosophy, Denmark's farmers have laid the foundations for a real commonwealth on the ashes of a depression.

Until the people of the state vote for constitutional changes to permit an equitable taxing system, the occupation (sales) tax with amendments to make it apply as much to the rich as to the poor, which it does not do now, ought to be continued for the exclusive purpose of replacing, dollar for dollar, taxes now levied on property.—From annual address of President Earl C. Smith at Danville.

CINCINNATI CO-OP GAINS 30 PER CENT IN VOLUME OVER '32

"The past year has been the most successful in the history of the Cincinnati Producers, according to R. O. Smith, manager of the Producers Cooperative Commission Association. The association sold 8,393 decks of live stock during 1933, a gain of 30 per cent over the 1932 volume, out of the $182,385.27 collected in commissions from patrons, $85,039.23 has been saved. Of this, the cash refund of 33 1-3 per cent authorized to be paid members, will amount to $60,795.09, or more than the entire savings last year.

Other points outlined in Mr. Smith's report were: Savings to patrons of the Cooperative of $29,728.75 for the year 1933 through the lowering of commission rates in 1932 (or more than $81,000.000 for all the patrons of the market); the sale of 13,882 pigs to the government last fall during the pig-buying program, and sales of 34,049 cattle, 36,160 calves, 404,811 hogs and 110,741 sheep and lambs valued at $5,575,198.17 for live stock producers of seven states.

Henderson County Combines Work And Play At Meetings

Just to prove that all the "stars" are not congregated in Hollywood, Henderson County Farm Bureau added a new type of interest to a recent meeting when they drew a capacity crowd at Biggsville, Tuesday, Jan. 30. Those who attended were given a free opportunity to witness a burlesque "Beauty Contest." Charlie Chaplin, Will Rogers, Jimmie Walker, Ethel Barrymore, Sally Rand, etc., all passed in review, the parts played by some member of the Henderson County Farm Bureau.

Other counties are planning on similar features to draw crowds to future meetings. "Let's have a little fun along with our work," is the sentiment that is gaining favor in Henderson.

FARMERS GAIN BY MARKETING OWN GRAIN

Organized Action of Grain Producers Responsible For One of Largest Co-ops.

By BILL STAHL

For more than 75 years American grain farmers have been building for the co-operative marketing of their commodity. History records that the first farmers' elevator was built in Wisconsin in 1857. From that day to this there have been only a few intervals in which farmers were not actively engaged in efforts to carry their own grain to the market places.

Farmer elevator leadership recognized the limitations of the local establishment. They realized that control of the marketing machinery at the local point was but one forward step. They understood that the profits that were to be obtained between the local point and the world's market—that is, the terminal profits—were going into the hands of non-producers and were lost to the producers and to the local committees. It was logical, then, that terminal organization should follow the local efforts and just as logical that the terminal co-operatives should merge their resources and establish national co-operative marketing.

27 Terminals.

This was accomplished in 1929 when 27 treminal co-operatives organized Farmers National Grain Corporation as a national co-operative grain sales agency. Their goal was organized grain merchandising—control of the commodity by the producer, all the way from the farm to the last buyer of the raw product.

In 1930 Illinois grain farmers, affiliated with the Illinois Agricultural Association, organized the Illinois Grain Corporation, which became one of the stockholders—one of the owners, if you please—of the national co-operative. And in the three years of its existence Illinois Grain Corporation has grown to be one of the largest and strongest of the national units. In the 1933 crop season it contributed to the national co-operative marketing picture, in round numbers, sixteen million bushels of grain; marketed for its 154 elevator members in Illinois.

Incorporated 1929.

Farmers National Grain Corporation was incorporated October 29, 1929, and began operations with the opening of the 1930 crop season. It was incorporated under the laws of Delaware, in order to provide the necessary flexibility of organization to meet legal requirements of the various states in which, as a national organization, it must operate, and to enable it to embrace in its membership the various types of grain co-operatives. It recognizes the just pride of the [illegible] in his independence, but accomplishes the organized independence that shoud be the aim of every farmer. Its articles of incorporation and by-laws comply in every respect with the provisions of the Capper-Volstead Act, the national co-operative marketing statute.

Farmers National Grain Corporation is owned by grain producers just as surely as county elevators are owned by farmers. National organization multiplies the benefits and the advantages of the local co-operative. Grain growers own the stock of the local elevator association. The local elevators own the stock of the regional organization. The regional organizations own Farmers National Grain Corporation.

Farmers Nationa Grain Corporation is governed by a board of directors elected by the stockholders. These directors are themselves farmers. In nearly every case the director is officially connected with one or the other of the stockholders. Theirs is the final word as to what the corporation shall or shall not do. The farmers elect the directors of the local elevator associations. These directors elect the delegates who choose the directors of the regional. The directors of the regionals choose the delegates who elect the directors of the national. Controls of national co-operative grain marketing begins at the grass roots.

Brings Advantages.

Numerous advantages are brought to county shippers of grain through national organization and complete marketing service. They include:

1. Quick reflection of the world's markets. Branch offices not only supply instant information as to the values in neighboring markets, but quote bids on every market in the United States. Branch offices are in daily touch with local buyers, the mills and local feeder trade.

2. Quick communication with the terminal markets. The shipper may sell grain any minute of the day, taking advantage of the upturns in the options or unexpected advances in premiums, or carrying on hedging operations. A telephone call brings these facilities to the elevator manager.

3. Information through branch offices, market letters and traveling representatives concerning classes of grain selling to best advantage at interior and terminal markets, the cash demand and various market factors.

May Consign Grain.

4. Consignment, mill wheat, option and elevator departments offer complete service to shippers. They may ship grain on consignment, sell the car and buy the option, pool grain or carry it in storage. And as new marketing practices develop Farmers National will be leaders in adapting them to your use.

5. Expert personnel always at the service of the shippers. Farmers National employes are the employes of grain producers who own the facilities and provide the men to man them. They are paid to guard the shippers' interest.

Farmers National Grain Corporation, owns, or controls through lease, elevator storage capacity totaling in excess of 50,000,000 bushels. Twelve owned terminals have capacity of approximately 11,000,000 bushels; thirteen leased houses total 19,000,000 bushels. Equipment is complete for handling, storing, cleaning and mixing of grain. The corporation owns 321 country houses, with storage capacity of 18,500,000 bushels; it leases fifty-eight country houses of 1,500,000 bushels' capac-

WILSON TRUMPS ACE AND WINS A BROWN DERBY

This is a story of how Fred Wilson, general agent in Kane county trumped an ace, but not in a card game. It so happened that he heard Lawrence H. Wood, sales counseller, talk in Danville during the I. A. A. meeting. Friendliness, enthusiasm and persistence according to Wood are the three essentials in a good salesman.

Being very impressionable, Mr. Wilson went forth in his own county a few days later to put the advice into practice. He knows that there is such a word as "no," but he is equally sure it doesn't apply to him.

Fred knew of a "prospect" for the Farm Bureau. The 'prospect' listened to his new found eloquence, but hesitated. He wanted to talk it over with the rest of the family, and would Mr. Wilson please give him time?

Next day, Fred drove in the gate. The "prospect" was very firm. He had paid his last dues into the Farm Bureau and would Mr. Wilson save his breath and go bother somebody else?

Visions of sales counsellor, Wood. Fred turned on the steam. He waded valiantly through a hail of "no's." Somewhat later he drove out through the gate with the "prospect's" signature and a check for $15.

The boys in the Farm Bureau office were impressed. However, one there was, who went to the files and came back with a notation. Now Mr. Wilson sits and looks at a brown derby the boys voted him for being Kane county's foremost solicitor. He is not quite sure what kind of a prize it is. A citation is written in the crown of the derby. It reads, "To commemorate the day Fred Wilson signed up a 'prospect' who was already a member of the Farm Bureau with dues paid a year in advance. This is, we believe, the only instance where a Farm Bureau member is paid up two years in advance."

"I should think a man would know if he was already a member," complains Mr. Wilson to any who will listen.

They may kid him, but the folks in Kane county are pretty proud of Fred.

Farmers are exempt from paying the pressing tax on 300 lbs. or less of hog products sold or exchanged during a marketing year, and derived from hogs of their own raising which they have butchered, providing their total volume of hog products so sold or exchanged does not exceed 1,000 pounds per marketing year.

SERUM ASSOCIATION WILL REFUND CASH TO MEMBERS ONLY

At the annual meeting of the Illinois Farm Bureau Serum Association plans for the handling of serum and virus during 1933 on a refund basis as proposed by the board of directors was unanimously approved by members and delegates. County Farm Bureaus will maintain prevailing retail prices and sell serum and virus on the same basis as it is being sold by other distributors.

At the end of the year those who have purchased serum and virus through the Farm Bureau will be entitled to their share of the earnings. The state association will return to each County Farm Bureau its share of the earnings to be added to refunds going back to individual members.

This is merely another step on the part of one of the organizations affiliated with the Illinois Agricultural Association to render more fully to the cooperator the savings and earnings of the commercial enterprises.

For the year 1933 the Illinois Farm Bureau Serum Association purchased and the member County Farm Bureaus distributed a total of 37,083,975 C. C. of serum and 2,975,995 cc of virus. The savings in this project to individual farmers is conservatively estimated at 10c per hundred, or $40,000 besides the convenience to farmers of having available at all times a supply of reliable serum and virus kept under the best possible conditions. Although hog production during 1934 will be reduced it is expected that the substantially better prices will encourage farmers to use as much serum, if not more in 1934, than was used in 1933.

1,025,000 Bu. Corn In Vermilion Co. Sealed For Loans

Approximately 800 applications were made for corn loans in Vermilion county with a total of 1,025,000 bushels of corn sealed, according to Otis Kercher, farm adviser. This indicates that Vermilion county farmers received approximately one-half million dollars in corn loans at the rate of 45 cents a bushel.

"We estimate that 50 per cent of all the corn on the farms in this county has been sealed," said Kercher.

LaSalle Piles Up Big Lead In Corn-Hog Plan Signup

More than 450 LaSalle county farmers had applied for corn loans totaling around $630,000 by the first of February ,according to Farm Adviser C. E. Gates. LaSalle county is piling up a huge signup in the corn-hog reduction program and many non-members at the same time are joining the Farm Bureau to complete the cycle of [illegible]

HIGHER PRICES FOR PRODUCE THRU ORGANIZATION

Again farmers show they can get higher prices for their produce thru their own organization. Again organization proves to be agriculture's best means of obtaining a fair share of the consumer's dollar. * * * Organized by the Illinois Agricultural Association, the Illinois Producers Creameries, wholly owned, controlled and operated by farmers, prophesies what can be accomplished when the movement becomes state-wide. * * * Marketing "Prairie Farms" butter and eggs from producer to consumer direct. Illinois Producers Creameries now service better than 500 retail outlets out of three farmer-owned creameries using their own trucks and refrigerator cars. Other processing units are being formed * * * Co-operative marketing has proved itself! Working together, from here on out, we can build the greatest produce market organization in the country, commanding a steady market and higher prices. * * * It takes man-powed. It takes organization. But, increased membership in the I. A. A.-Farm Bureau will produce the power necessary to form a state-wide marketing group. Do your part. See your non-member neighbor today. Get him in the I. A. A.-Farm Bureau. Organization is the road to higher prices for cream, poultry and eggs.

Illinois Producers Creameries co-operates wholeheartedly with I. A. A.-Farm Bureau campaign for increased membership

WE CAN PULL OUT WITH Organization

One man alone with an idea can influence few people. But, one man multiplied by the thousands, acting on the same idea, can move mountains . . . So with agriculture. The pressing need for a permanent agriculture, based on fair prices, honest money and just taxes can only be solved by collective effort . . . We can pull out with solid, militant organization. Group action of farmers has accomplished much. But our job has only begun. There are more and bigger things to be done that agriculture may occupy its rightful place in the economic life of the nation . . . Let's fill the ranks—present a solid front. Bigger organization will do bigger things, Near you there is a non-member neighbor. See him today. Get him to join the I. A. A.-Farm Bureau . . .

Farm Bureau Members Thru Co-operative Enterprise Now Enjoy Protection at Lower Cost

In Many Cases Savings Made Pay Farm Bureau Dues!

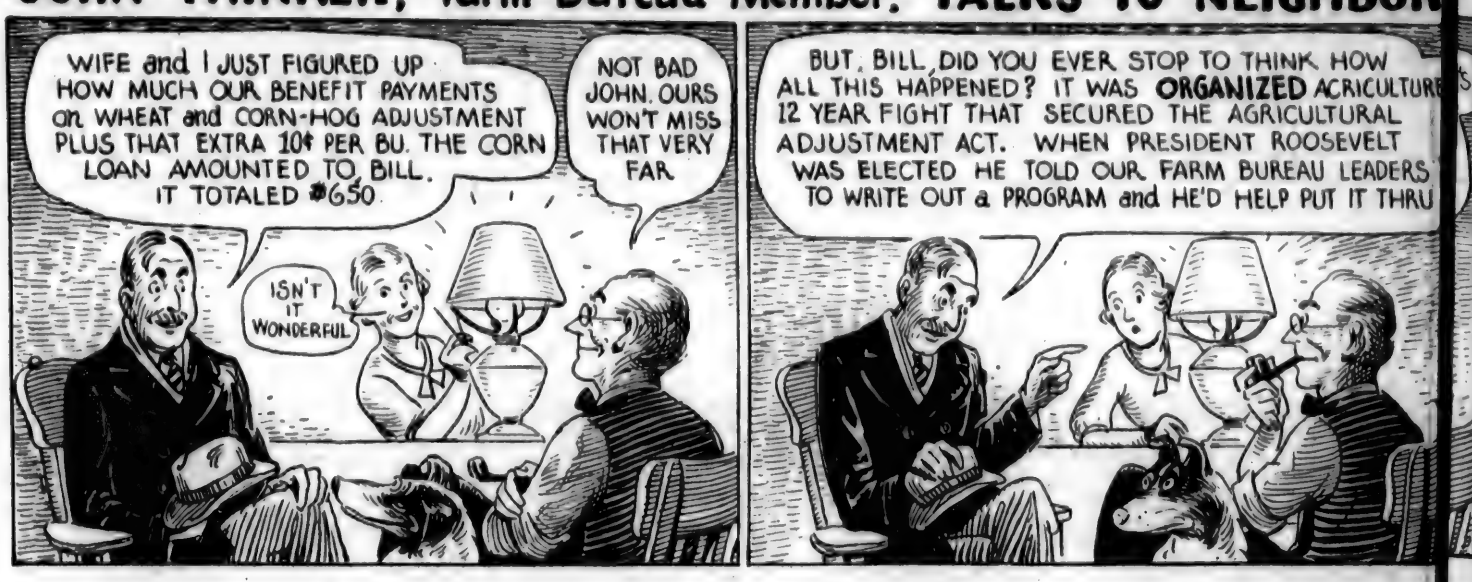
The Illinois Agricultural Mutual Insurance Company and its agents are putting their strength and support behind the I. A. A.-Farm Bureau drive for increased membership. Formed by the Illinois Agricultural Association, this company would never have existed had Illinois farmers not joined together to provide their own low cost automobile insurance. For years, farmers paid city rates for auto insurance when the risks of country driving did not warrant it. Old line companies stood pat. Thus was the farmer forced to form his own auto insurance company to obtain his rights.

Today, Illinois Agricultural Mutual Insurance Company has more than 32,000 policies in force, saving Farm Bureau members up to 50 per cent on auto insurance. Assets of the company are $990,794 with a surplus over liabilities of nearly $500,000. Last year 6,000 claims were paid totaling approximately $200,000.

Yet, Illinois Farm Bureau members have only begun! New policies and new members are rapidly building Illinois Agricultural Mutual into an organization second to none in the state.

GET YOUR NEIGHBOR TO JOIN TODAY!

AUTO INSURANCE FOR I. A. A. MEMBERS AT RATE SAVINGS UP TO 50%!



New low cost surplus fee policies are available to Farm Bureau members. Compare these low rates on cars insured in your strong legal reserve company. Only $15.40 initial payment on a new Ford, Chevrolet, Plymouth (in fact any car with a f. o. b. price of less than $750) and a semi-annual premium thereafter of $8.40 and less as car gets older, for public liability ($5,000 and $10,000 limits), property damage ($1,000), fire, theft, windstorm, hail, theft of spare tire and collision with any object including accidental upset. Ask your County Farm Bureau office for details. NOTE—Policies in Illinois Agricultural Mutual are issued only to Farm Bureau members in good standing!

AUTO INSURANCE COMPANY RESULT OF COOPERATION

Success of Illinois Agricultural Mutual Made Possible By Organized Effort.

By A.E. RICHARDSON

To have any successful cooperative enterprise we must have an organization, or an association of people who have a common interest and are fully conversant with the needs and problems incident to the business or industry which the members are engaged in.

The statement has been made many times that the farmers in Illinois never would have known what they should be paying for automobile insurance had they not had an organization of farm folk who were willing to venture into this field and set up a group cooperative insurance company with no private capital or stockholders interested in profits.

Three thousand farmers seven years ago had the courage to make application for insurance on automobiles in a company that was not even in existence at that time and put up the cash in advance to see a cooperative project of insurance started for the farm people of Illinois. These 3,000 farmers had a common interest and were fully conversant with the needs of automobile insurance in their business of farming. This never could and never would have been accomplished had it not been that they had other common interests and had many years ago built up in Illinois a farm organization which today is recognized as the strongest agricultural organization in the world; namely, the Farm Bureaus and the Illinois Agricultural Asso-

Members Had Knowledge.

Because of the knowledge of the needs for insurance and because of the real purpose for which this company was set up there has not been any question in the minds of Illinois farmers as to the success of the Illinois Agricultural Mutual Insurance Company and no question has ever been raised as to what the cost of insurance should be, fully realizing that an insurance company is never sound unless the policyholders pay all the losses and expenses incident to the operation of a company.

There are many other such groups of this kind where the members all have a common interest but there is probably no other interest more common to all than the interest in insurance .

Professor Hoffman of the University of Pennsylvania said some few years ago, "It may be seriously doubted whether the average farmer would be willing to accept a cooperative principle of insurance. He is fundamentally an individualist and shares his lot with others reluctantly and to pay premiums over a considerable period of time with no loss in return and rejoice in ones good fortune requires a philosophical outlook not possessed by most farmers."

Glad To Pay Premiums.

I have challenged this statement many times because in the seven years experience which I have had in the management of the Illinois Agricultural Mutual Insurance Company I have not heard a member say that he was glad he had an accident so that he could get some of the money back that he put into his insurance company. In fact it has been really just the reverse and I have heard many men say, "Well, here's my premium. I have been a member so many years and I never had a claim and I hope I never do."

Regardless of our pride the past accomplishments are now only a small page in the history of the great cooperative movement which is fast developing. This movement truly can be said to be growing out of the organization of men who have a depth of conviction and a common interest. Great opportunities lie ahead and this generation of farmers must carry on as did the pioneers with the same courage, conviction and determination.

Albert Hayes Of Peoria Tells How He Saves Money

Albert Hayes, president of the Peoria County Farm Bureau and newly elected director from the 16th district to the I. A. A. board, is one of the many Illinois farmers who believes that it is good business even from a selfish angle to belong to the Farm Bureau and its associated cooperative organizations.

He proved his point conclusively at the last meeting of the Peoria County Farm Bureau executive committee while presenting figures on savings on his own farm during 1933. He keeps a farm account book.

Mr. Hayes listed his savings as follows:

Service Company dividend	$ 46.50
Auto Insurance, 2 cars and truck	65.00
Serum	15.00
Life Insurance	20.00
I. A. P. Producers refund	8.00
Total	$154.50

Whiteside Farm Bureau Showing Steady Growth

F. H. SHUMAN.

Whiteside County Farm Adviser

Whiteside is one of the first two counties to make a 25 per cent gain in membership since Jan. 1, 1934.

Producers Make 84 Pct. Increase In Jan.

An increase in volume of business of 84 per cent was shown by the Chicago producers during the month of January as compared with the same month a year ago. During the month their total receipts amounted to 2,367 carloads of livestock which is the greatest number handled in any one month in producers' history.

In cattle they handled 16,701 head which represented 8 per cent of all the cattle sold on the Chicago market. As compared with January of last year this was an increase of 109 per cent, though market receipts during that period show an increase of 32 per cent. In addition the cattle department handled 4,899 calves or 13.3 per cent of the salable receipts.

The ivolume handled by the hog department amounted to 96,873 hogs which was 17.1 per cent of all hogs sold at Chicago, representing an increase of 91.6 per cent over a year ago. Market receipts during this period likewise show a substantial increase, salable receipts increasing 51.5 per cent. The number of directs during the month likewise showed some increase, the total being 345,054 as against 312,811 for January a year ago.

The sheep department advanced its percentage from 10.7 per cent in January, 1933 to 18.2 per cent in January 1934, handling 45,603 head, an increase of 29 per cent over a year ago, whereas market receipts show a decline of 23 per cent.

These figures afford convincing proof of the continued success of the cooperative marketing program and the type of service that is being rendered by this farmer-owned and controlled selling agency. For this organization to show an increase year after year can only mean satisfactory sales and service.

Vermilion County Is Ready To Go, Reports Kercher

The Vermilion County Farm Bureau had a luncheon meeting Saturday, February 10, to launch an extended membership drive. They expect to sign at least 300 new members which if accomplished will more than put the county over the top with a 25 per cent increase.

"Some of the membership teams are at work today," Farm Adviser Kercher wrote on February 7. "James Hart and A. V. Carter of Jamaica spent one day soliciting, interviewed eight men, signed six and came in and got 50 more membership blanks. We believe there is no time like the present for Illinois farmers to rally to their organization and show that they are in earnest in the drive for agricultural recovery."

254 New Members In Henderson Co. Drive Continues

Out in Henderson county where they have made long strides toward building a bigger and better Farm Bureau, many a nonmember has quietly slipped into the office during recent months, according to Farm Adviser E. D. Walker ,and signed up.

And if you ask Bill Stevenson or Otto Steffey how Henderson added 254 new members during 1933, they'll tell you "if you want to get results you gotta make calls." These two men are responsible for a large percentage of the increase in that county. Henderson is out to establish a new record for percentage gain in one year.

FARMERS WARNED TO INSURE CORN; OFFER LOW RATES

Farmers' Mutual Reinsurance Co. Writes Blanket Policy For Farm Bureaus.

The federal government is protected by insurance against loss of cribbed corn by fire or tornado on which loans have been made, but the farmer apparently is not protected unless he has his own insurance. This opinion was expressed by W. S. Bradley, chief of the government corn loan division both at the recent I. A. A. convention, and at conferences held last week in the I. A. A. offices.

Based on this information the I. A. A. moved at once to offer Farm Bureau members having corn loans, fire and windstorm insurance at a special low blanket rate through the Farmers Mutual Reinsurance Company.

Insurance to Farm Bureau members is offered at a blanket policy rate of 30c per $100 of insurance against fire and lightning. The windstorm rate to members is 10c per $100 up to noon Oct. 15, 1934. There is no policy fee.

Non-members are offered insurance in the Farmers Mutual at the regular annual rate in force in their territory with a policy fee of $2 on each application.

Members should make application to their respective County Farm Bureau offices, if they are not already protected.

Farmers are liable under their [illegible] at the time corn loans were secured, for delivery of such corn at the [illegible] of the loan period.

GET CORN LOANS BY FEB. 28TH, ADVICE OF CCC

The corn loan division of the Commodity Credit Corporation has advised that all corn loan warehouse certificates and other papers must be completed and mailed to the lending agency not later than the close of business on February 28. This means that all persons desiring to seal their corn and obtain the 45 cents per bushel loan must get their cribs sealed and all papers filled out by the end of this month.

A total of 533 warehouse certificates had been issued on 713,196 bushels of corn in Marshall and Putnam counties on Feb. 1. This represents loans of $158,488.

Production Credit Loans Being Made To Fruit Growers

Fruit growers who are beginning to lay plans for the spring and summer seasons, will be interested in an announcement made recently by J. M. Huston, president of the Production Credit Corporation of St. Louis, that the Illinois Fruit Growers Production Credit Association located at Centralia is ready to supply the sound credit needs of the fruit growers of the entire state.

The association may make loans for the following purposes: to purchase material and supplies; to pay for labor, and replace worn-out equipment; to purchase packages; to purchase fertilizer; to cover the expenses of marketing, pruning, spraying, freight, and insurance; and to refinance existing indebtedness incurred for horticultural purposes.

Illinois fruit growers who are interested in obtaining one of these loans should write David B. Perrine at Centralia, Illinois.

"Ungrateful If I Hadn't Joined"— Piatt Man Says

Up to Feb. 7 corn loans numbering 565 for a total of $504,000 had been made in Piatt county—one of the smaller counties in Illinois—and "as near as we can tell this represents 70 to 75 per cent of the corn in this county," according to Farm Adviser S. S. Davis.

Piatt county has been steadily adding new members and the signup will continue until April 1.

"One farmer who recently signed," reports Davis, "stated that he would be very ungrateful if he had not joined after all the Farm Bureau in the county, state, and nation has done to help him as well as other farmers in getting back on their feet."

LEGAL SERVICE AIDS, PROTECTS I. A. A. PROJECTS

By Donald Kirkpatrick, Director Of I. A. A. Legal Department.

The activities of the legal department for the year 1933, as far as the educational organizations are concerned, namely, the Illinois Agricultural Association, and the County Farm Bureaus, have not been dissimilar from the activities of this department in former years. The strains and stresses of the year have developed, of course, a much larger number of inquiries from County Farm Bureaus.

The closing of banks during the moratorium period and the placing of all insurance companies operating in the state under a moratorium operation has developed, during the year, a great many inquiries with reference to the rights and obligations of parties on commercial paper and also the rights of policyholders as to cash values, extended insurance and loans. It has been the policy, and such policy should be continued in rendering legal service to individual members, that the inquiry should come in through the County Farm Bureau and the inquiries should be confined to a character the answering of which would be of general service to other members who might have the same problems.

Co-Op, Set Up.

The calls from the standing committees of the board of directors of the Association upon the time of the department during the year have not been as many as in previous years. This can be accounted for in part for the reason that the year has not been one in which new projects have been developed, or promoted. The heads of the several departments in the organization, however, have been carrying on their projects under programs outlined and developed in part at least prior to the current year.

In the marketing field new units have been organized and old units have been reorganized. The flow of inquiries from local cooperatives, both in the marketing and purchasing field, has been constant. This line of inquiries and the response of service will continue and no doubt increase in the future.

During the year, the Illinois General Assembly has been in almost continuous session because of its regular session and special sessions. The regular session continued up until the middle of the year and the first special session was called early in the fall. The organization was tremendously interested in the matters that came before the regular session and also the first special session. Someone from the department has always been ready to stand by with the legislative committees and executive officers in giving personal attention to matters at Springfield.

Serve Companies.

The legal department operates within a budget adopted by the board of directors of the Illinois Agricultural Association. The services performed by the department for the commercial and semi-commercial affiliates are charged for on a reasonable basis by the Association with recoveries to the departmental budget. This relationship has placed in the offices of the legal department all legal matters in connection with the cooperative marketing association, the insurance companies, the cooperative distribution associations and cooperative auditing service.

The commercial activities in spite of any adverse circumstances, have made substantial progress and there has been a corresponding expansion of business. As the commercial field has broadened and the business expanded, new and more numerous legal questions arise.

With the adoption of the Agricultural Adjustment Act, the call for preparation and presentation of trade agreements and codes of fair practices have come into the office. This service has taken quite a little time of the department and because of having had no arrangements during the current year for contact at Washington, the matters connected with the codes have been handled largely by the personnel from the home office of the Association. The Washington office of the American Farm Bureau Federation has been helpful to the extent of its ability. The calls for service in this direction during the coming year will no doubt increase.

Assistance On Codes.

Agriculture is also interested in the codes that were adopted from time to time under the provisions of the National Recovery Act and the administration of these codes. Agriculture, of course, is a large consumer of manufactured products and is no doubt the largest organized group of consumers in the country. Certain codes under the Recovery Act have been of especial interest to agriculture; first through the preparation and influence of organized agriculture specific codes have had preserved in them the cooperative principle. The patronage dividend, principle in particular has been under heavy fire. President Roosevelt, however, by executive order, preserved the principle of patronage dividends for all cooperatives and saved the need of organization to get specific provisions in each code. This executive order is being hammered at this time especially by the petroleum industry which is fighting with all its ability to get a modification of the executive order.

Organized agriculture made possible the Agricultural Adjustment Act, under which 819,644 farmers in 35 states had been paid a total of $43,716,794 in wheat benefit checks up to the first of February.

The payments are the first installments of 20 cents per bushel on each farmers allotment. The second payment of 8 cents per bushel from which the operating costs of the local production control association will be deducted, will be made after growers have shown that they have carried out their end of the agreement.

Payments up to Jan. 30, 1934 totaled $1,480,590 in Illinois

Illinois Livestock Co-Ops Increase Volume In 1933

During the twelve month period ending September 30, 1933, Illinois farmers marketed 27,215 carloads of live stock cooperatively through various cooperative live stock selling agencies which were largely set up by the Farm Bureau. This constituted 20.8 per cent of all the live stock produced in the state. For the corresponding twelve month period ending September 30, 1932 Illinois live stock farmers marketed 23,846 carloads of live stock which constituted 19 per cent of live stock produced.

The comparative volume marketed for the two periods follows:

Producer Agency	For 12-month period ending Sept. 30, 1932	For 12-month period ending Sept. 30, 1933
Chicago	9,550	11,375
Indianapolis	1,690	1,551
St. Louis	6,755	7,778
Peoria	3,245	3,485
Cincinnati	329	372
Buffalo	428	366
Pittsburgh	65	110
Springfield	1,193	1,254
National Order Buying Company	53	4
Illinois Live Stock Marketing Association	454	853
Evansville	84	67
	23,846	27,215

Gas Tax You Pay Supposed To Be For Good Roads

When you drive into your favorite filling station and the attendant hands back your change, the several cents that are taken out for the state gasoline tax are supposed to be used to build and maintain roads. This tax was sponsored originally by the Illinois Agricultural Association and largely through its efforts went on the statute books. With fully 70 per cent of the roads in Illinois as yet unimproved, it is obvious that slowly but surely the gasoline tax money is being diverted into other channels.

During its annual meeting in Danville, Jan. 24, 25 and 26, the resolutions committee of the I. A. A. went on record to the effect that, "Inasmuch as the Illinois primary road system is practically completed but only thirty per cent of the total mileage of the state has been improved with an all weather construction and 70 per cent of the farmers still reside dirt roads, we oppose any further diversion of gasoline tax moneys from road building whatever by investment in state anticipation notes or otherwise, and direct the officers and directors of the association to exert every effort to preserve these moneys for road building, the purpose for which the tax was imposed."

Certain groups are doing everything possible to divert gasoline tax money away from the secondary road-building program. They will continue to dip into the gasoline fund for other purposes unless farmers in an organized way carry their fight for proper use of gasoline taxes to the general assembly and if necessary to the polls.

Until co-operative action on a scale comparable to the group who seek to stalemate the road-building program, is thrown into the picture by farmers of Illinois, there will be no change from the present condition. To keep gasoline money in the proper channels is the avowed purpose of the I. A. A. Farm Bureau this year.

UNEMPLOYMENT RELIEF STILL A BIG PROBLEM

Regardless of advances made in promoting legislation sympathetic to them, the farmers of Illinois have yet to solve the riddle of how metropolitan politicians continue to avoid levying taxes locally for poor relief although townships in 85 rural counties are required to do so.

While the tax-payers in these counties do not turn a deaf ear to the pleas of the thousands of unfortunates who depend upon government agencies for food and shelter, farmers feel, and rightly so, that every county and every community should be required to draw on its own resources before it is given any Federal or State relief funds.

The state of affairs now existing under which the taxing power of the whole state is pledged to pay millions of dollars in tax anticipation notes sold to provide funds most of which are being spent in metropolitan areas, is unjust.

That efforts have been successful in the past to thwart fair legislation does not justify confidence that they will continue so. The Farm Bureau and the Illinois Agricultural Association, through larger and more militant organization must exert every influence to remedy inequalities in unemployment relief taxation.

Holding Company Pays Dividends To Stockholders

That mysterious thing called a 'holding company' has been in the press a great deal of late. But there's one 'holding company' that is different than the others. It is composed of directors who have the needs and interests of farmers at heart; they are concerned primarily with solving the problems of agriculture quickly, economically, and permanently through honest, hard-working organization. It is really set up to serve its stockholders and patrons rather than those who are in direct charge of its affairs. The Illinois Agricultural Holding Company is the organization through which dividend payments were made last year to Farm Bureau member stockholders who own and control Country Life Insurance Company and to holders of policies of the company.

DO YOUR STUFF

Do your stuff and let 'em holler.
Do your best and let 'em rap.
If you win, they'll holler lucky.
If you lose, they'll holler sap.

Let 'em help, or let 'em hinder.
You should worry; do your stuff.
You're the guy you have to live with.
Be yourself and treat 'em rough.

—Anonymous

E. W. "Farmer" Rusk started work as farm adviser in Coles county on Feb. 1. Melvin Thomas, former county adviser, is giving full time to farm loan association work.

PAY DIVIDENDS OF $20.14 PER BUREAU MEMBER

The increasingly keen interest taken by the public at large in farmer cooperation is evidenced by the widespread publicity given to the annual meetings of cooperative associations such as that of the Wabash Valley Service Company in Grayville, Feb. 2. The fact that 1,000 farmer members from five counties attended and that more than $16,000 in patronage dividends was paid to stockholders for an average of $20.14 per member commanded attention as far west as St. Louis. Added comment on the $25,693 in taxes paid by the company shares space with an analysis of the $115,531.79 business done during 1933.

For the third consecutive year, a total patronage refund of $500,000 was paid to Farm Bureau members in the territories served by 54 similar county service companies in Illinois. The statewide average refund was in excess of $17 per Farm Bureau member.

It is significant that collective effort among farmers is now receiving sympathetic treatment from metropolitan newspapers. The momentum gained by organized agriculture is being felt in non-rural communities and definitely points out that urban sympathy for the farmer is at last aroused to a pitch that promises continued cooperation so long as farmers continue to unite in a common cause.

Marchant Speaks.

The Grayville meeting had as its principal speaker L. R. Marchant, manager of Illinois Farm Supply Co., an Illinois Agricultural Association sponsored organization. In his talk, Mr. Marchant pointed out that Wabash Valley was among the 12 first companies in efficient, profitable operation. The total business done by 54 associated companies totaled more than $6,000,000 during 1933, Mr. Marchant said—a big gain over 1932.

Better than 40,000,000 gallons of petroleum products were distributed to Illinois farmers. More than 700,000 gallons of motor oils and greases, or 225 carloads, is contracted for 1934 spring delivery. This represents a 200,000 gallon increase for the same period in 1933. Dividends paid to affiliated companies totaled $100,000 of which Wabash Valley's share was $2,600.

At the opening of the afternoon session, a free will offering of $63 was made up among shareholders to honor the birthday of President Roosevelt for the endowment of the Warm Springs infantile paralysis foundation. The meeting also voted to send the President a telegram of birthday congratulations.

Cooperation Wins Second Prize For Morgan County

A local garage teamed up with the Farm Bureau of Morgan county to win second place in the accident prevention campaign conducted by the I. A. A. Insurance Service department. The cleverness of the scheme to focus attention on the need for a properly adjusted automobile to prevent accidents was one of the prime factors in the success of the campaign.

Farm Bureau members were sent a letter alloting them a certain time to go to the garage for a free 'Physical Diagnosis" of their cars. Each township was given a certain time for testing. The test covered brakes, lights, wheel alignment, tires, etc. Many Farm Bureau members sent in testimonial letters commending the plan. Of course the garage gained a great many new contacts it would never have made.

Again, cooperation shows itself to be the best method of getting things done. It is the spirit which has brought great gains to agriculture and points the way to greater gains for Illinois farmers.

Producer Agencies Aid In Corn-Hog Sign-Up Program

Producer live stock commission agencies at St. Louis, Chicago, Indianapolis and Peoria as well as at other terminal markets are helping hog producers secure necessary data in completing their corn-hog reduction contracts. Each producer agency has a special force of extra help at work answering inquiries, looking up account sales and furnishing producers with lists of their marketings during the base period.

This service is being furnished without charge although before all of the data is asembled the cost will actually run into thousands of dollars. This is typical of the policy of the farmer-owned and farmer-controlled producer agencies. They were created to serve live stock growers. Many farmers who are having difficulty in getting data to complete their corn-hog contracts now regret that their live stock was not handled through a cooperative agency.

TAX BILLS CUT BY COLLECTIVE FARM EFFORT

Substantial Reductions Gained In Counties Where Committees Were Active.

Farm Bureau Tax Committees in many counties in the state have been active during the past year in securing substantial reductions in assessed valuations, John C. Watson, director of taxation, for the I. A. A. pointed out in his recent annual report.

While reductions were not made in all counties in line with the big drop in real estate and property values, Mr. Watson points out, in counties where Farm Bureau tax committees were active substantial cuts were ordered.

Abstracts of assessments for 1933 sent to the State Tax Commission by the clerks of all downstate counties disclose the following net changes since 1930, 1931 and 1932 in total valuations of the

ee classes of locally assessed perty, except such property as- ed against railroads:

Net Decrease in Assessed Valuations

ss of Property	1930 to 1933
nds and improvements	$453,281,313
wn and city lots and improvements	202,432,648
sonal property	196,147,963

verage reductions in assessed uations from 1930 to 1933 were 4 per cent on lands and im- vements, 17.86 per cent on town city lots and improvements, 32.17 per cent on personal perty. The loss of 40.66 per of estimated values of farm ds and improvements from 1930 933 computed in the index bers of values given by the ted States Department of Ag- lture, may be compared with reduction of 26.84 per cent in ssed valuations of all lands and rovements. It seems clear that ctions in assessed valuations unds and improvements lagged ar behind the loss in actual es, that the average basis of ssment of rural real estate in ois had increased from about er cent of actual values in 1930 bout 50 per cent of actual val- in 1933.

the lack of any information otal actual values of town and lots, including improvements, of personal property in any , it is not possible to compute os of assessed valuations to ac- values for either of these clas- of property. Such assessment os can be computed only by compiling a fair volume of samples of such properties, either lots or personal, taken at random, the total assessed valuations of which can be compared with the total amounts in cash voluntarily paid for the same properties. The same method can also be used in computing the average ratio of assessments to cash values of lands.

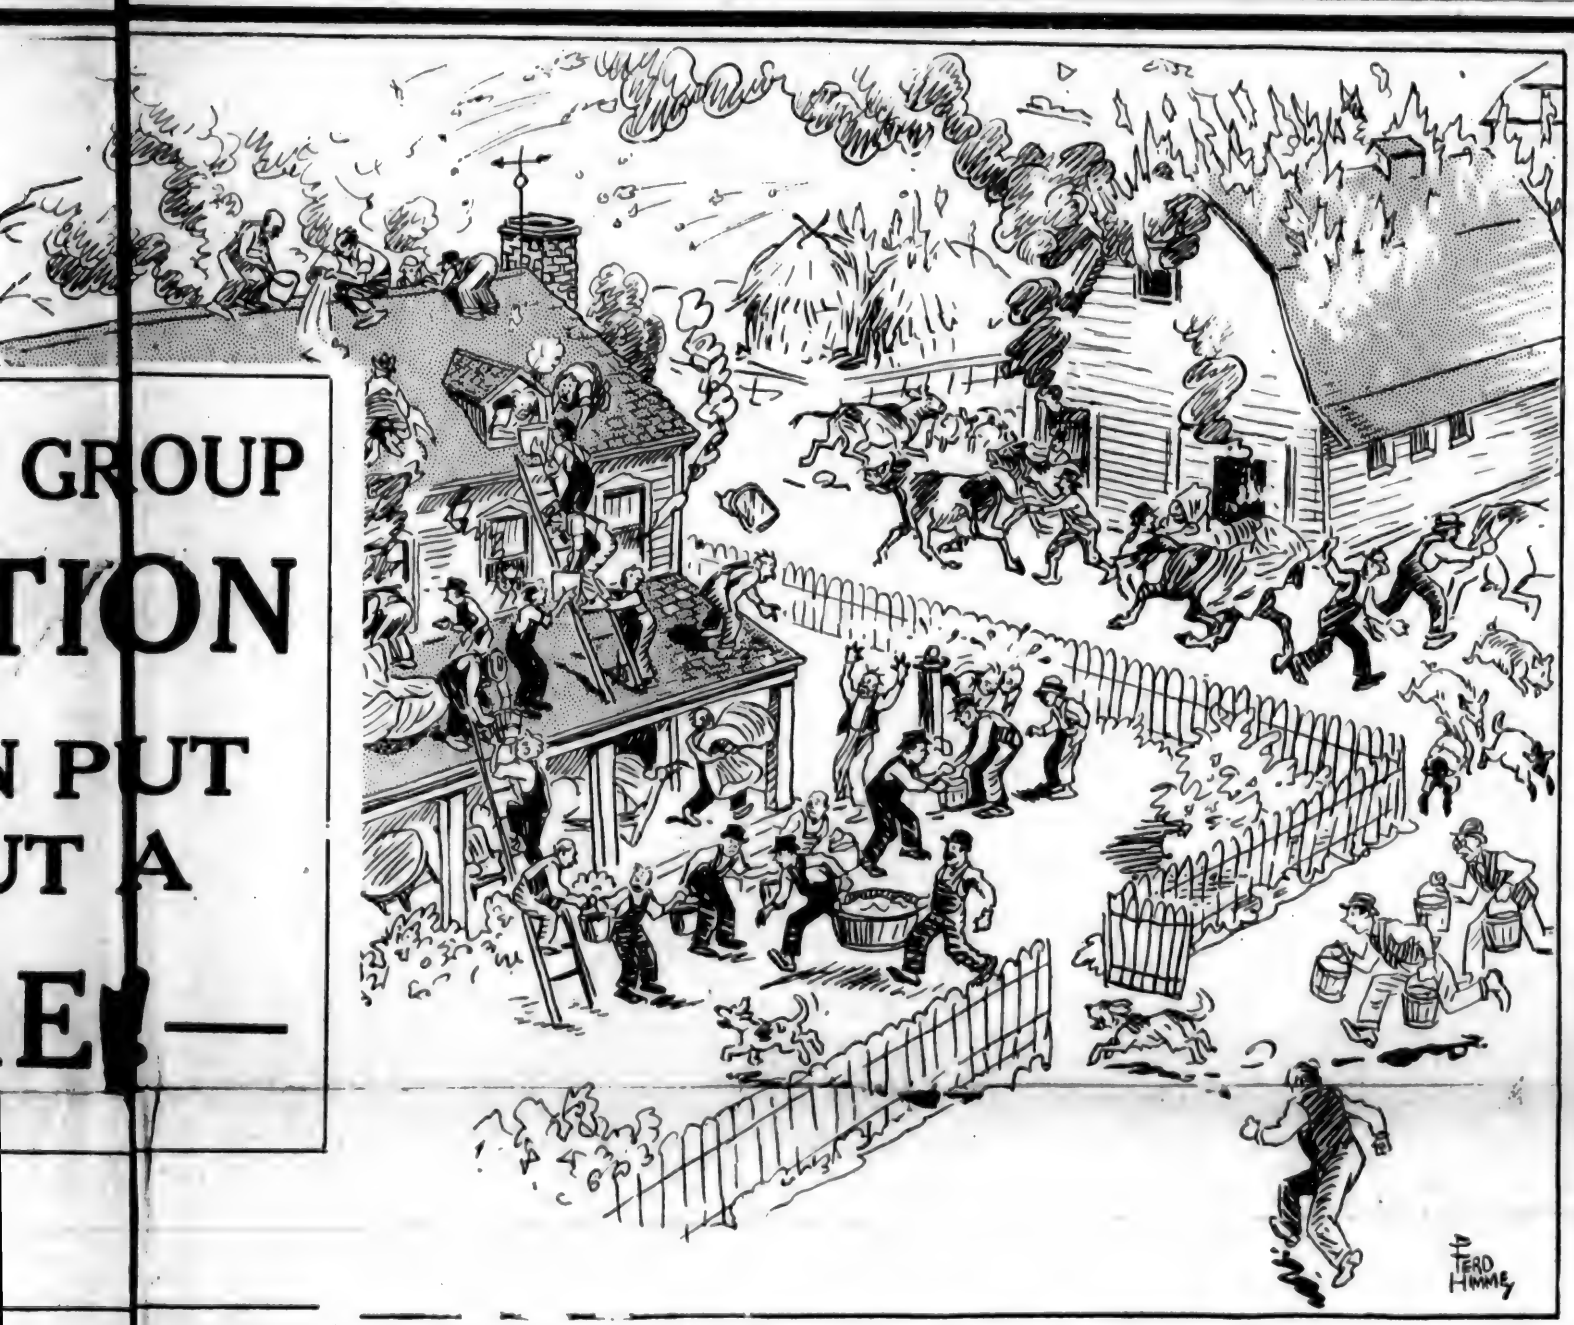
In 1933 substantial reductions in assessed valuations of lands were made in the following counties:

Percentage Of Decrease In Valuations of Lands, 1932 to 1933.

County	Percentage of Decrease
Edgar	24.98
Cumberland	20.92
Macoupin	20.65
Piatt	20.14
Marshall	20.02
Ford	20.01
Shelby	20.01
McLean	19.94
Morgan	19.72
Kankakee	19.55
Crawford	15.56
Woodford	15.06
Livingston	15.01
Winnebago	14.84
McDonough	11.83
Coles	10.48
Mercer	10.41
Stephenson	10.05
Henderson	10.00
Lee	9.93
Ogle	9.89
Grundy	9.84
Jo Daviess	9.56
Whiteside	8.32
Carroll	7.65
Williamson	6.93
Jefferson	5.09

Saline county is the only county reporting a large increase in assessed valuations of lands. The increase over the assessed valuations of lands in 1932 appears to be 19.96 per cent.

ANNUAL REPORT REVEALS GAINS OF COMPANIES



Some idea of the extent to which farmer-owned and controlled organizations are carving a niche for themselves in the business of the state can be gained from the reports submitted by each company upon the close of last year's business. Sponsored and directed to a large extent by the Illinois Agricultural Association, these companies demonstrate the undeniable fact that farmers forced by circumstances to organize their own enterprises have done a job that puts to shame many similar enterprises functioning for private gain.

Probably not so well known but extremely important to the proper conduct of farmer-owned businesses is the Illinois Agricultural Auditing Association. This company completed 349 audits for its members during 1933, which was a gain in membership of 17 over 1932.

Farmers Mutual Re-insurance Company increased the amount of insurance in each of its classifications to $58,000,000 of fire, hail, tornado, and lightning insurance in force, an increase of $10,400,000 over 1932. Only eight years old, Farmers Mutual, in offering protection at cost, justifies greater expansion of its services during the present year.

From an humble beginning seven years ago, Illinois Farm Supply Company has grown to be the largest purchasing organization of petroleum products serving farmer-owned and operated companies in the United States. During 1933, Farm Supply handled 40,000,000 gallons of petroleum products, received its largest net income of $128,287, and returned a patronage refund to its affiliated companies of $100,000. Since its founding it has returned to its owners and patrons in the form of patronage dividends approximately $350,000.

The success of these various farmer-owned companies has drawn the attention of leaders and business men in all walks of life. Except where selfish motives prompt adverse criticism, people in the towns and cities are applauding farmers for their spirit, determination and success in helping themselves through group action.

Millions In Corn Loans Distr

COUNTY REPORTS SHOW GROWERS ARE TAKING ADVANTAGE OF OFFER OF 45C PER BUSHEL ON FARM

Corn Was 23c Bu. When Program Was First Considered, Increase $150,000,000.

The granting of corn loans to farmers at the rate of 45 cents per bushel at the farm will go down in current history as one of the outstanding emergency projects of the administration that turned the tide toward agricultural recovery in the corn belt in 1933.

This program has resulted in the speedy distribution of approximately $70,000,000 in the midwestern corn states and by the end of February the figure will probably be exceeded.

The project was launched in response to urgent requests of the Illinois Agricultural Association that something be done at once to raise corn and hog prices while waiting for the long time adjustment program to take effect.

The action was equivalent to placing a 45 cent minimum price on corn on the farm. It has been carefully estimated that this service has increased by $150,000,000 the corn values and incomes of farmers in the middle west.

$70,000,000 Loaned.

"This amount will be much greater," President Earl C. Smith said at the recent I. A. A. convention, "if and when farmers respond to the 1934 program to reduce corn acreage and thereby create a deficit in production that will allow normal consumption of the accumulated surplus of corn."

It is estimated that of the $70,000,000 already loaned in the corn-belt states, Illinois farmers have received approximately $10,000,000.

At the time this effort was inaugurated the average country price for corn in Illinois was 23 cents and seemed destined to go lower. The I. A. A. believed that if the government was justified in many of its other price and wage supporting policies it was only fair and just that the price of this important basic commodity should be supported and maintained.

Following a meeting in the office of Secretary of Agriculture Henry A. Wallace on Oct. 11 where Earl Smith, president of the I. A. A. discussed the corn loan program with Wallace, Geo. N. Peek, and Chester Davis, Mr. Smith in a radio broadcast from Station WLS, Chicago, two days later called on corn belt farmers who were interested in a corn loan program to write or wire officials at Washington and make known their thoughts. Similar aid had been given cotton farmers in the south.

A short time later Administrator Geo. N. Peek announced the corn loan plan and on Oct. 27, more than 8,000 Illinois farmers who met in Peoria at the call of the I. A. A. vigorously endorsed the program with the suggestion that there be slight modifications so as to include all marketable corn in the loan offer and that the price apply to corn sealed on the farm.

These modifications were readily made and a few days later the announcement of 45c per bushel loans on corn at the farm was made. The effect of the new announcement was to add approximately 10c per bushel to the previously announced corn loan price.

A check of the contracts signed in the corn-hog program on Feb. 7 showed a total of 1,937 contracts signed in Livingston county, Farm Adviser S. G. Turner reported. The warehouse board reports 2,640,000 bushels of corn sealed with a total of 1929 applications.

Other reports on corn loans are as follows:

Macoupin county — "Sixteen farmers obtained loans on corn amounting to $3,869.10.

DeKalb county—Up to and including Feb. 9,515 people in DeKalb county secured corn loans on 912,846 bushels—a total of $410,780.70.

Moultrie county—Three hundred corn loans for a total of $175,000.

Woodford county—Six thousand thirteen certificates issued with 1,020,839 bushels of corn sealed.

Kankakee county—One hundred ninety-three corn loans totaling 329,446 bushels for $148,250.70.

Champaign county—Nineteen hundred and twenty-five farmers made application for corn loans, 1773 cribs sealed representing 2,770,889 bushels for a total of $1,246,900.05.

Washington county—No inquiry for corn loans except from those wanting to get money to buy corn. County captain and lieutenant working this week.

Henry county — Four hundred seventy-six farmers sealed a total of 806,750 bushels of corn for a total of $363,037.55. Approximately 13 per cent of corn on farms sealed, reports Farm Adviser H. K. Danforth.

Rock Island county—One hundred twenty-nine corn loans totaling $81,000.

Sangamon county—One hundred sixty farmers have received loans for about $126,000. "A poor corn crop last year and the fact that much of the corn available for sale is being moved to counties to the south at 45 cents per bushel or over has reduced the demand for corn loans," reports Farm Adviser Edwin Bay.

Whiteside county—Six hundred ninety farmers have received loans on approximately 955,282 bushels, reports Farm Adviser F. H. Shuman. Approximately 17 per cent of corn on farms represented.

McLean county—Fourteen hundred seventy-five applications for corn loans representing more than two and one-half million bushels which "in my opinion represents about 50 per cent of the corn which ordinarily goes to market," writes R. J. Laible. "Approximately 50 per cent of the corn in McLean county is fed to live stock."

Knox county — Approximately 747,939 bushels sealed for 551 farmers, advised A. R. Kemp.

Scott county—Eighty-six farmers received corn loans for a total of $48,210. J. L. Iftner, farm adviser, reports that since Oct. 1 61 new members were signed.

Hancock county—Four hundred forty-nine corn loans representing 203,849 bushels, 60 new members signed, reports T. H. Hafer, farm adviser. Lieutenants are planning another meeting to plan further work on membership.

Henderson county—Two hundred forty-nine have received corn loans on 370,395 bushels which represents from 15 to 20 per cent of the corn on farms.

Mercer county—Three hundred forty-eight cribs sealed containing 427,764 bushels.

Farmers Are More Optimistic, Farm Adviser Reports

"We do not have sufficient corn to supply our local needs," reports Dee Small of Williamson county, "consequently there were no loans on corn in this county. But conditions here are looking more favorable and farmers seem to be more optimistic than they have been for a number of years."

WORKS 12 HOURS, SIGNS 15 NEIGHBORS IN FARM BUREAU

George Woessner (right) of Genesee township, Whiteside county Tells County Captain Lowell Johnson how he signs 'em up.

Mr. Woessner's record as a Farm Bureau solicitor is 15 signed out of 15 seen. He worked from 10 A. M. to 10 P. M. to make this splendid record. The secret of his success, according to F. H. Shuman, farm adviser, is his sincere friendship for his neighbors combined with quiet enthusiasm and persistency.

A number of years ago the Whiteside County Farm Bureau shipped a carload of peaches from southern Illinois which were delayed in transit. As a result many were spoiled. Mr. Woessner had ordered 12 bushels for his community. He took them home and he and his wife sorted them giving the good ones to neighbors and keeping the spoiled ones for themselves. Mr. Woessner has the confidence and respect of his neighbors. That's why he is a successful solicitor. Incidentally, he is doing a fine piece of committee work on the corn-hog program.

Recovery Plans

FARM BUREAU AID IS BIG FACTOR IN RECOVERY WORK

With All Farmers In One Organization Much More Could Be Achieved.

(By L. A. WILLIAMS)

Dr. Glenn Frank, President of the University of Wisconsin, in a recent speech in Chicago said: "A National integration of farmers should be a part of President Roosevelt's recovery program." He pointed out possible faults with existing organizations of other groups such as labor but said it is the faults that should be remedied, and the organization movement should be encouraged. He stated that to his knowledge the president had not included in his recovery program such a national integration of farmers, but rather it was his opinion that the president was dealing too much through individuals.

Dr. Frank perhaps is not aware, as we are, that President Roosevelt has, wherever organization would permit, throughout his entire effort for recovery, dealt through organization and organization leaders. At the beginning of his administration he asked organization leaders to get together and form their program, and he said, "That program will be my program."

The wheat reduction program, the corn-hog program, the corn loan program, are all headed up through the Farm Bureaus and county agricultural agents of the country. We believe with Dr. Frank that a national integration of farmers is paramount at this time, and that if all farmers were together in one organization the recovery program would be speeded up most effectively.

Dr. Frank further stated that we must stop playing hide and seek with famine, and turn from a science of want to a science of wealth. Goods cannot be purchased unless consumers have buying power.

Walter Pitkin, author of "Life Begins at Forty," and professor of journalism at Columbia University, speaking before the Chicago Forum, blamed existing conditions on what he called "coolie" labor. In explaining his term "coolie" labor, he said that it meant any man who sold goods or services for less than the cost of production. He said the farmer who sells his produce for less than it costs him to raise it is most certainly in this classification of coolie labor. We like the term and the classification, and feel that the remedy lies in organization and cooperative control of volume.

Wool Growers To Profit By Pool, Reports Miller

Final returns to be made shortly for the Illinois Live Stock Marketing Association to wool growers who participated in the 1933 pool indicate that net prices to farmers will range from 20c to 30c per pound depending upon the kind and quality of wool the growers consigned, Ray E. Miller reports.

From 60 to 75 per cent of the 1933 clip which was sold locally returned growers 18c per pound or less. Some later sales were higher but very few growers held their wool long enough to secure the full advantage of the higher prices.

"Not only will wool marketed cooperatively through the Illinois Live Stock Marketing Association net most growers from 5 cents to 15 cents more than they received by selling locally," said Mr. Miller, but the effect of the pool throughout the state was to stimulate local prices. In other words, the cooperative marketing of wool has a tendency to raise prices both locally and on the national markets, thus the cooperator and non-cooperator are benefited, but in 1933, especially, the cooperator benefited most.

Plans are now being made for 1934 wool marketing program. It is expected that final returns will be made to growers on 1933 clip the latter part of February or the first of March. With constantly rising prices it has been to the advantage of the grower that final sales be delayed. While this means some delay in making returns it also means more money to the growers.

FARMERS SHARE IN INDIANAPOLIS PRODUCER GAINS

Through group action Illinois and Indiana live stock growers who market their stock through the Indianapolis Producers Commission Association have piled up earnings since organization totaling $717,983.78, according to Manager Scott Meiks. Earnings, during 1933 were $77,625.98, which belongs to the members. The Producers sold last year 29.39 per cent of the live stock arriving at the Indianapolis market. Gains were made in all department in the volume of live stock handled. Nearly 91 per cent of receipts came by truck.

The Producers collected more than $1,700 in claims for shippers last year and since organization a total of $50,120.23.

Murray Barker, of Thorntown, Indiana is president of the organization, O. B. Goble of Charleston, Ill., is vice president and Marion R. Finley, Hoopeston, Vermilion county, a member of the board of directors.

Winnebago County Seeks CWA Help On Limestone

The Winnebago County Farm Bureau is making an effort to have CWA workers in that county cooperate in grinding agricultural limestone for farmers to haul and spread on their land in the interest of soil conservation. The project was proposed by Geo. F. Tullock, president of the Farm Bureau, to Chester Davis, administrator of the Agricultural Adjustment Act at the recent I. A. A. convention in Danville.

Mr. Davis promised to present the proposition personally to Harry L. Hopkins, federal relief administrator, immediately on his return to Washington.

The project will be passed upon as one related to the corn-hog adjustment program. The suggestion has been made that all farmers who sign the corn-hog reduction contract be awarded a certain number of tons of crushed limestone for each acre of land taken out of production.

Illinois farmers are watching the outcome of this proposal. If it goes through local limestone deposits will be used and CWA men will operate the crushers.

Jackson County Gets Ready For Membership Gain

Forty-two farmers in this county have received corn loans amounting to $23,180.85 on about 7 per cent of the corn in the county, writes Farm Adviser J. G. McCall of Jackson county. "Plans are being made and conditions are getting right here for a substantial increase in membership. Our county captain, Mr. Ziegler is on the job and we expect to have a favorable report to make a little later."

00 Illinois farmers unanimously voted approval of Corn Loan Program at Peoria on Oct. 27. They met at the call of the Illinois tion. Certain modifications in loan program were suggested which were adopted by the Commodity Credit Corporation and announced a short time later.

Think 1200 Farm Bureau Members Possible In Kane

Plans for putting Kane county over the top were discussed Feb. 6 at a meeting of the county captain and lieutenants in Geneva. In the opinion of Farm Adviser Harry Kelley and other members of the group 1,200 members can be secured in that county with a vigorous solicitation of all non-members. L. A. Williams met with the group to assist in laying plans for the signup.

CORN-HOG SIGNUP IS IN FULL SWING

As we go to press practically every county in Illinois is busily engaged in signing up corn-hog production contracts which will bring up to $40,000,000 in benefit payments during the next 12 to 14 months to Illinois farmers.

One hundred and nine farmers signed corn-hog reduction contracts in the first three days of the sign-up meetings, reports Farm Adviser L. J. Hager of Marshall-Putnam counties. "William Thielbar of Henry was the first signer of a corn-hog contract in the two counties. The owner, Mrs. Ora Sherman of Washburn, was present and signed a contract the same day.

"Forty-eight farmers completed the work in the first day-sign-up in Magnolia township. Seventeen cooperators were added to this list in the first day sign-up in Saratoga township."

Livingston Co. Piles Up Lead

REID R. TOMBAUGH

Tombaugh acted as captain in the Livingston county mobilization campaign where 256 new members were signed and 360 delinquents restored to good standing.

Increased Speed Marks Closing Of Land Bank Loans

In the last two months, the Federal Land Bank of St. Louis has loaned $18,453,700 to the farmers of Arkansas, Illinois, and Missouri, according to Walter L. Rust, president.

"This sum represents 68 per cent of the more than $30,000,000 disbursed since the mortgage refinancing campaign started in May which shows the advanced speed with which loans are now being closed," Mr. Rust said.

During January the Bank closed $401 loans, a record for loans made by the St. Louis institution in a single month. The amount disbursed last month was $9,197,900. Of this sum $6,286,400 went to Illinois farmers in 1662 loans.

During January the Land Bank received 5887 applications for $30,720,800, almost a million dollars more than was requested in December. Of the January applications, 2588 were made by Illinois farmers for $20,507,100.

John Stout Heads Animal Industry Work For State

John P. Stout, former member of the I. A. A. board of directors and active for many years in the Sangamon County Farm Bureau, was recently appointed state superintendent of animal industry. He succeeds Don Robison, of Tazewell county. Mr. Stout will have charge among other thing of the state tuberculosis eradication program.

Only four counties in the state at present are not designated as modified accredited areas which means that in such areas all cattle have been tested at least once and the percentage of reactors is less than one per cent. The four counties still untested are Winnebago, Warren, Hancock and Randolph. Lawsuits are holding up tuberculosis eradication in these counties.

There are 55 assistant state veterinarians and 21 county veterinarians working on tuberculosis eradication.

Farmers' Institute Annual Meeting At Jacksonville

The annual meeting of the Illinois Farmers Institute will be held at Jacksonville Feb. 21, 22, 23. Edward A. O'Neal, president of the American Farm Bureau Federation is one of the headline speakers. Other speakers are C. V. Gregory, Dr. H. H. Bennett of the U. S. D. A., Walter McLaughlin, Judge Camille Kelley of Memphis, J. R. Cosgrove of the Farm Credit Administration and a number of staff members from the Illinois college of Agriculture.

Piatt County Man Named President Of Safety Club

Benj. A. Jones of Piatt county was made president of the Illinois Farm Bureau Safety Club for the year 1934 at the annual meeting of the Illinois Agricultural Mutual Insurance Company, held at Danville on Wednesday, January 24.

Each year the County Farm Bureau winning the September Auto Accident Prevention Campaign has the honor of naming the president of the club for the coming year. Piatt county had the honor this year and was presented with the silver loving cup. Morgan County Farm Bureau was awarded second place.

Every Farm Bureau member having the Safety Club emblem on the windshield of his car is a member of the Illinois Farm Bureau Safety Club. Six rules of the club for safe driving are:

1. Stop on entering a main highway.
2. Do not drive blind, i. e., always drive so you can stop within the distance you can see ahead.
3. Never pass cars on hills, curves, or crossings.
4. When passing cars make certain there is ample time and space to get around.
5. Signal for stops and turns—watch the car ahead.
6. Protect the children.

HENDERSON GETS $160,000 ON CORN

Out in western Illinois the Henderson County Warehouse Supervisory Board reported on Feb. 7 that approximately $160,000 had been received by corn growers on loans in that county.

Henderson is primarily a live stock feeding county. Many farmers in that section did not apply for loans. They needed all their corn for live stock feeding.

WHITESIDE GOES OVER THE TOP

Whiteside County Farm Bureau Board Celebrates Victory in Boosting Membership 25 Per Cent During Two-Day Drive.

Seated left to right: C. A. Gaulrapp; Art. James, vice president; A. L. Goodenough, president; F. H. Shuman, farm adviser; O. C. Beatty, secretary-treasurer; Ralph Johnson, David Hagans.

Standing left to right: Floyd Florence, Frank G. Plautz, Fred Bierman, J. A. Parker, Ernest Cassens, Burton Drury, George Woessner, Tom Cooney, Everett Ege, Art Entwhistle, Frank Norrish, William J. Peterson and Charles Reed.

Ship To Producers Says L. A. Williams To Live Stock Men

Apply the spirit of organization and the advantages of organization to your livestock marketing program, Lawrence A. Williams, manager of Country Life Insurance Company, told more than 225 growers at the annual meetings of the Biggsville and Stronghurst Shipping Associations in Henderson county, Jan. 31.

"You are cooperating in shipping your livestock and you know the advantages you have gained through such action," said Williams, "but cooperative marketing means selling through your own cooperative agency and that means shipping to the Producers Commission Association. The Producer agencies are constantly exerting their influence for higher prices.

"The Chicago Producers is the largest marketing agency at the Union Stock Yards. Scores of smaller commission companies follow the lead of the Producers from day to day in efforts to get the farmer more money for his livestock.

"If you have ideas on improving the service of the Chicago Producers or wonder why the benefits are not greater the way to do is to get in and cooperate and combine your influence with thousands of other shippers toward accomplishing what needs to be done."

Peoria County In Big Membership Gain, Still Going

Harvey McNaughton, Peoria county captain working with local lieutenants, signed up 18 new Farm Bureau members the week of the I. A. A. annual meeting, reports J. W. Whisenand, farm adviser.

"Leonard Strope and Thurman Scott are two high solicitors and have signed 28 each," said Whisenand. "We have added 204 new members since the campaign began in October. This is up to Feb. 6. We expect to improve this record considerably before April 1.

The Illinois Agricultural Association RECORD

Livestock Growers Meet at Bloomington

Earl Smith Cites Requirements To Gain Higher Price Levels For Livestock

THE big problem ahead for livestock growers generally is to adjust production so as to feed a supply of livestock into a demand that can pay a fair price. And to make sure that farmers secure a maximum percentage of the consumers' livestock dollar requires the concentration of the sale of that livestock through co-operative channels, Earl C. Smith, president of the Illinois Agricultural Association, told more than 300 co-operative leaders at the annual meeting of the Illinois Livestock Marketing Association in Bloomington Feb 23.

MR. SORRELLS

The concentration of 85 per cent of livestock sales through your own cooperative marketing agencies whether moved direct from the cooperative concentration points in the country or through the co-operative commission agencies on the terminal markets, is a good mark to shoot at, Mr. Smith said. He challenged the growers to launch a mass movement in the coming year toward boosting the percentage of livestock marketed co-operatively from the present 20 per cent in Illinois to at least 50 per cent in 1934. Turning to P. O. Wilson, secretary of the National Livestock Marketing Association, he suggested that the national organization get actively behind a similar movement in the other livestock growing states.

Mr. Smith expressed the belief that organized selling of livestock from co-operative concentration points in the country direct to packers had a place in the marketing picture and would grow, but he strongly condemned what he termed direct buying of livestock by packers since this practice allows the packer to beat down the price at the terminal markets on which all quotations in the country are based. He stated that managers of district co-ops. should see to it that producers get the benefit of savings in direct movement of livestock and not the buyers. He predicted that Illinois will be in the lead in the corn-hog signup before the end of the sign-up period.

Doubled Profits

Secretary P. O. Wilson reported that member agencies of the National Livestock Marketing Ass'n. had more than doubled their profits during the past year which would be reflected in commission refunds and additions to reserves, in spite of the fact that commission rates had been reduced. Movement of livestock through member agencies gained approximately 12,000 cars during the year, about 25% of which was contributed by Illinois growers. He stated that the National had fulfilled all its interest and principal obligations to the federal government when due and predicted that every penny outstanding on loans to the National Livestock Credit Corporation and for other purposes could and would be repaid.

In a brief annual message to members of the Association, President Samuel Sorrells of Raymond pointed out that the eight operating units handled 2,033 decks of livestock in 1932 as compared with 3,167 decks in 1933, an increase of nearly 50 per cent.

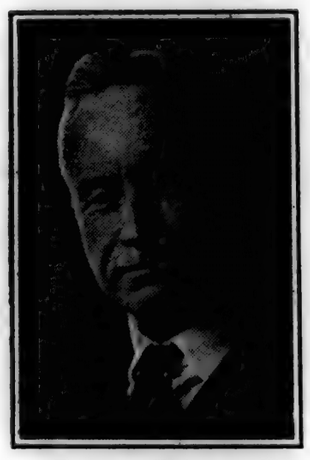
"More important than the mere volume handled," he said, "is the fact that the program and policies of the Association are more thoroughly understood than ever before and its possibilities from the standpoint of becoming a more important unit in the family of livestock co-operatives are greater than ever.

"The Illinois Livestock Marketing Association," Mr. Sorrells continued, "was organized primarily to meet the problem of direct buying of livestock by packers. Its aim is to give farmers who have been deprived of shipping association service an opportunity to sell their livestock through their own agencies to the buyer wherever he may be who will return the highest net price." The Association, he said, is working hand in hand with the co-operative commission agencies in the terminal markets so as to correlate efforts to maintain and increase price levels.

Wool Growers Profit

Ray E. Miller, secretary of the Association, reported that 87 counties in Illinois during the past year co-operated in the field service program with a total of about 1,000 livestock committeemen. Approximately 800 local meetings were held on the night of Nov. 3 when a broadcast from Station WENR Chicago was the principal feature. The effect of the wool marketing program during the fiscal year just closing has been to increase re-

turns to growers at least $50,000, he said.



The widespread interest throughout Illinois and the corn belt in the movement to raise livestock prices was evident in the makeup of the audience. The editor of a daily newspaper at Cedar Rapids, Ia., and Earl Elijah, a leader in the co-operative livestock movement in that state, were present. All of the terminal co-operative commission agencies in and adjoining Illinois were represented by directors or members of the sales staff. Most of the growers present were members of livestock marketing committees in the various counties. Farm advisers from many of the livestock growing counties attended.

Directors elected for the coming year were as follows:—Wm. Temple, LaSalle county; W. E. Sawdey, Winnebago; Harry Gehring, Knox; Carl Lage, McLean; Mont Fox, Vermilion; D. H. Myers, Adams; J. R. Fulkerson, Jersey; Dan Smith, Shelby; Samuel Sorrells, Montgomery; Geo. F. Tullock, Winnegabo, the latter two being the I. A. A. representatives on the board. H. H. Parke of DeKalb county was chosen to represent the Chicago Producers Commission Association; O. B. Goble, Coles county, the Indianapolis Producers; Sam McCluggage, Peoria county, the Peoria Producers; and Arthur Krum, the E. St. Louis Producers. Officers will be selected at the next meeting of the directors.

1934 I. A. A. Advisory Committees Are Named

The new advisory committees as announced at the February meeting of the I. A. A. board of directors by President Smith are as follows:

Finance Committee—A. R. Wright, W. L. Cope, E. Harris;

C. E. BAMBOROUGH

Business Service—C. E. Bamborough, Charles Marshall, E. E. Houghtby, W. S. Batson, farm adviser;

Organization-Information — E. D. Lawrence, M. Ray Ihrig, Otto Steffey, E. C. Secor, farm adviser;

Public Relations—Charles S. Black, R. B. Endicott, Albert Hayes, W. A. Herrington, farm adviser;

Marketing—Samuel Sorrells, A. O. Eckert, Eugene Curtis, Mont Fox, F. H. Shuman, farm adviser.

Mr. C. E. Bamborough, the new chairman of the Business Service Committee, was elected secretary of the Illinois Agricultural Mutual Insurance Company, Country Life Insurance Company, and Illinois Agricultural Holding Company, to succeed Geo. F. Tullock who retired from the board.

H. J. Scranton, the man with the pencil and paper, and Fred Loos to his left have signed up 32 new Farm Bureau members in the Adams County Farm Bureau mobilization campaign.

This snapshot was taken on the E. M. King & Son farm. Mr. King is the man at the extreme right and his son at the extreme left.

Adams county is out to increase its membership 25 per cent by April 1.

400 Cream Producers Hold Lively Session At Champaign, Sell Stock

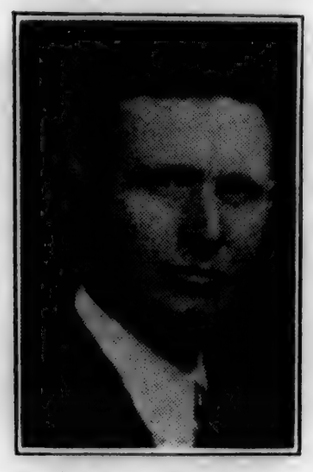
Smoke will soon be curling from the chimneys of several new centralized co-operative creameries in Illinois judging from progress made during recent weeks in organizing Illinois cream producers.

At a rousing meeting at Champaign on February 19 attended by more than 400 producers from 10 counties, each delegation pledged themselves to raise their respective quotas of stock subscriptions before the end of the month. Their goal is to sell 1,250 shares of stock of $25 par value.

Champaign county already had subscribed 567 shares and a total of 635 shares were reported in the day of the meeting. As we go to press reports are coming in which swell this total considerably. Thirty-two meetings were held in the eight adjoining counties on Friday, February 23, where the co-operative creamery program was explained.

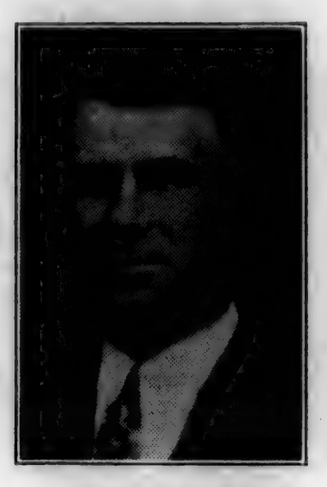
When the Farmers Creamery Company, Bloomington, recently started a truck route around Carlinville and Palmyra in Macoupin county, prices for butterfat offered by local buyers went up three cents and the price of butter dropped two cents per pound, according to Manager Forrest Fairchild.

Substantial progress has been made in organizing a creamery at Olney in Richmond county.



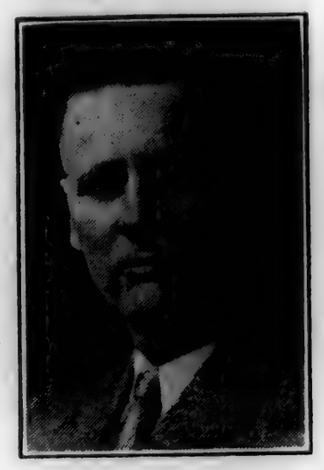
At the Champaign meeting speakers included M. L. Flack of the dairy division, A. A. A., and Frank Gougler, and J. B. Countiss of the I. A. A. staff.

Prairie Farms Butter Scores 93.66 Per Cent

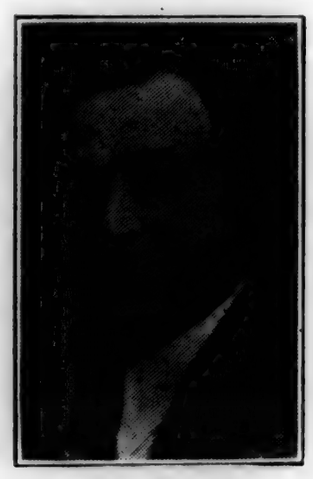


Frank J. Watson, manager of the Farmers Co-operative Dairy Products Company of the Quad Cities, reports that a tub of Prairie Farms butter sent to the Iowa State College recently rated 93.66 score, one of the highest tests out of the large number entered in the contest.

The judging was done by professors in the Dairy Department at the State College.



NEW DIRECTORS ELECTED TO I. A. A. BOARD



E. E. HOUGHTBY
12th

OTTO STEFFEY
14th

ALBERT HAYES
16th

MONT FOX
18th

A. O. ECKERT
22nd

TO acquaint members of the I. A. A. with the five new directors chosen at the recent annual meeting, short biographical sketches are presented herewith:

A. O. Eckert of Belleville, 22nd district, is a former vice-president and director of the I. A. A. He served on the board in 1921-1922 and was vice-president i 1923 when Sam H. Thompson was president.

Mr. Eckert has long been active in farm organization work. He assisted in organizing the St. Clair County Farm Bureau and the Illinois Fruit Growers Exchange, serving seven years as president of his local Farm Bureau. He was also on the board of the Federated Fruit Growers of America, established more than a decade ago, as a nation-wide marketing agency.

Mr. Eckert operates a 340 acre farm, 125 acres of which are planted to producing apple, peach, and cherry trees. He also is an extensive feeder of live stock, marketing around 500 sheep, 300 hogs, and 200 cattle annually. A large part of the produce from the farm is marketed direct to consumers through his local roadside market and through the Belleville Fruit and Produce Market of which he is president.

Customers are brought direct to the Eckert farm through consistent advertising in the daily newspapers of St. Louis. He spends approximately $1,000 annually on advertising alone.

Two of Mr. Eckert's boys, Curt and Cornell, took the agricultural course at the University of Illinois and are on the farm now assisting their Dad as partners in the business. The third son, Vernon, is a junior at Urbana and he too will be offered a partnership on graduation.

Last year 300 hogs were butchered on the farm and sold to consumers mostly in the form of hams, bacon and sausage. Fifteen to twenty acres of potatoes are produced annually, and what fruits and vegetables are not sold through the roadside market are trucked to neighboring towns for sale. One of the boys is in direct charge of the orchard, the other manages the livestock operations, while their father supervises all.

Mr. Eckert served for two and one-half years as president of the Illinois State Horticultural Society. He was given the Master Farmer gold medal by Prairie Farmer about ten years ago and was president for several years of the Master Farmer Club of America. He is a member of the Grange and director of the Belleville Chamber of Commerce.

ALBERT HAYES of Peoria county, new director from the 16th district, is well known throughout central Illinois. He has been prominently identified in farm organization work for many years. Active in the Peoria County Farm Bureau from the beginning, he was elected director of Medina township in 1920, served successfully on the executive committee and as secretary until 1929 when he was elected president. He assisted in organizing and served as the first president of the Peoria County Service Company.

Mr. Hayes owns and operates a 194 acre farm north of Mossville. He is director in the First National Bank of Chillicothe, also the Peoples Building and Loan Association of the same town, has been supervisor of his township for the past six years, director of the Peoria County Federal Land Bank Association, chairman of the Peoria County Farm Debt Adjustment Committee, and vice-president of the Pekin Production Credit Association. In addition to operating his own farm he is supervising two farms for a non-resident owner. He was awarded a gold Master Farmer medal by Prairie Farmer several years ago.

Mr. and Mrs. Hayes have three boys, two of high school age and one in the grades.

MONT FOX, new director from the 18th district, is an extensive livestock feeder. He has lived in Vermilion county all his life. A member of the Farm Bureau for the past 15 years, Mr. Fox has served on the board of directors since 1928.

He retired from general farming in 1918 and began feeding cattle, lambs and hogs exclusively, buying most of the feed. In 1924 he discontinued cattle feeding and began feeding western lambs. His farm is all in grass. During the season he usually finishes 5,000 western lambs and around 500 hogs.

He has been president of the Vermilion County Live Stock Marketing Association since its organization four years ago. He represents his district on the board of the Illinois Livestock Marketing Association, and also has served on the board of the Vermilion Service Company since it was formed two years ago. He is a director in the State Bank of Oakwood.

E. E. HOUGHTBY of Shabbona, president of the DeKalb County Farm Bureau, is the new director from the 12th district.

After graduating from the Illinois State Teachers' College in 1913 Mr. Houghtby taught school for five years acting as superintendent of the high schools at Ohio and Neponset. For two years he taught mathematics at the Rock Island high school. In 1919 he began farming near Shabbona.

He operates 237 acres, has a herd of 30 pure bred Brown Swiss cattle, also raises purebred Chester White hogs and White Rock chickens.

Mr. Houghtby was awarded a Master Farmer medal by Prairie Farmer in 1931. He has been a leader in community and civic work. He is secretary of the board of the Shabbona community high school and was recently chosen director from the eighth district on the board of the Pure Milk Association. Mr. and Mrs. Houghtby have one child, Joan Elizabeth, five years old. (Continued next page)

OTTO STEFFEY of Stronghurst, Henderson county, the new director from the 15th district, operates a 220 acre grain and livestock farm. He has been a leader for many years in the Henderson County Farm Bureau and all of the cooperative enterprises of the organization. Mr. Steffey served as captain in the recent Henderson county mobilization campaign and it was largely his efforts combined with the work of Bill Stevenson, general agent, that put Henderson county to the front in percentage of membership gain.

Mr. Steffey has been on the board of directors of the Farm Bureau for several years, is a director in the Tri-County Oil Company, also in the Stronghurst Shipping Association, and recently was chosen a member of the board of the Monmouth Production Credit Association. He is now serving as chairman of the county corn-hog control association.

Mr. Steffey is 35 years old and has a wife and one child, a girl.

Farm Income Better But Some Prices Lag Behind

Gross farm income in 1933 is estimated at $6,383,000,000 which includes $289,000,000 in benefit payments from the A. A. A. This is more than 24 per cent in excess of the gross income for 1932 estimated at $5,143,000,000.

Grain shows the largest increase in returns from 1932 to 1933 at 86 per cent. The figure for tobacco was 62 per cent, cotton 56 per cent, hogs 10 per cent, cattle and calves one per cent, poultry and eggs minus four per cent, dairy products minus one per cent, fruits and nuts 18 per cent, and vegetables 32 per cent.

Want Tariff Barriers Leveled To Sell Autos

American automobile manufacturers could sell more cars abroad if the United States and foreign countries would level tariff barriers, according to the National Automobile Chamber of Commerce.

Last year about 240,000 American cars were sold abroad; in 1929 nearly a million. The 59 cent dollar, exporters declare, has reduced the price of an American car as much as one-half. In Spain, for example, an auto which cost 2,000 pesos last year would cost 1,000 pesos this year.

Election Day Is Comin'

When election day is coming and it's drawin very near
And candidates upon all corners round about us now appear
When depression hard has hit us and we're tryin to get out
When men who've been in office have never yet put it to rout.
Oh! Then it's time we fellers who've been feeling mighty blue
Get to lookin up their records just to see what they will do
Get to listenin to their speeches they're wantin us to hear
For election day is comin and it's drawin very near.

Their talk sounds kinder pleasant as they talk to me and you
But the worth of every feller is the good that he can do
And a listenin to their speeches which they broadcast on the air
They are just empty promises unless they have a record fair.
So we'd better look up their records for time's goin very fast
The proof of every candidate is the record of his past
And prosperity of the future depends on how we their records note
For election day is comin and we must get out and vote.

When farmers by low prices for years have been oppressed
Been in deepest of depression till it's spread to all the rest.
Oh! Then it's time we fellers who are tillers of the soil
Get het up to the boiling point till we will over-boil.
It's time that we assert our rights, declare for liberty
Go to the polls, the ballots use, and vote for equality.
Oh! Then they'll surely listen; of the farmer they'll take note
For election day is comin when we'll all get out and vote.

Geo. N. Peek Hammers Away On Plans Toward Increasing Farm Exports

George N. Peek of Moline, Ill., who has been working with President Roosevelt recently in efforts to develop foreign outlets for agricultural products, reports state, has been offered the job of directing the Export-Import Bank of Washington recently created to finance foreign trade.

Mr. Peek in a recent report to the President proposed a co-ordination of all federal foreign trade agencies under a government export corporation with authority to negotiate directly with foreign countries.

Mr. Peek believes the solution of the farm surplus problem lies in the development of foreign outlets for American farm products. He resigned his job as administrator of the AAA to devote his full energy to this program.

He points out that only about five per cent of total national income from industrial products in the period from 1910 to 1932 came from industrial exports, whereas during this period 18 per cent of the American farmers' income came from exports.

He believes that every effort should be made toward working out reciprocal trade agreements with foreign countries, that international trade should be restored, and that adjustment of production to domestic demand, if carried to its logical conclusion, will be disastrous to agriculture and to industrial activities now dependent for existence upon agricultural production.

The annual meeting of the Chicago Producers Commission Ass'n. will be held March 13 in the Bal Tabarin room of the Sherman Hotel, Chicago. Earl C. Smith, president of the I. A. A., will speak.

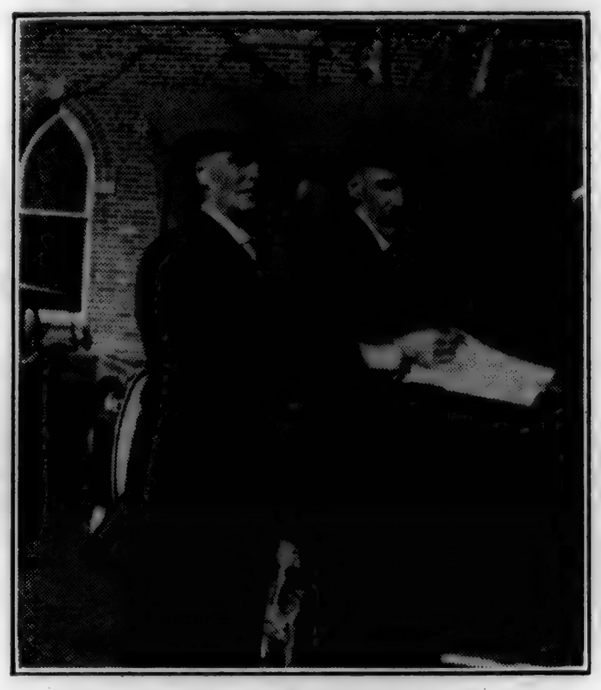
Yes, election day is comin and the time it isn't long
When we must use the ballot against those in the wrong.
Farmers have long been treated wrong and not had equal rights
Ballots are better'n bullets to help them win their fights.
Those who've been in office brought no help within our range
Perhaps upo election day we'd better make a change,
But if we are indifferent and don't get out and vote
Then they'll just leave us drift along and forever be the goat.

—Leverett Compton, Shelby Co., Ill., written Oct. 1932.

Human Factor of Great Importance In Sales Records of I. A. A. Companies

When All Work Together The Greatest Good Is Accomplished

Out of the cold maze of figures that indicate the business accomplishment of Country Life Insurance Company, come the warm human factors that made those remarkable figures possible. It is encouraging to note that the company increased its insurance in force $7,000,000—but what of the human endeavor and loyalty that produced that increase?



Assets increased 35 per cent—but it took human minds and hearts working together to do it. Back of every accomplishment which can be summed up on a ledger sheet lies devotion to a cause, enthusiasm and the co-operative effort of many people.

During 1933, 10 counties exceeded their quota. That Effingham county made 150 per cent of their quota does not begin to tell of the efforts put forth to attain it. Henry county made 127 per cent of theirs; Boone county 123 per cent; Woodford county 120 per cent; Henderson county 117 per cent; Douglas county 107 per cent; Whiteside county 105 per cent; Edwards county 104 per cent; La Salle county 101 per cent; Stephenson county 100 per cent. Many other counties made 100 per cent of their quota.

None of the men in any of those counties want anything greater than to know they did a fine job. Yet, it is plain that neither geography, wealth, nor temper of the "quota busting" counties had any bearing on their record. By and large, it amounts to just this—close co-operation between all elements of the Farm Bureau smooths out the road to permanent success.

Where there is success, there you will find the Country Life agent sending customers to the Service Company. Jim Brown, the service company truck salesman, tells the auto insurance agent about two new automobiles, and the auto insurance agent finds out the owners need life insurance too. The Farm Bureau needs man-power to put over a membership drive, and Country Life Illinois Agricultural Mutual and Service Company men take the field to work shoulder to shoulder with their team mates for a common cause.

We live in a world where co-operation is the first rule of success. There are those, who satisfied with puny short-lived success, confine their efforts to themselves. On the other hand, there are those who make a permanent, shining mark in the world, by unselfishly keeping their heads up and their eyes on the broad picture, knowing that the greatest success is that which shares the material benefits of building something useful for the greatest number of people.

Captain R. C. McKinley of Shelby county, left, is shown signing his neighbor in the Farm Bureau.

Auditing Association Cuts Costs In 1933

The Illinois Agricultural Auditing Association completed 59 audits during the month of January. There are 315 agricultural organizations using the Auditing Association's services.

In 1933 average costs of audits of Farm Bureaus decreased as compared to 1932 costs in the following amounts: Farm Bureaus $2.31; farmers' elevators $12.34; co-operative oil companies $8.80.

The Association has operated for nine and one-half years during which time it has made more than 2,700 audits, reports Manager F. E. Ringham.

Want Further Cut In 1934 Wheat Production

The A. A. A. is considering giving wheat growers who have not signed the wheat adjustment contract another opportunity to sign. The December 1 winter wheat crop report showed that seedings for the country as a whole are 7.2 per cent under the base period, and in the 11 leading states which seeded 82 per cent of the acreage, the reduction was nine per cent.

The international wheat agreement requires that exporting nations reduce their seeded acreage by 15 per cent.

Secretary Wallace Sees Planned Middle Course As One U. S. Will Follow

In a recent article written for the Foreign Policy Association Secretary of Agriculture Henry A. Wallace stated that if the U. S. insists on a policy of economic nationalism, the nation must be prepared for "fundamental planning and regimentation of agriculture and industry far beyond that which any one has yet suggested."

He foresaw "compulsory control of marketing, licensing of plowed land, quotas for every farmer," and for the people as a whole "a unanimity of opinion and disciplined action even greater than that which we experienced during the world war."

He stated that a policy of self-containment would require the permanent retirement of from 40 to 100 million acres of crop land from cultivation and the shifting of millions of people from the farms of the South, since cotton is one of our chief farm exports.

The Secretary said he favored an international policy based on regaining world trade which would require a radical scaling down of tariff walls, acceptance of a billion dollars more goods from abroad than we received in 1929, and the reorganization of protected industries. A third possibility, he pointed out, is a "planned middle course" halfway between these two extremes.

He expressed the belief that the nation would follow the middle course while the world remains so intensely nationalistic.

One Man Alone

Editor, I. A. A. RECORD.

"The back page of the February RECORD was a dandy—I think about the best I have seen in a long time. . . . This picture, title and your comments are striking and unusual."

Gene Middleton,
Producers Commission
Ass'n., Indianapolis.

People who criticise the co-operative insurance, organized buying of farm supplies, and similar commercial enterprises of the Farm Bureau are not interested in the welfare of the farmer. They have something else in mind. And that something is probably selfish.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

GEORGE THIEM, *Editor*
JOHN TRACY, *Ass't Editor.*

Up to the Producer

SPEAKING on the corn-hog reduction and corn loan programs in a recent radio address over the NBC chain, President Earl Smith said: "Farm organizations have now discharged their responsibility of leadership to secure a (price-raising) program. Administrative officials in Washington have outlined and presented to the farmers the program. Corn and hog producing farmers, and no one else, will furnish the final answer as to the future price levels of corn and hogs. . . . .

"It has taken years of effort by organized farmers to secure the necessary laws to make possible a solution of the problem. . . . . Through state, county, and local committees, farmers have practical control of the adminstration of this program. The goal is parity prices. To the extent farmers respond in a genuine spirit of understanding and co-operation by universally and effectively curtailing their production of corn and hogs, thus removing surpluses at their source, reasonable and fair price levels for these important products of the farm will be restored and maintained."

A Lesson Learned

IF THE last few years of hardship have taught us anything, they have driven home the necessity for group action in getting out of our difficulties. That this lesson has been taken to heart by many is revealed in the reports of steadily increasing Farm Bureau membership in nearly all if not all counties in Illinois.

Bureau County Farm Bureau on Feb. 24 reported that it had increased its membership 27 per cent since Jan. 1, 1934, the third county to be added to the Honor Roll for making a gain of 25 per cent or more since the first of the year. The value of the Farm Bureau has been brought home forcibly to thousands of non-members during the past six months as never before. They realize that without organization and collective effort many of the benefits they are now receiving never would have been possible.

The Intelligent Way

AN old-line creamery in Illinois recently made the statement that it was paying more for butterfat than the co-operative creamery at Bloomington. A check-up showed that the price paid by the private creamery was based on cream delivered to its plant, whereas the price paid by the co-operative was at the farm. Moreover the privately operated creamery in question has been severely criticised by farmers in the past for short-changing patrons on weights and tests.

Cream producers who sell through their own co-operative should keep in mind that the initial price they get is only part of their return. They still own an interest in the profits and investment of the cooperative in plant and equipment. They also are in line for patronage dividends.

Reports are coming in that privately operated creameries are pushing up prices for butterfat in territory where co-operatives are active. There is nothing new in this situation. Farmers are accustomed to it. The point is that the co-operative is responsible for the old-line company offering a higher price. We don't believe many Illinois cream producers will be misled into supporting any effort to destroy their own co-operative enterprises through such tactics.

Illinois farmers are not losing sight of the fact that the co-operative creamery at Columbus, Indiana, from 1924 to 1932 not only refunded its patrons a total of $345,956.34 after meeting competition on butterfat purchased, but also invested substantial sums in plant and equipment. The total refunds for the two co-operative plants at Crawfordsville and Columbus, plus sums invested in plant, was equivalent to more than four cents per pound butterfat. The argument in favor of well managed, economically operated co-operative creameries is unanswerable. It's the intelligent way for Illinois farmers to sell their cream.

A Challenge

THE recent revelations by the federal trade commission of high salaries paid by great corporations in the boom years, and in some instances straight through the depression, are of interest to farmers. Eight executives of one farm machinery company, for example, were paid salaries ranging from $120,000 up to $412,860 each in the year 1929. These companies are highly organized and set their own prices on their commodities. Farmers pay the bill. Here is a great challenge to agriculture to organize that it may secure a fair share of the national income which farmers earn but don't get.

Menard County Pledges 25% Member Increase Here's What They Say

Menard county is out to increase its membership at least 25 per cent according to President John H. Behrens of the Menard County Farm Bureau. "Agriculture has built a strong organization that is getting results," said Mr. Behrens. "However, all farmers should belong to the Farm Bureau and do their part and we are going to see that Menard meets President Earl Smith's proposal and increases its membership 25% in 1934."

E. J. Rosendahl, county captain in Menard, is on the job pledged to achieve this goal. Speaking of organized effort, Ira Smith, member of the Menard Farm Bureau, puts it this way: "If we fail to build a full strength organization and cooperate in the recovery program, my boy and your boy will say, 'Dad, where were you when the President of the United States and the President of your own organization urged you to do your part'? You can't afford to turn your boy down."

Iroquois County Goal Is 500 New Members

With a goal of 500 new members by April 1, more than 115 lieutenants met with their captain and Farm Bureau officials at Watseka in Iroquois county Feb. 12 at a pep meeting attended by Messrs. Geo. E. Metzger, O. D. Brissenden, and A. B. Culp of the organization staff. More than 100 members were reported signed on Feb. 16 and as this is written additional reports indicate the signup to be well up toward the 200 mark.

A report received on Feb. 21 is as follows:

"G. C. Butzow, Ora Baer, Ernest Sass, Perry Parrish, W. H. Hodge, James Greenburg, Bert Hixon, and Wendell Adsit in Prairie Green and Lovejoy townships in Iroquois county in four days signed 48 new members. Not satisfied until they have 60 new ones on the Honor Roll.

"Jesse Keen, Louis Freeman, Curtis Slife, J. P. O'Brien, Orville Fischer of Stockland Township signed 16 new men and still going strong."

80 Per Cent Signup Goal In Henderson

"If we don't sign two out of every three farmers in Illinois this year," says W. A. Stevenson of Henderson county, "it will be just because we've laid down on the job." Since June 1 Mr. Stevenson assisted in signing from 140 to 150 new members in his own county.

Henderson county has established as its goal 80 per cent of all the farmers in the county in the Farm Bureau. "We expect to double our membership from October 1, 1933 to April 1, 1934," said Stevenson, and "we challenge other counties to do likewise. The time is ripe to sign members. I know we can do it if we get out and work."

Join the Farm Bureau

REPORTS from many counties in Illinois indicate a growing interest in the farm bureau and a gratifying increase in membership. Farmers are coming to realize much more than ever before how helpless they are when disorganized; how much they can do when they work together. When farm folks quarrel among themselves or work at cross purposes, that brings a smile to the faces of the exploiters who have profited so greatly at farmers' expense.

Illinois farmers are fortunate in having in the Illinois Agricultural Association, backed as it is by strong county farm bureaus, the strongest state farm organization in the United States. Under the leadership of President Earl Smith and his co-workers, the I. A. A. is responsible in a very large degree for the present farm program and the improvement in farm income which has resulted.

The work of the Illinois Agricultural Association has been made possible because of the thousands of loyal members who have continued to pay their dues during a period when doing so was a real sacrifice. Most of the work done by the association helps all the farmers of the state. It is not fair for the present members to carry all the load. With times getting better and farm income increasing, thousands of other farmers who for one reason or another are not now members, ought to join and use a small fraction of the new money, which is available to a large extent because of the association's efforts, to pay their dues.

If we will all do that we can make Illinois' principal farm organization twice as strong and twice as able to fight the battles of Illinois farmers in the future.—Prairie Farmer, Feb. 17, '34.

Corn Loan News

Additional reports from counties on corn loans received since going to press with the special newspaper edition of the February RECORD are as follows:

Ford county—Farm adviser W. F. Purnell reports that 970,000 bushels have been sealed for 670 farmers. Average amount sealed is about 1,450 bushels per farm.

Stark county—More than 500,000 bushels of corn were sealed on Feb. 20, which is around 40 per cent of corn yet remaining on farms. "We have well over 700 contracts in the corn-hog program signed in the eight townships of the county and we expect to have close to 90 per cent of the farmers in Stark county in this program before the finish," writes Wayne Gilbert, farm adviser.

"We are planning a membership drive for the middle of March. It is under the control of a committee consisting of Walter Gingrich, vice-president; Albert Lloyd Hewitt, county mobilization captain; and Harvey Price, at present chairman of the county livestock marketing committee."

Fulton county — 158,000 bushels of corn sealed, $71,100 loaned, reports John E. Watt, farm adviser.

Bureau county—1,600,000 bushels of corn sealed, $720,000 loaned. Approximately 50 per cent of the corn on farms sealed for loans. Bureau county is planning to increase its Farm Bureau membership at least 25 per cent by April 1—114 new members signed since Oct. 14.

DeWitt county—Farm Adviser H. H. Myers reports 384 corn loans for approximately $270,000.

Saline county—Seven loans made on cribbed corn for a total of $3,997.35.

Peoria county—Up to February 8, 147 farmers in Peoria county had had their corn sealed for a total of $78,201, reports J. W. Whisenand. More applications are rolling in.

Outstanding gains again mark the close of 1933 for this great Company. Strength unsurpassed is shown as a result of the unique cooperative effort of the sincere people who make up this legal reserve Company. Policyholders can boast of a Company that gains in strength and in insurance in force all through depression. Our goal is always lower net cost protection and conservation of policyholders' interests.

John Watson Appears Before General Assembly

States I. A. A. Policies on Pending Legislation, Opposes New Bond Issue

In the third special session of the General Assembly which convened on February 13, the Association is supporting legislation—

1. To stay foreclosure proceedings on mortgaged real estate in case of mortgagors who have sincerely tried and continue trying to meet their obligations.

2. To permit filing of chattel mortgages, at moderate cost, instead of requiring that they be copied in full in record books, necessarily at much higher cost.

The Association favors legislation to enable the state to pay the accumulated balance, now reported to be about $12,000,000, of the state distributive school fund now due the elementary schools and unpaid because of delinquent taxes, chiefly in Cook county. It believes the state occupation taxes and liquor taxes will produce a surplus over taxes necessary for the state sufficient to pay the total accumulated unpaid distributive school fund within about the next year.

The State Teachers' Association has offered bills authorizing an increase of $16,000,000 in the state tax levy, permitting sale of anticipation tax notes to the amount of $12,000,000, and submitting a bond issue of this amount to be voted on next November, to be paid, if the bonds are approved by diversion, from the state revenue fund, of the franchise taxes on corporations. The Association opposes submission of another bond issue, with its increased state tax levy and the danger that the tax levy will fall on property.

The State Teachers' Association is also sponsoring a series of bills to provide revenue from new sources as follows:

1. A tax of one-eighth of one cent per bushel on all sales of grain for future delivery.

2. A flat tax of two per cent on all net income of individuals with a personal exemption of $1,200.

3. A tax of three per cent on all net income of corporations, in addition to all present franchise and property taxes.

In addition, the State Teachers' Association is urging two bills to repeal the provisions limiting the levy of any school board to the average of its levies in the four school years ending June 30, 1932.

The Association is opposing the grain futures tax on the ground that part at least of such a tax would be reflected back on producers. With many others, it questions the constitutionality of the income tax on individuals.

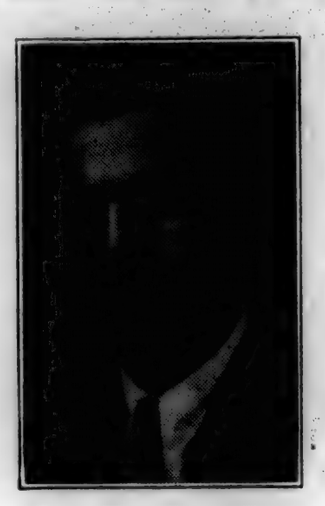
New taxes from the above sources, if enacted and found valid, would yield at least $40,000,000 a year even under present conditions.

Under the provisions of the teachers' bills all or any part of new revenue collected could be used in addition to taxes now levied on property.

Mr. Watson, appearing before the House, stressed the well-known policy of the Illinois Agricultural Association that the revenue from any new taxes should be used to reduce and replace dollar for dollar taxes now levied on property. He insisted that removal of the limitation on the power of school boards to increase levies would largely nullify replacement of property taxes.

Morgan Co. Stockmen Gain By Group Action

Farmers of Morgan County increased their shipments of livestock to their own commission agency by 58% during the first nine months of 1933. A total of 407 cars were sent to the St. Louis Producers, an increase of 151 cars over the same period in 1932. This increase in volume put Morgan County in first rank among the counties tributary to the E. St. Louis market which send stock mainly by truck.



This increase has been largely due to the educational work of the Morgan County Shipping Service organized in February, 1933. This Shipping Service, operating in Morgan and adjacent counties, has been instrumental in redirecting the flow of livestock to the producers own terminal commission firm. The breakdown of the old shipping associations, operating mostly by rail, made it necessary to find some new method of grouping shipments.

Under an arrangement with the Producers Livestock Commission Association a saving in commission charges is effected whenever sufficient volume is secured. The savings begin when more than the equivalent of a single deck load is consigned through the Shipping Service in one day, and the savings increase with the increase in numbers. During the first 20 business days of 1934, the average number of hogs handled was 197, and the consigners received the benefit of reduced commission rates on 17 of these 20 days. During the first 12 months of operation the Service has handled 25,795 hogs, 1,580 cattle and calves, and 868 sheep. There is no red tape to annoy the shipper. He deals directly with his own truckman and his stock is handled and sold exactly as any individual shipment. Account sales and returns are sent to the Manager of the Morgan County Shipping Service at Jacksonville, where each day the sales are pro-rated and checks mailed to shippers.

H. A. de Werff, New Farm Advisers' Prexy

Has Been In Service More Than 14 Years In Franklin And Woodford

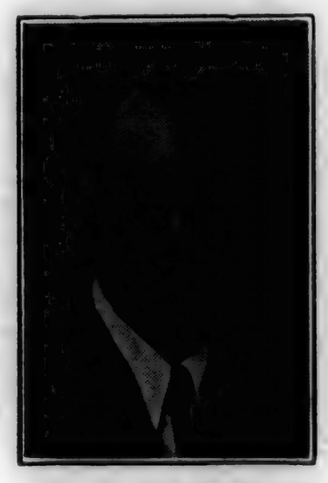
H. A. de Werff, new popular president of the Illinois Association of Farm Advisers, has been adviser in Woodford county for the past nine years. Previously he served for five and one-half years in the same capacity in Franklin county.

H. A. DE WERFF

After graduating from the University of Illinois in 1913, Mr. de Werff was on the soil physics staff of the Illinois College of Agriculture for six years. He worked on the soil survey in Woodford and other counties throughout Illinois.

During the war he served as a first lieutenant in the machine gun corps and while in France taught agriculture in the A. E. F. University. Mr. de Werff will attend the monthly meetings of the I. A. A. board of directors as a representative of the farm advisers association.

Other officers of the association are: vice-president, E. D. Walker, Henderson county; secretary. E. A. Bierbaum, Union county; treasurer, S. G. Turner, Livingston county; directors, H. D. Van Matre, Edgar county, and W. F. Coolidge, Macoupin county. The term of M. P. Roske, Carroll county, third director, holds over for another year.



I. A. A. Secures $50 Settlement For Member

A settlement of $50 from the C. & E. I. railroad for livestock killed along the latter's right-of-way was obtained by the I. A. A. Transportation Department for Charles Roderick of Bismarck, Vermilion county. The claim was referred to the I. A. A. by the Vermilion County Farm Bureau.

Illinois Grain Holds Enthusiastic Session

12 Billion Income For Agriculture Our Goal
Pres. Ed O'Neal Tells Meeting at Peoria

THE farmers of the United States are learning as never before the value of co-operative action in solving their problems, Edward A. O'Neal, president of the American Farm Bureau Federation, said in addressing approximately 400 grain producers, elevator managers, and officials at the annual meeting of the Illinois Grain Corporation in the Jefferson Hotel, Peoria, Feb. 22. "Take advantage of the new opportunity," said the national farm leader. "Accept the challenge to build your co-operative marketing institutions stronger. Take the advice of your President, Franklin D. Roosevelt, when he said, 'the farmer must learn to be master of his own house.' Control the supply of your product as well as the marketing of it—not let the other fellow do it for you."

G. C. JOHNSTONE

American agriculture is on the way up, continued Mr. O'Neal, but there's plenty of work ahead. The national farm income last year was about $6,000,000,000, a better showing by 24% than the year before. Our job is to put another six billions onto that income to make it 12 billions. The same must be done for labor. The income of the farmer goes up and down with the income of the working man.

Outlining the proposed amendments to the Agricultural Adjustment Act, the speaker said that the AAA should not be considered as an emergency measure alone. "We are going to keep on fighting until we secure equality under the American tariff. To that end we propose to amend the title of the Act to make possible the continuance of present efforts toward restoring the income of American farmers until the job is done."

Proposed Amendments

Among the amendments that have received favorable consideration are: (1) authorizing the Secretary of Agriculture to determine basic periods with respect to parity prices for different farm commodities; (2) giving the Secretary the necessary power to reduce the cost of distributing farm products; (3) limiting the Secretary in the licensing of agricultural producers to those who process or distribute direct to the consumer; (4) no compulsory quotas or allotments to farmers unless two-thirds of the producers of a commodity agree on an acreage or crop reduction program; (5) recommending that the Secretary of Agriculture use co-operative marketing associations in administering the Agricultural Adjustment Act insofar as possible; (6) take marginal lands out of production through government purchase and adding such lands to the public domain.

Cotton Income Doubled

Mr. O'Neal told how cotton and tobacco farmers of the South had had their income more than doubled by the AAA crop adjustment and marketing agreement program. "When those cotton farmers plowed up 10 million acres of cotton, don't forget that they helped you corn belt farmers," he said. "The cottonseed oil that was destroyed was enough to displace all the lard produced in Illinois, Iowa, and Nebraska. And when the price of cotton went from 5c to 13c per pound, the South had more money to buy your pork, dairy products, fruit, beef, etc. A friend of mine down in North Carolina," he continued, "told me that the government better do something about getting all farmers to co-operate in this adjustment program or there will be more night riding and tracking down of tobacco and even barn-burning between sundown and sunup than the tobacco sections have even seen." (applause)

The farm organizations had to fight to keep the administration of industries utilizing farm products within the AAA, O'Neal said, and to show why this was important to farmers he told how 95 per cent of the liquor distillers had been brought under an agreement to make liquor out of grain exclusively and pay the parity price for it, which in the case of corn means around 75 cents per bushel.

Blow a Hole

Speaking of the tariff, he said, "we've got to blow a hole in the tariff wall, send our surplus farm products through it to foreign countries, and take some of the products of foreign industry back. It's time for us to do some horse trading. Our foreign diplomacy hasn't helped the American farmer. Through powerful organization we can and will get some action that will help us."

In his annual report President G. C. Johnstone of the Grain Corporation

1934 BOARD OF DIRECTORS ILLINOIS GRAIN CORP.

Front row left to right: Eugene Curtis, Fred Romine, G. C. Johnstone, Walter Thomas, W. H Watson.
Center row: H. K. Johnston. Harrison Fahrnkopf, manager, E. E. Stevenson, Geo L. Potter, E. D. Lawrence, B. L. Baird, Charles Schmitt.
Top row left to right: H P. Joy, Ralph Allen, Fred Zimmerman, A. R. Wright and F. D. Barton, field man.

stated that the organization had increased its membership 38 per cent although as a result of slow movement of grain, erratic price swings, uncertain hedging conditions, and short crops, the volume handled in Illinois had declined slightly from the 15 million bushels plus handled last year.

"The Corporation has been able to add some $33,000 to surplus during the past year," Mr. Johnstone said, "and yesterday the board of directors declared a preferred stock dividend of 7% and also set aside $24,200 for common stockholders on a patronage basis of one-fifth cent per bu. on corn and other grains except oats, and one-tenth cent per bu. on oats. Improvement of grain prices over a year ago is pronounced although not as much as we would like to see. Corn and oats are selling about three times and wheat about twice the price of last year at this time."

Aid Corn Loan

President Johnstone pointed out that the Illinois Grain Corporation assisted in getting the corn loan program into operation. In the Livestock Marketing Association meeting at Bloomington held the following day President Earl Smith of the I. A. A. gave credit to Illinois Grain Corp. for first suggesting and assisting in working out the corn loan program.

Farmers National Grain Corporation, Johnstone said, now controls some 4½ million bushels of elevator space which is being used to return the profits in storing and handling grain to producers. The new elevator at Peoria he said will furnish an outlet for off-grade corn as the site adjoins a large distillery which will use large amounts of corn daily.

Another important event of the year, he said, was the admission of Farmers National to membership in the clearing house of the Chicago Board of Trade which will save thousands of dollars in clearing hedging transactions. Needed regulation, he pointed out, promises to be brought about in the grain exchanges through the AAA or new legislation.

Directors Elected

A new cumulative voting system for the election of directors was launched based on volume of grain contributed by member elevators. Directors chosen for the ensuing year include one each from the 12 districts, and three directors at large as follows: Walter Thomas, Lee county; E. E. Stevenson, LaSalle county; Ralph Allen, Tazewell; B. F. Baird, Knox; H. K. Johnston, Iroquois; Geo. L. Potter, Livingston; G. C. Johnstone, McLean; Chas. Schmitt, Logan; Warren Watson, Champaign; Fred Romine, Douglas; H. J. Joy, Morgan; F. Zimmerman, Mason; directors at large, A. R. Wright, Marshall county; Ernest D. Lawrence, McLean; Eugene Curtis, Champaign.

Harrison Fahrnkopf, manager of the corporation, reported the 10 leading counties in grain sold through the I. G. C. as follows: Mason 867 cars, McLean 795, LaSalle 612, Lee 519, Knox 511, Peoria 447, Logan 437, Champaign 404, Marshall-Putnam 340, Tazewell 301.

Resolutions Presented

Chas. P. Cummings, manager of the Farmers National Grain Corporation at Peoria, who won his new appointment as a result of his good work as general manager of the old Mid-West and later Illinois Grain Corp., was given a fine ovation as he spoke briefly before introducing Farmers National Grain Corp. men who are serving the Illinois territory.

Resolutions presented by E. D. Lawrence were adopted paying tribute to two former directors, J. C. Sailor of Iroquois county and Ralph Mills of Vermilion county. Other resolutions were similar to those approved at the annual meeting of the I. A. A. at Danville reported in the February issue of the RECORD.

A. J. Kuhns, treasurer of the Co-operative Bank of St. Louis, gave an interesting talk on the new set-up for making credit available to co-operative associations. The co-operative bank, he said, is not a relief agency, but is an institution formed to make loans to co-ops on a sound basis. He explained how co-operatives can secure credit through the bank which he represents.

St. Louis Producers Show Big Gain From '32 to '33

The Producers Live Stock Commission Association of E. St. Louis handled 20.3 per cent of all stock sold at the National Stock Yards last year. In 1933 it handled 934,841 head compared with 839,416 the year before. This was an increase of 2,950 carloads. Shipments from Illinois show the biggest gain of 1,850 carloads for the year. Seventy-nine per cent of all receipts came by truck.

During 1933 the Producers served 115,000 patrons. One hundred fifty-one loans were made through the Producer Finance Corporation totalling more than $173,000. The average loan was $1,143.

A recent survey made by the association shows that 102 cars carrying a total of 7,029 hogs averaging 69 head per car, ate an average of 4.8 bushels of corn per load and gained a total of 303.1 pounds while in Producer pens. The value of fill at average price of $4 is $12.12 and feed cost $4.08, making a net gain of $8.04.

Public Utility Control Of Milk Distribution

"We do not have the machinery to undertake the public utility method of regulating fluid milk distribution in cities, although ultimately we may be forced to do it," Secretary Henry A. Wallace said in a recent statement before cooperative leaders and legislators in Washington.

At Winnipeg, Canada, after a series of milk wars between organized dairymen and dealers, milk production and distribution was made a public utility and placed under the jurisdiction of the provincial Public Utility Commission.

While regulation is having its ups and downs the situation is reported much better than it was. Producers are getting a larger share of the consumer's dollar and the consumer gets good quality milk at a fair price.

Cartoons O. K.

Editor,
I. A. A. RECORD.

"The February issue of the I. A. A. RECORD was the best that I have ever seen. The cartoons covering the Danville convention were certainly dandies."

Wilkie A. Lee, Mgr.,
Mid-West Dairymen's Company.

County Recorders Are Opposing Fee Bill

Letter to Farm Bureau Presidents Cites Facts About Measure

Opposition chiefly from county recorders resulted in failure of the bill to permit chattel mortgages to be filed at low cost, to receive the necessary two-thirds vote in the House at Springfield on Feb. 21. County recorders are objecting to the measure on the ground that their fees will be reduced.

The following facts should be kept in mind, John C. Watson, director of taxation, stated in a recent letter to County Farm Bureau presidents:

1. Eighty-five counties of the state —all those of less than 60,000 population—combine the offices of circuit clerk and recorder. If the proposed bills are enacted, all such offices will continue to collect the usual fees of the circuit clerk, both for county and for other services.

2. All recorders' offices, whether combined with the office of circuit clerk or not, will continue to collect the usual fees for recording all kinds of real estate deeds, all trust deeds and mortgages securing loans on real estate, and probably most chattel mortgages involving substantial sums.

Bills Amended

3. The Devine bills have been amended to provide a filing fee of 50 cents instead of 25 cents, as originally drawn, and retain the fee of 25 cents for certifying a carbon copy of the chattel mortgage, which will probably usually be requested. The combined filing and certifying fee of 75 cents will be mostly net, as indexing and other costs will be slight, and indexing saves the cost of about ten cents per page for purchasing the usual chattel mortgage record book. Such net fees should exceed the net profits from all short form chattel mortgages for recording which fees usually vary from 75 to 90 cents.

4. Under the new banking regulations, it appears that, much more than in the past, credit will be secured by chattel mortgage, thus increasing the receipts of recorders' offices.

5. The cost of recording the new Federal Production Credit Association chattel mortgages, which are four-page documents, varies from $3.00 up to at least $5.00 in the various counties of the State. Such fees, especially on loans of small sums, are so excessive as to interfere seriously with the use of such credit.

6. About 23 states, such as Colorado, Iowa, Michigan, Minnesota, North and South Dakota, Missouri, and Washington, have long permitted filing of chattel mortgages, usually for a fee of 25 cents. In these states, chattel mortgages are as secure when filed as when recorded.

PLANNING HENDERSON COUNTY'S MEMBERSHIP DRIVE

Left to right: W. A. Stevenson, general agent, Ernest D. Walker, county adviser, Otto Steffey, county captain, and Miss Audrey Marsden, office secretary. Henderson county added 254 new Farm Bureau members during 1933.

New Truck Code of Interest to Farmers

I. A. A. Receives Many Inquiries From Truck Owners Who Haul for Hire

The I. A. A. has received a number of inquiries regarding the new trucking code which went into effect on Feb. 25. This Code covers the operator of any motor vehicle who receives compensation or remuneration direct or indirectly for the transportation of property of others or of his own property for sale or disposal when the principal purpose or effect of such sale or disposal is to obtain revenue by such transportation.

It exempts farmers who transport their own property or produce to primary markets or their own supplies on return. It also exempts farmers who haul property, produce or supplies for neighboring farmers for which they do not receive compensation other than by the exchange of services; and the trucking operations of bonafide farmers' cooperative associations to the following extent:

When bonafide farmers' cooperative associations carrying on trucking operations in their own vehicles at cost are engaged in transporting the property or produce of such associations or of its farmer members to primary markets, or are engaged in the return transportation of supplies purchased by such associations or farmer members thereof, and are not engaged in transporting for hire or serving the general public, then such associations shall be exempt from all provisions of this Code, except:

(a) The provisions of Article IV dealing with industrial relations;

(b) The provisions of Article V dealing with maximum hours of labor, minimum rates of pay and conditions of employment.

What Truckmen Must Do

They must register before March 27 with a registration office provided by the State Code Authority.

After April 11, 1934, must carry on his vehicle the registration insignia when his certificate of registration is issued.

After February 25, 1934, must observe maximum hours of labor, minimum rates of pay and other labor provisions.

Must post a copy of the Code in a place where it may be easily seen and will be accessible to all employees.

Must furnish all information regarding revenues, expenses and other charges, wages, hours of labor, conditions of employment, number of employees, and other matters relating to Code administration.

Must keep himself posted on all interpretations, amendments and other information with regard to the Code provisions, particularly those regarding hours of labor and wages.

Before April 11, 1934, must file a schedule of minima for rates and tar-

(Continued next page, Col. 1)

International Corn King Aided By Farm Bureau

C. W. Holmes, of Aledo, the new International Corn King crowned at the 1933 International Hay and Grain Show, Chicago, is a loyal Farm Bureau member in Mercer county, Illinois.

Mr. Holmes became interested in seed corn selection and improvement early in the history of the Mercer County Farm Bureau. He attended the many Farm Bureau seed corn culling schools at Aledo where Prof. J. C. Hackleman of the Univ. of Illinois and more recently J. L. McKeighan of Knox county conducted seed corn culling and selection work.

Mr. Holmes secured some of his first seed from which he developed the championship 10-ear sample as a result of the corn improvement work featuring Krug corn sponsored by the Woodford County Farm Bureau when M. L. Mosher was farm adviser.

Mercer county also claims title to the Illinois Corn Prince. Frank Brown of Aledo, son of Mr. and Mrs. Boyd Brown, was awarded this title on his 10-ear sample in the junior division of the Illinois Utility Corn Show during Farm and Ho e Week at Urbana. Frank has been a 4-H Club member for the past seven years and is now a senior in high school.

C. W. HOLMES, NEW INTERNATIONAL CORN KING

A Farm Bureau member in Mercer County for many years, Mr. Holmes got his start in Krug type corn from Woodford county where the Farm Bureau, under the leadership of Farm Adviser M. L. Mosher, a number of years ago carried on a most extensive seed corn improvement program. Holmes' 10 ear sample won over rough type corn for the first time in the history of the International Hay and Grain Show in Chicago last December.

New Truck Code

(Continued from page 15)

iffs with the State Code Authority, where rates cover intrastate traffic, or with the Regional Code Authority, where rates cover interstate traffic. He must not operate below these rates until he files the necessary changes or amendments.

After February 25, 1934—may not charge a rate that does not meet the cost of the service to be performed, except where he has secured approval by the Regional Code Authority.

Must keep his records in such shape as to be ready to prove that his schedule of minima for rates and tariffs meets the cost of the services to be performed, "cost" to be determined in accordance with the National Code Authority's formula.

Must arrange to issue a freight bill, a bill of lading, or other written document within 48 hours after beginning of any transportation service and also arrange to keep true copies of these documents in the permanent records of his business.

Any information desired in connection with further details of the Code can be obtained by writing the Transportation Department of the I. A. A.

Alky-Gas Motor Fuel Farm Institute Subject

"The use of alcohol-gasoline blends as a motor fuel seems to be mainly a matter of economics," L. R. Marchant, manager of Illinois Farm Supply Company, told Farmer's Institute delegates who met in Jacksonville, February 23. "Its use does not bring any special mechanical or technical difficulties," he stated, "but a tax differential in favor of blended fuel to offset the increased cost of alcohol must be provided to bring such a fuel into general use."

Marchant pointed out further that the prime motives for fostering the use of alcohol blends has been to aid in the disposal of surplus farm crops and establish better trade balance. In general the 10 per cent alcohol-gasoline mixtures showed no outstanding difference from straight run gasoline. Reports from customers who used more than a million gallons of this fuel during the spring and summer of 1933 showed that the blend gave quicker starting, better pick-up, more mileage and smoother engine performance. Eight hundred customers reported an average mileage increase of 2.51 miles per gallon.

Referring to the latest reports which predict the withdrawal from the ground of our present known oil reservoirs in ten to twelve years, Mr. Marchant said, "In the event of the oft-predicted shortage of gasoline, the investigations of various agencies into the merit of alcohol-gasoline blends will be of considerable value to the nation."

Sec'y. Wallace Cites Packers For Collusion

Livestock Business A Good One If You're Not Producing the Stock

In what appears to be the opening gun in a new inquiry into the major packing companies of the country, and of special interest to Illinois farmers was the citing by Secretary of Agriculture Henry A. Wallace recently of 10 large packing companies for price collusion, and attempted monopoly of the retail field in a large southern sales area.

Invoking the federal packers and stock yards act rather than the federal anti-trust laws, because under the former the department of agriculture is the prosecuting agency, the 10 companies were to file answers to the citation by March 24. On April 9, they will be accorded a public hearing in Jackson, Miss.

In general the charges made by Secretary Wallace based on the report of a government investigator are that these 10 companies furnished each other "information on prices at which they would sell meats and meat food products." This practice gave preference to certain localities and certain purchasers and acted to force competitors out of business and to manipulate prices and apportion sales in commerce.

Although farmers marketed the bulk of their hogs and cattle at a loss in 1933, packers reported substantial profits; in fact the livestock business during the past year has been very good except for the livestock producer. Farmers take little stock in statements by packer representatives that profits last year amounted to only a fraction of a cent per lb. because they know that p-ofits are easily covered up by wate- d stock, high salaries, unreasonably high appraisals of plant and other equipment, and abnormal depreci-tion charges.

The packers have an accounting system all their own, as have many processors and distributors of farm products, and they have been and are extremely reluctant to open such books to inspection by government accountants. So far the packers have su essfully thwarted efforts by government to examine their books.

Country Life Round-Up Inspires 400 Attending

Decatur Scene of Most Enthusiastic Meeting in Country Life History

IF ACTIONS and words mean anything, the 400 Country Life Insurance Company agents who crammed the banquet room of Decatur's Orland Hotel February 22-23 for their Annual Round-Up, are out to smother last year's record breaking year with an avalanche of new business, new Farm Bureau members and closer knit co-operation with all phases of Farm Bureau activities.

Starting with Dave Mieher, who opened the two day session, those attending were given no opportunity to doze. New ideas and methods dear to the heart of life insurance people flew thick and fast and in infinite variety holding everyone's interest at the highest pitch. Led by L. A. Williams, who delivered the manager's address, all speakers called upon Country Life agents to stick close to the fundamental ideas of life insurance and to keep their eyes on the broad picture of unselfish co-operation with all the phases of Farm Bureau work, for in so doing they placed themselves in a better position to act as "counsellors of protection."

Shoulder To Shoulder

"Be so anxious to work shoulder to shoulder with all branches of Farm Bureau work," said L. A. Williams, "that when people think of buying a policy they can think of no one but you. When you talk to a prospect, talk the oil company too. When there is a drive for new Farm Bureau members, offer your services and then go out and get more members than anyone else. If a man thinks you know your life insurance he will trust your judgment in the marketing of his products through the Farm Bureau set-ups. Sell yourself to your community, to your county Farm Bureau, and the people with whom you come in contact, through unselfish work and devotion in the cause of Agriculture, and you'll build Country Life into the greatest life insurance company in Illinois."

In the afternoon of the first day, Walter Cluff, well known Kansas City writer and sales educator on life insurance, addressed the gathering. He stressed the importance of sticking to the fundamentals of life insurance and the necessity for proper use of the talents and time bestowed on every man. He gave as his equation for results in selling life insurance "Ability and Capacity plus Education and Training plus Skill and Efficiency plus Time equals Results." He called "Time—the raw material out of which all things are made." "Life insurance men are made—not born," said Mr. Cluff, "and the skill of a life insurance man comes from the intelligent use of time, and the number of attempts to sell, the Frequency of them and the Regularity."

Headlining the banquet session in the evening of February 22, was Donald Kirkpatrick, general counsel of the I. A. A., who delivered a stirring address on the "Possibilities and Outlook for 1934." Pointing out how one man, Napoleon of France, placed an indelible mark on Europe that is still felt today, in contrast to the influence George Washington has had on the Western Hemisphere, Mr. Kirkpatrick drew the comparison between these two great men and another, Eliza Wright, who is the father of legal reserve life insurance in America. Labeled the "Widow and orphans lobbyist," Eliza Wright labored for years to place life insurance on an ethical plane. His influence is still felt said Mr. Kirkpatrick and his unselfish labors for the general good of all people should be an inspiration to every life insurance man. Sketching out the development of Country Life along the principles as set forth by Eliza Wright, and pointing out the path Country Life will follow for the coming year, Mr. Kirkpatrick closed with an appeal to all to, "take new courage, renew your faith, strengthen your knowledge of what you have to sell, get the fire and zeal of a missionary, the will and zeal of a crusader —and you will not only help and bring the main Agricultural program to fruition, but you will be helping yourself as well."

A. E. Richardson, manager of Illinois Agricultural Mutual Ins. Co., furnished the laughter of the banquet when he told in whimsical fashion the "Importance of Life Insurance from a Policyholder's Standpoint." His observations on life insurance salesmen who had tried to sell him a policy, and his attitude toward life insurance as a result of their efforts brought gales of laughter from the banqueters.

The genial, bald Dr. J. E. Boland admonished the "boys" about trying to guess weights and heights at a glance. He took up the various points and information necessary in the application to enable the medical department to make a quick, accurate estimate of risk. During the morning session, February 23, V. Vaniman, director of insurance service for the I. A. A., gave the salient points about corn loan insurance. This talk was to have been made by Donald Kirkpatrick who was unable to attend. "Retail Credit Reports" were discussed by W. J. Bradley of the Retail Credit Co., Chicago, who stressed the need for mor detailed information on the prospect when submitting the application.

Talks were given about various angles of life insurance work by Dave Mieher, C. C. Ramler, B. E. Mosier, field representatives, as well as by a number of general agents of several counties. Howard Reeder, County Life actuary, gave an interesting resume of the duties of his department as well as answering many questions from the floor regarding the makeup of various Country Life policies.

The sessions were not without songs and gaiety furnished by Harvey McNaughton, Special agent of Peoria County, and Miss Julia Beoletto of Bethany, Illinois.

Following the morning meeting February 23, there were questions from the floor until adjournment at 1 P. M.

Peoria Milk Meeting

Approximately 250 organized milk producers in the Peoria region attended the annual meeting of the Illinois Milk Producers Association in the Pere Marquette Hotel, Peoria, Feb. 20. Talks were made by Archie McPhedran, president of the Mississippi Valley Milk Producers, and A. M. Krahl of the Pure Milk Association, Chicago.

All present officers and directors were re-elected, reports Manager Wilfred Shaw. A motion was passed permitting directors to deduct an additional one to two cents per cwt. on all members' milk to be used in paying solicitors for securing new business for the Producers' Dairy.

Milk Price Problem Worries AAA Leaders

See Need For Cutting Production and Bringing Up Whole Level of Industry

With milk production at the highest point since 1924 Secretary of Agriculture Henry Wallace, and Chester C. Davis, administrator of the A.A.A., are of the opinion that the only solution to low prices for milk and butterfat lies in cutting production approximately 15 per cent.

In a recent statement before leaders in congress, Mr. Wallace pointed out that milk production since 1924 had been stepped up from 87 billion pounds to more than 101 billion pounds in 1932.

"When we speak of overproduction in dairying," said the Secretary, "we mean production of quantities of dairy products beyond the ability of consumer purchasing power to absorb at anything above distress prices to farmers. Therefore we do not think of curtailment of milk production in any absolute or permanent sense as we do in the case of wheat."

The Administration in response to co-operative leaders asked that an extra appropriation of $200,000,000 be made by congress to be used in addition to processing taxes for financing the proposed dairy and beef adjustment programs.

Proposed Plan

Under the proposed dairy plan approximately $250,000,000 would be paid to dairymen for reducing their production, $150,000,000 of which would be raised out of the graduated tax up to five cents a pound of butterfat—also a similar tax on oleo—and $100,000,000 to be taken from the proposed emergency fund.

The dairy reduction program would be partially accomplished by further tuberculosis eradication in cattle. The exact method of curtailing milk production would be left to the judgment of co-operating producers. It has also been proposed that good dairy cows be moved from the surplus sections to the southern cities and other regions where there is a shortage, hence under-consumption of fresh milk and its products.

The Administration emphasized the point that the proposed plan would not be put into effect unless organized dairymen want it and agree to cooperate. "We simply submitted the plan," said Mr. Wallace. "It won't work unless dairymen are behind it. It's up to the producers but we warn that if something like this isn't done

the path of the dairy industry is likely to be rough."

Organized butterfat milk producers in the northwest are reported to be lukewarm if not opposed to the plan because of the tax on butter. Their original proposal was to have the administration buy up surplus butter and give it to the unemployed. The Administration has been doing this through the Federal Surplus Relief Corporation. But it is believed by administration leaders that this program is not sound because it provides no check on production and is not self-financing.

In the meantime organized milk producers around the larger cities are attempting to maintain prices substantially higher than the prices being paid producers in the condensery, cheese and butter-producing areas and are asking the government to dam up the flood of milk immediately surrounding the city milk sheds.

Moot Question

No sensible person believes that the government can or should enforce a price that is greatly higher than that paid in the condensery butter and cheese districts. On the other hand fair-minded persons concede that fluid milk producers in the city milk sheds are entitled to a premium for their milk to compensate for the extra investment and expenses incurred in complying with city health inspection.

How much per centiweight the producers in the city milk shed should be paid is a mooted question. Some of the producers think they should get at least twice as much for their milk as their neighbors 50 or 100 miles back in the country are getting. Impartial observers, however, are inclined to believe that no government can prevent farmers who live outside the charmed circle known as the city milk shed, from selling their milk at a price higher than that offered by their local condensery or cheese factory to big city buyers whether they are organized or independent distributors. It's a case of one farmer against another. The only solution to the perplexing problem, many believe, is to bring up the whole level of milk prices throughout the country so that higher prices can be maintained in the organized milk sheds.

By H. M. Conway, Feb. 21, 1934

A substantial reduction in the supply of finished steers next fall is indicated by present feeding operations. Also at that time the market is expected to be supported by a rather strong demand for stocker and feeder cattle, thus making the situation somewhat the reverse of last year and one more favorable for grass cattle.

The outlook for fed cattle is a little more optimistic for the next two months. Heavy choice steers will tend to show the most advance but there is a strong undertone to the whole market.

The hog market has improved but the anticipated reduction in supplies during March and April is now largely discounted and especially in view of the increasing processing tax. It is well to continue to feed light weight hogs and market them only when they are fully finished.

Pork prices are increasing as a result of lower supplies and of a better consumptive demand. The market also has been improved by government buying. This makes it advisable to crowd early pigs, and as to the late portion of the crop, grow them out for finishing in the summer. The corn-hog program will reduce market supplies next fall. The outlook indicates a favorable feeding ratio during the last half of 1934 and next year.

As to fed lambs, the situation calls for early and systematic marketing, although it is well not to crowd too many into competition with the California spring crop. The strong wool market has bolstered lamb prices and promises to hold them steady. Demand is expected to show further improvement during the next two months. Lambs should be well finished but not too heavy.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 165 So. Main Street, Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rates of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Number 4 | APRIL, 1934 | Volume 12

State Legislation Reviewed

Here is Digest of Important Measures Considered By 58th General Assembly With Voting Records of Senators and Representatives

WITH the approach of the April primaries Farm Bureau members are increasingly interested in the voting records of downstate members of the legislature who are candidates for renomination.

Practically every bill introduced in the General Assembly affects farm interests, directly or indirectly. During the sessions of the Fifty-Eighth General Assembly the Association has studied all bills introduced and has supported, amended or opposed them, in the interests of agriculture. It is impossible to present the records of the various legislators on the mass of legislation. But in line with its customary policy, the Illinois Agricultural Association presents the voting records of both senators and representatives on three measures considered by the present General Assembly, which the Association believes are of most importance to farm interests.

The first two measures on which the vote is listed in the table on page 5 were considered in the regular session of the General Assembly during the first half of 1933. The last measure, key bill of the State Tax Levy and Bond bills, was considered in the first special session.

In every case the test votes presented have been taken from official journals and were of vital importance to the measures considered.

H. J. R. 65 Revenue Amendment

Throughout the regular session of the present General Assembly the Association, consistent with its position for many years, sought the submission of a fair revenue amendment to the Illinois constitution. Late in the session, House Joint Resolution 65 was recommended by the House Judiciary Committee. This measure proposed, first, to give the legislature power, by majority vote and free from all present restrictions, to levy taxes on any source of revenue; and, second, to limit the total taxes on any tangible property to one per cent of its fair cash value, exclusive of levies for payment of bonds and interest.

After its approval by the House by the overwhelming vote of 128 to 5, the proposed measure was modified in the Senate to include certain minor changes requested by the Association. Before it could be brought to a final vote in the Senate, a party caucus dominated by Chicago administration leaders offered a revenue amendment, which proposed to continue all present restrictions on the power of the legislature in matters of revenue unless such restrictions were abrogated by a two-thirds vote of all members elected to each House. The Association opposed this measure on the ground, amply demonstrated by past experience, that it would prevent essential changes in our present taxing system.

The highly objectionable Senate revenue amendment passed the Senate with the required two-thirds vote, but failed in the House. **The test vote in each House, given on page 5, was cast on a motion to substitute the House amendment for the Senate amendment. It classifies the downstate senators and representatives as for or against the revenue amendment supported by the Association.**

THE BEST AUTHORITY

Occupational Tax Acts and Lantz Bills

After the first Sales Tax Act was declared unconstitutional, administration bills were introduced in the regular session to establish the present Occupational Tax and to provide for the use of the revenue therefrom. As enacted, they provide that the net proceeds of the occupational tax, for the six months ending December 31,

(Continued on p. 4)

State Legislation Reviewed

(Continued from page 3)

1933, be paid to the Illinois Emergency Relief Commission, for unemployment relief, and thereafter, as they became available, be used to abate state taxes on property.

The Association favored the use of this new revenue for the replacement of property taxes but opposed the use of the funds for unemployment relief. Past experience had clearly shown that a very large portion of such relief funds would be used in Chicago and Cook county. In contrast with the high tax levies for poor relief in downstate townships, levies for this purpose in Cook county had always been very small. Even these had been cut in half as the depression deepened.

To meet the situation constructively, the Association sponsored three bills, known as the Lantz bills, to give the full constitutional taxing power of 75 cents to Cook county and an additional tax rate of 15 cents to 17 downstate commission-governed counties, and to give the townships and municipalities in Cook county and the municipalities in the other commission-governed counties the same power to levy taxes for poor relief as has been given to and imposed upon the townships, including a considerable number of cities which are also townships, in 84 counties of the state. Unless such bills were enacted, the Association pointed out, a special session to provide additional relief funds, mostly for use in Cook county, would be necessary before January 1, 1934.

The Association bills met bitter opposition from Cook county senators and representatives, but passed late in the regular session. They were vetoed by the Governor. This veto necessitated calling the first special session of the legislature early in October, 1933.

The test vote, given on page 5, classifies the downstate senators and representatives as for or against the three bills sponsored by the Association.

State Tax Levy and Bond Bills

As foreseen by the Association and by many others at the time the Lantz bills were vetoed, this action resulted in the calling of the first special session of the General Assembly to meet October 3, 1933, for the purpose of providing additional funds for relief. Administration bills were introduced, the key bill levying an additional state tax of $38,000,000 on property in 1934, payable in 1935, against which tax anticipation notes for $28,500,000 could be issued and sold to provide relief

funds. A companion bill proposed a state bond issue of $30,000,000, to be voted on in November, 1934, the proceeds of the bond issue to be used to redeem the state anticipation tax notes issued and interest thereon.

Other companion bills provided that the bonds and interest thereon, if the bonds are approved by a majority of all votes cast for members of the General Assembly, are to be paid by the state, one-half from gasoline tax allotments to the counties and one-half from gasoline tax allotments to the municipalities therein, in proportion to the share of such funds used for relief in such counties and in such municipalities. If the bonds are not approved in the November election, an additional state tax, which may be as high as $38,000,000, is already levied on the 1934 valuations of property to be collected in 1935.

Opposed State Levy

The Association opposed the State Tax Levy and Bond bills; first, because of serious doubt whether the bond issue can secure the votes necessary for approval; second, because the Association consistently opposes further diverting gasoline tax funds from their proper use in improving and maintaining highways and streets, thereby decreasing employment and increasing taxes on property; and third, because no provision had yet been made enabling and requiring every county and every municipality therein, especially Cook county, to draw upon its own resources according to its ability before asking the state for assistance.

The Association pointed out that present unfair and wasteful methods of providing and distributing state funds for unemployment relief were forcing downstate counties to ask for constantly increasing state funds for relief, thus tending to create and perpetuate a dole system in the state.

The Association again sponsored bills similar to but somewhat simpler than those offered in the regular session, equally enabling and requiring every community to levy taxes for unemployment relief. The bills sponsored by the Association, again meeting the bitter opposition of Chicago and Cook county legislators, and failing to receive administration support, could not command the two-thirds vote necessary to give them immediate effect. Unless they were enacted, it was pointed out, further need for relief funds, especially in Chicago and Cook county, would require another special session to provide relief funds long before the close of the year 1934. It now appears that the additional relief funds provided by the first special session will be completely exhausted some time early in the coming summer, long before voters h ve an opportunity to approve or disapprove the proposed bond issue.

The test vote on the Tax Levy and Bond issue key bill, given on page 5, classifies the downstate senators and representatives as for or against these bills opposed by the Association. **Note carefully that a negative vote on these bills favored the position of the Association.**

The record discloses that four most important issues are yet undetermined.

1. The submission of a constructive revenue amendment providing for a proper and effective limitation upon tangible property taxes, thus insuring an equitable system of taxation.
2. Assurance that new sources of revenue shall be used only to replace taxes now levied upon property.
3. Discontinuance of diversion of gasoline taxes from the improvement and maintenance of roads and streets.
4. Requiring all municipalities and counties to draw equally upon their own resources for unemployment relief before appealing to the state for assistance. Your vote in the April primaries and November elections will largely determine how these issues will be decided. The accompanying voting record is offered to assist you in recording your wishes.

New Farm Advisers

John R. Gilkey in Macon county, J. L. Iftner in Scott county, E. W. Rusk in Coles county, T. H. Hafer in Hancock county, Ward C. Cannon in Douglas county, N. H. Anderson in Logan county.

Carroll county—153 farmers had obtained corn loans amounting to $80,244 up to March 10. Around seven per cent of corn in Carroll county is represented by loans, according to Ralph A. Fahrney, secretary of the Supervisory Board.

How Your Senators and Representatives Voted on Legislation Affecting Farm Interests

(The I. A. A. vigorously supported the first two measures and vigorously opposed the last bill—S. B. 1 for a new $38,000,000 state tax levy on property and an issue of $30,000,000 in State bonds)

180 New Members Are Signed In Mason County

Since the mobilization campaign started last fall, 180 new members have been signed in Mason county, reports C. S. Love, farm adviser. "Our previous membership was 483," writes Mr. Love, so this shows an increase of 37 per cent.

LEONARD KEITH

"Leonard Keith, our county captain, together with the loyal lieutenants who work with him are largely responsible for this splendid showing. It is safe to say that 90 per cent of the members signed were signed individually by Mr. Keith or when some lieutenant was with him. Our captain's enthusiasm is noteworthy. One day he stopped at a certain farm to interview the owner. He found a community butchering in process. Instead of backing out when he found several neighbors there, he went right ahead and signed up three new members. The other two already were members.

"In one day's work by riding with a lieutenant, 12 members were signed out of 15 interviewed. And this was in winter when the days were mighty short.

"The captain appreciated the assistance given by the I. A. A. in keeping him well informed, also the personal help of Mr. Metzger, John Moore and O. D. Brissenden of the Organization Department.

"The work has not stopped in Mason county, and following a recent meeting of the captain and lieutenants the campaign is being carried on."

9972 New Members Signed Since Oct. 9th

At the two-day March meeting of the I. A. A. board of directors one day was devoted to a discussion of all the activities and projects of the I. A. A. and associated companies by officers and members of the staff. The goal or objectives of the various departments and companies during the next year were outlined in brief by the department directors and managers followed by questions and discussion by members of the board.

Secretary Metzger stated that a total of 9,972 new members had been reported signed in the eight organization districts of the state between October 9, 1933 and March 3, 1934.

197 New Members In Edgar County

"We had two of the best Farm Bureau meetings this week that have been held in Edgar county for a long time. 197 members were reported last night, at our victory dinner. This is an incomplete report, however.

"Vaniman sure stepped right down the center of the pike in the Monday meeting. I think he hit the ball harder than it has been hit in Edgar county for a long time. However, this has come as a climax to our work during the past seven months. The spirit of the men in the Monday meeting as well as in the Wednesday night meeting was excellent. We have little doubt but what our total will be brought up to 250 members by Saturday night."

H. D. Van Matre, Edgar County Farm Bureau.

Gain 37% In Schuyler

"We have written a total of 86 new members since January 1," reports L. E. McKinzie, farm adviser in Schuyler county. "This is an increase of more than 37 per cent. We expect to reach 50 per cent before the first of April."

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Return Your Friends To Office

THE Illinois Agricultural Association has endeavored since its organization to represent and protect the best interests of Illinois farmers in legislation. At the same time it has endeavored to be constructive, non-partisan, fair, and helpful to successive administrations in working for good government and the welfare of the State as a whole.

This policy has been adhered to in the regular and special sessions of the present General Assembly. In bringing to the membership, in the accompanying article, a report of leading measures considered in the regular and first special sessions, an effort has been made to present briefly the issues of greatest consequence to agriculture and to show by official records how downstate senators and representatives voted thereon.

To place the welfare of their constituents as a whole above partisan considerations is the obvious duty of members elected to the state legislature. Farmers have a right to expect that due consideration be given agricultural interests by the men and women representing them at Springfield.

We ask that every member of the County Farm Bureaus and Illinois Agricultural Association carefully read this report of the legislative committee and study the voting records of their legislators, most of whom are seeking renomination in the April primaries.

By actively supporting only candidates for re-election who are considerate of the welfare of agriculture as shown by their voting records, farmers can best exercise proper influence to secure honest, fair, and constructive legislation. Only by so doing can they hope to have effective representation in the legislative councils of the state and nation.

Let's Try Co-operative Marketing

THAT the smaller interior packers in Iowa and Minnesota started the vicious circle of lower and lower hog prices by buying direct from farmers for less is the interesting opinion advanced by Prof. Ashby of the Illinois College of Agriculture at the recent annual meeting of the Chicago Producers. Aided by an advantageous freight rate on dressed meats to eastern markets, and by lower cost hogs, these interior packers, he says, were enabled to undersell the larger packers operating at Chicago and other terminal markets.

Spurred on by this competition the big packers went to the country also to buy the better light hogs for less with the result that prices at the terminal markets, suffering from less buying competition, were constantly driven lower. And as the terminal prices were driven down, prices in the country which are based on the Chicago market, also declined.

This is a logical explanation of the effect of direct buying on hog prices. More important price-determining factors, of course, are the total supply of hogs, and the outlet for dressed pork and lard both at home and abroad. Foreign demand for our pork and lard we know has almost vanished although supplies have been maintained. Buying power in our industrial centers likewise has been below standard. Thus the influence of the direct buying trend on price is difficult to measure.

President Earl Smith, speaking at the same meeting, outlined the solution to the problem though it is not an easy one. That is to ORGANIZE producers, ORGANIZE both for production control and marketing so as to feed a supply of hogs into a price. Farmers never have really tried co-operative livestock marketing. Why not give it a trial by concentrating 75 per cent or more of livestock in our own co-operative agencies whether at the terminals or at county points? Farmers are organizing under the corn-hog program to reduce hog supplies in the coming year. From 85 to 90 per cent of corn-hog growers are going along with the reduction program in Illinois and Iowa. Let's apply the same organization to marketing and cut out this business of one producer underselling another.

Narrowing the Spread

HOW a meeting of cream producers held in Ford county many years ago resulted in raising the price of butterfat locally from 37 to 40 cents a pound was related by A. D. Lynch of St. Louis at the recent annual meeting of the Farmers Creamery Company, Bloomington.

The meeting was held over a store, Mr. Lynch said, and directly across the street there was a private cream station. On the blackboard in front of the station the proprietor had posted the price of 37 cents per pound. The station was open that evening apparently to attract attention of farmers attending the meeting. While the session was underway, the cream station operater learned that the producers were organizing a co-operative cream pool. A few hours later when the meeting adjourned,

Quad Cities Market Awaits AAA

Firm and Prompt Action By Government Needed to Iron Out a Bad Situation

IF THE federal government ever had an opportunity to do an important service for a group of its citizens, that opportunity exists in the dairy industry at the Quad Cities of Moline, E. Moline, Rock Island, and Davenport.

For more than a year milk producers in that area have been receiving little better than butterfat prices although extra expense is involved in producing, check testing, and delivering a daily milk supply to the four cities. At the retail price of 5c and 6c per quart, the dealers obviously are not getting fair compensation for their labor and investment. And while the consumer is getting a break in the form of an unusually low price, he is in danger of having the quality of milk delivered constantly lowered.

All this and more was brought out in a two-day hearing held by the Agricultural Adjustment Administration at the Blackhawk Hotel, Davenport, Mar. 5-6, where a marketing agreement which treats all producers on an equal basis through a pool plan was presented for consideration.

Well Attended

At the request of Chief Examiner John T. Pearson, the agreement was read point by point by Paul E. Mathias of the I. A. A. legal department representing the Quality Milk Association. Testimony and evidence from producers, producer-distributors, dealers, consumer representatives, and officials of the Quality Milk and Illinois-Iowa Milk Producers Associations on the proposed plan and market conditions was recorded and taken back to Washington for further consideration. Attendance varied from 200 to 400 at the various sessions.

The proposed agreement provides for a Class I, or fluid milk, price of $1.60 per cwt. Quality Milk presented an amendment raising this to $1.70 in line with the $1.75 price at Chicago and $1.85 at St. Louis.

The Class II (manufactured) price would be 3½ times 92 score Chicago butter, plus 20% plus 20c per cwt.

The Class III price in the proposed agreement is 3½ times 92 score Chicago butter plus 15 per cent.

One distributor, Anderson of Peerless Dairy, objected to the Class III price. Quality Milk offered several proposals for handling surplus milk. One is to process all surplus milk in the plant of the Farmers Co-operative Dairy Products Corp., a subsidiary of Quality Milk, on a non-profit basis, and turn the proceeds over to the market administrator to be figured in the pool price.

Another proposal is to have all dealers pay the same price for surplus milk as is paid by the farmers surplus plant.

A third plan is to sell all Class III milk to the distributors at the price named in the agreement (3½ x 92 score plus 15%) in which case Quality Milk would close its plant providing distributors agree to take all the milk for a period of one year or more.

Market Administrator

The proposed agreement provides for a market administrator who will have access to dealers' books and records, supervise the market, collect a check-off of 5c per cwt. on all milk, 4c of which would be turned over to the respective producers associations on their members' milk. In case of non-members, the administrator would retain the entire 5c check-off to establish weighing and check testing and inspection service similar to that now given by the co-operatives to their members.

Chief objection to the pool plan came from producer-distributors who are now selling all their own milk, and in some cases neighbors' milk also, at retail.

Both Quality Milk Association and the Illinois Agricultural Association vigorously supported the pool plan realizing that this promises the only relief from a chaotic market situation in which both producers and distributors are suffering.

Spokesmen for the Illinois-Iowa Producers Association which was set up a year ago with the support of organized distributors following their refusal to arbitrate or pay a fair price to producers represented by Quality Milk Association, did not oppose the pool but expressed the belief that there should be only one producers' association on the market. Quality Milk Association has offered membership in the organization to members of the other group, and to non-members, but has not agreed to change its setup in accordance with dealers' wishes.

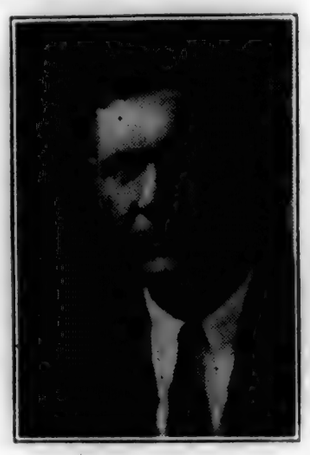
"B" Voting Stock

Quality Milk Association members insist that the tie-up with the Illinois Agricultural Association through the "B" stock which they voted to the I. A. A., be maintained for their own protection, that the influence of 60,000 organized farmers and the counsel and judgment of an experienced staff is of considerable value to them. The Quality Producers recognize that in union there is strength. The distributors are against the "B" stock set-up apparently because they believe they will have a better opportunity to control the market if the aid and influence of the state-wide organization is withdrawn.

When the Quality Milk Association was first organized in 1930 there was a wide spread between the price paid farmers by most of the distributors and that charged the consumer. On

(Continued on next page)

Uncle Sam Takes A Hand



farmers noticed as they passed the cream station that the price had been changed from 37 cents to 40 cents, which still was seven cents under Chicago standards. "We figured that the meeting had been worth while," said Mr. Lynch.

In 1933 after the Fermers' Creamery Company was organized at Bloomington, the price of butterfat there was only 2.13 cents under the Chicago 90 score butter market. At the present time the price is only 1.98 cents under the Chicago market. These comparisons show the effect co-operative creameries and cream pools are having in benefitting not only their patrons but also all farmers who sell butterfat.

Pure Milk Ass'n. Holds Ninth Annual Meeting

No Action Taken on Establishment of Surplus Plants

A crowd estimated at more than 2,000 attended the ninth annual meeting of Pure Milk Association in the Auditorium Theatre, Chicago, March 13. A proposal submitted by the board of directors recommending the establishment of farmer-owned surplus plants was considered but no definite action was taken. It was finally agreed to postpone action until more information could be given the membership.

DON GEYER

This plan, under which all surplus milk would be processed into condensed milk, cheese, butter, etc. is working out satisfactorily at Peoria, Quincy, and other Illinois markets.

"When the membership of the Pure Milk Association fully understands this plan I believe they will support it," said J. B. Countiss, director of dairy marketing for the I. A. A. "The producers can get higher net returns by processing their own surplus milk in their own plants than by sale through other means."

Production Down

The reports of officers showed that the Association marketed 1,120,316,242 pounds of basic milk and 208,528,352 pounds of surplus milk or a total of 1,369,692,650 pounds last year.

"This is approximately 7,000,000 pounds less production than the year before," said Manager Don Geyer, "and is the direct answer to critics of fluid milk organizations who attempt to place the responsibility for surplus upon fluid milk producers." Mr. Geyer stated that the breakdown in retail prices with narrowing of dealers' spreads had resulted in collection problems, with dealers' outstanding bills for milk the largest in the history of the organization.

Through the adjustment fund obtained by a five cent per 100 lb. checkoff on all members' milk, a market was provided for members who had no regular outlet. The adjustment fund, according to L. D. Oranger in charge of this work, furnished a market monthly to 2,365 members. It sold nearly 70,000,000 pounds of basic milk for members who had no fluid market, and made up the difference in price by paying nearly 30,000 claims totaling approximately $450,000.

President Henry Pfister stated that within the central office there is a spirit of co-operation shown by the 75 employees "that makes possible the carrying out of the Association's policies in as efficient and complete a manner as possible.

During the year the gross income of the Association was $423,862.49, expenses were $383,089.72, leaving a net income to surplus of $40,772.77. The net worth of the Association as of December 31, 1933 is $246,843.33. The audit was made by the Illinois Agricultural Auditing Association.

Speakers include Fred Sexauer, president of the New York Dairymen's League; Frank Baker, AAA market administrator for Chicago; and others. Women attending were entertained at a luncheon in the Congress Hotel.

New directors elected to the board include E. E. Houghtby of DeKalb county, and Frank Green of McHenry county. There were no changes in the officers. The Association contributed a little more than $80,000 of its income during the year to the advertising fund spent under the direction of the Milk Foundation.

New Rate On Soybeans Helps Illinois Growers

A new freight rate on soybeans from Illinois to the eastern seaboard which is eight cents lower than the old rate was secured recently by the transportation division of the Illinois Agricultural Association. The new rate which became effective March 10 promises to have the effect of raising the price at least eight cents per bushel on a substantial part of the commercial crop grown in Illinois. Applied to 2,000,000 bushels of beans it would mean a saving of at least $160,000 to Illinois growers.

The new rate on soybeans, according to G. W. Baxter of the I. A. A., who negotiated the reduction through the Central Freight Association, is the same as the rate on grain, namely, 23.7 cents per bushel. Illinois processors still have an advantage of approximately 17 cents per bushel on freight since the average rate from Illinois shipping points to processors' plants within the state is about seven cents per bushel.

The lower rate was opposed by the traffic department of one large processor at Decatur apparently because he feared that competition from eastern buyers would raise the price received by the Illinois farmer.

Quad Cities Market Awaits AAA

(Continued from page 9)

a 10 cent per quart market, for example, certain dealers were paying producers less than $1 per cwt. net for milk. Net return tickets conclusively proving this statement were introduced into the records at the hearing by President F. H. Schafer of Quality Milk Ass'n.

Before the organized producers will revert to that kind of a situation, they prefer to go into the distributing business themselves and if necessary set up milk depots throughout the Quad Cities until routes can be established. Even with a 50 per cent surplus and a 6c retail price, Quality Milk Association members have been getting from 85c to 95c per cwt. for milk which is little worse than the deal some distributors were handing out when milk retailed for 10 cents.

There is a very simple way out of a bad situation at the Quad Cities. That is to establish an 8 or 9c price to the consumer, allow the dealer a fair margin for his services but not an exorbitant profit as was the case several years ago, and pay the balance according to a pool plan to the milk producers, as set forth in the proposed agreement.

Later a base and surplus plan can be put into effect by the federal administrator so as to adjust production more nearly to demand.

Under the proposed plan, farmers who retail their own milk up to 250 lbs. per day would not be included in the pool. Sentiment was expressed both for increasing and lowering this arbitrary figure.

Cost of Sales

The Iowana Dairy testified that its present sales cost is 2.8c per qt., processing cost 1.84c, and the cost of milk at 95c per cwt. for 3.5% milk is 2.3c or a total cost of 6.9c per qt. Milk is sold to stores at 5c and delivered to the housewife at 6c per qt. These sales and processing costs are thought to be higher than average because they are figured on a relatively small volume. On the present basis the larger dealers, it is generally conceded, are not making a fair profit although most of them seem to be paying expenses and living.

Under the schedule of unfair trade practices, the minimum prices to be charged the consumer would be 7c per qt. for milk containing 3.9% butterfat or less, 8c for 4% milk, 22c per qt. for 22% or less cream, 29c per qt. for 23-30% cream, etc.

Chicago Producers Annual Meeting

Direct Buying, Organized Selling and Other Problems Discussed by Speakers

THE obvious answer to the direct buying problem is to concentrate a greater volume of livestock in the hands of co-operative sales agencies, Earl C. Smith, president of the Illinois Agricultural Association, told nearly 300 livestock growers at the annual meeting of the Chicago Producers C mmission Association in the Sherman Hotel, Chicago, March 13. Henry H. Parke of DeKalb county, president of the Producers Association, presided. Mr. Smith challenged the Illinois producers who comprised the bulk of the audience to double the percentage of livestock marketed through co-operative channels during the coming year.

H. H. PARKE

"I hope that the State of Iowa and other states will not follow, but lead us in organizing their bargaining power in the sale of livestock," he said.

Mr. Smith emphasized that there is a big difference between organized direct selling and packer buying. He said that a good rule for district co-operatives to follow is to sell direct to packers only when the advantage in freight, commission savings, yardage, etc., can be reflected in the price to the producer.

Buy 'Em Cheaper

The harm in direct buying, he said, lies in the fact that local packers who secure their supplies of hogs in this way usually buy them cheaper and so are in a position to undersell the buyers operating on the terminal markets. He pointed out that this practice sets up a vicious circle in which packers are placed in competition with one another to buy hogs at a lower and lower price. Co-ordination of selling through local co-operatives in the country with selling through the terminal marketing agencies would solve the problem.

Mr. Smith expressed the hope that the time would come when 90 per cent of all farmers held membership in one organization (applause). This goal appears to be a long way off, he continued.

Many economists and market experts agree that consumers could have purchased approximately 70 per cent of the hog crop during the past year at the parity price which today is approximately $8.12 per cwt. at the farm. If we received parity prices for 70 per cent of our livestock, Mr. Smith said, we could almost afford to give away the other 30 per cent.

The State of Illinois furnished more than 75 per cent of the receipts of the Chicago Producers Commission Association during the past year. Approximately 20.8 per cent of all stock in Illinois was marketed co-operatively last year.

Mr. Smith reviewed at length the problems involved in raising the prices of corn and hogs and alluded to a letter from Henry A. Wallace received in June, 1932 in which he predicted that unless hog production were reduced there was every prospect of the price dropping to $2 per cwt. by the fall of 1933. People who criticised the pig slaughter program, he said, failed to understand the market situation.

Simplified Plan

Recognizing that several farm production control plans now being administered by the AAA are of only one or two years' duration, Mr. Smith asked farmers to consider using the farm as the unit in future production control plans rather than the commodity.

"It is apparent," he said, "that many of our surplus problems cannot be completely solved within the next year. Approximately 40,000,000 acres were added to the cultivated areas of this country during the war as a result of greatly increased foreign demand for farm products. It seems unlikely that foreign outlets for this surplus production will be completely restored at an early date. Therefore some form of production control will undoubtedly be necessary for several years to come if reasonable prices for farm commodities are to be secured."

In effect, the suggestion applies the principle of the present commodity control programs. There would be merely a change in administration whereby each farmer would be called upon through contract, license, or otherwise to retire annually from production, given percentages of the cultivated area on each farm. With such retirement of acreage, the government would have no interest in nor authority over the remaining cultivated area of the farm.

Mr. Smith stated that it was his belief there would be very little, if any, shift from one crop to another; that each farmer would continue in a large measure to grow the same crops he had been growing throughout the years, and that any program calling for a cut in production would raise the price level of all basic farm commodities.

Cut Out Tax

"Such a plan would be very simple in its administration. It would make possible a great reduction, if not the discontinuance entirely, of present processing taxes, and would be so simple in its application that not only the farmer but also the general public could understand every detail of its operation."

Mr. Smith explained that this proposal, offered merely for study and thought, in no wise was suggested to replace, impair, or detract from the administration of present policies of government; that it was offered merely for consideration and worthy of thought as farmers look to the future for a more permanent but sound program.

Prof. R. C. Ashby of the University of Illinois who addressed the gathering, stated that farmers had given ten times more attention to marketing costs than to livestock prices. He said that the 50 per cent of livestock going through the terminal markets are paying the bill to maintain such markets which establish prices. His study of the situation, he said, revealed that local markets are getting the best hogs which go direct to the packers and that in general the poorer hogs are going to the big terminals.

Can Undersell

He pointed out that the freight rate on dressed pork from Iowa is only 77 per cent of the live hog rate which gives the smaller Iowa packers the advantage and enables them to undersell the terminal packers in the eastern

(Continued on Page 12, Col. 3)

Chicago's Back Taxes Key To School Problem

Payment of $30,000,000 Now Due Would Reimburse Schools

Aggressive enforcement of the property tax laws by public officials in Cook county, and payment of delinquent taxes now due would go far toward overcoming shortages in the state common school fund as well as greatly aid the Chicago schools, President Earl C. Smith pointed out in a recent statement. In line with the action of delegates at the recent I. A. A. convention in opposing further diversion of state gas tax funds from highway improvement and maintenance, the I. A. A. legislative committee is opposing new efforts to divert gas tax funds, at Springfield.

"The facts show," Mr. Smith said, "that Cook county owes the state more than $30,000,000 in delinquent and delayed taxes, whereas downstate counties as a whole are delinquent only to the extent of approximately $3,000,000. If these delinquent taxes were paid, the state could fulfill its obligations to the elementary schools of the state and pay into the common school fund the $12,000,000 still owing the schools.

Downstate Pays

"Hard hit financially as farmers and other downstate people have been throughout the depression, tax collections in most downstate counties have been at a comparatively high rate in contrast with the deplorable situation in Chicago and some of its suburbs.

"Lack of aggressive action by public officials is largely responsible for this situation in Cook county which imposes an unfair portion of the cost of state government on all downstate counties as well as great hardship on schools in a few downstate counties.

"We have great sympathy for all overburdened property taxpayers whether on the farm or in the city," he continued, "but so long as Cook county legislators insist on continuing the present property tax system rather than a fair taxing system based on ability to pay, downstate legislators should insist that it be enforced in Cook county rather than divert other revenues to meet deficits in Cook county tax payments to the state."

The present effort to divert the gasoline tax fund from road building and improvement is the third distinct effort in this direction. The original effort to divert $20,000,000 of gasoline tax fund, plus interest on the bonds, to unemployment relief was successful.

They're All After Him

The gasoline tax fund will be further obligated if the people of Illinois approve the proposed $30,000,000 bond issue next November in which case the bonds and interest will be paid off out of gasoline tax funds. In addition, approximately $11,000,000 of gas tax funds have been borrowed on state anticipation warrants for general state purposes.

The present effort to divert gasoline tax funds to the schools is proposed only as a temporary measure. Experience shows that such temporary expedients often become permanently established. The Illinois Agricultural Association is vigorously opposed to further gasoline tax diversion because continued crippling of road building and improvement not only adds to unemployment, but it deprives a large part of the rural people who reside on the 70,000 miles of public highways still largely unimproved from direct benefits of the gasoline tax which they are helping to pay.

Gaining In Iroquois

The Iroquois County Farm Bureau recently passed its quota of a 25 per cent membership increase since January 1. Approximately 300 new members had been signed by Mar. 20 since the first of the year. "Membership is gaining steadily," reports Farm Adviser C. E. Johnson, "and more farmers are interested in the Farm Bureau and its program of service today than at any time during recent years."

102,053 Corn-Hog Contracts Signed—Mumford

Dean H. W. Mumford, chairman of the state corn-hog committee, reported that 102,053 contracts had been reported signed on March 12. It is estimated that approximately 176,000 farmers are eligible for the corn-hog adjustment program.

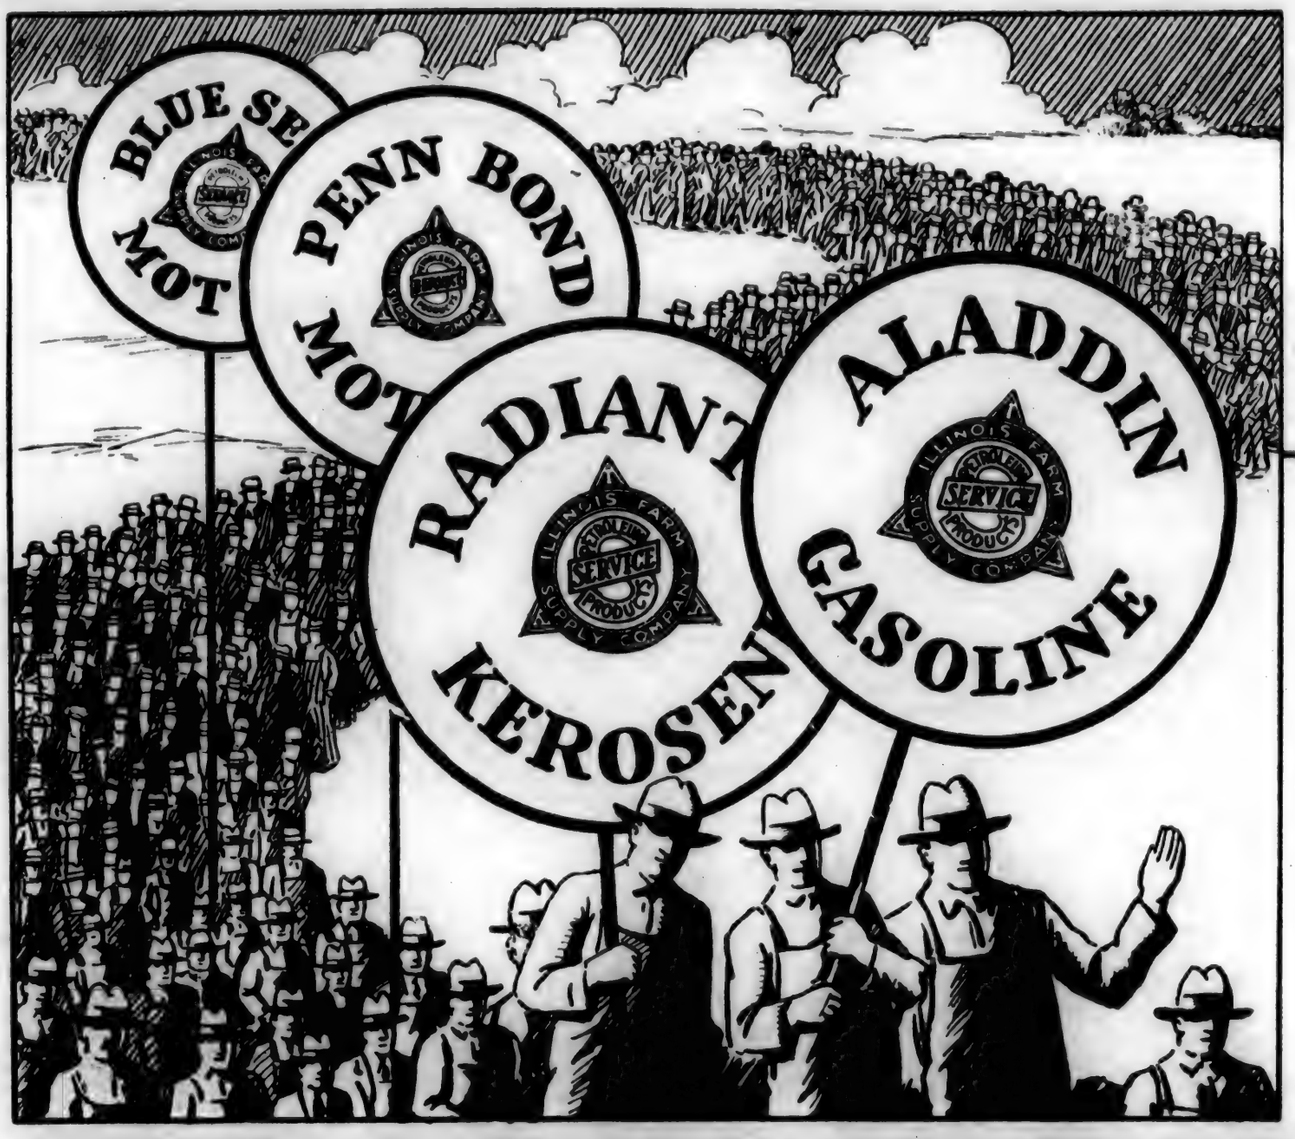
Chicago Producers Annual Meeting

(Continued from page 11)

markets. Mason City, for example, has an advantage of 14 cents per cwt. on live hogs to eastern points over Chicago, based on the dressed pork rates.

Mr. Ashby stated that his study revealed that Iowa hogs had been selling at too low a price. He quoted a packer buyer on the Chicago market as follows:—"If we bought all the good light hogs we wanted at the terminal markets we would put the price up on every market in the United States." Comparatively few eastern packers are buying hogs on the big terminal markets because they can buy them cheaper in the country."

The speaker expressed the opinion that the interior Iowa packers have more to say about hog prices than any group in the United States, also that hog producers have lost 20 cents per cwt. or more on terminal prices by saving 10 cents per cwt. in letting their hogs go to packers at local concentration points.



Still Growing

President Henry H. Parke of DeKalb county, Illinois, and Manager D. L. Swanson gave interesting reports showing the substantial progress made by the Chicago Producers during the past year. The percentage of cars handled increased from 9.32 per cent in 1932 to 11.18 per cent in 1933. Gains were made in all departments. The Chicago Producers stood first among all firms on the U. S. Yards in total carloads in cattle and calves and in hogs. In the latter class the Producers handled more than the next five firms. The co-operative was second in sheep. Receipts from commissions last year totaled $341,593.46.

C. A. Ewing, president of the National Livestock Marketing Association, made an interesting talk during the morning session in which he emphasized the necessity for broadening foreign outlets for livestock products. He favored this method of solving the surplus and price problem rather than curtailment of production. Geo. F. Tullock of Rockford was re-elected to the board of directors.

Wallace Appoints Board

Members of the corn-hog board of review for Illinois recently appointed by Secretary Wallace are Joe Fulkerson of Jerseyville; P. E. Johnston of the Illinois College of Agriculture; and A. J. Surrat, agricultural statistician, Springfield.

Keep Farm Dollars Loyal

Buy I. F. S. C. Products Only

Buying Power of 75,000 Illinois Farmers SAVES YOU MONEY

$500,000 REFUNDED ANNUALLY

Last year, 75,000 Illinois farmers purchased 40,000,000 gallons of petroleum products from 54 County Service Companies. This resulted in a $6,000,000 year's business. These farmer owned companies were thus enabled to refund $500,000 to member patrons for the third consecutive year.

The 1934 volume will far exceed all previous records if every Farm Bureau member will patronize his service company exclusively.

Volume brings greater bargaining power. Increased volume through exclusive purchasing of Service Company products will further add to your savings and assure you of the highest quality.

A TRAIN LOAD EVERY OTHER DAY

Magic Aladdin Gasoline is a premium product sold at a regular price. Radiant Kerosene is top grade quality with draft horse power. Penn Bond and Blue Seal Motor oils are the best money can buy. Soyoil Paint has no superior. More than 400 service tank trucks are ready to serve you. One of 146 bulk storage plants is located near you. Five hundred authorized Illinois dealers will keep you supplied when you are on the road. Buy where you see the Illinois Farm Supply trademark.

Increase your purchases from your own company this year. Use Service Company products exclusively. Tell the driver of the Blue and White truck who travels your road to fill your drums whenever he calls.

Danville Producers Sell Milk Direct To Consumers Thru Depots

Plans to organize the Producers Dairy of Danville as a subsidiary of the Danville Milk Producers Association were completed at a meeting in Danville on March 16. Fifty per cent of the necessary operating capital to establish retail outlets for milk was raised at this meeting, according to J. B. Countiss, director of dairy marketing.

The Association recently took over the plant of the former Blue Banner Dairy where it is pasteurizing milk delivered by members of the Association who were kicked off the market by the distributors. Most of this milk is high-quality Guernsey milk. Two milk depots have been set up and more will be added. The stations now operating are doing an excellent business selling milk to consumers at seven cents per quart. One station increased its sales from six to 52 gallons in a single week.

Sanitary equipment and refrigerators have been installed and sales of milk and other dairy products are growing. All business is strictly on a cash and carry basis. As volume of sales increase it will be possible for the Association to pay its members a constantly increasing price.

Organized dealers have refused to work with the producers who believe they are entitled to a larger share of the consumers' dollar. In the meantime many of the members are continuing to sell milk to the distributors at $1.40 per cwt. for four per cent milk. The delivered price at Danville is 10c per quart.

The Reporter Almost Gets A Story From Kelker

With corn loan insurance applications deluging the offices of Farmers Mutual Re-insurance Company, it was difficult to get J. H. "Jack" Kelker, manager, to take time off to quote a few figures. But persistency on the part of this reporter managed it.

"So far, we have had applications for a grand total of around $1,350,000 corn loan insurance. Of this amount," said Mr. Kelker, "I find that around $1,000,000 is for fire insurance on sealed corn, and $350,000 is for protection against wind. This amount increases from day to day.

"No," said Mr. Kelker, "I can't say offhand what the ultimate amount of corn loan insurance carried by this company will be but I can say this—" and here he leaned close to this reporter's ear and rattled off some amazing figures.

"But you can't announce it yet," admonished Mr. Kelker, shaking his finger under this reporter's nose. "I'll be ready to give out those figures before long. And will Farm Bureau members swell up with pride when they see them."

It will be a swell story when it comes out. Watch for it.

The Battering Ram Will Make An Opening

Roosevelt Request For Tariff Power Not New

Tariff bargaining power requested by President Roosevelt is similar to that held by Premier Gaston Doumergue of France. The American tariff policy has been a one-duty policy containing no provision for barter or bargaining. Since France has been on a barter basis for a long time, permitting trade only under rigid quota arrangements, American commercial activity with France has been reduced to a minimum. American business leaders and officials in Paris are hopeful that President Roosevelt will be given the powers sought.

Farm Bureau Serum Assn. Contracts For 1934 Supply

The Illinois Farm Bureau Serum Association has contracted to buy approximately 40,000,000 c.c. of hog cholera serum and virus in the coming season. Under the serum code standard prices will be charged by the co-operatives as well as private distributors. Co-operatives are privileged, however, under the code, to make patronage refunds at the close of the year to their members. There are 77 County Farm Bureaus in Illinois holding membership in the Serum Association.

Baseball Leaders Meet To Prepare For Season

Looks Like Farm Bureau League Will Have a Good Year

Preliminary plans for starting the 1934 baseball season were made at the spring meeting of the Illinois Farm Bureau Baseball League held in the Illinois Hotel, Bloomington, March 19. President Chas. S. Black of Jacksonville presided. Delegates from 11 counties responded to the call in spite of heavy snow, ice and bad driving conditions in the central and western parts of the state.

CHAS. S. BLACK

Slight modifications were made in the eligibility rules so as to bar players who are or have been members of a team in a recognized professional or semi - professional league after July 1 of the current playing season. To be eligible for the semi-final or final games of the Farm Bureau League a player must have been eligible to play in one or more of the preliminary games within the division. Any County Farm Bureau may enter two or more teams in the League provided such teams are distinctly separate, represent given geographical lines, and there is no interchange of players.

It was voted to open the playing season on Saturday, May 19, and that preliminary schedules be closed on or before Saturday, August 11, in preparation for the semi-finals.

Names of umpires used in semi-final and final games must be submitted to opposing teams five days before the scheduled game. The League voted to use the new raised seam ball.

The exe utive committee will redistrict the state as soon as all counties have fully decided whether or not they will bring out teams. At least one and possibly two more divisions will be organized according to present indications. Adams county is planned to organize a team, also Madison, Cook, Fulton, and possibly others.

W. J. "Jim" Clarke of the Chicago Producers Commission Association is assisting Ray E. Miller, director of livestock marketing, temporarily, in field work. During the past two weeks he has met with a number of livestock marketing committees and addressed a number of livestock meetings.

BILL JONES Gets Himself an OLD AGE PENSION

All Bill Jones did to arrange his pension was talk to the insurance man at the County Farm Bureau. Of course there are a lot of so-called "pensions." But as Bill said, "I want something a farmer can handle financially, and enjoy when he gets it." So the Farm Bureau insurance man fixed him up. It won't take but a few minutes to get all the details. Be sure and ask about the "farmer's pension."

BILL JONES eased himself down off his corn plow. He pointed to the iron seat.

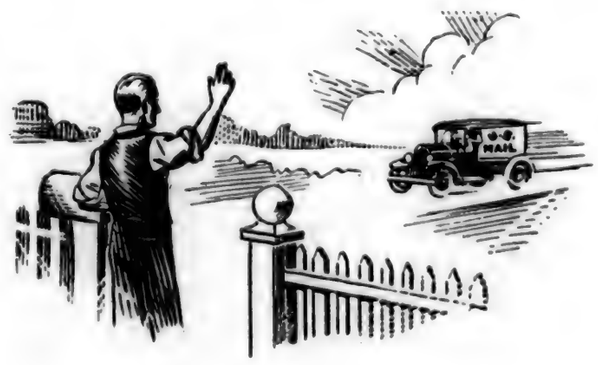
"I'm 50 now. But when I'm 65, you'll not be finding me trying to fit one of those things. I'll be sitting pretty in a nice soft seat in the shade watching some other fellow wearing a groove in himself and I'll know just how he feels. But I'll have me a pension. A nice, fat, check coming in every month, and I'll be glad to let somebody else bounce around on a corn plow for a change.

"I've done a good job of farming—now I'm planning on doing a good job of loafing. I've been getting up at the crack of dawn—now I'm looking forward to letting dawn crack itself crazy before I get up. I been watching people go North in the Summer and South in the Winter—now I'm planning on a lot of that galavanting myself.

"I read about a lot of places like Mammoth Cave, Glacier Park, South America, Mexico, Florida and such—now maybe I'll go there and see if it's all it's cracked up to be. When mother and me were married we couldn't go to Niagara Falls. But we're going now, and a lot of other places besides.

"Maybe I'll get me a cottage near a lake and do some fancy fishing. Or go visit the kids when I like, and put up at a hotel, and not have to be a bother by staying with them.

"Mister! You're going to see the independentest, retiringest farmer you ever laid eyes on when I'm 65. The boys will be working the farm. I'll have plenty for mother and me.



"But—if I can't do all those things I'm counting on, mother can. I've got that fixed up. And she can do the things for me and play-act like I was along.

"Pshaw!—65? I'll be spry as a youngster the way I feel now. I'm planning on having me a good time when I'm 65. You know, I get to dreaming about it riding around on this corn plow and first thing, this iron seat gets to feeling like a feather pillow and these plugs of mine a couple of fancy trotters over in England.

"Sure you can get a pension. You're no older than I am."

Bill Jones was back on the corn plow.

"You go see that insurance man down at the County Farm Bureau. Tell him you want one of those farmer pensions like I'm getting. Giddap." Country Life Insurance Co., 608 So. Dearborn St., Chicago.

At the Annual Conference of Illinois Farm Supply Company, Danville

Observations

Is a man ever justified in not signing the corn-hog reduction program or other government crop adjustment plans?

Obviously the answer is "yes." No program or plan is perfect. The corn-hog program is a great benefactor to the industry but it does not fit every case. If applied universally it would work a hardship on such producers whose acreage or crop of the basic commodity in the base period for various reasons has been greatly reduced if not entirely eliminated.

A Farm Bureau member from Henry county presents a case in point. He writes rather critically about the corn reduction plan, because, as he states, he has plowed up only 25 to 30 per cent of his farm keeping the balance in grass and legumes to conserve and build up soil fertility. In the meantime, he says, his neighbors have "torn up" from 75 to 90 per cent of their land and put it into cultivated crops. His neighbors and others, not he, he contends are responsible for price-depressing surpluses. Therefore, he asks "am I less an American and a good citizen if I fail to sign up to reduce my small acreage another 20 per cent when I already voluntarily have cut production 30 to 40 per cent?"

How would you advise this man? It seems to us that he should not be criticised for not signing the contract since the program already penalizes him, in comparison, whether or not he goes along. We can suggest, however, that he fill out the work sheet and discuss his case with the local production control committee. By so doing he shows his good faith and good intentions. And if he doesn't use the opportunity to increase production, hoping to take advantage of the prospective rise in prices, it would seem that he fulfills his obligations.

Such cases as this indicate the value of giving certain discretionary powers to production control associations. If a man has his hog base destroyed by cholera or otherwise, if the peculiarities of the weather or crop rotation system have resulted in an abnormally low acreage of corn, wheat or cotton in the base period, allowance might well be made for such abnormalities.

Judgment should always be tempered with practical consideration and common sense. By frankly discussing their situations with the local committees, such producers as the one mentioned can avoid adverse criticism and make a contribution toward perfecting adjustment programs in the years to come.—E. G. T.

1220 Hear L. A. Williams At Stephenson Co. Meeting

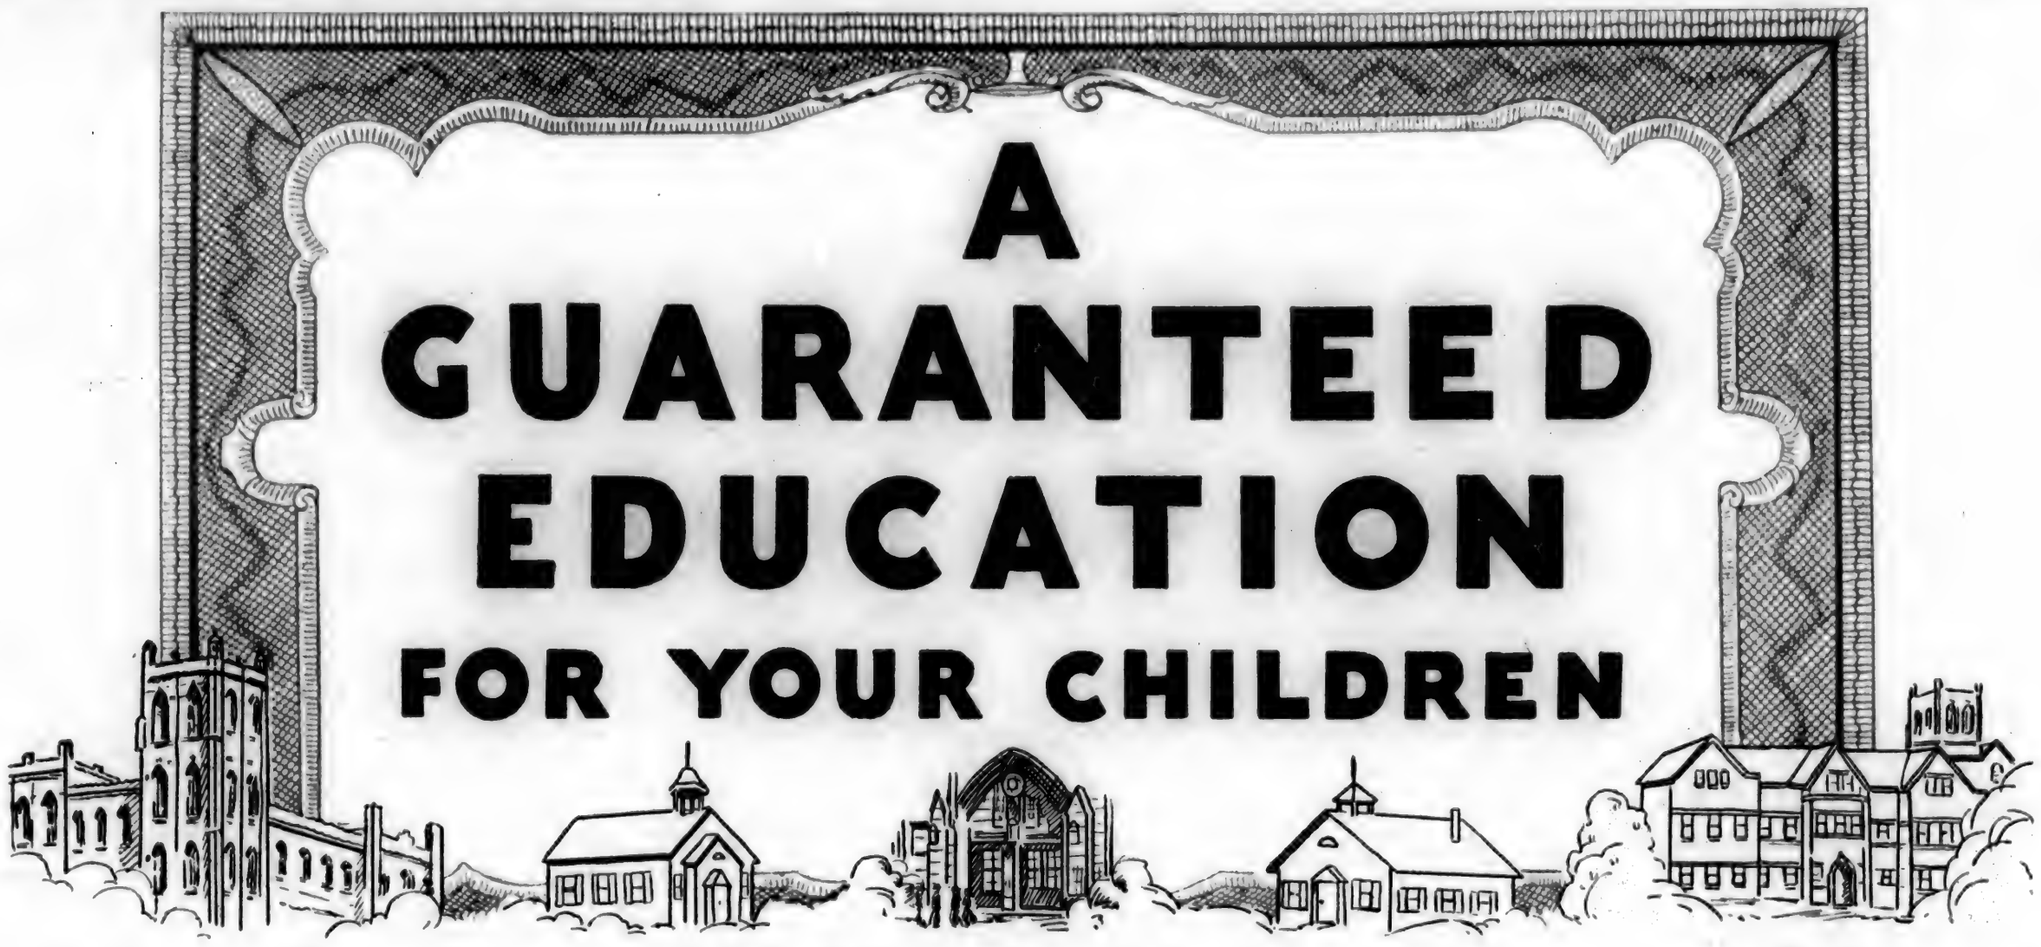
Picking at random from among the many county wide meetings addressed throughout the state by L. A. Williams, manager of Country Life, one of the most outstanding to date was that held at Freeport, March 8th, when 1,220 Stephenson Countyites occupied every available seat in the Consistory theatre, of which 134 were brand new Farm Bureau members, 106 of whom had signed up two days before the meeting.

L. A. WILLIAMS

Just before Mr. Williams began his address on the value of organization and its part in the recovery program, he was presented with 134 new memberships. The crowd was responsive and demonstrated the enthusiasm that is sweeping through the state for a more solid organization to further the cause of agriculture.

Kelsye Baylor, who is not only the leading pilot in the Country Life "Aeroplane Race," but is an excellent master of ceremonies, introduced the Swiss Yodelers from Brodhead, Wisconsin, who gave several selections. Interspersing the talks by various county officials, a number of monologues were given which were well received by the crowd. Mr. Williams is and has been doing effective work on the platform throughout the state in behalf of organization as the solution to farmers' problems. He appreciates the fact that establishment of parity prices for farm products, a fair taxing system, and a better economic position for the industry are the big objectives organized farmers must fight for.

Farm Supply Refund Is Above National Average



For comparison with the achievement of Illinois Farm Supply Company in doing a $6,000,000 business during 1933 and returning an average of 14 cents out of each dollar to member patrons in the form of patronage dividends, a recent Washington report on farmer-owned petroleum co-ops. should be of interest to Illinois farmers.

"Farmer co-operatives," states the article, "did a total business of $35,000,000 during 1933 according to figures compiled by the co-operative division of the Farm Credit Administration. Formation of these associations, which today total about 600 has been one of the outstanding developments of the farmer co-operative movement during recent years. Nearly 500 of these were organized in the last seven years. . . . Minnesota leads all other states in number of associations followed by Illinois, Iowa, Nebraska and Indiana in order named. It is estimated that in all, about 350,000 farmer members own and control these organizations.

"According to data assembled by the co-operative division of the Farm Credit Administration, 52 associations in Minnesota, Wisconsin and Iowa did a total business of $2,600,000 in 1933. . . . The average net earnings of each was about $5,000. About 10 cents was returned for every dollar's worth of gas and oil the member bought from his association."

Illinois farmers know by this time that their 54 County Service companies did a total business of $6,000,000 in 1933, with patronage refunds of

No Matter What Happens to You!

Special Plan Now Available which Protects at Actual Cost

The faith of your children is your most precious possession. Guard it well! See that nothing is left undone to build and protect that faith for the future to come.

Most of all—you should think of the possibility of your being taken from them. Will they be sheltered, protected and educated to be useful, successful men and women—with their faith in you undimmed?

You dare not let today's carelessness reap tomorrow's sad harvest. You cannot sacrifice childish faith for just a few pennies a day.

Plan now, when you are young, to establish a guaranteed, educational fund for your children. Then, no matter what happens to you, they will have the advantage of an education to fit them to meet the problems of life with confidence. The plan is simple and inexpensive. It costs but a few pennies a day.

NOTE COUPON BELOW

Send the coupon at once for details and rates. Or see your County Farm Bureau insurance agent. Never let it be said that you were not the "greatest man in the world."

COUNTRY LIFE INSURANCE CO.

608 So. Dearborn St., Chicago

ONLY A FEW PENNIES A DAY

Note sample rates below. See how inexpensive a Country Life educational policy is.

Insured Age	Quarterly Premium Per Thousand
25	$4.12
30	$4.70
35	$5.47
40	$6.48

In case of father's death, a $5,000 policy would guarantee child $14.58 a month during grade school to 14 years of age. $35.00 a month during high school, from 14-17 inclusive. During college, from 18 to 21 inclusive, $80.00 a month. Upon graduation, cash totaling $410.00 plus excess interest.

If the father survives, the cash value of policy is always available for educational purposes.

St. Louis Milk Market License Is Effective

Fred Shipley Appointed Administrator, Producers To Get Better Prices

Fred Shipley, recently appointed milk market administrator at St. Louis, is a former University of Illinois boy. He has been assisting E. W. Tiedeman and A. D. Lynch of the Sanitary Milk Producers in market problems on the smaller milk markets in the St. Louis milk shed.

FRED SHIPLEY

Shipley came to Illinois from Tennessee as a cow tester in Knox county about 1925. He worked for the milk testing commission at Peoria from 1927 to 1929. Later he was selected with the help of A. D. Lynch, then dairy marketing director of the I. A. A., as manager of the Champaign County Milk Producers Association. In 1931 he went with the Sanitary Milk Producers where he had charge of the milk markets in southern Illinois, including Benton, Harrisburg, DuQuoin, Murphysboro, Mt. Vernon, West Frankfort, and Carbondale.

Mr. Shipley's duties will be to act as general supervisor of the provisions of the license relating to producers' prices and the adjustment fund for all distributors; to examine the books and records of distributors and their subsidiaries when necessary, and to represent the Secretary of Agriculture in general matters connected with the license for the St. Louis area.

License March 2

The license which became effective March 2 establishes a price for Class I milk of $1.85 per cwt. for 3.5% milk delivered to distributor plants. The differential per 1/10% butterfat is 3c. Class II milk (fluid cream) is to bring 3½ times 92 score Chicago butter, plus 20%, plus 30c per cwt. Class III, manufactured, is priced at 3½ x 92 score butter plus 15c per cwt. all f. o. b. plants. Farmers will control their own hauling and get the benefit of economies there. More equitable differentials in price for producers in the different zones based on distance from market likewise have been established. The close-in producers will get a higher price than those located farther away from St. Louis.

Producers will secure a blended price for Classes I and II to be determined by the market administrator. The base and surplus plan is in force on this market so that the price to each producer will depend on the amount of base milk he delivers.

The checkoff is 4c per cwt. paid by all producers except the producer-distributors who are exempt up to 250 lbs. per day on their own milk. The members of the Association will contribute 3c to the Sanitary Milk Producers and 1c to the market administrator. Non-members will pay 4c all of which will be retained by the administrator, 3c of which will be put into a special fund to provide testing and quality-improvement services.

Farm Supply Refund

(Continued from page 16)

over $500,000 for the third consecutive year. Average refund received by member patrons was 14 cents on each dollar spent for Service Company products.

According to L. R. Marchant, manager of Illinois Farm Supply Company, the prospects of 1933 are brighter than in years. The addition of two new companies, one in Pike County and the other in Rock Island County now brings the total affiliated companies to 56. New bulk plants are being built throughout the state to facilitate service, around 40 new tank trucks are being added to the fleet now covering the state.

Farmers Creamery Co. Makes Splendid Showing

Dairy producers supplying the Bloomington market with milk wanted to be assured of a satisfactory market for their surplus milk. They knew of no better assurance than to have a creamery where they might separate their milk and churn it into high quality butter. Therefore, a plant was equipped and made ready to operate February 9, 1933. Since then they have had no trouble in disposing of their surplus milk, yet none of it has gone through the plant.

After the plant was equipped, cream producers were organized in LaSalle, Livingston, McLean, DeWitt and Logan Counties. From February 9th to November 30th the plant churned 834,571 pounds of excellent Prairie Farms Butter. To the patrons of that creamery and the community, it has meant approximately two cents per pound butterfat and to members 3¾c per pound butterfat. Here is the evidence.

For the corresponding months the butterfat price at Bloomington in 1933-34 on a 2c lower butter market was raised 2.11c per lb. nearer the Chicago butter market than the average for the two preceding years. In addition to this, members were given a one cent per pound credit on a share of preferred stock and patronage refunds of nearly a cent per pound fat.

Recently eight additional counties have been allocated to the Bloomington plant, therefore, this year the plant should process near 2,000,000 pounds of butter.

Producers Creamery of Peoria Big Success

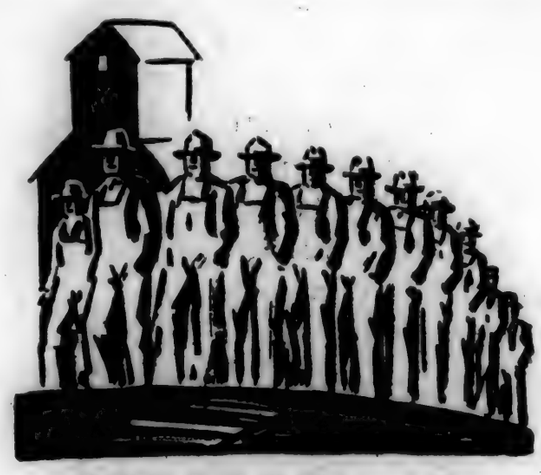
From May 1 to December 31, 1933, the Producers Creamery of Peoria made 834,371 pounds of fine Prairie Farms butter. Competitive prices were paid for butterfat and after paying all expenses at the end of five months, the association had given members credit on Class "A" preferred creamery stock, totaling $4,524.31, and made patronage dividends amounting to $3,393.10, or a total of $7,917.41.

From May to December every month showed an increase in membership. On the basis of the first eight months' operation, it is certain that the plant will make more than a million and a half pounds of butter when the plant has operated one year.

Creamery Districts Busy Financing New Plants

It's just a guess which plant will be ready to start operating first, Producers Creamery of Champaign, Olney or Mt. Sterling. Each district has one county that has raised its quota. All other counties are working tooth and nail. Douglas county in the Champaign district was the first to raise its cash quota and on March 8 the following wire was received: "Have our $2,500 on the barrel head —What shall we do with it?"

Lawrence county in the Olney district has raised its quota. There the producers cream committee has reported all stock sold, but that no report will be made to headquarters at Olney until the cash is in the office. Eight counties in the district have volunteer workers out selling stock and each group of workers is determined to have its "cash on the barrel head" at an early date. The Olney district may set the pace for the other districts.



In the Mt. Sterling district, Scott county is the first to raise its cash quota. All other counties except one have county and township committees selling stock.

Quincy Co-op. Dairy

Producers and Consumers Both Get A Break in Adams County

STRENGTH IN UNITY

WHEN dairy farmers work together and market their milk co-operatively they go places. And sometimes it doesn't make much difference whether or not the government steps in with a marketing agreement. If you don't believe it just consider the Quincy Co-operative Dairy out in Adams county, Ill. where the Mississippi bulges westward into Missouri.

Organized milk producers around Quincy who own their own plant and distributing business are getting $1.80 a hundred for 3.5 per cent milk that goes into the fluid milk and cream trade. Not so bad. And the Quincy housewife gets a break too—a high quality four per cent milk delivered to her door for eight cents a quart. If she wants a deeper cream line milk testing 5 per cent it costs only a dime.

But then in Quincy you don't see a half dozen varieties of milk wagons patroling the same block about breakfast time. Nor are there any middlemen between the producer and consumer taking 25 per cent on the investment.

13 Wagons

When you see a milk wagon or truck in Quincy the chances are it's one of the 13 owned by the Co-op. Dairy. These wagons don't just deliver milk and cream. They carry the whole line. Talk about the packers in Chicago using every part of the hog but the squeal. Well, down in Adams county, the Co-op. Dairy wouldn't think of running the skim milk down the drain, surplus or no surplus. It goes into bottles and the pails of customers who come after it. In the producers' modern, sanitary plant they not only bottle fresh milk and cream, but they also make butter, cottage cheese, ice cream, "400" (chocolate milk containing 2% fat), Five-O (chocolate milk no fat), Frisco cheese, cheese spread, and buttermilk.

The producers who own the Quincy Co-operative Dairy instituted the base and surplus plan of payment a good many years ago. They believe in a high base price and a low surplus price. So the base, which runs about 50 per cent of present receipts, brings $1.80 per cwt. for 3.5 per cent milk and the surplus brings butterfat price. Base for each producer is determined by his six years' average production leaving out April, May and June.

How It Started

Maybe you'd like to know how these Adams county dairymen got started running their own distributing business. Frank Gougler, director of produce marketing for the Illinois Agricultural Association, can tell you for he was county adviser down in Adams about 1920. Frank started a lot of good things when he was there.

"I was in the Farm Bureau office after closing time one evening," said Mr. Gougler, "when one of our Farm Bureau members came in swearing vengeance against another member for cutting prices and taking his customer. Both of these men were good friends of mine. Each was producing and distributing his own milk. It seems that one of the men had been delivering a sizeable quantity to the local hospital when suddenly his volume was cut in half or more. He soon learned that his neighbor had acquired the volume he had lost.

"I talked to this member until he cooled off a bit and promised him I would look into the matter," said Frank. "Then I called in the other man and got his story. Later I visited the hospital and learned that the head nurse had formerly taken milk from the second man until he ran short of milk. And when she learned later that he had extra milk to spare, and at a lower price, she asked him to leave some at the hospital.

"The upshot was that I made an appointment with both men and got them to come down to the office at the same time to talk it over. They came. We had a long session but before we got through the two men shook hands and agreed to work with me in setting up a co-operative milk distributing plant."

Too Much Waste

Albert Heckle, a member of the board of directors and a leader in the organization of the co-operative dairy from the beginning can tell you about marketing conditions at Quincy at that time.

"About 1920 the milk industry was in a very bad condition around Quincy," said Albert. "There was general dissatisfaction among producers. It was found after a survey that there were about 80 or 90 milk distributors averaging around 10 gallons per route. I mention gallons because that was the basis on which milk was bought and sold.

"The survey also brought out that about 50 per cent of the milk consumed in the territory was canned milk. It was plain that something would have to be done. So we went to the Adams County Farm Bureau for help.

"It fell to the lot of Frank A. Gougler who was then farm adviser, to see what could be done. Committees were named. It was finally decided to go all the way from the farm to the consumer. Such a plan was new and untried. We called on the I. A. A. for help and Chris Larsen, then director of dairy marketing (now dean of the South Dakota College of Agriculture), came down to advise us. If it had not been for the untiring efforts

of our farm adviser, Mr. Gougler, the Quincy Co-operative Dairy probably never would have materialized."

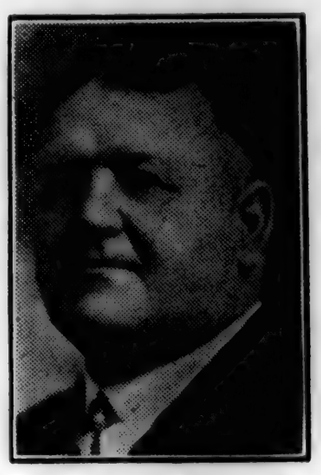
Selling the Stock

Money had to be raised to build a plant, buy equipment, and for working capital. They decided to raise $50,000. The I. A. A. agreed to furnish solicitors to sell the stock. All this happened right in the midst of the big post-war slump. Corn got down to 35 cents a bushel after selling for $1.50 only a short time before. The outlook was not encouraging. Nevertheless the solicitors kept at it until they sold $35,000 worth of stock to farmers. Then they called on local business men who made it $40,000.

With this money the producers bought a big garage 40 x 80 feet. They had to make repairs and put a new floor in it with the result that the money was all gone before they had their equipment. Then they went to Sam H. Thompson, who later became president of the American Farm Bureau Federation. He was connected with one of the local banks. They got a loan of $6,000 from this bank and the same amount from another bank. With this money they bought equipment and hired an expert plant man to supervise setting it up and acting as plant foreman.

Then they employed John A. Connery, better known as Jack, as manager. Jack had just been defeated for sheriff of Adams county. He had had considerable experience in the county treasurer's office, had acted as receiver on several occasions, and was a good business man. In addition he knew about everybody in town and was well liked.

A Good Start



The co-operative dairy got off to a good start under the management of Connery who subsequently served for nine years. By the end of the first year the business not only paid back the $12,000 it had borrowed from the banks, but also paid dividends on the capital stock. The dairy was soon able to retail milk at 10 cents and pay the producers a higher net return than farmers receive in any other market of comparable size in the middle west.

Mr. Connery left several years ago and the dairy is now managed by Mrs. Laura Johnston who has served as bookkeeper since the organization began. "Mrs Johnston is very capable and under her administration and with the assistance of our efficient plant superintendent, M. B. Crocker, we can still return more of the consumer's dollar to the producer than any other milk association we know about," said Mr. Heckle.

The co-operative dairy has 28 employes all working under the NRA code. Five trucks and eight wagons take care of the wholesale and retail departments. Each route has its section assigned. There is no over-lapping.

Chas. S. Black

CHARLES S. BLACK, of Jacksonville, member of the board of directors of the Illinois Agricultural Association from the 20th congressional district for the past six years and recently re-elected for another two-year term, was buried at Jacksonville Thursday afternoon, April 19. Officers, directors and several members of the staff of the I. A. A., and a large number of Farm Bureau leaders from the 20th district attended the large funeral held from the Methodist Episcopal Church in his home city.

Chas. S. Black

Mr. Black passed away following internal hemorrhages on April 17 in the hospital at Jacksonville. He was in Chicago attending I. A. A. committee and board meetings April 12-13 and was obliged to return home Friday on account of his illness. His condition became steadily worse following his arrival at Jacksonville.

As chairman of the I. A. A. Public Relations Committee, Mr. Black had been busy at the various sessions of the General Assembly in Springfield for several years. He became active in the Morgan County Farm Bureau early in its organization and served eight years as president. He belonged to a number of fraternal and service organizations in and about Jacksonville, was president of the State Anti-Thief Association and an officer in the national organization. During the past four years he served as president of the Illinois Farm Bureau Baseball League and was a director in other organizations affiliated with the I. A. A.

Mr. Black had a lovable, kindly, cheerful personality and made friends readily. He had a wide circle of friends among members of both Houses of the legislature and other men in public life, a number of whom attended the rites to pay last tribute to him. He had spent all his life operating his farm lands in Morgan county.

I. A. A. Opposes Move To Increase Taxes

AN INCREASE in the tax burden of farm and home owners of Illinois is proposed in Senate bills 23-24-25 which provide for doubling the state tax for blind relief after January 1, 1935, and an additional county tax of 10 cents per $100 of assessed valuation. The bills passed the senate April 17.

The I. A. A. in opposing the tax-raising measures points to a mandate from its 60,000 members in annual convention at Danville in January to the effect that the organization vigorously resist any and all further efforts to fasten additional taxes on the property owners of the state. The Association is not opposed to relief for the blind, but it is against continual efforts to increase the burden of property owners each time more revenue is needed.

Under the present law blind residents of Illinois are entitled to a pension of $365 a year. In some counties where tax collections are inadequate because of reduced assessed valuations, tax delinquency, or both, blind persons have not been getting the amount designated by statute. In some instances such persons have other means of support and do not need the pension.

For this reason the Illinois Agricultural Association has secured the introduction of bills to permit county boards to fix pensions for blind persons at a figure below $365 per annum, when in the opinion of the board such action is justified.

Mortgage Bills Pass

Final passage of the Devine chattel mortgage filing bills at Springfield on April 18 will result in reducing the cost and facilitating chattel mortgage loans. The bills will become effective immediately when signed by Governor Horner.

Under the new bills chattel mortgages may be filed at a cost of only 50 cents. Small additional charges are authorized for assignments, extensions, releases, etc. Under the old statutes recording fees range from $3 to $5 on the long form of chattel mortgage used by the Production Credit Associations, which borrowers must pay.

In addition to the support given by the I. A. A., Prairie Farmer, the State Department of Agriculture, and T. H. Fuller of the Farm Credit Administration co-operated in securing the passage of the new legislation.

Mobilization Campaign Ends

A SHARP upward trend in I. A. A.-Farm Bureau membership with a total of 13,394 new members signed from October 9, 1933 to April 1, 1934 was reported by Secretary Geo. E. Metzger to the I. A. A. board of directors who met in Chicago on April 13th.

This figure is based on reports received from the 94 County Farm Bureaus up to April 12 and do not include new members signed since the first of April.

In requesting membership reports from the counties it was specified that only new members should be reported whose dues were all or partially paid in cash.

Knox county led all others with 602 new members. Edgar and Livingston followed right behind with 568 and 523 members respectively. Other counties grouped in the 10 highest are as follows: Whiteside 356, Coles 349, Shelby 345, Woodford 343, Henderson 343, Morgan 299, and Champaign 298.

The mobilization campaign which was directed by the county captain supported by lieutenants working with him in nearly all the counties was marked by substantial collection of dues as well as new members. A number of counties which emphasized this part of the campaign made notable records, although for the most part large membership gains and substantial collections went hand in hand.

13,394 New Members Reported—Knox Leads with 602

The 10 high counties in cash collected during the six months' period are as follows: Livingston, Champaign, Woodford, Knox, Henry, Winnebago, LaSalle, Cook, DeKalb, and Lee.

As a result Farm Bureau treasuries as well as the state organization are in better condition to carry on a vigorous program of service than at any time in the past two years.

200 or More

In addition to the ten high counties in new members signed, those securing 200 or more new members include DeKalb, Lee, Stephenson, Peoria, Bureau, Henry, Menard, Iroquois, Vermilion and Macoupin.

Grouped according to organization districts, District III which includes the heavy grain and livestock producing counties of north central and western Illinois led all others with a total of 2,953 new members.

District V which includes central and east central Illinois counties in the north half of the state was second with 2,575 new members. District I in northern Illinois also gave a very good account of itself with 2,473 new members with all counties reporting.

The indicated new membership of 13,394 is conservative for it does not include reports from Warren and Pike counties which had not been received when the above figure was compiled. Both of these counties signed some new members and also participated in the collection campaign.

A complete record of the new members signed by counties is given below:

Total	13394

A significant feature of the drive in many counties is that many of the new members were signed by comparatively few men. For example, in Henderson county most of the 343 new members were signed by General Agent Bill Stevenson, Captain Otto Steffey and less than a half dozen lieutenants who worked with them. In Mason county Captain Leonard Keith and four or five lieutenants were largely responsible for signing the bulk of the 180 new members there. In other counties the local organization committees were successful in getting a large number of active lieutenants in the field. Solicitors with special training and experience or with an aptitude for presenting complete information to the prospect in a convincing way were most successful. Most of the men who worked were active farm operators without any special training in salesmanship.

Tazewell Going Strong

Geo. W. Deppert, captain of the mobilization campaign in Tazewell county, is responsible along with a loyal, hard-working group of lieutenants for signing 170 new members since October 9.

GEO. DEPPERT

The Tazewell County Farm Bureau was the first organized Farm Bureau in Illinois. The Kankakee County and DeKalb County Soil and Crop Improvement Association, which later changed their names to Farm Bureau, were the initial county organizations. Both were established in 1912.

Tazewell county has had one of the strongest Farm Bureaus in the state for many years and was perhaps the first in the state to make low cost Farm Bureau auto insurance available to its members.

A. F. B. F. Works On Foreign Trade Move

The executive committee of the American Farm Bureau Federation met in Washington April 11 at the call of Pres. Edw. A. O'Neal to consider the administrative program of reciprocal trade agreements with foreign countries. President Earl C. Smith of the I. A. A. attended the Farm Bureau session, also met with representatives of other farm groups who are working together through the National Agricultural Conference. The Farm Bureau is backing the program, headed by Geo. N. Peek, to reestablish foreign outlets for surplus farm products.

Knox Has Biggest Signup Since '21

Since the five-day campaign during which 18 men signed 280 new members, 17 more have been signed which brings the total for the two week period to 297, Farm adviser A. R. Kemp of Knox county writes.

Knox county led the state in the mobilization campaign beginning last October by signing a total of 602 new members.

"It was the co-operation of these solicitors, the Farm Bureau directors, and the men who drove them that made this record possible," writes Kemp. "This brings the total membership of the Knox County Farm Bureau to 1381, which is the highest membership we have had in this county since war times.

"The men who signed the highest number of members in this group are B. L. Baird with 34, Elmer Anderson 26, Roscoe Simkins 21, A. N. Skinner 20, A. L. Doubet 18, Reuben Johnson 18, Loren Johnston 18, Reed Gibbs 17, and Earl Johnson 16."

Livestock Producers Hit New High Records

During the week of April 7 to 13 the Chicago Producers handled a total of 446 cars of livestock which constituted 15.88% of Chicago receipts after deducting directs. This was a new record. Almost in the same mail came an announcement from Cincinnati Producers that they handled 51.17% of receipts on that market and 55.62% of the hogs.

Buffalo Producers report 50.3% of total receipts for the same week, another record.

This is a period of new records in cooperative livestock marketing. There has never been a time when livestock producers recognize more generally the necessity of cooperating in the marketing end of their business.

Frank Is A Real Farm Bureau Booster

When Frank Butler of Lee county joined the Farm Bureau he was so well sold on his organization that he turned right around and himself signed up 18 new members within two days. He followed up with six more in less than a week, making a total of 24 new members signed, reports Chuck Yale, farm adviser.

Will Mr. Yale or someone else in Lee county send us a picture of New Member Butler for the next issue of the RECORD.—Editor.

Here's A Service That Helps, Says Brissenden

New Farm Bureau members should not overlook an opportunity to use the I. A. A. transportation and claims service. It can help you. If you don't believe it ask L. F. Brissenden of Clay county.

Sometime ago Brissenden shipped a load of cattle from Chicago to Flora. The shipment was routed in such a way that the full rate would not apply and a combination rate over the junction point was charged.

Mr. Brissenden took the matter up with Guy Baxter of the I. A. A. who applied to the two railroads involved, requesting the establishment of a through rate via this route. Then application was made to the Illinois Commerce Commission for authority to the railroad to make a refund on this shipment. This authority was granted with the result that Brissenden received a check for $25.88 following which he wrote the I. A. A. as follows:

"Letter and check received. Many thanks for your kindness and perseverance in this matter. This shows what it means to belong to an organization that is on the job.

"I doubt very much if I ever would have made any settlement with the road. This alone is almost enough to pay my dues for two years. More farmers and members should know about this valuable service you are rendering."

CHAMPAIGN COUNTY CORN LOAN BOARD

Left to right: Roy Mitchell, vice-pres.; W. Z. Black, pres.; A. R. Grindley, sec'y-treas. Up to April 1, Champaign county had sealed approximately 4,460,000 bu. of corn for loans at 45c per bu. Nine sealers and three clerks in addition to the board have been kept busy serving Champaign county farmers. Champaign ranks near the top if not first in the amount of corn sealed.

Ask Grain Rate Cut

A request that lower freight rates on grain from points adjacent the Illinois river to Peoria be established as soon as possible was presented by the Illinois Agricultural Association and Illinois Grain Corporation at a hearing before Illinois railroad representatives in Chicago April 10.

Farmers' elevators in the Illinois River territory have complained that excessive rail rates on grain are handicapping them in moving shipments to Peoria. Considerably lower rates charged by truck operators and the Federal Barge Line have resulted in substantial movements of grain away from the elevators.

The rail rate from Varna in Marshall county to Peoria, for example, a distance of only about 50 miles, is nine cents per cwt. Trucks are hauling grain from that vicinity to Lacon and Peoria via truck and barge at a much lower rate. If this situation continues many farmers' elevators will suffer a big loss in volume of business if not total extinction.

The I. A. A. believes that farmers' elevators should be maintained as the basic unit in the co-operative grain marketing system. However, the Association is strongly in favor of reducing transportation costs to the farmer because such reductions are reflected in a higher net price.

G. W. Baxter, of the I. A. A., proposed drastic reductions in rail rates on grain as follows: 3c per cwt. up to 10 miles; 3½c from 10 to 25 miles; 4c over 25 up to 50 miles; 4½c over 50 and up to 75 miles; and 5c over 75 and up to 100 mi. Railroad representatives were told that they face a further substantial loss of volume and revenue unless they make sharp reductions in their rates.

Amateur Entertainment Features Lyceum Series

It's astonishing how much good amateur musical and entertainment talent there is around the state commented L. A. Williams, manager of Country Life Insurance Co., who spoke before 16 county-wide Farm Bureau gatherings during the past six weeks. General agents co-operating with Country Life Insurance Co. and the Farm Bureaus were given the job of bringing out the talent for the competition in the lyceum course series.

"We had singers, tap dancers, make-up artists, and piccolo, cornet, trombone, clarinet, piano, stringed instrument, and saxophone players, readers, quartets, and almost everything you could ask for in the entertainment line," said Williams.

"We started out to discover local talent and we judged the entries largely on their ability to entertain the folks, as well as on such qualities as poise, delivery, execution, and technical skill. It is our thought that we keep a record of the best entertainment talent in some central place and provide the Farm Bureaus with this information for use in meetings."

Silver medal winners were recently announced in "CLIC," Country Life's house organ. Gold medals will be awarded to the two state winners.

At each meeting, Mr. Williams spoke for more than an hour on the subject "Whither Bound," in which he dwelled on the opportunities and problems ahead of organized farmers.

Among the counties which participated in the lyceum series are Peoria, Marshall-Putnam, Lake, DeKalb, Henry, Boone, Ford, Vermilion, Piatt, Iroquois, Livingston, Hancock, McDonough, Tazewell, Moultrie, and Clark. Audiences averaged about 800 at each meeting.

Germany Limits Lard

Beginning with March, 1934 monthly imports of lard into Germany are being limited to 40 per cent of the average imports for the corresponding months of 1931-'33. This action will hit American hog producers hard because the United States for a number of years has had the bulk of the German market.

Lard imports to Germany from this country during 1934 may not exceed 65,000,000, whereas in the early post-war years Germany bought from us an average of 250,000,000 pounds each year.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

George Thiem, Editor
John Tracy, Ass't Editor.

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 S. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rate of postage provided in Section 412. Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Gas Tax Diversion

CONTINUED efforts to divert more gasoline taxes away from their intended purpose may prove to be a round about way of increasing the property tax load. Originally streets and roads were built and maintained by property owners out of property taxes. Many still are. The gas tax was enacted to change that indefensible system. It was a step toward property tax reduction. It placed the cost of building and maintaining roads on the people who use them. This is as it should be. Now as gas tax revenues are further diverted from their rightful use and roads and streets wear out, the tendency will be to increase taxes on property for highway improvement.

Gas tax diversion has another evil side to it. It stops road building and creates unemployment. A large number of family heads depend on this kind of work to support their families. It has been estimated that 22,500 men would be employed on road building and maintenance during the coming season on the $8,000,000 which pending legislation at Springfield would divert to other uses. Counting four to the family makes 90,000 people, many of whom may be forced on the relief rolls.

Gas tax diversion is another case of robbing Peter to pay Paul. It is makeshift government, wrong in principle and unjustifiable. Proposed use of gas tax funds for schools is another effort to impose on downstate counties the penalty for the many years of reckless tax waste and more recent tax delinquency in Chicago and Cook county. For if the $30,000,000 owing the state by the metropolitan area had been paid, the reason for previous raids on road funds and the current attempt would largely have been avoided.

The Way Out

IT REQUIRED the hardship of the last three years to arouse city home and real estate owners of Illinois to the need for a state constitutional amendment and an equitable taxing system. Had their organized support been given the Illinois Agricultural Association years ago when attempts were made to pass a proper tax amendment, recent chaotic conditions in state and local government might easily have been avoided.

Despite the general decline in incomes, the citizens of the state are still financially capable of maintaining the useful and needed functions of government. What's necessary, however, is an equitable distribution of the tax burden. The majority of our people, particularly city owners of intangible wealth and those receiving salaries, fees, and wages, own no real estate and pay no local and state taxes. For this reason taxes on real estate and some kinds of personal property have been unbearably high.

The situation calls for an early session of the General Assembly to submit a revenue amendment definitely limiting property taxes and permitting classification of property and income for tax purposes. Until the voters adopt such an amendment and pave the way for an honest taxing system, there will be a continuation of crises and make-shift efforts at Springfield to meet them.

Necessary to Recovery

"IF THE administration is to concentrate more on recovery and less on reform, a further bolstering up of agricultural prices is indicated," states M. S. Rukeyser, well known financial writer. **"Such a plan offers an avenue to success for the President's budgetary program for the next two years. It will enable private industry, commerce, and agriculture gradually to absorb men released from emergency public payrolls."**

This statement, presenting the point of view of many business observers, emphasizes the fact that the continuing disparity between the price of the farmer's products and the price of things he has to buy is responsible for continued unemployment. The farm situation everyone knows is much better than that of a year or more ago. Business and employment reflect that improvement. Yet there must be a further narrowing of the gap to equalize farm purchasing power and speed up exchange of farm and non-agricultural commodities.

As Mr. Rukeyser points out, **"To some analysts it appears that the untimely raising of industrial costs by the NRA aborted the rapid building of a solid foundation for recovery in the relative raising of depressed agricultural prices."**

SOME of our so-called dairy leaders make themselves look foolish when they assume in one breath that the proposed processing tax on butter will be borne entirely by farmers, and complain in the next breath that dairy farmers have had to help pay the processing taxes on cotton, tobacco, wheat, corn and hogs. Both statements can't be right, yet speeches more remarkable for their passion than for reason were delivered against the government program during the dairy hearing at Madison which contained such assertions.

Observations

When certain metropolitan newspapers shout about the freedom of the press what they really have in mind is freedom to follow the pet prejudices of their publishers and protect the vested interests of their advertisers. Ask any honest newspaper reporter what he thinks about the freedom of the press and he'll laugh right out loud if the boss isn't looking. He knows only too well, and sometimes from sad experience, that the paper he works for has "pets" and "policies," that it must not step on the toes of certain interests and people.

Many newspapers are controlled from their business offices. Editorial writers and reporters are not always privileged to follow the dictates of their own conscience or write as they see things. They get their orders from higher up and write accordingly. The financial pages of big dailies are often edited to please the banks, brokerage and investment houses, commission men, and others who contribute thousands of dollars annually through advertising in normal times to their support.

Real freedom of the press would be a wholesome thing in America. The man in the street would glory in it. No patriotic citizen who has given the matter any thought wants to see real freedom of the press curbed or abolished. They would like to see it restored. The downright thievery and skullduggery practiced by big bankers, investment houses, utility magnates, real estate operators, and corporation executives during the boom days seldom drew a word of criticism from big newspapers. Their financial editors must have known what was going on. Yet they seldom protested. The publishers played the game and took their percentage through advertising along with the rest.

Whether true or not, it was frequently reported that under the old tax-fixing regime in Chicago, certain daily newspapers exchanged political support for low assessments, and vice versa bitterly attacked any men in public life they could not control. The editorial writer may have his ideals but the publisher or business manager is practical. The rank and file of newspapers today are primarily in the business of making a proft. In fairness let us say that there are still many that try to serve the public interest, at least that public comprising the bulk of their subscribers. But profit comes first and that means there are certain people in every city who must not be offended.

If the freedom of the press is ever disturbed by the popular will of the people expressed through the congress, it will be because of the abuse of the privilege by newspapers themselves; because the immense power and influence they wield on the public mind and morals is used for personal ends rather than for social welfare.—E. G. T.

FARM ADVISER RAY C. DONEGHUE OF McDONOUGH COUNTY, LEFT, IS CONGRATULATING H. B. Smith for winning the 1933, 10 acre yield corn growing contest of Illinois. The contest was sponsored by the University of Illinois, College of Agriculture.

Mr. Smith's 10 acre field yielded 99.1 bushels per acre, whereas the average yield of the next 10 contestants was 85.1 bushels. The total cost per acre of this crop was computed at $20.56 or 21 cents per bushel of corn produced.

Call On Pres. Roosevelt

President Edward A. O'Neal and Secretary Wallace recently called on President Roosevelt and spent an hour with him discussing tariff problems.

"We have the President's assurance that he will give proper protection to American agriculture in tariff reform," said Mr. O'Neal, following the meeting. "I agree with the philosophy of Secretary Wallace that reduction of surpluses in line with natural needs, plus a greater outlet for farm surpluses, offers a sound and constructive attack on the farm problem.

"Agriculture is setting great store by the work undertaken in Washington to restore world trade, by our good friend George N. Peek, just appointed by the President as Special Adviser on Foreign Trade, to assist him in promoting foreign markets. Mr. Peek is endeavoring to speed up the movement of commodities between us and foreign nations."

McDonough Champion Corn Costs 21c Per Bu.

Among its many activities the Farm Bureau encourages more efficient production which means higher yields on fewer acres. And the record made recently by a McDonough County Farm Bureau member, H. B. Smith, in winning the state corn yield contest is an example of the effective work the Farm Bureau and its members are doing in improving farm production.

Mr. Smith got a yield of 99.1 bushels per acre in a 10 acre field. The total cost of producing the 10 acres of corn was computed at $205.60 as follows:

Growing	
Man labor	$ 9.12
Horse labor	11.16
Machinery expense	6.00
Seed	2.63
Manure, fertilizers and limestones	75.80*
Misc. and overhead	6.27
Total growing cost	110.98
Total harvesting cost	19.82
Cost of growing and harvesting	130.80
Taxes	12.30
Interest on land at 5%	62.50*
TOTAL COST	205.60
Total cost per acre	20.56
Cost per bushel of corn	.21

* In 1933 the fertility charge was made for nitrogen, phosphorus, and potassium removed from the soil by corn. Land valued at $125 per A.

The fact that the Farm Bureau has maintained a seed corn testing service for many years has been helpful to McDonough county farmers in growing larger yields of corn on fewer acres at lower cost.

Ol' Joe Green

I

Good mornin' John! Yer jest too late
To see Ring put a feller out the gate.
He's another one o' them corn-hog men,
A spludgin' 'round with a fountain pen,

Ol' Joe

A tryin' to trick me into co-operation;
But I've heard all about t h e i r baitin,'
And I'm one bird that they can't fool
Fer I'm as shrewd as an adult mule.
I asked 'im how he'd got his job,
And if he b'longed to the graftin' mob,
Then I up and told 'im goodin' ruff
I wuz tired uve this here government stuff;
And they wuzent a guverment anywhere
That could tell me as how I didn't dare
To raise all the pigs that Old Bess had
Er plant the forty in corn, by-dad.
I guess he thot I ment what I sed
Fer he just kindy shuck his head
And sed that hit was awful funny
Fellers like me didn't need the munny.
But ye see I know'd where he got his
And if I didn't sign hit'd hurt his biz,
Then I spat and told 'im to his face
That me and Jake would run this place.

II

Now Joe, why don't you think a bit
'Stead a braggin' and blowin' about yer wit.
Your ignorance has filled ye full of fears
You'v got yer thumbs poked in yer ears
So you can't hear the facts at all
When on yer old flat head they fall.
If you'd sit up tonight and think
Tomorrow you'd be a different gink.
Where will yer figgerin lead ye to?
I'll betcha that never occured to you
All yer work don't help yer none,
Why don't ye rest and have some fun?
We'll eat this surplus up, by Joe,
Then when we work we'll make some dough.
Ever hear uve the man with a dozen kids
How he put wisdom 'neath their lids
With a bundle uve sticks they failed to break
Then up the old man wisely spake,
Long as you lads stand hand in hand
You need fear no enemy in the land.

—Harry B. Claar

Knox County Farm Bureau's New Building and Modern Service Station Dedicated Recently

THE front office of the building downstairs contains desks and files of stenographers and clerical help. Following down the corridor to the right is the farm adviser's office, assistant's office, insurance department, auditor, mimeograph and addressograph room and directors' meeting room.

On the north side of the building as one enters is a ladies' rest room. Following down the hall on the left is the Knox County Oil Company's office, a storeroom and a small meeting room being used for the corn and hog program.

On the second floor an auditorium seats between 500 and 600, has a stage at the front end of the building and an entrance in the rear of the building. There is a full basement which houses the office and laboratory of the Galesburg Pure Milk Association. The basement also contains the boiler room, seed-corn testing equipment, seed-corn storage room, etc.

The building is constructed chiefly of brick, concrete and steel and is substantially fire proof. A large parking space in the rear of the building is available for members.

The total cost of the building, including heating and plumbing equipment, was $15,863.96. The furniture and other equipment brought the total to approximately $17,500.

The building was made possible through the efforts of the board of directors who started some 12 years ago on a planned budget system setting aside small amounts each year to erect such a building. The new structure and its equipment will be entirely paid for out of savings without indebtedness on the property.

The present board of directors is as follows: James McKee, Harry Gehring, Harold Roberts, H. S. Brown, T. J. Sullivan, H. B. Behringer, Roy Patty, Robert Gibbs, Edwin Gumm, S. E. Ecklund, L. E. Olson, A. L. Doubet, A. J. Ryden, K. V. Lacy, Jesse Arie, B. L. Baird, C. M. Hunter, Guy Routh, Ira Moats and Bernard Mathews.

The building committee that supervised the building consisted of T. J. Sullivan of Galesburg, Ira Moats of Maquon and Guy Routh of Hermon.

Wool Grower Who Sells At Any Price Breaks the Market

The wool grower who is willing to sell at any price is the culprit who breaks the market, according to the National Wool Marketing Association. If all the wool in the United States were shipped east on consignment in the hands of dealers, and the National prices could be held where they are, there would be a real opportunity to raise them.

"It is not our policy," states the corporation, "to come out and tell the wool growers that wool is going to be a good deal higher in order to secure consignments. None of us can definitely predict the future. We do feel that the growers have had sufficient proof that the National can and does market its holdings to return the growers the highest prices.

"It is folly for a wool grower to try to pick the year he will consign and the year he will sell. As a rule those who attempt it pick just the wrong year. Those who consign every year and support their own organization are bound to win on the average."

A Remarkable Co-operative

Illinois Farm Supply Continues Record-Breaking Pace in Serving Members

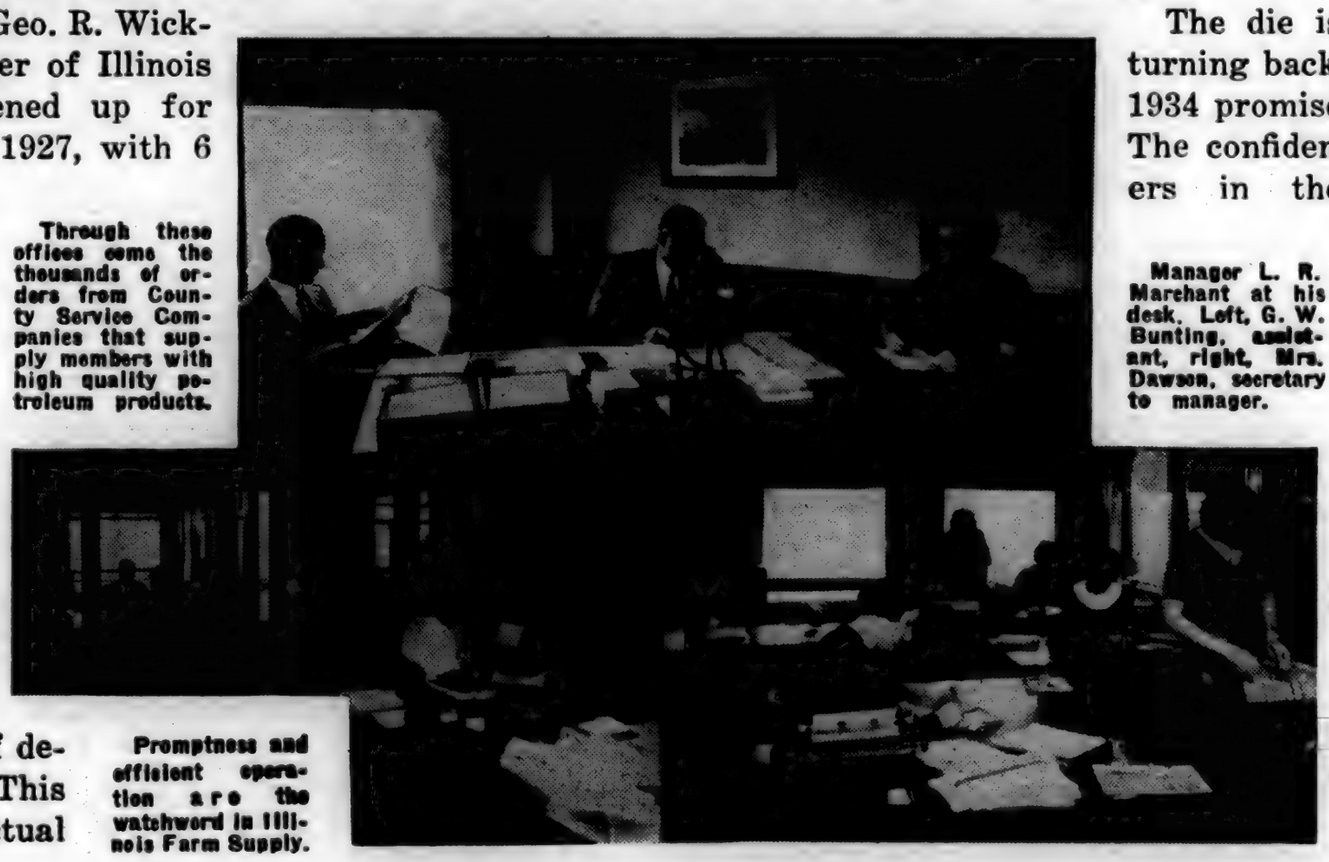
BORN of an idea, with all the marks of success at the very outset, Illinois Farm Supply is now well into another record breaking year which promises to eclipse last year's remarkable business, and firmly intrench the company as the largest state petroleum co-operative in the United States. According to L. R. Marchant, manager, Illinois Farm Supply has handled 21,675,240 gallons of motor fuels for the seven-month period ending March 31, 1934. This total includes 15,258,287 gallons of gasoline, 4,425,971 gallons of kerosene and 1,990,982 gallons of distillate and fuel oil—a new record for the period.

April will be the greatest in the company's history. With more than a train load of motor fuels a day being delivered to the affiliated companies, the first 3 weeks of April 1934 exceed the whole of tank car shipments in April 1933.

Motor oil shows a 44 per cent gain over the corresponding period last year with a total of 756,245 gallons. Grease sales total 472,356 pounds, a gain of 17½ per cent. Leading the field in percentage of increase is Soy-oil Paint which is 316 per cent ahead of last year, the current volume being equal to a carload every three days. Brunswick tire sales are also on the increase, the 6,338 tires handled during the seven-month period being double the tire business last year.

Grows Fast

With each year outdoing the previous one by a good margin, Farm Bureau members have become accustomed to announcements of Farm Supply's rapid growth. On the basis of the last year's business it is hard to imagine that when Geo. R. Wicker, the first manager of Illinois Farm Supply, opened up for business March 7, 1927, with 6 county companies, that by the end of the year there were 11 affiliated county companies which handled 2,102,970 gallons of gasoline, 1,112,508 gallons of kerosene, 106,076 gallons of lubricating oils, 48,236 pounds of greases and 2,471 gallons of denatured alcohol. This was for the 6 actual business months remaining in the year. The next year, 1928, about twice the business was done. Dividends amounting to $11,239.71 were paid to affiliated companies. Everybody was feeling pretty good. There were now 16 affiliated county companies. The year 1929 saw some changes. Mr. Wicker left to go into business for himself. L. R. Marchant came from Galesburg to assume the managership. Business was getting better. Patronage dividends took a decided jump. There were now 21 affiliated companies. More counties were organizing. The depression hit the country. Farm prices dropped like a plummet. Yet, Illinois Farm Supply went its record-breaking way. By the end of 1931 there were 47 companies, with a resulting increase in sales. New products were added. Came 1933, and a $6,000,000 business. More than 40,000,000 gallons of petroleum products were distributed through 54 County Service companies. Since 1927, more than $324,000 has been paid in dividends to member companies by Illinois Farm Supply. These dividends contributed greatly to the $500,000 in patronage dividends returned to member patrons for the third consecutive year.



Today, 1934, 56 affiliated companies serve every county in the state with the exception of Sangamon and Cass. A far cry from the original 11. More business is now done in a month than the whole of 1927. More than 425 tank trucks travel the highways daily. Better than 500 retail outlets dispense Illinois Farm Supply products to members and non-members in towns and countryside. Bulk storage plants numbering more than 145 speed up service to patrons.

The value of Illinois Farm Supply and its 56 affiliated companies does not stop with quality, service, and low cost in petroleum products. Not just a purchasing organization to pass along quantity price savings to patrons, the advent of this powerful farm co-operative has wrought great changes in the products and methods of doing business of privately-owned petroleum marketers. For many years previous to the coming of Farm Supply, Farm Bureau members were paying high prices for inferior petroleum products. Today, the whole quality level has been raised for the prime reason that Farm Supply quality forced competition to improve. The enormous purchases of the company not only place it in a strong bargaining position from the standpoint of price but assure member patrons of strict maintenance of highest quality.

Built on Confidence

Thus, from an idea, a dream, the determination of Illinois farmers to improve their buying conditions has resulted in fulfillment. Illinois Farm Bureau members can point with pride to Illinois Farm Supply and its 56 affiliated companies. They can set it forth as the finest example of its kind in co-operative, organized action, and what unity can accomplish. Those who closely study the trend of the times, see in Illinois Farm Supply the forerunner of similar properly conducted co-operatives in other parts of the country.

The die is cast. There is no turning back. Good as 1933 was, 1934 promises to be even better. The confidence of Illinois farmers in their own company is firmly established. That confidence will not be taken lightly. It is the structure upon which Illinois Farm Supply and the wide-awake County Service Companies will continue to render outstanding service to Illinois Farm Bureau members.

Through these offices come the thousands of orders from County Service Companies that supply members with high quality petroleum products.

Manager L. R. Marchant at his desk. Left, G. W. Bunting, assistant, right, Mrs. Dawson, secretary to manager.

Promptness and efficient operation are the watchword in Illinois Farm Supply.

Cites Big Growth In Cost of Distribution

Numbers of Workers Engaged In Processing And Distribution Greatly Increased

The tremendous increase in the cost of distribution of farm products during the past 40 years was reviewed by Dr. Mordecai Ezekiel, economic adviser to Secretary Wallace, in a recent address to Eastern retailers at Boston.

In the 40 years from 1890 to 1930 farm workers increased hardly at all, he said; workers on farms and in factories combined increased from 15,000,000 to 25,000,000; but the number of persons engaged in trade and transportation increased from 3,500,000 in 1890 to 12,000,000 by 1930—from two workers in distribution for each ten in fiscal production in 1890, to almost five in distribution for ten in such production in 1930.

During the 40-year period the number of workers in fiscal production increased by 80 per cent. Workers in the professions and other service occupations doubled, and workers in trade and transportation almost quadrupled.

From 1890 to 1913 the farm price of foods increased 36 per cent and the retail price of foods almost 70 per cent.

Farmer's Portion Cut

Thus, with a materially decreased selling price since the current depression set in, and a substantially maintained margin by distributors, the portion left for the farmer was sharply reduced.

Although the retail prices at which food products sold declined only 35 per cent between 1929 and 1932, the prices received by farmers for food products declined about 55 per cent. Grocers received 65 per cent as much as formerly and the farmer only 45 per cent as much.

Ezekiel asks the questions: Should we not begin to develop a decentralized type of production with much smaller units of plants and equipment and selling its products through simpler means and nearer to the point of production?

Might it not be desirable for more men to engage in such decentralized production?

Might not standards of living be higher all the way around if we so organize production and distribution that we again have a large majority of the population in the country engaged in production and only a small proportion engaged in transportation and selling?

Emergency Crop Loans

The St. Louis Federal Land Bank reports that farmers who cannot qualify for credit elsewhere may apply for an emergency crop loan through the local office. Farm Bureaus are receiving such applications. A fund of $40,000,000 was recently appropriated by congress for this purpose. The maximum loan which will be made this year to any one farmer is $250 and the minimum is $25. The interest rate is 5½ per cent per annum. To be eligible a farmer must be a co-operator in the AAA production control program.

A farmer applying for a loan of $150 or more must first make application to the Production Credit Association serving his county. Rejection of his application will be considered sufficient evidence that other credit is not available and the farmer may then make application to the emergency crop loan office.

Production credit associations have been established in the following cities in Illinois: Amboy, Anna, Belleville, Bloomington, Carlinville, Carmi, Carrollton, Champaign, Charleston, DeKalb, Paxton, Galesburg, Geneva, Harrisburg, Havana, Centralia, Jacksonville, Joliet, Kewanee, Lincoln, Pontiac, Macomb, Decatur, Aledo, Monmouth, Mt. Vernon, Oregon, Ottawa, Pekin, Pittsfield, Quincy, Robinson, Rock Island, Shelbyville, Springfield, Danville, Watseka, Wheaton, and Woodstock.

The federal land banks are now offering land bank bonds in place of cash in refinancing farm mortgages. The bonds are guaranteed by the government both as to interest and principal. They bear 3¼ per cent interest.

Walter L. Rust, president of the St. Louis Land Bank, states that the most recent report shows the bid price on these bonds was 101 and offered 101½. He states that signed agreements to accept the bonds in lieu of cash are being received by the land bank at the rate of more than 500 per day.

Corn-Hog Contracts

It is estimated that around one million corn-hog contracts will be signed when the campaign is completed. Illinois is expecting to deliver about 125,000 contracts, 110,000 of which were reported signed several weeks ago. Iowa reports 160,000 contracts signed. The first contracts have been received in Washington. The administration hopes to begin sending out first benefit payment checks soon.

It's Up to the Livestock Growers To Do This Job

A man from the St. Louis Producers recently called on 141 Adams county farmers, 29 of whom were shipping 100 per cent of their livestock through the Adams County Shippers Association which markets all livestock received through co-operatives. Thirty-seven sent 100 per cent of their livestock by truck direct to the St. Louis Producers and 75 were just not going any place—mostly to old-line firms and direct to the packers. Fifty-three of the 75 farmers visited never shipped anything through co-operative channels, and 22 shipped a few head co-operatively sometime during the past.

"We are of the opinion that the producers themselves must eventually sell their neighbors who are non-cooperators if we are to obtain 50 per cent or more of the livestock during 1934 through co-operative channels," concludes the marketing committee of the Adams County Farm Bureau.

Quality Milk Meeting

At the Le Claire hotel, Moline, on Saturday night, March 31, several hundred members of the Quality Milk Association voted in favor of leaving its Class B stock with the Illinois Agricultural Association. Secretary George E. Metzger stated that if it was the wish of the members that the I. A. A. step out of the picture it would do so. When President F. H. Schafer put the question, the members voted to maintain the present relationship. The Illinois-Iowa Milk Producers have been opposing government licensing of milk dealers and a higher price to the producers on the ground that the "B" stock setup was a bar to a merger of the two groups. Many Quality Association members believe that the I and I group is dominated by certain dealers who feel that if the Farm Bureau and I. A. A. withdraw the distributors can soon reign again as market dictators.

All directors of the Quality Milk Association were re-elected.

Manager Frank Watson reported that the Association handled 29,490,258 pounds of milk in 1933, 32 per cent of which was sold in Class 1. The surplus plant handled a little more than 10,000,000 pounds.

The Association has invested approximately $13,000 in equipment in its plant, all of which is paid for. Neither the Quality Milk Association nor its subsidiary have one dime of indebtedness against them.

Farmers Mutual Reinsurance Company

No_____

October 13,1933

PAY TO THE ORDER OF Ben Graf $2109.05

EXACTLY $2109 & 05 CTS. DOLLARS

Ben Graf was mighty glad to get this check last fall. You would be too.

THIS CHECK MUST NOT BE CASHED IF DETACHED FROM THE RECEIPT OR IF THE RECEIPT IS NOT SIGNED BY THE PAYEE

Farmers Mutual Reinsurance Company

No._____

October 13,1933

TO THE ORDER OF J.W. Ovitz $1500.52

EXACTLY $1500 & 52 CTS. DOLLARS

J. W. Ovitz had his harvest money after all. You can too.

CONTINENTAL ILLINOIS NATIONAL BANK AND TRUST COMPANY OF CHICAGO (2-3) CHICAGO, ILLINOIS (2-3)

FARMERS MUTUAL REINSURANCE COMPANY

Mina Tumulty
ASST TREASURER

A GOOD HARVEST IN SPITE OF HAIL!

Suppose hail destroyed your crops this year. Wouldn't you welcome a good, big, check like the ones that went to Ben Graf and J. W. Ovitz? Instead of a total loss, these two men and hundreds of others had a good harvest in spite of hail!

HAIL PLAYS NO FAVORITES

This year hail may strike your crops, robbing you of the money you need to live on. Hail may even cost you your farm. It's better to be protected—when protection costs so little.

DO AS GRAF AND OVITZ DID

At a cost of but $4 a thousand now, insure your crops against hail loss in Farmers Mutual — **your own company.** In the fall when your harvest is in, the small balance of your premium is due and payable.

$4 A THOUSAND NOW!

BALANCE AFTER HARVEST

The initial payment protects your crops during hail season. The balance of the premium due and payable in October, when you have your harvest money.

INSURE NOW AT ACTUAL COST!

CLAIMS CHEERFULLY, PROMPTLY PAID

If your crop is totally or partially destroyed, you get your check from Farmers Mutual. If no hail loss has occurred, you have paid only a small premium for the protection.

INSURE NOW AT ACTUAL COST

Farmers Mutual insures at actual cost. A strong, reliable, legal reserve, farmer-owned and controlled institution, your company has more than $57,000,000 hail, fire and wind insurance in force. Ample reserves and re-insurance assure prompt payment of claims.

SEE YOUR COUNTY FARM BUREAU NOW FOR COMPLETE DETAILS. ALSO, ASK ABOUT FIRE AND WINDSTORM INSURANCE AT ACTUAL COST!

State Seed Corn Winner Used Farm Bureau Testing Service

Clarence Watson of McDonough county who won first prize in the Utility Corn Show at the last Farm and Home Week in Urbana, was the first secretary of the McDonough County Farm Bureau and later became president. He was one of the first farmers in the county to take an active interest in the corn improvement program when the project was launched by McDonough County Farm Bureau. Before that time he had been following out a permanent soil fertility program and also had been doing some corn breeding work.

He has been a consistent patron of the seed corn testing laboratory the County Farm Bureau established at Macomb in 1925. Careful and consistent seed corn testing and selection, made possible by the McDonough County Farm Bureau, was helpful to Mr. Watson in winning the title of Illinois Corn King.

McDonough county also produced the winner of the 10-acre yield contest in Illinois last year. H. B. Smith of Bardolph won this contest with a yield of 99 bushels.

Clarence Watson, Farm Bureau Member of McDonough County, who won First Prize on his 10 ear sample of Utility Type Seed Corn during Farm and Home Work of the Illinois College of Agriculture, Urbana. Mr. Watson is shown pointing to McDonough county on the Illinois map. He used the seed corn testing service of the McDonough County Farm Bureau to help him develop high yielding, disease free corn.

What's In A Name?

Quite a lot when some patron of a Producer Livestock Commission agency fails to get his returns promptly or at the end of the year gets no refund or a refund on only part of the livestock consigned. The explanation for a lot of the difficulties of this sort is simple.

One consignment of hogs may go in the name of John L. White, the next Jack White. A later shipment may be in the name of J. L. White and still another John White. This situation often delays the check at the local post office. Instances have been known where a check has lain in the local post office for days or even weeks because the postmaster did not recognize that Jack White might have been John L. White.

Trouble is always encountered at the end of the year when Producers Associations make up their refund checks. During the corn-hog signup complaints were made by shippers who were mistakenly given credit for only a part of their hogs. It will save a lot of confusion if every farmer makes it a rule to send his livestock to market always using exactly the same name and initial.

Lime and Legumes On Contracted Acres

Smart Illinois farmers are spreading limestone and sowing their contracted acres to sweet clover, alfalfa, and other legumes for three reasons: to improve the soil, stop soil erosion, cut production costs by upping yields.

The University of Illinois reports that around one-tenth of Illinois crop acres will probably be retired this year through the corn-hog and wheat programs. This land should not be allowed to wash. It won't wash with a stand of clover on it.

At the Dixon field, says A. L. Lang, sweet clover on a limed soil of good productivity, when rotated with corn, oats, and wheat and plowed under as green manure, improved the corn yield 17 bu. an acre annually as a three year average.

It takes just about as much work to grow a 40 bu. corn crop as a 60 bu. crop. The extra 20 bu. makes the difference sometimes between profit and loss.

Call your Farm Bureau and order limestone for those idle acres if they are acid. Your farm adviser will be glad to test soil samples delivered to the office. Sow alfalfa in July, or sweet clover in the corn field at the last cultivation to be plowed under as a green manure crop later. Soybeans, too, will yield better on sweet soil that has been limed. In Randolph county manured soil yielded only 340 pounds of soybean hay per acre but when limestone was added (light gray silt loam) the yield of bean hay was 1,700 pounds.

I. A. A. Board Action

The I. A. A. board recently approved a proposed membership card to be given to members on payment of dues. The board also authorized the executive officers to negotiate limestone contracts with quarry operators, to center purchases of agricultural limestone in the Illinois Farm Supply Company.

NRA Boosts Printing

The minimum price of stereotype cuts like those supplied County Farm Bureaus by the I. A. A. cartoon service has been raised under the graphic arts code from 15c to 77c each. Similarly the cost of copper and zinc engravings has been increased from 25 to 50 per cent depending on size. Printing likewise is much more expensive as a result of minimum NRA wages and increases in the cost of paper stock.

"I'm Going to Do what I Want to Do!"

BOB JENKINS dropped the dipper back in the pail and mopped his brow.

"Look at 'em," he said pointing to the highway. "There they go. Having fun, while I stay here and sweat away to a shadow. But one of these days I'm going to do what I want to do. I've got it all fixed. When I'm 65 I'll have me a nice, fat check coming in every month. A pension.

"I've worked hard all my life—given up a lot of pleasure when I was young so's I could own a real farm. Now I've got it. It's mine. And one of these days I'll turn it over to the boy and go do what I want to do.

"I'm 50 now. When I'm 65 I'm going to say, 'Bob! There's the world, here's the money and let's go and see what's been going on around the country.'

"I've always wanted to see Cuba or South America. Never been able to take the time or money from the farm to go. Maybe I'll go to California and see the orange groves. Maybe Ma and I'll take that honeymoon to Niagara Falls we never took. We'll have money enough to do it, with a pension check coming regular every month.

"Ma says she wants to get a little place in town near daughter. I'd like that. I know a lot of sociable people in town. Perhaps a couple of us men will get a fishing cottage somewhere and get off by ourselves without the womenfolk. Maybe I'll just spend my days sitting and reading. Anyway, I'm going to do what I want to do.

"I've always wanted to spend a summer up in the mountains. Sort of got the idea after seein' a travel picture showing a lot of old boys riding nice horses in a big forest and up steep trails in Yellowstone Park, and Glacier Park. Maybe I'll do some of that. I'll be able to afford it. I understand that Ma and me could take a boat trip on the ocean about as cheap as staying home. Well—maybe we'll do that too. Maybe I'll catch up on a lot of sleeping. If I want to, I will.

"You know, since I got it all fixed up, the sight of these people going by the house having fun isn't so hard to take. I just say to Ma, 'Won't be long now before we'll be taking off for a jaunt will it? And we'll do just what we want to do won't we?' And she smiles all over. Then, I'll sometimes catch her looking at me kind of questioning like, and I know what she's thinking. But I've got that fixed too. She'll have the pension then—and I know she'll go do all the things we were planning on doing. Just like I was with her.

"But—that's no way to talk, with me hale and hearty as I am. When I'm 65 I'll be ready to have some fun. I'll have the money too. Regular, every month. What if land or corn prices are down! That won't make any difference. Because I'll have my chunk of whatever Uncle Sam is using for money coming to me every month to spend how I want to.

"Sure you can get a 'farmer's pension.' You're as well fixed as I am and needin' fun just as bad. Tell you what—you go see the insurance man at the County Farm Bureau. Tell him you want a 'farmer's pension' like I'm getting.

"And now you'll have to excuse me. I got to finish up." Bob Jenkins was back on his tractor. "But you can bet, mister, that one of these days I'm going to do what I want to do." Country Life Insurance Company, 608 South Dearborn St., Chicago, Illinois.

"I'm not rich," said Bob Jenkins to the Farm Bureau insurance man, "but I want a set amount coming in each month after I'm 65 that I can handle now." So the insurance man fixed him up with a "farmer's pension." It won't take but a few minutes for you to get all the details. There are a lot of so-called "pensions," so be sure and ask about the "farmer's pension."

I. A. A. Aids In Getting Lower Utility Rates

Believes There Should Be Standard Charge For Light And Power Service

REDUCTIONS in light and power rates recently announced by a number of utility companies operating in Illinois follow efforts over a period of several years by the Illinois Agricultural Association and various County Farm Bureaus to secure reductions for rural users.

Early last year the Illinois Commerce Commission cited many public utility companies to show cause why the rates charged for electricity should not be reduced, states G. W. Baxter, director of transportation. Hearings have been held in connection with various companies and this department, working through the Illinois Commerce Commission, has assisted in furnishing data and other information in connection with rural rates. The companies making rate reductions are as follows:

From $9 to $6

Central Illinois Public Service Company reduced the minimum from $9 to $6 for a period of two years and thereafter $3 based on a rate of 9c per kilowatt hour for all electrical energy used in each month for 3 kilowatt hours per room; 8c per kilowatt for the next 4 kilowatt hours used per room per month; 5c per kilowatt hour for the next 5 kilowatt hours used per room per month; and 3c per kilowatt hour for all additional used. This is the rate used in cities. It is beneficial to the small user. An additional 3c block is also added where heretofore it was 5c.

The present $9 per month minimum, which includes 150 kilowatt hours per month and all over 150 kilowatt hours 3c per kilowatt hour, is continued in effect because that basis, where actual energy is used, will produce a lower charge than based on the other rate.

The Central Illinois Electric and Gas Company after conferences with the I. A. A. and the Illinois Commerce Commission reduced their minimum from $9 to $5 per month.

The Illinois Power and Light Corporation reduced the minimum on company financed lines from $9.00 to $6.00, and customer financed lines to $4.00 with a rate of 9¼c per kilowatt hour for the first 50 kilowatt hours and 3-1/10c for all over 50 kilowatt hours.

The Sherrard Power System (Henry and Rock Island counties) reduced their rates after several conferences from 15c for the first 60 kilowatt hours to 10c for the first 50 kilowatt hours; from 10c for the second 60 kilowatt hours to 5c for the next 40 kilowatt hours, and from 5c for all over the first 120 kilowatt hours to 3c for all over 90 kilowatt hours.

There are other companies yet involved, such as Public Service Company of Northern Illinois; Illinois Northern Utilities, and Western United Gas and Electric Company, on which hearings are either in process or yet to be heard. These companies are making a determined fight to prevent any reductions in their present revenues.

Absorb Tax

Effective September 1, 1933, the three percent government tax which had been paid by the customer was absorbed by the utility companies, and the two percent state sales tax which is to be absorbed or paid by the companies is now under litigation to determine the legality of this charge. If they are required to pay that, it will mean an additional five percent which the companies will have to assume. They claim they will not be able to operate at a profit if any further reductions are made.

The Illinois Commerce Commission has employed expert utility accountants to assemble data to present at these hearings. It will be noted that there are various rates and minimums applied in connection with the various companies. The I. A. A. believes there should be a standard rate and minimum for rural electrification.

"I will join with farmers in fighting to the last ditch any attempt that will be made to cripple the principle and practice of co-operative marketing. We of the farm belt should stand shoulder to shoulder against all such attempts; we should not allow ourselves to be turned aside from the goal by arguments, nor even by possible failure of some co-operative movements and some co-operative associations, to accomplish that goal."
—Senator Arthur Capper of Kansas.

As a result of a recent swapping agreement between the United States and France the latter country took one million barrels of apples from the United States in exchange for an increase in the quota of French wine imported into this country.

Land Bank News

The Farm Credit Administration of St. Louis recently came out with the first issue of its new official organ the "St. Louis Farm Credit Administration Record."

The publication follows closely the editorial make-up of the I. A. A. Record.

Interesting news published in the opening number states that the Land Bank had loaned $40,650,100 in the ten months ending Feb. 28, 1934. This includes 14,028 land bank and commissioner loans.

On March 17 Production Credit Associations now organized in Illinois, Arkansas and Missouri have approved 2,302 loans for $1,297,949.23. These loans are discounted through the intermediate credit bank. The loans approved represented 72 per cent of the applications submitted.

The interest rate on short-term production loans obtained through the Production Credit Associations was recently reduced from six to five and one-half per cent, but the borrower must subscribe for stock equal to five per cent of the amount of money borrowed, also pay inspection and recording fees on the chattel mortgage.

Co-operative associations eligible for loans may borrow from the St. Louis bank for co-operatives at three and one-half per cent interest on working capital loans and four and one-half per cent on facility loans.

During 1933 the Federal Land Bank of St. Louis sold 632 farms for a little over $1,600,000. Fifty-one per cent of these farms were purchased by city and town residents. The farms are offered on terms of 25 per cent cash and the balance in a 20-year amortized loan. Last year 83 farms were sold for all cash, one investor paying $72,000 in cash for several farms.

Peoria Buys Building

The Peoria County Farm Bureau recently bought a two-story brick building at Madison and Fayette streets in Peoria to be used as an office and headquarters. The building is a substantial brick structure and was erected in 1915 by the Peoria Musical College.

John C. Watson, director of taxation, addressed property owners on Chicago's northwest side recently on "Fundamentals of the Tax Situation in Illinois." The meeting was sponsored by the Northwest Real Estate Board.

Farm Bureau Members Preferred Auto Risks

Evidence that Farm Bureau members are better than average risks for auto insurance is borne out by the startling figures issued by the National Safety Council. This organization prophesies that out of the 23,000,000 cars registered in the United States, from 30 to 50 per cent will have an accident during the year. In stark numbers this means that every second or third car you see on the road will have an accident.

On the other hand, statistics furnished by A. E. Richardson, manager of Illinois Agricultural Mutual Insurance Company, show that only one out of every five cars driven by the 33,000 Farm Bureau member policyholders in the company will have an accident during the year.

This vast difference in percentage of accidents accounts for the exceptionally low rates quoted by Illinois Agricultural Mutual. Preferred risks, such as Farm Bureau members, inevitably cut the cost of insuring. A company having an exceptionally high rate can usually be found to be carrying an over amount of "risky business" and must charge enough to make up the losses poor risks bring.

Illinois Agricultural Mutual, like any other company, operates according to the law of averages. The price of insurance is based on it. Thus, when the national accident average is one out of every two or three cars, it is clear enough that the Illinois Farm Bureau average of one out of five cars should result in lowered insurance cost. That it has reduced the cost is another example of what farmers can accomplish for their mutual benefit by working together.

New Organization Plan

The new I. A. A.-Farm Bureau organization plan was explained at two meetings of County Farm Bureau officials late in March at Peoria and Centralia. The former plan with district organization managers has been discontinued. The new program provides for a full time organization man in a county or group of counties whose main interest shall be securing new members and collecting dues. He is to be employed jointly by the state and county organizations.

The board of directors of the Indiana Farm Bureau recently adopted a resolution urging Indiana congressmen to sign a petition to bring to the floor of Congress the Frazier-Lemke bill so that its merits and demerits may be discussed.

The bill provides for refinancing existing farm mortgages at 1½ per cent interest with payment of 1½ per cent on the principal each year on an amortization plan so as to pay off the loan in 46 years.

At a meeting of stockholders of the Soybean Marketing Association in Decatur April 16, President John W. Armstrong was authorized to appoint a committee to consider and recommend a program for future soybean marketing.

Co-ordination of organized buying of farm supplies by state Farm Bureau federations was considered at a conference called by the A. F. B. F. in Chicago April 23.

The American Farm Bureau Federation is backing House Bill 6474 giving the Secretary of Agriculture regulatory control over direct buying of livestock.

It's Time to Organize

(Tune, Battle Hymn of the Republic)

Come on farmers of our Nation to our present need arise,
Let us enter in the conflict for it's time that we were wise.
There's a ray of hope now bursting through the dark and cloudy skies.
It's time to organize.
(Chorus)

We are now amid a crisis,
We're not getting equal slices.
What we need is parity prices,
It's time to organize.

We've been working independently for many years you see.
Tho' it's adding to our sorrow and we fret increasingly.
And there's one and only one way we can gain the day, by gee.
It's time to organize.
(Chorus)

We must fight old man depression and must wield a mighty hand,
For we want to see him buried far beneath the clay and sand.
Or forever we must drive him now from this our glorious land.
It's time to organize.
(Chorus)

We must join ourselves together till one hundred thousand strong,
That our voice may cry for justice and re-echo loud and long.
So now come along, don't hesitate, but join us in our song.
It's time to organize.
(Chorus)

—John S. Booker, DeWitt County.

Livestock Marketing

Cattle prices have shown substantial improvement and the market continues in a strong position. However, supplies will be seasonally large during May and June. Heavy steers are now topping the market and are expected to continue in a favorable position during the summer and fall. The curtailment in cattle feeding will be most noticeable during the last half of the year and particularly noticeable in the case of the better grades. In view of this, outlook for the summer and fall is quite favorable, and there is an opportunity to short feed for that period. This calls for top quality and full grain finish. The cattle market this fall is expected to be supported by a strong demand for stockers and feeders, thus making for a condition quite the reverse of last year.

The hog market is now entering a seasonally weak position and the situation calls for a close marketing of hogs in feed lots, and prospective conditions are favorable for carrying as many hogs as possible into the summer. More or less liquidation of breeding stock is expected during May and June and low grade and unfinished hogs will naturally be severely penalized. This situation should make summer feeding desirable and a much more favorable feeding ratio is expected after the middle of the year.

While the lamb market continues in a stronger position there is considerable over-lapping in the supply of fed lambs and the early movement of spring lambs. It is well to keep feed lots fully topped out as the competition will tend to increase during early May. As to southern lambs conditions are not so favorable so they will tend to move later and be thrown in more direct competition with grass-fat lambs from the Pacific northwest. As a whole the lamb market is in a stronger position and is expected to continue at a relatively high level during the balance of the year.

$2215 Cash Refund

The Illinois Agricultural Auditing Association recently distributed $2,215 among 154 stockholders. This distribution involves the redemption of 443 shares of stock of $5 par value issued against working capital contributions made in 1928. The average refund per company was $14.38.

The Illinois Agricultural Association RECORD

Number 6 JUNE, 1934 Volume 12

Thoughts On The New Deal

By the Editor

AS THE New Deal grows in age and experience, the American people, it becomes increasingly clear, are tending to divide into schools of thought for and against regimentation and economic planning. To some extent the controversy is developing into a battle between the haves and the have nots. Aside from the politics in the situation, two philosophies of government are involved. One is the philosophy of individualism—without government restraint. Every man for himself and the devil take the hindmost. Under this system the go-getters represented by combinations of capital and often brains have free rein to build, speculate, exploit labor, investors' capital, and the resources of the country, amass wealth in huge private fortunes, and use the power and influence so acquired in controlling government as an adjunct to their aims and ends.

This first system is the one America largely has been following. There is something to be said for it. It stimulated private initiative and inventiveness. It had the incentive of individual gain. It made men work hard, drive themselves to extra effort to acquire riches or power or both. This system developed the country, created wealth, made America a leading industrial nation and a world power.

Sharp Inequalities

But it also led to sharp inequalities in the distribution of money and property, to concentration of wealth in the hands of the few, to abject poverty and want for many. Natural resources represented by forests, water power, mineral and oil deposits, and agricultural lands were seized by wide-awake enterprisers and converted into private fortunes. Our great forests were ruthlessly cut, the timber logged off, and the land left as unproductive barren wastes.

Similarly, coal and other minerals, crude oil deposits, and water power sites have been taken over, not so much with the object of serving mankind over as long a period as possible, as to convert these resources quickly into dollars for their owners.

It was to a lesser extent the profit motive that led to the rapid expansion of agriculture in America. Fertility was just as surely mined from the soil in our older agricultural areas as oil is being mined through oil wells today. In the south, also the east, continuous cropping and erosion have taken their toll. Soils once rich in minerals necessary for plant growth are now poor. They are only productive when liberally fertilized.

Through all this development little attention was given to conservation, to the effects of the unrestricted capitalistic system on society. In the beginning perhaps little concern was necessary. While we were building and developing what looked like an inexhaustible supply for what appeared to be an inexhaustible market, there were jobs and opportunities for everyone. There never was an unemployment problem anything like the present one.

Natural Reaction

Therefore the reaction in favor of economic planning and the New Deal was a natural one. The depression has made men think. Isn't there a better system, a new way that spreads wealth and the good things of life more evenly among the people? Isn't it time to call a halt on the waste of natural resources and the exploitation of the weak by the strong? Can not we devise a program that banishes poverty, eliminates slum districts, raises the general level of welfare and restores the farmer's position as a buyer of manufactured goods at least to that of the pre-war period?

These are some of the questions statesmen have been thinking about. That there has been more thinking of this character among professors in our colleges and universities, among farmers and their leaders, than among the money-grubbers in the business

Earth dam built across gully to stop soil erosion, by Civilian Conservation Corps in Carroll county, Illinois. This valuable work initiated as an unemployment relief measure last year is being continued throughout Illinois and other states this year.

Published monthly by the Illinois Agricultural Association at 165 So. Main street, Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rates of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

and financial world became apparent as the depression deepened.

It was such thinking that led to the New Deal—a philosophy of government based on a planned industry, banking and agriculture. It was natural for President Roosevelt, a liberal who feels keenly the responsibility of government for its destitute and under-privileged citizens, to turn to those for help who were in sympathy with such ideas. So we have the so-called brain trust, perhaps a larger coterie of college professors, economists, thinkers and idealists than ever have been assembled at one time in Washington. And we have unprecedented and fearless experimentation toward wiping out some of the evils of the old system.

Gullying has been stopped in this field by planting Willows, Wild Cherry, Plum, etc., allowing the ditch to remain in grass.

Earlier Efforts

The trend toward more government leadership and intervention began before the present administration was swept into power. Theodore Roosevelt's trust busting and the Sherman Act represented efforts to control organized capital and protect the public against combinations. Woodrow Wilson is said to have had plans for leveling off the inequalities in the material possessions of American citizens, but because of the war never realized his dreams. Herbert Hoover expressed the hope that government might abolish poverty and make it possible for every workman to own a car.

Hoover was forced to become something of an economic planner. After two years of trusting to magic he finally saw the necessity for more drastic treatment to overcome the effects of continued deflation. Most business and financial leaders paralyzed with fear, had and have nothing to offer but the hopeless policy of letting the boat drift until it is wrecked or the storm blows over.

Against Farm Board

The campaign of propaganda against government in business during the Hoover administration, directed chiefly against the Federal Farm Board, subsided somewhat when industry and finance itself got into the predicament of agriculture. The Reconstruction Finance Corporation, which made government credit available to stave off bankruptcy for banks, life insurance companies, railroads and other corporations, never received the censure from the Tory newspapers so freely given a similar effort by the farm board to maintain farm prices and aid co-operatives.

The dark days of 1932 and early 1933 were marked by campaigns to restore prosperity by exhortation. "Buy more" campaigns and "anti-hoarding" campaigns, all of which proved ineffective, were the contributions of metropolitan newspapers now bitterly attacking the New Deal.

Unquestionably recovery began in March, 1933, with the closing of all banks, subsequent opening of the sound ones, and guaranty of deposits. This radical, swift and decisive move, followed quickly by going off the gold standard, the AAA, NRA, and inflationary measures, won the applause and confidence of the rank and file of people. Outside of the relapse after the speculative flurry of last July, business has slowly but steadily improved.

Recovery Proportional

And the improvement to date has been in direct proportion to the narrowing of the spread between the prices of farm commodities and non-agricultural goods. There are those who believe that recovery could have been brought about much more quickly by resorting temporarily to an absolute dictatorship under which debts, interest, transportation rates, fees, salaries and wages, capital income, taxes and non-agricultural prices might all have been slashed to the extent required to establish something like the 1909-1914 balance between agriculture, industry, labor and other groups.

The inequalities in the exchange value of farm products for the goods and services of others, no one denies, were responsible for much of our difficulty. To a lesser extent that condition still holds. It is the reason farmers are not buying more lumber, fence, cement, fertilizer, automobiles, farm machinery and a thousand desirable articles for the home.

Because we had no dictator to arrange things and promote free exchange of goods and services between all classes, recovery has been slow. And because industry all along the line persisted in maintaining high prices, cutting production, laying off employees, and making goods scarce, agriculture was compelled, with government assistance, to act similarly.

Some day future generations will laugh at the stupidities of the present era—at our inability to keep everyone at work and distribute more equitably the results of our enterprise. But will there not be more admiration than censure for the present national effort to buck the old system, or lack of system, which takes periodic unemployment, deflation and disorder for granted?

No one is prophet enough to forecast where the present trend in government will lead to. We can only hazard a guess. For some years to come there will probably be more regimentation by government rather than less; more control over business, industry, and finance to compel honesty, curb greed, prevent ruthless exploitation and stop some of the abuses of the post-war period.

Will Go On

The New Deal will not end with the present administration. Some of the present efforts may be and probably will be abandoned, but others will be taken up. There will be more attention given to conservation of natural resources and their development for the greatest good of the greatest number. Government promises to become a greater factor in the life of the country. Industry will hardly be allowed to continue its practice of saving itself at the expense of the public for relief of unemployment. Federal taxes will continue to be heavy for those with large incomes. And they won't like it. Capital may have to become used to smaller returns. We may

(Continued on page 6)

Rockford Milk Producers

Harmony Reigns on This Market Between Producers, Distributors and Consumers

ONE OF the thriving milk producer co-operatives in Illinois is the Midwest Dairymen's Company representing some 700 producers around the Rockford market. During the past year this organization, under the direction of an active board of directors and an able manager, Wilkie Lee, assisted in stabilizing marketing conditions at Rockford, initiated a successful quality improvement program, developed a fine working relationship with all the distributors, laid plans for boosting consumption of dairy products, and added a comfortable reserve to its treasury.

The road to success for the Midwest followed a meeting of the board more than a year ago with J. B. Countiss, dairy marketing director with the Illinois Agricultural Association. Mr. Countiss outlined a program and suggested the employment of Wilkie Lee, a former classmate at the University of Illinois, as manager.

Setup Changed

At the annual meeting and dinner in February, attended by practically all the milk producers serving that market, the organization changed from a membership to a stock setup and voted to issue "B" stock to the Illinois Agricultural Association.

As a result of the quality improvement program the average bacteria count on bottled milk was reduced from 50,000 per cubic centimeters to approximately 12,500. This was done largely by getting members to sterilize utensils with chlorine solution just before milking, and through prompt cooling.

"This inexpensive program we find saved a good many thousand pounds of milk which otherwise would have been returned to the farm," said Lee. "We believe our producers are happy with the way this program has worked out. A good many farm housewives told us that the milk they save for their own use keeps much better than before.

"We have had splendid co-operation of our producers, distributors, and milk haulers during the past year," continued Lee. "We have secured this by attempting to be fair to all parties concerned and to understand their problems. We have found in the matter of service to our distributors that the old time bargaining association, organized for the one purpose of securing the highest possible share of the consumer's dollar, is being replaced by an organization, which in addition to the bargaining function assists in eliminating unfair trade practices, price cutting, slipshod advertising methods, etc. Through such co-operation we can secure a larger percentage of the consumer's dollar than heretofore. We have found that the inefficiency of our distributors reflects in the spread in price between what the consumer pays and what the producer receives.

Simple Classification

"On January 1, 1933, our market discarded the old method of selling milk on the basis of distributors' sales reports on various uses. We adopted in its place a classification more simple and fair. To all of our distributors, except one, we charge Class I price for all milk delivered, regardless of its use, so that as soon as we receive and total up—at the end of the month—the amount of milk received and the differential for test, we can figure exactly what their statement should be.

"To the one exception we sell two classes of milk: Class I for their fluid milk and cream requirements at Class I price, while the milk used for ice cream mix is sold on the basis of Class II price, which is the price paid at adjacent condenseries. This classification has been verified semi-annually by our own auditor, as a protection to ourselves and the other distributors in the city. All additional milk is sold to condenseries at the prevailing condensery price.

"All milk sold by this Association is tested by our own tester, with the privilege on the part of the distributor to re-check should he so desire. This has worked out very satisfactorily, both for the producer and the distributor.

Adopt Zoning Plan

"As a result of the per capita consumption being reduced from .82 of a quart, three years ago, to a present .77 of a pint, we have gone into an educational program for the purpose of giving the consumer a better conception of the quality and food value of our product.

"Early in the spring of 1933 our organization adopted a zoning plan which provides for taking in new producers and giving them a base of 50 per cent of the average of their first three full months' production, providing they live within a radius of eight miles from the central part of the city. Outside of that zone, old memberships were continued where they remain within the regular established route. The purpose of this action was to keep from extending our milk shed out further. This policy has had a tendency to concentrate our inside area immediately adjacent to the city, and the results have proved the plan to be sound.

"We also changed our base plan.

President H. M. Mainland, left and Wilkie Lee, manager of the Midwest Dairymen's Company, Rockford, talking over the Association's good showing during the past fiscal year. The Midwest has 700 producer members and furnished 12 distributors with their entire milk supply during the past year.

Our base months are now the four lowest productive months of the entire Association. At the end of the year when these months are adjusted to a 30-day month and determined, we take each individual's average production for those four months and average it with his last year's base. If he has had an increase in production during those four months over his last year's base, he only gains one-half of it in base. If, however, he has had breeding trouble or has lost part of his herd in some manner, he only loses one-half of his decline in production as compared to his last year's base.

What Records Show

"We have found some very interesting facts in going over some of our old price records for the year. For instance, in December, 1931, 41 per cent of the base milk was sold at Class I price of $1.75 per hundred, 59 per cent was sold at Class II price at $1.07 per hundred, with an average weighted price of $1.35. In October, 1932, our records show that 35 per cent was sold at Class I price of $1.50 per hundred, 12 per cent at Class II price of $1.05 per hundred, while the balance was sold for 90 cents per hundred, giving an average price of $1.13 per hundred. In February, 1934, with our new classification, we sold 60 per cent of our base in Class I at $1.40, and the balance at $1.10, which gives us an average weighted price of $1.28 per hundred, which is not very far below our average of over two years ago. In the final analysis the average price received for milk is the thing that tells the story instead of an enormous Class I price, which may be received for a small percentage of the base."

Midwest Writes Checks

The distributors buying from the Association pay the organization for all milk delivered by its members. The Midwest in turn writes out and sends the checks each month for milk delivered by each member. A five-cent per hundred pound checkoff is deducted and one cent of this is refunded as a patronage dividend to members of the Association who belong to the I. A. A. and Winnebago County Farm Bureau.

At the close of the last fiscal year, February 28, 1934, the audit showed a surplus of $17,731.19 which compares with a balance of $4,338.20 the year before.

Farm population reached an all-time new high record on January 1, 1934 estimated at 32,509,000 persons.

—Courtesy LaSalle County Farm Bureau

Sam Burke of LaSalle County is one of the go-getters who trucks in cream for the Farmers Creamery Company, Bloomington. The Farmers Creamery has grown rapidly since its organization more than a year ago and is manufacturing Prairie Farms butter at the rate of more than a million pounds annually.

Fayette County May Have Farm Bureau

Organization of a Farm Bureau in Fayette county was unanimously supported at a meeting of 100 leading farmers in the county court house in Vandalia, Saturday, April 28. V. Vaniman of the I. A. A. told the group that the Association was ready to assist and co-operate if farmers in Fayette county really wanted an organization.

The meeting grew out of frequent questions asked during the corn-hog sign-up as to why the county was without a Farm Bureau. F. E. Longmire, representing the University of Illinois extension department, explained that extension service was available only in those counties where there is a local organization to cooperate.

A canvass will be made of Fayette county farmers and if there is sufficient interest, another meeting will be held and a permanent organization created.

As we go to press some 300 members were reported signed at a meeting in Vandalia May 20. The Fayette County Farm Bureau will be the 95th in Illinois affiliated with the I. A. A. W. C. Buzzard is acting as chairman of county organization committee.—Editor.

April Production Loans Exceed Two Millions

Farmers of Illinois, Missouri and Arkansas received $2,099,699.83 during April in short-term production loans. Chattel mortgages given as security by borrowers were discounted by the Federal Intermediate Credit Bank of St. Louis.

Such loans draw 5½ per cent interest, terms range from three to 12 months. Borrowers required to purchase stock equivalent to 5 per cent of loan in local credit associations, also pay inspection and filing fees.—Editor.

Thoughts On The New Deal

(Continued from Page 4)

even grow intelligent enough to let unemployed people work for their daily bread instead of allowing them to degenerate physically, mentally, and morally in idleness.

We shall probably develop in this country greater control over capitalism represented by organized monopolies. Such groups with the aid of the tariff have made a farce of the free competitive system under which the farmer has been operating in the production and sale of his products. Labor unions have done the same. Capital invested in the cities has demanded more and got more. Their very success had something to do with the breakdown of trade.

The opportunity for honest initiative, inventiveness, genius and thrift can be preserved under controlled capitalism. In fact these virtues will be encouraged by a broader distribution of wealth. The farmer will be better off under such a system for he will be gouged less. We should preserve the good things from the old order, make reforms where experience has shown them to be needed in spite of the opposition. Organized farmers are in a position to help shape the future destinies of the country, to restore agricultural prices to their prewar exchange value. By so doing we will benefit not only agriculture, but the general welfare of all.

The Sanitary Milk Producers is supporting an amendment to the St. Louis milk license increasing the Class I price from $1.85 per cwt. to $2.20 unless the retail price is cut from 11 cents per quart to 10 cents.

Illinois Grain Signs 160th Elevator

The Illinois Grain Corp. recently signed up its 160th member elevator. Members of the Corporation now handle approximately 29,000,000 bushels of grain annually. The Illinois regional ranks close to the top, if not first, in volume of grain delivered by stockholders of the Farmers National Grain Corporation.

160

Illinois Grain recently paid a patronage dividend of more than $24,000 to elevators which were members during the year 1933. Letters acknowledging receipt of the patronage dividends were received by Illinois Grain Corp. from a number of elevator members of which the following are representative:

Not Hard to Take

Illinois Grain Corp.,
Chicago, Illinois

I am writing to acknowledge receipt of patronage dividend for $462.53, also 7% dividend on preferred stock in Illinois Grain Corporation. While the amount this year is not as large as the amount we received last year for $1,133.55, yet we appreciate it; the total for the two years of patronage refund amounts to $1,596.08—not bad at all. We feel like Allen Brown did when he had me figure up the bonuses that he would get from the corn-hog reduction program. He said "I can stand that all right."

The smaller amount received this year of patronage refund is due largely to our smaller handling of grain on account of short crops—both oats and corn in our locality.

Thanking you and hoping that our business relations in the future will be as pleasant as they have been in the past, we beg to remain

Anchor Grain Co.,
S. C. Bane, Mgr.

Your check in the amount of $222.62 patronage dividend received, for which we thank you very much. A check like that makes a fellow feel glad he is a member of Illinois Grain Corporation.

MONICA ELEVATOR CO.

It gives me considerable pleasure to acknowledge receipt of your letter of the 19th, in which you show that our total patronage credit is now $1,239.61.

As you know we have been under the cooperative plan here since 1921 and our patronage refunds to our farmer patrons has run into many thousand of dollars. It is surely gratifying to us to know that at last we are participating in patronage refunds from the sale of our grain to the terminal markets. There is nothing else that is better proof of the soundness of cooperative marketing.

Your 7% stock dividend check has been received also. Many thanks. Patronage refunds may not be the greatest asset of the cooperative movement, yet in my opinion they are better proof than a lot of words.

A. B. Scheeler, Mgr.,
GRAYMONT COOP. ASS'N.

Glad to be Connected

We received our certificate as members of Illinois Grain Corporation and are very glad to be connected with such, as I am beginning to believe it is much the best we have ever had. We also received the check for $53.92 a short time ago and were very much pleased with same. Thank you.

J. P. Guy, Mgr.,
FARMERS ELEVATOR OF LITERBERRY

Your dividend check for $67.38 has been received. Thanking you for same and trusting our future business may be of greater volume.

E. H. O., Randolph, Ill.

This will acknowledge patronage dividend check in the amount of $287.62 which we appreciate receiving very much at this time.

Glenn Gordon, Sec'y.,
CHAMPAIGN CO. GRAIN ASS'N.

Dairymen Write To AAA, Ask For Plan

Reports from Washington state that many dairy farmers are writing to the administration expressing their belief that the rank and file of milk producers favor a dairy production control program.* In some sections, including New England, Wisconsin and Minnesota, meetings have been held to study the program further with the possibility of giving it a trial at a later date.

Requests for the program will grow should milk troubles continue. The initiative must come from the industry, however. The AAA will not move unless a majority of dairy farmers ask for action.

* Comment by milk producers in Illinois has been generally favorable to a dairy adjustment program. Continued drouth may be a blessing in disguise, make further efforts to reduce unnecessary.—Ed.

Consider Plans For Handling Sealed Corn

A program to handle sealed corn at the expiration of the loan period, Aug. 1, is being considered by the corn loan division of the Commodity Credit Corporation. Stored corn will probably be kept on the farm at least until next fall. While it is too early to hazard any guess as to the 1934 crop, a substantial reduction in plantings and a lower than normal carry-over makes the outlook favorable for corn prices next fall and winter.

J. H. LLOYD

The extreme drouth throughout large sections of the corn belt since the first of the year is another bullish factor. Any considerable delay in rainfall and germination of the new crop increases the hazard of unmarketable corn next fall.

The corn sealing program terminated on April 30 and in Illinois a check is being made under the direction of J. H. Lloyd of the State Department of Agriculture to get accurate figures on the exact number of bushels under seal. Regulations covering audits and refunds of sums collected by county warehouse boards are promised at an early date.

Approximately 270,000,000 bushels of ear corn were put under seal during the loan program. This amount represents a loan value of around $121,300,000. Iowa leads with $57,000,000; Illinois, $30,000,000; and Nebraska $23,000,000.

Borrower's Option

The borrowers have the option of retiring the loan, plus accrued interest, at four per cent at any time on or before Aug. 1. If the market price of corn at maturity date is less per bushel than the loan, the borrower may dismiss his obligation by turning over to the government the number of bushels of corn originally stored, provided the agreement has been fulfilled and no misrepresentations of fact.

The loan agreement provides that corn may be held in storage on the farm until October 15, 1934, at the option of the Commodity Credit Corporation.

AAA fluid milk and cream licenses cover about 15 per cent of total fluid milk and cream consumption in towns, cities and villages estimated at 32,000,000,000 pounds.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Personal Property Tax Fixing

COUNTY Assessor J. L. Jacobs of Cook county complains that ward committeemen, precinct captains and ward heelers in Chicago are responsible in a large measure for the breakdown of the personal property tax in this city. He presents evidence in the form of letters written by ward committeemen to precinct captains advising them to pick up personal property tax bills under $25 which "we can most likely take care of; even if they are over $25 we can probably have a compromise made when the matter comes up in court, through the States Attorney's office which of course is friendly to us at this time. This should afford an opportunity to make many valuable friends in your precinct."

It is no news to informed people that the personal property tax which is generally enforced in downstate counties is a farce in Chicago. Many Chicago people take it for granted that the thing to do with a personal property tax bill is either to throw it in the waste basket or give it to some ward politician.

Such widespread evasion and political fixing of taxes is a primary cause of exhorbitant tax rates and break down of government in Cook County. This situation again emphasizes the need for submission of a revenue amendment definitely limiting property taxes in the general election next fall. To continue the present system any longer than necessary is unthinkable. The personal property tax is not being enforced and apparently cannot be enforced, at least in Chicago. The alternative is taxation that is enforceable, that spreads the tax burden evenly among the citizens of the state according to their ability to pay.

The AAA Amendments

OPPOSITION of the processors and commission men to proposed amendments to the Agricultural Adjustment Act was to have been expected. This group which largely sets its own prices on the service it renders has vigorously opposed nearly every move, with or without the aid of government, to bring about a reasonable return on the investment and services of farmers.

The commission men and processors favor an economy of abundance because such a system plays into their hands. The formula is a simple one. The more bushels and pounds of farm products marketed, the greater the toll taken by those whose hands these products pass through. To them the price the farmer gets is of secondary, even unimportant consideration.

Strengthening the trade agreement section of the Adjustment Act, through proposed amendments, will aid the administration in raising farm prices albeit the effect may be to restrict volume. Another possibility the amendments offer is to reduce the exhorbitant spread between producer and consumer prices. The current opposition by private handlers of farm products to strengthen the Adjustment Act is further evidence that farmers must fight every step of the way to secure parity prices and reduce the unwarranted high cost of distribution.

On Restricting Production

CERTAIN metropolitan newspapers have been vigorously flaying the Agricultural recovery program, particularly that relating to reduction in acreage and supply of farm products. Yet not one word has been uttered against similar restriction practiced in all lines of industry. There has been no censure of the manufacturer, the industrialist for drastically reducing production, turning off thousands of employed men and women, all in the interest of maintaining prices. When farmers attempt to come within the profit system, through government co-operation, by similar restriction the system which produces unemployment becomes a heinous one, the Chicago News implied in a recent editorial.

Not all newspapers, fortunately, are as biased and unfair. The Davenport (Ia.) Daily Times, for example, recently pointed out editorially that "the starving process or that of restriction has been a fundamental principle of our government and it was first dictated by the industrialist and the business man through a tariff policy which kept out cheap goods from abroad.

"The manufacturer has always sought to control production within his industry that prices might yield a profit. The government in an emergency has sought to apply the same principle to agriculture; to improve price by reducing production and the surplusage which depresses prices."

Have You Heard This One?

A REPORT from a northern Illinois county states that commission men are peddling propaganda to the effect that corn would be selling for 75c per bu. were it not for the corn sealing program. That story is too far fetched even for the most gullible. Nearer the truth is that corn probably would have been selling for 35c or less were it not for the government loan program.

One-third of the Illinois state gas tax collected between July 1, 1934 and March 1, 1935 will be diverted to the common school fund as a result of legislation passed in the recent third special session of the General Assembly. It is estimated that this measure will take from construction and maintenance of roads and streets between $6,000,000 and $7,000,000 during this period of eight months.

If it came to a choice between closing the schools and stopping road building most of us would cast our vote for the schools. But there has been no evidence to support the belief that this was the only choice. Numerous other feasible plans for aiding needy school districts were pointed out in the discussion before the General Assembly without deliberately seizing gas tax moneys.

This question of gas tax diversion is closely tied up with the unemployment problem. During the discussion at Springfield it was estimated that $8,000,000 of gas tax funds would employ around 22,500 men on road building and improvement during the current season. Counting four to the family this would provide an income for about 90,000 persons. And assuming that jobs were given to the unemployed, would result in removing from unemployment relief rolls a very substantial number of people.

Road construction is well adapted to the employment of idle men. Except for supervision unskilled labor can largely be used. Nearly all of the money spent for road building—estimated at 90 per cent—goes for labor. This, of course, includes labor used in manufacturing and hauling road building materials.

The handling of the unemployment relief problem in some of our larger centers of population will probably go down in history as one of the shocking wastes of the depression era: waste not only of money but of the energy, spirit and morale of men. How much better for the individual as well as for society to use unemployment relief funds in compensating for useful work rather than giving a dole.

With rare good judgment the board of supervisors in Pike county, Illinois, decided to discontinue the use of state or federal funds for unemployment relief. Instead each township supervisor was instructed to use his influence to secure adequate levies for poor relief in his township. It was further suggested that substantial portions of such levies be set aside to pay unemployed men within the township at the rate of not more than $1.50 a day to work on county highways. Men needing jobs are sent to the township road commissioner who is authorized to pay such labor out of funds levied for poor relief. Why should not this same principle be followed everywhere? How much better to use relief funds for getting useful work done—better for the community and for those so employed.—E. G. T.

Bang's Disease Cause of Heavy Losses

Between 12 and 13 per cent of the cattle in Illinois harbor contagious abortion germs, according to Dr. Robert Graham of the University of Illinois. The loss to Illinois farmers is estimated at $5,000,000 annually.

Investigations over a 10-year period have shown that infectious abortion (Bang's disease)* will cut milk flow of the average dairy cow as much as 25 gallons a month, while as high as 45 per cent of the infected cows may become sterile over a five-year period. Elimination of cattle infected with the bacillus Bang is being advocated both by dairy and beef producers to reduce cattle surpluses.

* Also affects humans—one of the rarities in medical annals.

Tax Delinquency To State

Cook county and downstate Illinois counties on May 1 owed the state $29,573,270 in delinquent taxes, according to State Treasurer John C. Martin. Of this total Cook county owes $26,529,579, largely as a result of delinquency in Chicago. These figures do not include 1933 taxes now being paid.

Doneghue Back on Job

Ray Doneghue of McDonough county has completely recovered from the effects of the automobile accident he was in last winter, and resumed his duties as farm adviser on May 1.

E. W. Runkle, former assistant adviser, who handled the farm adviser's work capably during Mr. Doneghue's absence is back at his old job managing the McDonough Service Company.

Country Elevator Code Signed By Roosevelt

The country elevator code applying to approximately 15,000 local grain elevators was signed by President Roosevelt and becomes effective May 21, 1934.

The code prohibits intentional underweighing and overweighing and provides for docking and grading in conformance with the Federal Grain Standards Act. It prohibits bribes and other gratuities so as to protect small elevators from being driven out of business by competitors who temporarily outbid them for that purpose. It seeks to maintain a competitive market for farmers' grain. The code provides that the elevator operator must post in his elevator the complete schedule of elevator charges for storage, handling grain, etc. Discrimination in rates among patrons is prohibited.

Minimum wages of office workers vary from $12 a week in towns under 2,500 to $16 weekly in cities of two million population or over. Elevator employees' minimum weekly wages vary from $12 to $15. Minimum hourly wages of 30 and 35 cents an hour for elevator office and elevator employees are set forth in the code, with a differential of five cents an hour less for employees in the South.

The code is to be administered by a code authority of the industry to consist of 11 members selected by various groups within the industry. The Farmers National Grain Corporation* is recognized as one group having authority to select a representative. The Secretary of Agriculture and the NRA Administrator are authorized to have representatives to attend meetings of the code authority but to be without vote.

* C. E. Huff, president of Farmers National, represented co-operative farmers elevators on the advisory board which drew up the code.

Pres. Smith In Iowa

President Earl C. Smith addressed mass meetings of Iowa farmers at Fairfield and Cedar Rapids on May 23-24 respectively. The meetings were two of a series sponsored by the Iowa Farm Bureau Federation to increase membership.

If the drouth continues the crop insurance feature of production control programs will be appreciated more than ever. Benefit payments will go to contract signers regardless of whether or not they produce a crop, Administrator Chester C. Davis said in a recent radio address.

Ol' Joe Green

Joe:

What's this John! Got yer corn all in,
And here's me jest good begin.
Hits all on count uve that cussed mule,
Caint ketchim uve a mornin' while its cool.
I've worried with the sucker till I'm nearly sick,
He goes so slow it plants my corn too thick.

Ol' Joe

Say aint things gettin' in a mess
On count uve the farmers medlin,' I guess.
Lizzy said the secretary and that "O'Neal"
Wuz up to Washington about the New Deal
What kin them fellers do to help us out
An' put this here depression to rout
I'd like to see 'em pick a fishin' pole
Er drive a mule past a groundhog hole
I'll bet one whiff uve this pipe uve mine
'Ud give 'em buck-eger in their spine.
The way hit wuz is good-enuff fer me
Every-buddy work and letter be.
I cain't raise enuff to keep outa debt
How will I make 't with less yet?
Lizzy says the papers is all aginnet
If they aire the farmers'll never winnet
Well I'd better get back and prod old "Jake"
Fer hits all I can do to keep 'im awake.

John:

Hold on there Joe, let me straighten you out
I'll tell you how it all came about.
Don't blame the farmers for this mess
But we'll have to straighten it out I guess.
Our fathers taught us all to work
But, another gang they learned to shirk.
They've sat like a mouse hawk in a tree
And whetted their bills, 'till you and me
Plowed out a worm and then they'd drop
And promptly gobble him in their crop.
For years we'd work and just complain
But now we've decided to use our brain
Our leaders, Earl Smith and "Ed O'Neal"
Have got a finger in this "New Deal"
I think it's something, if you ask me
To be represented in Washington, D. C.
Organization will win if we'll back it like men
So's we can get a grub-worm now and then
Well, what if some leader would go haywire?
Can't you fire any-body you can hire?
Joe, half of that stuff that Lizzy reads
Is 'bout as reliable as musty seeds.
The papers claim the cities pay the tax.
They're all too prejudiced to print the facts.
I'll tell you, Joe, in the end you'll find
We'll have to make Satan get behind.

—Harry B. Claar

Secor Elevator Pays Patronage Dividend

The Secor Elevator Company, Woodford county, one of the 160 members of Illinois Grain Corporation, had a successful year during 1933. In addition to paying an 8 per cent dividend to stockholders, it also paid a ½c per bushel patronage dividend to patrons.

This action by the board of directors shows the true cooperative spirit. After a reasonable return on the capital invested, the producers were refunded the further earnings of the company.* The Secor Elevator Company received a patronage dividend from the Illinois Grain Corporation on all grain sold through the Illinois regional and Farmers National Grain Corporation.

* Here is an example of voluntary controlled capitalism. The time may come when business and industry will, by general law, be forced to do the same. Who knows?—Ed.

Cash Income of Farmers Up 39 Per Cent Says AAA

Cash income of American farmers increased more than 39 per cent in the year beginning May 12, 1933, with the passage of the Agricultural Adjustment Act, reports the AAA. During this period farmers signed more than 2,860,000 contracts to restrict acreage. In addition, around 800,000 farmers are benefiting from marketing agreements.

Estimated farm income for the year ending May 1, 1934 is $5,530,000,000—an increase of more than $1,500,000,000 over the year previous. Of this total benefit payments accounted for more than 12 per cent. Of total payments of $185,380,000 cotton received roughly $112,500,000, wheat $67,600,000, tobacco $500,200,000, corn $15,500 and hogs $24,800.

Cultivators of the earth are the most valuable citizens. They are the most vigorous, the most independent, the most virtuous, and they are tied to their country, and wedded to its liberty and interests, by the most lasting bonds.—Thomas Jefferson.

Beef Committee At Work On Program

The Committee of 25 named to help draft the beef cattle program, held its first meeting in Washington May 9.

Members of the committee attending were:—C. J. Abbott, Lincoln, Neb.; A. L. Berg, Baltic, S. Dak.; Dolph Briscoe, Uvalde, Tex.; Elmer Brock, Kaycee, Wyo.; F. R. Carpenter, Hayden, Colo.; L. A. Chapin, New York City; Charles E. Collins, Kit Carson, Colo.; Morris Douglas, Flat Rock, Ind.; **Marion Finley*, Hoopeston, Ill.**; Thos. B. Glasscock, Upperville, Va.; R. M. Gunn, Buckingham, Iowa; C. L. Jamison, John Day, Ore.; Kenneth Hones, Colfax, Wis.; F. F. McArthur, Oakland, Iowa; Joe E. Mercer, Topeka, Kan.; W. B. Mount, Shouns, Tenn.; A. J. Olsen, Renville, Minn.; **H. H. Parke*, Genoa, Ill.**; Judge George Rittenour, Piketon, Ohio; Joe Robinson, Mercer, Pa.; Hubbard Russell, Los Angeles, Calif.; J. Blaine Shaun, Tarkio, Mo.; E. B. Weatherly, Cochran, Ga.

Absent were: Carl S. Horn, Hay Springs, Nebr. and Tom Ross, Chinook, Mont.

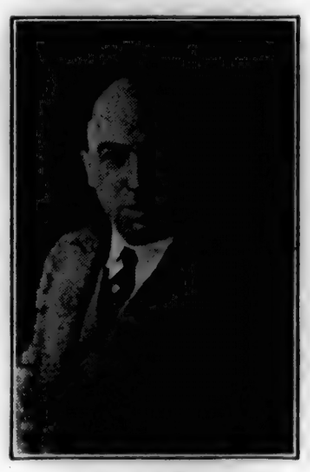
In selecting the committee the Agricultural Adjustment Administration had in mind the close relationship between beef cattle production and dairying so that dairy interests are represented also. At the initial meeting Chester C. Davis, administrator; G. B. Thorne, economist; Dr. J. R. Mohler, chief, Bureau of Animal Industry; and Harry Petrie, chief of the AAA beef section spoke on various phases of the beef cattle situation and prospects for an adjustment program.

The general advisory committee selected a number of special committees from its own membership for intensive study of different angles of possible adjustment programs.

* Henry H. Parke, president of the Chicago Producers Commission Ass'n., a director and officer in the National Livestock Marketing Ass'n., was one of organizers of DeKalb County Soil Improvement Ass'n. In 1912, later renamed DeKalb County Farm Bureau. One of first in state to grow alfalfa, served as assistant director of agriculture under ex-Gov. Lowden, operates general farm feeding cattle and hogs.

Marion Finley, son of the late Chas. R. Finley, former director, once vice-president (1926) of I. A. A. Marion is a graduate (1917) University of Illinois, has been an officer in Vermilion County Farm Bureau, now a director in Indianapolis Producers. A top-notch farm operator, Master Farmer, grows big crops corn, alfalfa, wheat, feeds cattle and hogs on home farm.—Editor.

Tariff On Bananas



The I. A. A. board of directors endorsed a resolution urging the adoption of a duty on bananas imported into this country. The resolution was presented by the Illinois Fruit Growers Exchange. Importations of bananas range from 100,000 to 125,000 carloads annually, compete with U. S. grown fruits say local growers.

The New Organization Plan

By Sec'y. George E. Metzger

DURING the past two years perhaps more study has been given to organization by the staff and officers of the Illinois Agricultural Association than to any other activity connected with the Farm Bureau movement.

These studies have necessarily been due largely to the serious financial condition brought about by business depression. For many years the Association and County Farm Bureaus have been using a volunteer system of signing members. During the depression it became apparent that the volunteer system could not be consistently followed and the membership properly maintained. Therefore, some experimenting was done, as is common in all business circles during this period, through which small commissions were allowed a selected group of men for the signing of membership.

V. VANIMAN

During a six months' period this system resulted in the signing of 13,396 new members. After careful study of this piece of work the I. A. A. Board of Directors decided to intensify the district plan of organization which had been in effect for seven years, by virtually placing a county organization director in charge of organization and collection work in each county or in a very small group of counties.

71 Counties Act

A contract involving this principle, with modest commissions to a county organization director was worked out and is now being presented to County Farm Bureau boards of directors. As of the date of this writing (May 15, 1934) 71 county Farm Bureau boards have taken favorable action—21 county organization directors have been appointed by the secretary of the Illinois Agricultural Association and approved by the County Farm Bureau boards and are, or will be, actively engaged in their duties by June 1. Probably another 15 or 20 county organization directors will have been appointed and approved by the time this article goes to press. Under the agreement the county organization director becomes responsible for all organization and collection activities within the county.

This does not mean there will be no volunteer work done. It does not mean that the County Farm Bureau board of directors or the farm adviser is entirely relieved from membership responsibility. It does mean, however, there will be an active directing head for organization activity within the county who will be responsible to a county organization committee and to the director of organization of the Illinois Agricultural Association.

Uniform Agreement

Further progress is being made in organization affairs by an attempt by the County Farm Bureau and Illinois Agricultural Association to standardize many of the activities now being carried on either directly or through subsidiary organizations.

A master uniform agreement has been prepared, under the direction of the board of directors of Illinois Agricultural Association, which is being carried to all County Farm Bureau boards for consideration and approval. This agreement sets forth many of the relationships existing between the County Farm Bureau and Illinois Agricultural Association, and when signed by proper officers of the Illinois Agricultural Association and County Farm Bureau, both parties agree to attempt to standardize activities so that such matters as the definition of "membership in good standing" and other policy matters may become more uniform between the various County Farm Bureaus of the state.

After the county organization director is appointed and approved, the coordination of their work throughout the state will be under the direction of V. Vaniman, recently appointed director of organization service of the Illinois Agricultural Association. Mr. Vaniman will prepare a sales service sheet which will go regularly to the county organization directors. They will report to him regularly their activities within the county.

Under the direction of the secretary of the Illinois Agricultural Association, a new record system is being worked out whereby the membership standing of each Farm Bureau member can be more quickly and accurately traced, either from the office of the Illinois Agricultural Association or County Farm Bureau.

At date of writing, approximately 75 counties have taken favorable action approving the agreement. We expect to make it 100 per cent by July 1.

MEETING OF LOCAL ADJUSTERS AT AMBOY, ILLINOIS ON APRIL 17.

One of a series of seven meetings for local adjusters sponsored by the Illinois Agricultural Mutual Insurance Company. Center, Ass't. Mgr. Leslie V. (for Vim & Vigor) Drake. Right, Frank E. (for Elegant) Billings. The man to the left in the wrinkled suit is Manager A. E. Richardson.

Consider Soybean Problem

A recent meeting was held in the I. A. A. offices at the call of John W. Armstrong, Champaign, president of the Soybean Marketing Association, to consider possibilities of new and broader outlets and a better system of marketing Illinois' coming soybean crop.

A further meeting will be held the latter part of May to hear reports of committees designated to work on various angles of the problem.

F. W. Niemeyer has been named general agent of the Farm Credit Administration of St. Louis. He succeeds Wood Netherland who left May 1 to go with a private bank.

Special Session—58th General Assembly

A recent Act of the legislature postponed the penalty date one month for payment of all taxes due on or before May 1 for this year only. All May 1 taxes may be paid without penalty not later than June 1 this year.

The so-called blind relief bills were tabled and therefore failed during the recent special session of the 58th General Assembly. The bills passed the Senate but failed to secure the necessary vote in the House.

The bills proposed to double the present state tax rate for blind relief; to empower county boards to levy a tax up to one cent in Cook County and up to 10 cents in all down-state counties for the support of the blind; and to make all taxes levied not only for blind relief but also for mothers' pensions, additional to the present 25 cent rate for general county purposes.

The effect of this legislation would have been to increase the maximum county tax rate in all downstate counties 14 cents—10 cents for blind relief and four cents for mothers' pensions. There would also have been an additional State tax of one cent.

Need Pension Change

In opposing the blind pension bills, the I. A. A. did not oppose proper relief for the deserving blind. It has favored and still favors a much needed revision of the blind pension Act to preserve its benefits for the needy blind and to prevent such benefits, as now so often happens, from going to persons who neither need nor deserve them. Supporters of increases in blind pension funds have opposed every proposal for such revision. If the present law is properly revised, additional taxes will probably be needed in comparatively few of the counties of the State. If they are needed in any county, the present counties Act provides that additional funds may be raised by a referendum vote for this or any other county purpose.

Legislation on blind pensions will probably come up again in the regular session beginning next January.

Between $6,000,000 and $7,000,000 of state gas tax revenues beginning July 1, 1934 and ending Mar. 1, 1935 will be paid into the common school fund as a result of the recent gas tax diversion bill enacted by the legislature after much whip cracking by the administration. The state school fund has been allocated $875,000 per month from the sales or occupational tax, payment of which was scheduled to begin Mar. 1 this year. This is to replace payments from the state property tax which was cancelled.

In the closing days of the special session the state NRA bill was passed by a bare constitutional majority. This act makes it possible for state law enforcement officials, as well as federal, to proceed against any violator of the NRA codes.

A more comprehensive report of the recent special session will be made in a later issue of the RECORD.

Leslie V. Drake Joins Auto Insurance Staff

Leslie V. Drake began work with the Illinois Agricultural Mutual Insurance Company March 14, 1934. He is a lawyer and has specialized in negligence law and liability insurance claim work since being admitted to the Bar in 1926. Drake has a good understanding of the farm problem. He was born and raised on a farm in Macoupin county, Illinois where he farmed until 1922 when he left to study law. He has been a practicing attorney in Chicago for the past six years and has been doing special work for the Illinois Agricultural Mutual for the past three years.

L. V. DRAKE

Soft Ball League Set Up In Marshall-Putnam

Nine townships were represented at a meeting in Henry May 10 to organize the Marshall-Putnam Farm Bureau Kitten Ball League. Twenty-four fans attended and offered suggestions for rules and a schedule of games. Managers were named in eight of the nine townships. Eligibility rules will follow those used in the State Farm Bureau Baseball League.

Indoor baseball or kitten ball is coming to be popular sport throughout Illinois, in town and country alike. The growth of soft ball has had something to do with dropping Farm Bureau baseball in many counties. Cutting of budgets, lack of sportsmanship among players, inadequate support from fans, insufficient interest on part of management in county are other reasons.

More than 30 County Farm Bureaus which had baseball teams at one time or another since the State League was organized in 1924 have dropped out. Farm Bureau baseball will be played in approximately 23 counties this year.

Play Ball! Heard In Farm Bureau League

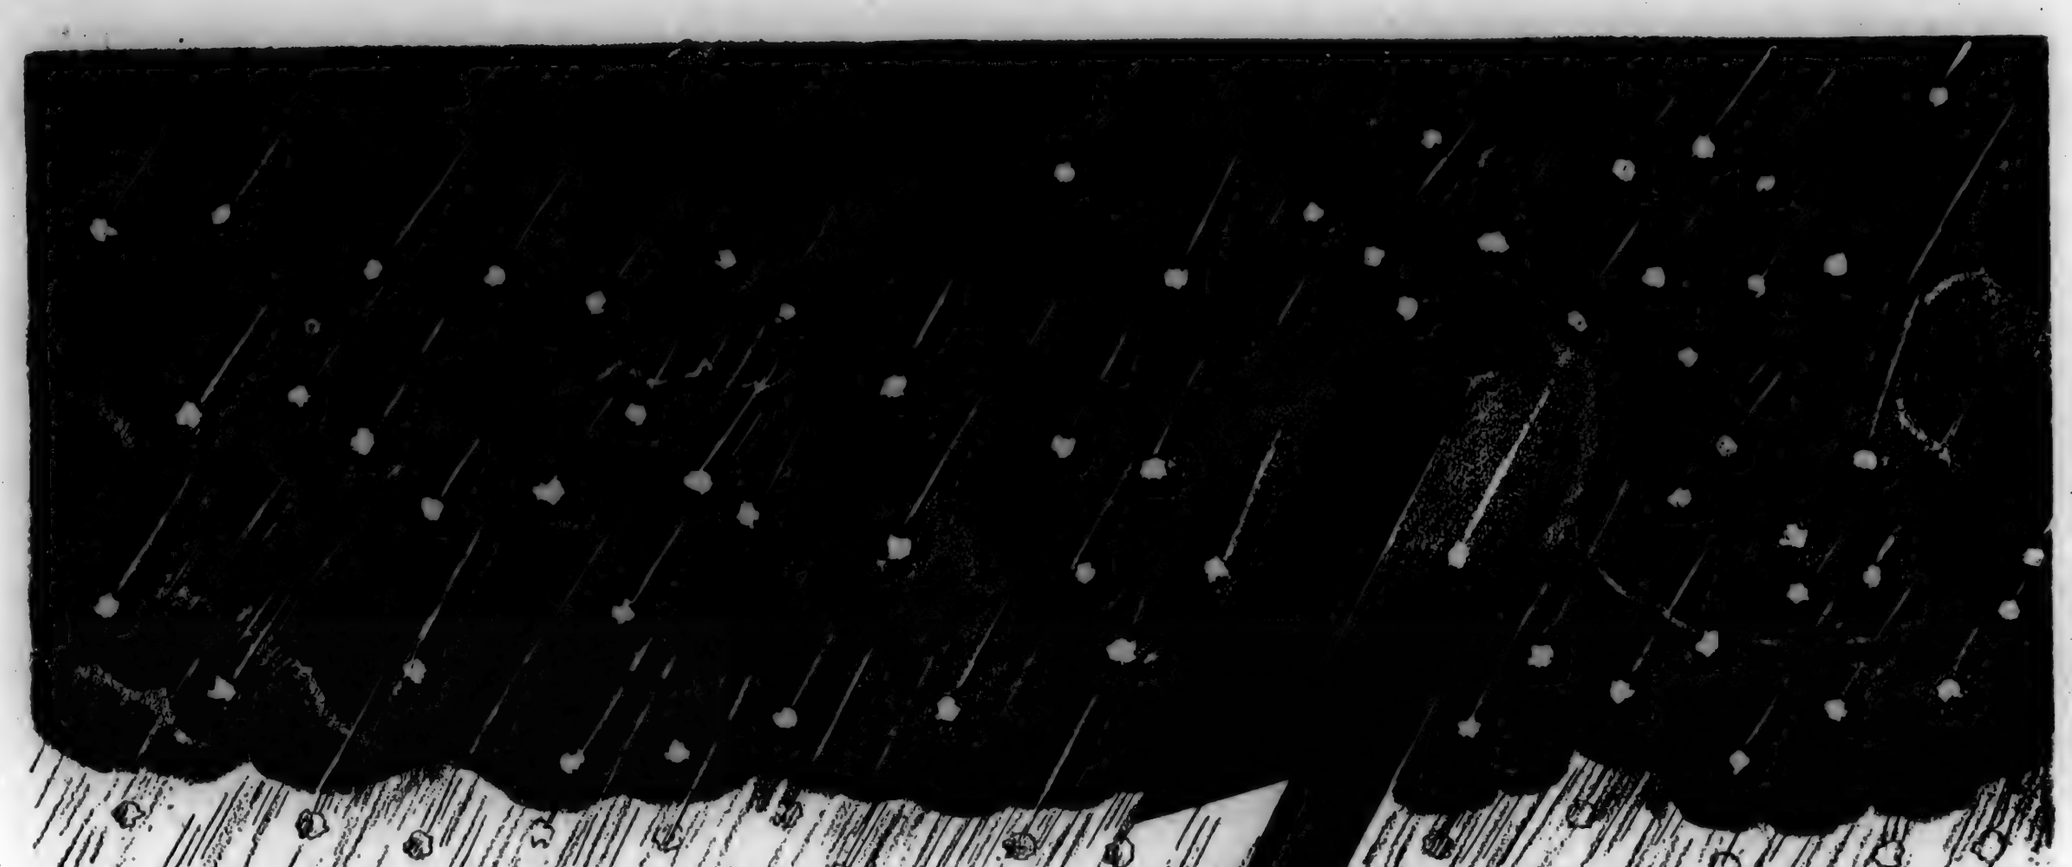
As we go to press plans are being completed for launching the 1934 season of the Illinois Farm Bureau Baseball League. First games were scheduled to be played on Saturday, May 19, in Division IV with Grundy at Livingston and Woodford at LaSalle.

In northeastern Illinois Lake, McHenry, Boone and DeKalb county baseball men met May 12 and drew up a schedule of games to open Saturday, May 26 with DeKalb at Lake and McHenry at Boone. Games will be played each Saturday afternoon until August 11 when the semi-finals begin. Almer Avang of Woodstock was elected district chairman in this division. Games will begin not later than 2:00 P. M. Standard Time.

Adams and Fulton counties have organized Farm Bureau teams and plan to play with McDonough in a three county division.

Madison was ready to go with a brand new team but when Montgomery and Macoupin failed to stir up sufficient interest to organize a division, decided to drop the project.

Shelby which played with Sangamon, Christian, and Morgan last year is trying to set up a new division to include Shelby and counties to the north and east of it. Moultrie county is making progress in getting a team together. Coles and Effingham likewise are considering teams.



Carroll, Winnebago and JoDaviess all had strong teams last year and will try to interest Stephenson in joining the division this year to even up the district.

Arthur K. Enger of Morris was chosen division chairman in District IV at their recent meeting. Enger is an old time professional baseball player and performed with the old Morris Reds when town and sand lot baseball was in its prime.

AAA Program Serves Big Majority Producers

Contracts signed by farmers with the AAA to adjust production, represent more than 90 per cent of the country's cotton and tobacco, 80 per cent of its wheat, and most of the corn and hog production entering commercial channels.

More than three-fourths of a million producers also are being benefited through marketing agreements according to Chester C. Davis, administrator of the Agricultural Adjustment Act.

LAST CHANCE BEFORE HAIL COMES

It's Almost Hail Time! Insure Your Crops Against Loss At Actual Cost.
$4 A Thousand NOW Protects You Up To Harvest.

Maybe you've guessed right many times about many things. But no one can guess when or where hail will strike and spread ruin. Hail time is almost here. Protect your crops now. After hail hits it will be too late. Farmers Mutual Re-Insurance Company offers you protection at ACTUAL Cost, on easy payments.

At a cost of but $4 a thousand **now** insure your crops against hail. In the Fall, when you have your harvest money, the balance of your premium is due and payable. If your crop is totally or partially destroyed, Farmers Mutual cheerfully sends you a check covering the loss. If no loss occurs, you have paid only a small premium for the protection.

See your County Farm Bureau at once for details. Don't delay. Once hail hits, your chance is gone!

Use Extra Care To Prevent Fires!

Hot sun, hot winds and dry weather call for extra precaution against farm fires. Increased farm activity and less water supply adds to the chance of fire starting and spreading. Warn your help to be extra careful. By keeping fire loss down you help retain the low insurance rates you now enjoy.

DO YOUR PART!

FARMERS MUTUAL
RE-INSURANCE CO.

608 S. Dearborn St. Chicago, Illinois

Fruit Growers Annual Meeting at Centralia

The solution of farm problems lies largely in farmers' own hands, Earl C. Smith, president of the I. A. A., said in addressing the annual meeting of the Illinois Fruit Growers Exchange at Centralia, May 11. He pointed out that while farmers and those directly dependent on agriculture comprise approximately one-third of the people they receive only one thirty-eighth of the nation's income. More thorough organization of farmers, he declared, is the way to gain fair compensation for the labor and investment in agriculture.

Essential factors in the success of any co-operative marketing organization, Mr. Smith said, are efficient management, proper financing and a substantial volume of products. He pledged continued and active support of the Illinois Agricultural Association to improve the conditions of fruit and vegetable producers in the state.

L. L. Anderson of Summer Hill, Pike county, a director of the Illinois Fruit Growers Exchange, in apple orchard. Tree is loaded with Golden Delicious apples, 1933 crop.

High Reputation

In his annual report Manager H. W. Day reviewed the work of the Exchange during the past year, stating that Illinois Fruit Growers Exchange products during the past 12 years had won a high reputation in the markets where sold. There was no overproduction of Illinois fruits and vegetables last year with the possible exception of cantaloupes and watermelons. Lack of buying power in the cities was largely responsible for low prices.

Mr. Day discussed the truck peddler problem stating that this method of selling had lowered the price level costing growers far more than small savings in commissions. This truck trade, he continued, can be turned to the advantage of the growers if they will organize and sell through their co-operative associations.

A total of 4,600 cases of strawberries were sold through the Exchange for the Edgar County Growers Association last year; more than 5,000 cases for growers at Centralia.

Forty thousand boxes of cantaloupes were packed, graded and sold for the Poag Growers Association in Madison county; more than 20,000 bushel boxes of cantaloupes and the equivalent of 37 carloads of watermelons for the Beardstown Melon Growers Association.

The 1933 apple and pear crops were short, the Exchange handling only 50 carloads of apples, 13 cars of pears. The peach crop, likewise, was light price levels ranging from 90 cents to $1.85 per bushel f.o.b. shipping point. A total of 309 cars were marketed for growers, shipments going to 23 states.

Vegetables Marketed

Approximately 3,500 cases of asparagus were sold for the Godfrey Growers Association in Madison and Jersey counties. Ten cars of cabbage were marketed for the Clear Valley Shipping Association in Whiteside county; in addition L. C. L. shipments were made of asparagus, rhubarb, tomatoes, flowers, red raspberries and cantaloupes from Cobden.

"The truck problem is the biggest single factor in building up volume through the Exchange. Many growers are too ready to sell their crop to the trucker who comes along with a silver tongued story," Day said. "This tends to undermine bargaining power exerted by the co-operatives."

The Manager suggested that the members give serious consideration to a policy of a small package check-off to be set aside to the credit of the member, preferred stock to be issued for the amount accumulated.

Logan N. Colp, field secretary, made a brief report on field activities.

The following officers and directors were selected for the coming year: Talmage Defrees, Smithboro, president; R. B. Endicott, Villa Ridge, vice-president; W. L. Cope, Tonti; Fred Hawkins, Texico; J. W. Lloyd, Urbana; Arthur Foreman, Pittsfield; L. R. Allen, Carbondale; Ernest G. Kinsey, Centralia; Harry Fulkerson, Dow; George E. Adams, West Liberty; L. L. Anderson, Summer Hill; R. W. Shafer, Edwardsville; Chester Boland, Paris; H. B. Koeller, Godfrey; Nelson Cummins, Dix; Logan N. Colp, secretary-treasurer.

Defends Farmers' Hog Marketing Records

The discrepancy between government census figures on hog numbers on farms and the number of hogs actually marketed during the year was pointed out recently by A. B. Leeper, vice-chairman of the Adams County Corn-Hog Control Association.

In Adams county, farmers' figures, according to Leeper, show that approximately 155,000 hogs were sold annually during the base years of 1932 and 1933. The government census for the county shows around 85,000 hogs on farms. Subtracting old sows and boars, which roughly figure about 10 per cent of hog totals, means that government census figures run only about 50% as high as the actual number sold as revealed by farmers' statements, backed up by sales records.

"Illinois corn-hog signers will not take with good grace any substantial reduction in allotments of hog bases," said Leeper. "We feel that our records of hog numbers marketed are much more accurate than the government census figures, because ours are based on actual sales tickets and other records of sales. When the census is taken around the first of the year it does not include the large numbers of hogs farrowed and marketed between spring and fall."

Farmers, whose interests are entirely agricultural, are the true representatives of the great American interests, and are alone to be relied on for expressing the proper American sentiments.—Thos. Jefferson.

Recovery Must Include Equality

By Lawrence A. Williams

WHEN the old ex-plutocrats speak of recovery they usually refer to a return of the 1926-1929 hey-hey days with all its unbalance in favor of a minority and privileged few. Indeed, agriculture is not mildly interested in a return or continuance of the inequalities of 1921-22 or up to and including 1929. Some may have forgotten the hundred and one solutions for getting rid of surpluses which have been propounded since the first McNary-Haugen bill was proposed. Some gentlemen estate-farmers may cry as they did and have done since surpluses were first mentioned, "Let the farmer alone; if he'll just keep working everything will be alright." But, now as then, everyone knows this gentleman farmer is the go-between propagandist for packer, commission man and general processor who want to continue their "Keep 'em working and keep 'em poor" policies of the good old days of lots to gamble with and losses to the producer.

There is a super-abundance of farm products and an unbalance of income unfavorable to the seller of farm products. Therefore, any recovery that does not restore balance in farm income and buying power would, of course, be meaningless to agriculture.

Contemplates Restoration

The recovery program in process does not contemplate this restoration of balance in buying power for farmers. Its known plans and laws provide immediate remedial measures. Why, then, do not all who know agriculture to be of basic importance in national recovery rally to the support of plans which for the most part, while not perfect, yet are constructive and aim at the reduction of surpluses and the increase of income with greater buying power?

Now, there is a poser! Farmers for the most part would cooperate if the processor's propaganda, and the middleman's tory press would not tear down faster than plans and brains can legislate and systematize recovery plans.

Did you ever try to save a drowning man, or keep an insane person from injuring himself while in the throes of his spell? No? Well, the gestures and wild-eyed aims of rugged individualists, in the hysteria of their depletion, is much the same. Some that are organized have a calm in disaster that permits of assistance and planned and rapid advances. Others of the individualist stripe—the radical stripe—the gentleman farmer poser for middlemen—the propagandist, all in the group called agriculture, are like the hysterical drowning man. The only hope seems to be a knock on the chin to produce unconsciousness. Just one stiff, harmless punch, so the drowning man will stop clutching, stop grabbing at his rescuer; close his mouth so the sea that threatens to destroy him will not complete his undoing from the inside, and once unconscious, his rescuer may have some chance of towing him in to safety.

Partly Political

All the bleating by the press and the processor about the processing tax is partly political propaganda by bitter partisans and partly from squirming privileged groups who hate to come under supervision and control for fear of losing a beautiful cut from farmers' toil, while farmers take losses.

The public is aroused. The consumer today is sympathetic toward agriculture's needs. They know the game of alligator crying about processing tax that takes one cent while they pass the buck of a 10 cent increase, in some cases more than a thousand percent increase, on to the consumer. The New Deal is not alone a Roosevelt Deal. It had its origin back in the grass roots of 1921 inequalities, and whether with Roosevelt or without him, whether with Republican, Democrat, third party or dictatorship, or whatever may come, the New Deal and the new era are going forward to balanced buying power for farmers and a fairer distribution of the national income.

The overproduction of butterfat and the lowered income to farmers for it, is a problem of as great importance as corn hogs, cotton or wheat. Objection to a planned and profitable reduction by producers does not come from the rank and file, but from the propaganda centers of influence. Kick as they will, controlled production seems inevitable. It is, perhaps, only a question of taking it with the attraction of "paid to reduce," or taking it eventually just "straight," without pay for reduction.

Distribution of goods as well as production, labor problems, a monetary system with its related credit problems, controlled stock markets and provision exchanges, care of unemployed, and other problems are not to be solved by party politics or by hysterical prejudiced class action.

Requires Experts

Here are problems requiring brains, specialists, brain trusts, experts and the best genius America with her vaunted education can muster. The best have been invited, and many enrolled in the program's behalf.

Cries from the uninformed and the hysterical need not disturb us. There will be no communism unless American citizens demand that form of government, and this is hard to imagine. There will not be facism or Nazi-ism, or Marxian socialism. But what may very likely happen is an overthrowing of Wall Street dictatorship more completely than is even thought of today, and the establishing of true democracy and the giving of an impetus to American citizens to keep it an operating true democracy.

What may happen is a recognition of silver on a near fifty-fifty basis, and the establishing of full government ownership and control of the basic money. What may happen is a more complete supervision by government in many important activities which today, with uncontrolled competition as in the past, have become clogged by abuses and inequalities. We will not be apt to go to government ownership but rather to use government to establish justice, fairness and equality. This is an important function of government.

Against New Ideas

The cry of "Communist," "Red," "Socialist," at every aid given to the masses under our present recovery plan is simply the same hoot of derision that has been hurled at every new idea—new discovery—new invention or new move since the memory of man. Prejudiced minds, whose realm of thought is limited by their own small boundaries of experience, can see no new move possible of success that does not follow old precedent.

This country is experiencing the touch of the leather of control and system, and like the wild mustang it rears high at the feel of it. Lesser hours and greater pay for labor; lesser production and more money for farmers; lesser profits and greater turnover for merchants; greater circulation of money and less desire for

(Cont'd Page 16, Col. 1)

Alfalfa Seed For July Sowing Plentiful

There is plenty of alfalfa seed for summer planting at reasonable prices but sudan grass seed is scarce and high priced, according to Paul V. Kelly, manager of the seed division of the Farmers National Grain Corporation.

Mr. Kelly states that Kansas, Nebraska, Utah and Michigan alfalfa seed is plentiful and no higher in price than a year ago. Montana seed is about all gone and Dakota 12 alfalfa, a popular variety, is non-existent this year because of the drouth in the Dakotas a year ago.

The outlook for clover, timothy, blue grass and production of other seeds this year is not so good because of the severe drouth throughout the country early this season. Mr. Kelly reports a heavy demand for sudan grass seed because so much of the early seeding of clover killed out through lack of moisture.

The Farmers National is in a position to supply farmers' elevators, Farm Bureaus and other co-operatives with high-quality seeds in carload or L. C. L. lots. The seed division located in the Fisher Bldg., Chicago, is operated strictly as a co-operative with provision for patronage dividends to stockholder members.

Recovery

(Continued from page 15)

hoarding for all people, and food, leisure, clothing, homes, jobs and happiness for all who come with fair minds and willing hearts into our land, should be a not impossible goal in this land of plenty. True, it is a jig-saw puzzle that takes brains to fit together, but the parts are all there. Science, experts, constitutional lawyers with a desire to interpret for the masses, students of sociology, economics and some mighty good sales sense to get the whole program accepted, can work out this jig-saw puzzle, but it may take more days than just the few you are willing to wait.

But, laugh with the echoing laughter of the much beset President Roosevelt. It is better than the despondency or hopelessness of the subsidized or the prejudiced, or the Tory press would have you adopt as they criticize, but offer no alternative. Truly our country is improving daily. We are thinking, and that is progress.

The proportion which the aggregate of the other classes of citizens bears in any state to that of its husbandmen, is, generally speaking, the proportion of its unsound to its healthy parts, and is a good enough barometer whereby to measure its degree of corruption.—Thomas Jefferson.

The seeder type spreader shown above is most satisfactory for spreading ground rock phosphate and agricultural limestone. Picture shows Minott Silliman of Stark county spreading phosphate.

Phosphorus Is Key To Permanent Farming

Phosphorus, purchased most cheaply in the form of ground rock phosphate, was characterized by Dr. Cyril G. Hopkins, the great soil expert, as the key to permanent agriculture on the most common soils of the United States.

To maintain or increase the amount of phosphorus in the soil makes possible the growth of clovers and alfalfa and the consequent addition of nitrogen from the inexhaustible supply in the air.

And with the addition of decaying organic matter to the soil, potassium, magnesium and other elements are liberated so they can be assimilated by growing plants.

Poverty Only Future

If the supply of phosphorus in the soil is steadily decreased, without replenishment, poverty is the only future for the people who till the common agricultural lands of the United States.

On most Illinois soils applications of 1,000 to 2,000 pounds of ground rock phosphate per acre are recommended. Since rock phosphate also contains calcium, soils not too high in acidity will usually grow sweet clover and alfalfa with the sole addition of this fertilizer.

The most practicable way of spreading rock phosphate or limestone on the land is to use a seeder type spreader which can be regulated to spread any desired amount per acre. For this type of spreader the material must be dry to flow readily.

Where manure is to be spread, rock phosphate may well be spread with it. The phosphate may be sprinkled over the manure from day to day as it is being made in the stall or covered feeding shed. The spreader may be partly loaded and the phosphate sprinkled on sufficient for the load. If manure sprinkled with phosphate is allowed to leach before being spread on the land there is danger of some of the phosphate leaching also, whereas if the fertilizer is spread on the land imr ediately after being taken from the car where manure has been or will be applied, the phosphate can later be plowed under with the manure with no danger of loss.

Members of the I. A. A. may purchase rock phosphate of guaranteed quality and fineness of grinding at a special discount of 50c per ton from the I. A. A. contract companies, Ruhm Phosphate and Chemical Co., Chicago, and Midwest Farm Supply Co., Joliet. The delivered price varies from around $11 to $13 per ton depending on percentage of phosphorus, determined by individual carload tests, and on the freight rate from the mines in Tennessee.

Ask Freight Cut On Ground Rock Phosphate

G. W. Baxter of the I. A. A. transportation division, recently appeared before railroad representatives urging that freight rates from Tennessee to Illinois farms on rock phosphate be cut at least 50 per cent. The rate from Tennessee to Chicago via freight was recently reduced from $4.50 to $3.38 per net ton to compete with cheap water rates on phosphate from Florida via the Atlantic Ocean, Erie Canal and Great Lakes.

The I. A. A. believes there would be much wider use of ground rock phosphate if freight rates were lower.

The CRIME of Henry Brokton

WE WERE riding back from Henry Brokton's funeral. Bill was driving. I was in front with him. The Old Judge was in the back seat with Herb Endicott. Ahead of us the Brokton family were turning into their gate—the widow, the small son, and two young daughters.

"Poor Henry was a good man," spoke up Bill. "Look at that farm. About the nicest layout in these parts."

"That's true," I replied, "but Henry had it pretty well mortgaged."

"What's a mortgage," scoffed Bill. "We've all got 'em. They go with farming like the weather."

Anyway, I couldn't help wondering about the widow and those three small children. And that mortgage.

Bill went on. "His widow is better off than most. She's got a roof over her head and food for her table. The land is good and the mortgage will stand as it is. Henry was a good man. Never did a mean thing in his life. Never did a wrong deed—"

"Humph!" growled the Old Judge from the back seat. "Henry never meant to, but he committed a crime."

Bill and I exploded in a storm of protest. The Judge was crazy, we said. Henry never tangled up in anything shady—and so on.

The Old Judge heard us out, then continued, "Everything you say is true. But, here's the crime of Henry Brokton." He closed his eyes in thought. "I knew Henry's father. I've known Henry since he was a little shaver. He talked to me when he bought that farm. It took all he had and then some. He worked like a slave improving it. Then he married. The children came along. More money was needed for improvements. An automobile. Prices were high for everything except farm products.

Land was going down. Henry's mortgage was made on high priced land.

"One day in 1930 Henry came to me looking pretty glum. He'd just come from the bank. They hadn't been rough with him, you understand, but they made it clear they couldn't go along lending him money. I suggested he borrow on his life insurance policy. But that was no go. He didn't carry any.

"I didn't see Henry again to really talk to until last year when he came in and said he wanted to make his will. We didn't talk much. Things were pretty bad for all of us. I didn't ask any questions. A lawyer learns when not to. We cleaned things up in a jiffy. I was surprised at the absence of any life insurance and said so. Henry said he'd go over and see Herb, here, when he left me. Well—I found out he didn't go.

"I didn't think any more about it until the news came the other day that Henry had fallen off his barn. Then I thought about that will, the mortgage, and no life insurance.

"So, I say, no matter how fine, hard working, faithful and honest he was, the crime of Henry Brokton was in not carrying protection for his widow and those kids. If he couldn't make both ends meet and pay his mortgage, how in hades is his widow going to? Who's going to send those kids to college? Mortgages don't go on forever. A young widow with three little ones is not going to marry very soon. And hired help don't make money for a farm!"

He turned to Herb Endicott who'd been sitting there not saying a word. Just smiling. That made the Old Judge mad.

"There's nothing to smile about Herb. You were a friend of Henry's. Why'n blue blazes didn't you make him take out life insurance with you? That's your job down at the County Farm Bureau office."

Herb kept right on smiling. "That's my job all right, Judge," he said. "And you're right as usual—about both Henry and me. But there's one thing you're wrong about. Henry did have his life insured—just a month before he died. I had the hardest job of my life making him take it. Won't his widow be surprised and happy when I hand her a Country Life check tomorrow, for $10,000? Henry never told her about it." Country Life Insurance Company, 608 South Dearborn Street, Chicago, Illinois.

Oil Company Managers Meet At Champaign

In a hot, breeze-proof room, more than 100 County Service Company managers, directors and Farm Advisers sweated enthusiastically through a meeting sponsored by the Illinois Farm Supply Company at Urbana, Friday, May 18. Called to order at 9:30 A. M. by Fred Herndon, President, and L. R. Marchant, manager, the gathering discussed codes, prices, equipment, new products, soy bean oil paint, selling, advertising, chinch bugs, insurance, and made plans for furthering the record-breaking progress made since the first of the year.

In a calm of watchful waiting, the meeting took up the discussion of the petition being circulated by the oil industry in Illinois—a subtle attempt to discredit farmer petroleum co-ops, and specifically to throw a wrench into the patronage refund plan which has brought $500,000 for three consecutive years back into the pockets of Illinois Farm Bureau members.

Petition Campaign

Obviously not intended for Farm Bureau consumption, a letter attached to the petition points out that the signatures of farmers will have a profound effect upon President Roosevelt to whom it is addressed, and thus cause him to change his well known friendly attitude toward organized agriculture and its right to bargain collectively. A facsimile of the petition was prepared and sent out to thousands of Farm Bureau members through the facilities of the Illinois Agricultural Association. The general consensus of opinion among those attending the meeting was to wait until there was evidence that signatures were being solicited locally before taking counter action.

Chinch Bugs

Professor W. P. Flint of the Agricultural Experiment Station of the University of Illinois gave a half-hour talk on chinch bugs. Most potent of his remarks was that "nothing will have as much bearing upon Illinois agriculture in 1934-35 as the little chinch bug . . . more than 70 counties are totally or partially infested.

Dr. W. L. Burlison of the Agricultural College gave a short talk on soy bean oil paint illustrated by panels that had been subjected to the weather for a number of years. He demonstrated the superiority of soya bean oil as a paint vehicle over linseed oil.

A. E. Richardson, manager of Illinois Agricultural Mutual Ins. Co., told the meeting about the new insurance policies available for trucks, buildings and equipment, and explained the new public liability insurance now ready for the oil companies. John S. Tracy held an open discussion on sales and advertising. The meeting was conducted for the greater part by Mr. Marchant and George Bunting, who passed out enough information to keep all in attendance busy with their notebooks for at least a week.

Cocoanut Oil Tax

A bill providing for a three cent per pound tax on cocoanut oil was finally put through congress. Subsequently President Roosevelt has indicated his interest in follow-up legislation to lighten the effects of this measure so far as the Philippine Islands are concerned.

A tax on cocoanut oil is involved in the Philippine independence question in which the United States agreed not to impose trade restrictions on the Islands during the next ten years while Filipinos are preparing themselves for independence. The President has felt that the imposition of the tax was breaking faith with the Islands on the independence question.

Cut Tariff Rate On Sugar From Cuba

Following a recent report by the Tariff Commission, President Roosevelt reduced the tariff on sugar from Cuba and other countries. The duty on 96 degree Cuban sugar, for example, is cut from two cents to 1½ cents per pound. Imports of Cuban sugar are entitled to a favorable differential compared with tariff rates on sugar from other countries. As a result of the recent action, the general or world tariff rate will be 25 per cent higher than the rate on Cuban sugar.

A general advisory board on policy matters has been established in Adams county made up of one representative from each of the co-operatives in the county and two Farm Bureau directors. Policy matters affecting more than one organization are brought before this council for consideration and recommendation.

Twenty-seven meat packers at 23 markets were awarded bids by the government to buy and process a maximum of 225,000 hogs during two weeks beginning May 15.

Big Independent Dairy Cited As Violator

The Meadowmoor Dairies, largest of the independent distributors in Illinois, was recently cited for alleged violation of the Chicago milk agreement. The charge is that the company purchased milk from new producers who were not on the market prior to February 5, 1934, without first obtaining a permit. It is alleged that the company bought milk from farmers not having established bases, contrary to the license, and that purchases of milk were made from producers who did not authorize compliance with the terms of the license respecting payments for market services.

The company is also charged with failing and refusing to submit monthly reports to the market administrator, that producers were paid prices other than those defined in the license schedule, and that the prescribed butterfat differential of four cents per point has been ignored in paying producers.

Action was taken sometime ago to close up the distributing plant of Lloyd Schissler of Lombard for failure to observe the license. A number of other smaller dealers, likewise, have been orderd to show cause why their licenses should not be revoked for failure to make reports, and to pay producers the price defined in their license.

National Swine Show

The National Swine Show will be held in connection with the Illinois State Fair at Springfield August 18-25. President James R. Moore of the National Swine Growers Association, and Edward S. Collins, manager of the State Fair, announce the following judges: Duroc-Jerseys, Prof. E. F. Ferrin, St. Paul; Poland-Chinas and Hampshires, R. L. Pemberton, Iowa; Spotted Polands, Dean H. H. Kildee, Ames, Iowa; Berkshires, J. B. Rice, Marseilles, Ill.; Barrows, W. T. Reneker, hog buyer for Swift & Company, Chicago; Yorkshires, L. L. Lehman, Pleasant Plains, Ill.; Chester Whites and Tamsworths, Prof. J. S. Coffey, Columbus, Ohio.

The largest April on record was experienced by the Indianapolis Producers with approximately 1,070 carloads handled or 34.7% of market receipts compared with 33.3% last year. The four months' volume is 23.7% greater than a year ago.

Number 7 | JULY, 1934 | Volume 12

Imperative Need of Revenue Revision

Report of John C. Watson, Director of Taxation, to I. A. A. Board of Directors, June 15, 1934

Revising our antiquated taxing system is one of the greatest problems facing Illinois farmers who bulk large as taxpayers. The I. A. A. has persisted in its efforts to bring about a solution to this problem for more than ten years. Read carefully the accompanying review and report of the efforts of your organization to secure an equitable amendment to the revenue article of the state constitution.—Editor.

IN most of the States the general property tax has long been and is still the chief or only support of most State, county and local governments. In theory it applies to all property. In practice it has always been largely confined to tangible property, chiefly real estate. In pioneer times, when nearly every household owned its own home and operated its own business property, chiefly farm property, the property tax was almost universally applicable and was reasonably fair. This is still partly true in states of little urban and industrial development. It is not true in a great urban and industrial state like Illinois, where continued reliance on the general property tax has largely or wholly exempted from direct property taxes, more than one-half of the entire population who derive their income from personal service, ownership of intangible property, or speculative transactions.

JOHN C. WATSON

Active in 1921

Even in happier times, the fatal weakness and injustice of the property tax were plainly evident. The Illinois Agricultural Association early recognized the necessity of revising the antiquated revenue article of the State Constitution. Its representatives were active in the Constitutional Convention in 1921 and 1922; in the sessions of the General Assembly which submitted revenue amendments to the voters in the November elections in 1926, and 1930, and again in the regular session in 1933, when the General Assembly was unable to agree upon a revenue amendment to be voted on next November.

As the depression deepened, the weakness and injustice of the property tax became tragic. Inability to pay taxes has increased delinquency to proportions never before known in the State. Tax sales without a bidder have been followed by forfeiture of property, thus vainly heaping penalties upon taxes which even without the penalties have been crushing.

Conference Approves

Those still able to pay taxes look with foreboding to the future, asking themselves how long they can deny necessities to their families or disregard the need of their property for paint and repairs. With growing concern about their ability to pay such fixed charges as interest and taxes, they see the increasing threat of crop losses from drouth and insect pests, now nearing the proportions of a major disaster the effects of which will reach into nearly every city and village in the State. They know that the indispensable services of government are suffering impairment, not because the people as a whole are unable to support them but because the burden is inequitably distributed.

Adjournment of the General Assembly, July 1, 1933, without submitting a revenue amendment to be voted on this year was followed by widespread recognition of the necessity of a special session for this purpose. This was discussed at a statewide conference of approximately 1700 farm leaders in Decatur, September 18, 1933. The conference unanimously adopted a resolution urging officers and directors of the Association to take such action as they might deem advisable to secure the calling of such a special session. It also asked that the proposed revenue amendment embody provisions to permit the base of taxation to be broadened, and to cut taxation of tangible property, both rural and urban, at least 50 per cent.

The action requested at the Decatur conference was submitted to rural people in every county in the form of tax relief petitions requesting the officers of the Association to urge upon the Governor the imperative need of calling a special session for the exclusive purpose of submitting proper amendments to the revenue article to be voted on in November, 1934. The tax relief petition also requested the General Assembly to submit an amendment removing present limitations which prevent an equitable distribution of the tax burden; cutting total general prop ty taxes to not over $1.00 on the $100 of fair cash value, except by referendum; forbidding further indebtedness by any taxing district except by referendum vote; and empowering the General Assembly, by general law enacted by a two-thirds vote, to distribute state revenue among local taxing districts.

Ratified at Danville

These provisions incorporated in a proposed amendment were ratified in

Published monthly by the Illinois Agricultural Association at 165 So. Main street, Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rates of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Imperative Need of Revenue Revision

resolutions adopted in the annual meeting of the Association held in Danville, January, 1934.

The tax petitions were returned with approximately 310,000 signatures. In accord with this overwhelming response, President Smith wrote to the Governor on November 10, 1933, urging him to call a special session of the General Assembly for the purpose of submitting a proper amendment. The Governor's office acknowledged receipt of this letter and requested copies of the amendment proposed by the Association, which were sent.

In September, 1933, pursuant to action by the General Assembly, a special revenue commission was created. In November the Special Commission requested copies of the amendment proposed by the Association, which were sent to each member. Later the Special Commission invited representatives of the Association to appear in behalf of the I. A. A. amendment, which they did. On invitation of the Special Revenue Commission, representatives of the Association participated in subsequent meetings of this body.

When the Commission made its report, it recommended that the Governor call a special session of the General Assembly for the purpose of submitting a revenue amendment. It also recommended the tax limitation and most of the other provisions advocated by the Illinois Agricultural Association and as part of its report submitted an amendment containing these provisions.

In its May meeting the Board of Directors of the Association directed that the following letter be addressed to the Governor, again urging the importance of calling a special session of the General Assembly in the near future for this purpose:

Letter to Governor

May 18, 1934

Hon. Henry Horner,
Governor of Illinois,
Springfield, Illinois.
Dear Governor:

At the request of seventeen hundred (1700) representative farmers from ninety-four (94) counties convened at Decatur, Illinois, I wrote you on November 10, 1933, urging that a special session of the 58th General Assembly be called for the purpose of submitting to the electorate in November, 1934, an amendment to the Revenue Article of the State Constitution. In acknowledging this communication, your office advised that a special revenue committee consisting of five senators, five representatives and five citizens at large were drafting an amendment for the consideration of the General Assembly.

Again under date of February 2, 1934, I wrote you carrying the request of the Board of Directors of the Association that because of the grave importance of revenue reform, a special session of the General Assembly be called for the exclusive consideration of an amendment to the Revenue Article.

We are informed that the Special Revenue Commission, above mentioned, which we understand was appointed by you, the President of the Senate and the Speaker of the House, made its report and recommendations as to the provisions that should constitute an amendment to the Revenue Article of the State Constitution, which report and recommendations were made on Tuesday, April 17 and printed in the Senate Journal of that date.

Promise Full Support

After careful consideration of the provisions of the amendment recommended by the commission, the Board of Directors of the Illinois Agricultural Association have authorized me to inform you that the Association will put its full support behind the recommended amendment, if and when an opportunity is afforded for its consideration by a special session of the General Assembly, and if submitted by the General Assembly to the electorate in November of this year, will do everything within the rightful influence of the Association to secure its adoption by the people at that time.

Our Board of Directors, of course, recognize that you, as Chief Executive of Illinois, must be acutely aware of the serious defects and gross inequities in our present tax system in Illinois. We feel sure you realize the great injustice placed upon property owners by these inequities, the results of which are becoming intolerable and demand correction at the earliest possible time.

The Board of Directors have requested me to call to your attention the fact that unless an immediate call of a special session for the purpose of considering the proposed amendment to the State Constitution is had, that it will be impossible to meet constitutional requirements in time to give the people an opportunity to vote on this important question at the general election in November of this year. The provision of the Constitution referred to is found in Section 2, Article XIV, which as you know requires that a proposed amendment to the Constitution be published at least three months preceding the election at which such amendment is submitted to the electors. Unless a special session is immediately called for this purpose, it appears this important question cannot be handled in time for consideration of the people before the general election in November of 1936.

Will Delay Relief

We are informed that certain interests in the state are opposing the submission of an amendment at this time and urging that instead the matter should be left to a Constitutional Convention. We submit that to leave this imperative matter to constitutional convention necessarily involves delay that would seem to make it impossible (even though everything connected therewith was expedited to the fullest possible extent) to secure relief from the present property tax burden before the General Assembly of 1939.

I am sure you recognize that constitutional restrictions placed upon the manner of providing for a Constitutional Convention, its later considerations and still later the submission of its findings to the people, would require at least the time indicated which would make impossible

Greene County Man On I. A. A. Board From 20th

K. T. Smith of Greenfield, president of the Greene County Farm Bureau, was chosen as director from the 20th district on the I. A. A. Board to succeed the late Chas. S. Black. He was elected by ballot at a meeting of representatives from counties in this district. His selection was approved by the I. A. A. board meeting in Chicago May 19.

K. T. SMITH

Mr. Smith, a native of Greene county, operates a 360 acre grain and livestock farm. He has been a member of the Farm Bureau since its organization. More recently he directed the corn sealing program in Greene county and served on the county corn-hog control committee. He has been an officer in the Greenfield Farmers Co-operative Grain Co. for a number of years.

any tax relief as result of a Constitutional Convention previous to 1940. If, in your judgment, a Constitutional Convention is needed for other purposes than that of revenue reform, the Association stands ready to support a program of that character; but certainly not in lieu of the immediate calling of a special session of the General Assembly for the consideration of revenue amendment this year.

Could Correct Evils

I am sure you recognize that if called immediately, the General Assembly could submit an amendment to the people at the general election in November which, if approved, would make possible the correction of a large portion of our present taxing evils during the session of the 59th General Assembly scheduled to convene next January.

Before closing, may I again impress upon you the very grave importance of your careful consideration of the recommendations of our Board of Directors and to again assure you of the full support of the Illinois Agricultural Association in securing the favorable approval by the General Assembly of the provisions of the amendment to the Revenue Article of the Constitution recommended by your Revenue Commission, and if submitted, to do everything possible to secure its adoption at the hands of the people next November. We are also prepared to file with the presiding officers of the respective bodies of the General Assembly petitions signed by more than 300,000 voters of Illinois urging immediate action in support of the provisions of the report and recommendations of your Revenue Commission.

Hoping we may have your favorable consideration of this request, I beg to remain

Sincerely yours,
Illinois Agricultural Association,
(Signed) Earl C. Smith, Pres.

Get Creamery Site

The Producers Creamery of Olney recently bought the site of the old Olney Hotel on which it will erect a creamery. A campaign is under way to raise capital to build a plant. A fund of $30,000 cash is the goal, two-thirds of which is raised.

Farm Advisers Annual Summer Meeting, Urbana

Consider Corn-Hog Allotment, Drouth, and Chinch Bugs

Agricultural planning, drouth, chinch bugs and dairy production problems occupied chief attention of farm advisers in their annual summer conference at Urbana June 11-12-13.

President Earl C. Smith of the I. A. A. and Dean H. W. Mumford spoke to the farm advisers in their annual business meeting Monday night. Discussion centered around government corn-hog allotments for Illinois. Mr. Smith made clear the policy of the I. A. A. on this controversial question, namely, that the contracts be carefully reviewed by county committees with the idea of removing hogs reported on contracts which were not properly supported but to retain reported hog numbers which are fully substantiated by records.

In addressing the advisers on June 11, A. J. Surratt, state agricultural statistician and member of the Illi-

nois Corn-Hog Board of Review, said: "We are not asking you to do the impossible. All that we want you to do is to make a conscientious effort in every county to eliminate the surplus hogs in line with the quotas reported for each county. We know there has been some padding. Records that can stand up will be approved. After you have taken out every hog that should come out notify the board of review. The success of the program depends upon the reduction of hog numbers marketed. For the protection of those who have made honest reports substantiated by complete records we want the excess hogs eliminated and the individual allotments brought down to where they ought to be."

Now Too Low

For more than 20 years, Surratt said, we have been criticised for being too high on our crop estimates. It seems strange now that we are criticised for being too low on corn and hogs.

The government hog allotment for Illinois averages around 13 per cent less than the number of hogs reported by contract signers. As we go press corn-hog committees throughout the state are at work carefully checking contracts and asking signers to get more complete records where necessary to substantiate hog numbers reported.

Getting 'Em Out

Mr. Surratt stated that the limitation of litters in the 1934 corn-hog contract had been rescinded. This does not affect the limitation of hogs marketed, however, to 75 per cent of the average sold in 1932 and 1933. The corn-hog committees it is reported are getting the excess pigs out of the contracts. One producer with a 1000 hog base, Surratt said, readily submitted to a cut of 219 head.

Stopping the chinch bug advance near Watseka in Iroquois county with an oil barrier.

Chinch Bugs On The Rampage Threaten Corn

The chinch bug infestation in Illinois is the heaviest since 1860, Prof. W. P. Flint, state entomologist, told farm advisers at Urbana on June 11. The bugs are a little ahead of normal due to the early hot weather.

The government appropriated $1,000,000, he said, for insect control in the midwest states, a substantial portion of which is available for providing free creosote oil for farmers. As we go to press large quantities of oil are rolling into central and northern Illinois counties where the bugs are most numerous. The oil is delivered in 50 gallon drums and in tank cars, and is coming mostly from the Chicago and St. Louis areas consigned to county farm advisers.

Farmers are required to sign receipts in which they agree to use the oil only for chinch bug barriers. Fifty gallons of oil are required for one-quarter mile of barrier for the season. Oil must be replenished daily.

Chinch bugs in central Illinois started leaving wheat fields and other small grains early in June and by the middle of the month were advancing into corn fields not protected by tar-line barriers, in large numbers.

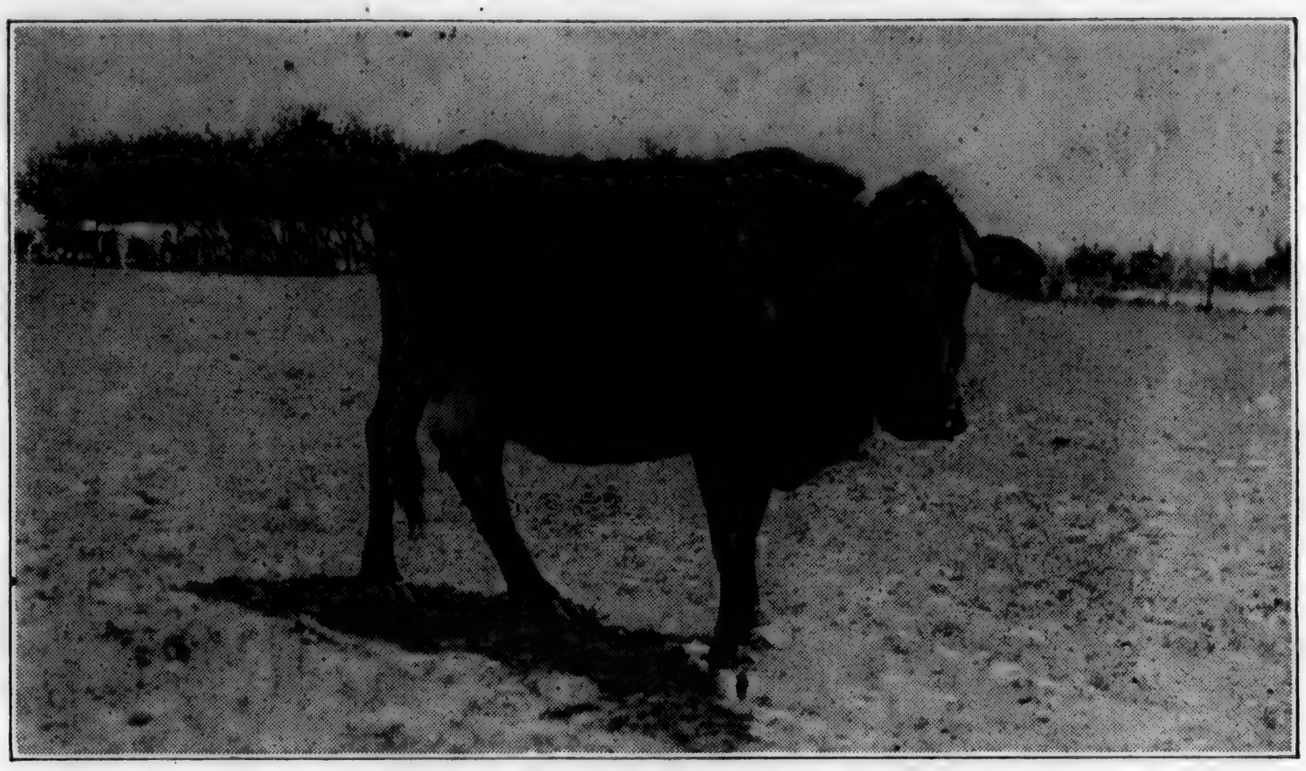
Badly infested counties such as Champaign, Livingston, McLean, Will, Iroquois, etc. placed orders for five to ten carloads, but secured only part of amounts ordered. Illinois Farm Supply Company had sold considerable quantities of chinch bug oil before the government appropriation for free oil was announced. Farmers who acted promptly and purchased oil from county service companies have been most successful in stopping advancing chinch bugs. Some who waited for free oil were too late. Many corn fields already show the effects of damage.

On June 19 Livingston County Farm Bureau reported that close to 45,000 gallons of oil including that purchased from Illinois Farm Supply Co. prior to the government grant, had been distributed. Not a single county reported enough free oil to supply the demand stimulated by frequent radio announcements. Champaign county, the same date, reported that five tank carloads of free oil had melted away quickly as farmers lined up by the hundreds with drums, barrels, and other receptacles to take it away. Similar experiences were reported in Vermilion, De Witt, and other counties.

Illinois Farm Supply Co. released large quantities of chinch bug oil already contracted for, to the government, thus speeding up delivery several days. As government supplies and funds dwindled county service companies again started selling substantial quantities to fill the widespread demand.

More than 300 corn growers were in Aledo, Mercer County, June 16 after their allotment of free government chinch bug oil. The demand exceeded the supply here as in most counties.

Drouth Proves Advantages of Agricultural Planning



Benefit Payments Will Soften Blow of Dame Nature

The drouth has emphasized the value of agricultural planning, Dr. H. R. Tolley, economist and leader in the AAA, told farm advisers at their summer conference in Urbana June 11. The AAA programs have helped to meet the emergency, he said. First is the crop income insurance feature of the benefit payments. Those payments made and to be made may not be sufficient to take care of farmers' needs without other relief, but they do give a minimum of income which is more than nature has done this season, Tolley said. The speaker was introduced by Dean H. W. Mumford as one of the leading thinkers and economists of the country.

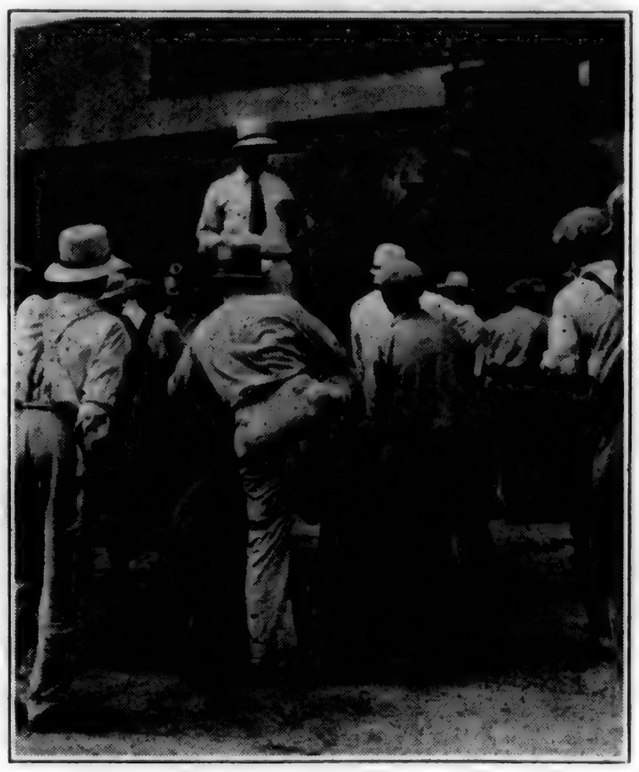
The increase in the amount of acreage in feed crops, as a result of the wheat and corn-hog programs, is another benefit, he continued. Had there been no reduction in wheat and corn acreage this land would certainly have been planted to grain crops and the amount of forage would have been even smaller than it is. Discussing future crop adjustment programs and the necessity of a cut of 15 to 20 million acres of land in crops, Dr. Tolley outlined four possible methods of reduction:

1. Voluntary adjustment, with benefit payments as now carried on.
2. Voluntary adjustment, with penalties against those who refuse to co-operate now being followed with rice. Under this plan, the millers hold back part of the payment for the farmer's rice until he has agreed to participate in acreage control.
3. Buying sub-marginal land by the government.
4. Compulsory control of production.

Discussing the proposed plan for putting the adjustment program on a farm rather than a commodity basis, he mentioned the advantages claimed for this idea, such as its simplicity, freedom in planning farming operations, elimination of work, red tape and detail involved in annual signups, soil conservation, avoiding public reaction to pig slaughter and plow up campaigns, flexibility, and permanent influence toward keeping more land in grass and legumes: "I doubt whether we are ready just yet for this plan," he added. "Possibly we can make something like it a basis for a signup in 1935 to run through the years 1936, 1937 and 1938."

Burned pastures and starving cattle is the sequel of the drought in Boone county, Ill. Normally wet and green throughout the summer this pasture was parched and barren of feed early in June.

Hog Market Stronger, Returns Greater Than '33



Hogs shipped to packers during May averaged between 15 and 30 pounds lighter than for the same period in 1933 according to the AAA. Marketings of hogs at light weights have been stimulated by prospects of short feed supplies and the relatively high price of corn. Heavy loadings during May and early June delayed the normal price upturn.

"When the large volume of hogs sold during the last few months and the price equivalent of the hog benefit payments are taken into consideration," said Chester C. Davis, administrator of the Agricultural Adjustment Act, "the hog market has been in a substantially stronger condition this year than it was during the same months in 1933.

"Hog receipts in May this year are about the same in number as a year earlier, and a processing tax at the rate of $2.25 per cwt. was being paid by processors out of proceeds of their sale of products as additional income to hog producers as a group.

"Thus, the total return to producers from hogs marketed in May, including the adjustment payments to be made as well as the market returns, was considerably larger than a year ago. This indication of a larger hog income for 1934 is notable inasmuch as the major feature of the plan, the 1934 corn-hog program, has not yet had time to substantially affect the market."

As we go to press, Chicago top hog prices have advanced beyond $5.00. $6.00 hogs are forecast by mid-summer. Steadily declining receipts, higher grain prices and increased buying power, are responsible.—Editor.

Farm adviser J. E. Harris, Mercer county, explaining the procedure followed in distributing free government oil to fight chinch bugs.

Credit Not a Dole Need In Winnebago

Credit and not a dole is what Winnebago county farmers want and need in order to tide them over this season's drouth, Charles H. Keltner, farm adviser, recently told the Winnebago County Relief Committee. Keltner stated that there were as many as 1100 Winnebago county farmers in need of credit with which to buy feed for cattle and hogs. The northern tier of counties in Illinois have been hardest hit by drouth.

Institute of Co-operation

The American Institute of Co-operation will hold its annual meeting at Madison, Wisconsin, July 9 to 14. Illinois farmers, co-operative officials, farm advisers and others are invited to attend. Secretary George E. Metzger is on the program committee. Several members of the I. A. A. marketing staff will probably appear on the program.

The I. A. A. board voted to contribute $100 to the 1934 Institute at its June meeting.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interest of the farmers of Illinois and the nation, and to develop agriculture.

George Thiem, Editor
John Tracy, Assistant

Vote for the Bond Issue

THE Board of Directors of the Illinois Agricultural Association meeting in Chicago June 15 unanimously adopted the following resolution which is of vital interest to all Illinois farmers and taxpayers:—

In the election next November, the voters of Illinois must choose between two methods of financing present expenditures by the State for unemployment relief. One is an additional State tax of $38,000,000 already levied on property, all payable in 1935. The other is an additional diversion of about $50,000,000 in gasoline taxes from their proper use in financing much needed local highway and street improvement and employment therefor, such diverted funds to be used in retiring a proposed State bond issue of $30,000,000 and paying interest thereon. Approval of the proposed bond issue is the only way of preventing the heavy additional State levy on property.

The Illinois Agricultural Association regards either one of these methods of financing unemployment relief as highly objectionable. In holding this position the Association is not opposed to, but favors proper measures for relief of needy persons and for providing the means therefor. It believes that every county and every community alike should be enabled and required to use its own resources reasonably before it is entitled to ask for assistance from the State or Federal government. In its belief, any other system of unemployment relief will tend inevitably to produce pauperism and to create a permanent dole. Holding these views, the Association opposed various relief measures in the regular and special sessions of the present General Assembly and offered the Lantz bills in lieu thereof. In particular it opposed the additional State tax levy and bond issue bills enacted by the first special session of the General Assembly last fall. It is these measures between which the voters of the State must choose next November.

These measures having become law, the Association was forced to choose between the two highly objectionable alternatives. Its position was declared by the following resolution adopted by the delegates at the Danville annual meeting last January:

> "We commend the efforts of the legislative committee of the Illinois Agricultural Association in opposing legislation before the First Special Session of the Fifty-Eighth General Assembly providing for an increase of Thirty-eight million dollars ($38,000,000) in the State tax levy upon property, coupled with the submission of a bond issue to the voters next November. We are forced to recognize that this legislation has been enacted and that unless the bond issue is approved by the voters at the polls, the property taxpayers of the State will be forced to meet and pay an increased tax of $38,000,000 in 1935. We, therefore, favor the passage of this bond issue when submitted but serve notice that in the future, bond issues of this or a similar character will have the determined opposition of this organization, at least until such time as the General Assembly imposes equal and uniform responsibility for poor relief upon every community and county of the State."

In accord with the provisions of the above resolution, the Board of Directors authorize and request the officers of the Association, the Public Relations Committee and the Department of Taxation to take such measures as may seem necessary to secure the favorable votes of agricultural people for the proposed bond issue. We further authorize officers of the Association to cooperate with representatives of other organizations in a State-wide campaign to place these measures properly before the people, reserving the right to explain our opposition to enactment of these measures by the General Assembly.

Acreage Reduction and Drouth

THE "I-told-you-so" attitude of certain metropolitan newspapers seeking to discredit the crop adjustment program because of the drouth is not impressive, to say the least. Little as most Chicago people know about agriculture, they appear to be more intelligent on this subject than some editorial writers. It is obvious that the more acres planted in a year of crop failure, the greater the loss to the farmer. Moreover, those producers who signed contracts will receive benefit payments regardless of whether or not they grow anything.

Such payments may be all the cash income many farmers will have. The crop insurance feature thus becomes a most valuable adjunct of the reduction program.

In sections of normal rainfall total production is not seriously hampered because of a 15 to 20 per cent cut. Such farmers will receive more dollars for the smaller total crop than for a larger one anyway. Thus part, if not all, the shocking disparity between farm and non-agricultural prices may be removed. The critics of production control fail to offer any plan to prevent crop surpluses from impoverishing farmers. Apparently they have no interest or concern in solving this mighty problem which is at the bottom of the depression.

A. F. B. F. Asks Action On AAA Programs

The following resolution unanimously adopted by the executive committee of the American Farm Bureau Federation meeting in Chicago on June 21 was despatched to Secretary of Agriculture Henry A. Wallace, and Administrator Chester C. Davis.

"While we recognize the obligations which rest upon organized agriculture in advocating the principles contained in the Agricultural Adjustment Act, we cannot assume responsibility for continued delay in its administration resulting from technical requirements.

"We have, since the date of the enactment f this law, responded to invitations extended by the administrators to offer them the best judgment of the American Farm Bureau Federation on various problems of administration. In making these suggestions we have, in every instance, endeavored to simplify, co-ordinate, and make more practical the conduct of the commodity campaigns, the educational work incident thereto, and the fulfilling of contract agreements both by the farmers and the government.

Too Many Estimates

"We recognize that much of the activities of the AAA in connection with cotton, tobacco, wheat, dairy products, livestock, and corn have proceeded along lines largely in conformity with these recommendations. It is our opinion, however, that economists and legal specialists appear to be too solicitous of making their estimates and opinions the basis of all activities to the exclusion of the better judgment of higher officials in AAA.

"We believe the time has arrived for higher officials to more definitely assert themselves; to end the issuing of conflicting, repealing, and confusing orders and regulations; to allow the county allotment committees more authority consistent with their responsibilities; to put less stress upon the importance of preliminary estimates of economists in AAA and the respective states regarding state and county allotments and accept certified statements of farmers and county allotment committees; to terminate legal opinions becoming operating policies; and to expedite the issuing of benefit payment checks.

"Much of the confusion and delay encountered in effectively administering the various commodity activities was occasioned by technical requirements. At the present time these technical requirements are causing serious delay in putting into effect the corn-hog program.

ILLINOIS DELEGATES TO NATIONAL 4-H CLUB CAMP AT WASHINGTON, D. C.

Left to right: Miss Cleo Fitzsimmons, extension specialist in 4-H club work, College of Agriculture; University of Illinois; Walter B. Krei, Menard county; Marion R. Yoeman, Fulton county; Frank Krell, Sangamon county; Margaret Anderson, Jefferson county, and E. I. Pilchard, extension specialist in boys' club work.

"We can no longer condone impugning the veracity of corn and hog farmers and county allotment committees set up by such farmers, in orders from Washington or from state administrators, when in our best judgment such orders have for their major purpose justifying preliminary statistical estimates as to hog population in a county or state. We have no hesitancy in stating that with the reductions of hogs from preliminary contracts that were not properly supported with information, a further reduction is indefensible and wholly unnecessary.

End Uncertainty

"Accordingly, we urge the administrators of the Agricultural Adjustment Act to immediately end the present period of uncertainty, by announcing definitely and finally what policies and practices are to prevail in the corn-hog section."

"We believe this resolution merits your careful consideration and immediate action," the message stated. It was signed by all members of the committee including Edward A. O'Neal, Charles E. Hearst, Earl C. Smith, Wm. H. Settle, R. W. Blackburn, C. R. White, and J. F. Porter.

The I. A. A. has consistently urged that every farmer be given a hog allotment only in line with full and proper records and information furnished showing proof of production and marketings in the base period. It will continue to insist that when farmers have complied with such regulations, that government discharge its obligations regardless of variance of farmers' figures with statistical estimates.—Editor.

The decision of the federal district court at St. Louis upholding Congress in abrogating the gold clause of obligations payable in the United States, is an important one. A New York bank in this case sought to collect $1,693 in currency for each $1,000 bond because of the gold devaluation program. In his decision, Judge Chas. B. Faris said: "No person in the nation has the right to make a contract, the effect of which is to nullify, obstruct or circumvent the power of Congress to say what shall be the national money or medium of exchange."

This important case undoubtedly will be taken to the Federal Supreme Court. Final decision will settle frequent criticisms and charges that this act violates the constitution. The attitude of Judge Faris is another illustration of the fact that courts more and more are adhering to the will and needs of the people.

The Frasier-Lempke farm mortgage bill passed in the closing hours of the recent congress, is a far-reaching piece of legislation which already has aroused much controversy. This measure would have the effect of cutting down all farm mortgage indebtedness to present appraised values and sharply reduce interest rates on the newly appraised price. If the creditors cannot agree the court would be required to stay foreclosure proceedings for five years during which time the

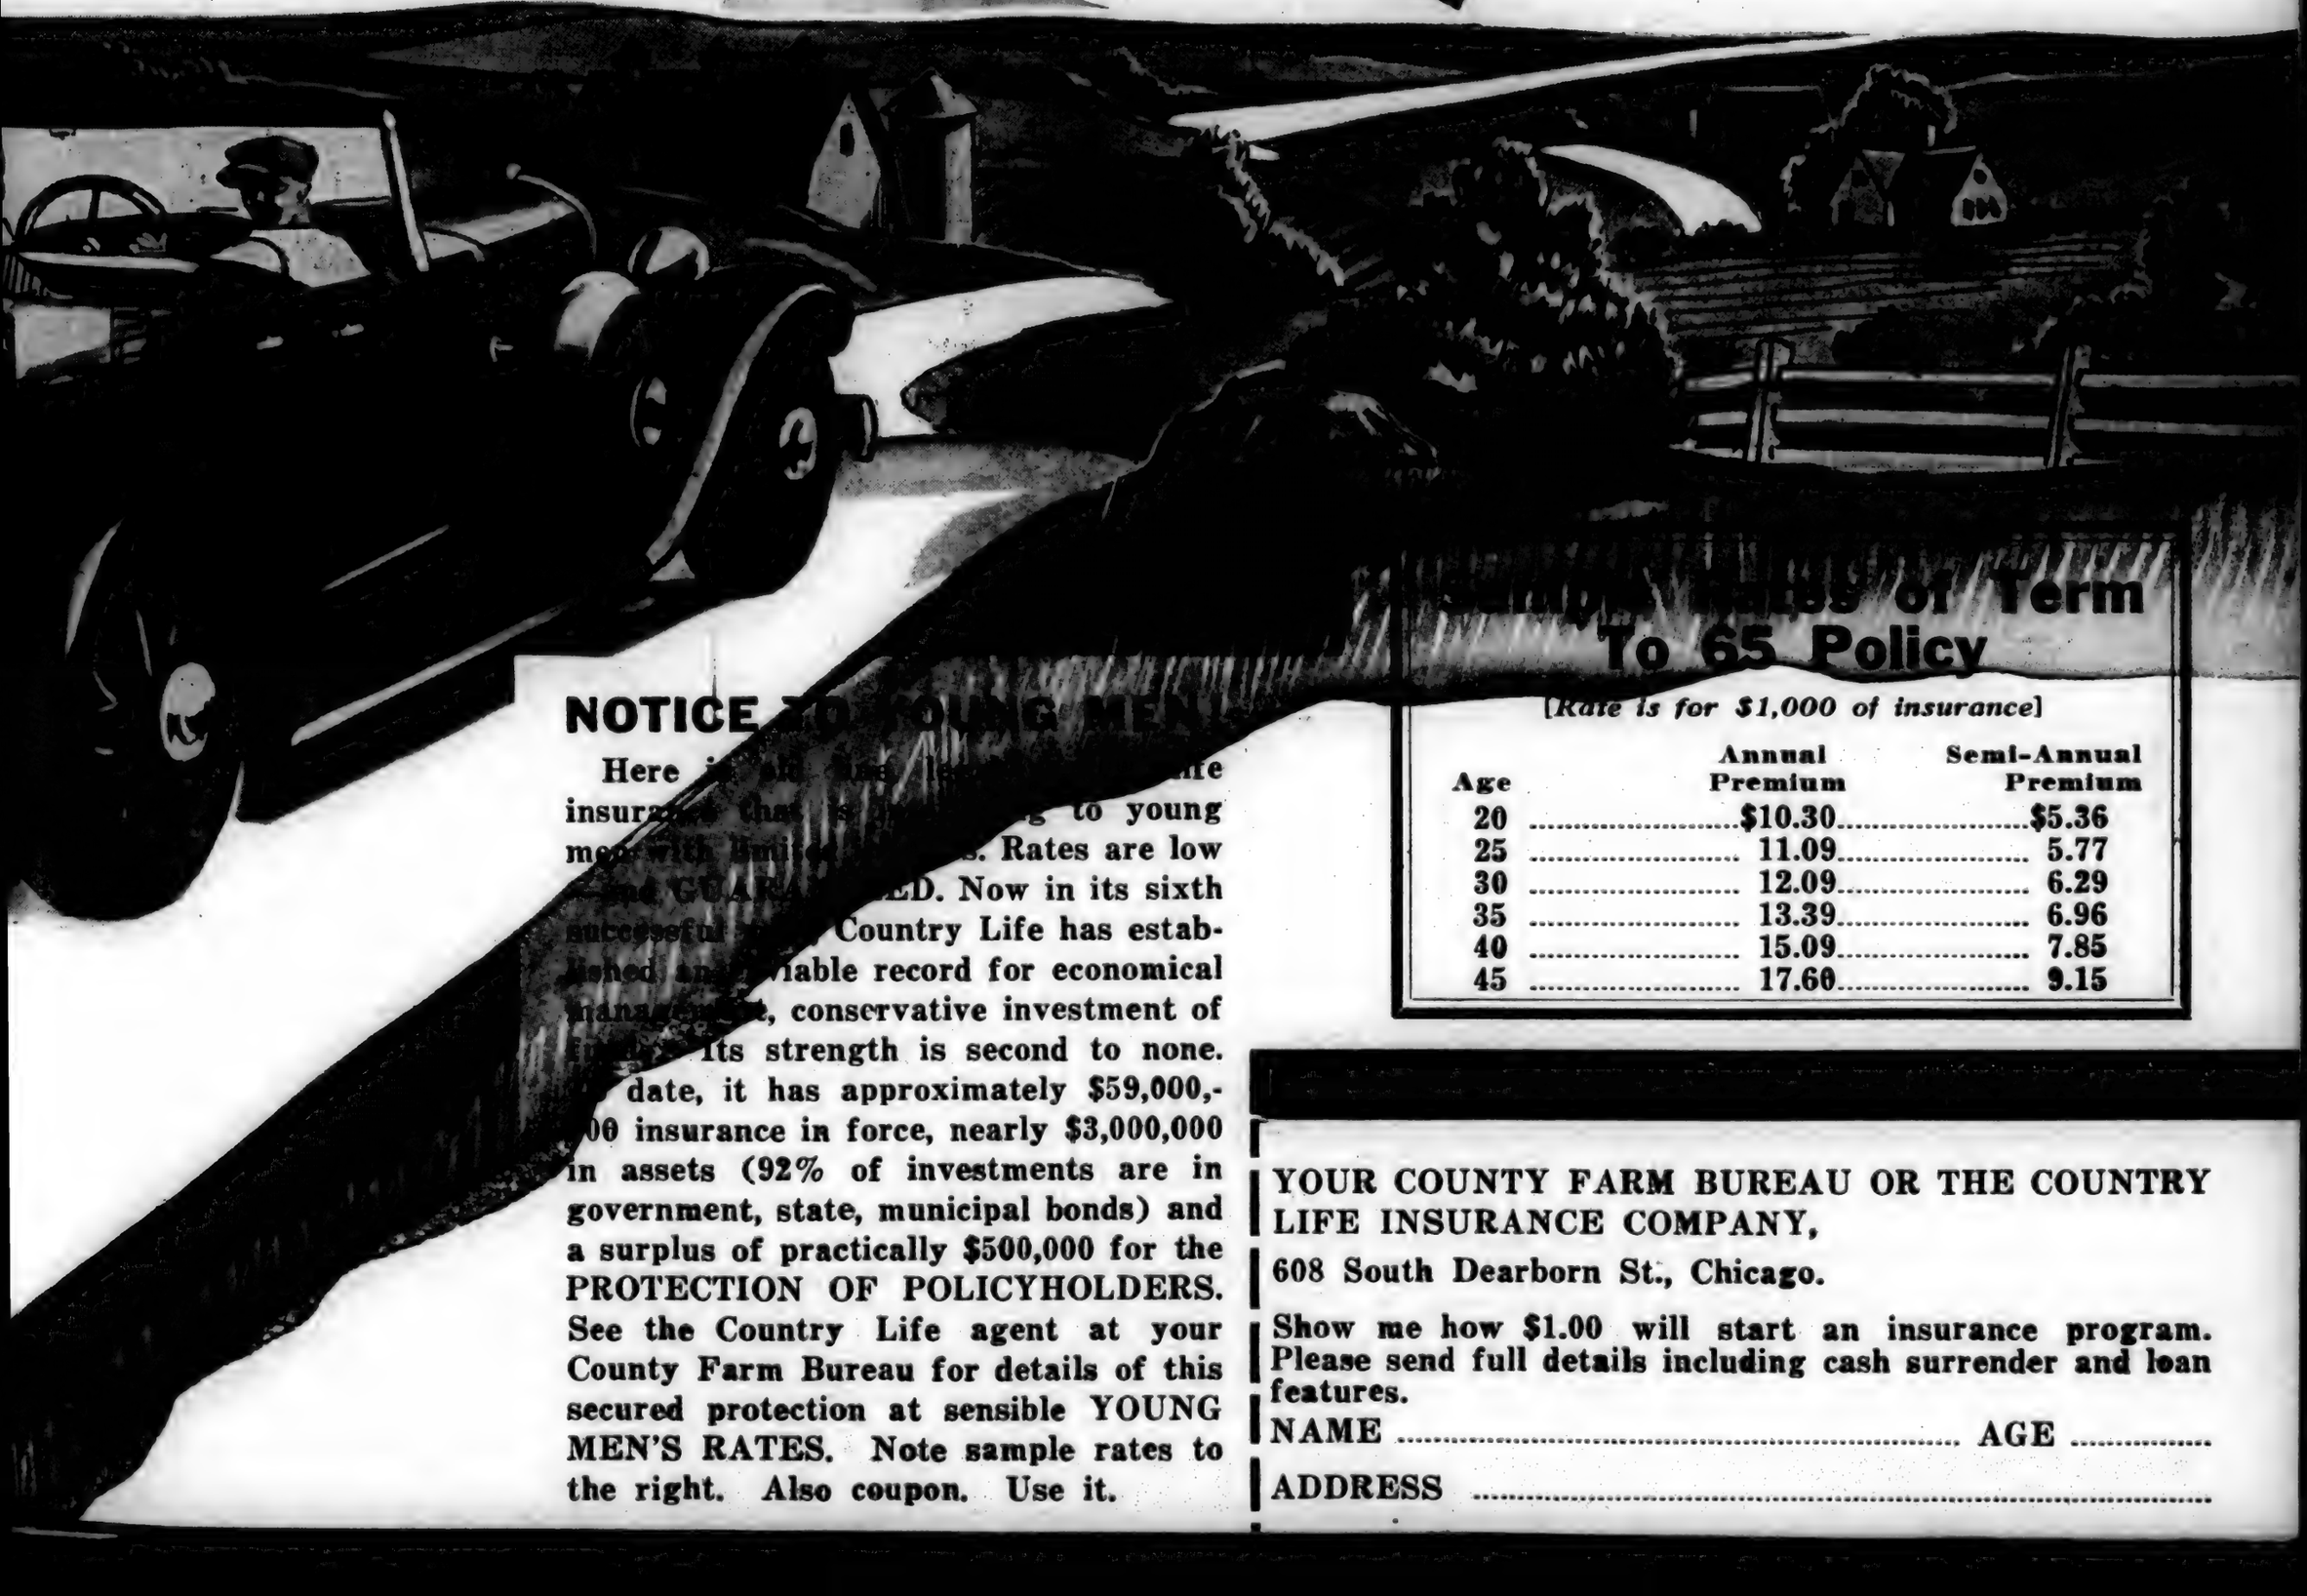
A LIFE INSURANCE PROGRAM in Country Life is the safe, sure road to security, comfort and independence for you or your dependents. Now at low cost, you may meet the uncertainties of the future with your choice of three liberal Country Life policies, each designed to fit a particular need.

OLD AGE PENSION—The Endowment At 65 Policy. All the protection features of life insurance plus a regular income for life after age 65. In case of premature death, dependents receive the benefits intended for you.

ESTATE PROTECTION—the Term To 65 policy. Extremely low cost protection in case of death before age 65. Convertible at any time to Endowment or Ordinary Life. Sometimes known as the "mortgage policy."

PROTECTION FOR DEPENDENTS—the Ordinary Life Insurance policy. Low cost protection which gives beneficiary face value of policy either in lump sum or regular income. Commonly called "Straight Life Insurance."



ALL THE ABOVE POLICIES have cash, loan, paid up and extended insurance values for protection of estate and dependents.

CHOOSE YOUR POLICY now and stick to it. Start your life insurance program at once. The younger you are the greater the saving to you. See the Country Life agent at your County Farm Bureau. He will cheerfully explain all details. Do it today.

Legal Reserve Life Insurance with Annual Dividends

COUNTRY LIFE INSURANCE CO.

608 So. Dearborn Street, Chicago

NOTICE TO YOUNG MEN

Here is life insurance that is appealing to young men with limited incomes. Rates are low and GUARANTEED. Now in its sixth successful year, Country Life has established an enviable record for economical management, conservative investment of funds. Its strength is second to none. To date, it has approximately $59,000,000 insurance in force, nearly $3,000,000 in assets (92% of investments are in government, state, municipal bonds) and a surplus of practically $500,000 for the PROTECTION OF POLICYHOLDERS. See the Country Life agent at your County Farm Bureau for details of this secured protection at sensible YOUNG MEN'S RATES. Note sample rates to the right. Also coupon. Use it.

Building Membership Subject at 5 Meetings

Railroad Officials Tell How They Maintain Personnel, Service

How to build organization, the importance of personnel, serving the member after he has signed, and the new record system occupied the major interest of organization directors, committees, farm advisers, and office secretaries in five district meetings held at Jacksonville, DeKalb, Peoria, Centralia and Danville during the month of June. Secretary George E. Metzger and V. Vaniman, director of organization service, attended and directed the program at all conferences.

P. J. O'Shaugnessy, personnel director of the Rock Island lines, and J. W. Kern, divisional superintendent of the Illinois Central Railroad, addressed the Peoria and Centralia meetings on June 7 and 8 respectively.

"One common enterprise on the Rock Island is service," said Mr. O'Shaugnessy. "All of us must contribute to this one end. We try to make people delighted and comfortable. To do this it is of first importance that we like our jobs. I like to feel that my job is important and very much worth while. It seems to me that you people are doing the most important job in the world, helping the farmer—the man who feeds the world. Yours is the noblest work to which you can devote your time. The money you earn is not important if you are rendering a real service."

Need Credit Unions

Mr. O'Shaugnessy is also president of the National Association of Credit Unions. "The time will come," he said, "when the Farm Bureaus in Illinois like in other states will organize co-operative credit unions as a service to members. The damnable unrestrained usury now being practiced in this country is one of the curses of civilization," he said. "Farmers as well as town and city people are paying up to 42 per cent annual interest. They pay because there is no other place to go."

The speaker stated that the policy of the road is to treat every employee with kindness and consideration and to give every customer a dollar's worth of service for each dollar spent. Personal records are kept of every employee. Each seeks to keep his record clean. The road maintains a pension system with a stipulated retirement income for each employee when he reaches a certain age. There are now 1200 on this list.

FRANK BUTLER OF LEE COUNTY

Volunteer Farm Bureau Solicitor and a new member himself who signed 24 members in the I. A. A. and Lee County Farm Bureau during the Mobilization Campaign.

Complete Records

Mr. Metzger and Mr. Vaniman explained that each county organization director will be required to make a complete record of membership and collections as of the day he assumes office. This report must be accurate. The tabulator machine in the I. A. A. offices will record this information, and regular reports from the counties will keep the record system up to date. Information can readily be taken off the cards each month quickly and accurately. Copies will be mailed to the counties showing individual membership standing and other information.

One of our cardinal principles in maintaining the morale of our organization is to be fair, impartial, and attentive to all suggestions of our employees no matter how trivial, J. W. Kern of the Illinois Central Railroad said in addressing the Centralia meeting. "We try to show appreciation and recognition wherever outstanding service is performed," he continued. "Also when a mistake is made we bring the facts to the attention of those involved. It doesn't cost anything to listen. We get many valuable suggestions for improving our service from employees."

Impromptu talks and remarks were made by county advisers, office secretaries and organization directors.

Observations

(Cont'd from Page 9, Col. 3)

debtor would retain possession of the farm and pay a reasonable yearly rent fixed by the court. Other provisions for scaling down farm indebtedness are included.

This bill attempts to wipe out the serious unfairness to farm debtors resulting from the sharp decline in prices. It seeks to make amends for the failure of inflationary measures up to now to re-establish substantially higher price levels so as to ease the debt burden. Whether or not it obtains the presidential signature, the injury to debtors resulting from deflation will not be corrected until needed reflation, or legislation of this character applying to all debts (not only farm debts) is enacted.

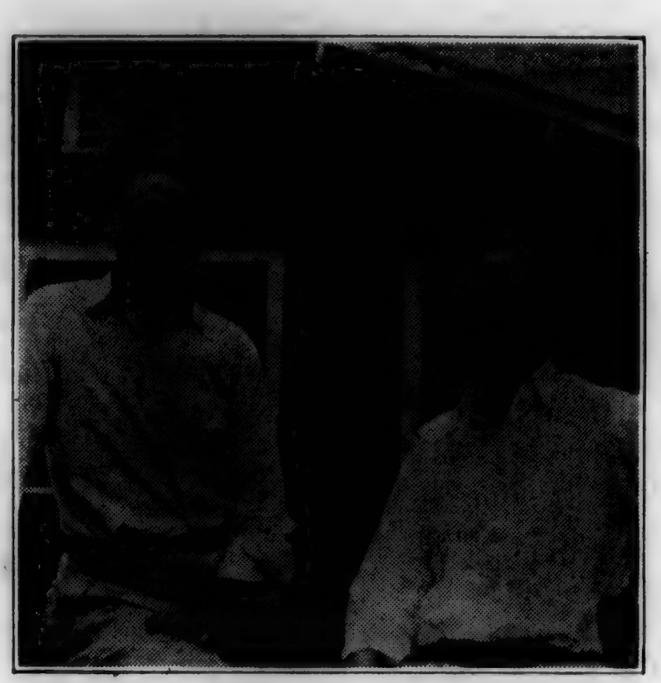
With approximately 55,000,000 bu. of corn sealed in Illinois as a result of the corn-loan program, the value of this project to corn-belt farmers is considerably enhanced by the recent advance in prices. With corn selling at country points in excess of 50 cents per bushel, the corn under seal alone is worth at least 8¼ million dollars more than it was when the loans were initiated. The insistent demand of organized farmers made possible this splendid service. The advance in price will benefit farmers rather than speculators. In the event of a short corn crop, which seems probable, the stored corn also will be a great boon to livestock feeders—E. G. T.

Farmers' Week At World's Fair Set For Aug. 11-18

Farmers' Week at Chicago's Century of Progress Exposition will be celebrated beginning Saturday, August 11, and ending Saturday, August 18. A number of County Farm Bureaus are planning tours to the Fair for this week.

Exhibitors will co-operate by giving special emphasis to those exhibits related to agriculture or involving the use of farm products. More detailed announcements regarding speakers and various events will be made later.

McLean County Farm Bureau, now in the midst of its regular three-year membership sign-up, reported more than 1,500 members signed at the close of the first week. Approximately 500 attended the school of instruction for solicitors June 11. Donald Kirkpatrick, general counsel of the I. A. A., addressed the first report meeting June 14.



A. B. Culp is county organization director, George Clark, chairman of the organization committee.

NRA Price Raising Hurts Movement Toward Parity

Increased prices for things the farmer must buy to a large extent have nullified the benefit of advancing farm prices according to figures taken from the National City Bank bulletin showing actual farm prices and parity prices as defined in the Adjustment Act. The table shows figures as of May 15, 1933 when the Adjustment Act was passed, and May 15, 1934.

Since May 15 this year certain farm prices have advanced considerably as a result of the production control program and the drouth. For this reason present prices are nearer parity than they were the middle of May. Because wool is on an import basis and is protected by a substantial tariff this is the only farm crop which has reached parity. Incidentally wool illustrates the possibilities in raising all farm prices by controlling production so as to make the tariff effective.

The table is not quite fair because it fails to take into consideration benefit payments made or to be made for wheat, cotton, corn and hogs which should be added to the market price. Furthermore crop adjustment has hardly had full opportunity to make itself felt in market prices, particularly on corn and hogs. Corn and hog prices should feel the full influence of the reduction program during late 1934 and 1935.

TREVOR JONES, MANAGER OF CIMCO FARMS, HAVANA, MASON COUNTY, LEFT, AND FARM ADVISER C. S. LOVE

Cimco Farms, owned by the Chicago Illinois Mid-Land Railroad running from Taylorville to Peoria, is demonstrating the possibilities of crop production and soil improvement on the sand lands of the Illinois Valley. Through the use of limestone, ground rock phosphate, super phosphate, sweet clover and alfalfa, the sand land on this farm is being made to produce good crops of corn and wheat.

Several varieties of edible soybeans brought from Japan by Prof. Morse of the U. S. D. A. are being tried out this year. The farm produced 1,600 turkeys last year at a nice profit after charging all expenses including labor. Mr. Jones is aiming to market 3,000 turkeys this year.

Cimco Farms has entertained more than 20,000 farmers from the surrounding counties on its annual field day. Mr. Jones states that the C. & I. M. R. R. has painted 750 cars with soybean oil paint.

Ask Government To Force Sale Sealed Corn

Reports from Washington state that pressure is being brought upon the Commodity Credit Corporation and the Agricultural Adjustment Administration to force the sale of corn under seal on which loans of 45 cents per bushel have been made. Grain merchants and grain exchanges are said to be back of the movement. Prospects for higher corn prices, it is believed, are responsible for the movement by grain buyers to purchase stored corn as cheaply as possible with the expectation of reaping the benefit from any rise in price.

The Federal Land Bank of St. Louis states that loans are now being closed with a second issue of bonds bearing three per cent interest and maturing in 15 years. The bonds are selling above par and are tendered farmers and their creditors in coupon form in denominations of $100, $500, $1,000, $5,000 and $10,000. During May the St. Louis bank distributed $11,167,500 in 3,975 land bank and commissioner loans, the second largest month in its history.

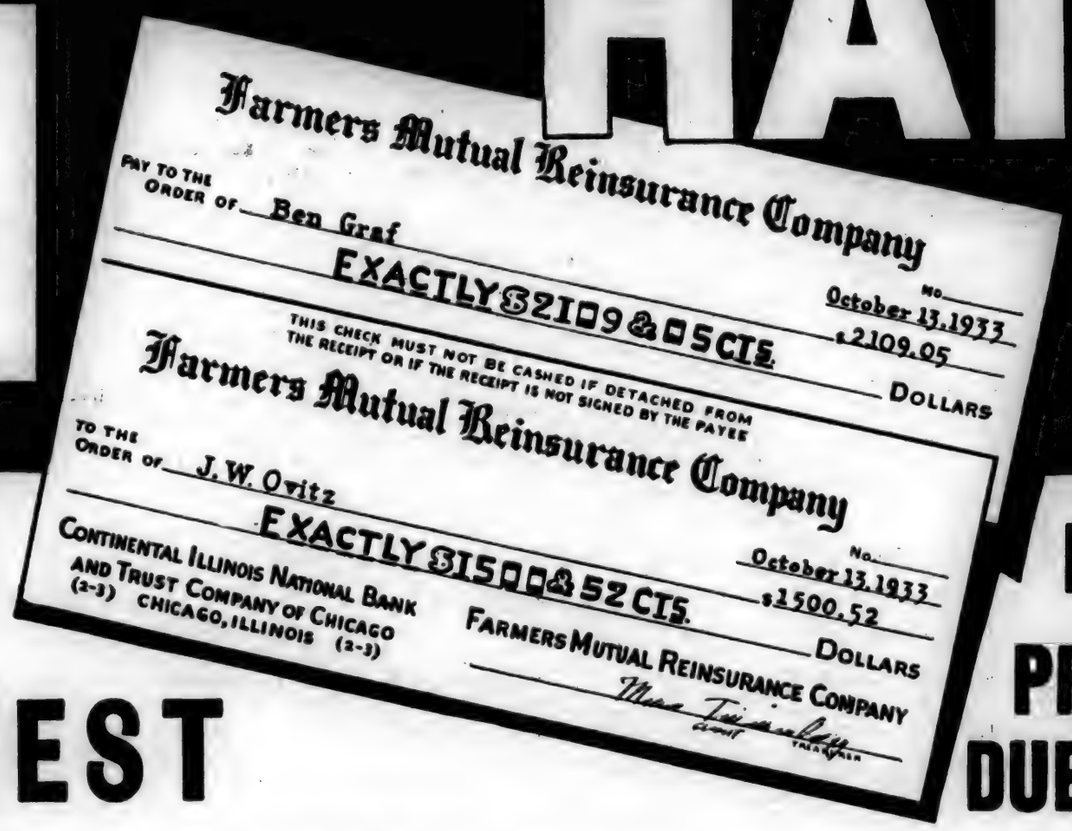
Sealed Corn Moving New Rules on Release

A number of Illinois farmers are taking advantage of the opportunity resulting from higher prices to get part of their sealed corn released for feeding or sale. The owner may secure a release on part of the corn by paying 47 cents per bushel on the number of bushels removed. The extra two cents are to cover interest, insurance and inspection charges. All partial withdrawals of corn will be made under supervision of an official state sealer who will then reseal the crib.

W. W. McLAUGHLIN

Payment for the amount released is to be made to the local bank acting as agent for the CCC and Reconstruction Finance Corporation. The amount paid is endorsed on the back of the note given originally by the owner. The warehouse certificate similarly will show the bushels withdrawn.

As we go to press, Walter W. McLaughlin, state director of agriculture, reports a letter from the Commodity Credit Corp. to the effect that owners of sealed corn may obtain its release if they have a bona fide contract to sell such corn to a responsible purchaser for an amount sufficient to cover the government loan plus accumulated charges. While the buyer is expected to pay for the corn, the producer is liable for the loan until it is paid, although the loan need not be paid until Aug. 1 when it expires. Full information as to the necessary procedure may be obtained from the county supervisory board. Such boards may pay sealers for supervising the full or partial withdrawal of corn from sealed cribs, out of funds on hand in lieu of assessing an additional charge against the owner of the corn. Producers ar· also liable for shortages of corn.



The Chicago branch of the Reconstruction Finance Corporation is receiving approximately 200 letters daily largely from Illinois and Iowa asking for release of part or all of sealed corn. A low percentage of sealed corn is being sold in Illinois. There seems to be a disposition to wait for higher prices.—Editor.

A total of 77 Illinois counties have been designated as secondary drought area by the AAA. Southernmost counties include Washington, Jefferson, Wayne. Counties south of these, and along the Mississippi up to Jersey are not included. Counties south of Crawford along the Wabash also are left out of the designated area.

$4 A THOUSAND *Now* PROTECTS YOUR REMAINING GROWING CROPS AGAINST HAIL!

(TOP) Ben Graf didn't take a chance. His reward was a check for $2109.05 covering hail loss. Mighty nice for Ben!

(BOTTOM) J. W. Ovitz might have been out $1500.52. But in spite of hail he had harvest money from Farmers Mutual.

BE SURE OF HARVEST MONEY IN SPITE OF HAIL—

BALANCE OF PREMIUM NOT DUE TILL AFTER HARVEST

Once hail strikes growing crops (and it can strike yours as well as the other fellows') you are powerless to prevent loss. But, hail insurance in Farmers Mutual will give you a harvest check in spite of hail. Only $4 a thousand NOW, when you are low on cash, protects you through the hail season and assures you of harvest money if your crops are destroyed. If no hail loss is incurred, you've had protection at very little expense. See your County Farm Bureau at once for details.

$4 a thousand NOW protects you against hail loss until after harvest. Then, when you have extra money, the remainder of the premium is due and payable. The total cost of hail protection is so low that no farmer should be without it. Get details quickly.

FARMERS MUTUAL RE-INSURANCE COMPANY

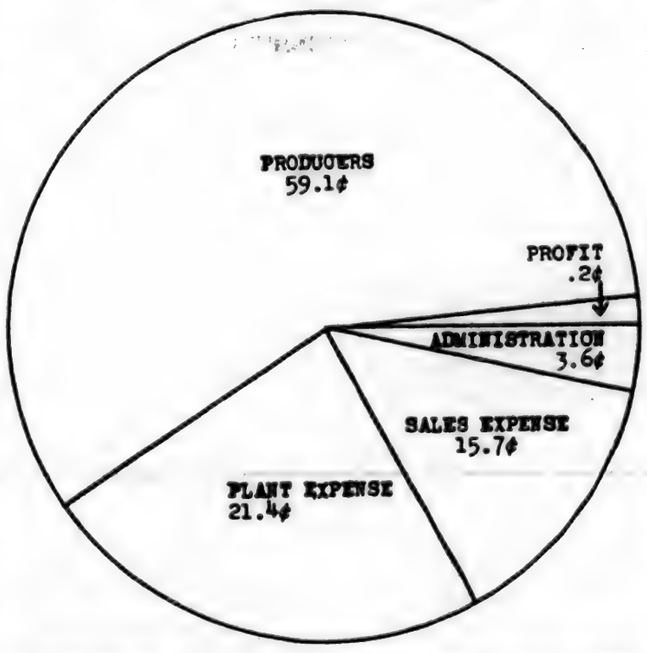
608 S. Dearborn St. Chicago, Illinois

Wanted: A Larger Share of the Consumer's Dollar

By Frank Gougler and J. B. Countiss

A STORY is related that a minister with his small daughter entering church one Sunday evening, dropped 50c into the collection box. When the congregation had departed after the services the minister checked up on the evening's collection. To his surprise the box contained only the lone 50c piece he had deposited. Noting her father's disappointment the little girl remarked, "Dad, if you had put more in you could have taken more out."

This statement applies quite generally to life. We all recognize that we usually get just about what we pay for. It is true of co-operative effort. A good example is seen in the Farm Bureau movement. Illinois has the highest Farm Bureau membership fee of any state in the Union. And our state leads all others in Farm Bureau accomplishments.



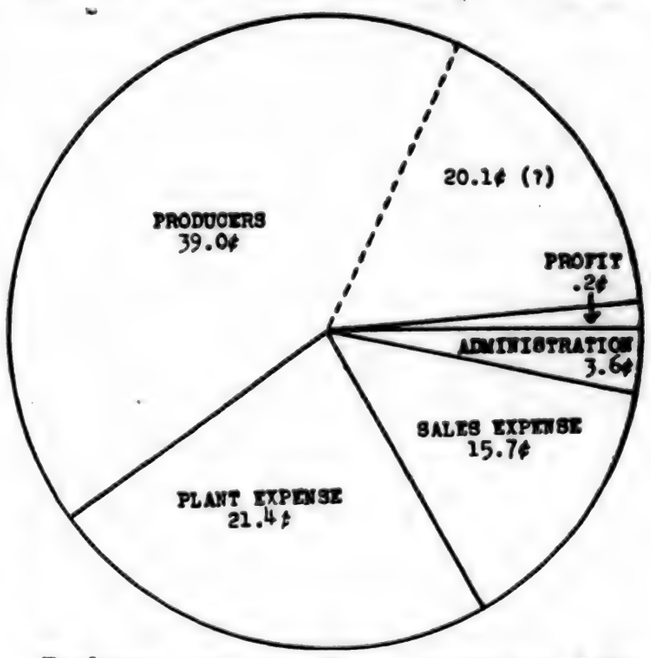
A Marked Difference

The same holds true in co-operative marketing. Studies made of the different methods of marketing milk in Illinois reveal this fact in a striking manner. Where producers own their own processing and distributing plants they fare best of all. Bargaining associations are much better than no organization at all. The records show a marked difference in the percentage of the consumer's dairy dollar going to the producer in these various situations.

For example, last year a co-operative milk marketing association in Illinois that controlled the product from producer to consumer was able to return to its producers out of every dollar spent by the consumer for dairy products, approximately 60c. On the other hand, as an average, for all of our milk bargaining associations in Illinois, only 40c out of the consumer's dollar spent for milk dribbled back to the producer. The bargaining association, however, was found to be of much more value than no association. This is proved by conditions at Danville before that market was organized. Prior to late last fall, the producers here had never been organized. Producers were receiving only 20c of the consumer's dollar spent for fluid milk and cream. Conditions among the dairymen got so desperate that they were forced to organize.

In order to bring out the comparison more clearly, let us assume that on a given market consumers spend annually $100,000 for milk and other dairy products. According to our experience in Illinois, where producers own their own facilities for distribution, $60,000 would go back to the producers. Markets with bargaining associations would return $40,000 to producers, while on unorganized markets, only $20,000 reaches the producers' pockets.

Such facts explain many other startling revelations. For example, it was reported recently that the president of one of the large national chain dairies received a salary of $100,000 in 1929 which was increased to $168,000 in 1933. During this same period prices to producers went tumbling to unprecedented low levels. This demonstrates that private owners of distributing facilities are not going to relinquish their hold on profits even from sympathy for the producer when he is in distress. The salary of this one man is sufficient to employ fifty good managers for co-operative plants and much more and better services could be rendered to producers by fifty good plant managers.



Producers get nearly 60c of consumer's dairy dollar where they process and distribute their own milk.

If producers of agricultural products are to see better times they must strive to get more of the consumer's dollar. In a recent issue of the Consumer's Guide, it was shown that it required during 1929 fifty-two cents of the consumer's dollar to process and distribute fourteen major foods. In March, 1933 it took 69c and in March 1934 it took 62c. In short, it's twice as profitable to process and distribute as it is to produce.

Why should not the producer then give more of his time and attention to processing and distributing his own products? This is exactly the purpose of establishing co-operative creameries in Illinois.

Co-operative creameries can return to producers more money for their butterfat than private plants will or can pay. Abundant evidence is available to prove this point. In handling butterfat after it is produced there are three steps involved; namely, assembling, processing and selling. The first of these none can do better than the producers themselves. This comes largely from the fact that a state-wide system is able to allocate definite territory to each plant which makes it possible to save money by avoiding wasteful competition between plants in butterfat procurement.

The cost of processing butterfat in co-operative plants may not be done any cheaper than is done in other plants. But co-operative institutions are in much better position to make a better product. The difference comes from the fact that as producers sell their product to privately-owned plants their interest in that product ends when pay is received for the butterfat. The producer has little or no interest in the quality of butter to be made, since it isn't his butter. When producers sell butterfat through their own plants the producers' attitude is quite different. In this case, the butter is still his butter and he realizes that butter of higher quality sells for more money, costs less to sell it and results in increased consumption. Then too, through the cooperative system, with the producers organized it is much easier to carry on educational work than with unorganized producers. Here is some support-

Producers get only 39c of consumer's dollar when milk is sold to private processors and distributors.

ing evidence on the points just mentioned:

Land O'Lakes Creameries, Minneapolis, Minnesota, was established in 1922 with 300 member creameries. That year these creameries produced only 10% of Land O'Lakes Butter (93 score). Last year 420 member creameries produced over 60% of 93 score butter. Such results could never have been accomplished without organization. Again this high quality butter results in increased consumption. It is reported that in some co-operative creamery districts in Minnesota butter consumption is as high as 42 pounds per capita, while the average in the U. S. is only about 17.5 pounds. Where an abundance of high quality butter is always available, we find that oleomargarine sales are almost negligible.

In the sale of butter the co-operative type of marketing has little advantage over the other, other things being equal. However, if a co-operative creamery succeeds in making better butter, and it should, then such an institution has a tremendous advantage.

The Farmers Creamery Company at Bloomington, Illinois, netted producer members 3¾c per pound butterfat more money during the first year of operation than would have been received without that plant. The Producers Creamery of Peoria made one and one-quarter million pounds of butter during its first year of operation. Nearly $10,000 in patronage dividends were returned to members the first year. Last year a co-operative creamery at Columbia, Indiana, made in its 10th year in excess of 3,000,000 pounds of butter. Patronage dividends (private creamery profits) amounted to more than $100,000. At Constantine, Michigan, last year a co-operative plant made 4,781,698 lbs. of butter, for which it paid its members 22.16c as an average for all butterfat, or an average of 1.97c over the Chicago 90 score butter market for the year. Producers might do well by digging up their cream check stubs for last year, average them up and make the comparison. C. W. Simpson, Farm Adviser, White County, Illinois, whose father is a patron of this creamery, reports that during the second two weeks of June last year, farmers received 24c net for their butterfat at the Constantine plant while producers in White County, Illinois, during the same two weeks were receiving only 18c, or six cents less.

The only sound reason for establishing farmer-owned and farmer-controlled creameries is that the producer may receive more money. With a margin between producer and consumer prices which average more than 200%, it appears indeed encouraging and inviting for producers to engage in processing and distributing their own products.

PRODUCERS DAIRY AND CREAMERY FLOAT IN FLAG DAY PARADE PEORIA, JUNE 14

This float was conceded by many to be the best in the parade says J. B. Countiss, director of milk marketing. Peoria Producers made 1,194,273 pounds of butter during its first year of operation—paid dividends of $9,639.94.

Cream Prices Advance In Southern Illinois

L. E. Lingenfelter of Pulaski county, a director of the Farmers Mutual Reinsurance Co., reports that sinc I. A. A. meetings have been held in that territory in the interest of a co-operative creamery at Carbondale, a nearby private creamery has established truck routes and is picking up cream twice a week at farms in that section. This creamery also has raised the price to within one cent of that paid by direct shippers in Chicago, he states, whereas local prices in the past have been four to five cents under Chicago.

This situation is typical of all co-operative marketing development. When farmers organize to process or distribute their own commodities local prices paid by private dealers invariably go up. It pays to co-operate.—Editor.

Soil Erosion Is Farm Enemy

According to F. A. Fisher, chief of federal erosion control in Illinois, soil erosion takes out 21 times as much fertility from the soil annually as is taken out by crops. Experiments performed by the Missouri station showed that a slope of four per cent where soil is exposed continuously erodes to a depth of seven inches in 20 years. The same amount of erosion requires 3,000 years where the slope is planted periodically to grass and alfalfa.

C. C. Burns Resigns To Go With New Creamery

C. C. Burns, for the past 11 years farm adviser in Champaign county, recently resigned to accept the managership of the new Producers Creamery of Champaign.

Mr. Burns went to Champaign from JoDaviess county where he served also as farm adviser. He was one of the successful state solicitors who took part in the memorable I. A. A. reorganization and sign-up campaign in 1919 and 1920. Mr. Burns made a splendid record in both counties in developing co-operative marketing, seed corn improvement, community organization and training of leadership. The Producers Creamery is fortunate in getting a manager of his experience, training, and business ability.

The new building which will house the Champaign Producers Creamery is being remodeled and will be equipped with the most modern machinery for making Prairie Farms high quality butter. Every effort is being made to speed its early opening.

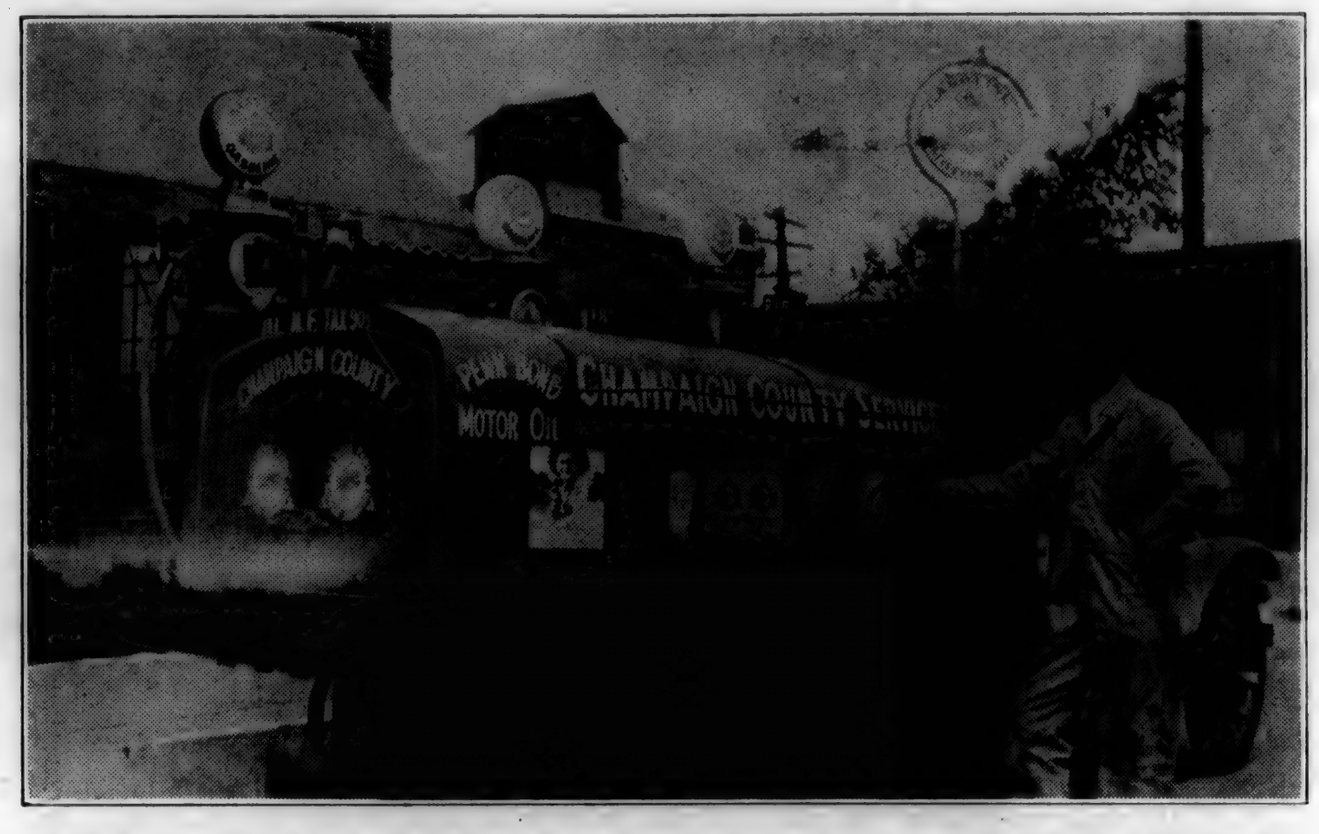
Farm Bureau Day, Galva July 4, O'Neal To Speak

Farm Bureau Day will be celebrated on July 4 at Galva in Henry county as a feature of homecoming week sponsored by the American Legion and local business groups.

The Henry County Farm Bureau invites farmers from adjoining counties to attend the big celebration Independence Day where Edward A. O'Neal, president of the A. F. B. F., is billed as headline speaker.

I. F. S. Holds Four Rousing Meetings

To hear facts and figures from specialists in many fields, to listen to plans for the carrying on of the fast, record-breaking pace set so far this year, to receive congratulations and prizes as a reward for their efforts, salesmen, managers, and directors of the 58 County Service Companies affiliated with Illinois Farm Supply Company attended a series of four district meetings recently. To Decatur, June 12, went a good 200. To East St. Louis, June 13 went another 200. Peoria attracted 150, June 14, while DeKalb drew 200 more June 15.



All meetings were headed by I. F. S.'s president, Fred E. Herndon, who spoke to each gathering on "A Round-up Of Facts" wherein he presented figures to show that County Service companies were destined to occupy an even greater place in the life of Illinois farmers. L. R. Marchant, manager of Illinois Farm Supply, in talking on "A Daring Lead" brought out the fact that all companies were well out in front of last year's record business and that all indications show that the lead would be increased before the end of the year in spite of conditions and opposition.

Explains Use Lubricants

Prof. R. I. Shawl of the Farm Mechanics school, University of Illinois, explained the refining, blending and correct use of all forms of petroleum products. A lighted board on which were mounted samples of crudes and refined products enabled all present to clearly understand the most technical points.

The afternoon session was headed by a talk on "Gear Tooth Lubrication" by H. M. Fraser, of the International Lubricant Corp., New Orleans, La. Mr. Fraser stressed the importance of using lubricants that will withstand the terrific pressures found in modern motor and gear construction. A. B. Pattou of the Glidden Company, Chicago paint manufacturers, compared "Soyoil vs Soy Bean Oil." He showed with panels and samples where Soyoil Paint contains a greater amount of soy bean oil than other paints and was better for farm use than ordinary paint. E. J. Fricke of the Indiana Farm Bureau delivered a stirring talk on the necessity of stressing organization when selling merchandise to farmers. His subject was "Privileges of a Ringside Seat." The meetings voted to send greetings to the Indiana organization through Mr. Fricke.

The evening sessions were given over to the announcement of prize winners in the Future Order Contests for Motor Oil and Fly Spray, details of which are given in another article in this issue. George Bunting conducted this phase of the meeting. Then followed an interesting two hours devoted to a talking moving picture featuring Brunswick Tires and a talk by Frank Williams, Brunswick sales representative from Akron, O.

John Parker, one of the industrious oil truck salesmen with the Champaign County Service Company, in front of the Cler Service Station, Rantoul. The cabinet is used to display Illinois Farm Supply Company products, when calling on patrons. Note the advertisement "SURE, I'M A FARM BUREAU MEMBER!" mounted in the frame taken from the back page of the June I. A. A. RECORD. Parker was one of the leading salesmen in the state in the future order contest.

Champaign Co. Wins Future Order Contest

Champaign County Service Company led the state in the 1934 Future Order Contest of Illinois Farm Supply Company with 28,686½ gallons. St. Clair Service Company was second with 22, 210 gallons and Monroe county was third. The contest was based on the average gallons sold per man in each company.

First, second and third on this basis were 2,796.6 gallons for 10 men in Champaign county, 2,776¼ gallons for eight men in St. Clair county, 2,732⅔ gallons for three men in Monroe. Whiteside Service was fourth with 2,256⅓ gallons average for six men, Madison Service fifth with 2,152½. Carroll, Marshall-Putnam, McDonough, Winnebago, and Lee were next in order.

Oliver Voelkel of St. Clair Service Company was high man in the state with a record of 5,369 gallons. E. C. Harvey and Reid Pulliam of Champaign County Service Company were second and third. John Parker of the same company placed sixth in the state, E. Geil of LaSalle county was fourth, Ray Putman of Henry-Stark Service Company fifth.

Russell Stewart, manager of Champaign County Service Company, was awarded a standard Westinghouse washing machine. Manager Grossmann of St. Clair won a vacuum sweeper and Manager McWard of Monroe, an electric food mixer. Suitable prizes were awarded the leading salesmen, including truck tires, washing machine, pressure cooker. Twenty-one salesmen who sold more than 3,000 gallons of petroleum products automatically become charter members of the honorary club, announces L. R. Marchant, manager of Illinois Farm Supply Co.

Whiteside Is Victor In Fly Spray Sales

Whiteside Service Company carried off first honors for the second consecutive year in the fly-spray contest sponsored by Illinois Farm Supply Company. Manager Chet Becker won a hat, and cash prizes were awarded Burnie Vos and Earle B. Johnson of the same company who led the entire state. Vos made 139 individual sales. Vos, Johnson and S. M. Howe, Whiteside Service Company's three high salesmen, sold more than 88 per cent of the company's total gallonage.

BURNIE VOSS

Quad Cities Milk License

AAA Finally Acts After Months of Delay

THE retail price of milk at the Quad Cities was raised from six to nine cents June 1 when the new marketing agreement went into effect. Under the new plan farmers are being paid $1.60 per cwt. for 3.5 per cent base or fluid milk. Class II used for fluid cream will bring approximately $1.25 with 92 score butter selling at 25c wholesale Chicago. Class III, condensed, will bring the price established by the evaporated milk code or not less than 3.5 times 92 score butter plus 20% plus 10c per cwt. Class IV 3.5 times 92 score butter plus 10%. Dealers may not charge less than 7.5 cents for milk of 3.9 per cent butterfat content or less and not less than 8c for 4% milk. The going price was established at 9c.

The licensing of dealers and inauguration of the milk marketing agreement is the result of more than a year's effort by the Quality Milk Association and Illinois Agricultural Association to stabilize the market and secure a higher return for the producer. For about a year milk has been retailing at six cents a quart and farmers have been netting around 85 to 90 cents per cwt.

Delayed Plan

Milton Hult, one of the milk dealers, and Ned Curtis, president of the Illinois-Iowa Milk Producers Association which Hult and other dealers fostered, are reported to have used their influence, making many trips to Washington, to delay the initiation of a marketing plan.

Quality Milk took the position that all fluid milk producers who have regularly supplied the market should be placed on the same basis and each be compelled to bear a proportionate share of the surplus. The I. & I. group which includes mostly former sour cream producers wanted to keep the advantage it had through selling a larger percentage in the fluid class to certain dealers.

Frank C. Baker, market administrator at Chicago, is in charge of the Quad City market for the AAA. The new price schedule gives the distributors with large fluid outlets a very favorable margin of profit and will increase returns to producers around 30 to 40 per cent.

The marketing agreement has standard provisions and compels the distributor to deduct a check-off of two cents per cwt. from all producers, supplying the market, to defray operating expenses of the administrator.

In addition the distributor must deduct an additional 4c per cwt.—total 6c—from milk delivered by non-members. The Quality Milk Association by agreement with distributors it supplies, receives a check-off of 4c per cwt. for operating expenses on milk delivered by its members. The administrator will use the additional 4c contributed by non-members to employ testing and checking service for their benefit and protection.

An application for licensing of dealers and a marketing agreement has been filed for the Peoria market by the legal department of the Illinois Agricultural Association.

Rockford Milk Producers Get $1.85 For Class I

The Mid-West Dairymen's Company representing some 700 producers around Rockford was successful recently in getting the Class I price of milk raised from $1.50 to $1.85 per cwt.

As a result of the serious drouth situation in northern Illinois a mass meeting of milk producers was called for June 6, reports Manager Wilkie Lee. About 600 attended. The consensus of opinion was that $1.85 per cwt. for Class I would be the least that could be accepted considering the sharp increase in cost of production resulti g from the forced purchase of high-priced feed. The dealers realized the serious situ.tion and agreed to meet the producers' demands without a further confer nce.

Class I is the only classification of milk sold to 11 of the 12 dealers buying from the Association. They pay the Cl. ss I price for milk irrespective of its use. One dealer buys Class II milk at the condensery price, now $1.25 a hundred, for ice cream mix. The association purchased 13 carloads of alfalfa hay for their members which was delivered at approximately $19.25 per ton.

As we go to press Pure Milk Association is preparing to ask for an advance in the present base price of $2.00 per cwt.

Editor, I. A. A. RECORD:

"Thoughts on the New Deal" is about as good an article on the subject as I have read. Keep up the good work.—E. M. "Farmer" Miller, McHenry county, Ill.

Ask Cut in Auto License And State Gas Tax

At a recent meeting in Chicago, steps were taken toward starting a campaign to cut state motor license fees on automobiles and trucks to $3 and to reduce the state gas tax to two cents.

At the June meeting of the I. A. A. board it was agreed that this proposal should be carefully studied before any action or policy is announced. The problem that immediately presents itself is "will such reductions leave sufficient revenue to pay the interest and principal still due on the $160,000,000 of state hard road bonds voted a number of years ago?" If such reductions are voted will property be taxed additionally to make up any shortage of funds needed to pay interest and principal on outstanding bonds and on emergency relief loans against which gas tax revenue has been pledged?

John C. Watson, director of taxation, is engaged in working up data to be submitted at a future meeting of the I. A. A. Board.

Illinois Grain Corp. Adds New Members

The Milledgeville Farmers Elevator Company, Carroll county, and the Burt and Richmond elevators in Tazewell county recently joined the Illinois Grain Corporation. These additions bring the total membership of the state regional up to 162 elevators and county grain associations.

162

As a result of the poor small grain crop of last year and the corn sealing program, elevator handlings of grain this year are considerably below those of 1933.

"There isn't any evidence that the trade (dealers and processors) is paying any of the processing taxes—except possibly for brief periods the tax on hogs," says Dr. Frederic C. Howe, consumers' counsel. "All the facts we have been able to collect indicate that processors generally, and this includes millers, have increased their margins between what they pay for their raw materials and what they charge for their products, enough to cover fully the taxes.

"Millers have passed the taxes on to the bakers but the bakers in turn have raised the price of bread." Packers have been passing the hog processing tax on to the producer.

HOW DO YOU MEAN YOU GET YOUR FARM BUREAU DUES BACK?

ON FARM BUREAU AUTO INSURANCE! LOOK AT THESE RATES--

"FOR ONLY $15.40 INITIAL PAYMENT, AND $8.40 TWICE A YEAR THEREAFTER, I GET FULL COVERAGE ON A NEW FORD, PLYMOUTH OR CHEVROLET! BROTHER—IT SURE PAYS TO BE-LONG TO THE FARM BUREAU!"

They're Better Driving Risks! That's Why Farm Bureau Members Enjoy Such Low Rates!

Here's what Farm Bureau Members get because they are the best driving risks—protection up to $10,000 for injuries to other people; up to $1000 for damage to the other fellow's property; insurance against fire, theft, pilfering, windstorm, hail and collision with any object. Actually—savings amount to nearly $25 a year! How can you afford to drive without adequate insurance when it costs so little? See your County Farm Bureau insurance agent at once for details of Surplus-Fee Policy on your car!

WATCH YOUR DRIVING THESE "TOURIST" DAYS

Tourists just don't know about the hazards, curves, side roads, cross roads in your community. It's up to you to drive carefully that you don't figure in a costly or fatal accident that is "nobody's fault." And when you're a "tourist"—don't throw care to the four winds. Take care when you drive wherever you are. Accidents are costly—and needless.

ILLINOIS AGRICULTURAL MUTUAL INSURANCE CO.
608 S. DEARBORN ST., CHICAGO, ILL.

The Illinois Agricultural Association RECORD

Number 8 | AUGUST, 1934 | Volume 12

Debt Relief Under Frazier-Lemke Amendment

FARMER "A" of La Salle county, Illinois, has a $12,000 mortgage at five per cent on his 120 acre farm. He also has a chattel mortgage of $1,500 at six per cent, and additional unsecured notes at seven per-cent amounting to $1,000 — a total debt of $14,500.

He has been unable to pay $760 annual interest and keep up the taxes. Creditors have been patient but have finally decided to foreclose. What can he do about it?

He can go to his creditors and ask for a scaling down of interest, principal, or both. Or he can go to the county conciliation commissioner appointed by the federal district court, and ask him to intervene toward securing a scale-down or extension of his debt.

Let us assume that the creditors are unwilling and insist on foreclosing. Under the Frazier-Lemke amendment to the federal bankruptcy act, Farmer "A" may have his lawyer draw up a petition to the federal court that he be adjudged a bankrupt, that his property be appraised, his exemptions as prescribed by the state law ($400 of personalty in Illinois in case he is the head of a family) subject to any liens thereon, be set aside, and that he be allowed to retain possession of the remainder of his property.

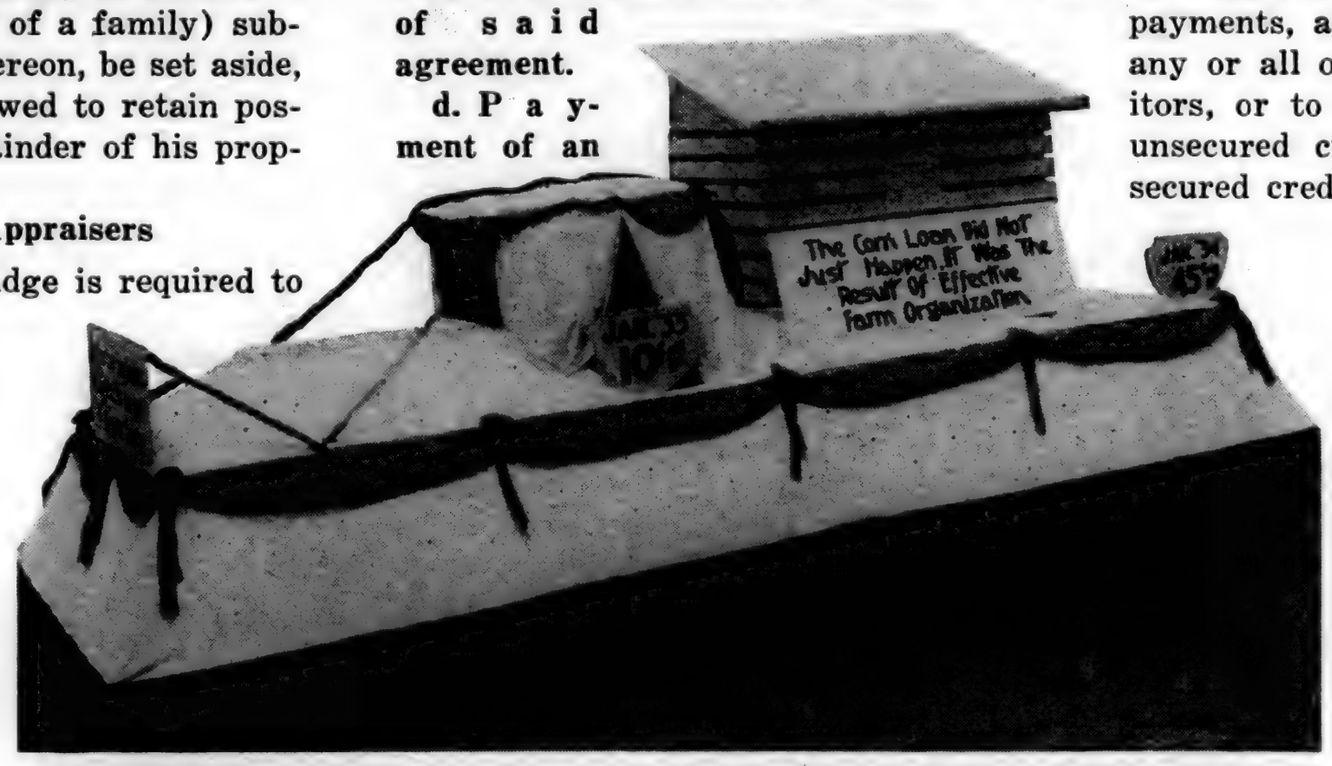
Appoint Appraisers

Thereupon the judge is required to appoint appraisers to put a fair and reasonable value on the property of Farmer "A" — **not necessarily the market value at time of appraisal.** Any creditor, or Farmer "A" may make objections and exceptions to the appraisal by appeal to the court.

After the value of Farmer "A's" property has been fixed by appraisal, the referee in bankruptcy is required to set aside Farmer "A's" exemptions subject to the chattel mortgage. The referee shall further order that Farmer "A" may retain possession of the remainder of his property subject to the mortgages up to the appraised value.

If the mortgage holders agree, the trustee appointed by the court shall sell to Farmer "A" his farm, and chattels at the appraised value upon the following terms and conditions, **and upon such conditions as in the judgment of the trustee shall be fair and equitable:**

a. Payment of 1 per centum interest upon the appraised price within one year from the date of said agreement.



b. Payment of 2½ per centum of the appraised price within two years from the date of said agreement.

c. Payment of an additional 2½ per centum of the appraised price within three years from the date of said agreement.

d. Payment of an additional 5 per centum of the appraised price within four years from the date of said agreement.

e. Payment of an additional 5 per centum of the appraised price within five years from the date of said agreement.

f. Payment of the remaining unpaid balance of the appraised price within six years from the date of said agreement.

WHITESIDE COUNTY FARM BUREAU FLOAT IN CELEBRATION AT STERLING.

One Per Cent Interest

Interest shall be paid on the appraised price and unpaid balances of the appraised price yearly, as it accrues, at the rate of 1 per centum per annum and all taxes shall be paid by Farmer "A."

The proceeds of such payments on the appraised price and interest shall be paid to the lien holders as their interests may appear, and to the trustee of the unsecured creditors, as their interests may appear, if a trustee is appointed.

If Farmer "A" is fortunate enough to secure the consent of the creditors to a reasonable reduction in the face value of his debt, he is privileged to dispose of any part of it provided he pays the appraised value of such part to the secured creditors as their interests may appear, and the trustee of the unsecured creditors as his interest may appear.

If Farmer "A" fails to comply fully with the terms and conditions as to payments, as provided, both to any or all of the secured creditors, or to the trustee of the unsecured creditors, then such secured creditors or the trustee may proceed to foreclose.

However, let us assume that one of the secured creditors of Farmer "A" files written objections to the manner of payments and distribution of Farmer "A's" property. Let us

Farm Bureau Day At State Fair August 24

FARM BUREAU DAY will be celebrated at the Illinois State Fair on Friday (August 24) as in former years. The Fair opens officially on Aug. 18 and continues until Aug. 25. The big I.A.A. tent with parcel checking facilities, drinking water, chairs and exhibits, will be located in approximately the same position as last year. The Country Life Queen Contest in charge of V. Vaniman, will feature the contest winners from 34 counties chosen last winter. This event will be held in the coliseum and will begin at 10:30 A. M.

Personality, natural beauty, poise, charm, etc. were among the points followed by the judges in selecting the winners from more than 600 young ladies who competed in the 1934 contest, says Mr. Vaniman.

A huge triangular platform four feet wide and sixty feet on each side —total 180 feet—will be constructed in the coliseum where judges will select the Country Life Queen of Illinois for 1934 and her Maid of Honor. This will be the fourth annual state contest.

Complimentary tickets will go to all counties having entries. More than 5,000 people witnessed the selection of Miss Roma Breimer of Lee county as state winner last year.

Harvey J. Sconce, an official of the Century of Progress, one of the judges at the 1932 contest, gave the idea and plan to officials of the World's Fair last year. They turned it over to a newspaper (Tribune) which sponsored a personality contest modeled after the Country Life Queen contest.

I. A. A. headquarters primarily will be a place where Farm Bureau members and their friends can rest and visit. The committee from the I. A. A. staff is planning to have musical entertainment by 4-H Club orchestras and other talent discovered during a series of lyceum meetings arranged by County Farm Bureaus last winter. The Farm Chorus under the direction of D. E. Lindstrom will be a special feature. It is planned to install a radio in the tent and bring in daily market reports for posting on the blackboard. A short speaking program will be held in connection with the personality contest.

A banquet in honor of the 34 county entries will be given Thursday evening, August 23.

Names of county winners are as follows: Rose Brewer, Bond county; Lillian L. Fox, Crawford; Elaine V. Johnson, DeKalb; Hermine Huffman, Edgar; Grace Shepherd, Edwards; Selma Moeller, Effingham; Beulah McKay, Henderson; Mabel E. Lambert, Henry; Kathleen R. Sloan, Iroquois; Jean Chandler, Jackson; Clare Virtue, JoDaviess; Rosemary Johnson, Knox; Frances Buesching, Lake; Helen Rowe, LaSalle; Vera J. Daniels, Lawrence; Marian McCracken, Lee; Anna C. Jacobson, Livingston; Marian Winters, McDonough; Carrie Alice

(Continued page 5, Col. 3)

A Hot Day and A Hot Subject in Madison

'Round and 'round went the argument on direct packer buying at the Institute of Co-operation in University of Wisconsin's sweltering Agricultural Building on July 11. For the packers spoke bald-headed Oscar Mayer, owner of a so-called country plant at Madison, Wis. who moved out of Chicago "to get closer to the supply of hogs." Another packer man was beefy, jovial Ed Wentworth of Armour & Co., Ames graduate and head of the Armour research bureau. Silent sat F. M. "Fanny" Simpson of Swift & Co. during the heated argument on this hot subject.

"Hard roads, trucks, radio and the high cost of selling through the terminal markets are responsible for the growth of direct buying," said Packer Mayer. "We believe this system pays the farmer more for his hogs. We have organized a committee (Mayer chairman, Knute Espe, secretary) to 'educate' farmers about direct buying, to defend it against unwarranted attack."

"Do you think the livestock shippers interests would be protected if commission agencies were abolished and all farmers shipped direct to the packers?" countered hefty and talkative Dave Swanson, manager of the big Chicago Producers Commission Ass'n. and opponent of any and all forms of marketing other than through the terminals.

Avoiding a direct reply, Mayer conceded that prices paid by packers are based on the Chicago market but asserted (with Wentworth's support) that in the end they are fixed by the housewife who shuns meat when it gets too high. Of the 50 cent per cwt. spread between Madison and Chicago hog prices (freight, shrink, yardage, insurance, commissions, feed), said Mayer, we pay the farmer 20 to 25c per cwt. more than he would get by going to Chicago.

"That's only on the days you want hogs, is it not," questioned Swanson. "And if you were compelled to get your hogs at Chicago, wouldn't your competition raise the general price level?"

There the controversy rested with livestock growers speaking both for and against direct shipping, each side convinced that the other is wrong.

"Let's have a meeting in Chicago of producers, packers, commission men, stock yards and government officials, and straighten this thing out," suggested Wisconsin sheep breeder and feeder Renck. This sentiment was generally concurred in with the understanding that the meeting be called after the government has made its report now being prepared on the mooted question.

To prove that farmers are capable of selling their own livestock direct to packers, Ed Wentworth cited a field day at Ames where farmers, livestock professors, and packer buyers were grouped to guess on weights and dressing percentages. "The farmers guessed the closest and the packer buyers were the farthest away," he said.

Slab vs. Gravel

Paved roads in Minnesota in 1931 were maintained at an average cost of $97.61 per mile. Gravel roads with one-third per cent as much traffic cost $339 per mile for all items except re-graveling.

Illinois Grain Acreage Down, Rains Helping

Illinois corn acreage is the smallest in 61 years, oats the lowest since 1892, estimates the Illinois and U. S. Departments of Argiculture. Soybean and alfalfa acreage is the largest on record. Winter wheat production is 12 per cent below average, spring wheat and barley very light, early hay poor, apples and peaches extremely light, pastures the worst on record, spring wheat, oats and barley sharply reduced in acreage, soybean acreage 70 per cent above last year.

Corn condition estimated about average, future prospects brightening but uncertain due to threatened damage from second brood chinch bugs.

Heavy rains reported throughout most of the state the first two weeks in July. Soybean prospects good, second crop alfalfa much better. Pastures green again. More beans than ever will be cut for hay.

Not A Dollar Lost On Bond Investments

Constant change is the rule of life, particularly in investments. Conserving the $4,064,000 of invested funds, all bonds, representing assets of the I. A. A. and associated companies is an important job to which Vice-President and Finance Committee Chairman A. R. Wright of Varna is giving much of his time.

A. R. WRIGHT

Country Life Insurance Co.'s bond account at approximately $2,372,000 ranks first; second is Illinois Agricultural Mutual with $1,006,300 invested in securities. Illinois Farm Supply has $250,170; Farmers Mutual Reinsurance $164,600; I.A.A. $149,000; Illinois Grain Corp. $63,800; Illinois Agricultural Service Co. $25,300; Serum Ass'n. $21,400; Auditing Ass'n. $10,000; Illinois Livestock Marketing $1,000; Illinois Producers Creameries $500.

Federal government holdings amount to nearly three-fourths of the total at $2,892,273. Municipal bonds (including state governments) total close to $877,000. Corporation bonds (railroads and utilities) make up the balance.

For several years, the policy of the companies has been to invest in governments. This practice is now being followed by most large fiduciary companies because of the uncertain outlook of business conditions which may seriously affect other securities.

A card record system and file with up-to-date information is maintained on every security issue of which there are more than 150. Moody's, Standard Statistics, and several financial papers are studied and checked for trends of earnings and cash position of the issuing corporations. Expenditures and attitude of city and state officials toward meeting obligations are watched in case of municipals.

The conservative investment policy of these farmer-owned and farmer-controlled enterprises has kept each company in a strong financial position throughout the depression. While interest earnings are moderate, not a dollar invested in bonds has been lost. Not a single bond is in default as to interest or principal.*

* One possible exception is a municipal (Detroit) which paid two-thirds of interest due in cash, issued refunding bonds to cover the balance.

The Cover

Hard-headedness, intelligence and character, typical of the Farm Bureau leadership in Illinois, are written on the faces of Knox County Farm Bureau directors who recently erected a monument, a splendid Farm Bureau building, to the constructiveness and permanency of the organization in this state.

Early leaders in Knox county looking ahead started a building fund, added something to it each year. The structure and equipment costing in excess of $17,500 is now paid for out of funds saved over a period of more than 15 years.

The Farm Bureau office is a general meeting place for farm families who are members, says A. R. Kemp, farm adviser. The ladies can wait for their husbands, or husbands for their wives in the waiting room. "Several members have told us that the large parking yard in the rear of the building, now graveled and fenced, is worth the price of their membership annually as they now know where they can park and where their cars will be safe."

Quad Cities Producers Doing Better Under License

Average price for June milk at the Quad Cities (3½% test) was $1.26 per cwt. After paying a check-off of six cents (administrator 2c, association 4c), hauling 16 cents, net price at the farm was $1.04. For each one-tenth per cent butterfat above and below 3.5%, three cents is added or subtracted.

This price compares with a range of 80 to 90 cents per cwt. minus 16 cents hauling, received by farmers before the marketing agreement went into effect.

Dealers jumped the retail price from six to nine cents per quart. Several threatened to go back to 8 or 7 cents when consumer demand fell off, later changed their minds as demand picked up after the shock of a 50 per cent raise.

"The new price makes a difference of about $20 a month in my milk check (10 cows)," reports Herb Klawonn, director in Quality Milk Association.

Most dealers are delivering milk testing 3.8 per cent or better, skimming part of their supply and adding cream to the balance to raise the test. Class 4 milk selling on a butterfat basis, plus 10 per cent, is being bootlegged into the Quad City area in violation of the agreement, reports state. Base price at Quad Cities is $1.60, lower prices for other classes.

Calls Direct Buying An Unhealthy Condition

Terminal markets should be the basis of a livestock marketing structure, according to C. G. Randell, livestock market specialist of the Farm Credit Administration.

"Those markets," he declared while addressing a livestock conference at Madison recently, "must be supported by packers. The terminal markets are the price-making and price-registering points in this country. The withdrawal of support from terminal markets and the consignment of large numbers of low-grade animals to the central markets has a tendency, in my opinion, to lower price levels and to reflect undue fluctuations in day-to-day prices."

Commenting upon direct buying he said: "It is an unhealthy condition where the packer is the bargainer, the grader, and the weigher, all in one. Independent agencies perform these services at central markets and the same condition should prevail at country points.

"Farmers selling direct should have a co-operative association, a bargaining association of some character, to protect their interests. This type of association should assemble and grade livestock and sell it through capable, experienced, and efficient management. Such associations would be of material assistance in protecting the interests of farmers located near packing companies who are frequently discriminated against in favor of farmers living more remotely from the plant."

Plan Federal Inspection Prairie Farms Butter

The board of directors of Illinois Producers Creameries met in Chicago July 14, approved the employment of a government butter inspector at member plants, heard progress reports from Frank Gougler and Jack Countiss. Government certificates will be inserted in cartons carrying Prairie Farms butter certifying that the contents score 92 or better. C. O. Tuttle has been assigned to the Illinois co-operative creameries.

Germany recently suspended all imports of vegetable oils and oleaginous raw materials except copra (cocoanut). German farmers are being paid minimum guaranteed prices for flaxseed and rapeseed.

500 Voices in Huge Chorus Farm Bureau Day

Five hundred farm men and women from five Illinois counties will make up a huge vocal chorus as a feature of this year's Farm Bureau program at the Illinois State Fair, Springfield, August 24, it has been announced by D. E. Lindstrom, rural sociology extension specialist at the College of Agriculture, University of Illinois.

A hundred voices will come from each of the counties of Champaign, Macon, McLean, Iroquois and Adams, where they are being organized under the sponsorship of their respective Home and Farm Bureaus.

The event to be held in the State Fair pavilion on Farm Bureau Day, is in a measure an outgrowth of the annual music and drama tournament held each January during Farm and Home Week at the U. of I. College of Agriculture. This, however, is the first year that a farm vocal chorus has been attempted at the state fair, and is made possible through the financial assistance of the state fair board and in cooperation with extension service of the agricultural college. Professor Russell Hancock Miles, of the U. of I. school of music, will direct the chorus.

The five counties to take part in the state fair chorus are those in which considerable rural chorus work has been carried on by the Farm and Home Bureaus in recent years. Adams county has held an annual rural musical festival for the past five years, the last one of which was witnessed by more than 2,500 people.

Those in charge of organizing the 100 voices in their respective counties are: Iroquois county, Miss Grace Burnham of Watseka; McLean county, Mrs. Paul McFarland of McLean; Adams county, Mr. J. Ben Jefferson, of Clayton; Macon county, Mrs. J. A. Greer of Harristown; and Champaign county, Mrs. R. W. Milligan of Ivesdale.

Elevator Manager at Altona Commits Suicide

One morning early in July, C. H. Chilson, field accountant with the Illinois Agricultural Auditing Association stationed at Galesburg, got a hurry up call to come to Altona, near the northern border of Knox county. The manager of the Altona Co-operative Grain Co., a good church member, well-liked by directors and patrons, had committed suicide.

No outside audit had been made of the company's books for three years. Directors were worried. Chilson jumped in his car, went through the records carefully, methodically, found a shortage of more than $2,500 representing peculations over a period of 2½ years. Altona Grain Co. is now a member of I.A.A.A.

This is the second elevator manager suicide in Illinois within the past year and a half. Trusted implicitly by directors, the manager at Mt. Sterling confessed to selling merchandise and keeping the cash. Promising to make restitution, he was not prosecuted. A few weeks later, he crawled under the elevator, shot himself.

HENRY COUNTY FARM BUREAU FLOAT
Entered in the July 4 Farm Bureau Day Parade during Galva's Homecoming Celebration.

New Federal Law Hits at Gas Tax Diversion

Another blow at Illinois' disreputable diversion of gas tax funds, long opposed by the I.A.A., is dealt by the Hayden-Cartwright Act (H. R. 8781) passed by the 73rd congress, approved by President Roosevelt June 18.

"Since it is unfair and unjust to tax motor vehicle transportation unless the proceeds of such taxation are applied to the construction, improvement, or maintenance of highways," declares the Act, "after June 30, 1935, Federal aid for highways shall be extended only to those States that use at least the amounts now provided by law for such purposes in each State from motor vehicle registration fees, licenses, gasoline taxes, and other special taxes . . . . . for the construction, improvement, and maintenance of highways and administrative expenses in connection therewith."

Good news for farmers is a provision in the act for an additional appropriation of $200,000,000 as an emergency public works fund, to be divided among the States with the stipulation that not less than 25 per cent of any State's share shall be applied to secondary or farm-to-market roads.

In addition the sum of $125,000,000 is appropriated for the fiscal year ending June 30, 1936, the same amount for the year following (total $250,000,000) for aiding the States in the construction of rural post roads. This money must be spent by the States within one year of the period for which the appropriation is made, otherwise the unspent State's portion will revert back to the Federal government for reapportioning.

Section 14 of the Act declares that "no deductions shall hereafter be made on account of prior loans to the States . . . for relief . . . to needy and distressed people." This means that federal road funds apportioned to Illinois will not be impaired by reason of the tremendous poor relief sums obtained by Chicago political leaders. This money was to have been repaid by deducting part of the federal road allotments to Illinois beginning in 1935.

Chicago Real Estate Men Ask For Special Session

George F. Nixon, member of the board of tax appeals and prominent in Chicago real estate circles, is leading a movement in Chicago to influence Governor Horner to call a special session of the legislature by August 1, to consider a revenue amendment.

Mr. Nixon pointed out that $450,000,000 of taxes levied during the last eight years are uncollected, of which $160,000,000 represent taxes levied against personal property.

"A one per cent limitation on property taxes would give taxpayers relief — hope — some incentive for carrying on," he says. "Property could and would pay a one per cent tax on fair cash value. It cannot continue to carry the present tax load of nearly three per cent. Tax emancipation can come only through amendment of the state constitution."

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interest of the farmers of Illinois and the nation, and to develop agriculture.

Blaming the Government

"COMPETENT experts assert that a normal speculative turnover on the Board of Trade would advance wheat at least 25 cents a bushel above current quotations. Some believe that the rise would be 50 cents," says the Chicago Daily News in an editorial pleading for less restrictions on the grain exchanges.

Apparently some grain trader has whispered in the ear of a News editorial writer. It's the old story of blaming the government. The News does not state just what is to prevent anyone who thinks wheat is selling too cheaply to buy a load of it. There is nothing in present regulations to stop anyone from taking on all he can pay for.

The volume of trading on the Stock Exchange, likewise, has fallen away to a mere dribble compared with the volume in the "good old" days. No one argues that regulation is responsible for this. Perhaps the condition of the public's pocketbook has something to do with it. Whenever a grain trader has nothing else to do he goes over and weeps on the shoulder of the local newspaper editor about the bad effects of government regulations.

The fact is that the rank and file of people aren't speculating these days. They've learned by bitter experience to be cautious. The only thing that is holding back the speculative rise in the price of wheat, or any other commodity, is lack of buyers.

To say that "farmers are being penalized to the extent of billions of dollars," because of market regulation is a cheap appeal to prejudice without any foundation of fact. We are all for higher wheat prices. We can't believe that federal trading regulations to establish honesty and to prevent market manipulation and the fleecing of the public are a bar to higher prices. We wonder if the News ever heard of short sellers. Government regulation didn't seem to stop Arthur Cutten's secret operations now a subject of government inquiry. For every dollar the farmer gains by a bull market he loses another in a bear market. The only party who collects all the time is the grain broker. And he's the fellow doing the worrying now.

The Cause of Unemployment

WHEN will the ten millions or more of unemployed people get back to work?

A lot of folks are asking this question. More are trying to answer it. Some are attempting to make political capital out of unemployment. Farm representatives for years have tried to get over the point that the inequality between farm and non-agricultural prices, would undermine American prosperity. At last, when the crash came, the farm point of view got attention. Today even Wall Street recognizes its truth.

"It is generally known," says the July National City Bulletin, **"that the fall of prices of farm products and loss of purchasing power to the farmers has been largely responsible for the general depression, but it is not generally recognized that the failure of other prices to decline in company with the prices of farm products has been the principal cause of unemployment."**

The recent backing away of NRA administrators from price-fixing may be significant. It is clear that certain features of the NRA have been working at cross purposes to the AAA farm price-raising program. If we can't get farm prices up to a parity let's bring others down. The goal is the same, to restore farm buying power, to start a more lively exchange of goods and services, to relieve unemployment.

Organized labor can aid this movement and make jobs. So can corporation managers. We seriously doubt that either group is farsighted enough to do it. The way to reemployment and a higher standard of living for everyone lies in this direction. There will not be complete recovery until the readjustment is accomplished.

Let Us Not Forget

THE recent irritations connected with getting approval of corn-hog reduction contracts should not blind us to the real values of the adjustment program. Short memories are proverbial. It is only necessary to look back a year and a half to see how far we have come. It is easy for opponents of crop adjustment to make "explanations" of the reasons for improvement. They may make light of the effect of reducing surpluses by disposing of 6,000,000 little pigs and drastic cuts in pig farrowings and crop acreage. But thinking farmers know it was just these measures that helped raise levels. Corn and hog prices, of course, have been benefited. But beef, mutton, oats, barley and other crops also shared in the gain. With corn-hog checks on the way to Illinois let's not miss the fact that the much maligned processing tax made these benefits possible. Had not the drought forced unprecedented quantities of unfinished livestock on the market prematurely, the rise in hog prices unquestionably would have come much earlier."

I.A.A. Asks More Liberal Policy On Hog Allotments

Following reports of dissatisfaction and unrest over county corn-hog allotments and the inability of many county committees to conscientiously reduce total hog numbers on contracts to the allotments given counties by the State Corn-Hog Review Board, the Board of Directors of the Illinois Agricultural Association gave full consideration to the problem during their regular meeting in Chicago last week.

In an effort to secure liberalization of policy that appeared necessary to expedite the work of all county committees, and that contracting farmers might receive their benefit payments at the earliest possible date, the Association directors unanimously joined in a telegram to the State Review Board urging prompt action in taking such steps as appeared necessary to remove the confusion of thought and interest that seems to be crystallizing in several sections of Illinois.

Let Evidence Control

The board expressed the belief that the problem should be met by determining county totals of contracted hogs on the basis of the supporting evidence without regard to the definite figures that had been previously allotted.

The Association directors assured the State Review Board that they recognized, at least in some degree, the tremendous problem with which they were confronted, and expressed their desire to be helpful to them in every possible way to complete their work.

In neighboring states, county allotment committee reports were approved where total numbers of hogs after removing unsupported pigs, were considerably higher than preliminary estimates according to reports.

Checks in August

Corn-hog checks are expected to move into Illinois in substantial numbers during August. "Distribution among corn-hog farmers of approximately $130,000,000 in first installment payments is expected to be near the peak load by late July or early August," the AAA announced July 12. As this is written more than 45 Illinois counties have been approved. Checking of contracts by allotment committees in other counties is nearing completion.

Among the first to be O K'd by the state review board, none major hog-growing counties, were Piatt, Boone, Dupage, Lake, DeWitt, Effingham, Fayette, Monroe, Williamson, Saline, Wabash, Washington, Clark, Clay, Cumberland, Moultrie, Cook, Will, Bond, Calhoun, Lawrence, Gallatin.

Contracts are being handled in Washington at the rate of around 40,000 a day. Contracts containing inadequate evidence or mistakes will be held up by the AAA there until county corn-hog committees supply the necessary data.

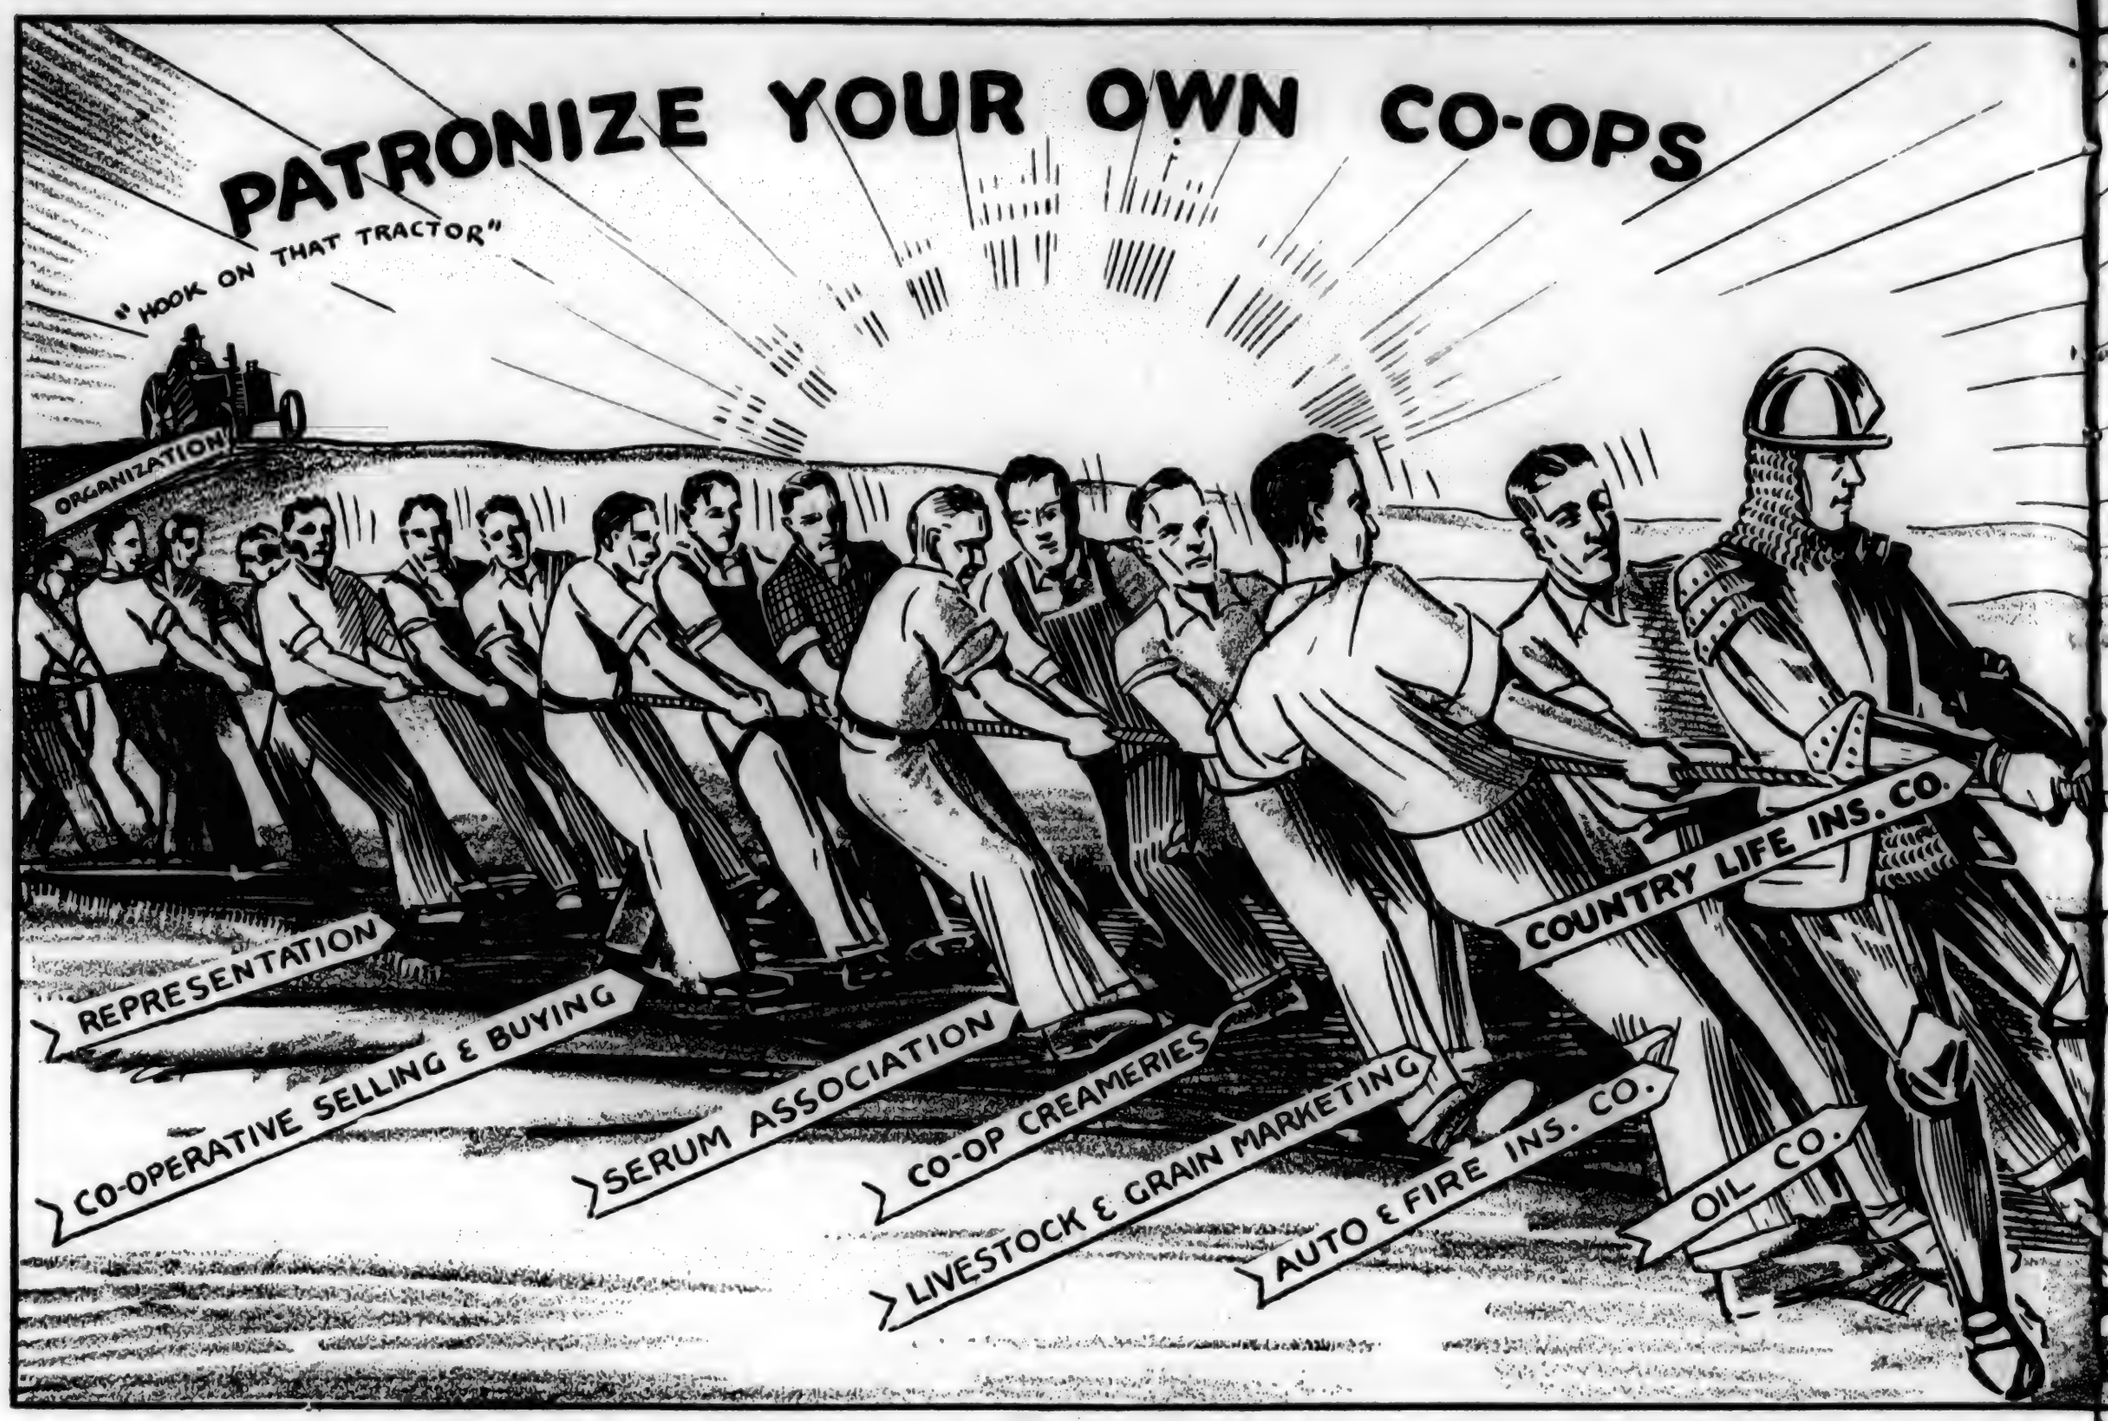
Illinois corn-hog contract signers (123,000), will receive approximately $35,000,000 in benefit payments, the state extension service estimates.

McLEAN COUNTY'S CORN AND HOG ALLOTMENT COMMITTEE IN ACTION.
Reading from left to right—Geo. Wissmiller, O. V. Douglass, F. C. Thomas. (Their job to put each contract through the ringer.)

Debt Relief Under Frazier-Lemke Amendment

(Continued from page 3)

assume one of the secured creditors refuses to go along on the appraisal. Then the court, after having set aside Farmer "A's" $400 exemption, shall stay all foreclosure proceedings for a period of five years.



During this five year period Farmer "A" is allowed to retain possession of the farm and his chattels under the control of the court. To retain possession he must pay a reasonable rental fixed by the court, the first payment of rent to be made within six months of the day of the court order staying proceedings.

The rent will be divided equitably by the court among the secured and unsecured creditors after paying taxes. At the end of five years, or before, Farmer "A" may pay into court the appraised price of the property of which he retains possession provided that on request of any lien holder on the farm, the judge shall order a reappraisal of the farm, and Farmer "A" may then pay the reappraised price if acceptable to the lien holders. Otherwise the original appraised price shall be paid into the court. When Farmer "A" pays the appraised price the court shall by order turn over full possession and title of said property to him.

If Farmer "A" fails to pay the rent fixed by the court, the latter may order Farmer "A's" land and chattels sold for the benefit of the creditors.

The Frazier-Lemke amendment is one of two measures bearing the same name, considered during the recent session of congress. The original Frazier-Lemke bill provided for refinancing farm mortgages at 1½ per cent interest and 1½ per cent annual payment on the principal—a total of 3 per cent. Against these mortgages as security, the bill authorized issuing up to $10,000,000 of greenbacks—a highly inflationary measure. This bill, sponsored by the Farmers Union, was not passed.

The Frazier-Lemke amendment that was recently signed by President Roosevelt, amends Section 75 of the Federal Bankruptcy Act which was writtten by and passed at the request of the American Farm Bureau Federation in February, 1933. The Frazier-Lemke amendment was passed after a threatened filibuster by Senate progressives led by Senator Huey Long of Louisiana. It amends the act providing for scaling down or extending farm debts, a highly meritorious bill, which was sponsored and supported by the Farm Bureau.

As the artist vividly portrays, there is no matching the power farmers have when they pull together toward a common end. Look at the group to the right in the picture. They are frantic and confused. They didn't know about this great power farmers have. They still can't believe it. So they are trying to use their "pull" on the

FARMERS MUST PU

COUNTRY LIFE AN EXAMPLE OF CO-OPERATIVE RESULT

Through the centuries, human nature hasn't changed. There has always been a tug of war between agricultural people and those who would influence the price of what farmers raise and what they buy. But, as the picture above shows, **patronizing his own farmer owned and controlled co-operative gives the farmer a fairer break on the sale of his livestock, his butter and cream, grain, fruit and vegetables, etc.,** as well as on the **purchase of his life insurance, oil and gasoline, serum, auto and fire insurance and all other things sold and bought collectively by our organized farmers.** Country Life Insurance Company's record breaking growth, its unsurpassed strength, with its low cost is a monument to farmers who pull together to obtain a fair deal for themselves and the 52 million others living in rural areas.

By pooling their interests, the enormous volume of life insurance obtained at small expense means a lower cost to the insured. **Through scientific operation Country Life now has 60 million of insurance in force, attained in but 64**

rope — but it's no use. There are too many farmers working together, buying and selling through their own co-ops. There's too much power for those other fellows to beat. If more farmers were pulling together, just think of the greater power they would have. You should talk to your neighbor about this.

PULL TOGETHER!

months, with an average mortality of approximately 25 per cent of the expected death losses. Lapse ratios continue to be low showing the confidence of farmers in this Farm Bureau owned and controlled company. Last year's lapse was seven and eight-tenths per cent.

At the beginning Country Life showed real sincerity of purpose by starting at lower rates than offered by most participating companies. The average Ordinary Life rate of all participating companies was around $27. **Country Life's rate at age 35 is $20.63, and dividends have consistently lowered this cost.**

Study the picture again. Note how the story of co-operation in its battle against monopoly, unfair profits, manipulation, the privileged few, and the long line of those who stand between true cost and the ultimate consumer is vividly set forth. **Country Life Insurance Company was organized to give the truest possible cost to policyholders by utilizing as part of its cost-reducing methods the buying force of that great army of Illinois farm people.**

L. A. Williams

Manager of Country Life Insurance Company
608 S. Dearborn St., Chicago, Illinois

Country Life Six Months Business Sets New Record

Continuing its record-breaking pace, Country Life Insurance Company in the six months beginning Jan. 1, 1934 wrote close to $10,000,000 of new business. This does not mean issued and delivered business. It does mean applications to this amount were received. Part of this business, of course, will not be issued. Some may not be successfully delivered. But the fact that the company is going at a pace of nearly $20,000,000 new business in 1934 is sufficient to give everyone an optimistic outlook for the company's future.

D. P. ROBINSON

Mortality is even less than it was a year ago, and during the first five months the Company had enough new surplus to pay for all 1934 dividend expense.

Although Country Life is only 64 months old, it has now close to $60,000,000 of insurance in force. At the end of 1934 when the Company is 70 months old, Manager L. A. Williams and his staff of agents hope to have $70,000,000 in force.

Lapses have been only half as great in 1934 as in 1933. Many counties are breaking their best production records and only one or two have produced nothing this year. D. P. Robinson, general agent in Henry county, is leading with $465,500 written business for the first six months in 1934.

New general agents and general agencies are developing in fine shape, reports Williams. In counties of light production in 1933 there has been substantial improvement. Gain in force for the first six months' period is a 70% improvement over the gain in force for the same period of 1933.

"On the first day of June we started our campaign rather auspiciously, with a breakfast in Centralia. All of the agents in the southern end of the state were there. At Bloomington, the same day, the general agents of the central section assembled and at a dinner in DeKalb in the evening we met the general agents of the northern section.

"In spite of chinch bugs, drought and all of the alibis that agents could legitimately be expected to use, we completed the month of June with $2,250,000 of business, the fourth largest month in the history of the company. The largest production for the month came from Henry county, with $119,500 written business; next came McLean with $114,500, and Livingston with $103,500."

Following are the totals by counties of business written in the first six months of 1934:

Adams	112,000	McDonough	219,000
Bond	26,500	McHenry	81,500
Boone	110,500	McLean	259,500
Brown	47,000	Macon	71,000
Bureau	82,500	Macoupin	104,000
Carroll	97,000	Madison	106,000
Cass	92,500	Marion	21,000
Champaign	125,000	Marshall-Put.	124,000
Christian	117,500	Mason	65,000
Clark	93,000	Massac	1,000
Clay	22,000	Menard	92,000
Clinton	87,500	Mercer	72,500
Coles	98,000	Monroe	36,000
Cook	231,000	Montgomery	117,500
Crawford	81,000	Morgan	116,500
Cumberland		Moultrie	85,000
DeKalb	152,500	Ogle	125,500
DeWitt	80,000	Peoria	162,500

Lime and Legumes Given Boost By AAA Program

Illinois farmers are using more limestone and sowing more alfalfa and clover seed this year than ever before, reports from farm advisers to C. M. Linsley, soils extension specialist, indicate.

"Two of the most noticeable effects of the AAA in Will county are the increased demand for alfalfa and sweet clover seed and the increased use of the soil testing service to protect legume seedings," wrote L. W. Braham, farm adviser. In Carroll county, Farm Adviser M. P. Roske says "it looks like one of the high years for liming and sowing alfalfa. Fifteen crushers have been operating at local quarries to supply the limestone demand."

County Farm Bureaus are invited to send copies of their by-laws to the Legal Department of the I. A. A. for checking. In some cases by-laws are out of date and do not contain protective features found by experience to be valuable.

Organization Directors At Work in 61 Counties

As we go to press more than 60 counties have appointed county organization directors according to V. Vaniman, director of organization service. These men are engaged full time and will work under the direction of the county organization committee. They are approved jointly by the County Farm Bureau and the I.A.A. It is their job to write memberships and make collections. These men also are charged with responsibility for keeping accurate records of dues paid, and make weekly reports to the secretary of the I.A.A.

Following are the county organization directors whose appointments have been approved as of July 20:

County	Organization Director
Bond	Chas. P. Boggess
Boone	F. A. Lobdell
Brown	Olin Hall
Bureau	Geo. D. Springer
Champaign	W. Z. Black
Christian	L. F. Brissenden
Clark	Thos. Drummond
Clay	H. O. Hinkley
Clinton	H. H. Walker
Coles	A. P. Cooper
Cook	C. H. Mills
Crawford	V. A. Jones
DeKalb	Earl Wenzel
Douglas	L. D. Hendricks
Edgar	H. Zies Gumm
Effingham	C. Ward Buzzard
Ford	J. C. Phillips
Franklin	John C. Small
Fulton	C. W. Stremmel
Grundy	Richard M. Johnson
Hancock	M. G. Lambert
Henderson	Clifford Thompson
Henry	Eben F. Coll
Jackson	Wm. Ziegler
Jefferson	H. H. Walker
Jersey	John H. Powers
JoDaviess	Harry J. Stanger
Johnson	H. L. Cummins
Kankakee	J. J. Ruder
Kendall	Sidney E. Rasmusen
Lake	A. E. Read
LaSalle	C. L. Mast, Jr.
Lawrence	Alvin C. Mahrenholz
McHenry	Lester A. Siedschlag
McLean	Asa B. Culp
Macon	Edwin Bean
Macoupin	Elery A. Leefers
Madison	Chas. P. Boggess
Marion	H. O. Hinkley
Marshall-Putnam	Guy R. French
Massac	H. L. Cummins
Montgomery	L. F. Brissenden
Morgan	David R. Reynolds
Moultrie	M. E. Roberts
Ogle	R. J. Hamilton
Piatt	Milo D. Himes
Pike	Clay Agee
Pope-Hardin	H. L. Cummins
Pulaski-Alexander	E. H. Conant
Randolph	Andrew Brown
Richland	Otto Shafer
Rock Island	Carl L. Mueller
Saline	John C. Small
Scott	David Reynolds
Shelby	M. E. Roberts
St. Clair	Oscar Grossman
Stephenson	R. J. Hamilton
Vermilion	Mark F. Cooper
Washington	H. H. Walker
Whiteside	Lowell S. Johnson
Williamson	John C. Small.

Co-op. Livestock Sales Up

Madison county livestock growers increased their co-operative shipments 70 per cent in 1933 over 1932, according to T. W. May, farm adviser. "Our farmers are undoubtedly realizing to a greater extent the importance and value of co-operative marketing," he said.

Grain Traders After The Co-ops. Again

AN INTENSIVE and costly publicity campaign will shortly be launched by leading grain interests connected with the Chicago Board of Trade against the enactment of the Commodity Exchange Bill in the next session of Congress, according to press reports.

One of the chief provisions of the Exchange Bill is that grain cooperatives be allowed full privileges on the grain exchanges while exchange officials are appealing decisions of the Grain Futures Administration to the federal courts.

Many Illinois grain producers will recall that the Chicago Board of Trade suspended the Updike Grain Company, owned by the Farmers National Grain Corporation, from both the Board and the Clearing Corporation on charges which it never was able to prove. Farmers National then made a second application for membership direct in the Clearing Corporation, and when this was denied, petitioned the Grain Futures Administration to suspend the Board of Trade as a contract market for violation of the Grain Futures Act.

A Little History

The Federal Commission issued an order for such suspension for a period of 60 days from which the Board of Trade appealed to the United States Circuit Court of Appeals.

Not until October 31, 1933, did the court return a decision on that appeal. It sustained the grain co-operative in every major contention with respect to its eligibility to full trading privileges on the Chicago Board of Trade and in the Clearing Corporation, but remanded the case back to the Commission for a determination whether grain handled by the co-operative for the Grain Stabilization Corporation, a government instrumentality, should be classed as member or non-member grain under co-operative statutes. Hearing on this matter has been set for next October 3.

Sought Full Protection

In January of this year Farmers National again applied for membership in the Clearing Corporation, and although this time the application was granted, it was realized that with the issue still awaiting definite settlement, the security of the grain co-operatives in their trading rights was far from being assured.

Farmers National and its affiliates, therefore, sought full protection through the Code for Grain Exchanges. This move having been successfully opposed by the grain exchanges, on the ground that such matters were legislative in character, the co-operatives and general farm organizations, aided by the officials of the U. S. Department of Agriculture, the Grain Futures Administration and others, sought from the Seventy-third Congress amendments to the Grain Futures Act definitely establishing the rights of farmer co-operatives on commodity exchanges. This legislation, known as H. R. 8829, passed the House, was favorably reported by the Senate Committee on Agriculture, but did not come to a vote in the Senate because of the rush of business as the hour of adjournment approached.

Recent newspaper clippings clearly show the justification, if any was needed, for certain statements made by proponents of H. R. 8829 at hearings on the legislation, held in Washington last April.

Wendell Berge, a special assistant to the Attorney-General, clearly foresaw what might happen in the event the legislation failed. "It is quite possible for a Board of Trade," he said, "under the cumbersome procedure now existing, effectually to defeat the purpose of Section 5e (of the Grain Futures Act, establishing the rights of co-operatives on Exchanges) by successively raising new charges of unlawful conduct against a co-operative association, thereby keeping such association out indefinitely while the respective charges are successfully litigated" (by the co-operative).

Huff Forecasts

During the course of these hearings, President C. E. Huff of the Farmers National sent a telegram to Chairman Jones, of the House Committee, in which, among other things, he said:

"I invite your attention and that of the Committee to the extreme importance to grain producers and their co-operatives of enacting these amendatory proposals into law at this session of Congress. For example, charges of violation of certain rules of the Chicago Board of Trade have been filed against Farmers National Grain Corporation regarding our operations in Iowa. For months past, hearings, conferences, and reports have continued and we have been unable either to bring the matter promptly to issue or to have the charges dismissed. It may not be true that action on these charges awaits the adjournment of Congress in the hope that the protective proposals now before your Committee will fail of enactment. If, however, these proposals should not be enacted into law, and if, following adjournment, these or other charges of the Chicago Board of Trade should be brought to a decision unfavorable to Farmers National, it would again probably take us two years to vindicate our position in the courts and to re-establish market privileges wrongfully denied us. Meantime, nearly 300,000 organized growers would suffer very substantial loss for lack of protection proposed in amendments now before you."

Eloquent Reminders

"Recent newspaper clippings are eloquent reminders of these statements before the House Committee," Mr. Huff said in a recent letter to G. C. Johnstone, president of Illinois Grain Corp. "With members of the Congress hardly back in their own districts, the Chicago Board of Trade filed new charges against the national co-operative, with hearing set for July 24, H. R. 8829 having failed of passage. At the same time the Chicago Board of Trade announces a plan to begin at once a campaign to prevent future enactment of the Commodity Exchange Bill. Extensive newspaper and other advertising is to be used, the associations of private traders and brokers, and, as well, the railroads and millers, are to be swung into line, if possible, to help raise the hundreds of thousands of dollars that will be necessary to finance such a campaign.

"Farmers co-operatives have no such funds to spend for such propaganda; but the intent and purpose of this grain trade campaign must be made clear to every grain farmer and to the membership of every farmer organization. The intent and purpose is to defeat the development of farmer marketing, to shut co-operatives off the commodity exchanges and to subject them to every possible disadvantage in the marketing of their commodities through their own facilities.

"It is to be hoped that every person interested in the welfare of agriculture will recognize the imperative necessity that the legislation embodied in H. R. 8829 be enacted at the next session of the Congress."

As we go to press, word comes that the hearing set for July 24 has been postponed for 90 days. Perhaps a recent private conference between AAA and grain trade officials had something to do with it.—Editor.

"We Expect To Get Steadily Ahead"—Huff

The Board of Trade recently charged Farmers National with violation of its rules governing rebating, basing the charges on provisions of the operating agreements between Farmers National and its stockholders. A hearing was set for July 24 to air these charges—was later postponed for 90 days.

"Farmers National has not at any time violated the rules of the Chicago Board of Trade regarding rebating," President C. E. Huff of Farmers National said in reply. "Charges to that effect, filed by the Board of Trade, are on a par with their previous charges and actions against us, none of which they have been able to sustain before the Federal Commission or in Court.

"The real issue is whether the producer of grain shall be permitted to represent himself within so sacred an institution as the Chicago Board of Trade. We are a co-operative and our grower members are the beneficiaries of our operations. We are members of the Board of Trade and of the Clearing Corporation, privileges guaranteed us by Federal law. We have recently acquired a four million bushel elevator in Chicago. Our business grows steadily. Hundreds of local co-operative elevators, in all parts of the country, are affiliated with Farmers National. The farmer is now for the first time marketing his own grain with every device and facility which private dealers have had in the past. Our securing of the Rock Island elevator and our great growth are the causes of the present complaint. These boys can't take it. The specific charges filed yesterday have been 'buried' within the Directorate of the Chicago Board of Trade for many months as a convenient club over us or awaiting a strategic time for public announcement. The **adjournment of Congress without the passage of the Commodity Exchange Bill** seems to have provided the convenient time.

"Perhaps it is too much to expect that a privileged group, whether in utilities or in trade, should reform its abuses and adjust itself to new facts. Most of them seem to prefer suicide to commonsense action. We do not know, of course, whether or not the Board of Trade has outlived its usefulness, but we expect to get steadily ahead with our marketing program."

Farm exports during the month of May were the lowest in any single month in 20 years.

NRA Recedes From Price Fixing, May Aid Farmer

Receding from its position in support of price-fixing, the National Recovery Administration has paved the way for a cut in the cost of non-agricultural commodities. Quickest to respond in price reductions were certain groceries, clothing, dry goods. Most needed by farmers are lower prices for lumber, cement, steel machinery, wire fence or substantially higher prices for farm products to re-establish their pre-war buying power.

The effect of gradual withdrawal of NRA price-fixing will be to reduce prices of easily manufactured, competitive goods. Monopolies and strongly organized groups such as steel, farm machinery, lumber, cement, certain kinds of labor will be able to maintain high prices and wage minimums without NRA.

So long as restricted production and high prices continue as policies of big business farmers will do well to play the same game in spite of the outcries of the processors and commission men. In an economy of scarcity initiated by monopolies, the farmer plays a losing game with uncontrolled production.—Editor.

Wheat Program Continues 9c Payments Being Made

Second payment of nine cents per bushel to wheat contract signers totaling more than $30,000,000 began July 16. Estimated 77 per cent of nation's wheat production is under contract. The program for the 1934-'35 crop is planned on the same basis as the one just completed.

Acreage reduction will be not more than 15 per cent of base and benefit payments will be at the rate of 29 cents per allotted bushel. Illinois had 24,750 contracts approved. First installments in Illinois amounted to $1,696,903, second payments are expected to yield $769,500, total payments $2,466,403.

"My wheat benefit check was mighty easy to take," commented a St. Clair county grower. "It certainly has paid us to go along on this program."

Ship To Chicago Producers. Save 25% On Commissions

Since April 20 the Chicago Producers Commission Association has been operating on the reduced commission rates which are from 20 to 25 per cent under the old rates.

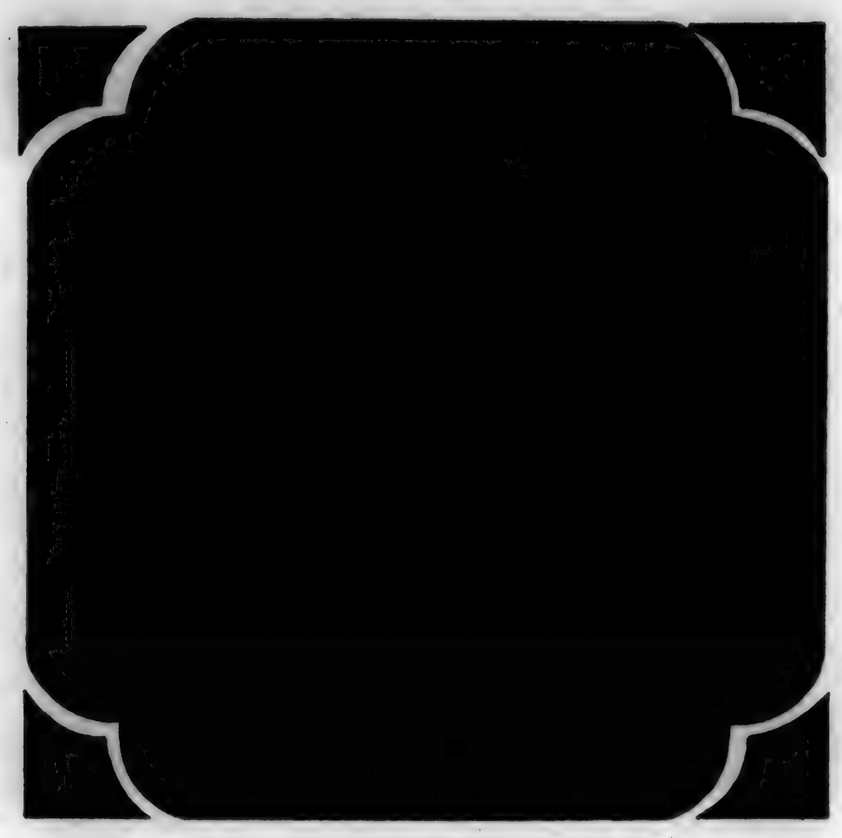
Only one other commission agency in Chicago is charging the reduced rates. The old-line commission companies are fighting the reduction ordered by Secretary of Agriculture Wallace, have appealed to the courts.

Plan Illinois Council To Expand Use Crops

The Illinois Agricultural Association, through its officers and local director, E. D. Lawrence, has participated in a series of conferences and committee meetings at Bloomington during the last three weeks with representatives of the Alcohol Motor-Fuel Association, Bloomington Association of Commerce and McLean County Farm Bureau.

The original conference was held at the invitation of the local groups on June 27th, which gave consideration to ways and means to promote the development of a "power-alcohol" program, as the major objective of a broader movement which includes the development of new non-food uses of agricultural products. Representatives of the four groups were assigned to working committees, which met and reported in a meeting held July 16th.

The meeting received the report of its Committee on Form of Organization, presented by Chairman R. A. Cowles, and approved its report, for recommendation to the groups and organizations which may be interested in forming an association to serve as council of its member organizations.



The name of the proposed association is "Illinois Council." The purpose and objects of the Council (non-stock, non-profit) are: **(a)** To develop new non-food uses and to expand and enlarge present food and industrial uses of Illinois farm products. **(b)** To promote and protect the common economic interests of Agriculture, Industry, Business and Commerce therein. **(c)** To formulate and make concrete expression thereon, as vital to the whole economic welfare of Illinois. **(d)** To secure, in the common interest of the Mid-West States, similar and united action in and by such States.

The management is vested in eighteen directors—the "Board of Governors." The By-Laws provide for equal representation of (1) Agriculture, (2) Industry, and (3) Business and Commerce, on the Board of Governors, and on the Executive Committee. The By-Laws prohibit partisan political expression or activity by the proposed Council or its officials.

The General Committee, appointed with power to enlarge its number and broaden representation on the committee, includes: Jas. Gray, Chairman, E. D. Funk, J. R. Heiple, W. E. Froelich, C. V. Gregory, C. W. LaPorte, John Scholl, Frank Moberly, Earl Smith, R. A. Cowles.

The Board of Directors of Illinois Agricultural Association in its July meeting authorized the Association's participation in the movement, as a member of the proposed Illinois Council, if and when other organizations representative of Agriculture, Industry, and Business and Commerce decide to perfect its organization.

Insure In YOUR OWN COMPANY *Against Damage By*

FIRE, WIND and HAIL

You can't afford NOT to insure your buildings, livestock, household goods, growing crops, etc., now that adequate insurance costs so little. Today, thousands of farmers insure with Farmers Mutual—AT ACTUAL COST! A strong, reliable legal reserve mutual, this farmer-owned and controlled company now has more than $74,000,000 total insurance in force. Claims are paid quickly and cheerfully. See your County Farm Bureau for rates and details. Do it now!

CALL THE NEAREST FIRE DEPARTMENT!

We will insure the cost of the call!

For a nominal sum, Farmers Mutual will insure the cost of calling the nearest fire department, in an amount not to exceed $50. Ask your County Farm Bureau insurance agent about this special feature.

IT'S HAIL TIME!

Insure your growing crops NOW for only $4 per thousand. The balance of your premium is not due until October when you have your harvest money. If hail destroys your crops, you get a check covering the loss from Farmers Mutual. If no loss occurs, the protection has cost you only a small sum. Get details quickly from your County Farm Bureau.

AUTOMATIC RENEWAL PRIVILEGE

All policies (with the exception of hail insurance) are issued for one year with automatic renewal privilege of four years more—in reality a five year policy with but one initial policy fee. This lowers your cost. Get details from the insurance agent at your County Farm Bureau. He will quickly show you how this feature saves you money on your insurance.

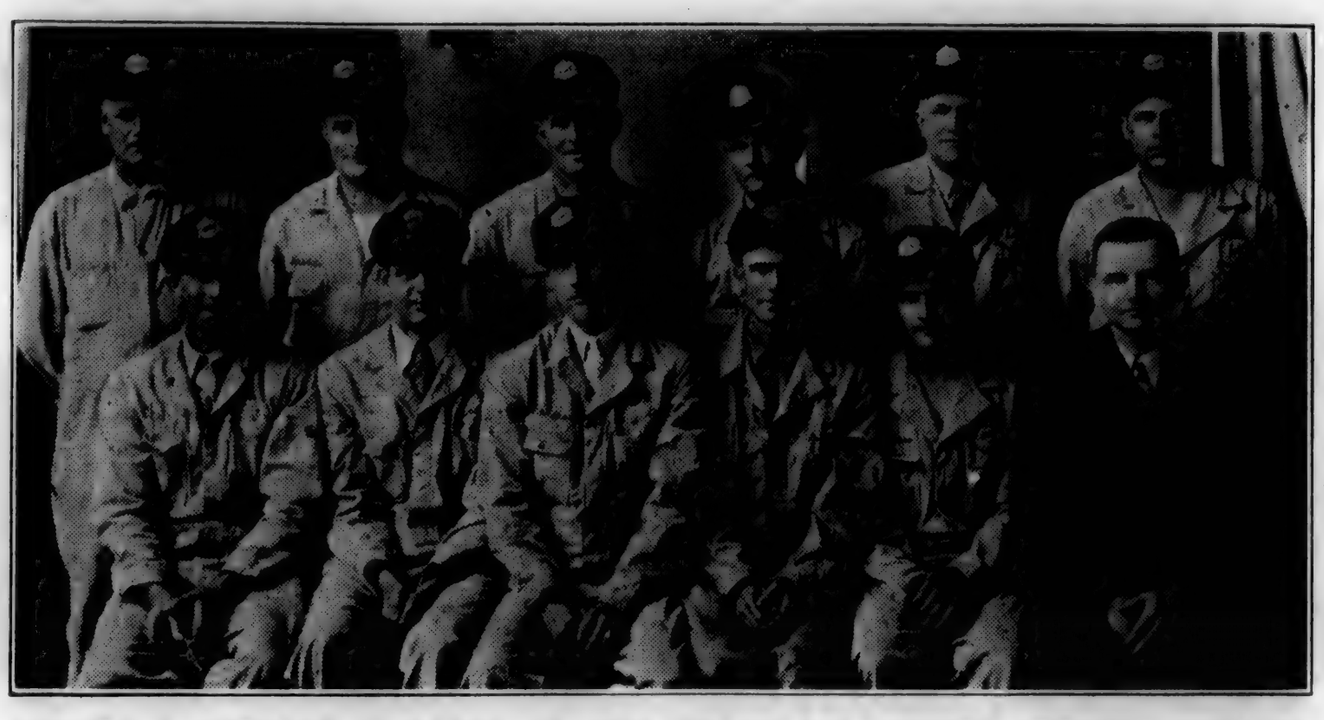
FARMERS RE-INSURANCE

602 So. Dearborn St.,

MUTUAL COMPANY

Chicago, Ill.

Look Before You Buy Paint, Soyoil Is Best



The old adage "look before you buy" was never more potent than right now when farmers are being urged by certain soya bean oil paint marketers to be a patriot and boost a farm product. Close scrutiny or a few pointed questions will bring out the fact that the soya bean oil content of most of these paints marketed by general paint companies runs from five to 20 per cent. In marked contrast is the farmers own brand—Soyoil paint—which is **guaranteed** to contain not less than 33⅓ per cent specially treated soya bean oil. Soyoil paint is available in many colors and shades for every farm use through the 58 County Service Companies affiliated with the Illinois Farm Supply Company.

Notwithstanding the fact that Illinois farmers should use Soyoil paint **exclusively** because it creates a greater market for one of their own products, there is the equally important fact that its use by several thousand farmers shows Soyoil paint to be an excellent type for farm buildings. It stands the weather, it's easy to apply, the soya bean oil "satisfies" the wood, it dries with a protective, glossy finish and goes farther. With its low first cost, plus patronage dividends, soy oil costs less to use than "price" paints.

Get Free Test

To further demonstrate the outstanding qualities of Soyoil paint, County Service truck salesmen now carry the paint and brush with them so that farmers may test the paint themselves on any wood surface. That this test is taking the guess work out of paint buying and is proving the superiority of Soyoil paint with its 33⅓ per cent specially treated soya bean oil content is amply borne out by this year's marked increase in paint sales by the 58 County Service Companies. Farm Bureau members are urged to request the free test and see for themselves how the high soya bean oil content in Soyoil paint is a tremendous step forward in paint manufacturing.

Price cutting to producers was the charge against Isaac Lantz of Plainfield, Illinois whose license to sell milk in the Chicago area was ordered revoked as of June 9. Lantz also had failed to submit written reports and statements to the market administrator and had failed to comply with other provisions of the marketing agreement.

RUSSELL G. STEWART, MANAGER OF THE CHAMPAIGN COUNTY SERVICE COMPANY, and his sales force who sold 28,686½ gallons of motor oil to win First Prize in the Future Order Contest. Standing, second from right is E. C. Harvey whose 5,043 gallons was second highest in the state. Standing, fourth from the right is Reid Pulliam whose 4,757 gallons won third high state honors. The whole sales force averaged 2,796.6 gallons per man during the contest. It is interesting to note that in three years this company has returned $42,187.62 to Farm Bureau members.

St. Clair County Man Leads State Oil Sales

With a total of 5,369 gallons of motor oil sold and delivered to St. Clair County customers between January 1st and April 30, 1934, Oliver Voelkel of St. Clair Service Company took first prize in the statewide Future Order Contest sponsored by Illinois Farm Supply Company.

A. O. VOELKEL
He gets an early start.

This remarkable sales feat was largely instrumental in boosting the future order gallonage of St. Clair Service Company to the second prize total of 22,210, an average of 2,776¼ gallons for the eight men making up the sales force of Manager A. O. Grossman.

Voelkel attributes his record to getting an early start each day, maintaining a clock-like schedule of calls on his customers and to the fact that farmers of St. Clair County are whole-heartedly supporting their own oil company.

Collect $141.75 For McLean County Service Co.

The I. A. A. transportation division recently collected $141.75 in freight overcharges on 11 cars of petroleum products for the McLean County Service Company. "Had these freight bills covering the past year's business not been sent in," says G. W. Baxter, "very likely they would never have been collected. Other service companies have taken advantage of this I. A. A. service."

Farmers' Week at the World's Fair Begins Aug. 11

A big farm parade and pageant down Michigan boulevard will inaugurate Farmers' Week at the Fair beginning Saturday, August 11 at Chicago's Century of Progress.

As this is written, plans are under way for a full week of music, speeches and entertainment of particular interest to farm people. Saturday, August 18, will be Farm Music Day, also Illinois Day. The Chicagoland musical festival will be held this day. The 10,000 troops of the Illinois National Guard will be reviewed and hog calling, husband calling and other contests are being scheduled.

Three times during Farmers' Week there will be displays of fireworks. On Monday — Farm Organization Day — Under Secretary of Agriculture, Rexford Tugwell, has been formally invited to speak. Tuesday will be Farm Radio Day with special WLS programs in the Hall of States. Farm Women's Day, Farm Youth Day and Farm Press Day will follow in order, Wednesday, Thursday and Friday.

Among the new features of the Fair this year are Henry Ford's exhibit, displays by packers, including Swift, Armour, Wilson and Libby-McNeill. The success of the Belgian village last year resulted in a whole flock of new villages, several of which are very attractive.

The Danville Milk Producers Association recently tendered 5,000 shares of "B" stock to the Illinois Agricultural Association. It was accepted by the I. A. A. board at their meeting on July 13.

The people of the United States are paying life insurance premiums at the rate of almost $10,000,000 a day.

Will Organize Skilled Auto Drivers Club

Due to the 41 per cent increase in auto accidents to drivers under 20 years of age, especially in rural areas, the Safety Division of the Illinois Agricultural Association directed by V. Vaniman and A. E. Richardson plans to form a Skilled Drivers Club composed of sons and daughters of Farm Bureau members. All members of the club will be under 20 years of age. The purpose of the club is to unite in one group those younger drivers who can pass a stiff examination.

The committee has divulged a few of the rules and rewards of membership. The Skilled Drivers Club will be further augmented by a Junior Skilled Drivers Club for youngsters from 9 to 14 years old. A series of examinations will be worked out, to be given by the County Farm Bureau and its Accident Prevention Committee. Upon completion and passing the tests, the applicant will be admitted to membership and given an active members badge. Membership will be limited, and thus the badge will be a mark of distinction. It is further planned to hold lectures and gatherings of many kinds for members.

The National Safety Council recently disclosed that one in every 25 drivers under 20 years of age have a fatal accident. This is a 41 per cent increase over the 1921 figures for all drivers. In marked contrast to the youthful fatalities were the figures for drivers between 30 and 39 years of age, who had one fatal accident for every 37 operators of automobiles. The need for education of the younger drivers is very apparent, and the Safety Division has great hopes that the Skilled Drivers Club will be a factor in reducing the number of accidents now on the increase in rural areas.

The County Farm Bureaus and the county accident prevention committees will be supplied with complete information, registration blanks, etc.

I. A. A. Annual Meeting To Be Held in Quincy

Quincy gets the next annual meeting of the I. A. A. This decision was reached at the June meeting of the I. A. A. Board after a report by Secretary George E. Metzger and Treasurer Robert A. Cowles to the effect that the three cities receiving the most votes at the May meeting were qualified to take care of the convention. The meeting will be held Tuesday, Wednesday and Thursday, January 29, 30 and 31, 1935.

The motorists association of Quincy has agreed to provide free transportation from the hotels to the various meeting places located several blocks away or more where the general sessions and annual banquet will be held.

The Quincy Co-operative Milk Producers Association will supply all dairy products, and roast beef for the banquet will be provided by 4-H Club baby beef calves in Adams county.

Investigate Illinois Emergency Relief

Senator Louis O. Williams of Clinton, chairman of the committee of legislators investigating the Illinois Emergency Relief Commission, recently disclosed, according to press reports, that the Commission had doubled its payroll from 4,161 employees to 8,971 since January, 1933. Most of this money is being spent in Cook county.

Senator Williams was extremely critical of the manner in which the Commission is spending vast sums of money.

"It is difficult for the people of the state to understand why it costs 10 per cent to distribute public funds in relief work," said Mr. Williams.

"Knowing something of the temperament of the Illinois legislature I am satisfied it will be impossible to get the legislature to pass a third state emergency relief bond issue next January.

"We are spending vast sums of money for relief. But we have just about reached the limit in raising funds by taxation in Illinois."

Hunters Must Buy Stamps

Hunters of wild ducks, geese, and other migratory waterfowl are now required to buy a federal hunting stamp costing $1.00 annually. The stamps (good in any state) can be purchased at any post office in the county seat and are usually attached to the state hunting license. The stamp tax will be used to increase the supply of waterfowl.

Federal game wardens report that drought has starved and limited normal reproduction of millions of waterfowl.

Wild rice, common food of wild ducks and geese, failed to grow when northern swamps and lakes dried up in this country and Canada.

Farm real estate taxes in 1932 throughout the United States averaged 89 per cent higher than they did in 1913. Farm taxes reached their peak in 1929 when they were at 241 compared with 100 in 1913.

Corn Loans Extended By Government To Sept. 1st

Illinois farmers' $30,000,000 of corn loans which were to mature August 1 have been extended to September 1. When he sells his corn, the owner gets the benefit of any excess money received over and above the loan, the interest due, insurance and other incidental charges. Prompt settlement after August 1 will be asked on loans secured by corn that is in poor condition or which is stored in poor cribs offering inadequate protection.

Administration officials state that on July 1 nearly 383,000,000 bushels of corn were in storage on farms in states where loans were made. This includes all the major corn states. Approximately 256,532,000 bushels, or around two-thirds, is pledged under government loan agreement. Unpledged corn decreased 64 per cent between April 1 and July 1 while pledged stocks decreased only about four per cent.

If the market price of corn on September 1 is less per bushel than the loan amount per bushel, the borrower may dismiss his obligation by turning over to the Commodity Credit Corporation the number of bushels of corn originally stored, provided the loan agreement has been fulfilled and no misrepresentations were made in getting the loan.

Cut in Rate On Pears Benefits Fruit Growers

A reduction in freight rates on pears from Southern Illinois to Wisconsin, Upper Michigan, Minnesota, Iowa, Nebraska, Kansas and Missouri has been secured by the I. A. A. transportation division.

Prior to this adjustment, pears took fifth class while apples took 25% of first class. The same adjustment was asked on pears. Based on a shipment from Centralia to Minneapolis, the reduction is 18c per cwt. which, on a 24,000 pound car, amounts to a saving of $43.20, reports G. W. Baxter.

The average movement into this territory during normal times is around 500 cars and the average reduction will amount to a little more than $30 a car, a savings of $15,000 a year. These rates become effective August 1, in time for this year's movement.

Note: Over a period of 15 years the I. A. A. transportation department has removed innumerable rate discriminations, gained concessions, collected claims which have saved Illinois farmers hundreds of thousands of dollars.—Editor.

Soft Ball League Is Organized in Randolph

Randolph County Farm Bureau recently organized a soft ball league of 12 teams. A schedule of games has been worked out beginning July 21 and running until September 29. Teams are open to both men and women.

Eligible are Farm Bureau members and members of their families, or hired men employed for at least six months.

Future games with teams from Sparta and Chester will be played on lighted diamonds later in the season. County manager of the league is Leonard Schoenberger of Sparta. His assistant, Russell Graham, is general insurance agent. Each community has a manager and these men make up the soft ball committee.

Personal

Married. Murl Tascher, assistant farm adviser, Cook county to **Helen Lindquist** of the I. A. A. (treasurer's office) at Forrest; **Arthur Johnson,** assistant adviser, Marshall-Putnam county to **Faye Dickerson** of Neponset; **Harold Wright,** son of I. A. A. Vice-president **A. R. Wright** to **Gertrude Dickerson,** sister of Faye, in a double wedding at Neponset.

Wilbur H. Coultas is employed as farm supervisor for John Hancock Life Insurance Co. Headquarters Bloomington.

W. G. McCormick, former secretary Douglas County Farm Bureau and secretary-director of Soybean Marketing Association, is looking after farms up and down eastern Illinois for Equitable Life Assurance Society of New York.

New Farm Advisers: **Geo. B. Whitman** who has farmed in Warren county since graduation from the University of Illinois more than 15 years ago, succeeds E. D. Walker as adviser in Henderson. **J. L. Stormont,** former ag. teacher at Aledo, more recently manager of Tri County Oil Co. succeeds J. H. Hughes as adviser in Moultrie.

Sand-blasting is now being used on the Pacific Coast to clean dirty eggs. A sand-blasted egg will keep almost as well as before.

Farm purchasing power during 1933 averaged 58 compared with 100 from 1909 to 1914. The index number for June 1924 was 63.

Big Shortage of Horses and Mules

Many farmers will find it to their advantage to allow horse and mule colts to utilize pasture and hay made available by shifting from cultivated crops to pastures and meadows, according to the U. S. Dept. of Agriculture.

The number of horses and mules in this country has declined rapidly for 15 years. Even last year there was a decline of 358,000 work animals, leaving only 16,873,000 head on January 1, 1934 compared with more than 26,000,000 head of horses and mules in 1919. In 1919 there were 1,588,000 horses and mule colts raised on American farms—in 1932 only 531,000, not nearly enough for normal replacement needs.

How Australia Brought About Business Recovery

C. Hartley Grattan, writing on "Has Australia Recovered" in the New Republic says: "The Australians are in an optimistic mood once more. Every traveler coming from that distant land has some excited words to say about the rise in wool prices and the exhilarating effect it will have upon Australian life. Naturally the Australians do not claim personal credit for this price increase. They know that it is the result of world factors and not the successful outcome of any particular recovery measure of the Commonwealth government. None the less, the beneficial effects of the higher wool prices would not be so great as they are if it had not been for just such policies put through by the Australian people themselves. . . . Australian recovery was engineered by class collaboration. It was accomplished by a complicated series of technical financial measures, including a devaluation of the Australian pound in terms of sterling, an all-round reduction of interest charges on public debt through conversion and on private debt through legislative action (to prevent overconcentration of the national income in the hands of holders of fixed-interest obligations), a lowering of the tariff and a determined effort to balance governmental budgets without cutting too deeply into the social services. The budget savings were increased by eliminating duplicating functions of the Commonwealth and the states and by a 10 percent cut in wages through court action. . . . "

Farm Hands Don't Need Chauffeur's License

Farm employees who occasionally drive a motor truck for their employers are not required to take out a chauffeur's license, Attorney General Kerner has ruled. "In my opinion, where a farmer has a man hired to do regular farm work, not employed regularly as an operator of a truck but merely operates it as incidental to other farm work, such employee is not required to have a chauffeur's license," said the Attorney General in a recent letter to Walter McLaughlin, director of the Department of Agriculture.

Several farmers reporting that their hired men were being picked up by state highway policemen and asked to show their chauffeur's license, appealed to the I.A.A. for advice. The Legal Department referred the matter to the State Director of Agriculture who relayed it to the Attorney General.

Milk License Hearings

Members of the McLean County Milk Producers Association voted unanimously to apply for a licensing program for the Bloomington milk market. As we go to press hearings are being arranged for various downstate milk markets where AAA representatives will take evidence on the question of licensing. Cities being considered are Bloomington, Peoria, Decatur, Danville, Rockford, Quincy, Champaign-Urbana. J. B. Countiss and Paul G. Mathias of the I. A. A. will attend the hearings to assist in presenting evidence for organized producers.

Ship Alfalfa Hay Into Northern Illinois Counties

Large quantities of alfalfa and clover hay have been purchased by Farm Bureaus, Pure Milk Association and individual farmers for feeding dairy cows in the drouth stricken northern Illinois counties.

E. C. Foley, Boone County farm adviser, made a quick trip through central Illinois and located 37 carloads of alfalfa in Shelby and Christian counties early in June. This hay was on its way to Boone county by June 6, the first to be brought into the territory. Pure Milk Ass'n. shipped in several trainloads of alfalfa from Kansas for members, saving them substantial amounts. As much as $25 per ton was paid for local supplies.

The Illinois Agricultural Association RECORD

Number 9 SEPTEMBER, 1934. Volume 12

A Statement On Farm Bureau Benefits

A FARM Bureau member would like to have a concise statement published in the RECORD of the definite benefits the American Farm Bureau Federation, the Illinois Agricultural Association, and the County Farm Bureaus have brought, particularly to Illinois members.

This is no easy job. To go back fourteen years and evaluate all the splendid accomplishments of Farm Bureau members working together during this period is a difficult task. We can't hope to cover the ground in a short review. Neither would we, in the field of legislation, for example, assume to take exclusive credit for all that has been done. It is natural to think of the recent achievements, which for the moment seem most important, and overlook those which have come and gone, and are perhaps forgotten.

Nevertheless, we shall attempt to set down certain fundamental achievements which the Farm Bureau, county, state, and national—one or the other, or all three—can justly take pride in.

1. **Agricultural Adjustment Act**—the result of the long fight waged by the Farm Bureau for the "equalization fee" principle—an American price for American farm products. First credit must go to the operations of this law in all its ramifications for the tremendous gains experienced since corn was 10c per bu., hogs 2c to 3c, wheat 40c, cattle 4c to 5c, cotton 5c, etc.
2. **Corn Loan Program**—added from 10 to 15c per bu. immediately (last November) to the farm price of corn. Made it possible for Illinois farmers owning nearly 70 million bu. of sealed corn to take advantage of a price rise of from 20 to 30c per bu. All made possible because the I. A. A. wrote and secured passage of Illinois farm storage act years ago.
3. **Corn-hog program** — Mid-west Farm Bureaus led by Henry Wallace and Earl Smith worked together to include these commodities in the Act. Reduced hog numbers and corn acreage sent prices upward long before the drought. Made possible millions in corn-hog checks now coming into Illinois.
4. **Wheat Adjustment Plan**—Definitely put several million dollars extra into the pockets of Illinois wheat growers on the 1934 crop in addition to the benefit payments to contract signers. The drought stimulated prices, also reduced yields.
5. **Milk licenses and codes**—made possible by the Adjustment Act have raised fluid milk prices in city milk sheds, also increased condensery and cheese factory prices.
6. **Revaluation of Gold and Silver**—resulted in depreciating the value of our currency abroad which stimulated foreign buying and price improvement. The Farm Bureau has been an outstanding champion of monetary devaluation to lift the unjust burden from the debtor class.
7. **Farm Debt Refinancing** — provided for in the Adjustment Act with more liberal appraisals of farm property and several hundred millions additional loans. Section 75 of Bankruptcy Act sponsored by Farm Bureau opened the way for extending and scaling down debts of those hopelessly involved.
8. **Tax reductions and property tax replacement**—The I. A. A. has been the one organization in Illinois that for 14 years has continuously fought for lower farm taxes—and got results. It is responsible for the principle of "property tax replacement" which made the sales tax a "replacement" tax since Jan. 1.
9. **Hard Roads from Gas Tax**—The I. A. A. throughout its life time has fought for improved farm-to-market roads built out of motor license fees and gas taxes, not out of property taxes as in some states. The I. A. A. was influential in passing the gas tax against powerful,

VANCE TOWNSHIP CORN-HOG COMMITTEE AT WORK IN VERMILION COUNTY, ILLINOIS. Left to right: M. J. Tithe, W. N. Catlett (chairman), I. W. Rowand, Miss Theora Catlett. Miss Catlett, 18 years old, has worked with her father in all stages of the corn-hog program.

Published monthly by the Illinois Agricultural Association at 165 So. Main Street, Spencer, Ind. Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rates of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

organized opposition.

10. **Co-operative Marketing**—The Farm Bureau is responsible for organizing most of the large Producer commission associations which put the farmer's voice and bargaining power effectively into the terminal markets, battling for better prices, saving millions in commissions. Similarly have grain, milk, cream, fruit and vegetable, soybean and other co-operatives been set up to help farmers get all the market affords for their products.
11. **Organized Buying**—The Farm Bureau organized the 56 county service companies operating in Illinois, also the Illinois Farm Supply Co. which have been paying patronage dividends of close to $500,000 annually for the past three years. Most members save more than their annual dues from this service alone. Serum and other supplies of uniform high quality purchased co-operatively.
12. **Insurance-farmer owned and controlled**—Illinois farmers have the most complete insurance service, life, automobile, fire, hail, and windstorm, which they own and control, of any state. These co-operative companies have millions in assets, save huge sums annually to their policy-holders. All made possible by the Farm Bureau.

The development of the co-operative principle in all lines of endeavor in this state has been amazing during the past 10 years. Yet with few exceptions, the hundreds of associations and companies established have thrived and are operating soundly rendering a greatly appreciated service.

In the 12 points outlined above are included only the more prominent accomplishments of organized Illinois farmers working with Farm Bureau members, in national activities, in other states.

The splendid record of achievement of the County Farm Bureaus and the state extension service of the University of Illinois in making farm production efficient, in improving soils, crops, and livestock requires a separate article to do it justice.

In perhaps no other trade organization in America does the member receive so much for so nominal a fee—only $15 a year—as in the Farm Bureau and Illinois Agricultural Association.

For this reason, and no other, the I. A. A. and its many associated companies is regarded as the largest trade organization in America.

Look over these benefits listed above and tell us if we have missed some which you think should have been included. A check for $5 goes to the member writing the best letter (not over 250 words) on the subject "The Farm Bureau Service I Most Appreciate." Deadline Sept. 15.—Editor.

WHEN SPEAKER HENRY T. RAINEY ADDRESSED MORE THAN 8,000 FARMERS AT PEORIA CALLED by the I. A. A. in November, 1933, to request federal corn loans. His funeral on August 22 attended by President Roosevelt and many other dignitaries centered nation-wide attention on Carrollton, Greene county seat, where the Speaker resided throughout his lifetime on his 500 acre farm.

Speaker Rainey Mourned

The farmers of Illinois and the nation are grieved at the sudden death of the Honorable Henry T. Rainey, Carrollton, Illinois, Speaker of the House of Representatives. In Speaker Rainey, farmers had an outstanding champion who smoothed the way for important agricultural legislation sponsored by the Farm Bureau and passed during the last session of congress.

His distinguished figure and kindly personality was a familiar one at many I. A. A. and County Farm Bureau meetings and picnics. Throughout his long and useful career he stood staunchly for measures to promote farm welfare.

A native of Greene county, he represented the 20th district since the turn of the century, being defeated only once in 1920 during the Harding landslide. He was a close friend of President Earl C. Smith, a resident of the same district. For many years he had been a member of the Greene County Farm Bureau and the I. A. A. His office was always open to Farm Bureau representatives in Washington.

Representative Rainey was the oldest man in point of service in congress. His death at 74 years came unexpectedly after a brief illness from bronchial pneumonia in DePaul hospital, St. Louis where reports indicated he was recovering.

The Speaker lived on and operated a 500 acre farm where he maintained a herd of purebred Holstein cattle. Throughout his service in congress Mrs. Rainey acted as his adviser. His passing means that agriculture has lost a powerful friend in the highest councils of the nation.

Everybody is ignorant — only about different things.—Will Rogers.

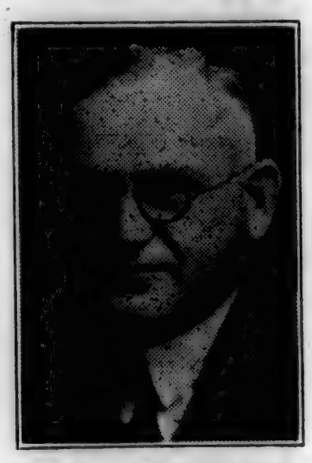
J. L. Whisnand, Former I. A. A. Director, Dies

John L. Whisnand, age 70, of Charleston, Coles county who represented the 19th congressional district on the board of directors of the Illinois Agricultural Association from 1924-'29, died at his home in Charleston on August 15. He was buried August 17 at the cemetery in Ashmore.

J. L. WHISNAND

Mr. Whisnand taught school for several years in Coles county, and while a young man was elected county superintendent of schools. Later he became active in farming to which he devoted most of his time.

"One of Mr. Whisnand's chief pleasures," reports the Charleston Daily Courier, "was to remind his many friends of the five years he served as a member of the I. A. A. board, which, he said, meant more to him than his college and school days because of his wide contacts and associations which this office made possible."



He was a member of the I. A. A. public relations committee which studied the effects of township and community high schools on farm taxes. He served for 27 years as president of the school board in his own city, and throughout his life was active in civic, church and local affairs. He is survived by Mrs. Whisnand, three brothers and two sisters.

At its monthly meeting on August 17 the I. A. A. Board adopted a resolution expressing sorrow and paying tribute to his years of useful service to the Association.

Danville Milk Producers Sell Direct to Consumers

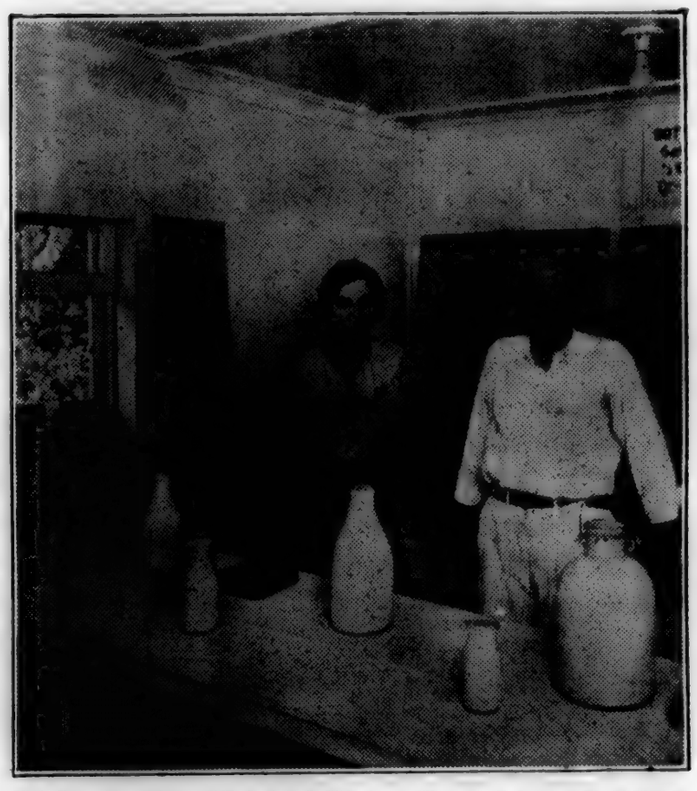
By J. B. Countiss

FOR several years there had been general dissatisfaction among milk producers supplying the Danville market about surplus milk, variations in weights and tests and the low net weighted price. For fluid milk representing 40 to 50 percent of the supply, the dealers had been paying $1.75 per cwt. (3.8c per qt.) for 4% or 44c per lb. butterfat. They charged the consumer 10c per qt. The remaining 50 to 60% was bought at flat butterfat prices or approximately 80c per 100 lbs. (1.7c per qt.) This was at the rate of about 20c per lb. butterfat and even lower. Thus the weighted price received by producers was 32c per lb. butterfat or $1.12 per 100 lbs. for 3.5% milk. After deducting hauling charges of approximately 25c per cwt. the producers had left approximately 87c per 100 lbs., or about butterfat prices.

R. R. BROOKWALTER, president of Danvillle Producers Dairy and a local attorney. Mr. Brookwalter is commonly called the "Courthouse Dairyman" by his friendly enemies. He has a herd of 75 purebred Guernseys.

Why Organized

To change this situation, the Danville Milk Producers Association was organized with the help of the Illinois Agricultural Association and the Vermilion County Farm Bureau to:



1. Bargain with distributors for a fair price.
2. Check weights, tests and grades.
3. Control surplus milk.
4. Sell milk to distributors on a classified plan.
5. Improve quality through field work among members.
6. Promote milk consumption through joint dealer-producer advertising.

Two hundred and twenty-two producers joined the Association. They represented about 85 percent of the farmers supplying the market. Negotiations with the dealers to improve the market for producers were immediately launched but all were unsuccessful. In most cases the dealers refused to meet with the producers or even consider any kind of a proposition offered. Neither would they propose anything. Accustomed to buying milk from individual unorganized producers on their own weights and tests, grade and price, the dealers apparently resented the producers organizing and inquiring as to why they should not have a reasonable share of the 10c per quart ($4.60 per cwt.) the consumer paid; why farmers should not have the privilege of selling on their own weights and tests as the grocer and butcher does; why they should not check the use that is made of their milk since it was bought on a base and surplus plan.

Although the distributors stubbornly refused to recognize or deal with our organization, they did, however, recognize R. R. Brookwalter, president of the milk producers; Judge Allen, another producer; President Lenhardt of the Vermilion County Farm Bureau, and 27 others who were leaders in the organization of the co-operative. These producers were dropped immediately from the market, left without an outlet for their milk.

To Sell Milk

The Danville Producers Dairy was then organized on a capital stock basis and stock sold to producers. The purpose of the dairy is **not to bargain for a price but to sell milk** to consumers, to make a market for members thrown off by the dealers, and let other members continue to sell to the distributors.

E. O. KERBY, MANAGER OF ONE OF THE CASH and carry dairy stations, and Mrs. Kerby shown inside of their station.

Frank Botts was employed as manager and the Blue Banner Dairy was leased including building and equipment. Operations started March 10th. Milk is pasteurized and bottled in gallon jugs, one-half gallon bottles and quart bottles and sold along with Prairie Farms Butter, cottage cheese, cream and eggs thru a cash and carry system of milk depots. The price of milk is 7c per quart or 23c per gallon. Some of these depots are selling 80 to 100 gallons of fresh, pasteurized milk per day which is equal to a good retail route. Seven milk depots are now in successful operation selling a complete line of dairy products.

The dealers are now paying a flat price for milk and NO SURPLUS, but

ONE OF THE SANITARY, CASH AND CARRY STATIONS MAINTAINED BY THE DANVILLE PRODUCers Dairy Co. Notice the price schedule in front and the trim, business-like appearance of the building. Seven of these cash and carry stations are now operating in Danville selling a full line of Producers Dairy products.

the producers report they get more money at our plant. The soundness of the plan and the tremendous possibilities of such a program in developing milk sales by producers organizations depend on the following points: (1) No delivery expense, (2) No collection expense, (3) No bad debts, (4) No bottle loss, (5) Personal contact with customer, (6) Minimum investment, (7) Increases consumption by narrowing spread.

In to Stay

The dealers have been erecting stations across the street from the Producers and selling milk for 7c but this activity has only increased the Producers business. The customers know what's back of the program of "Cities Dairies," as the dealer-owned stations are called. They are attempting to squeeze out the farmer-owned stations.

The Danville Milk Producers Association was organized to bargain for a fair deal with the distributors. The distributors refused to bargain so the Producers Dairy with a cash and carry system was organized not to bargain but to sell milk, not because they wanted to go into business but because they were forced to. Now they like it and are in business to stay.

Producers Creameries Have Federal Inspection

Illinois Producers' Creameries was established for just one reason—to get more money into the pockets of its members. More money for the producer is being secured by producing a higher quality butter and giving the farmer the profits in processing and distributing. The consumer is willing to pay more money for Prairie Farms butter because it tastes better. Prairie Farms is better butter because it is made in modern, sanitary, co-operative plants from higher quality cream. The cream is of higher quality because it is picked up twice weekly at 5,000 Illinois farms by co-operative trucks and churned while fresh.

78 Truck Routes

Illinois Producers' Creameries in the short space of 15 months has established a better system of butterfat procurement thru a network of 78 truck routes now serving producers in 34 counties. Approximately $25,000 extra was returned out of profits, to producers during their first year of operation. In addition, the general price level of butterfat was raised nearly 2c in territories served by cooperative plants.

Again Illinois Producers' Creameries took the lead in the production of high quality butter when on July 15th Federal and State butter inspection was started in all of its plants. Arrangements were made with Roy C. Potts, specialist of the Division of Dairy & Poultry Products, U. S. Department of Agriculture, to provide an official Federal-State butter inspector who grades and scores every pound of Prairie Farms butter manufactured in these co-operative plants.

"PRAIRIE FARMS" IS THE BUTTER THAT must please. To insure its uniform high quality, government inspection was initiated recently in co-operative plants where it is made.

Above government inspectors are looking at sample in plant of Farmers' Creamery Company, Bloomington. Frank A. Gougler, J. B. Countiss and Forrest Fairchild in background.

As soon as it is churned federal certificates of quality will then be issued for each car before it leaves the plant for the market in Illinois Producers' Creameries' refrigerator cars. Each tub will be marked with the emblem similar to the Prairie Farms butter carton so that any buyer can buy this butter with confidence and know it is uniformly good regardless of where made.

Issue Certificate

Prairie Farms butter sold in cartons in most down-state towns will contain "certificates of quality" issued by the Federal Government only after the high standards of quality which allow their use have been met. Each certificate will be dated so that the consumer can tell exactly when the butter was churned. This not only assures the housewife high quality butter but also guarantees her of its freshness and purity. During the first six months of 1934, 30½ cars of Prairie Farms butter was sold to hotels, stores and restaurants in Illinois in competition with scores of other brands which plainly shows that consumers appreciate its high quality.

Farmers can increase their cream checks by producing higher quality cream and marketing it through their own co-operative creamery. Demand for our butter is constantly increasing and more quality cream is needed to take care of our customers.

Cite Two Creameries For Unfair Prices

Salt Lake Butter Manufacturers Investigated for Discrimination

Two Salt Lake City creameries are being investigated by David F. Smith, Utah Commissioner of Agriculture, on charges of alleged discrimination on the price being paid to producers. The charge alleges that the creameries are paying Utah farmers 19 and 20c a pound for butterfat while Idaho producers are being paid 23 and 24c, and in many cases the creameries are absorbing the freight charges. A federal investigation of the charges has also been asked by Gus. P. Backman, Utah Code Administrator.

Commissioner Smith has stated that if the discriminatory practices occurred within the border of the state the management of the companies concerned are liable to a heavy fine and a jail sentence.

It is thought that the investigations against the two local companies will result in a sweeping probe of the buying of cream within the state. The Commissioner has asked the head of the Idaho State Board of Agriculture for his assistance in stamping out manipulation of fat prices.—The Dairy Record (July 25, 1934).

An old trick, well known to Illinois farmers, is the practice of some private creameries of buying cheap in communities where cream producers are not organized, and paying above the market in other sections to kill off cream pools or co-op. creameries.—Editor.

Producers Creameries Gain Despite Drought

In spite of the drouth the Producers' Creamery of Peoria reports a nine per cent gain in volume of butter manufactured during May, 1934, over the volume manufactured for the same month in 1933. June, likewise, showed a slight gain over June of last year although Illinois creameries generally had their volume reduced around 25 per cent this year compared with last.

The Producers' Creamery now has approximately 25 per cent of the retail butter business in Peoria. Many of the best stores, restaurants and hotels now use Prairie Farms Butter exclusively.

The Producers' dairy is also manufacturing large quantities of ice cream mix and cottage cheese. Similarly, the Farmers Creamery Co. at Bloomington has made rapid strides since its opening more than a year ago.

The chief value of co-operative creameries, aside from returning farmers the profits in processing and distributing, is in forcing private buyers to pay farmers what their cream is worth. All producers, of course, benefit from this service.—Editor.

An all-time heat record for the middle west and southwest was set during July and early August.

AAA License Hearings

Milk Producers Seek Fair Prices Under Market Administrator

THE age-old battle of the milk producer in his efforts to gain a fair share of the consumer's dairy dollar was re-enacted at a series of hearings sponsored by the AAA held at Peoria, Rockford, Champaign, Bloomington, Danville, Decatur and Benton during August.

Chief Examiner for the federal Adjustment Administration was Harry C. Cook, assisted by J. T. Flythe, government attorney; George Irvine, economist; Daniel M. Dent of the Consumers' Council; and F. S. Milberg, official reporter for the National House of Representatives who took down testimony and evidence.

At Peoria where the Roszell Bros. are reported to have told so-called "independent" milk producers that they would lose their market unless they oppose a government license, a warm two-day session was held. On the opening morning the Red Room of the Jefferson Hotel, hot and stifling, was packed with producers who overflowed into the corridors long before the opening of the meeting at 9:30 A. M.

"Independent" Badges

Bystanders stated that Roszell's had organized the "Independents" and provided trucks to haul them to the meeting from points as distant as Pontiac, more than 50 miles away. Wearing large badges labeled "Independent" these producers who plainly had been misinformed filled the front seats at the opening session.

By the end of the day the "Independents" were a disillusioned lot of producers who realized they had been duped, that there was nothing in the proposed license to bar their milk from the Peoria market. The badges were conspicuous by their absence the second day.

Witnesses who appeared for the Peoria Producers Dairy, representing the organized milk producers in the territory, were: President Ryland Capron, Manager Wilfred Shaw, Secretary John Hagenstoz, Albert Hayes, president of the Peoria County Farm Bureau, and others. Donald Kirkpatrick and Paul Mathias of the I. A. A. legal department, J. B. Countiss, dairy marketing director, and George Thiem, director of information, attended the hearing.

Attorneys Heyl and Bradley represented the Roszell Dairy and the Illinois Milk Dealers Association which seemed to be leading the fight against the license. Opposing witnesses were largely local producers who had been given special consideration in prices for their milk.

Officers of the Producers Association disclosed that farmers were getting a little more than $1 per cwt. as a net weighted average price for milk while dealers were charging the consumer 10 cents a quart. Organized producers are asking for a Class I price of around $2 per cwt., 92 score butter plus 20 per cent, plus 20 cents per cwt. for Class II, and approximately butterfat plus 10 cents for Class III.

Attack Cooperative

In cross-questioning President Capron of the Producers Dairy, Attorney Heyl for the distributors sought to attack the co-operative and shake the confidence of organized producers in their Association.

Manager Shaw testified that much of the milk entering the Peoria market was manufactured into such products as butter, cheese, ice cream mix, etc., which entered interstate commerce. The distributors' attorney tried unsuccessfully to undermine this testimony. Shaw also stated that local distributors had shipped dairy products to St. Louis at the time of the strike there.

The chief argument advanced by the distributors was that the milk license would disturb the market and that the government had no jurisdiction because their business was strictly intrastate. "This market has been in a disturbed condition for several years," said Albert Hayes, speaking for the producers, "and this meeting is a fair sample of what we've had to contend with." He stated that many markets were now operating successfully under AAA milk-licenses which have been helpful in improving conditions for the producer.

Archie McPhedran of Peru, president of the Mississippi Valley Milk Producers spoke briefly reviewing conditions at Peoria and other markets and pointing out the need at Peoria and other markets for narrowing the price spread between producer and consumer.

Answering the question why the Producers Dairy was not able to pay more than the dealers for milk, Mr. Hayes stated that only 20 per cent of milk received by the Produeers Dairy goes into the fluid milk class which commands a premium, whereas nearly all of the milk purchased by other distributors goes into the fluid class which retails at 10 cents per quart.

At Rockford where distributors and producers have been getting on well under a contract which pays the farmer $1.85 per cwt. for all milk delivered, President Mainland and Manager Wilkie Lee of the Midwest Dairymen's Company testified for the producers. They requested that the operation of a license be postponed for this market until the occasion for its use arises. At Rockford the so-called "dip" stations on the outskirts of the city, of which there are more than 30, opposed the license. Distributors expressed the belief that the license was not needed at that market. Attorney Heyl also represented distributors at Champaign.

Will File Briefs

As this is written, hearings have not been completed at all the markets mentioned above.

Briefs will be prepared by the various producer groups with the aid of the I. A. A. Legal and Dairy Departments at the conclusion of the hearings and sent to the AAA Dairy Division at Washington. It is believed that one market administrator will be capable of supervising all or nearly all the downstate markets when licenses are issued.

PLANT, EMPLOYEES, AND DELIVERY TRUCKS OF THE QUINCY CO-OPERATIVE MILK PRODUCERS' Association. Five snow-white trucks and eight wagons drawn by grey horses deliver a full line of dairy products on each route. The Quincy Co-operative dairy has found it profitable to have clean and attractive vehicles. Every employee is given a medical examination twice a year.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interest of the farmers of Illinois and the nation, and to develop agriculture.

AAA Must Be Retained

ANY effort by organized commission men, processors and their allies to ditch the Agricultural Adjustment Act and the principle of acreage control will be vigorously resisted by the organized thinking farmers of America.

Crop adjustment machinery developed under the AAA must be retained. The drouth may temporarily make reduction of basic crops unnecessary. But until foreign markets are restored and domestic buying power improves, farmers know that they must plan their production or take the consequences in ruinous prices. Only an announcement of the possibility of abandoning acreage reduction next year was sufficient, recently, to send grain prices tumbling at the terminal markets. This fact is a complete answer to critics who attribute all of the gain in farm prices to the drouth.

A simplified adjustment program through grain acreage control such as that outlined by President Smith heretofore in the RECORD, has met with the general approval of farmers wherever the proposal has been considered. Informed farmers will not surrender the most effective legislative weapon they have yet been given to raise farm prices. The processing tax has been called the farmer's tariff. More and more farmers are coming to appreciate the truth of this comparison. While the processing tax on hogs has not brought equal benefits to all hog growers, particularly to feeders, because of the imperfections in the plan and difficulties in operating it, there is no question about the net benefits to the industry as a whole. Not only beef cattle but also mutton prices have been aided by the reduction in hog numbers.

The Agricultural Adjustment Act has made a great contribution to the welfare of the farming industry despite some irritations resulting from initial efforts to operate so complex and colossal a program. The machinery it has developed must be continued, at least so long as American farmers are forced to do business under an economic system in which production and price control, price fixing and organized wage-fixing form such a large part.

A Century of Progress

THE Century of Progress Exposition reveals among other things a century of progress in piling up distribution costs. You can readily see why the farmer is getting such a small percentage of the consumer's dollar. Mrs. Consumer, herself, whom the processors and distributors desire to please, in fact must please to get their share of the business, is largely responsible for higher-priced food and lower prices to the farmer. In the good old days, for example, when farmers were getting half or more of the consumer's pork dollar, bacon was bought by the piece or slab. Now it is carefully sliced, wrapped in half-pound and pound cellophane packages by pretty red-haired girls dressed in white, then placed in attractive cartons all printed up with beautiful trade names in colored ink. At the Fair, this process all looks very interesting. Great crowds stand around to watch the performance. Then you remember that every operation adds to the cost of the finished commodity. And when consumer buying power is down, as at present, those extra operations are charged back against the producer in a lower price for his livestock. So it is with many other farm products.

A Chicago Leader Speaks

THAT many farmers get the wrong impression of the attitude of city people toward agriculture from reading the metropolitan newspapers was intimated by Rufus C. Dawes, president of the Century of Progress Exposition, in his official welcome to the farmers of America at the opening of Farmers' Week.

"Chicago is prosperous when the farmers are prosperous," said Mr. Dawes. "Business of Chicago lags when agriculture languishes. Business men of Chicago realize that farmers have taken every advantage of science; they have increased production per man and the production per acre.

"The problem of the distribution and the sale of the product of the farmer is still unsolved, and it is a problem in which the welfare of the city is as much involved as that of the farmer. In the solution of this problem the men living in the cities have a greater responsibility than the farmer himself."

How different is this attitude from that so often shown by certain Chicago newspapers, speculators, and processors. A minority of voluble critics of farmers' efforts at helping themselves have brought Chicago a lot of unnecessary ill will. We need to hear more from men like Mr. Dawes who really represent the group which has contributed most toward building this great city.

The past four years have demonstrated, as Mr. Dawes suggests, how dependent the city man is on the buying power of farmers. Lack of confidence is not nearly so important a factor in general prosperity as lack of a fair relationship between farm and non-agricultural prices. Business and employment have improved since 1932 largely because farm prices advanced enabling farmers to buy more factory products.

Observations

Farm income this year will approximate $8,250,000,000, a 29.3 per cent increase over 1933. This estimate is by Standard Statistics, not by the AAA. It includes crop adjustment benefits paid or scheduled to be paid between now and Jan. 1. This record is rather a complete answer to enemies of crop adjustment who criticise everything that is being done to pull agriculture out of the mire.

Secretary Henry A Wallace stopped in the office this morning (Aug. 21) for an informal visit and chat with officers and members of the I. A. A. staff. The tired, deeply lined and care-worn face many of us saw at Rockford the Sunday before, was completely changed. A little sleep and rest will do wonders for a normally healthy constitution. On his way east, the Secretary changed his plans to attend Speaker Rainey's funeral at Carrollton and accompany the President back to New York State.

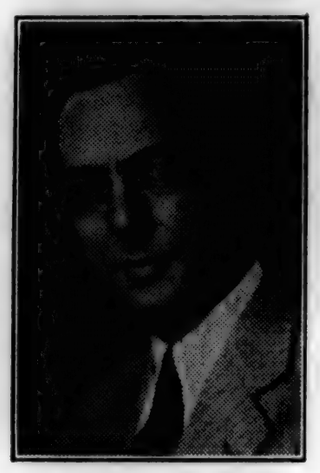
Henry Wallace's mind, heart and soul are wrapped up in the many-sided economic problems affecting the welfare of the country, and particularly agriculture. His job undoubtedly is the heaviest of any cabinet member. Each commodity represents a different problem. He is and must be well-versed in the broader phases, at least, of every production control and licensing program being administered. Secretary Wallace doesn't discuss politics. He isn't interested in it except as it affects the working out of solutions. He readily admitted that he agreed with the suggestions of three prominent Republicans, Ogden Mills, Henry L. Stimson, and a coming possible Republican presidential candidate, that the tariff should be sharply cut on industrial products to allow foreign goods to enter this country in exchange for surplus American farm products.

But how to do it. Such a program, if energetically carried out so as to result in heavy foreign buying of farm products and make acreage and crop control unnecessary, would be far more radical than anything yet attempted by the present administration. Democrats as well as Republicans are sensitive about the tariff, Mr. Wallace said. Some progress will be made in this direction but to make drastic slashes at one fell swoop would close up many industries and bring about a temporary maladjustment that would rock the country. "It's surprising how many congressmen and senators a small industry employing not more than 500 people, perhaps, can muster to their support when any lowering of the tariff is suggested," the Secretary told his audience at Camp Grant.

Processing taxes, alcohol-gas dilution, co-operative marketing, direct buying of livestock, corn-hog control, reclamation, taxes, Farm Bureau membership and many other questions were raised at our informal session. The Secretary thought Illinois farmers were doing rather well to maintain an organization of some 61,000 members. He was interested in I. A. A. activities and the record of patronage dividends and services used kept in Secretary Metzger's office for each member. He conceded that there would be a good deal of justification for reducing the processing tax on hogs and placing part of the burden on cattle and sheep since these classes of livestock have been benefited by the hog control plan. He pointed out that if hog prices go to parity, the processing tax automatically is eliminated under the AAA Act.

It is likely that the processing tax will remain on hogs until November 1935. As hog receipts dwindle at the terminal markets more and more of the processing tax, it appears, is being passed on to the consumer. At this writing, hog prices plus the processing tax very nearly approach parity.

What is the attitude of the Department of Agriculture on reclamation projects? "There's no question about our attitude," he smilingly replied. "We expressed our opinion. The administration plans to take out of production enough marginal land to compensate for the extra acres that will be brought under the plow. $25,000,000 has been appropriated already for this purpose. The irrigation projects, he continued, will not affect corn belt farmers so much as they will farmers now producing specialty crops in the irrigated area. They are the fellows who will be hurt."—E. G. T.



Corn Loan Repayments Million Dollars Daily

Corn loans, which were made last winter and spring to mid-western farmers to the total of $120,647,500, were being repaid to the Government at the rate of more than a million dollars a day in mid-August although the maturity date for the loans some weeks ago was extended from August 1 to September 1. Officials of the Agricultural Adjustment Administration stated that $26,369,464.69 had been received on Aug. 13, and that loans were being repaid at an increasing rate.

The loan period was recently extended an additional five months from September 1st with the understanding that the borrower must first offer his corn (at current market price) to the federal government before sale.—Editor.

Consider Sale Soybean Hay To Federal Relief Officials

As we go to press considerable progress has been made by the I. A. A. and Soybean Marketing Association toward rounding up supplies of Illinois soybean hay for the Federal Surplus Relief Corporation and other buyers from drouth areas. Most of the hay will be shipped to save livestock in the burned-out areas west of the Mississippi river. The soybean-growing counties have been given hay allotments based on their acreages. Federal relief authorities have indicated their desire to purchase somewhere between 50,000 and 150,000 tons of Illinois soybean hay.

EARL C. SMITH

President John W. Armstrong of the Soybean Association, President Earl C. Smith and Treasurer Robert A. Cowles of the I. A. A. have been carrying on negotiations for several weeks with the idea of strengthening the market situation for soybeans. With close to a 50 per cent increase in acreage this year, the outlook for a reasonable price for soybeans was anything but favorable. Buyers were decidedly pessimistic. Then the possibilities of making hay out of a substantial percentage of the crop was presented by Mr. Smith and Mr. Armstrong to meetings of soybean growers, and the entire market situation changed. Buyers began taking an entirely different attitude toward future prices. If growers take advantage of the opportunity to dispose of a substantial portion of the soybean crop in the form of hay, 1934 soybean income promises to be greatly enhanced.

John T. Smith, soybean grower of Champaign county, has been retained temporarily by the Soybean Association to contact growers and determine what response would be made to the plan. It is planned to provide hay inspection before shipment. Baled soybean hay of good quality, which is dry and free from weeds, will bring close to $15 per ton less handling charges at country points. A good field will yield one and one-half to two tons of hay per acre.

The Pure Milk Association also has negotiated for substantial quantities of soybean hay for their members in the Chicago milk shed. Meetings of Central Illinois soybean growers and farm advisers were held during the State Fair, August 23-24 at the call of President Smith, to discuss the hay deal.

A Good Day's Work at The Cook County Building

John Macauley Says the Check For $227.15 Wasn't Hard To Take

Back in 1930 the Cook County Highway Department decided to widen 131st street, a country road in the southern part of the county. The project took approximately 17 feet additional right-of-way from the farm of John R. Macauley, hale and hearty Scotchman who holds a membership in the Cook County Farm Bureau.

Mr. Macauley sold his farm during the boom but the real estate men who bought it decided when land values went blooey, to deed the farm back to him. While in possession, the buyers generously gave the strip of land to the county, signing an easement therefor. When Macauley got the farm back he tried to secure compensation for his land but nearly three years of effort proved fruitless.

Checked the Records

Finally a neighbor suggested that he appeal to the Illinois Agricultural Association, which he did. G. W. Baxter of the I. A. A. went with Mr. Macauley to the Cook County Recorder's office where after checking the plat and deed found that the parties who bought the farm had signed the easement after the land had been deeded back to Macauley. The original deed was taken and presented to the Cook County Highway Department as proof that compensation should be made to the present owner. A new appraisal was secured and on July 19 Macauley received a check for $227.15.

In a letter to the Cook County Farm Bureau, member Macauley expressed his appreciation for the service as follows:

"I am writing to thank you and the Illinois Agricultural Association for your help in getting settlement for right-of-way taken by the Cook County Highway Department bordering my farm on 131st street. I had previously written several letters to different county officials, but without getting any place toward a settlement. While talking to a Farm Bureau member one day he said: 'Why don't you ask the Illinois Agricultural Association to help you. The services of their claims division is free since you are a member of the I. A. A. and Cook County Farm Bureau.'

Pays to Belong

"I wrote to the Illinois Agricultural Association and in a few days I received a letter from them signed by G. W. Baxter saying that he was ready to help me in any way he could. . . . Mr. Baxter went with me to the County Building and from that time, which was early in January, up until today he has worked hard and accomplished a settlement.

"I am convinced that it pays to belong to the Farm Bureau. Anyone can get service enough to many times offset the amount of his dues, if he applies for it in the right way. John R. Macauley."

Lemont, Cook County, Ill.

JOHN R. MACAULEY
Cook County Farm Bureau Member.
"I am convinced it pays to belong," he says.

Tell Distress Debtors How To Secure Relief

More than $100,000,000 of farmers' debts in the United States have been adjusted so that the loss of farms by debtors has been avoided, according to a report by the Farm Credit Administration. The Administration states that farm debt adjustment committees in 2,400 counties of 42 states have indicated their belief that success in adjusting debts between creditors and debtors had made it unnecessary in most cases for farmers to resort to bankruptcy under the Frazier-Lemke moratorium law.

In Illinois, county debt conciliation committees report that debts were adjusted for approximately 3,000 distressed farmers whose indebtedness totaled around $20,000,000.

In many counties Farm Bureau leaders are members of the conciliation committees established under the direction of Walter McLaughlin, director of the State Department of Agriculture.

Recommended for Debtors

At its last meeting in Springfield, the State Debt Conciliation Committee recommended the following procedure to distressed debtors for relief:

1. Go to the county Farm Debt Adjustment Committee and lay the problem before them with the idea of securing a voluntary adjustment with creditors.
2. If the county committee cannot bring about an adjustment refer the problem to the county conciliation commissioner authorized under section 75 of the Federal Bankruptcy Act. Under this section, written and sponsored by the Farm Bureau, the commissioner has additional powers to make an agreement reached by the majority of creditors in number and amount, binding upon a minority.
3. Failing to secure a voluntary settlement by either of these methods, the debtor may petition to become a bankrupt under the Frazier-Lemke amendment to the Bankruptcy Act. Under this Act the debtor may elect to remain on his farm for a period of five years under the control of the Federal court. To remain on the farm, however, he must pay rent fixed by the court, and the taxes.

In Illinois a number of county debt adjustment committees have been active in settling a large percentage of the cases brought before them. In some counties very little has been done. It is generally known that unnumbered creditors and debtors have made their own adjustments without resorting to outsiders. In such instances loans have usually been extended and interest rates modified.

Careful reading of the Frazier-Lemke amendment reveals that it is largely a moratorium bill. No scaling down or interest reduction is compulsory. Creditors must first consent to such action before anything can be done. A debtor must be bankrupt before he can get any relief under the law.—Editor.

Favors Limiting Service To Farm Bureau Members

Our big co-operative creameries, one of which has paid back to member patrons more than a half million dollars in the last 10 years, have been an important influence in maintaining Farm Bureau membership in their respective communities, L. L. Needler, secretary of the Indiana Farm Bureau, told delegates at the Midwest Conference in Chicago, August 15.

In the districts where these co-operative creameries have been operating, our County Farm Bureaus invariably have a strong membership, he said.

Needler expressed the belief that Farm Bureau membership must not be neglected for the commercial services. "We have to tie these services closer to the Farm Bureau," he said, "or we'll lose our membership. The Farm Bureau member is not going to continue supporting his organization if the non-member gets just as much service as the member. It's not right nor fair to extend benefits made possible by the Farm Bureau, to all farmers regardless of whether or not they are members."

Secretary Wallace at No. Illinois Gathering

ONE of the largest outdoor gatherings ever held in Illinois was sponsored by the Winnebago Farm Bureau at Camp Grant, Rockford, on August 19 where Secretary of Agriculture Henry A. Wallace was the honored speaker.

Farm Bureau leaders and farm advisers from some 20 Northern Illinois and Southern Wisconsin counties joined in the celebration which drew a crowd estimated at 15,000 people. The meeting was given more than state-wide significance and importance by the presence of many farm organization representatives and officials including Edward A. O'Neal, president of the American Farm Bureau Federation; Earl C. Smith, president of the I. A. A.; C. V. Gregory, editor of Prairie Farmer; Dr. W. L. Burlison, acting dean of the State College of Agriculture; Walter W. McLaughlin, State Department of Agriculture; H. A. deWerff, president State Association of Farm Advisers in addition to local business and civic leaders.

200 At Dinner

Nearly 200 men attended the dinner to the Secretary of Agriculture in the Faust Hotel at noon where Barney Thompson, editor of the combined Rockford newspapers gave a brilliant address of welcome to the Secretary and other guests.

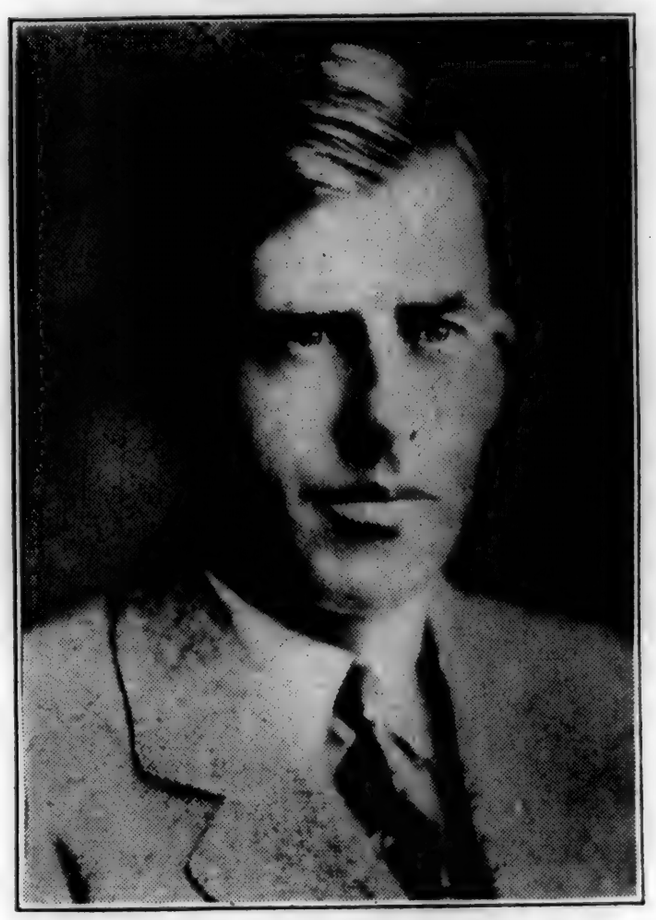
George F. Tullock, president of the Winnebago County Farm Bureau, and Farm Adviser Charles H. Keltner were masters of ceremony and did a very splendid job of carrying out the program of the day. Mrs. Tullock and Mrs. Keltner were hostesses to some 25 or 30 visiting women at a dinner in another part of the hotel.

Short talks were made both at the dinner and at the afternoon meeting. "We're glad we have a Secretary who knows how to grow good seed corn," said Clifford Gregory in introducing Mr. Wallace at the dinner.

In a brief inspiring talk President O'Neal emphasized the importance of national unity and the close relation that exists between the welfare of farmers in different sections of the country.

In introducing Secretary Wallace at the big afternoon gathering President Earl C. Smith stated that no informed person denies the great benefits that have been brought to farmers under the Agricultural Adjustment Act. While the drought has disturbed the uniformity of application of measures that have been taken, he said, all real friends of agriculture will fight to retain the principles in this legislation. He paid tribute to the leadership of Secretary Wallace in his efforts over many years to bring about effective legislation to cope with farm surpluses.

The Secretary, careworn and showing the effects of his many responsibilities, spoke extemporaneously. He frankly laid bare the economic and political forces which created the present disorder and unemployment. "Agriculture," he said, "is in the process of gaining some of the advantages made possible to industry and labor by the corporation and effective organization."



Problem Not Solved

The drought hasn't solved our problems by any means, said Mr. Wallace. There promises to be a shortage of livestock next year and livestock farmers will probably get attractive prices. But there is still great danger ahead if we fail to study our markets and production figures, and if necessary cut acreage again. There will be nothing but disaster ahead, he continued, if we have average weather and no control over acreage in the next five years. We had short corn crops in 1930, 1931 and 1933, he pointed out. Yet in spite of this we overproduced livestock.

Many people who oppose planned production forget that we have all but lost our foreign markets, and a substantial part of the domestic market for farm products since power farming has so largely replaced horses and mules. For the future he envisioned an economic democracy in which the different groups and classes such as agriculture, labor, industry, etc., would have equal voice in working toward a more equitable distribution of the national income.

We have had political democracy for some time, he said. But economically corporate setups have enabled certain groups to amass wealth at the expense of many who earned but did not get their fair share of national income. He expressed the belief that we must first get rid of prejudice, fear and greed in working out solutions. All of these prevent rather than help to bring about what we are after, he said.

What we hope to develop is not communism nor fascism but a national economic council in which men will sit down and work out their common problems

HENRY A. WALLACE, Sec. of Agriculture. He knows how to grow good seed corn.

with the government acting as referee.

Answering the critics of regimentation, he pointed out that some people who handle farm products make a better living when there is a heavy production. Many of these are good folks but they see only their own problem, he said. They live on commissions and percentages, and any program which reduces volume and their income is abhorrent to them regardless of the price the farmer gets.

Cotton Control Helps

Emphasizing the importance to the corn-belt of cotton control in the south, the Secretary said that last year the oil in the cotton seed plowed under could have replaced the lard in approximately 15,000,000 hogs. Cotton seed oil is a direct competitor of lard. Without cotton acreage control this year the south easily could have produced additional cotton seed oil to replace the lard from 20,000,000 hogs.

"An attempt might have been made eight years ago to balance the world economic situation," he said. "Of course it would have been extremely difficult and unpopular politically. It would have meant taking about $700,000,000 annually of foreign goods. Instead we loaned our debtors money and put off the evil day until 1930. We had to face this thing sooner or later.

"We have picked up considerably during the last few years, however. We are getting more than 10 cents for our corn, 40 cents for wheat, eight cents for tobacco, two cents for hogs and six cents for cotton. Livestock has lagged behind. It always does. But eventually livestock farmers come into their own and sometimes with a vengeance.

"The change in the value of our dollar abroad has increased foreign demand and has helped certain farm prices.

Personal Property Tax In Chicago Vs. Country

High Percentage of Rural Folk Pay Their Taxes

The Chicago American of July 28th published an article on "Taxes in Farm Country," from which it draws some unwarranted conclusions.

Referring to the published personal property assessments in Alden, Dunham and Hartland townships, McHenry County, the **American** comments in part as follows:

> **"From a glance at the personal property assessments, we are inclined to the conclusion that these McHenry County citizens—farmers with livestock and implements, business men with merchandise stocks, bankers, etc.—pay less in proportion to the wealth and population of the towns than the citizens of Chicago are paying under Assessor J. L. Jacobs."**

The three townships to which the **American** refers are almost exclusively agricultural, all having a population of between 800 and 900 in 1930. Not one of them has an incorporated city, village or town. Alden township has a small unincorporated town, also named Alden, a place of perhaps 100 people, the chief business houses of which are two stores, both of which are assessed and pay taxes on their stock of goods. Some of the families living in Alden are engaged in farming. Others, often aged, residing in Alden, or scattered here and there in the three townships, have gardens or small tracts of land, usually with poultry and some with a few livestock. There is no bank in the three townships.

The American further comments on the small number of citizens having personal property assessments, which it gives as "less than 300" in Alden township, "some 250" in Dunham township, and "180 assessments" in Hartland township. All these estimates are unduly generous. Excluding corporations and counting all assessments against the same person as one assessment, the Alden assessor listed 251 citizens. This is surely a high score for a township which had only 129 farmers in 1930, besides other residents, mostly in the small town of Alden. The assessors in the other two townships scored about as high. With no town, the Dunham assessor, with only 165 farms, listed 225 citizens. Also with no town, the Hartland assessor, with 141 farms, listed 159 citizens. It is evident that the assessors missed no farm or non-farm residents. Has the Cook County Assessor done as well in listing the residents of the City of Chicago?

It is one thing to assess personal property and another to collect the taxes thereon. It is still too early to say what proportion of the 1933 personal property taxes will be collected in McHenry County. Of the 1932 personal assessments, 28 are delinquent in Alden township, 28 in Dunham township and 27 in Hartland township. The percentage of assessment items which are delinquent varies between eleven and seventeen, mostly on the smaller amounts of taxes charged. The percentages are probably even smaller on the basis of the amounts charged.

What are the facts in Chicago? While Assessor Jacobs is doing better than his predecessors, the county collector is doing a poor job of getting the money in on personal property assessments. Less than 30 per cent of Chicago people have been paying personal property taxes. Most Chicago residents are in the habit of tearing up their personal property tax bills or giving them to a neighbor politician to be "fixed."

THE ENTERPRISING GROSSMANN BROTHERS, Oscar and Armin of the St. Clair County Farm Bureau, made use of the opportunity to put in some good licks for organization and the Farm Bureau at the Smithton homecoming attended by more than 2,500 people.

Another float featured a horse and a pony hitched to an old buggy. The horse was labeled "Farm Bureau 1934"—the pony "Farm Bureau 1927."

Secretary Wallace At No. Illinois Gathering

(Continued from page 15)

Some of the folks who are against regimentation want to lower the tariff drastically to bolster up foreign purchasing power. Such men as Ogden Mills, Henry L. Stimson and another who may be a presidential candidate for the Republican party, have suggested that this be done. I agree with them. But how rapid can or should this be done? Democrats are just as sensitive about the tariff as Republicans.

Must Control Acreage

"If we greatly reduce the tariff and start importing large quantities of foreign goods so foreigners can take our farm products it would mean a tremendous readjustment in many industries. The way it looks to me we may have to continue for some years to curtail production. The farmer is getting a lot of pity because of this so-called regimentation, but just remember it is self-imposed. No farmer was forced to cut production.

"Some people think it is sinful to reduce acreage and livestock. Yet they seem to think it all right for industrialists to close their factories and throw people out of work. It's more necessary that farmers control production than industrialists. People can only eat about six bushels of food a year but everyone could use two automobiles if they were produced in unlimited numbers and sold relatively as cheaply as farm products.

"If farmers don't plan their production and regain their lost purchasing power our entire civilization is imperiled. We don't want communism nor fascism but we do want a balanced economic order."

"Producers Day" Coming Watch For Announcement

A state-wide "Producers Day" featuring livestock marketing at township and community meetings to be held simultaneously in every county and community in Illinois is on the program for late September, probably the 27th or 28th.

The Livestock Marketing Department of the I. A. A. under the direction of Ray Miller is sponsoring the event in co-operation with the County Farm Bureaus, Producer Commission agencies, and I. L. M. A.

Following the plan of last year, a radio program from WLS will be broadcast during the evening. The unit meetings will tune in and have this broadcast as a feature of the program.

County meetings in charge of the County Farm Bureau livestock committees will be held preliminary to "Producers Day" to plan for local meetings in the various townships and communities. Accomplishments, problems, and future goals in co-operative livestock marketing will be reviewed and considered.

The effectiveness of cooperative organizations is to a great extent in proportion to the volume of the product handled. It is well recognized that volume handled by cooperatives is greatly dependent upon the extent to which producers of livestock, grain, butter-fat, etc., understand and appreciate the accomplishments and possibilities of concerted action in marketing farm products. Plans for the state-wide livestock "Producers Day" are designed to stimulate interest in cooperative marketing and to bring to the attention of producers the necessity of following up the production control program with equally effective co-operation in marketing farm products.

Davis Puts Opponents Of AAA On the Spot

Controlling Production Is Exactly How Others Maintain Prices, He Says

IN the best speech he has made since becoming administrator of the Adjustment Act, Chester C. Davis put critics of the crop control program on the spot in a masterful discussion and review of 10 years efforts to solve the farm problem, on Farm Organization Day at the World's Fair, Chicago, Aug. 13.

CHESTER DAVIS

Taking a shot at the partisan-dictated editorial policies of certain mid - west newspapers, particularly the Chicago Tribune and Chicago News, Davis pointed out how they had criticized both the equalization fee plan and later the Farm Board program because "they provided no means of production control."

"Today the farmers are cooperating to that very end," the AAA chief declared, "and doing a good job of it. The producers of the major crops are organized as they never were before. You would think, wouldn't you, that these critics would welcome the present program as right down their alley? But no, they don't like the way the farmers are doing it, and the way the program is being financed. Maybe in time a program can be evolved to suit them."

Would Go Bankrupt

If a manufacturer continued to make and sell goods, forcing the price lower and lower below his production costs, he would soon be bankrupt, Davis declared, in defending the adjustment program. "So he aims to produce what he has or can get orders for, at a price that brings him out whole. Society approves that practice and calls it good business for the manufacturers. Strangely enough when the farmers organize to do that very thing some perfectly well-intentioned and high-minded folks call it sinful."

The speaker gave many illustrations showing how organized business and labor controls output to maintain prices.

"I think the farmer will not be fooled, nor stampeded by individuals who are irritated by what is being done and who hope, by the mere repetition of terrifying words, to frighten them into retreat," he said. "The farmer's business makes him a planner. It is my conviction that he is ready to do his part in a long-time program of adjusted production and improved marketing that leads toward a sounder and more profitable industry for himself and his children.

Unfair to Farmer

"It is unfair to ask farmers to play the economic game under one set of rules while industry and labor play under another. The drought is a circumstance which must be given due weight in mapping continued adjustment operations. But we have no reason to believe that lands of the United States have permanently lost their productivity. If farmers again sow without restraint and reap fully where they sow, they will reenter the cycle of unsaleable supplies and low prices from which they now promise to emerge."

Davis asserted that the purchasing power of producers of the seven basic commodities originally named in the Act has been increased 70 per cent (including benefit payments received or coming) after allowing for the higher prices of the things they buy. The purchasing power of all farmers has been increased 26 per cent by the various forces working for recovery, he said.

Apparently lost on Chicago newspapers was Mr. Davis's erudite explanation of the economic forces which created the farm problem and the steps that have been taken and why, to solve it. Farmers generally know that there is more intelligence and expert knowledge in the agricultural department at Washington today than perhaps at any time in history.—Editor.

"Work or Don't Eat" is A. F. B. F. Policy on Relief

Expressing the belief that every deserving citizen should have an ample supply of food, clothing and shelter, but condemning "what appears to be a fast-developing dole system encouraged and demanded by communistic influences," directors of the American Farm Bureau Federation on August 10 passed a resolution urging state and federal governments immediately to make radical changes in present unemployment relief policies.

"We believe a proper slogan would be," said the resolution

"All who work eat
All who are unable to work eat
All unemployed who refuse to work at comparatively reasonable wages on emergency projects provided by government—don't eat."

The Farm Bureau leaders are of the opinion that so-called temporary unemployment relief is fast becoming a permanent system and unless curtailed will destroy American ideals and the self-respect of millions of citizens. "American farmers believe in and support reasonable wages for all workers but condemn a system of government unemployment relief or charity that encourages idleness and indifference to emergency employment at comparatively lower wages."

Corn Loan Borrowers Profit By Price Upturn

Figured at 30c Advance In Price, Program Makes $20,000,000 For Illinois Farmers

Thousands of Illinois farmers took advantage of the upturn in the price of corn during July and early August to dispose of their sealed corn and pay off their federal loans.

The Whiteside County Farm Bureau reports that on August 8, 48 farmers paid back their loans when the local price reached 67 cents. This was the high day up to that time. The previous high record was three weeks earlier when 41 farmers sold their corn when the market was 55 cents.

Of nearly 75 million bushels sealed in Illinois nearly 25 per cent of the loans to 36,606 borrowers had been paid back by Aug. 13. Based on mid-August prices farmers gained an average of 30 to 40 cents per bushel more than they would have secured had not the federal government at the urgent request of organized farmers led by the I. A. A. started the loan program at 45c per bushel. Thus farmers rather than speculators have reaped the benefit of advancing prices.

This gain figured at only 30c per bu. applied to all the corn sealed in Illinois means that farmers profited to the extent of around $20,000,000.00. Applied to unsealed as well as sealed corn carried over by farmers, it means a much higher gain than that estimated above.

Farmers Benefit By AAA Milk Licenses

Figures for 23 milk sales areas under federal licenses showed an average increase in returns to producers on Class I milk, of 52 cents per cwt. for June and July 1934, as compared with the low mark reached by depression prices in May 1933.

In the Quad Cities area around Rock Island and Davenport, producers in May 1933 received 38 per cent of the 1927-'29 Class I price. Under the milk license, secured with the help of the Quality Milk Producers and the Illinois Agricultural Association, producers there last month enjoyed a price on Class I milk which is 69 per cent of 1927-'29 level. These figures do not include increases in Class II and Class III prices which also prevail on many markets under federal licenses.

Morgan County Holds "Livestock Producers" Day

Four hundred men, women and children assembled near Jacksonville on August 8 to hold their first county-wide Livestock Producers Day. The program consisted of judging contests, grading, demonstrations, music and talks.

J. R. FULKERSON

Lee Divine of the Producers Commission Association at E. St. Louis, conducted a grading demonstration and pointed out the various market classes of finished steers and Herefords. He also graded an assortment of calves and yearlings. Ezra Hines, head hog salesman, graded and priced the hogs and Oscar White, head sheep salesman, pointed out the various grades of lambs, why they were graded that way and what the various grades would bring on the market.

J. R. Fulkerson, president of the St. Louis Producers, H. D. Wright, manager, and "Ernie" NolKemper, Director of Publicity, made short talks about present conditions in the livestock industry and the possibilities of future markets.

Ray E. Miller, Director of Livestock Marketing for the Illinois Agricultural Association, was on the afternoon program and discussed some of the broader phases of the cooperative movement as it is being developed throughout the United States.

Shippers Profit

The program was arranged by the Morgan County Farm Bureau livestock marketing committee under the leadership of Lester Martin, chairman of the committee, and of the Morgan County Shipping Service.

The Morgan County Shipping Service began operating in February, 1933. At the present time it has served more than 1,000 customers. The Association has handled 40,000 hogs, 2,800 cattle and calves and 1,300 sheep, saving shippers $2,595.87. The organization was the largest shipper to the St. Louis Producers in the year 1933. It operates in Morgan, Brown and Scott Counties.

Daniel Dieterich, president of the Shipping Service, explained in detail why it was established and how it operates. The Morgan County Farm Bureau committee has set its goal at 50% of the livestock in the county to be marketed through Producer agencies in 1934.

The Illinois Agricultural Auditing Association has filed returns under the capital stock tax for its member co-operatives. The tax is $1 for each $1,000 of the adjusted declared value of the capital stock.

NOTICE
ILLINOIS AGRICULTURAL ASSOCIATION
ELECTION OF DELEGATES

Notice is hereby given that in connection with the annual meetings of all county Farm Bureaus to be held during the months of September and October, 1934, at the hour and place to be determined by the Board of Directors of each respective county Farm Bureau, the members in good standing of such county Farm Bureau and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of the Association, including the election of officers and directors as provided for in the by-laws of the Association.

Annual meetings of county Farm Bureaus will be held during September, 1934, as follows: Christian, Jefferson.

Counties that hold annual meetings during October are: Adams, Cass, Cumberland, Ford, Scott, Hancock, Henderson, Jo Daviess, Warren, Marshall - Putnam, Menard, White, Montgomery, Pike, Pulaski-Alexander, Macon, Shelby, Stark, Wayne.

(Signed) Geo. E. Metzger, Sec'y., Sept. 1, 1934.

4-H Club Camp Boy Writes of Washington

"I am taking this opportunity to express my appreciation to the Illinois Agricultural Association for helping make possible my trip to the eighth national 4-H club camp at Washington, D. C.," writes Frank Krell, Sangamon county 4-H club champion, in a letter to President Earl Smith.

"Much of the discussion during the conference centered around the future activities and education of the 4-H club boys and girls," wrote Frank. "Almost all of the delegates intend to take up some phase of agriculture, thus expressing faith in the future of agriculture. . . .

"Many expressed their desire to cooperate with the government in making the Agricultural Adjustment Act a success so as to insure lasting agricultural prosperity.

"Much appreciation of our early government was gained through our tours of historical points of interest. Through these tours one could readily appreciate our progress in this nation. It was plain to see that the wheels of progress could not be stopped, but that it is our duty to adapt ourselves to the new situations which arise.

"The National 4-H club camp offers so much of educational value that I hope the Illinois Agricultural Association will continue to support this worthy project."

Frank's letter was read to the I. A. A. Board during the July meeting.

Rail Rates On Stock To Chicago, St. Louis Cut

Western railroads recently reduced their rates on livestock to Chicago and St. Louis to meet truck competition. Substantial reductions were made from points in Iowa and as a result of this reduction, it has been necessary to grade back the rates from intermediate Illinois points which would necessarily be on a higher basis than these new rates, reports G. W. Baxter of the I. A. A. Transportation division.

L. J. Quasey, Commerce Counsel of the National Livestock Marketing Association, represented the various Producer Agencies in obtaining this reduction and the Illinois Agricultural Association carefully checked the Illinois revision to see that Illinois farmers receive the proper reduction. This reduction only affects the territory on and west of the A. T. & S. F. R. R. to Pekin and west of the Illinois River to its confluence with the Mississippi River at or near Grafton, Illinois. For example: the present or old rates from Grafton are as follows:

Cattle 18½c per 100 lbs.

Hogs (Single and Double deck) 22½c per 100 lbs.

Sheep (Single Deck) 29c per 100 lbs.

The new rates, which become effective September 1, will be:

Cattle and Hogs (Double Deck)
Sheep (Double Deck)
Calves (Double Deck) 17c
Hogs (Single Deck) 19½c
Sheep (Single Deck) 21½c.

$3.30 Reduction

This makes a reduction of $3.30 on a straight carload of cattle, $9.20 on a double deck of hogs, $4.95 on a single deck of hogs and $9.00 on a single deck of sheep.

To cite another case, the present rate from Macomb to Chicago is as follows: cattle 20½c, hogs (single and double deck) 25c, sheep (single deck) 31c.

The new rate on cattle, hogs (double deck), sheep (double deck), calves (double deck) 21c; hogs (single deck) 24c; sheep (single deck) 26½c.

This results in a reduction of $9.20 on hogs double deck, $1.65 per car on hogs, single deck, $5.40 on sheep, single deck.

It will be noted that the new rate from Macomb on cattle is 21c as against the old rate of 20½c. The tariff provides, however, that where the old rate is lower than the new rate, the old rate will apply. Therefore the old rate of 20½c will apply on cattle in this case.

It is our belief that this reduction will materially benefit shippers in that territory and also have the effect of increasing the rail movement of livestock, said Baxter.

What Life Insurance Can Do for You

By L. A. Williams

EACH person who asks the question, "What can life insurance do for me," wants an intelligent answer. The millions who carry life insurance must have a reason. The greatest business in dollars and cents in the world cannot be an accident. The business of life insurance, having the smallest percentage of failures* during depression, of all forms of business, must be a worthwhile thing.

Then, how can it be used by you, and why? Country Life Insurance Company, owned and operated by the Farm Bureau members of Illinois, was organized to provide low cost legal reserve life insurance so every farmer and every member of the family in good health could afford some form of protection. Not only was it started low in cost, but dividends returned have made net costs still lower as a special inducement for protection for young people, old people, and those desiring to leave dependents cared for.

Twenty Payment Policy

Best known of all policies, but not the most popular in amounts, is the Twenty Payment Policy, known as Twenty Pay Life. This plan provides for a paid-up policy after twenty full premiums have been paid. It can be purchased in as small amounts as one thousand, and as much more as the insured's means and risk will permit. At age 35 the premium on one thousand is $29.01 in Country Life, and pays dividends to further reduce this cost, beginning at the end of the second year.

In the event of death on a $1,000 policy $1,000 is paid even though death occurs after but one premium is paid, except in suicide. (Full claim allowed after two years in case of suicide.) If twenty full premiums have been paid the policy becomes fully paid, and dividends continue to come to the insured so long as he holds this fully paid policy, or until death. In the event the insured wishes he may cash out the policy at the end of twenty years, receiving more cash than he paid in, and having had twenty years of protection besides.

This policy appeals to young people especially, as they like to feel that they will get some benefit from their insurance without having to "die to beat it," as the expression goes. Then, too, there is the chance of not being able to earn in later years, and a desire on the part of the insured to "get through" paying premiums and not have to pay all your life.

Ordinary Life Policy

The Ordinary or Straight Life Policy is the lowest cost policy, all considered, that the Company has to offer. It is even cheaper than 12 year term or term to 65 years, when cash value is concerned. Most people believe you have to "die to beat" the Ordinary Life policy. This low cost policy has cash and loan values after the third premium, and could be cashed out at any time after the third year, if insured should desire to quit. The longer the policy is in force, the more available cash for loan or surrender. In the twentieth year the amount of cash available is so near the amount paid in that it makes the net cost of protection over twenty years a very few dollars.

The rate on this Ordinary Life policy at age 35 is $20.63 per $1,000 per year, with dividends to further reduce cost. On this as on the Twenty Pay Life policy, Country Life insures the child at birth and others on up to age 65, providing health will permit.

But several other forms are available in Country Life Insurance Company namely, the Twenty Year Endowment and the Endowment at 65 for old age annuities, as well as term insurance as low as $10 or $12 per year per thousand. The Twenty Year Endowment policy costs about $40 per thousand, a little less at young ages, and a dollar or two more at ages over 35 years, but the endowments guarantee the face of the policy at death or maturity. For instance, at the end of 20 years if your rate was $40, you would have paid in $800, you receive from the Company $1,000 plus all the dividends for twenty years, having had insurance for twenty years.

Uses of Insurance

Besides the forms of policies there is the use and uses of proceeds of policies which are of great importance. A father guarantees the education of his child by setting up an insurance fund which in the event the father is taken away pays a monthly sum through grades, high school and college, and then presents the graduate from college with a material sum to get started on his or her career.

Life insurance made payable to "my estate" is a special provision for paying off the mortgage. Unless, however, it is the intention of the insured to liquidate such obligations he should at no time name as beneficiary "his estate." Some dependent or relation should be named to receive policy benefits wherever possible. It saves probate costs, and likewise pays direct to beneficiary a sum which cannot be touched by the insured's creditors.

Monthly Income

Instead of paying or having paid in one lump sum such proceeds as are rightfully due the wife who for instance is named the beneficiary, there is in the policy a provision for a regular amount each month to her for life or for a specified term of years. She receives 3½% interest on unused funds, and is always certain of the principal with no bother about investment or the chance of loss from investment sharks or borrowing relatives.

The phenomenal growth and strength of Country Life Insurance Company compared to all other records of legal reserve life insurance development has made the thousands of farmers who own and who made possible this great Company wonder how they can carry life insurance to the best advantage. The low rates and excellent dividends are not alone an attraction, but the many ways the Company's policies may be adapted to the needs of Farm Bureau members is likewise an inducement to insure with their own Company.

This brief article describes the various policies offered by the Company and the advantages and uses of each.

* Less than three percent of all Life Insurance Companies on the legal reserve basis failed during the depression.

Hog Cholera Season Is Here, Pays To Vaccinate

Since January 1 member counties of the Illinois Farm Bureau Serum Association have distributed 12,763,000 cc of serum and 1,130,603 cc of virus. This service has afforded Farm Bureau members insurance against hog cholera that they may cash in on higher prices later.

With shortened supplies of hogs and rising prices, producers are hastening to vaccinate.

Cattle feeding looks attractive from a long-time standpoint, and where feed is available the situation is particularly favorable for finishing top steers for next summer, according to H. M. Conway, market specialist of the National Live Stock Marketing Association. Best long-fed steers now in feed lots are in a steady to strong position.

Reduced marketings of hogs are expected to be accompanied by higher prices during August and through most of September. With the corn crop scarcely 60 per cent of normal, feed prices will continue relatively high durring the balance of this year. The long-time outlook, Conway believes, is favorable but to profit by the prospective situation, it is necessary to maintain breeding stock as the corn and hog situation is likely to be completely reversed a year from now. As to hogs in feed lots, the market calls for finish, and some delay and additional weight seems safe during the latter part of August and early September.

Drought has changed the sheep feeding situation rather sharply. The proportion of feeder lambs has increased and a rather strong potential feeding demand has been offset and delayed. With a relief buying program for ewes the situation could be improved materially and a late feeding demand is expected to develop. For some time lambs should be marketed only as they are finished and in the corn belt many lambs need grain or late pastures to put them in killing condition. From a long-time standpoint, the present emergency will tend to put the sheep industry in a stronger position.

St. Louis Producers Show Increase

During the first six months of 1934 the St. Louis Producers handled a total of 4,183 carloads of livestock, a slight gain over the corresponding period of 1933 in spite of heavy '34 decreases in market receipts of hogs and sheep. Receipts of cattle and calves show an increase, due in part to shipments of livestock from drought areas.

Farmers who have a surplus number of pigs over their allotment may (1) keep the pigs and cancel their corn-hog contract if the surplus is great, (2) donate the extra pigs to a federal relief agency, (3) market the surplus pigs and pay a penalty of $20 for each hog marketed in excess of quota, (4) destroy the runty, slow-growing pigs of inferior quality on the farm so as to come within the allotment.

No Limit On Feeder Pigs

Corn-hog contract signers may make unlimited purchases of feeder pigs from August 1 to November 30, 1934 under a new ruling. Such pigs must be ear-marked or kept separate from hogs produced on the farm, and within one week following date of purchase the buyer must file a statement with the county committee, signed by the seller, giving full information about the purchase.

Wheat or other small grains may be planted by corn-hog signers in 1934 without restriction, if pastured or harvested for hay.

Farmers National Acts To Boost River Trade

Elevator facilities, barges and other equipment owned by the Turner-Hudnut Company of Peoria and Pekin will be used by the Farmers National Grain Corp. under a recent arrangement completed by the two organizations. The elevators are located at Pekin, Chillicothe, Henry and Hennepin.

The arrangement will afford the co-operative an opportunity to assemble and load barges for movement into Chicago or south to St. Louis, Memphis and New Orleans.

It will provide facilities for Farmers National to handle an estimated five to six million more bushels of grain annually. Farmers National owns a good-sized elevator at Havana, and has facilities at Peru and Ottawa for loading barges. A big elevator is nearing completion in Peoria and another new elevator is contemplated at Morris.

Farm Income Higher In 1933 On Illinois Farms

Thirty-two farms in Knox county on which farm accounts were kept in co-operation with the Farm Bureau and State Extension Service made an average net income of $2,038 a farm in 1933 as compared to an average net loss of $477 in 1932. Much of the increase in income was due to a gain in inventory, although the cash income was higher.

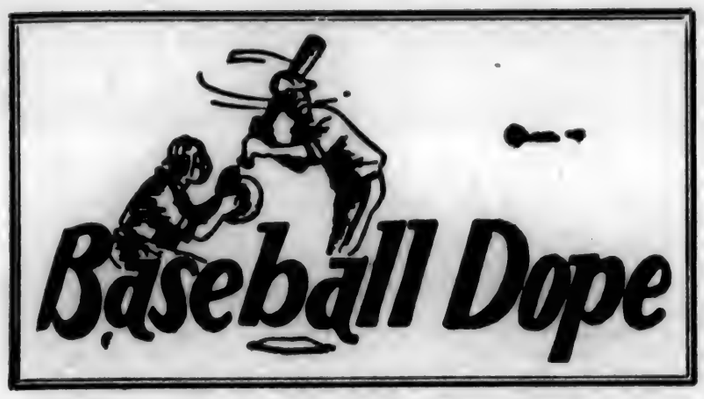
Average receipts for the 32 farms were 60 per cent of those in 1929. The most profitable one-third of the farms showed an average net income of $3,608. The least profitable third had $752 a farm.

Illinois Grain Corporation received word on August 10 that the Anchor Farmers Elevator in McLean county had been destroyed by fire. The Anchor Elevator was one of the first to join the state co-operative.

19 New Members Join I. A. A. Auditing Group

The importance of keeping accurate records and knowing exactly the financial condition of the co-operative association or company may not be apparent to many members. Yet more companies have gone broke because directors and managers failed to keep careful check of income and expense, losses and profits than possibly from any other cause.

The fact that Illinois co-operatives, set up with the help of the I. A. A. and County Farm Bureaus and other co-operatives, have available the services of competent auditors at cost through the Illinois Agricultural Auditing Association, has an important bearing on the uniform success of such business enterprises in this state.



In the seven months beginning Jan. 1 this year the Auditing Association completed 218 audits compared with 182 in the same months last year—an increase of 36.

Nineteen new members, likewise, were signed since January 1 as follows:

Farmers Grain Company, Kane, Greene County; Walnut Grain Company, Walnut, Bureau County; Lawrence County Farm Bureau, Lawrenceville, Lawrence County; Lawrence Co. Mut. Fire Ins. Co., Lawrenceville, Lawrence County; Pike County Service Company (Office at Quincy, Ill.), Pittsfield, Pike County; Altona Farmers Telephone Co., Altona, Knox County Rock Island Service Company, Moline, Rock Island County; Galesburg Pure Milk Assn., Galesburg, Knox County; Penfield Farmers Grain Co., Penfield, Champaign County; Warren County Service Co., Monmouth, Warren County; Henderson Service Company, Stronghurst, Henderson County; Paxton Farmers Grain Company, Paxton, Ford County; Producers Creamery of Champaign, Champaign, Champaign County; Kenney Elevator Company, Inc., Kenney, DeWitt County; Allen Farmers Elevator Co., San Jose, Mason County; Danville Producers Dairy, Inc., Danville, Vermilion County; Bergeson Grain Company, Ashton, Lee County; Altona Co-op. Grain Company, Altona, Knox County; Ottawa Co-op. Grain Company, Ottawa, LaSalle County.

$32.16 Refunded Per Member

Dividends declared by the Kane County Service Company in 1933 averaged $32.16 per member customer. This means that the average Farm Bureau member patron not only received his Farm Bureau dues back in refunds from this one service alone, but also an additional $17 for co-operating in the project.

Will county defeated Woodford 6 to 3 and 11 to 1 in the quarter finals of the Illinois Farm Bureau Baseball League. Games were played at Frankfort and Eureka. Carroll and McHenry, divisional winners, were scheduled to play their first game at Woodstock August 25.

Sangamon and McDonough crossed bats in the first game of their series August 18 at Macomb. McDonough won 8 to 6. Shelby will play the winner of this series while Will county is waiting for the outcome of the Carroll-McHenry contest.

In the game at Macomb Sangamon started out handsomely by driving in five runs in the opening inning. Then G. Bradford, McDonough pitcher, settled down and held his opponents scoreless until the eighth. McDonough kept hammering away against Scott and Fitzhugh, Sangamon pitchers, throughout the game. Two runs in the second, three in the fifth, and three more in the seventh were enough to win.

6,000 At Randolph Co. Farm Bureau Picnic

Six thousand people attended the evening program of the Randolph County Farm Bureau picnic at Sparta Fair grounds August 2, reports Farm Adviser E. C. Secor.

"L. A. Williams spoke to an enthusiastic crowd in the afternoon following a program of baseball between Farm Bureau members from the west side of the county vs. members from the east side," he writes.

"Father Nell from Effingham county who has done so much for organized agriculture in the St. Louis milk shed, spoke in the evening to one of the largest groups ever assembled at a Farm Bureau picnic."

In the evening the Farm Bureau girls defeated Sparta factory girls at soft ball. The boys' game was rained out.

The Randolph County Farm Bureau Soft Ball League is going into its fourth series of games with three teams still undefeated — Red Bud, Baldwin and Walsh communities.

L. J. Ullensvang, general insurance agent for the Lee County Farm Bureau, reports that the Farm Bureau recently organized a soft ball league. He believes that next year the entire county will participate and schedule games with teams from adjoining counties.

Too Many Farmers?

"In the long run, we may come to realize that real farm prosperity depends upon reducing the number of workers in agriculture as rapidly as productivity per worker rises," says Dr. Mordecai Ezekiel, economic adviser to the Secretary of Agriculture. "Even now (with normal weather) we could produce all the farm products we need with 60 per cent of our present farmers. As soon as industrial activity is restored we should turn to the task of helping these four million workers, unneeded in agriculture, find more productive occupations elsewhere.

"Not 'back to the farm,' but 'factoryward ho!' is the slogan we must adopt and put into practice," says Ezekiel, "if we wish to translate our industrial technological potentialities into really higher standards of living for everyone."

Three Ways To Cut Taxes On Farm Lands

Three ways to reduce farm taxes are suggested in an extensive report on "The Farmers' Tax Problem" recently prepared by the Bureau of Agricultural Economics at the request of Congressman Marvin Jones, chairman of the Agricultural Committee.

The three ways suggested are: (1) reduce the number of local governmental units, (2) combine governmental functions and reallocate them between states and counties, and (3) put more of the revenue load on sources other than general property.

The report published as House Document 406 discusses the personal income tax as a possible means of reducing the taxes on real estate and in that way giving the farmer relief at the time he needs it most, when his income is low. Such a change would help toward a solution of the problem, says the report, provided expenditures are kept down at the same time.

Taxes per acre of farm real estate reached a peak in 1929 at 241 per cent of the tax per acre in 1913. In 1932 gross farm income per acre was $5.08, compared with $7.73 in 1913 and $12.24 in 1928, the 1932 figure being 44 per cent below that of 1913, while taxes per acre were 89 per cent above prewar.—Editor.

Year Book Contest For Community Clubs $150 Prize

The American Farm Bureau Federation is sponsoring a Prize Year Book Contest which closes November 1, 1934. The year books to be entered by a community or local Farm Bureau unit must contain outlines of programs designed to interest, inform, and inspire every farm family to enlist in the Farm Bureau.

The entries must contain the signed statements of the Farm Bureau chairman, county adviser and home adviser, if there is one, that such programs were actually carried out as planned.

Fifty dollars will be awarded for first prize, $25 second prize, $15 third, $10 fourth and ten prizes at $5 each. Programs used in 1933 and 1934 are eligible.

Farm Week At World's Fair A Big Success

FARM WEEK at the Fair brought thousands of farmers from Illinois and other middle west states to Chicago the week beginning Aug. 11. Special programs were held throughout the week beginning with a parade on Saturday and Farm Organization Day the following Monday. Farm Bureau leaders attending the Midwest Conference went in a body to the Exposition on August 13 where Administrator Chester C. Davis was the principal speaker.

John C. Dameron of McLean county, Illinois, who won the hog calling contest last year, was given third place at the contest this year. Mrs. Charles Hayes of Alta, Peoria county, Illinois, won first in the husband calling contest. Milking, horse pulling and tug-of-war contests were other features. Station WLS broadcast most of the proceedings during the week which set new attendance records.

Soybean Oilmeal Fed Cattle Top All Others

The three best lots of cattle fed in a recent experiment at the University of Illinois experiment station received soybean oilmeal as the protein supplement to their rations. The top lot paid 90c per bu. of corn and were appraised by packer buyers as "as good a lot of yearlings as you will see." The steers were carried on bluegrass pasture from Dec. 22 to April 13, then moved to dry lot to finish out the feeding period of 220 days. Average daily feed: 12.4 lbs. shelled corn, 1.8 lbs. soybean oilmeal, 5 lbs. corn silage, 1.5 lbs. alfalfa per head.

St. Louis Area Gets A Milk Price Boost 35c

The Sanitary Milk Producers recently secured an increase in the price of Class I milk from $2 to $2.35 per cwt. FOB distributors' plants. The new schedule became effective August 14.

Class II was broadened to include besides cream, evaporated milk, condensed milk, flavored milk and cream, buttermilk and cottage cheese. Class II price is 3.5 times 92 score butter, plus 30 per cent, plus 20 cents per cwt.

Corn-Hog Program

As we go to press practically all counties have been approved by the state corn-hog review board. On August 17 A. J. Surratt, chairman, stated in the I. A. A. office that 83 counties had been O. K.'d.

Benefit payment checks have started coming into Illinois in substantial amounts, and work has begun by field inspectors to determine whether or not contract signers have carried out their part of the agreement. Contract signers who have planted more corn than their allotted acreage must cut this extra corn within 72 days after planting. Second benefit payment checks are scheduled to arrive after November 15 when corn-hog signers have been inspected to show they have complied with the reduction agreement.

Hardest Hit Counties

Fourteen Illinois counties were recently designated as emergency counties by the Drouth Relief Administration. The hard hit counties are Adams, Pike, Brown, Calhoun, Greene, Hancock, Jersey, Schuyler, Scott, Edgar, Monroe, Perry, St. Clair and Randolph.

Farm Bureau-Farm Account Meeting Ottawa Sept. 27

A Farm Bureau-farm management meeting will be held in Ottawa on Thursday, September 27. The meeting will be a roundup for co-operative farmers in LaSalle, Grundy, Marshall-Putnam, DeKalb, Kendall, Henry, Stark and Bureau counties.

Approximately 150 farmers in this territory have been keeping continuous records for the past three years and their books will be analyzed and discussed by farm-management specialists of the University of Illinois. A Federal Department of Agriculture man also is expected to appear on the program. J. B. Cunningham is field man for the northern Illinois area.

Seek Shift of Employees' Pension To Freight Rates

Railroads are proposing a freight rate increase to provide approximately $170,000,000 more revenue for the new pension system for railroad employees.

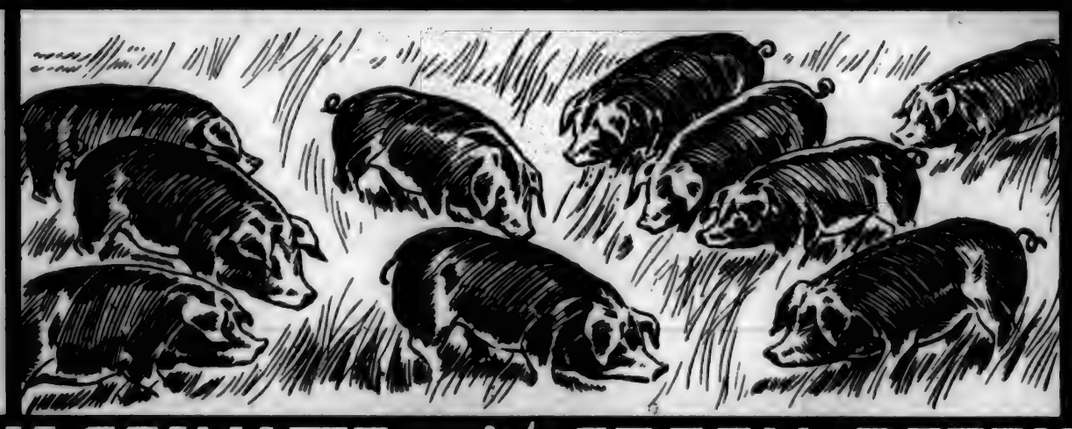
The American Farm Bureau Federation and the I. A. A. will protest any proposed increase in rates on farm products because of the inability of farmers under present circumstances to stand a larger freight load than they are now carrying.

Many Big Farm Bureau Picnics Held During Aug.

"In spite of a hot, sultry day we had around 4,000 at our Farm Bureau picnic at Marion," writes Dee Small, farm adviser in Williamson county. "This was a good turn-out and O. D. Brissenden, assistant organization director, gave an excellent address. We heard a lot of favorable comment on his talk."

Larry Williams addressed one of the largest Farm Bureau picnics of the year at Galesburg in Knox county. Business men shut up shop for the afternoon to join in the festivities.

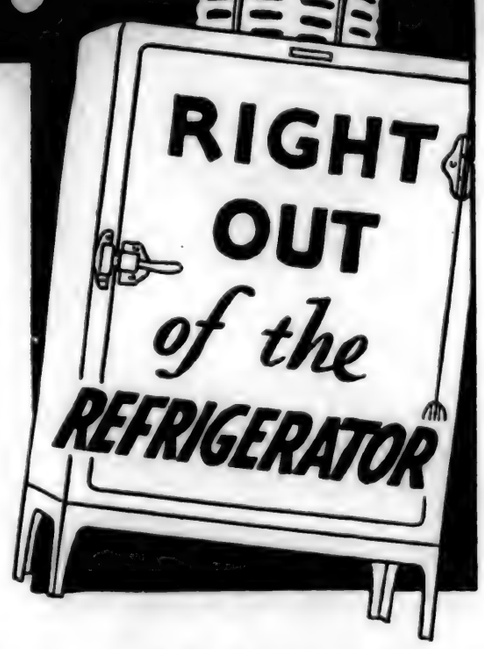
A similar farmer-businessman picnic sponsored by the Edgar County Farm Bureau was held at Paris where President Earl C. Smith was principal speaker.



Galesburg Pure Milk Ass'n

The Directors of the Galesburg Pure Milk Association at their last meeting voted to start work on a quality program and visits will be made to all farms. A price conference with the dealers was held and an increase in price of fluid milk is anticipated. All dairies are now paying 8c above 92 score butter prices for manufactured milk.

Drought Cattle Bought



More than 2,623,000 head of drouth-stricken cattle had been purchased by the AAA in western drouth states on August 10. Average price per head ranged from $13.60 to $13.70. The cattle were bought from more than 180,000 farmers in 19 states, all west of the Mississippi river.

INSURE Your Pig Crop Now AGAINST CHOLERA!

VACCINATE with FRESH, POTENT, FARM BUREAU SERUM

It is convenient, economical and safe to use Farm Bureau serum. Your County Farm Bureau maintains a constant supply of the best quality serum and virus that can be had.

1935 Corn-Hog Program

Here Are Some of the Principal Provisions Being Considered

A SIX point crop adjustment and storage program for corn and hog producers in 1935 was recommended by Mid-West Farm Bureau leaders at a recent conference in Chicago with officials representing the Agricultural Adjustment Administration. The recommendations were favorably received. Similar conferences have been or will be held with farm groups in other sections of the country.

The program, which at this writing is receiving favorable consideration, would provide for:

1. **A one-year corn-hog adjustment plan (for 1935 only) with a reduction of corn acreage similar to that of 1934 using the same base for each farmer. Readjustments would be allowed where land has been transferred.**
2. **Pay contract signers two-thirds as much per acre for contract or idle ground as they will receive under the 1934 agreement.**
3. **Allow use of contracted acres for any purpose other than the production of grain.**
4. **No limit on production of hogs but pay contract signers $1 per head on the domestic allotment of hogs to each producer.**
5. **Finance program by a processing tax of 10c per bu. on corn and a processing tax of $1 per cwt. on hogs from Nov. 1, 1935 to Nov. 1, 1936 or an alternative plan of reducing the present tax of $2.25 to $1.50 on Nov. 1, 1934 and continuing at this rate until Nov. 1, 1936.**

(Consideration is being given to levying compensating taxes on other commodities benefiting by the grain acreage control program so as to make possible a lowering of the tax on hogs.)

6. **Make loans on corn up to 75% of the parity price level to contract signers.**

The object of the program for 1935 is to safeguard present price levels for corn, hogs, and other grains and livestock and to re-establish parity prices for such basic crops as have not yet reached that level.

While Farm Bureau leaders more than two months ago recommended in a conference with AAA officials at Washington a simplified one-contract per farm

grain acreage adjustment program for 1935, the planning division of the AAA points out two serious obstacles to achievement of such a desirable situation next year. One is that the wheat adjustment program still has another year to run. The other is a legal department decision holding that benefit payments must be made to producers of the commodity on which a processing tax is levied. This would complicate distribution of revenues if processing taxes, to pay for grain acreage reduction, were spread over a number of commodities.

Administration planners advised that a one-contract system per farm to control acreage was both desirable and sound and would be effective as a perma-

(Continued on page 4, Col. 1)

The new home for the International Livestock Exposition at the Chicago Stock Yards is going forward to rapid completion. It will be ready in time for its 35th anniversary this year, December 1-8, says Manager B. H. Heide.

On each side of the amphitheater will be a huge two-story building for housing exhibits. Each of the wings measures 165 x 310 feet. The north wing will have a direct connection with the Stock Yard Inn, now being remodeled. The entire show will be housed under one roof. Fireproof construction throughout including a concrete roof, and sky-light ventilators mechanically operated, are part of the new construction.

I. A. A. Supports Two Measures, Opposes Two

State Legislation of Chief Interest To Farmers Reviewed

To refresh the memories of Farm Bureau members on the voting records of their state senators and representatives on important legislation considered in the more recent sessions of the Illinois General Assembly, the I. A. A. board at its September meeting authorized the publication again of the table which appeared in the April issue.

The first two measures on which the vote is given on page 5 were considered in the regular session of the General Assembly during the first half of 1933. These two measures are the revenue amendment definitely limiting property taxes and the Lantz bills for poor relief

The I. A. A. vigorously supported both of these.

The third measure, the key bill of the state tax levy and bond bills, was considered in the first special session in the fall of 1933. The I. A. A. vigorously opposed this measure which provided for a new $38,000,000 state tax levy on property and an issue of $30,000,000 in state bonds.

The fourth measure was not included in the legislative report which appeared in the April issue of the **RECORD**, since it did not pass the Third Special Session until late in April, 1934. This was the Senate bill to divert one-third of all gasoline taxes from highways and streets to the State School Fund, thereby depriving the State, the counties and the cities and villages each of one-third of the gasoline taxes allotted to them. In accord with its declared position against further diversion of gasoline taxes from highway and street improvement, thereby further increasing unemployment and demands for relief, the I. A. A. opposed this bill. Its supporters could not obtain the two-thirds vote necessary to give it immediate effect, but it passed with a majority vote of each House, becoming effective July 1. Since it is limited to the period ending March 1, 1935, the diversion of gasoline taxes thus provided covers eight months.

Lantz Bills

It will be remembered that the I. A. A. favored the use of revenue from the administration's sales or occupation tax for the replacement of property taxes, but opposed the use of these funds for unemployment relief. To meet the situation constructively, the I. A. A. sponsored three bills known as the Lantz bills to give full constitutional taxing power to Cook county and an additional tax rate to 17 downstate commission-governed counties so they might levy taxes to care for their own poor people as townships in 84 supervisor governed counties in the state are now required to do.

The I. A. A. succeeded in securing the passage of the Lantz bills but they were vetoed by the governor.

As forecast by the Association and many others at the time the Lantz bills were vetoed, this action resulted in calling the first special session of the legislature to meet in October, 1933. Against the opposition of the I. A. A., bills were passed levying an additional state tax of $38,000,000 on property in 1934 payable in 1935 against which tax anticipation notes for $28,500,000 could be issued and sold to provide relief funds.

A companion bill proposed a state bond issue of $30,000,000 to be voted on in November, 1934, the proceeds of the bond issue to be used to redeem the state anticipation tax notes issued and interest thereon.

Other bills enacted provide that if the bond issue carries in November they are to be paid by the state—one-half from gas tax allotments to the counties and one-half from gas tax allotments to the cities and villages in proportion to the share of such funds used for relief in such counties and in such municipalities.

The I. A. A. advises its members and all voters to vote in favor of this bond issue to prevent the $38,000,000 levy falling on property. But it also serves notice that in the future bond issues of this or similar character will have the determined opposition of the I. A. A. at least until such time as the General Assembly imposes equal and uniform responsibility for poor relief upon every community and county of the state.

Check carefully the voting records of your representatives in the General Assembly. Support only those whose records justify it. See table on pages 5-6.

Vote For Agriculture

The important thing for farmers to note is that in Iowa we have the Democratic party solidly for the national farm program and for tariff reform; we have the Republican party approving in large part the national farm program and tariff reform. Only the reactionary wing of the Republican party in Iowa has joined hands with the habitual enemies of the farm program.

This is a good sign for agriculture. Farmers of course should not be content with these general expressions of good-will. Every candidate for congress should be examined closely, to see whether his record and his promises indicate that he will fight for the maintenance of the agricultural adjustment act and its processing tax, for the program of tariff revision in the interests of farm exports, and for the Honest Dollar. . . .

Whether his party label happens to be Democrat or Republican, no congressman should be elected from Iowa, or from any other farm state, this fall, who is not willing to support President Roosevelt and Secretary Wallace in the battle to keep farm income on the upgrade. We dare not turn control of congress back to the kind of politicians whose denial of farm rights and whose ignorance of economic principles gave us 10-cent corn and $3 hogs under the Old Deal.—Editorial in Wallace's Farmer.

1935 Corn-Hog Program

(Continued from page 3)

nent program but it seemed more advisable to initiate such a system for the crop year 1936 rather than next year.

The Adjustment Administration has under consideration a corn-hog referendum among producers through a series of state and district meetings of production control association leaders, and later meetings of corn-hog producers in each county where full information and facts governing the future outlook for corn and hog prices can be revealed. Farmers realize that they are in no position to vote intelligently on a corn-hog adjustment program until they have had all the facts pertaining to the market and price outlook fully explained.

Not Compulsory

No corn-hog plan, the administration warns, will be forced on producers. They must indicate their desire for such a program through county meetings of their production control associations. At a recent series of three meetings attended by approximately 1400 County Farm Bureau leaders in Illinois sentiment was unanimous for continuing the crop adjustment program. Intelligent farmers know that one favorable growing season with no limit on acreage will likely send farm prices tumbling toward the starvation levels of 1932.

The program outlined above proposed for 1935, as stated, is not final. Corn belt farm representatives who met with officials in the AAA's planning division headed by H. R. Tolley believe that it has great merit and offers the basis for a plan to restore and maintain prices of basic farm commodities at satisfactory levels next year.

Representing farmers at the Chicago conference were Edw. A. O'Neal, president, A. F. B. F.; Earl C. Smith and C. V. Gregory, Illinois; Chas. E. Hearst, Iowa; W. H. Settle, Indiana; W. R. Ogg, acting sec'y. A. F. B. F. H. R. Tolley, chief and several economists of the planning division represented the A. A. A.

How Your Senators and Representatives Voted on Legislation Affecting Farm Interests

(The I. A. A. vigorously supported the first two measures and vigorously opposed the last two bills—S. B. 1 for a new $38,000,000 state tax levy on property and an issue of $30,000,000 in State bonds and S. B. 70 for diversion of gas taxes to the State School Fund)

If the State Bond Issue Fails to Pass Nov. 6th

Here's An Estimate of Resulting Increased Land Taxes Next Year

On November 6th the voters of Illinois will have submitted to them a proposed bond issue for $30,000,000 as the only possible way of preventing a heavy additional State tax on all property.

If the bond issue is not approved, a State tax for a minimum of $38,000,000 is already levied on all property assessments for this year, the entire amount of which will be payable in 1935.

If the proposed bond issue is approved, the State tax levy on property will not be made. In that case the proceeds from the sale of the bonds will be used to retire State Anticipation Tax Notes already issued, or soon to be issued, for a total of $28,500,000 and to pay interest accrued thereon.

If the bond issue is approved, the bonds and interest thereon will be paid out of gasoline tax allotments to the counties and to the municipalities therein, which have used the funds raised by sale of the Anticipation Tax Notes for relief purposes. For this purpose the State will withhold from the counties one-half of the gasoline taxes required for such bonds and interest each year, and one-half from the municipalities therein, in all cases in proportion to the amount of such relief funds allocated to each county and to each municipality therein.

The Illinois Agricultural Association opposed this bond issue legislation and has by resolution adopted in the Danville Annual Meeting last January given notice that while, under the circumstances, it favors the proposed bond issue, it will not support any bond issue of this kind hereafter, at least until the State has required every community to do its full part in providing relief funds for its own people and has set up a fair taxing system.

Unless the bond issue is approved in November, an additional State tax of at least $7,500,000, all payable in 1935, will be imposed on all Illinois farm property. This would amount to between $10 and $80 per farm of 160 acres, depending on valuation. A table follows which shows the minimum increase in taxes which defeat of the bond issue would impose upon farm property in each county. Every reasonable effort should be made to prevent this additional burden.

The Illinois Agricultural Association urges thorough organization by County Farm Bureaus, to inform farmers and village people about the importance of voting for the bond issue and to man all rural and village polling places in the November election.

If Farmers' Will

"If they will, farmers through their organizations can help shape their own economic destiny. As individuals, one farmer's strength cancels another's. Through organization, his strength multiplies. Only as he can and will express himself through organization is the farmer's influence felt in national councils.

"The continued pressure of the Farm Bureau through its state and national units has kept the agricultural problem continuously before the nation." — Chester C. Davis, Chief, AAA.

I. A. A. Board Opposes Cut in Gas Tax Now

Fear Reductions Will Heap More Taxes On Farm Lands And Property

The board of directors of the I. A. A. in its September meeting approved the report of the Public Relations Committee on the question of cutting motor license fees to $3 and reducing the gas tax from three cents to two cents per gallon.

The committee reported that it is "convinced that uniform motor vehicle license fees of $3 will not yield sufficient funds to retire the state highway bonds and pay the interest thereon, nor would the state's portion of the gas tax fund left after paying relief funds be adequate to maintain and police state highways and retire that portion of state highway funds not retired from the reduced motor vehicle license fees."

The committee expressed the fear that if the proposed reductions advocated by a state motorist association were put through, counties and cities would be required to levy increased property taxes to maintain their roads and streets.

It was recognized that the present classification of license fees is unjust due to fictitious horse power rating. Motorists with light cars are often required to pay the same or a larger fee than motorists with heavier cars.

The committee looks favorably upon classification of motor vehicles for license fee purposes upon the basis of

Illinois An Accredited State

ILLINOIS is now an accredited state in bovine tuberculosis eradication. The Farm Bureau may justly take pride in this achievement. Initiated by the U. S. Bureau of Animal Industry and supported by the state government, tuberculosis eradication work in Illinois made slow progress until the power of the Farm Bureau movement was put actively behind it. Illinois for many years had been a dumping ground for tubercular cattle from other states. Buyers of dairy and beef breeding stock had the state on their black list. Cow dealers in Northern Illinois had built up an impressive business replacing dairy cows that "went wrong."

County Farm Bureau committees appeared before boards of supervisors and secured appropriations for county veterinarians. Many Farm Bureaus put money into the project. Effective publicity was used to inform farmers about the scourge of tuberculosis. Farm advisers assisted in organizing communities to hasten testing and prevent further infection.

The Illinois Agricultural Association set up a tuberculosis eradication department in 1923. It offered a standing reward of $100 for information leading to conviction of anyone found guilty of violating the state and federal regulations governing shipment of cattle into the state. In 1925 the I. A. A. successfully sponsored legislation appropriating $2,000,000 to pay indemnities and carry on the work. It supported the provision in the act making testing compulsory when 75 per cent of the cattle in the county had been tested.

Today Illinois herds are comparatively free of this costly disease. Buyers can come here unafraid. Losses of cattle from tuberculosis have been reduced to a minimum. Thus has the position of the Farm Bureau movement, once opposed by minority groups, been vindicated.

Co-operatives Support A. A. A.

IT'S significant that of all the marketing agencies and commission companies handling farmers' grain, their own co-operatives are alone in supporting the crop adjustment, price-raising program. We have yet to hear a good word for the Agricultural Adjustment Act from an old-line commission company. On the other hand there have been frequent attacks by such interests on this legislation.

In its recent annual meeting, the Farmers National Grain Corporation reaffirmed its faith in the AAA program and pledged its future support to any reasonable plan that will bring parity prices to agriculture. The co-operative is first and last for the farmer. It is not primarily interested in profits from commissions.

Let all farmers show their appreciation for the battle farm co-operatives are waging in their behalf by marketing their grain, livestock, milk, cream, fruits and vegetables, and other farm commodities through their own agencies.

On Controlling Production

Washington, Sept. 16—(AP)—The National Lumber Code authority today fixed the total production for the fourth quarter at 3,074,000,000 feet compared with 3,800,000,000 for the present three months' period. . . . to allow for the expected four per cent seasonal decrease in consumption and to reduce stocks in excess of those on hand at this time last year.

Thus through organization are the lumbermen controlling production and holding up prices. Yet some folks insist that farmers produce without restraint regardless of the price they receive. Price fixing through production control, was practiced by industry long before the NRA was invented. Farmers, with the co-operation of government, are now attempting to get somewhere near the value of their products through similar action. Organized production control is the only way agriculture can keep farm prices in line with non-agricultural prices and promote a free exchange of goods and services so necessary to national recovery.

Industrial Prices

"Real selling prices themselves must be reduced—they must be brought within the range of a greater number of buyers. In no other way can industry be stimulated to higher levels of activity."

Alfred P. Sloan, Jr., president of General Motors Corporation, is speaking. Colonel Leonard P. Ayers, well-known banker and economist, commented similarly recently in speaking of industrial prices. So warned farm representatives long before the debacle of 1929 in pointing out the disparity between agriculture and industry.

The remedy for unemployment and business stagnation plainly lies in bringing farm prices up or industrial prices down, or both, so as to reestablish normal trading. Acreage reduction and drought have narrowed the gap. The serious feature of this situation is that many farmers in stricken areas have nothing to sell and so the price level means little to them. Nevertheless farm buying power as a whole is definitely improving.

It was the disruption of price relations between farm products and industrial goods, marketing costs and taxes which created the depression and widespread unemployment. Prosperity will return when price levels are such that the farm and city man can exchange their goods and services freely.

Observations

Contrary to all the talk and newspaper propaganda about "liberty," and "regimentation," we have yet to hear a complaint from any farmer that he is being regimented against his will or deprived of his liberty.

The present farm program is being carried out under the authority of legislation enacted at the request of organized farmers. Politicians please note. It was not forced on us. Farmers fought 12 years to get it. The initial crop adjustment plan was and is quite complicated. The corn-hog program has been difficult to administer so as to give 100 per cent satisfaction. But the Adjustment Act is our program and we shall stand by it and try to improve and simplify its administration. The gains we have made and the results obtained since 1932 speak for themselves. They prove conclusively that farmers perhaps knew more about their own business and what was needed to control surpluses and raise prices than did Mr. Hoover who now views with alarm.

Presumably there was "liberty" back in 1932 and earlier. Where did it get us? We could plant our crops, reap bountiful harvests, sell at a loss, buy industrial goods at high prices from protected industries if there was anything left after paying taxes—and finally surrender the farm (as many did) to the bank or insurance company.

"Regimentation" is a word come into new and widespread use. It means essentially organization. So under the wheat, cotton, tobacco, and corn-hog adjustment plans farmers have voluntarily organized with the friendly aid of government. And for what purpose? To put their house in order. To reduce the surpluses recognized as the crux of the farm problem by Arthur Hyde, Alexander Legge, Jim Stone, and others, all good friends of agriculture, who never had a chance to solve it because they lacked the needed legislative authority.

"Regimentation" we now hear so much about has been practiced by intelligent manufacturers, business men, and labor, for many years. They have profited by it. A regimented industrial price structure has been maintained behind a high tariff wall for 50 years or more. Manufacturers have always regimented their production and marketing to sustain profitable price levels. Organization on the scale practiced in the past year is new to farmers. Spread out and divided up into small units, farmers, apparently, couldn't get together and regulate production and marketing as successful industry has done. The Agricultural Adjustment Act gave us our chance. And it worked much faster of course, than anyone expected, because of the drouth.

The real test of our intelligence is still to come. Farm prices are up. Are we smart enough to fight for this act and use it to keep them there? Or will greed, and the hope of producing unlimitedly to sell at present or higher price levels, prove our undoing. We can't have our cake and eat it too. God help us to act with wisdom.—E. G. T.

Quincy Co-op. Has 50 Per Cent of Retail Business

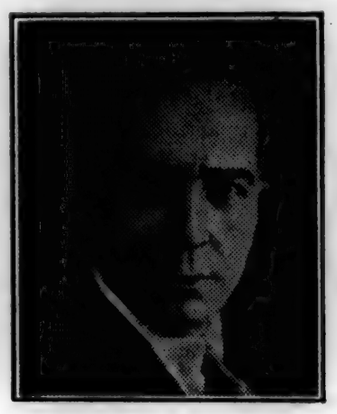
Adams county milk producers who own and control the Quincy Co-operative Dairy are demonstrating that they can run their own business in a business-like manner.

Last year this co-operative handled nearly five million pounds of milk. It manufactures a full line of products including butter and cheese, ice cream and two chocolate milk drinks. In spite of keen competition and extremely low retail prices it has been able to hold more than 50 per cent of the business in Quincy.

Oppose Gas Tax Cut

(Continued from page 7)

weight, but suggested further study to enable wise recommendations for revising such fees so as to still yield a sufficient return to pay off highway bonds and interest.



From information now available it appears that if the gas tax is reduced to 2c and present allocations to counties and cities are not changed, the state will be unable to engage in any new construction and will be compelled to practically abandon the maintenance of existing roads. Furthermore the state will not be able to match allocations made to Illinois by the federal government.

Until such time as provision is made for the retirement of state highway bonds and interest thereon and for maintaining and improving local roads and streets from funds derived from sources other than increased taxes upon farm lands and other tangible property, the I. A. A. is opposed to reduction of the state gasoline tax. A final report on the two proposals will be made to the board at a later date.

George E. Hunt is the new farm adviser in Greene county. Norman L. Davis is county organization director.

Fight for Retention of Processing Tax

The Agricultural Adjustment Act is the first piece of farm legislation of basic importance ever enacted and put in operation in this country that was drafted by farmers and administered in the interest of farmers, Edward A. O'Neal, president of the American Farm Bureau Federation, said in addressing the annual picnic of the Adams County Farm Bureau, Quincy, September 15.

EDW. A. O'NEAL

"This legislation gave us the necessary machinery for effective collective action to plan intelligent production and marketing for our crops," he said. "We have made wonderful progress. Prices of seven basic commodities have already risen above parity. Farm income this year, it is estimated, will be around $3,000,000,000 more than it was in 1932."

The Processing Tax

Appealing to Illinois farmers to stand solidly back of the Farm Bureau in its effort to restore agriculture and the nation to permanent prosperity, he said: "Let's not forget that other groups have been given similar opportunities. . . . We must fight for the retention of the processing tax in the AAA in order to finance adjustment in production control and in disposing of surplus. It is the heart of the Adjustment Act; take it out and you destroy the effectiveness of the Act."

Mr. O'Neal stressed the importance of simplification of the program for production control. "We are urging the President and Congress to give us a stable dollar, thus carrying out the promise of the President when he said: 'We must establish and maintain a dollar which will not change its purchasing and debt-paying power during the succeeding generations.'

"We must fight for fair tariffs, for protection of our home market for farmers, and against too high industrial tariffs. The Farm Bureau stands squarely on the proposition that agriculture must be given equal benefits with industry in future tariff policies.

"We should see to it that in our great agricultural states our representatives pledge themselves to our program that they will fight day and night for our cause. Let's all get busy and see that this is done before the fall elections."

Study the legislative report on pages 4-5-6-7. Watch the November RECORD for further details.

Quad Cities Producers Get 25c Per Cwt. Raise

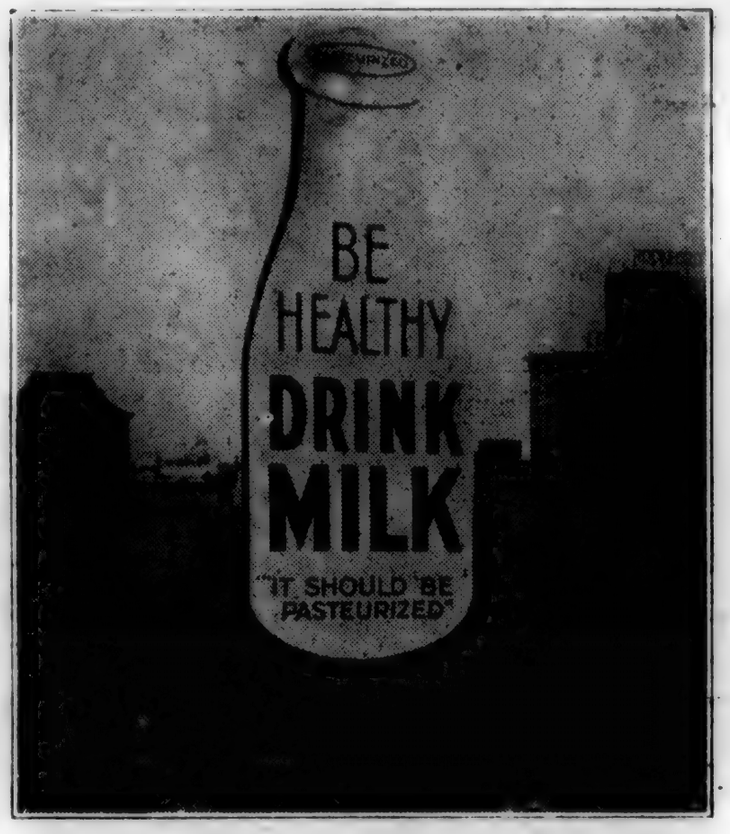
A price advance of 25 cents per hundredweight for Class I milk at the Quad Cities (Rock Island-Moline) market was recently made effective by the Agricultural Adjustment Administration. The new price is $1.85 per cwt. The larger dealers have been retailing milk for nine cents. The new minimum schedule for distributors is eight cents retail and seven cents wholesale for milk with less than 3.9 per cent butterfat; eight and one-half cents retail and seven and one-half cents wholesale for four per cent milk.

The revised agreement establishes a complete base and surplus plan effective September 1 so as to make the total of all bases of producers equal the total of Class I (milk) and Class II (cream) sales.

Reports state that distributors are vigorously opposed to the new price schedule. The amended license gives distributors a margin of about five cents a quart on their retail sales at the nine cent price, which they claim is not enough. A 10 cent price would give distributors a margin of about six cents a quart.

Producer distributors are selling raw milk at eight cents. Also many consumers are buying milk at the farm for 20 cents a gallon. This has cut into the larger distributors' routes they claim, hence their demand for a larger margin to make a profit.—Editor.

$39,000,000 Corn-Hog Checks For Illinois



Illinois corn-hog signers will receive about $39,000,000 in benefit payments, according to recent estimates.

The first payment will total nearly $17,850,000. The second about $13,523,000 and the third and final payment around $8,671,500, less local administrative expenses. The last payment is scheduled to be paid after Feb. 15, 1935.

Corn-hog checks are being mailed out of Washington at the rate of more than $4,000,000 a day. By September 1 more than $55,000,000 or considerably in excess of one-third of the first installment of some $133,000,000 had been distributed.

Production Credit Assn. Champaign One Year Old

The Champaign (Illinois) Production Credit Association, oldest in the United States, marked its first anniversary September 12 by announcing that more than one-fourth of amounts loaned has been repaid, with no overdue accounts. Loans are made from three to 12 months and bear five per cent interest.

ONE OF TEN HUGE SIGNS IN AND ABOUT Rockford to Boost Consumption of Milk.

Chicago Milk Producers Price Increase Halted

Ask For 50c Raise in Class I And New Basis of Payment

Consideration of an increase in the price to be paid producers in the Chicago milk shed for Class I milk has been deferred to a later date, the AAA reports.

The Pure Milk Association is working hard to secure an increase of 50 cents per cwt. for Class I milk over the present $2.25 price. The fact that dairymen throughout large areas of the Chicago milk shed have been compelled to buy high priced grain and hay because of the drouth has greatly increased cost of production. Farmers supplying the market with its rigid requirements of modern equipment and sanitation believe they are fully justified in demanding an increase in price despite the comparatively low state of the butterfat market.

The Association also proposed a plan changing basis of payment to producers. It would relate the total of Class I milk sales on the market to the total of 100 per cent established bases of producers so as to arrive at that percentage of each producer's established base for which he could receive the Class I price.

Similarly total sales of Class II (cream) also would be related to the total of 100 per cent established bases so as to arrive at the percentage for which producers would be paid a blended price.

All milk delivered in excess of the combined Class I and Class II percentages would be paid for uniformly at the surplus (Classes II) price. The total amount of money available to pay producers would be determined as at present. The Association believes that this plan would make it possible for some producers to reduce their production to that quantity for which they can receive the Class I price. This plan also would greatly simplify the job of figuring the value of milk delivered by individual producers.

Reduce Milk Surplus By Educational Work

By Wilkie Lee

Health Department statistics have proved that per capita consumption of milk, not in Rockford but everywhere, is far below the amount needed for normal health and efficiency. With all the scientific backing of its product which the milk industry has, producers and distributors have been noticeably lax in the merchandising of their product.

With these facts in mind the Mid-West Dairymen's Company, milk producers organization, and the distributors of Rockford decided to conduct an educational program.

Workers were employed to go before Women's clubs, schools, parent-teachers associations, churches, playgrounds, factories, boys and girls clubs and newspapers through the medium of plays, demonstrations, talks, stories, projects, recipes, window displays, posters, and effective literature as well as other devices. The giant ten foot porcelain milk bottle above is one of ten located on important highways and in the center of the business district. It reminds thousands every day of the importance of milk to health as well as that milk "Should Be Pasteurized."

The program is supported by the Mid-West Dairymen's Co. whose officers and directors are: President, Hugh W. Mainland; Vice-President, George H. Johns, Jr.; Treasurer, Harry Stevens; Secretary, Harold C. Crandall; Directors: J. Clayton Hoisington, Mauritz W. Nystrom, Wesley A. Newman, Wilbur E. Sawdey, William Nicolson, Dr. E. E. Walker, Frank Salley; and Manager Wilkie A. Lee—and by the 11 milk pasteurizing plants of Rockford, namely: Pinehurst Farms, Muller's Union, Central, Ferm, King Farm, East Side, Forest City, Ravetta, Kishwaukee, Uptown, and Rockford Dairies, Inc.

File Milk License Briefs

The Legal Department of the I. A. A. has filed briefs on behalf of seven downstate milk producers' associations with the Agricultural Adjustment Administration in support of marketing agreements and licenses for the distribution of milk. The deadline for filing was Sept. 10.

Distributors at all or nearly all markets filed briefs opposing licenses. Greatest objection of dealers to license is their loss of power in dominating market and dictating prices, and dislike of government officials examining their books.—Ed.

Fred Lee, temporarily retained as legislative adviser by the American Farm Bureau Federation last year, is the man who drafted the Agricultural Adjustment Act. Mr. Lee is a Washington attorney who was formerly head of the Legislative Drafting Bureau in the House of Representatives.

WHAT PRICE HURRY?

● No one in their right mind would race a train to a grade crossing. Yet, every year, thousands of foolhardy drivers try it. Few live to try it again.

● Grade crossing chance taking is only one of many foolish things motorists do. Passing a car when ascending a hill is another source of fatalities. High speed in traffic, split-second running of stop lights—all take their daily toll in human lives.

● What price all this hurry? What's a few seconds gained compared to months in a hospital, repair costs, law suits or funeral expenses.

● Decide now to drive sanely at all times; to watch your driving as well as the other fellows'. And above all, for your own protection, insure adequately in your own Farm Bureau company — Illinois Agricultural Mutual. See your County Farm Bureau insurance man now for complete details.

Rates for a new

FORD, CHEVROLET or PLYMOUTH

$15.40 initial payment; then $8.40 every six months. Less as car gets older.

"Here lies Joe who raced a train.
He used his foot and not his brain."

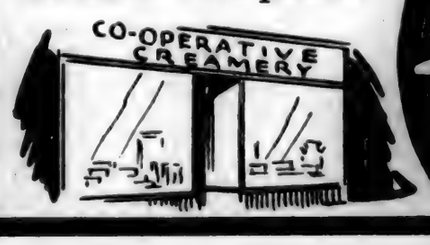
ILLINOIS AGRICULTURAL MUTUAL INSURANCE CO.

608 S. DEARBORN ST., CHICAGO, ILL.

EVERY YEAR

more than 30,000 motorists lose their lives. A million are injured. That's a high price to pay for carelessness. Reports show that in most cases, careless, foolhardy driving was the principal cause. Use your head more—your accelerator foot, less. It will pay more in the long run.

OUR SEVEN POINT PROGRAM



1. QUALITY IMPROVEMENT—Clean milk from T. B. tested cows, sanitary equipment, cooled promptly.

2. CHECK WEIGHTS & TESTS—Guarantees payment according to butterfat test and amount delivered. Eliminates complaints.

3. CONTROL SURPLUSES—Stabilize market, handle surplus not wanted by distributors in farmers' own plants.

Co-op Marke B Price Af

NOT ALL ONE-SIDED; DEALER GAINS TOO

Where milk producers are organized and operating soundly, distributors are offered—all on the same basis—a steady supply of high quality milk at a fair price so they can make a reasonable profit. They buy from the producers' association at less risk because payment is based on use. This stabilizes the distributors' business, insures a steady income, and tends to eliminate destructive price cutting. Producers are anxious to co-operate with dealers in advertising and boosting sales, which benefits all concerned. Intelligent distributors co-operate with producer organizations.

HOW THE CONSUMER BENEFITS

The consumer gets a continuous supply of clean, safe, wholesome milk at a reasonable price, enabling maximum use of milk and cream in the daily diet. On many markets, consumers have a voice along with producers and distributors, on milk councils.

A SOUND PROGRAM

Milk producers know by experience that they must be organized to have a voice in the market . . . to gain a fair share of the consumer's milk dollar . . . . to secure a reasonable return for their labor and invested capital. When farmers are unorganized they receive as low as 20 per cent of the consumer's dollar. The market at Danville before the producers united is an example.

Farmers realize that milk dealers, too, are entitled to a fair return on their investment and management. They have learned by experience that producer-dealer co-operation and good will, with fair returns to both, is the only way to a permanent and satisfactory market relationship.

Going it alone for the farmer does not pay. Organization is the answer to his problems.

NEW FIGURES SHOW ORGANIZATION GETS LARGER SHARE OF CONSUMER'S DOLLAR *for* MILK PRODUCERS

Fluid Milk Prices Increased During Last Two Months at Markets Where Producers are Organized.

	From	To		From	To
LaSalle-Peru	$1.25	$1.95	Rock Island-Moline*	$1.60	$1.85
Rockford	1.50	1.85	St. Louis*	2.00	2.35
DeKalb	1.75	2.25	Galesburg	1.85	2.00

(*Trade agreements in force.)

These figures are impressive. Multiply the increases in price by the total pounds of milk delivered in a year, and you have millions of dollars added to dairy farmers' income.

In every case, these advances were secured because farmers **asked** for them. Their requests were heeded because at every market named above, producers are ORGANIZED.

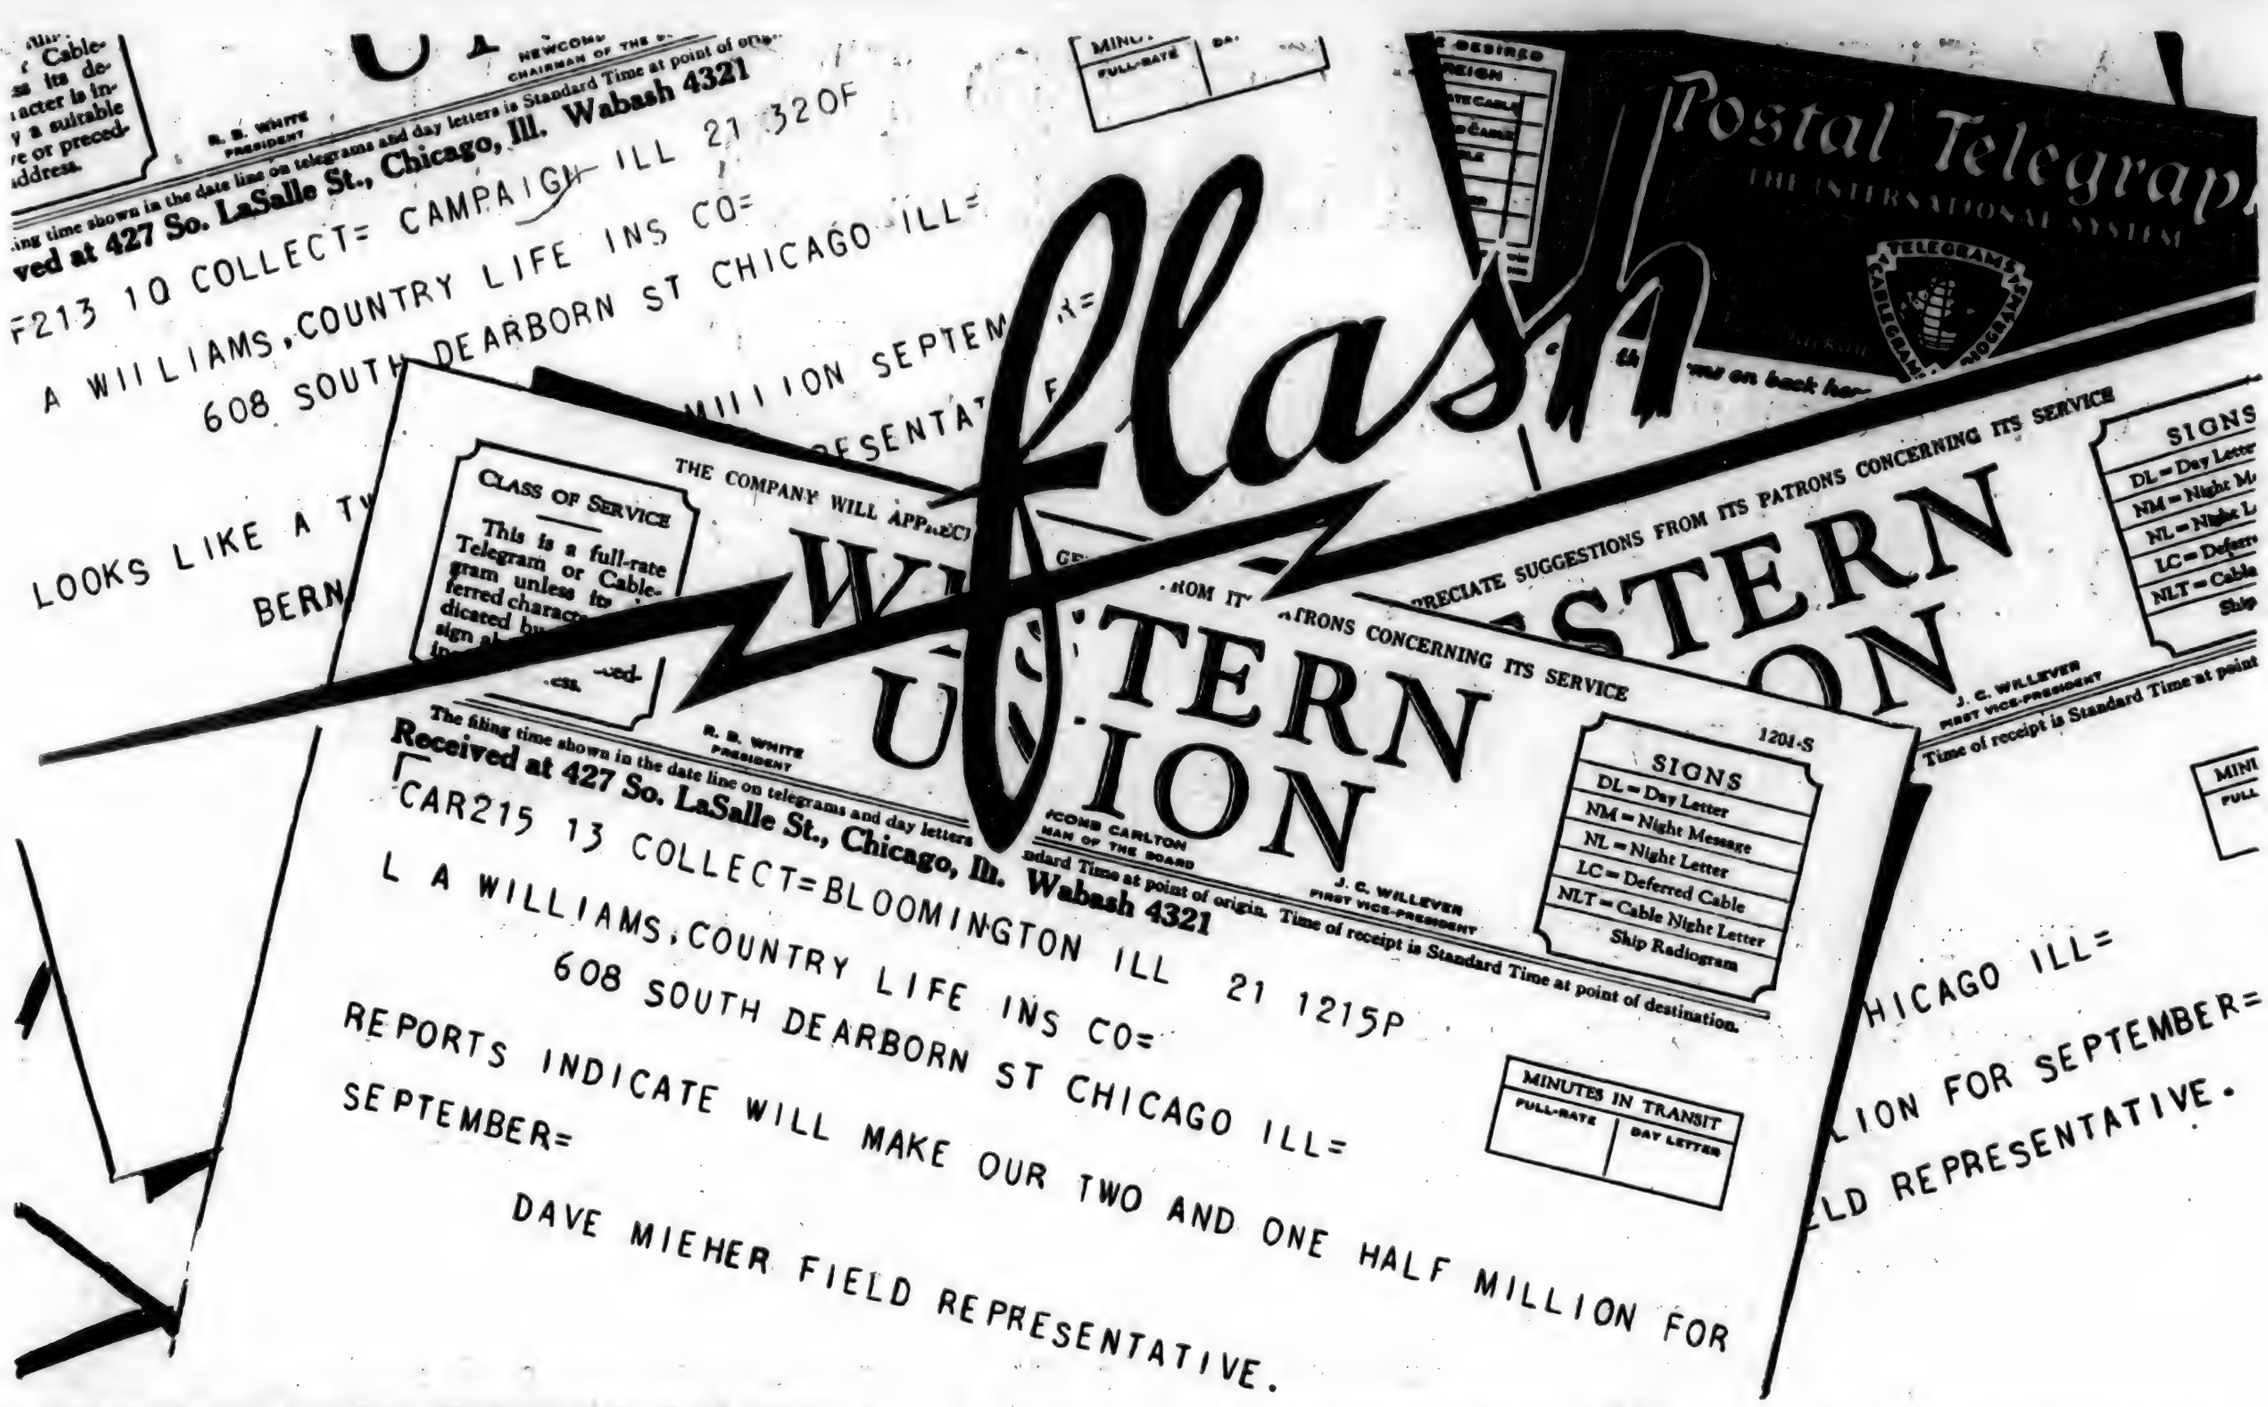
Occasionally, not often, you find a distributor who voluntarily raises the price to the producer. Humanity is selfish. Business is that way. It's out after profits, the more, the better. The responsibility lies with farmers, no one else, to see that they get a square deal for themselves, a fair share of the consumer's dollar.

Now the friendly aid of government is available to milk producers through the trade agreement section of the AAA. Let's not forget that this Act is the result of the 12-year fight of Organized Farmers led by the Farm Bureau for surplus control, price-raising legislation.

Trade agreements and licenses are in effect on two of the above markets. Chicago was the first city to get a trade agreement. Why? Because organized producers, again, requested them. The return to the producer for milk has been increased in each case. Similar agreements and licensing of dealers in the interest of fair prices to the producers have been applied for by members of the Mississippi Valley Milk Producers, supported by the Illinois Agricultural Association, for the following markets: Peoria, Bloomington, Champaign, Danville, Decatur and smaller southern Illinois cities.

5. **WATCH DEALERS' CREDIT RATING**—Prevents loss to farmer. Eliminates deadbeat dealers.

6. **ACCURATE MARKETING INFORMATION**—Helps producer plan his production throughout the year.



7. **ADVERTISING**— Aids both farmer and distributor by expanding fluid milk and cream sales.

EXTRA

SEPTEMBER INCREASE BREAKS ALL RECORDS

Total Insurance in Force Exceeds $63,000,000

MGR. LARRY WILLIAMS THANKS ALL WHO CO-OPERATED

By L. A. Williams

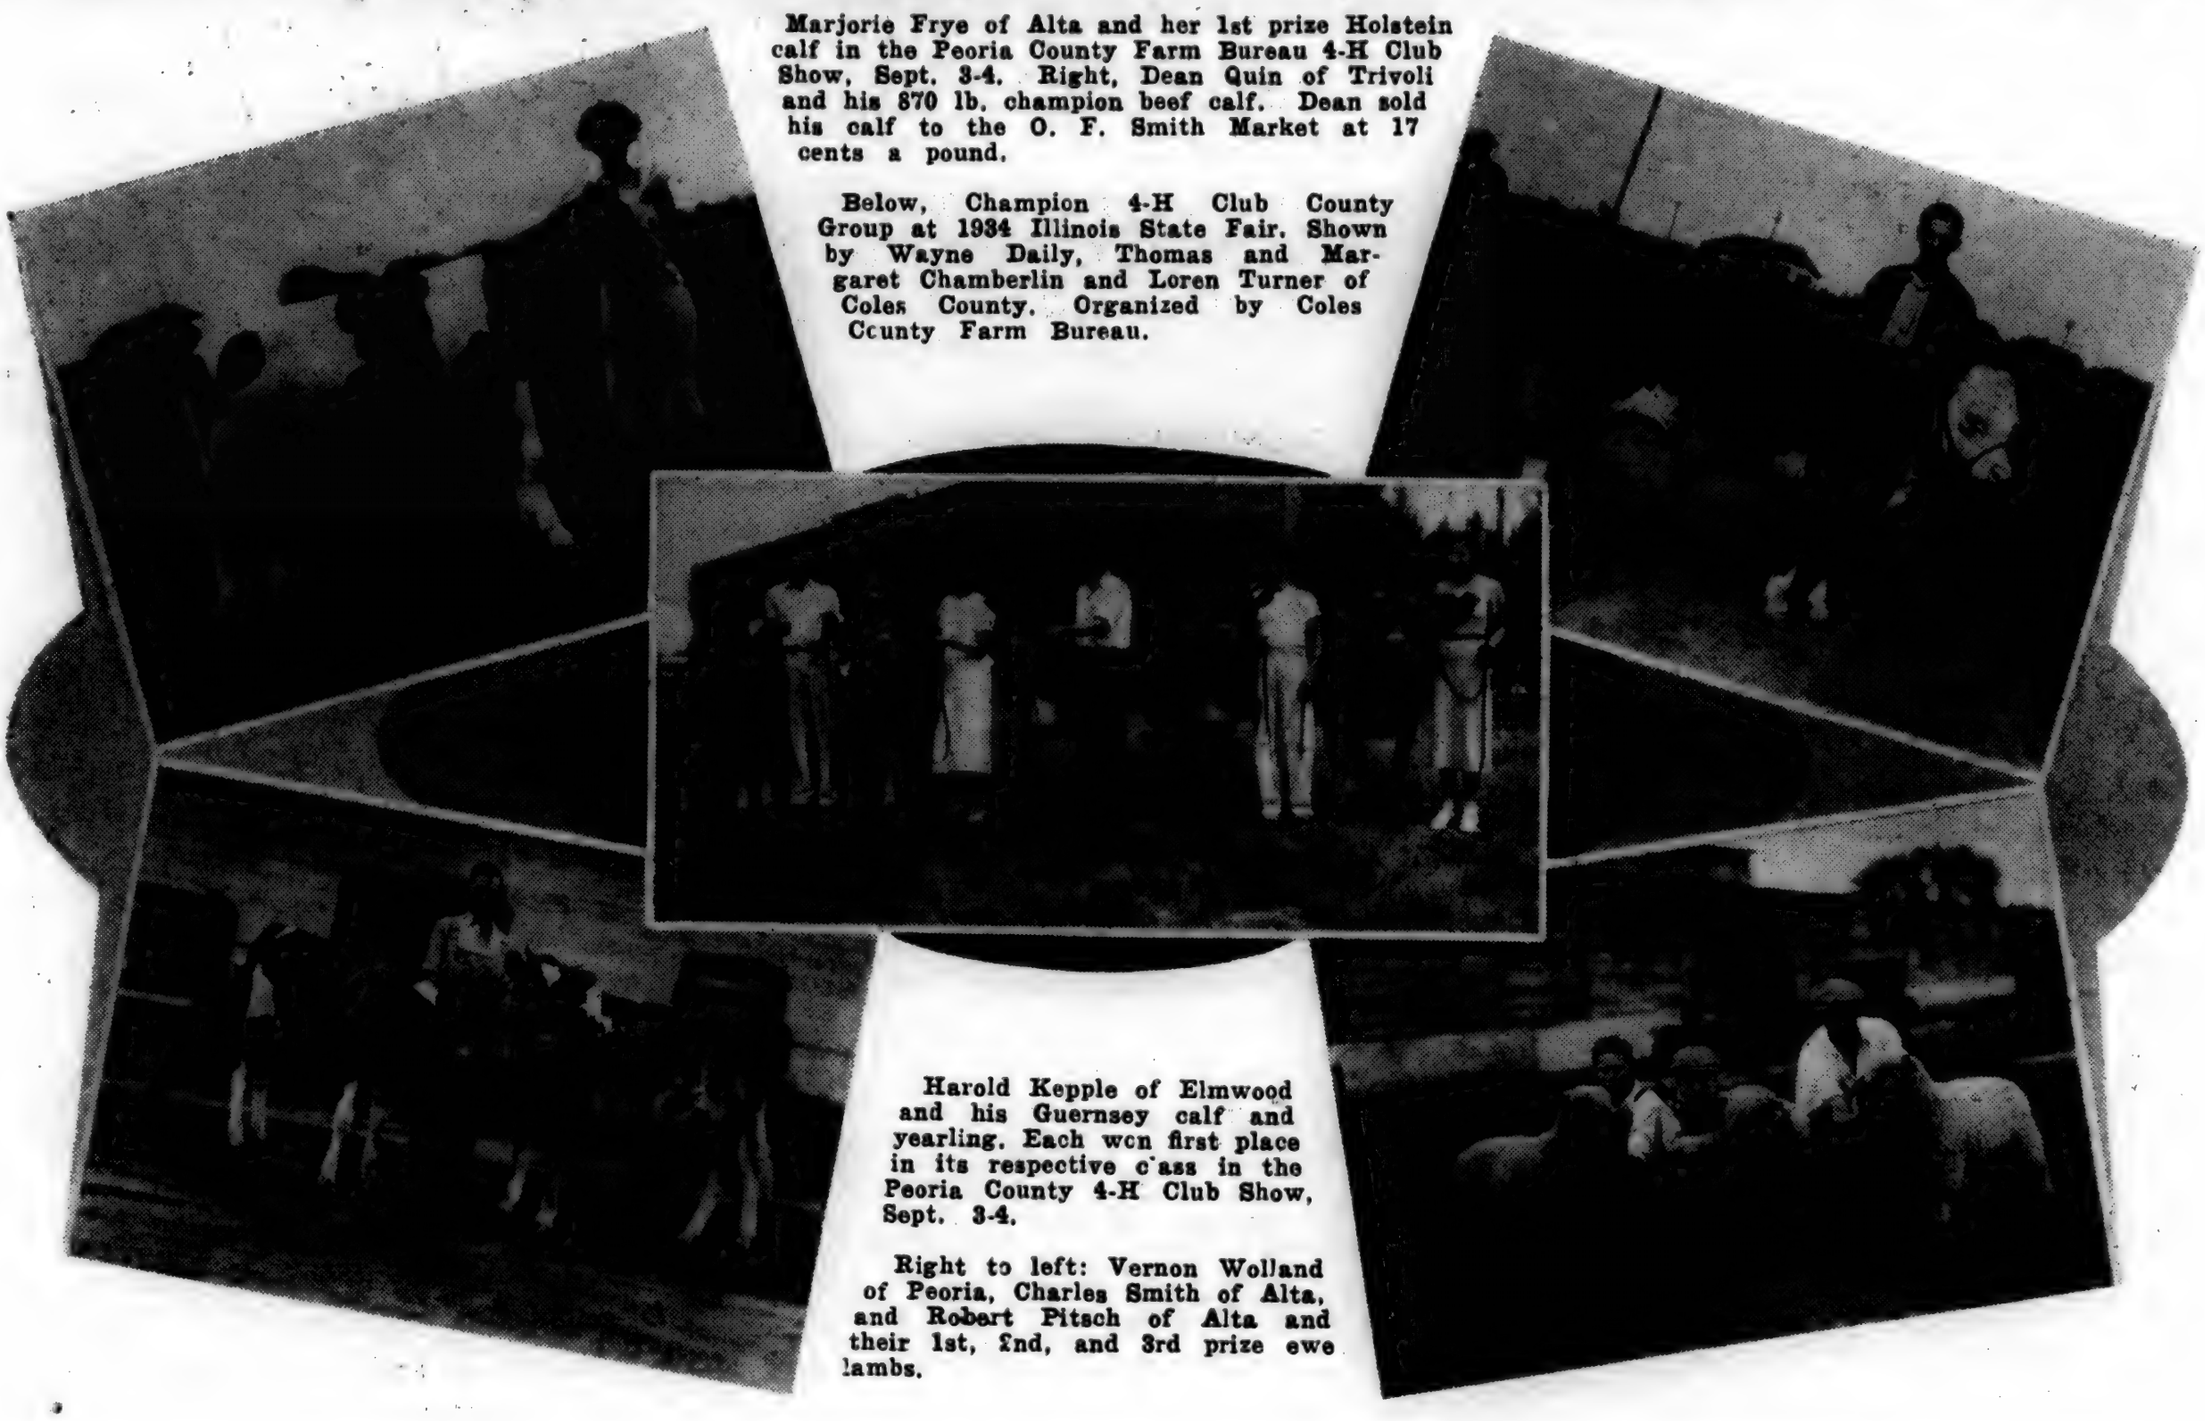
We rejoice in the success of our record breaking accomplishment for September. As we go to press all signs point to a two and one half million month—which, with the few months remaining in the year should make 1934 the high spot so far in Country Life history. I want to thank all policyholders for their hearty co-operation as well as the agents and Farm Bureau members who are helping to make this our most successful year.

Your Company Shows Amazing Strength and Growth

In 1929, Country Life opened its doors and set out to become the "model of all life insurance companies." That meant unquestioned security for policyholders, conservative, sound investment of funds, rock-bottom net cost of insurance through low overhead and selling costs. Further, what profits accrued from shrewd, economical management should belong to the holders of Country Life policies.

The idea took. Farm Bureau members and their friends have blazed a dazzling trail of record breaking accomplishment through six lean years to the present magnificent total of more than $63,000,000 insurance in force.

With a net lapse of but 7.92 per cent in 1933, mortality approximately 28% of the expected, Farm Bureau members may well be proud of the type of risk the company accepts.



$63,000,000 INSURANCE IN FORCE

An investment structure of more than $3,000,000, over 85% in cash, government, state and municipal bonds, demonstrates again the sound footing on which Country Life Insurance Company strides forward to future greatness, increased strength, and constantly lowered cost of securing protection for its thousands of policyholders.

COUNTRY LIFE INSURANCE COMPANY

Farm Bureau Supports 4-H Club Work

Marjorie Frye of Alta and her 1st prize Holstein calf in the Peoria County Farm Bureau 4-H Club Show, Sept. 3-4. Right, Dean Quin of Trivoli and his 870 lb. champion beef calf. Dean sold his calf to the O. F. Smith Market at 17 cents a pound.

Below, Champion 4-H Club County Group at 1934 Illinois State Fair. Shown by Wayne Daily, Thomas and Margaret Chamberlin and Loren Turner of Coles County. Organized by Coles County Farm Bureau.

Harold Kepple of Elmwood and his Guernsey calf and yearling. Each won first place in its respective class in the Peoria County 4-H Club Show, Sept. 3-4.

Right to left: Vernon Wolland of Peoria, Charles Smith of Alta, and Robert Pitsch of Alta and their 1st, 2nd, and 3rd prize ewe lambs.

Illinois 4-H Clubs Doing Constructive Work

Farm Bureaus Are Active in Training Farm Boys And Girls For Useful Lives

Thousands of Illinois farm boys and girls like those in the accompanying picture have taken part in 4-H club work under the leadership of the County Farm Bureaus and the Illinois Extension Service during the past summer.

"The boys in our 4-H Jersey Calf Club have done a splendid constructive piece of work," reports Farm Adviser Rusk of Coles county. "Tommy Chamberlin, the boy in the middle holding his sweet two-year old heifer is rounding out his tenth year of club work. He won first in the 4-H club class and fourth in the strong open class at the Illinois State Fair. He showed this heifer's dam before her and also won first with her at previous state fairs.

"Tommy has won many honors in club work including the trip to Washington. He is now a junior at Eastern Illinois State Teachers College and I hope he will attend the College of Agriculture at University of Illinois a year from now. His sister Margaret showed a calf this year that is a grand-daughter of a cow she showed three or four years ago. Several of the boys and girls have thus built up good herds of Jersey cattle at home through consistent, constructive 4-H club work.

"Coles county 4-H boys and girls won all the 1sts in 4-H club classes, all the seconds for which they showed and Grand Champion County Group.

"We also have winners in Baby Beef classes (1st County Group in Hereford steers), also other good winnings in baby beeves and sixth in the Poland China litter show at State Fair," reports Mr. Rusk.

"Our Corn Club boys will have their show at our County Institute at Charleston, October 18th and 19th."

LaSalle County Show

Medals, ribbons and a cup to the outstanding 4-H Club of LaSalle county (Otter Creek) were awarded recently at the annual 4-H Club campfire achievement program held in Allen Park, Ottawa, reports Farm Adviser C. E. Gates.

Money won by the Club members at the Mendota Show and the State Fair was distributed. The medals were awarded by the Chicago Producers Commission Association. Several hundred club members and their leaders attended.

H. A. deWerff, county farm adviser of Woodford county, reports that the Chicago Producers sold 13 4-H beef club calves from that county on December 5, two of which brought a top price of $9.45. The better calves weighed more than 1,000 pounds. Other good calves sold for $9.20, and $9. The lowest price was $7.95. Calves are purchased in Nebraska at a cost of $6.75 per cwt. laid down in Woodford county.

Peoria County Farm Bureau held its County 4-H Club Show early in September. Some of the winners are shown above. In nearly every county in Illinois similar shows and 4-H club projects are an important part of the Farm Bureau program. Training boys and girls in the art of better farming, home-making and livestock production — all of which means good citizenship—is one of the great contributions Farm Bureaus are making to the future of agriculture.

A total of 5,164,954 cattle had been purchased on the ranges of 21 drouth-stricken western states up to September 12. Purchase payments total more than thirty and one-half million dollars and benefit payments $17,670,423.

Davis Answers Attacks of Hoover And Others on AAA

Farm Act Makes Power of Government Available For Farmers to Help Themselves

Hoard's Dairyman and partisan newspapers have attacked the provision of the AAA drouth cattle purchase contract by which the seller agrees to co-operate with any future control program adopted for the cattle industry, in consideration of the benefit payments which constitute that part of the purchase price of drouth cattle meant solely for the farmer.

In a recent radio address on the American Farm Bureau program, Administrator Chester C. Davis defends this provision on the ground that benefit payments under the Agricultural Adjustment Act can only be made legally in consideration of an agreement to adjust production.

"In the cattle purchase plan," said Mr. Davis, "we wanted to be sure that a portion of the purchase price of cattle would belong to the farmer or rancher. We found we could accomplish this by designating a portion of the price paid as a benefit payment. This was not pleasing to some bankers. But the drouth-stricken farmers liked it. . . .

"If the editor of Hoard's Dairyman had honestly sought to ascertain the facts, he could not in good faith have published that editorial."

Answering ex-President Hoover's statement in a recent issue of the Saturday Evening Post that "the whole thesis behind this program (AAA) is the very theory that man is but the pawn of the state," Mr. Davis said: "This is not a correct statement of the philosophy of the Adjustment Act or its administration. The object of this program is to make the power of government available to enable the farmers of this country to do the job which they as individuals or as associations had proved unable to do in 15 years' effort. . . .

"The McNary-Haugen bill aimed to give the producers a fair price for that portion of their crops consumed at home independent of the world price for the surplus. In defense the opponents of this legislative idea were forced to take a definite position. They advanced several alternative proposals — more generous farm loans, government assistance to co-operative, and finally government price stabilization operations.

"The Agricultural Marketing Act was adopted in 1929 as a defense against the program that had been advanced by farmers. Generally, the farm organizations took the position that the Farm Board should be given a trial. Experience during its existence definitely proved two things: first, that it was futile and unfair to the co-operatives themselves to expect them and their members to undertake the load of regulating supplies and stabilizing markets for any widely-grown commodity; second, that government stabilization in the absence of farmer control of production will not work. . . .

"Following the 1932 election the stage was set for the new deal for agriculture. Farm organization leaders who met with Secretary Wallace in March, 1933, had the benefit of long experience under the Farm Board and previously. They outlined the program which was enacted in the Agricultural Adjustment Act not quite 16 months ago."

Market For Corn Stover

The AAA recently acted to provide a commercial market for corn fodder and stover. For such quantities of fodder and stover as remain unsold in April, 1935, the government agrees to pay the following prices:

	Alternative No. 1 Whole	Shredded
No. 1 Corn Fodder (entire plant)	$8.50	$9.00
No. 2 Corn Fodder (entire plant)	8.00	8.50
No. 1 Corn Stover or Sweet Corn Stover (ears removed)	7.50	8.00
No. 2 Corn Stover or Sweet Corn Stover (ears removed)	7.00	7.50

Initial allotments of quantities of fodder will be made soon to states, and will be prorated to counties and individual farmers. It is contemplated that purchases of corn fodder and stover will be handled through the livestock feed office of the AAA recently opened in Kansas City.

Ogle County Has Army of 240, Fight for Agriculture

A total of 240 organization committeemen of the Ogle County Farm Bureau paraded in military formation during the recent annual picnic at Oregon. Each committeeman wore a special helmet. They were reviewed by "General" L. M. Gentry, chairman of the county committee.

During a brief ceremony in the grandstand each member took the pledge to fight for agriculture and the organization at the command of the County Farm Bureau president, John D. Coffman. R. J. Hamilton is county organization director.

Plan now to attend the big I. A. A. annual meeting at Quincy in January.

A red hot battle for the state championship is in prospect as McDonough and Will counties go into the final series. Both are outstanding teams. Will county is supreme in northern Illinois and McDonough county has beat all comers in the central and western sections.

McDonough eliminated the fast, heavy-hitting 1933 champions from Sangamon county, and more recently the divisional winners from Shelby. McDonough had a tough battle with Sangamon, the latter taking the second game of the series and forcing the western Illinois boys to put up their best brand of baseball to take the third game at Beardstown.

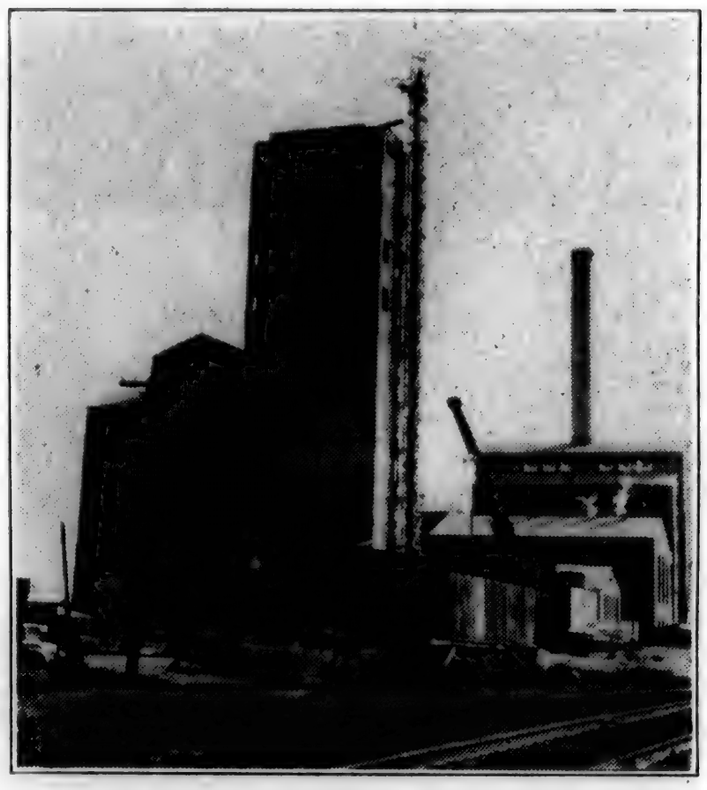
The first McDonough-Shelby game was a walk-away for McDonough. Close to 2,500 people saw the game played on the teachers college grounds at Macomb. The second game at Shelbyville drew a small crowd, but the Shelby boys played better baseball and held McDonough to a 9 to 2 victory.

Beat Carroll

The scrappy Will county nine defeated both Woodford and Carroll in the inter-divisional contests. The first Will-Carroll game at Lanark was a pitchers' battle with Will county barely winning 1 to 0. The second game played September 15 at Frankfort was more one-sided with the Carroll county team coming out on the short end of a 9 to 2 score. Schuldt of Will county held the Carroll batsmen to six hits, whereas his teammates batted out 13 safeties against Schaut and Rahn.

As we go to press it seems likely that the opening game of the championship series will be played Saturday, September 29 at Frankfort. Manager E. W. "Boots" Runkle is promising a crowd of 3,000 at the return game in the McDonough county seat.

Drouth And Farm Income



Farmers as a whole in the U. S. will have more than $900,000,000 additional income, or nearly 20 per cent in excess of 1933 income, according to estimates of the Bureau of Agricultural Economics.

Only about one-third of farm income in 1933 was derived from states worst affected by the drouth. Another third came from the partially affected central states east of the Mississippi River, the remaining third came from all other states which were largely unaffected.

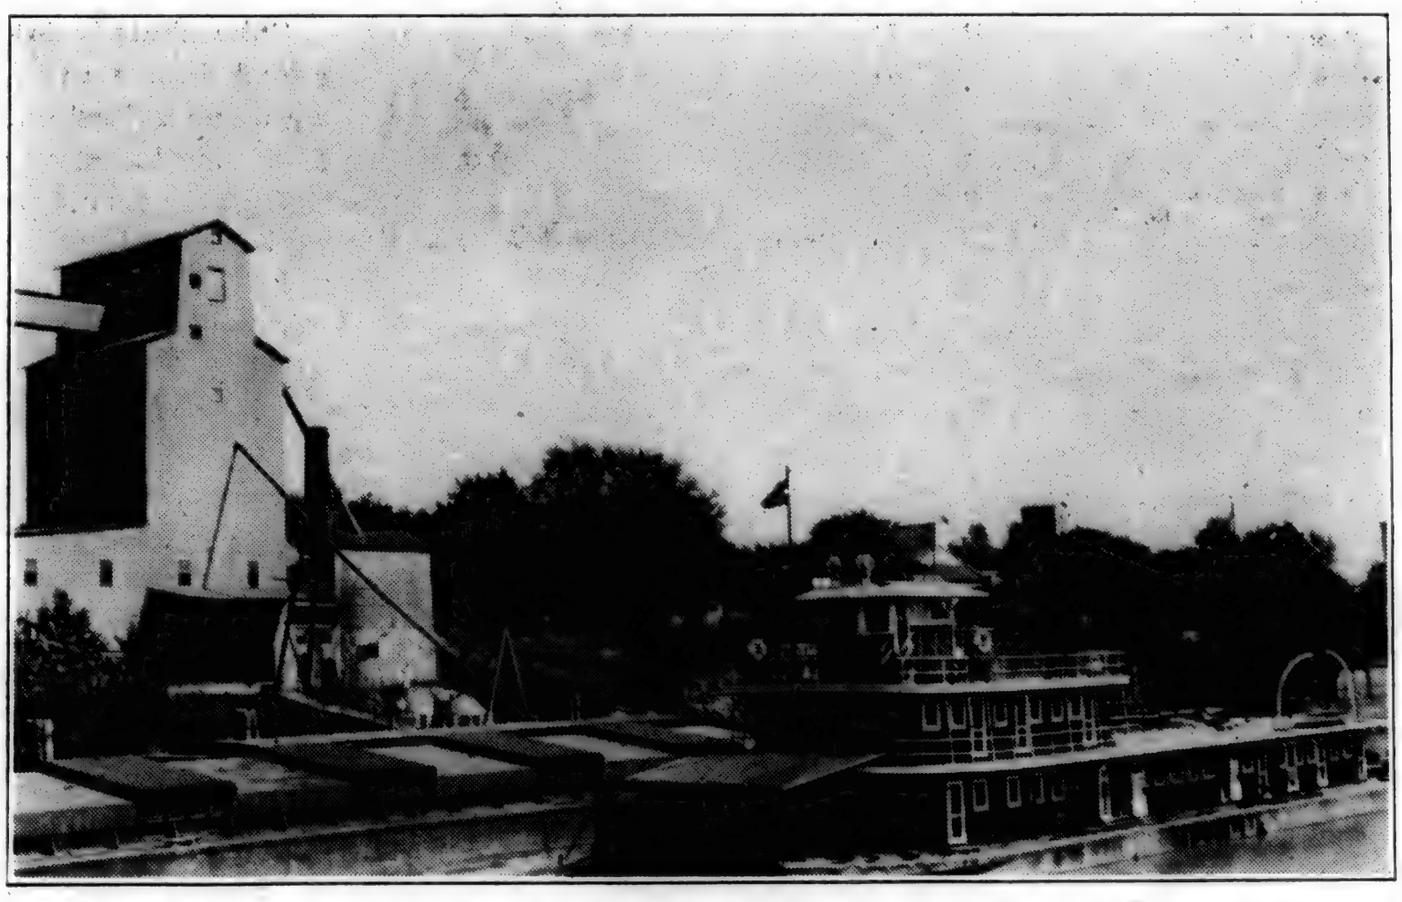
Waterways and the Farmer

Here Are Some Things You Should Know About Water Transportation

By G. S. Wilkin,
Inland Waterways Corporation

MILL HOUSE, FARMERS NATIONAL GRAIN Corporation elevator at Peoria in course of construction. Hiram Walker distillery in background, July, 1934.

IT IS surprising how little is known by the public generally about the extensive system of inland waterway transportation which has been maintained by the Government for the past 16 years; especially by those who are receiving the greatest benefit from this service, namely, the residents of the Mississippi Valley and the Great Middle West. And yet, as President Roosevelt has said, the people are more keenly interested in the affairs of government today than ever before. They are especially attentive to any information concerning the new agencies that have been set up by the Government, under the New Deal, for the relief of unemployment and domestic distress.



The great humanitarian program of harnessing our streams for flood control, soil and water conservation, power development and navigation is by no means the least interesting of these campaigns. Its far-flung effect on the economic and social life of the nation appeals to the imagination.

The Tennessee Valley Authority with its announced policy of raising the standards of living of a vast segment of our population; the curbing of the Columbia River, in the far northwest, for irrigation and navigation; and the improvement of the Missouri, Ohio and Illinois Rivers and other tributaries of the mighty Father of Waters, with the consequent creation of thousands of inland lakes and parks—all these are only a few of the projects that strike a responsive chord in the soul of a people who are stunned by, and groping for a way out of the darkness of the present world-wide depression.

While this program of river and harbor improvement is being executed more vigorously than ever before, the President now proposes to place it all under a scheme of national control and co-ordination in lieu of the hit and miss method of the past. This work has been carried on by the Government under the War Department for the past 13 years. The Army Engineers have achieved noteworthy results and an enviable reputation for efficiency and integrity during this period. Foreign nations have sent representatives to study their amazing achievements on the Missouri and other rivers.

But, the phase of this work about which the public seems to know the least is that of actual navigation on these streams. For most people it has a strong appeal to the imagination. The romance of early steamboat days will live forever in "Steamboat Bill," "Show Boat" and Mark Twain's works, but they were no more than a glamorous memory by the year 1900.

The unorganized river packets could not continue the hopeless struggle against the concentrated attack of powerful railroad interests, and they were finally driven off the rivers completely. With their competition eliminated railroad rates soon mounted to prohibitive levels. The opening of the Panama Canal in 1914 inaugurated low rates which put the land-locked interior out of competition with seaboard territory. Population and industry in the middle west immediately began to decrease.

LOADING GRAIN FROM FARMERS NATIONAL ELEVATOR AT HAVANA, ILLINOIS. SHIP Tom Sawyer and barges in foreground. Brook and Farmers Co-op. Elevators in background to right.

For this reason, agitation was started for the rehabilitation of river transportation, as the only means of restoring economic parity; but it was not until 1918 that barge service was resumed on the Mississippi and Warrior Rivers, and then only by the United States Government as a war measure to relieve railway congestion.

It was barely re-established when the war ended, but operations were continued under the Railroad Administration until it went out of existence in 1920. At this time the Service was transferred to the War Department and re-organized under the title of The Inland and Coastwise Waterways Service.

In 1924 it was incorporated under the name of "Inland Waterways Corporation" and $5,000,000 was appropriated by Congress for additional capital. In 1928 new legislation authorized an appropriation of $10,000,000 more; but, out of the total of $15,000,000 only $12,000,000 has been withdrawn from the treasury to date.

The Corporation has not only operated on the modest sum since its creation, but up to December 31, 1933, had earned a net income of approximately one million dollars after setting aside more than four and one-half million dollars for depreciation. So far as known, this is the first instance of the Government making a profit from a business undertaking. This record shines in comparison with

the vast subsidies voted to other governmental agencies. Senator Black says, over a billion dollars subsidy has been voted to air mail contract carriers since 1925. There is nothing to show for this money today in the form of tangible assets.

On the other hand, the Inland Waterways Corporation has valuable property and equipment to account for every penny of its investment. It owns a fleet of 25 towboats ranging from 600 to 2,700 H. P., four 800 H. P. self-propelled barges and 266 steel barges, varying from 400 to 3,000 tons capacity. In addition, it has thousands of dollars worth of terminal equipment and a 20 mile railroad connecting its terminals on the Warrior River with Birmingham, Ala.

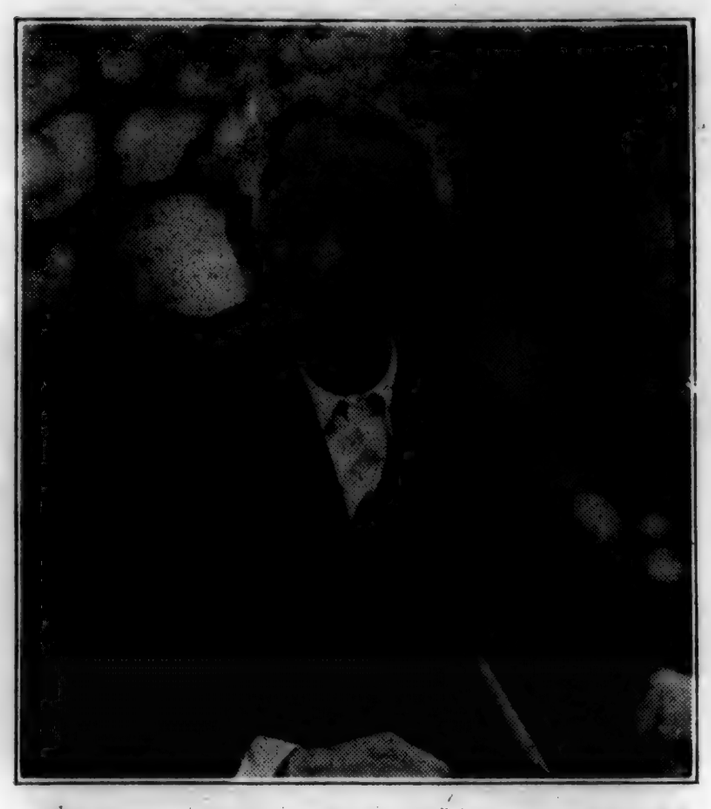
8 Barges One Load

Few people realize the huge tonnages moved by this equipment. One of the regulation 2,000 ton barges, from an interior view, resembles a large two-deck warehouse. It has a capacity equivalent to fifty 40 ton freight cars. The standard tow consists of eight such barges corresponding to 400 railroad cars.

On the Lower Mississippi Division the service consists of two tows per week in each direction between New Orleans, Saint Louis and Chicago.

The Upper Mississippi Division operates two tows per week in each direction between St. Louis and Minneapolis. This service is synchronized with that on the Lower Mississippi and close connections are made at St. Louis, avoiding delay incident to transfer between the two divisions.

The Warrior Division maintains a weekly self-propelled barge service between New Orleans and Mobile and a weekly towboat service between Mobile and Birmingport.



Water-Rail Rates

While this far-flung system of silently efficient and cheap transportation presents a most striking picture, the most interesting phase of the service from a practical standpoint, is the tremendous saving it affords the shipping public.

Federal Barge Line rates are generally made with relation to, and twenty per cent less than, corresponding all-rail rates. Substantially the same savings are available under joint barge-and-rail and rail-barge-rail rates as are afforded by the all-water rates between Barge Line Ports.

As a result of long and continued effort joint rates have been established with 135 railroads, and through these joint rates the people of 42 of the 48 states may share in the economical benefits of water transportation.

Up to December 31, 1933 the direct savings on freight handled by the Barge Line amounted to over $20,000,000; but, this sum is insignificant compared with the reduction by other carriers induced by water competition. The following illustrations give some idea of this benefit to the public:—

JOSEPH J. FORD, AGE 102, OF CRAWFORD County, is the oldest corn-hog contract signer in the U. S.

While the farmer participates in these savings as a general consumer, he is benefited even more in the shipment of his own products. The cotton growers in the south and the grain producers in the north are reaping the full advantage of this service. It permits an augmented movement of grain south, creating a new competitive condition, relieving the congestion at Chicago and, thus, tending to elevate the general price level. This benefits all growers whether they are located adjacent to the waterways or not.

This is the first of two articles on the inland waterways by Mr. Wilkin. The second will appear in the next issue of the RECORD.—Editor.

A Good Team

I just want to express to you my appreciation of the picture on the cover of the September issue of the Illinois Agricultural Association **Record.** When I look at it, it brings to my mind the days when I worked in the hay fields and harvest fields on my father's farm over sixty years ago. We had just such a team of kindly faced, docile animals then. I just cannot help liking horses and mules for farm work. If treated kindly and properly cared for, it is a real pleasure to work with them—they seem to form an integral part of the farm family. An intelligent team greets you in the morning, is only too pleased to carry out one's every demand—and to my mind represents one of the pleasures of the farm.

I fully appreciate the value and necessity of mechanical equipment on the farm of today—I do not for a moment think we should go back to horse farming—but I do love a good team of horses or mules, and the illustration on the **RECORD** that came to my desk today brought it to mind, and I thought I would let you know how I liked it.

W. E. Taylor, Deere & Co.,
Moline, Ill.

New Treaty With Cuba To Aid Farm Exports

It is estimated that the new trade treaty recently completed with Cuba will result in that country's taking the output of nearly a million acres of American farm lands if the agreement works out as expected. George N. Peek of Illinois, special adviser to the President on foreign trade, was instrumental in working out the agreement.

GEO. N. PEEK

Cuba sharply lowered its tariff against lard and pork products, cotton seed, corn, and soybean oil, wheat flour, canned vegetables and a number of industrial products in return for lowering the import duty on Cuban sugar and tobacco.

The loss of this market since 1928 because of the high Smoot-Hawley tariff, retaliatory tariffs by Cuba, and lower buying power in that country represented the output of 817,267 acres of American farm lands.

Quality Milk Association had a special exhibit at the Mississippi Valley Fair, Davenport, Ia. showing a mechanical professor who gave a short talk every 10 minutes about the value of milk. The talk was recorded on a disc which automatically switched on every 10 minutes throughout the day. Manager Frank Watson reports that close to 60,000 people viewed the exhibit.

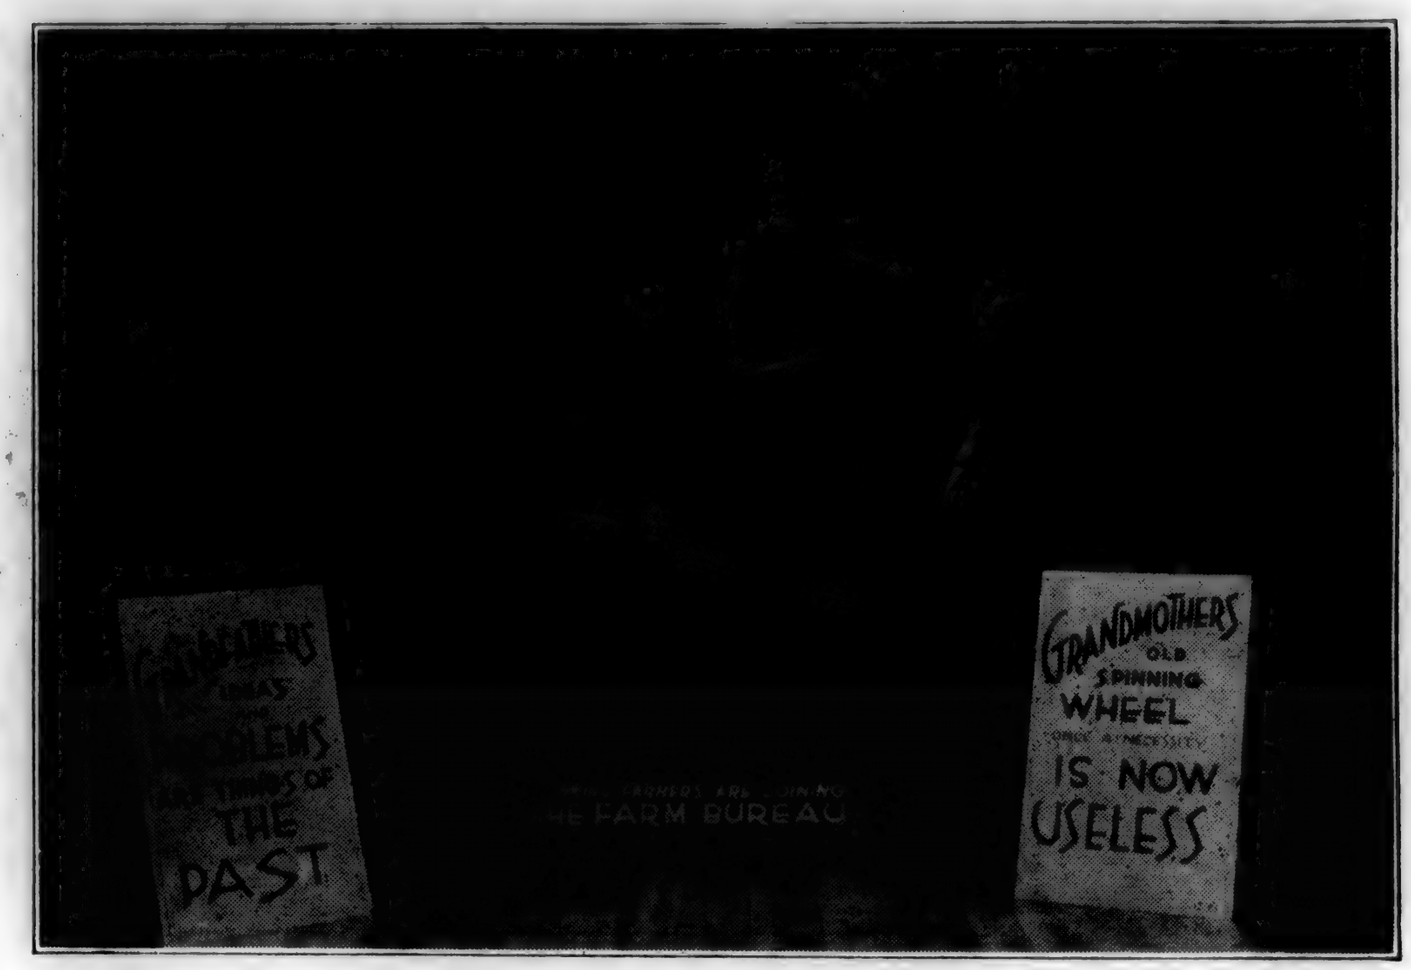
31,000 Farmers Are Refinanced in 15 Months

By Walter L. Rust, President, Federal Land Bank of St. Louis

DURING the past 15 months, more than 31,000 farmers in the St. Louis farm credit district have been able to refinance their farm mortgage loans with long-term, amortized Federal land bank or commissioner's loans. These new loans have prevented foreclosures, reduced interest rates, and granted the farmer a longer time in which to work his way out of debt.

The importance of the Federal Land Bank as a financing agency was emphasized by passage of the Emergency Farm Mortgage Act of 1933, at a time when the farm mortgage situation was relatively frozen.

For 16 years the Federal Land Bank of St. Louis had been making long term, amortized, farm mortage loans at low rates of interest. But during that 16 year period, credit from other sources was plentiful. The farmer, to obtain a farm loan, did not have to leave his barnlot. Money was pushed into his hands. And why not? Land was selling at high prices and producing high priced crops and livestock.



Land Drops Sharply

By 1933 this condition had changed. Land prices had dropped 97 points since 1920, and the farmer was fortunate if he got the cost of production from his crops and livestock. Creditors were demanding that their money be paid at once.

The farmer, in searching for a straw to hold to, turned to the Federal Land Bank System, which, with the new idea of amortized loans, had been going along, year after year, gaining valuable experience.

Congress saw the strategic position held by the 12 land banks of the nation. In these institutions rested the solution of the problem of the foreclosure-threatened, over-capitalized farmers. To aid them still further, the Emergency Farm Mortgage Act was passed.

This Act, which received Executive approval on May 12, 1933, permits the land banks to make direct loans to borrowers in areas not served by a national farm loan association. It grants interest reductions to land bank borrowers until 1938. It permits land bank borrowers to postpone principal payments, and makes it possible for land banks to grant extensions to worthy borrowers and to reamortize such extensions. It also provided for the land bank as agents of the Land Bank Commissioner to make loans for as much as 75 per cent of the appraised value of the farm improvements and personal property mortgaged. However, the farmer is required to have a 25 per cent equity in his farm, and a reasonable possibility of working out of debt with normal prices and normal management.

THE BOND COUNTY FARM BUREAU MAKES EFFECTIVE USE OF ITS WINDOW SPACE TO ADvertise for Greater Membership.

The extent to which economic conditions and this legislation affected the activity of the land banks is reflected in the records of the Federal Land Bank of St. Louis.

On May 1, 1933, after the Federal Land Bank had been in operation for 16 years, the outstanding loans numbered 31,020 for $97,015,372.91. On July 21, 1934, less than 15 months after the financing campaign got under way, the Federal Land Bank on its own account and as agent of the Land Bank Commissioner had closed 31,033 new loans for $92,902,400.

100% Growth

In other words, a 16-year-old institution made a 100 per cent growth in but 15 months. In these figures can be found evidence of the speed and efficiency with which the Land Bank has met the demands of financially distressed farmers of Illinois, Missouri, and Arkansas.

These 21,033 loans have stopped foreclosure action in thousands of cases. One farmer in discussing the Land Bank and his loan said:

> "The Land Bank has meant to me what a good father means to a worthy son.
>
> "The party holding my mortgage on my farm was overly anxious to obtain the place for the outstanding indebtedness and was looking forward to immediate foreclosure and possession, knowing full well that there was no place in which I could seek relief through organizations and individuals.
>
> "But I fooled him. My land bank loan has given me a new interest in life. This isn't such a tough old world after all."

Cut Interest Rates

Land banks and commissioner's loans have reduced interest rates. On commissioner's loans the farmers pay 5 per cent interest while on land bank loans made through national farm loan associations the interest rate is only 4½ per cent until 1938. These amortized loans extend over a long period of time, ranging from 13 to 36 years. Each year a portion of the principal is paid together with interest on the unpaid balance. In many cases, these payments, including both a portion of the principal and interest, are no more than the farmer had been paying on interest alone.

One happy farmer felt impelled to write the Land Bank a letter of thanks for his commissioner's loan. He wrote:

> "For a number of years I have been paying 10 per cent interest on my loan and let me tell you it is such a pleasure to get out from under 10 per cent interest that I must write you a letter of appreciation. Words cannot express how glad I am to be given this easy plan of paying my home out of debt with only 5 per cent interest."

Although the Federal Land Bank of St. Louis has loaned more than $92,000,000 in less than 15 months, the total over-head indebtedness of the farmers of Illinois, Missouri, and Arkansas has not been greatly increased by this refinancing program.

Records reveal that 91 per cent of the

COUNTY WINNERS WHO COMPETED IN THE 1934 COUNTRY LIFE QUEEN CONTEST ON FARM BUREAU DAY, ILLINOIS STATE FAIR, AUG. 24. Miss Irene Bachman of Williamson county, seated, was crowned "Queen," and Miss Marjorie Lambert, McLean county, standing directly behind her, was declared "Maid of Honor."

loan funds disbursed by the Federal Land Bank of St. Louis have been used to refinance debts already owed by farmers.

One of the best measures of the success of the Federal Land Banks in relieving the farm credit distress can be found in the large decrease in the number of letters received in Washington from farmers facing an emergency. Last November, the Farm Credit Administration in Washington was receiving 600 letters daily from farmers whose cases demanded prompt action. These letters have now dropped to less than 50 daily.

In this respect it should be noted that while the Frazier-Lemke Amendment to the Bankruptcy Act, since its purpose is to prevent occasional selfish creditors from foreclosing on distressed farm debtors, is in accord with the program of the Farm Credit Administration. The activity of the Federal Land Banks in the past year has relieved a great majority of the distressed farm mortgages, leaving only a slight minority of farmers who will have to go into bankruptcy to save their homes.

The Federal Land Bank is not a relief device, neither is it a spender of taxpayers' money. Loans are made on a sound business basis. Formerly made from funds secured through the sale of bonds to the investing public, loans are now being closed in bonds of the Federal Farm Mortgage Corporation. The ready reception accorded these bonds by farmers and their creditors is responsible for the fact that during June the Federal Land Bank of St. Louis disbursed more than seventeen and one-half million dollars. This sum broke all previous records for loans closed in a month's time.

The work of the Federal Land Bank is not finished. Applications for loans, while not approaching the volume received at the start of the refinancing program, continue to arrive.

The land banks are designed to be permanent. They have served this generation well. It should be the individual responsibility of every borrower to meet his obligations as they come due that the Land Bank System may continue to operate on a self-sustaining basis and serve future generations in the same manner as it is serving this generation.

The Farm Bureau is proud of the part it played in securing the passage of the Emergency Farm Mortgage Act and other helpful measures early in 1933, is appreciative of the aid that administration of this legislation has brought to many distressed debtors.—Editor.

Available Phosphorus Cuts Chinch Bug Loss

Plenty of available phosphorus in the soil will help wheat overcome chinch bugs, according to L. B. Miller, associate in soil experiment fields at the State College of Agriculture.

This consideration is particularly applicable where wheat is to be planted following the harvesting of soybeans for seed, he says.

In Macoupin county this year on Enos Waters' farm, wheat on fallow ground yielded 28 bushels per acre, while on similar soil following soybeans, it returned only 18.9 bushels.

Ground rock phosphate on soils deficient in phosphorus has produced some outstanding results. An application of 1,000 pounds per acre of rock phosphate on many soils is sufficient to grow beautiful crops of alfalfa and clovers.

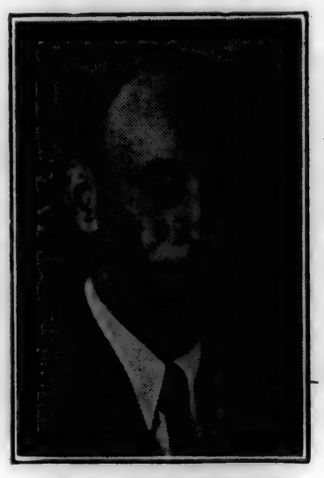
May Use "Idle" Ground Next Year For Forage

Wheat contract signers may plant their idle ground to forage crops in 1935. Grass and clover crops grown on such land may be used for hay, pasture or seed production. Wheat, corn, barley, rye and grain sorghums are forbidden but millet, soybeans, oats, etc. may be grown when used only for hay, pasture, or roughage.

Seed to Sell?

The Seed Department of the Farmers National Grain Corporation at Chicago advises that it will be glad to bid on all kinds of clover seeds, timothy, lespedeza, soybeans, and others grown by Illinois farmers. Send samples to the Corporation in the Fisher building, Dearborn and Van Buren streets, Chicago.

The Farmers National Seed Department is not only assisting farmers in disposing of seed, but also attempts to bring buyers and sellers together to the mutual advantage of both.



Weather Forecasting

Herbert Janvrin Browne, long-range weather forecaster of Washington, D. C. recently offered a bulletin for $5 "covering the causes of the drought and definitely predicting when it will end." An additional bulletin is offered "giving the dates of cold waves in the northwest, in the Mississippi Valley and the eastern states up to October 15, and naming specifically the dates for killing frosts."

U. S. Weather Bureau officials take no stock in Browne's forecasts. His forecast of rains in western states during August came true. Weather prophets are now predicting a long cold winter. —Editor.

Farmers National Grain Annual Meeting Chicago

During the month of July and August this year the Farmers National Grain Corporation handled 40,169,108 bushels of grain despite the shortest cereal crop within two generations and made a net profit of $683,182.04, which exceeds the loss of $662,503.87 for the fiscal year ending June 30, 1934.

G. C. JOHNSTONE

This information was given out in the annual report of President C. E. Huff made to the stockholders in Chicago, September 19.

Mr. Huff stated that the capital of the Corporation, $1,048,200, was unimpaired, surplus totaled $64,178.13 and reserves $910,583,56.

Overhead expense, the number of employees, and salaries were drastically reduced during the past year Mr. Huff said because of the substantial cut in volume handled resulting from short crops.

Huff was re-elected president, and G. C. Johnstone, president of Illinois Grain Corporation, was elected first vice-president to succeed W. H. Settle of Indiana who retired from the board.

New Elevators

During the past year the Corporation erected a new 2,000,000 bushel elevator at Amarillo, Texas—"the finest structure of its kind in the southwest," according to Geo. S. Milnor, general manager. A smaller elevator, serving both rail and water transportation, was built at Peoria, Illinois, and a 4,000,000 bushel elevator was leased from the Rock Island railroad in Chicago.

"These steps have greatly strengthened our terminal operations," Mr. Huff said. "Our terminals are all at near capacity at present with sound stocks of grain. Country elevators held by the Corporation are being transferred to local ownership as rapidly as possible. Relationships between Farmers National and the Farm Credit Administration are on a completely satisfactory basis, and excellent credit relations have been continued with the commercial banks. Our merchandizing turnover is the heaviest in history, and our percentage of market handlings is increasing. The future seems secure."

Chief speakers during the luncheon program were Earl C. Smith, president of the Illinois Agricultural Association who appeared for President E. A. O'Neal of the A. F. B. F., unable to attend because of illness; F. W. Peck, co-operative loan commissioner of the Farm Credit Administration; and Leroy Melton, Greenville, Illinois, president, National Farmers Equity Union.

Build Up Reserves

Build up your reserves as soon as you can, and maintain them. An organization that is consistently undernourished financially isn't any better prepared to meet the buffetings of fate than is the child who has been perennially undernourished from infancy. The necessity for adequate reserves was never greater, faced as we have been and are by depression, drouth, and unparalleled economic conditions.

Mr. Smith charged that the cry of "regimentation" came not from farmers but from opponents of farm surplus control legislation who sought to make the A. A. A. Act unpopular with farmers. Anyone who knows the sincerity of Secretary Wallace, Administrator Davis and their co-workers he said, knows that they would be the last men to force anything on farmers that was not desirable.

"The move to control farm surpluses and raise farm prices was first suggested by two industrialists—farm implement manufacturers—both of whom are now in prominent positions with the government," said Mr. Smith. "These men are George N. Peek and Hugh S. Johnson who, back in 1922, published a book on the subject while they were associated at Moline, Ill. These men saw the need for bringing farm prices up to a level with industrial prices.

"Many platform speakers who are attacking the A. A. A. Act have never read it," Mr. Smith continued. "Title one of this Act is a mandate to the Secretary of Agriculture to use one or more of several suggested ways, with the approval of the President, to restore certain basic farm commodities to parity price levels. All the principles of the old McNary-Haugen bill are in this Act. Authority is there for exporting farm surpluses at world prices and charging the loss against each unit of the commodity marketed. At present we are following the crop adjustment plan because that seems the only thing to do in view of widespread foreign embargoes and high tariffs against American farm products."

Mr. Peck warned that the biggest danger to co-operatives comes from within. There is no fear about continuation of this system if farmers want it and choose leaders who have the ability and sincere desire to make it succeed. "Attacks from private interests cannot hurt you," he said. "You can capitalize on them. The Farm Credit Administration has a different interest than some creditors. Where there are profits from debt it is desirable to keep people in debt. The Administration's chief interest is in getting you out of debt. Our motive is not to make profits but to serve."

The Fighting Spirit

Mr. Melton stated that farmers had been negligent in letting the marketing end of their business slip out of their control. "The fighting spirit," he asserted, "is necessary to co-operative marketing development. I hope it never dies."

Resolutions were adopted supporting the Agricultural Adjustment Act and commending its administrators, opposing imports of grain until it is shown that domestic supplies are inadequate, urging amendment of the grain futures act to redefine the rights of co-operatives on contract markets, recommending simplification and clarification of income tax laws as they apply to farm co-ops., and expressing satisfaction over the fine relationship existing between the Corporation and Farm Credit Administration.

THE MERCER COUNTY FARM BUREAU SOFT BALL TEAM WON THE COUNTY TOURNAMENT LAST July, and two weeks ago won the championship of the Aledo City League. Warren Hendricks, pitcher, has a record of 100 strikeouts in the last 10 games played. Left to right: Standing: Leslie Baldwin, Joe Moseley, Lewis Riddell, Lester J. Schroll, Glenn Millikan. Seated: H. Parkman, Gerald Baldwin, Mark Foster, Captain, Warren Hendricks, Clarence Runbom, J. E. Harris, ex-farm adviser and Morris Ketzle, also members of the team, are not in picture.

I. F. S. Annual Meeting, Decatur, Oct. 18th

Co-op Expert to Speak

The eighth annual meeting of Illinois Farm Supply Company will be held at the Orlando Hotel in Decatur Thursday, October 18. To it will come the officers, directors, and managers of the 58 affiliated County Service Companies to hear from F. E. Herndon and L. R. Marchant, president and manager of I. F. S. respectively, the story of the greatest year in the company's history.

The principal speaker will be F. W. Peck, Cooperative Bank Commissioner for the Farm Credit Administration, Washington, D. C. His subject will be "Efficient Business Procedure for Farm Cooperatives," which should interest everyone who is active in the development of the cooperative movement in this state.

During the session, nine directors for the ensuing year will be elected to the state company from the voting group assembled. The present directors are: Grant Broster, Grayville; J. M. Eyman, Warrensburg; Frank J. Flynn, Woodson; Fred E. Herndon, Macomb; H. A. Keele, Chesterfield; Harry Ebbert, Montrose; Thos. J. Penman, Yorkville; E. E. Stevenson, Streator; and Geo. F. Tullock, Rockford. There will be reports from the management on future plans of the company as well as a full discussion of all phases of Illinois Farm Supply Company operation during the year.

Boys And Girls Tune Up For Skilled Drivers Club

"Every barn lot a proving ground" seems to be the slogan of the more than 300 sons and daughters of Farm Bureau members in each of the 28 counties who have organized their Skilled Drivers Clubs sponsored by the safety division of the I. A. A.

If the space once reserved for farm implements be taken over by the family bus being put through turns, stops, starts and solemn measuring of slides and skids, let no parent be perplexed. If he finds himself becoming interested in the rules of safe driving being studied by his offspring, let it not be considered weakness. For school and highway officials, no less, have become interested in this wise Farm Bureau plan and are working for its success. Chambers of Commerce vote it a great idea. Insurance companies breathe easier for the younger generation and hint at lower insurance rates.

Plans perfected, the Skilled Drivers Club set forth during September to build a membership among Farm Bureau sons and daughters between 15 and 20 years old. To date 28 counties have organized. More are rapidly getting set up. During September each of the organized counties held at least two rousing meetings with big attendance, Livingston taking the honors with no less than 12 meetings.

They're a serious bunch—these youngsters—as they listen to lectures and study up for their driving exams which will entitle them to a badge of merit if they pass, signifying driving excellence and a thorough knowledge of the "rules of the road." A quick appraisal of the requirements has convinced them that it's going to take some real skill to win a badge. So the word's going around that it's an honest to gosh honor to belong to the Skilled Drivers Club and no foolin'. County Farm Bureau officers report a busy time of it handing out registration blanks and test questions to aspirants for the honor of belonging.

What's more, there's a chance that some youngster may win county honors and a cup—or district honors and a trip to the Annual Meeting of the I. A. A. at Quincy where the big, silver cup for statewide honors will be awarded.

So, there'll be plenty of practising in the barn lot this fall. And Farm Bureau members who ordinarily ride to town sitting on the edge of the seat as their heir takes the corners on two wheels will now sit back and relax with a Skilled Drivers Club member behind the wheel.

Dr. Geo. H. Locke, director of the San Joaquin county, California Farm Bureau spent a day recently in the I. A. A. offices getting tips on the set-up and services of the state and county organizations. "Your McLean County took the A. F. B. F. 'biggest county membership' cup away from us last year," said Dr. Locke, "but we're out to recapture it at the next meeting." Dr. Locke has missed only three of the monthly meetings of his County Farm Bureau board in 20 years. He also has attended an average of 10 Farm Bureau "center," or community meetings in his county or adjoining counties each month during this period. "Don't die until you have seen the wonders of California," is Dr. Locke's message to Illinois members.

The Illinois Agricultural Association RECORD

Number 11 NOVEMBER, 1934 Volume 12

How Candidates Stand on Vital Issues

Results of Questionnaires Presented to Candidates for Congress and the State Legislature in Illinois

IT is important for farmers to know how candidates for office stand on issues of chief interest to agriculture.

It has long been the policy of the Illinois Agricultural Association to determine the attitude of candidates regardless of party, and to present voting records wherever possible, on questions and issues in which farmers are vitally interested. Just now Illinois farmers are concerned as to whether candidates for Congress will vote to uphold and protect the Agricultural Adjustment Act. They want to know if such candidates, if elected, will vote to protect the Adjustment Act from unfriendly amendments and repeal.

There are at least two leading state issues in which farmers are interested, namely,

1. Amendment of the revenue article of the state constitution definitely limiting property taxes, and granting the General Assembly broad powers to tax other sources of revenue.

2. Legislation empowering and requiring each county to provide relief for its own destitute people before calling on state and federal aid. Stopping further diversion of gasoline taxes and using such revenues to put the unemployed to work building all-weather farm to market roads.

In meetings held in September 1,400 County Farm Bureau leaders unanimously authorized and directed that the I. A. A. prepare questionnaires for them to submit to candidates for Congress and for the state legislature on the issues outlined above.

In response to this demand the Association prepared questionnaires and its board of directors and County Farm Bureau presidents submitted the following statement and questionnaire to candidates for Congress from Illinois:

Statement on AAA

"The Agricultural Adjustment Act was enacted by Congress as the result of the organized effort of farmers covering a period of 12 years, to secure enabling legislation necessary to control surpluses of farm production, in order that reasonable price levels might be restored and maintained for basic farm crops. Much confusion seems to exist in the minds of citizens (including many candidates for public office) as to the merit of the provisions of the Agricultural Adjustment Act. Such confusion is largely the result of propaganda emanating from unfriendly sources.

"The Agricultural Adjustment Act merely provides a mandate of Congress upon the Secretary of Agriculture to use one of several ways, when approved by the President, to assist farmers in restoring and maintaining parity prices for named basic crops. To repeal this Act would be in effect saying that farmers were not entitled to such support and assistance of Government in securing and maintaining parity price levels for their products.

"The Farm Bureau movement of Illinois and the Nation worked to secure the preparation and enactment of this law. They are against unfriendly amendments and certainly unalterably opposed to its repeal. The Farm Bureau will use its influence as experience warrants to secure more simple, practical and effective administration of this law.

"As a candidate for Congress, your reply to the following question will be appreciated and you can be assured that your expressed position will be used only in such manner as is accorded all candidates for the office you are seeking:

QUESTION: If elected to Congress, will you support farmers in their efforts to protect the Agricultural Adjustment Act from unfriendly amendments and repeal?

The table presented herewith shows the response of the various candidates on this issue.

Vote for the Bond Issue

FOR YOUR OWN PROTECTION AGAINST A sharp increase in property taxes next year vote "YES" on the $30,000,000 bond issue in the election Tuesday, November 6.

Unless this bond issue carries, a tax of $30,000,000 will be spread on all INinois property in 1935 to pay for unemployment relief expenditures already made. If the bond issue passes the bonds will be retired out of gas tax revenues accruing to counties and municipalities which received funds from the Illinois Emergency Relief Commission. The state is authorized to withhold counties' and state's share of gas tax funds in proportion to the amount of relief funds allotted them.

While the I. A. A. opposed appropriations by the legislature which made this bond issue necessary, it now supports the bond issue because its adoption is the only way to avoid levying an additional $7,500,000 on farm property in 1935. VOTE "YES" ON THE SMALL BOND ISSUE BALLOT TO RELIEVE PROPERTY OF THIS INCREASED BURDEN. Failure to vote is the same as voting "NO."

Revenue Amendment

The gross injustice of the general property tax is generally admitted. Under the present state constitution more than one-half the people of Illinois able to pay taxes, and three-fourths of the net income of the entire population, are virtually exempted from taxes. They cannot be taxed equitably until the present revenue article is properly amended.

In the last 18 years Illinois voters have rejected four proposed changes in the revenue article. None of these proposals gave owners of real estate and tangible property any assurance of protection from confiscatory taxes. Therefore none won the general support even of property owners. It will be extremely difficult for any amendment of the revenue article to secure the votes necessary for approval. There must be some inducement offered to property owners to vote for it. For this reason the I. A. A. insists upon a constitutional limitation of general taxes upon any property, except for bonded indebtedness, to not more than one per cent of its fair cash value.

In line with this policy the following question was submitted to each candidate for the state legislature in the election on November 6:

Question: Will you, if elected to the General Assembly, work and vote for the submission of an amendment to the revenue article of the State Constitution, containing the following provisions?

1. **Limiting the taxes which may be levied on any tangible property, to one per cent of its fair cash value, except for present indebtedness and for new indebtedness voted by the people, including interest thereon.**
2. **Granting the General Assembly broad powers to tax by appropriate methods other sources of revenue either not now taxable at all, or easily evading taxation.**

Unemployment Relief

When the depression deepened and serious unemployment resulted therefrom, the Illinois Agricultural Association recognized the necessity of providing public funds for the temporary relief of destitute people. From the beginning, however, it questioned the methods of providing and administering such public funds. It has insisted that the continuance of such methods would inevitably result in waste of funds and what is infinitely worse, a permanent dole system in Illinois with all its attending evils.

The Illinois Agricultural Association believes that it is first the duty of every community and county to assume responsibility for its worthy unemployed. The present system of relief is increasingly robbing recipients of their self-respect. More and more it is relieving people able to work of any desire or incentive to work.

Local respo sibilities and interest cannot be secured by use of National and State funds unless the local communities and municipalities are first required to provide relief to the limit of their ability. They cannot be secured by using the process of deferred taxes in the form of state bond issues or by diverting gasoline taxes from their proper use in road and street improvement. Such diversions only increase unemployment and the demands for relief for which they are made.

In the opinion of the Illinois Agricultural Association the time has come for the state to restore and to require local responsibility for relief.

Believing extremely important that Illinois farmers know the attitude of candidates on these questions, the Association, through its board of directors and County Farm Bureau presidents, prepared and submitted the following questions:

If elected to the General Assembly, will you:

1. **Work and vote FOR legislation empowering and requiring every county, or the townships or other municipalities therein, to do their full part in equitably providing revenue for their own relief needs before they are entitled to aid by the state, and requiring each relief taxing unit to administer such funds?**
2. **Work and vote AGAINST any legislation further diverting gasoline taxes for relief or any other purposes, and protect such taxes for their intended use in improving the highways and streets, thereby providing large amounts for greatly needed employment.**

Leaders in the Farm Bureau movement made every reasonable effort to present these questions to every candidate.

The accompanying table presents the results of this effort.

Replies of Candidates to State Legislative Questionnaire

IF ELECTED TO THE LEGISLATURE WILL YOU WORK AND VOTE

	For a Revenue Amendment		For legislation requiring proper taxing units to provide equitable revenue for relief before receiving State Aid	Against any legislation diverting gasoline taxes from roads and streets
	Limiting taxes on tangible property to not over 1% of actual value	Granting power to tax other sources of revenue

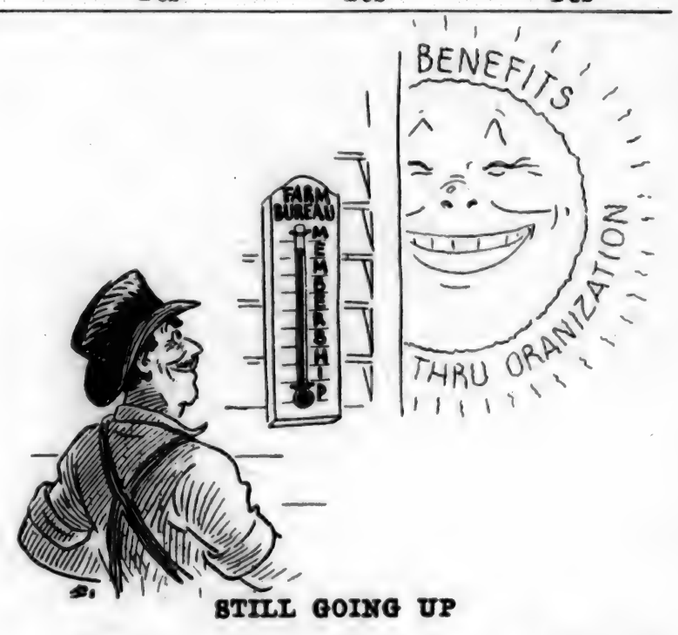
Whiteside Leads in Sign-up

Whiteside county is leading the state in the Farm Bureau membership campaign launched during "Decision Week," Oct. 8-13.

By October 17 Whiteside had signed 204 new members to bring the total membership up to 1,112, the highest in at least eight years. "I think that another hundred will join the Farm Bureau before the end of the year," reports F. H. Shuman, farm adviser.

"The results of the drive, in my opinion," he says, "came as a result of: (1.) Selecting large number of workers. (2.) Training and giving information to these workers at local and county-wide meetings. All workers attended at least two meetings and some three or four. (3.) During the two-day drive the county, district and township leaders checked their men as to the results secured each day. (4.) Bringing all solicitors to one mass meeting and establishing goals for each township. (5.) Limiting the drive to two days.

"I think it is a mistake to ask volunteer men to give more time than that. Whenever you get more than 50 per cent of the farmers in the county as members, it is easier to sign new ones. I like the organization director plan and think it fits the needs of Whiteside county in organization work. A full-time director who will select, train, and check volunteer leaders is much more valuable than the system we followed in the past."



Lowell S. Johnson is organization director in Whiteside county. He and Mr. Shuman, in co-operation with the board of directors, selected one man for every three townships. Guy Gridley had charge of Fulton, Ustick and Union Grove; Russell Mathew—Clyde, Mt. Pleasant and Hopkins townships; O. C. Beatty—Genesee, Jordan, and Sterling townships; Walter Condon — Hume, Montmorency, Coloma and Hahnaman; Frank Moews—Portland, Prophetstown and Tampico; Roy Thorpe—Erie, Fenton and Lyndon townships; and Charles Vogt—Garden Plain, Newton and Albany townships.

Genesee township led with 25 new members, Prophetstown 18, Union Grove 18, Newton 13, Jordan 12, Sterling 11, Hopkins and Lyndon 10 each, etc. Don Zuidema and John Arians of Union Grove township, both volunteer solicitors, signed 7 out of 8 prospects the first day, Shuman said.

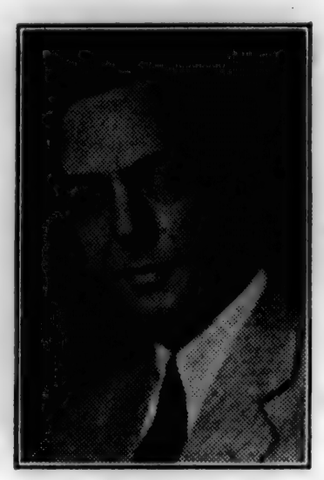
David R. Reynolds of Morgan county reports 23 new members signed up to Oct. 18 and 104 reinstated. "Work still going strong," he writes. "We expect 100 more in near future." Sangamon county is in the midst of a membership campaign. Farm Adviser Ed Bay and the Sangamon County Farm Bureau are getting good support from the Springfield papers. Read their Editorials on Page 9.

Incomplete reports from many other counties showed membership work in progress. Clay Agee, organization director in Pike county, reported that dues are being paid and new members signing up. The drive is to be continued until October 23, the day of the annual Farm Bureau meeting.

In Iroquois county L. E. Kirkton reported eight new members signed and considerable delinquent dues collected. Edgar county has been steadily adding new members, reports county organization director Zeis Gumm. An advertisement was inserted in the Paris Beacon-News playing up the radio address from station WENR delivered by President Earl C. Smith. Edgar county was scheduled to concentrate its membership campaign the week beginning Oct. 22.

STILL GOING UP

C. P. Boggess of Madison and Bond counties reported 25 to 30 members signed. Randolph county was planning its membership campaign for Oct. 26 and 27. E. F. Coll, organization director in Henry county, wrote 11 new members himself. Eighty attended the meeting of chairman and district workers. "Our county will be slow but we are determined to make our quota," writes Coll.



From all sections of Illinois came reports that farmers were busy putting up late planted soybean hay during the ideal weather the first half of October. Corn-hog referendum meetings and distribution of benefit payments kept farm advisers and officials of county corn-hog associations on their toes during this period. Membership work will be carried on throughout the fall in most counties as organization committees with township and school district chairmen are completed.

The Key to National Recovery

By Earl C. Smith, President, Illinois Agricultural Association

Excerpts from 30-minute address over Station WENR, Chicago, October 11

AS EARLY as 1922, some of the best farm and business thinkers in America recognized the necessity for full and effective control of surplus production of farm crops. They definitely predicted that if failure to find ways and means of this control was encountered, the net result of such failure would ultimately undermine every major business structure in America. Their predictions were scoffed at. People generally then, and even yet some few, fail to recognize what is meant by the term "agricultural surpluses."

EARL C. SMITH

I, of course, recognize that with millions of American citizens lacking proper food, it is difficult for one not having full information to understand what is meant by the term "farm surplus". . . .

World War Cause

Agricultural surpluses, the basic cause of low farm prices, resulted from the World War. Every adult of those unfortunate years will certainly remember the three great appeals then made by President Wilson. The first one was to the mothers of America to give of the flower of the young manhood of the American home—American boys. It was said they were necessary to win the war and save the world for democracy.

The second appeal was to the industries of America to run night and day manufacturing the munitions of war. They were given government assurance of profits above cost of production, whatever those costs might be.

The third appeal was to the American farmer. He was called upon to raise all possible food supplies. He was told that food was a first essential to win the war. The American farmer was told that it was his duty not only to feed American armies in Europe, but to provide food necessary to assist in feeding the allied armies. The mothers responded, industry responded and the American farmer responded. Forty million acres were added to the cultivated acres of the United States. The close of the war found America with this vast increase in its cultivated areas. We had become a creditor nation instead of a debtor nation, as a result of the World War. This, in itself, placed limitations upon the export outlets for American farm products and these exports have continually declined. . . .

As a result of the first year's administration of the Agricultural Adjustment Act, the outlook confronting corn-hog farmers, particularly, is much different than that of a year ago. We do not have surpluses confronting us, therefore, the problem is comparatively simple.

Through licensing distributors under the act, dairy prices are improving; wheat is much higher.

The Question

The paramount question now is: **Will farmers strengthen their organization, which is necessary for continuing and permanent improvement of farm conditions?** I am convinced that if we do not continue a program of reasonable and practical planning of our production of wheat, corn and hogs as well as other grain crops, we will soon again find ourselves faced with cheap corn, lower wheat prices and later a further breakdown of livestock prices.

If grain production is kept within reasonable limits livestock, and to a degree dairy prices, will take care of themselves. Let corn acreage run wild and with average weather the old cycle of cheap corn, and, in a year or two, cheap hogs and cattle will return.

We must, therefore, hold fast to the gains we have made. We must fight to retain, so long as they are needed, the principles of the Agricultural Adjustment Act, if agriculture is to regain and hold a fair share of the national income. **So long as we have a regimented price structure throughout industry, transportation and the professions, agriculture has no other choice if it is to avoid poverty, than to maintain a comparable price structure for farm products through controlled production.**

The Solution

In effective farm organization lies the assurance of continuing these policies. In such organization, farmers are offered their best guarantee that the administration of these policies of government will continue under the direction of men who throughout the years have been leaders in the fight to secure equality of opportunity for farm people.

We will succeed to the extent that we are organized. I, therefore, request and urge every Farm Bureau member to make it his or her business to secure an additional participating Farm Bureau member within the next few days which are dedicated to the purpose of strengthening the power and the influence of their organization. I do not ask this contribution of service merely for the sake of organization, but because in and through organization lies the greatest opportunity for securing and protecting the welfare of farm people and because the return of farm prosperity is the key to national recovery.

Huff Speaks At Tuscola

C. E. Huff, president of Farmers National Grain Corporation, described the Agricultural Adjustment program as an emergency measure from which there was no alternative, in an address to 500 people in Tuscola, Douglas county, September 27. The occasion was the annual meeting of the Tuscola Cooperative Grain Company. The business session was held in the afternoon and the larger evening meeting at the high school.

"I have no use," said Mr. Huff, "for an economy of scarcity as a means for economic betterment. Lessening production does not raise the standard of living, but agriculture had no alternative. Farmers were faced with a condition, not a theory. We are doing only what has been done in all forms of industry in recent years in an attempt to get a reasonable return for farm products.

"The difficulty in American agriculture," he continued, "was not rooted in agriculture itself, but in the economic and social viewpoint surrounding it. A line had been drawn between agriculture and industry which tended to produce a lower living standard for the farmer than for the rest of society.

"The Agricultural Adjustment Administration is in the hands of honest, earnest men who have been too long with you in your fight for equality to betray or to stray far away from your own thoughts. You have heard the first scattered shots of a barrage to be fired against these men. They will carry heartaches all their lives if you turn against them now."

At the business session the officers and Manager Clark Fullerton reported a very profitable year in volume handled and net earnings. Auditor Riddle of the Illinois Agricultural Auditing Service reported a net profit for the year of $7,460.39. Representatives of the Cooperative Bank of St. Louis, Treasurer Kunz and Secretary Hayes of the Tuscola Co-operative gave helpful talks. J. Fred Romine continues as president.

Forty people from Parke county, Indiana, were present with their "Haymakers Quartet" which won the prize at the Indiana State Fair this year.

Mr. Huff was introduced by G. C. Johnstone, president of Illinois Grain Corporation.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interest of the farmers of Illinois and the nation, and to develop agriculture.

George Thiem, Editor
John Tracy, Assistant

Vote Tuesday Nov. 6

IF YOU don't do anything else on Tuesday, Nov. 6, go to the polls and vote. In this and the October issue of the RECORD information about candidates is presented that will help you cast your ballot intelligently. Agriculture is the basic industry of the land. If it prospers the nation prospers. Therefore farmers will serve their country as well as themselves best by electing able men and women to the legislature and congress regardless of party, who will fight to achieve, protect and preserve farm welfare.

State and national issues of vital importance to farmers are outlined in the article beginning on Page 3. A state-wide effort was made to secure expressions of candidates on these questions. The results of this survey are presented on the preceding pages. Study this information before you go to the polls. Vote for those candidates who will most truly represent you.

Build 'Em Stronger

CROP adjustment to raise farm prices must not minimize the importance of reducing the cost of distribution. The high cost of getting farm products to the consumer is an evil which narrows the farmers' market. While adjusting production through county control associations, let's continue building our co-operative marketing institutions stronger. They offer the only assurance of cutting the producer-consumer price spread.

In England, British farmers, too, are controlling production so as to raise prices. The Countryman, English farm journal, warns that "the danger to agriculture comes if restriction is regarded as the only method of improving the farmers' position; the most urgent need in our planning is to get the food to the consumers at prices commensurate with those received by the producers, and representative of the potential supplies. For restriction is cumulative in its effect; the dearer milk and bacon become, the more are the poorer families driven to support life on cheap foods like bread and porridge. . . . so our planning for agriculture will be ineffective if it does not extend to the methods of distribution, and it is in this direction that our most earnest thinking should be turned."

Work Ahead

IN A DEMOCRACY such as the United States, economic and political policies of government are responsive to popular sentiment. The man in public life keeps his ear to the ground. If he persists in going contrary to the will of the voting majority he doesn't stay in public life very long.

For this reason there is a never-ending effort by organized groups and interests to mould public opinion behind policies which are especially advantageous to them and their constituents.

Pulling the wool over the eyes of the other fellow has been a great national pastime. Industrialists and their satellites with private axes to grind, for example, told farmers for years that a high protective tariff is an unmixed blessing to them; that the tariff promotes home industry, provides jobs, and enables workmen to buy farmers' products. That argument finally became recognized as a half truth. Farmers who did their own thinking saw the other side of the picture; that the tariff increases the cost of many things they must buy, cuts off international trade, and so deprives the farmer of foreign outlets for his produce.

Discerning the wide gap between farm and industrial prices following the war, organized farmers demanded that agriculture, too, be brought within the protective system by removing price-depressing surpluses from the domestic market. Andrew Mellon's reply was that this would increase the price of food in the cities. So the plea of agriculture, embodied in the McNary-Haugen and other bills, was denied.

Finally the Agricultural Adjustment Act was conceived as another way to accomplish the object of the McNary-Haugen legislation. While only 15 months old, it seems to be working. The best evidence of its effectiveness is the campaign of opposition largely directed by the same interests which fought previous efforts of farmers to gain equal privileges. The processing tax, which might just as well be called the equalization fee, is being assailed. Why? Because it is operating to bring the farmer within the American system of controlled production and controlled prices; because it is raising the price of food, and reducing the volume of farm products and the commissions of those who handle them.

So farmers are being told that the processing tax is bad for them, just as they were told in the '20's that the protective tariff is their salvation and guarantee of a market for their produce.

There's plenty of work ahead if farmers are to continue the helpful policies they fought so long to attain.

The necessity for being alert and prepared to speak out with the powerful voice of organized numbers is recognized by the Secretary of Agriculture in his recent book, "New Frontiers."

> "It is to be expected that strong efforts will be made to get rid of the processing taxes by every Congress from now on," writes Mr. Wallace. "I trust that the farmers fully

realize the great import of the processing tax as part of this Administration's effort to give unprotected and unorganized groups a fairer share of the national income. For the first time in our history we have created a mechanism, the AAA, which gives six million individual farmers a concerted voice, and bargaining power. . . .

"I would not mind seeing the processing tax and acreage control abolished in 1936 if we have something better to take its place. But, unless we have built up greatly increased foreign purchasing power by reducing tariffs, or unless we start loaning money outside the United States to enable foreign nations to buy our surplus, I am afraid that dropping the processing tax and acreage control in 1936 would result, with the ordinary run of weather, in a repetition within a few years of the 1932 situation."

Good News

IT IS GOOD to know that the International Livestock Exposition's new home will be ready for the 1934 show which opens December 1. Manager Heide reports that many entries have been received and all indications point to a splendid stock show. This annual exhibition of the best blooded livestock and grains produced in the United States and Canada is an inspiration to the thousands of 4-H club boys and girls as well as the older folks who attend. The exhibits of the U. S. Department of Agriculture and the state agricultural colleges promote better farming and appreciation of the best things in farm life. It will pay anyone who is interested in more efficient farming and livestock production to attend the stock show.

He Buys Cooperative

WE KNOW a farmer who used to be a member of a labor union. He believes labor unions have raised the status of labor, and he still supports them. When he buys smoking tobacco he makes sure it is a brand that bears the union label. When he began farming, he found it an easy step to affiliate with his County Farm Bureau and the local cooperatives. He believes that his farm organization and the cooperatives have done as much for agriculture as organization has done for wage-earners. He supports not alone the cooperatives of which he is a member, but he supports as well the other cooperatives by buying their products in preference to all other products.

He is assured of high-quality when he buys cooperative, since it is only natural that farmers should be interested, more than anyone else, in furnishing through their organizations, the quality and quantity of goods that consumers want, in the form and volume wanted.

When he markets his grain he does so through his local farmers' elevator, the Illinois Grain Corporation and the Farmers' National Grain Corporation. When he wants supplies for use in his farming operations, he buys through the purchasing cooperatives, which furnish oil, gas, seeds, serum to vaccinate his pigs, and a long list of other commodities. His insurance is carried in the sound companies established by his state and county organizations.

It is not a matter of sentiment alone which prompts this grower to buy cooperative. He finds that, quality and other things considered, he is ahead financially in the long run.

Other Opinions

Join the Farm Bureau

IF ANYTHING has been demonstrated during the long years of fighting for higher farm prices and a square deal for farmers generally, it is that strong, active farm organizations, with able leadership, are necessary to farm progress. The outstanding farm organizations of the Middle West both in numbers and accomplishments, are the farm bureaus. Through their state organizations and the American Farm Bureau Federation they are responsible for a large share of the gains that have been made on the farm front. The farm bureau has accomplished much; it can accomplish much more if more farmers unite their strength with it.—**Prairie Farmer.**

Farm Bureau Seeks Members

THAT so useful an organization as the Sangamon County Farm Bureau is making an appeal for more members, commands special attention during this period when the economics of agriculture are so closely related to our entire economic structure.

The policies and activities of the Sangamon County Farm Bureau and the Illinois Agricultural Association are worthy of the support of every progressive farmer, whether he is owner or tenant.

Illinois farmers may well consider themselves fortunate in having such strong organizations, officered so ably, to champion the cause of agricultural development.

The Farm Bureau organization has long been one of the most outstanding agencies in the state for useful services. The accomplishments credited to this organization cover a broad field, including property tax reduction, honest and able legislative representation, the 4-H Club work for boys and girls, educational work in efficient production, organization and development of cooperative enterprises—all for the benefit not only of the farm people of our communities but ultimately for the benefit of the entire commonwealth.

The accomplishments of the Farm Bureau organization should be, and no doubt are, a source of pride to the thousands of loyal members who have made the organization what it is in this county and in this state during the past trying months and years.

Having accomplished much and achieved a most commendable record, the Farm Bureau can, and will, accomplish more if farmers and farm owners not now affiliated with the organization become members and place the strength of their influence in support of its program of progress.—**Illinois State Register, Springfield.**

Farm Bureau's Campaign

THE FARM BUREAU is conducting a campaign for increased membership. Its argument has been repeated frequently, and is familiar to all farmers—the strength inherent in union of purpose and effort. Then, too, there is a record of achievement to which the Farm Bureau refers, with the statement that it can accomplish much more if farmers will become actively identified with it.

In this connection, friends of the organization can find a new argument for their case in a news story from Washington which but recently appeared. This story said that Washington officials are to rely, more and more, on local agricultural units for aid in carrying out agricultural administration policies. Politicians at the capital do not relish the load and want to be rid of the responsibility. Manifestly, it will be to the interest of farmers to strengthen their local associations.—**Illinois State Journal, Springfield.**

Prices to alfalfa seed growers in important districts about the middle of September averaged $15.75 per 100 pounds clean seed compared with $8.85 last year, $7.10 in '32 and $17 in '29. Sweet clover seed offers were $5 per cwt. clean seed compared with $3.25 last year.

Illinois, one of 16 states on the modified accredited list, tested 133,864 cattle for tuberculosis during August of which 608 reacted. More than 2,000,000 cattle are under supervision in 241,409 Illinois herds.

Observations

The amazing progress and success of co-operative buying and handling of petroleum products by Illinois farmers is emphasized again in the annual report of Illinois Farm Supply Co.

One County Farm Bureau after another has organized to distribute gasoline, oil and other farm supplies until today 58 county companies operating in 90 counties are associated in this extremely worth-while project. Like other co-operative enterprises which preceded it, the co-operative oil company is definitely narrowing price spreads and lowering the cost of quality products to members through patronage dividends.

The county service companies have had at least three favorable conditions making for their success. First is the rather wide margin between large volume wholesale prices, and retail prices. This margin has been fairly well stabilized by a few dominant petroleum companies. Second, the good will, power and confidence created by the Farm Bureau movement in this state which quickly provided a market for a substantial volume of products. Third, the profit-sharing or co-operative principle evidenced by a steady flow of patronage dividends back to Farm Bureau member customers.

The importance of good management and aggressive salesmanship goes without saying. This is clearly indicated by the rather wide differences in volume of business and earnings between companies operating in adjacent territory.

As the co-operative oil business grows in volume, it cuts more and more into the business of private companies. Naturally this is irritating. Sooner or later there will be retaliation, price cutting and narrowing of margins. That time is fast approaching, if it is not already here. Attempts will be made to entice farmers away from their own co-operative companies by attractive price offers, generally for inferior quality products.

This sort of thing has happened in every case where organized farmers have attempted to remedy a wrong, stop price gouging, or improve their economic condition. Why should we expect anything different in the oil business?

If and when this happens, and competitors out after the scalps of the co-operatives slash their prices, let's not forget how they got that way. Intelligent farmers will take the long view and stay with their own companies. Just as well-managed co-operative creameries raise the general level of butterfat prices in the districts where they operate, so do co-operative oil companies serve to protect farmer patrons on the cost and quality of petroleum products. E. G. T.

STANDING BY HIM

Corn Loan Helped Neighbors in LaSalle

"One of my neighbors had between 4,000 and 5,000 bushels of corn last fall," says Archie McPhedron of Oglesby, president of the Mississippi Valley Milk Producers. "He told me not long ago that if it had not been for the corn loan program sponsored by the I. A. A. he would have sold his corn for around 31 or 32 cents per bushel to meet payments he had to make. When the corn loan offer came he got a loan of 45 cents a bushel and held his crop. As a result he finally sold for a much higher price.

"Without a working organization of farmers neither the corn loan nor any of the other price-raising plans would have been possible," says Mr. McPhedron.

A Hoax

The mysterious farmer who is supposed to have received $1,000 in the corn-hog program when the most he ever received previously from the sale of hogs was $400 in one year, is a "preposterous hoax," according to Secretary Henry A. Wallace.

"This story which has been going the rounds is coming to be one of the most familiar ghosts of the recovery program," he said.

Most Counties Receive Corn-Hog Payments

More than eight million dollars in corn-hog benefit payment checks had been distributed to Illinois contract signers by the second week in October.

As we go to press nearly every county in the state has received all or at least a substantial part of the first corn-hog benefit payment which is two-fifths of the payment on hog allotments and one-half on corn acreage reduction.

Illinois contract signers will receive between $35,000,000 and $40,000,000 when payments are completed in 1935. The second payment is scheduled to be made some time after the middle of November, and the third after the middle of February.

A total of $352,000,000 in rental and benefit payments were disbursed up to October 5 to co-operating farmers by the AAA.

ADVERTISEMENTS

Report of Annual Farm Supply Meeting

Approximately 700 Hear Speakers and Details of Year's Operation

"The growth of Illinois Farm Supply Company and our 58 County Companies reads like romance," said F. E. Herndon, president, in his address to 700 officers, directors, managers and salesmen who attended the eighth annual meeting of the company at Decatur, Thursday, October 18.

Background for his statement was the nearly 50 million gallons of petroleum products distributed by the 58 affiliated companies to more than 75,000 farmer patrons during 1934, 19.2 per cent greater than 1933. Soyoil Paint sales also increased 73.53 per cent to 87,638 gallons. Automobile tire and tube sales jumped 33 1/3 per cent to $170,000. Fly Spray and Killer sales increased 3.63 per cent to 33,723 gallons.

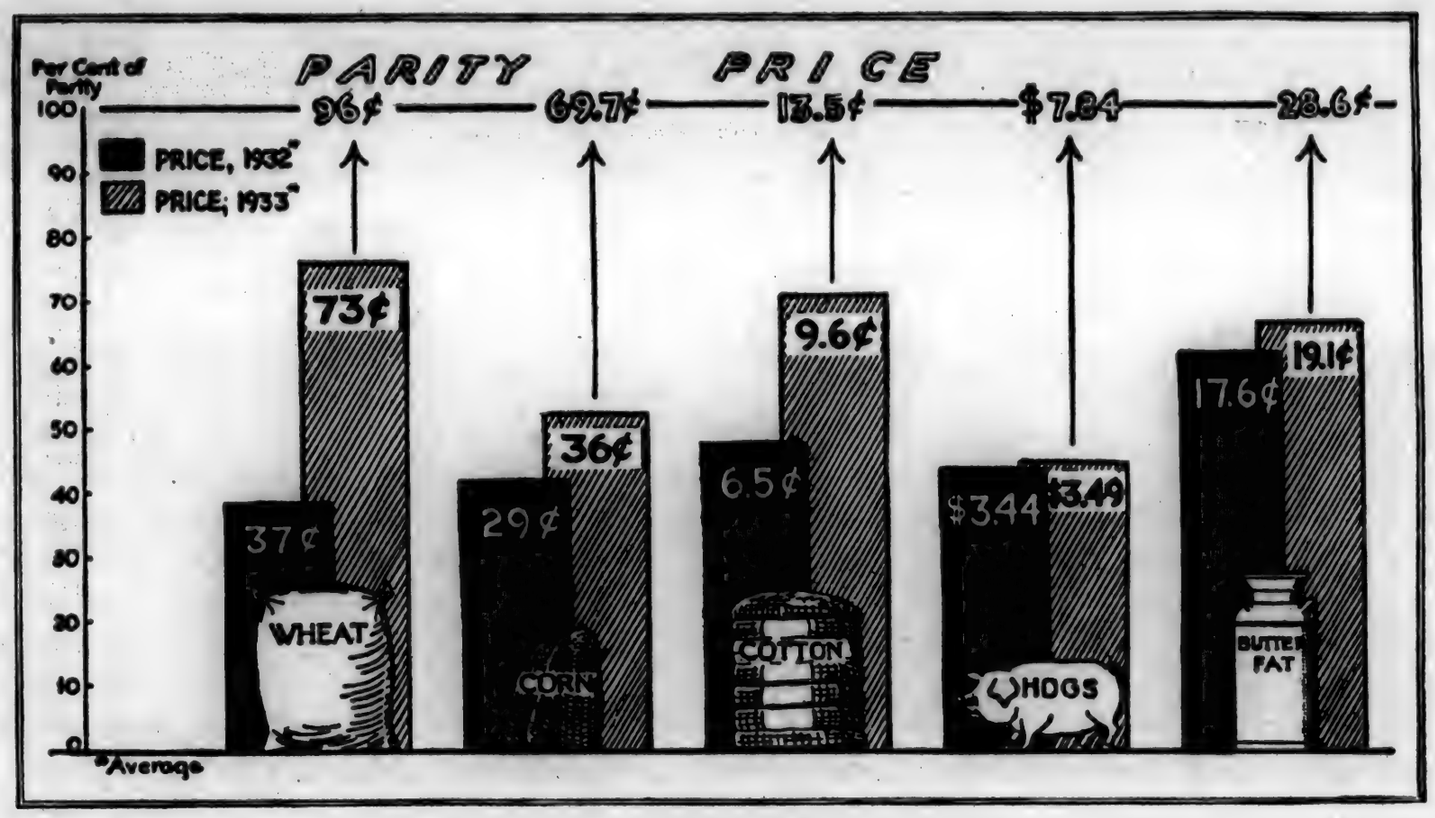
F. E. HERNDON

Mr. Herndon paid tribute to the personnel of the organization in pointing out that "the ability of the men in charge, the boards of directors, the managers and salesmen are reflected in the rapid strides made by our company during the last year. I have no hesitancy in placing the personnel and accomplishments of Illinois Farm Supply Company and its member companies alongside similar co-op organizations in the U. S." He closed his address with a warning that "to achieve $1,000,000 in patronage dividends by 1940, it is necessary to lend unqualified aid and support to the Farm Bureau organization in its quest for new members."

F. W. Peck, Co-operative Bank Commissioner from Washington, spoke on "Efficient Business Procedure for Farm Co-operative." Following his introduction by President Earl Smith of the I. A. A., who reported that the legality of the Illinois Farm Supply setup had been passed upon by the Farm Credit Administration, thus establishing a safeguard for the future of the co-operative movement in Illinois, Mr. Peck said, "The co-operative movement can be appraised from three points of view. First, its idealism—that is, the various appeals used in organizing various co-ops. Second, its realism—the results of applying principles and theories into practice. Third, corrective measures essential to the progress and advancement of the movement."

The elimination of selfishness, centralization of management, building of understanding among patrons that they own and control their co-op, and the setting up of business-like organizations, properly financed and managed, are all essential for greater progress.

Explaining the Co-operative Banks, and their functions, Peck pointed out that there is no desire by the F. C. A. to regiment, dictate, or in any way shackle agriculture through a credit set up. "Rather," he said, "the Credit Act of 1933 is designed to create credit suited to the needs of agriculture at the lowest possible cost. The objective of the system is debt reduction and amortization rather than debt continuation."



David M. Hardy, president of the St. Louis Bank for Co-operatives, also spoke briefly on the functions of his institution.

Marchant Gives Report

With graphs and charts, L. R. Marchant, manager of Illinois Farm Supply Company, illustrated the sensational growth of co-operative purchasing of essential farm supplies from 1927 through 1934. Read the story on page 19.

Following the reports, two new members were elected to the board of directors of I. F. S.—L. A. Abbott of Whiteside county, and G. W. Clark of Pope county. Those remaining from last year's board include J. M. Eyman, Macon Co.; Harry Ebbert, Effingham Co.; Frank J. Flynn, Morgan Co.; Fred Herndon, McDonough Co.; E. E. Stevenson, LaSalle Co.; Thos. J. Penman, Kendall Co.

During the day, other speakers on the program were Donald Kirkpatrick, legal counsel of the Illinois Agricultural Association, E. J. Fricke, Indiana Farm Bureau Co-operative Association, and R. A. Cowles, I. F. S. treasurer who read the report on the financial status of the company.

ADVANCE IN FARM PRICES—'32 - '33

This chart shows the farm price advance during 1933—the first year of the crop adjustment plan. Wheat and cotton both show the largest gains because the acreage devoted to these crops was substantially reduced last year. An up-to-date chart would show corn at approximate parity price level (78 cents). Hog prices, likewise, including the processing tax which comes back to the farmer, approach parity. Cattle have benefited by the hog reduction program as also have sheep. All grains have been aided by crop acreage reduction and drouth during the current season. 1934 parity prices are somewhat higher than those shown in the chart above because the prices of non-agricultural commodities have advanced also during the past year.

Organization Set-Up In Ogle and Stephenson Counties

By R. J. Hamilton, County Organization Director

THE boards of Ogle and Stephenson County Farm Bureaus hold certain beliefs. They believe that education and information are the first essentials in developing an active growing organization. They believe furthermore that permanent growth and profitable activity depends upon the masses being active in the projects of the Farm Bureau. They believe in smaller units than the township being used to carry out the information work to be done.

R. J. HAMILTON

Based on the above beliefs, these counties have adopted a school district unit for organization purposes. They have not destroyed the township organization, but rather supplemented it. In Ogle County we have an organization chairman. The county is divided into seven sections. The county chairman has selected an organization leader for each section. These leaders with the chairman constitute the County Organization Committee. Every organization move in the county is adopted and approved by them. These sectional leaders are known as Colonels in our military set-up. Each section comprises from three to five townships. The Colonel selects in each township a leader known as a Major. The Major in turn selects a Captain in each school district. In the larger school districts he has a helper. In each school district the Captain selects a tax man, an insurance man, an oil man, and a marketing man. In this manner every member has something to contribute besides his $15. This activity creates organization consciousness.

Of course, we don't have a complete set-up in every school district. In some districts we don't have any members. The interesting thing, however, is that when a non-member is asked to carry on for that district he often accepts and makes one of the best members.

With this set-up we can reach every farmer in the county by personal contact in a very short time if necessary.

Educational meetings are held by the county under the General, who is county chairman. Sectional meetings are held by the Colonel. Township meetings are held by the Major in his own township. School district meetings are held by the Captain.

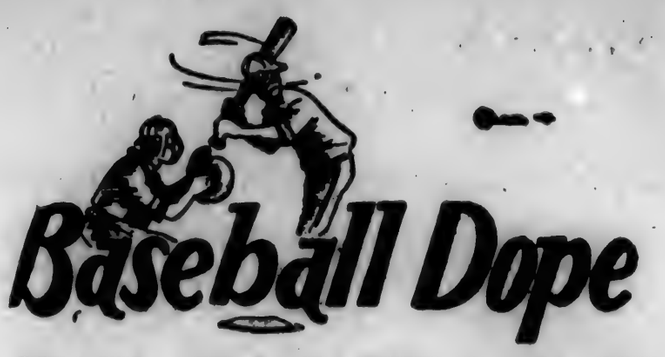
The members like this set-up because it brings the Farm Bureau closer to the farm.

When we put on a drive for members, we no longer go down the road in a house to house canvass but each Captain selects his prospect and goes after just one member. Ogle county has 188 school districts. After our drive we resume a series of educational meetings and prepare other prospects.

The AAA, our legislative work, taxation, marketing, insurance, and oil are among the things which interest our members and provide community meeting topics.

Fits Into Our Plan

By D. E. Warren, Farm Adviser Ogle County



The educational type of organization program that we are using in Ogle County under Mr. Hamilton's direction fits very nicely into our plan of community unit work in which we are endeavoring to get all township community units organized for holding regular meetings. I feel that with the many duties the farm adviser now has, that the community meetings must to considerable extent take the place of farm visits in making contacts between the county office and the individual member.

The discussions at community meetings help to correlate the extension projects with the organization projects and give the member a rather complete picture of the Farm Bureau Program.

Engle Succeeds Milnor To Farmers National Post

Bill Engle, assistant general manager, will succeed George S. Milnor as general manager of the Farmers National Grain Corporation. Mr. Milnor resigned recently to resume his connection with the Sparks Milling Company at Alton, Illinois.

Engle is an old seasoned grain man who knows all the ropes. He has been in charge of grain operations, hedging transactions, and co-ordination of the branch offices for several years.

Macomb, Oct. 13: Will county won the state championship of the Illinois Farm Bureau Baseball League here today by blasting out an easy 13 to 4 victory over the 1932 champions from McDonough county. More than 3,000 fans saw McDonough county drop their second straight game to the new champions.

"Lefty" Schuldt had the McDonough county sluggers standing on their heads and held them to five hits, three allowed in the last of the ninth. He fanned 10 batters.

George Bradford started on the mound for McDonough, but errors soon put him in the hole and he turned the pitching over to his older brother, Jesse, in the third inning. The two allowed 10 hits and they fanned eight.

Manager Boots Runkle had an off-day at shortstop. He booted two successive drives and then threw wide to first base in the second which contributed to sending four runs across the plate for Will county.

Showman Welch, left fielder, normally a heavy hitter, failed to connect. The Bradfords got three of the five hits.

Will county bunched a triple, two doubles and a single with another error for three more runs in the third. McDonough's first run came in the fourth inning when Welch was hit with a pitched ball. He stole second and when the throw to catch him at second went wild he raced on home.

Either Schuldt weakened or the McDonough batsmen suddenly came to life in the last of the ninth for they pounded the Will county hurler for three hits and as many runs in that inning.

The largest crowd at a baseball game this season saw the contest. McDonough won 10 and lost three games in the League this season. Will county was runner-up against Sangamon, state title winners last year.

The silver trophy awarded annually to the state championship Farm Bureau baseball team by the I. A. A. will be presented at a banquet to be arranged later.

Frankfort, Oct. 6:—Will county won the first game of the state championship series with McDonough here today by driving in a run in the last of the tenth inning. It was a bright but windy day. Behind the effective pitching of Lefty Schuldt, the Will county boys held the hard hitting McDonough team to three

Packers Pay $100,000,000 More for Hogs

Administrator Chester C. Davis Speaks To Northern Illinois Farmers at LaSalle

THE best evidence that the corn-hog program has gone far toward restoring farm buying power in the corn belt is that during the eight months, Jan. 1 to Sept. 1, 1934, meat packers paid $100,000,000 more for 12 per cent less hogs processed in federal inspected plants than they paid during the same eight months of 1933.

This striking evidence of the effectiveness of the crop adjustment program was disclosed by Chester C. Davis, administrator of the Agricultural Adjustment Act, in an address to nearly 1,000 farmers in the LaSalle-Peru high school auditorium Saturday, Oct. 13.

During the first eight months of 1933 when there was no corn-hog program, federal inspected plants processed 7,490,000,000 pounds of live hogs which cost the packers $286,000,000, Mr. Davis said.

During the first eight months of 1934 with the corn-hog program underway, the same packers processed 6,588,000,000 pounds of hogs—12 per cent less than the year before—which cost them $386,000,000, including the processing tax. In other words 12 per cent less hogs cost the packers 35 per cent more.

The Processing Tax

"The processing tax is being paid to co-operating corn-hog farmers and not to the man who in every co-operative effort in the past has taken a free ride and even dragged his heels," said Mr. Davis.

Constrasting the rise in returns to the hog farmer compared with the situation in beef cattle, Mr. Davis pointed out that packers paid only 25 per cent more money for 16 per cent more cattle slaughtered in the first eight months of 1934 compared with payments made in the same period of 1933. "And cattle men have benefited by the hog control program," he said.

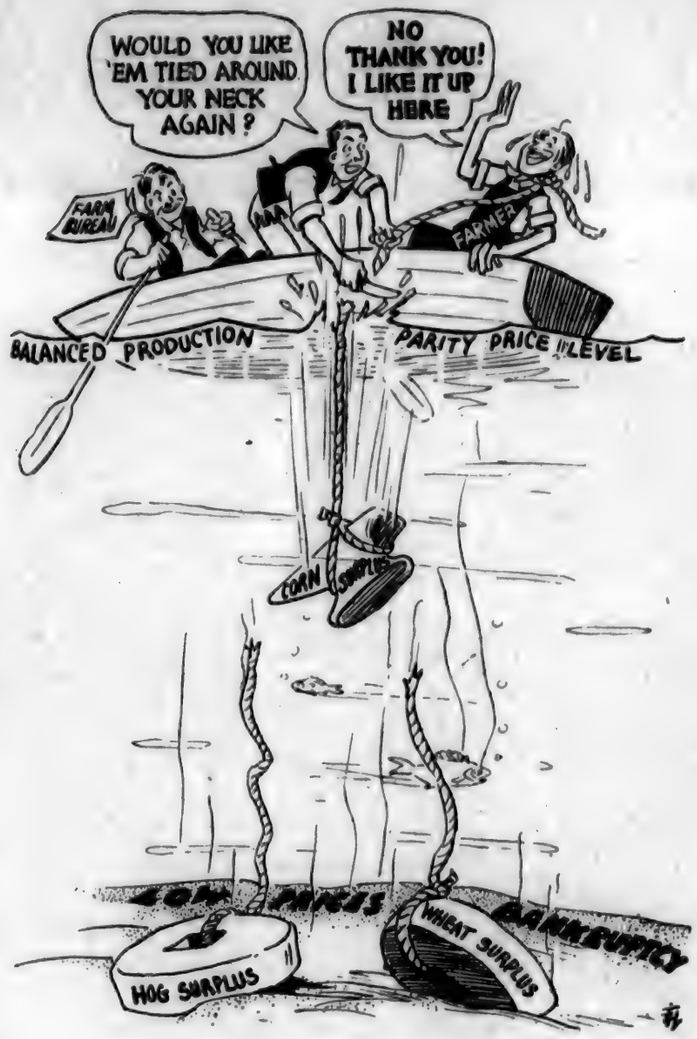
In January, 1933, Administrator Davis said the average price of hogs on the farm was $2.68 per cwt. A survey made then indicated a four per cent increase in the number of spring pigs and an increase in the number of sows to be bred for fall litters. Approximately 6,200,000 pigs and 200,000 sows soon to farrow were marketed under the control program in the fall of 1933. Most of the meat went into non-competitive unemployment relief channels.

"Let's not forget," said Mr. Davis, "that this was all made possible by the processing tax. In addition the government bought 1,400,000 hogs on the open market for unemployment relief when the processing tax went on. On October 6 this year the average cost of hogs to the packers was $8.13 per cwt. in contrast to about $1 the same time a year ago.

"I believe farmers will be smart enough to keep this control program in their hands next year, the year after, and thereafter so long as it is needed."

Speaking of corn loans Mr. Davis said: "Earl Smith was the first one to come down to Washington and talk to us about the corn loan program. This loan, which immediately raised the price of corn and made it possible for farmers to secure the benefit of subsequent price advances would not have been possible were it not for the acreage reduction program.

Can't Stabilize Without



"The Federal Farm Board made a real contribution to the agricultural experience of this country," he continued. "It provided definite proof that you can't buy up farm commodities and stabilize prices without production control. Corn loans and cotton loans are part and parcel of a production control program. President Roosevelt has advised us that these loans will not be made unless farmers support acreage control."

Responding to questions from the floor, Mr. Davis stated that the Administration was aware of the individual inequities in carrying out the corn-hog program. If farmers finally decide to continue crop adjustment, as seems likely, the Administration hopes to iron out these inequities. "It is my observation," he said, "that whenever you get into a state where there is a strong, intelligently directed farm organization these crop adjustment programs have been successfully carried out.

Next Year's Plan

"If there is a program next year, there will probably be little or no control exercised over the contracted acres, and some relaxation of rules governing the use of 'idle' ground. The 1935 plan undoubtedly will provide for benefit payments on both hogs and corn.

"On October 6, U. S. treasury statements showed that collections from processing taxes totaled $505,000,000 while payments to farmers totaled $406,399,000. In other words, collections were approximately $100,000,000 ahead of payments. We are sending out between $4,000,000 and $5,000,000 daily," Davis said, "and by January 1 somewhere between $250,000,000 and $280,000,000 will have been paid to co-operating corn and hog farmers."

CUTTING 'EM LOOSE

In introducing Mr. Davis, President Earl C. Smith briefly reviewed the long continued effort of organized farmers following the war to secure surplus control legislation, and told of Mr. Davis' association with this movement as early as 1922.

Clifford V. Gregory, editor of Prairie Farmer, effectively answered charges of opponents that farmers were being "regimented" and deprived of their "liberty." Before the AAA program was launched to raise farm prices, he said, farmers were rapidly being "regimented" off their farms and the "liberty" they enjoyed was to go north, south, east or west after being set out in the road. Some of our defenders of the constitution, he said, seem to forget that its framers started it this way "In order to form a more perfect union, ESTABLISH JUSTICE, etc."

E. E. Stevenson, president of the LaSalle County Farm Bureau, presided.

The five 1934 Illinois candidates recommended for the "American Farmer" degree in the Future Farmers of America are: Milbourn DeMunn, Capron; James Dunseth, Waverly; Beryl Rutledge, Farmer City; Edwin Bates, Carlinville; and Clarence Akin, Bridgeport. The 7th annual meeting was held at the American Royal, Kansas City, Oct. 20-26.

Farm Loan Program Stabilizes Land Values

Federal Loans Based On Farm Earning Power Says Gov. Myers

THE federal farm credit program was envisioned as a stabilizer of credit and land values based on what the farm is able to earn, in an address by Governor W. I. Myers of the Farm Credit Administration at a banquet to 700 farm leaders of Illinois, Missouri and Arkansas at the Jefferson Hotel, St. Louis, Monday night, Oct. 8. President Earl C. Smith and Treasurer Robert A. Cowles represented the I. A. A. at the meeting. A number of Farm Bureau officials and leaders from adjacent Illinois counties also attended.

We are making loans on the basis of the earning value of the farm, said Governor Myers. This system will retard the wild speculation in land prevalent during the war and early post-war years.

The meeting was largely educational. The entire program was devoted to an explanation of the functions and purposes of the Farm Credit Administration and its various units, heretofore outlined in the RECORD.

Besides Governor Myers, speakers included Commissioners A. S. Goss (Land Bank), G. N. Brennan (Intermediate Credit), S. N. Garwood (Production Credit), and F. W. Peck (Co-operative Bank).

It was emphasized that close supervision is an important part of the production credit program. Production loans are held down to that amount necessary to put the crop in, harvest and market it, and no more. The permanent credit system to be developed is one providing long and short term credit, first for farmers, and secondly for farm co-operatives.

The federal system seeks to supplement commercial credit and not replace it, Gov. Myers said. Private money, not government money, is being loaned. Therefore every precaution must be taken to insure the safety of the loan.

It was disclosed that some 850,000 applications for farm loans had been received since May 1, 1933 for approximately $3,750,000,000. Loan applications represented about one-seventh of the farmers of the country. Applications reached a peak of around 20,000 a week at the 12 federal land banks. Now they are down to about 6,000. The force of appraisers was increased from 200 in May 1933 to approximately 5,000 for the entire country. Seventy-five per cent of loans made were refunding loans. One-sixth of loans completed were scale downs for a total of about $60,000,000. The reduction in interest rates, it was reported, averaged about 25 per cent in Illinois, Missouri and Arkansas.

Paying Farm Creditors In New Federal Bonds

Thousands of rural investors who previously have not considered the advantages of government-guaranteed securities offering the essential requirements of yield, safety and liquidity have become holders or purchasers of bonds of the Federal Farm Mortgage Corporation, according to Gov. W. I. Myers of the Farm Credit Administration. "Further retention of these bonds by rural people may normally be expected."

Issuing of the bonds to farmers and their creditors in payment of loans was begun in March this year and reached the high point in June when a total of $153,000,000 in loans were closed and paid primarily in bonds. The number of applications from farmers for federal loans has been receding since the first of the year.

Baseball Dope

(Continued from page 16, Col. 3)

runs and eight hits, while they drove out nine safeties against George Bradford of McDonough who lost his second game of the season.

Bradford struck out 11 men. McDonough looked like the best team in the first few innings, but Will county then tightened up and started to hit. After the fifth when Will tied the score at 2 to 2 it was nip and tuck to the end.

The turning point of the game came when Bus Welch, McDonough county left fielder, slid for home and was called out by Umpire McBroom. It was a close decision but when Hohenstein, Will county catcher, came up with the ball the umpire ruled the base runner out. This play saved the game for Will. Palmer of Will county was the star batsman, driving out three hits. Bergera and Hohenstein of Will, and Welch of McDonough each drove out two baggers.

Corn-Hog Referendum

As we go to press it appears that Illinois corn and hog producers voted more than three to one in favor of continuing the corn-hog adjustment program next year, and a one-contract-per-farm plan in 1936.

Facing the Facts

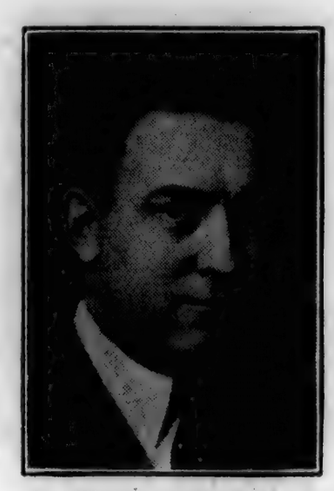
"Agriculture would be delighted if foreign purchasing power were restored. But it must be based on something more than loans, on which the foreign market was based just before the depression," Secretary Henry A. Wallace told the Mortgage Bankers of America in Chicago, October 4.

He said he could see nothing in sight within three to four years on which to base a retreat from the AAA program of crop control as a means of raising farm prices. "Without crop control," he said, "agriculture would be put back to the condition of '32-'33 without 10 cent corn."

Without a control program next year, he predicted a 20 per cent increase in corn acreage over that of '32 and '33, with a resulting excess of 600,000,000 bushels of corn, assuming favorable weather, above the nation's needs.

In Illinois as well as in other states it appeared that the vote varied in accordance with the explanation made and the understanding by producers of the economics involved in achieving and maintaining parity prices. Reports from county corn-hog association officials were that a substantial part of the vote against the plan was due to the fact that in the years 1932 and 1933 some farmers were caught with abnormally low acreages of corn and comparatively small numbers of pigs for the size of their farms. This resulted in such farmers receiving low allotments.

As one central Illinois co-operator said: "Normally I had been growing from 90 to 100 acres of corn on my 240 acre farm. But in 1932 and 1933 my field arrangement was such that I was low on corn acreage. As a result I was allotted only 53 acres. I am strongly in favor of crop adjustment but I hope something can be done to raise my allotment. Fifty-three acres is not enough corn on a 240 acre farm, all of which is tillable land."



Farm Adviser Walter Miller reported a vote of nearly nine to one in favor of continuation in Kendall county. At many meetings the vote was unanimous in favor. At Rochelle in Ogle county, for example, the vote was 41 "YES" and one "NO" for a corn-hog program in 1935. At Stillman Valley, says Farm Adviser Warren, it was 54 "YES" and 3 "NO."

The vote for a one-contract program in 1936 was not so favorable. Misunderstanding of the question was held responsible by AAA officials for this.

Farm Supply Company Continues Record-Breaking Pace

Continued record - smashing progress was reported at the annual meeting of Illinois Farm Supply Company in Decatur, October 18.

The power of collective effort in buying and distributing nearly 50,000,000 gallons of petroleum products during the fiscal year ending August 31, 1934 is seen in the report of Manager L. R. Marchant that the 58 affiliated County Service Companies at their last fiscal closing declared patronage dividends of $523,179.64 for the year. After paying these refunds, plus $58,410.65 in capital stock dividends, and federal income taxes of $31,480.17, the total surplus of the 58 companies was $969,354 or equivalent to 103.72 per cent of the Farm Bureau members' original investment.

L. R. MARCHANT

This remarkable showing after less than eight years of operation for most companies was made notwithstanding the fact that approximately $2,200,000 has been paid back by the county companies in annual patronage dividends to members of the Farm Bureau who patronize them.

79% On Investment

The Illinois Farm Supply Company itself, which buys for the county companies, greatly exceeded all previous records both in volume of products handled and profits of operation. Net income for the year was $170,900.97 or 79.82 per cent of the gross operating income before deducting patronage dividends and federal income tax. This compares with $128,287.31 for the preceding year. It represents a profit of 171.31 per cent on the investment compared with 85 per cent, five years ago and 127.96 per cent last year.

The Board of Directors of Illinois Farm Supply declared a patronage dividend to member companies of $135,868.61 after providing for dividends on preferred stock amounting to $7,072.33, setting aside $23,976.81 to surplus, and paying $3,983.22 in federal income taxes.

The state company during its brief period of operation has paid in cash to member companies a total of $492,565.28, or approximately five times the par value of preferred stock.

Substantial gains were made in the volume of all products handled. For example, the gain in petroleum products was 19.2 per cent; in soy oil paint 73.53 per cent; in tires and tubes 33 1-3 per cent, etc.

In his annual report to directors, stockholders and patrons, Mr. Marchant said: "Co-operative purchasing of farm supplies has found an important and permanent place in the business system of this state. It has become firmly entrenched, and farmers are not unduly concerned with criticisms and antagonistic attacks. The state company handles 87.4 per cent of the business transacted by co-operative purchasing organizations in Illinois. This is based on figures released by the Federal Intermediate Credit Bank of St. Louis early this year, covering 64 Illinois co-operative purchasing organizations."

Wide Margins Gone

The report expressed the belief that "the days of wide margins on motor fuels are gone. The time for more diversified selling of Illinois Farm Supply's full line of products and for greater economy of operation, is here.

"Several thousand more farmers in this state will be found ready and waiting to accept this service when every member company has advanced to the same degree in covering its territory that a few companies have in the past. A $10,000,000 business annually with 150,000 farmer customers is within our reach if we will only set our stakes to provide this enlarged service to the farmers of Illinois. With this amount of business our slogan 'A Million Dollar Patronage Dividend in 1940' can be made a reality.

Encouraging Signs

"There are many encouraging signs. For the first time in history the full power of the federal government is being directed to restore agricultural prices. The government is friendly toward the co-operative movement. Agriculture has gone far in the past two years toward freeing itself of burdensome surpluses. Higher prices and benefit payments have opened the way for a more prosperous and satisfying agriculture. This trend toward restoration of farm purchasing power represents a fundamental change in national policy. The opportunities ahead for effective united action by farmers were never greater."

Pike And Rock Island Companies Organized

With practically every county now being served by a county service company affiliated with Illinois Farm Supply Company, the period of unit growth is practically at an end. Pike County Service Company and Rock Island Service Company were the only two new county companies set up during the past year. The 58 associated county companies operate in some 90 counties and serve around 75,000 farmers.

Besides nearly 50 million gallons of petroleum products the companies sold $170,000 worth of Brunswick tires and tubes, more than 500,000 gallons of chinch bug oil or at least 75 per cent of that sold in the state; more than 87,000 gallons of SOYOIL paint, 33,723 gallons of fly spray, 272 tons of fertilizers and substantial quantities of alcohol, radiator solutions, cod liver oil, stock dips, mange oil, and other products.

Sales Promotion And Advertising Important

Continuous sales promotion, and advertising in the I. A. A. RECORD, Prairie Farmer and County Farm Bureau papers are given much credit for the remarkable gains in the co-operative purchasing and distribution of petroleum products and farm supplies during the past eight years.

Weekly promotional letters to some 550 truck salesmen, station operators and attendants have stimulated extra sales' effort. Consistent advertising each month in the I. A. A. RECORD, going to a list today of more than 64,000 Illinois farmers each month, has told the story of the company's efforts to continually improve quality of products, and serve patrons at a saving in cost. This publicity has been effective in winning public acceptance of I. F. S. products and has paved the way for increased sales.

The 1934 Illinois state corn husking contest will be held Nov. 1 on the farm of Wilbur Stockley, three miles northwest of Earlville in LaSalle county, announces Floyd Keepers of Prairie Farmer.

Larry Williams dedicated Hancock's Service Company's new filling station at La Harpe October 6. The Hancock company was the first co-operative oil company to be organized in Illinois.

E. H. Walworth, former county adviser in Macon county, was recently employed as farm adviser in Warren county. He succeeds A. A. Olsen who resigned.

What Adjustment Has Meant to Our Country

By J. V. Stevenson, farm operator and member LaSalle County Farm Bureau and I. A. A.

IN LaSALLE county, Illinois, 55 percent of our crop acres in the last two years were planted to corn, so when we speak of Agricultural adjustment, we think of corn and hogs.

We had 3360 applications for corn-hog contracts, and it is interesting and significant that of this whole number, there were only thirty-five, or about one percent, that could not or would not go along at the time of final signature.

Under the corn-hog adjustment plan, our contract signers rented more than 61,000 acres to the Secretary of Agriculture and altogether the benefit payments on corn and hogs will bring into the county about $1,100,000.

We are in the area that was hard hit this year by drouth and chinch bugs. On a great many farms in the county there will be no grain to sell, and on some farms not even enough to feed the livestock. To such farmers the corn-hog payments are a god-send; they constitute the only cash income the farm will have this season. This with the release of the contracted acres for forage production furnish a splendid illustration of the good this program can do in providing a form of insurance against such emergencies.

Last spring our farmers sealed about 3,000 cribs containing more than five million bushels of corn, receiving a loan of 45 cents per bushel at that time. More than three million bushels of this corn have now been sold, at least two-thirds of it for sixty cents per bushel or more, and much of it for seventy-five cents per bushel. There can be no doubt that without the corn-sealing plan, a great deal of this corn would have been sold last winter for twenty-five or thirty cents per bushel; the year before it was eighteen cents per bushel. The corn loan brought this added price to the farmer instead of the speculator, and kept the corn in the country where much of it is going to be needed for feed through the coming winter.

Just the other day, I went to see a carpenter in the nearby village to get him to make some repairs on my corn-crib before husking. Imagine my surprise to have him tell me that he had more work engaged than he could do in a month. For the last three years he has spent most of the time just tinkering around home, and wishing for something to turn up that would bring in some money. Now the farmers who had corn to sell this summer have a few dollars that they can spend for some of the repairs that have been needed for a long time, and the whole community benefits by the money being spent.

Our farmers are not soon going to forget the lessons learned in the adjustment program. Many of them have realized before that a more moderate production of the basic crops would bring in a greater money return. But always before when an effort was made by any number of farmers to cut down on the acreage of any crop, a lot of other farmers would think it time to increase, and so the effort to balance production with demand would be defeated.

We have in this adjustment program a wonderful lesson in the power of co-operative effort in fitting our production to demand.

We know that this could not be accomplished in such an industry as Agriculture without beneficial legislation. We know that the administration of the adjustment program has not been perfect. Some mistakes have been made which can be avoided in the future.

The feeling is practically unanimous that some way should be worked out to determine the allotment of corn acres on the basis of a percentage of the tillable acres in the farm, instead of basing it on the 1932-1933 corn acreage. The present plan does not seem fair to the producer who has already reduced his corn acreage below the average, and had a large part of his farm in pasture, hay, or soil building crops. Some of these men could not see their way clear to sign a contract this year, and probably more of them will refuse to go along next year on the same plan.

But with the hope and confidence that the experience of this year will help in changing these objectionable features, our farmers have voted by more than three to one, for an adjustment program in 1935.

TWELVE IN THE FAMILY AND EACH ONE COVERED BY A COUNTRY LIFE INSURANCE POLICY.
This is the Montavan family of DeKalb county. Left to right back row: William Montavan, father, holding Elaine Mildred, 2; Mrs. Montavan, holding Marion Ruth, 6 mo's.; Francis George, 17; Florence Kathryn, 15; Edith Mary, 14; Bernice Emily, 12; and Gladys Regina, 10. Front row: Robert Dale, 8; Yvonne Margaret, 6; Shirley Marie, 3.
"I believe that 12 Country Life policies in one family is something in the way of a record," writes General Agent John D. Bryant.

Get Ready Boys and Girls, Baby Beef Show

Prizes totaling nearly $350 will be distributed by the Producers Live Stock Commission Association, at E. St. Louis (National Stock Yards) in its eleventh annual baby beef show and sale on November 22-23. First prize of $20 will be awarded the best calves in the Hereford, Shorthorn and Angus classes with prizes running down to tenth place. The grand champion calf will receive an award of $50 and the reserve champion $25. A silver loving cup is offered for the best group of five calves with ribbons for six additional places.

The show of these baby beef calves will be held at 10:00 A. M. on November 22. The sale will begin at the same hour on November 23. There will be a banquet for exhibitors at 6:00 P. M. on Nov. 22.

This show and sale is open to 4-H club members and regularly enrolled students of vocational agriculture departments. Further information giving complete rules and regulations with entry blanks can be secured by addressing the Producers Live Stock Commission Association, National Stock Yards, Illinois.

Waterways And The Farmer

Letters Reveal Rise in Grain Prices Due to Lower Rates

By G. S. Wilkin,
Inland Waterways Corporation

SINCE the opening of the Lakes-to-the-Gulf Waterway via the Chicago Sanitary Canal and the Illinois River in June 1933, new river elevators, or elevator facilities, have been provided at Peoria, Pekin, Havana, Morris, Montezuma, Henry, Chillicothe, Hennepin and Naples.

The Farmers National Grain Corporation is handling a constantly increasing tonnage of grain by water, with a saving of 2c to 4c per bushel, which is passed on to the farmer. Numerous testimonials acknowledging this benefit have been received from farmers and grain dealers. Following are typical letters received by the Farmers National Grain Corp.:—

2c to 3c More

I hereby certify that the farmers of Mason and Fulton county at least got 2 or 3 cents a bushel more for their grain through the river operation of the Farmers National Grain Corp. than they would have received otherwise.

Any raise in river rates would deprive the farmers of the benefit.

(s) Chris Beckman
Mar. 3, 1934 Havana, Ill.

I understand there is some question as to whether navigation on the Illinois River will open at usual time this Spring.

As a farmer and grain grower, I know the farmers have been getting 2c and 3c more per bu. for their grain since we have been shipping it on the river. Some seem to question whether the farmer is really getting this benefit. I am reminded of the time I asked our farmers grain company manager the price that he could pay for corn last fall. He stated if being delivered in time to go on next barge he could pay 2c more than if shipped by rail.

Hoping it will be possible to ship our grain by barge again soon.

(s) Rudolph Hackman
Mar. 3, 1934 Havana, Ill.

We understand that it has been said that the producers of grain covering the territory adjacent to Havana Barge Line terminal are not deriving any benefits from said operations.

We have been delivering our grain to this terminal from the very beginning and we say without hesitation that we have received from 2 to 4 cents more than the rail price and the river bid is always from 2 to 4 cents higher than the rail bids.

This extra price has always been passed on to our customers, and we earnestly hope that these river operations will continue for the benefit of our producers.

Havana Co-Operative Grain Co.
Richard Steging, Mgr.

Contrast this situation with the condition in which the farmer finds himself in the Pacific Northwest.

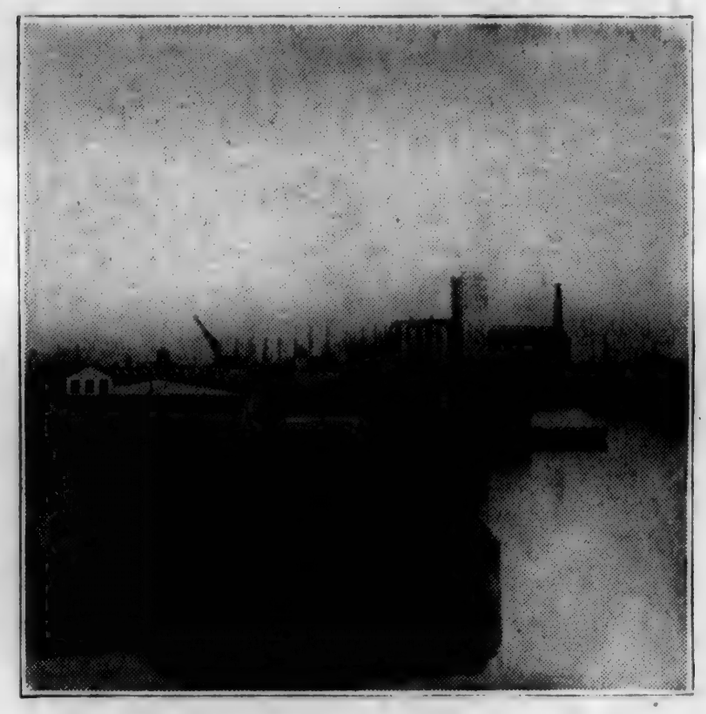
WHEAT—(Present rates per bushel)

Minneapolis, Minn.
to New Orleans,
La. .....1840 mi.— 8.9c Water

Arlington, Ore. to
Portland, Ore. .... 140 mi.— 9.9c Rail

Grangeville, Id. to
Portland, Ore. .... 430 mi.—18.6c "

Furthermore, many new industries have sprung up along the waterway which tend to broaden the local market for farm products.



The new terminal just completed at 2905 Western Avenue in Chicago will greatly enhance the freedom and volume of water-borne traffic, as well as reduce switching expense. This is the first instance of private capital being expended for terminal construction. It is an effective answer to the charge that terminal investments do not pay.

Designed to Supplement

It was inevitable, perhaps, that this service should arouse considerable opposition on the part of the railroads, but, as a matter of fact, it is not antagonistic nor prejudicial to their interests. It is intended to supplement rail transportation in accordance with the policy announced by Congress to "foster and preserve, in full vigor, both rail and water transportation." Both are necessary to the economic well being of the nation.

There is a natural line of demarcation between the two types of haulage. This line is represented by the time element. Water service is much slower than rail and there should be no more conflict between the two than there is between express and freight shipment.

Since the depression, however, railroad opposition has become more intense and a bitter propaganda campaign is being waged to have the Inland Waterways Corporation abolished. It behooves the farmer, as well as every citizen, to be on the alert to prevent such action. History teaches us that the result would be the same as when river transportation

New Barge Terminal at 29th Western Ave., Chicago.

was destroyed before; namely, a raise in rates to prohibitive levels and the strangulation of commerce, industry and agriculture in the Middle West.

Coordinator Eastman has proposed a constructive program of regulation for all forms of transportation which meets with the approval of the majority of all carriers. With governmental loans to railroads under the R. F. C. and P. W. A. approaching the staggering sum of $700,000,000 the time has passed for suicidal warfare. No better counsel could be given than the following lucid statement of Mr. Eastman:

> "Let me make clear once more what I have repeatedly stated, that each form of transportation is entitled to its place in the sun; that they are all here to stay; that each can perform some functions better than any of the others; that the object of regulation is not mere protection for the railroads; that each form of transportation needs regulation to curb the destructive forces in its own ranks, regardless of the railroads; that each has its own peculiar problems which those who regulate must understand; that the Commission must equip itself accordingly; and that the prime objective of regulation is a well coordinated national system of transportation which will protect each agency in the place which it is best fitted to occupy, and curb the waste of unnecessary duplication and **purely destructive competition.** I hope to see a transportation system in which all these various agencies will function more as allies than enemies, and if not as allies, at least as friendly rivals."

This is the second and last installment of Mr. Wilkin's article on the Illinois Waterway.—Editor.

W. F. Purnell began work October 22 as farm adviser in Mercer county, announces J. O. Carlson, president of the Mercer County Farm Bureau.

Producers Creamery of Champaign Opening

The producer may not get a better price by selling his cream through his own co-operative creamery, and non-members who sell to other creameries may show equal returns, but the presence of the co-operative creamery will help all farmers in the community to get a higher average price, John Brandt, president of the Land O'Lakes Creamery, said in addressing members of the Producers Creamery of Champaign at their opening Oct. 2. More than 600 visitors saw the plant in operation during the morning. They were served crackers and "Prairie Farms" butter.

Mr. Brandt showed that the Minnesota cream producer averages two cents per pound more for his butterfat than farmers elsewhere because the state has a large number of co-operative creameries. Quality, he said, is the most important factor in producing farm products, and butter particularly. Quality improvement pays big dividends.

"It is time the farmer was developing the production, the manufacture and the sale of his products. There should be a fixed surplus price," he said, "and pools formed to keep excess products off the markets."

The Producers Creamery of Champaign opened for business on Thursday, September 18. Thirty-nine truckloads of cream were churned into 1500 pounds of Prairie Farms butter the first day.

The new co-operative is already proving its value in a big way. A local butter manufacturer raised his price four cents per pound for butterfat and sent a truck around calling on members of the Producers Creamery to entice their cream away from the co-op.

According to reports this information spread rapidly throughout the territory and resulted in the co-operative getting heavier loads than were anticipated. Around Dewey, home of G. C. Williams, president of the Producers Creamery, the co-op. cream truck was forced to return for a second load.

Land O'Lakes Creameries made more than 100,000,000 pounds of butter last year. Equipment used in the Champaign plant was purchased through the supply department of the Land O'Lakes organization which has refunded more than a million dollars to member co-ops. out of the $17,000,000 of equipment handled.

The new creamery has 1507 patrons delivering cream to the plant on 39 truck routes from 12 counties. More than 50% of stores in Urbana and Champaign are now handling Prairie Farms butter. Day and night shifts were necessary the first two weeks to handle the tremendous volume. The plant is equipped with stainless steel pasteurizers, 1500 lb. churn, 60 H. P. boiler, straight-away can washer and sterilizer and is one of the most modern in the state.

Milk Hauling Charges at St. Louis Changed

Charges for hauling milk in the St. Louis area effective October 10 under the AAA license are 16 cents per cwt. within 20 miles from the city hall; 18 cents, 20 to 30 miles; 20 cents, 30 to 40 miles; and one cent additional for each 10 miles beyond the 40 mile zone.

Under the amendment licensed distributors must pay three cents per cwt. on all milk to the market administrator for supervising weights, tests, market information and maintenance of a reserve fund to proctet farmers against deadbeat or "busted" dealers.

A. F. B. F. Meet, Nashville

Gov. W. I. Myers of the Farm Credit Administration who played a leading part in drafting the Administration's $2,500,000,000 rural credit program will be one of the headliners at the coming annual meeting of the American Farm Bureau Federation in Nashville, Tenn., Dec. 10-11-12.

Chester C. Davis, administrator of the Adjustment Act, who has handled a tremendously difficult task with great ability, will speak on future plans for balancing production and raising farm prices to parity levels.

Prof. M. L. Wilson, Assistant Secretary of Agriculture, has accepted an invitation to speak on "Land Utilization and Conservation." Dr. Geo. F. Warren of Cornell University, monetary adviser to the President, will be another speaker. His subject will be "The Influence of Gold and Silver Revaluation on Farm Prices."

Several members of President Roosevelt's cabinet have been invited. Southern states are making a special effort to send large delegations to the convention. The fact that Nashville lies closer to the southern part of Illinois than Chicago will influence many Illinois members from this section to attend the meeting.

Purchasing power of hogs, including benefit payments, was 66 per cent higher during August (75% of fair exchange value) than it was a year ago.

Federal Licenses Cut Spread In Milk Prices

Distributors' gross operating margins on retail milk delivered to homes in 50 big cities of the country on September 15, 1934 ranged from 4.41 cents per quart to 8.34 cents per quart with a variation in retail prices from nine to 15 cents. Of the 50 markets 21 are under federal license and 14 are regulated by state legislation.

According to the survey Chicago has the lowest gross margin to distributors at 4.41 cents per quart. The dealer's buying price f. o. b. city for fluid milk is $2.60 per cwt. and the retail price 10 cents per quart.

At St. Louis where dealers paid $2.44 for Class I f. o. b. city and retail 3.8% milk for 11 cents, the gross margin to distributors is 5.75 cents per quart. At Cincinnati farmers get $2.35, consumers pay 12 cents and the margin to dealers is 6.95 cents per quart. At Raleigh, North Carolina, farmers get $2.63, charge consumers 14 cents for 4.2 milk and have a gross margin of 8.34 cents.

In this survey it is significant that where there is no official regulation such as Raleigh, Birmingham, Little Rock and San Francisco, the dealer's gross margin varies from 7.27 cents upward. Opposition of milk dealers to federal licensing is easily understood. Unreasonably high profits and a wide spread in prices which hurts both producer and consumer is less likely to occur where there is federal licensing.—Editor.

CCC Uses "Prairie Farms" Quality Butter

The Farmers Creamery Company, Bloomington is furnishing the Civilian Conservation Corps at Mackinaw Dells with "Prairie Farms" butter. The government requires that all butter purchased be federally inspected. "Prairie Farms" is the only brand produced in Illinois under federal inspection. It must score 92 or better.

Against Aid To Farmers

M. G. Van Buskirk, now with Beatrice Creamery Co. and formerly secretary of the Illinois Butter Manufacturers' and Milk Dealers' Associations, is reported to have lobbied against the licensing of downstate Illinois milk markets, at Washington.

The I. A. A. and the milk producers associations have applied for AAA licenses with the hope of stabilizing market conditions and securing a reasonable price to producers at Peoria, Bloomington, Danville, Champaign, Decatur and southern Illinois points. Licenses are expected to be issued Nov. 1.

Van Buskirk at one time was pastor of a community church at Oneida in Knox county. He later became president of the Knox County Service Company and Illinois Farm Supply Company.

The
Illinois Agricultural Association
RECORD

Number 12 December, 1934 Volume 12

Foreign Trade

By George N. Peek,
Special Adviser to the President on Foreign Trade

FOR a number of years I have been concerned with the interests of American agriculture, particularly in foreign trade. The heart and center of our entire export trade, by volume, consists of agricultural products, and the largest single class of income from export trade is that associated with the exportation of agricultural products. Moreover, from the point of view of the aggregate income derived by our agriculture from the disposal of its products, a foreign market has played a decisive part for over three generations.

Eighteen per cent of our agricultural income during the 22 years from 1910 to 1932 came from exports. A trifle over 5% of our industrial income came from exports in this same period. While certain branches of agriculture and industry are more affected than others, clearly agriculture has a far greater stake in our export markets than industry. Industry, however, is dependent on the existence of a profitable agriculture for the sake of its own domestic markets. It has been demonstrated during recent months that, for a good many sections of the United States, the return of prosperity must come from the grass roots up, rather than down from the smoke of factory chimneys. However, the interdependence of industry and agriculture in our national economy now is so generally recognized that I shall not debate which came first, the hen or the egg.

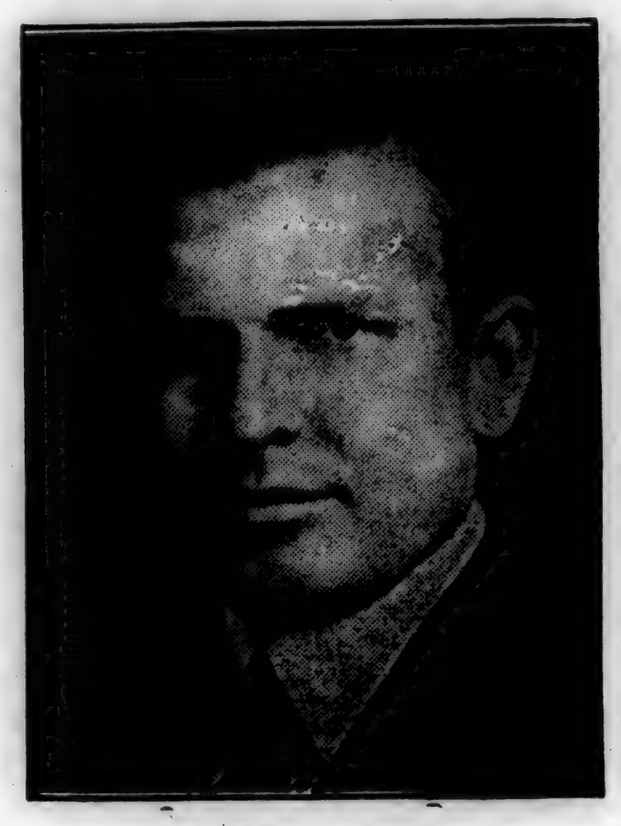
Two Distinct Duties

Last March I accepted from the President the appointment of Special Adviser to him on foreign trade. About the same time the Export-Import Banks were organized. These I shall discuss later. My duties as Special Adviser were specified, by Executive Order, along two distinct lines.

First, I was authorized to coordinate and review available data with reference to foreign trade, and second, to carry on negotiations with respect to specific trade transactions with any group or agency interested in obtaining assistance from the Federal Government through financial transactions, barter, or other forms of Government participation. I was directed to bring meritorious proposals before the proper governmental agencies for appropriate action and to keep the President advised concerning the action taken.

Had I known at that time that there are more than 50 divisions, bureaus, or departments of our Federal Government dealing with foreign trade problems in one way or another, probably I should have hesitated, but after having agreed to undertake it, I decided to find out if I could what it was all about.

I shall tell you very briefly what we have found from our review of available data and what we are doing to improve conditions and to further foreign trade activities.



Our approach to the subject has been the business approach. We have undertaken to do just what any business executive would do if he were suddenly placed in charge of a large and diversified business, that is, to find out from the record of the past what the situation was and what improvement could be made. We had, however, no adequate system of bookkeeping for foreign trade.

Owe Us 24 Billion

In my two published letters to the President, one dealing with our international trade, and the other dealing with our international credits, certain conclusions seem inescapable:

As a nation we have shipped far more goods than we have been paid for currently. We paid a considerable part of the money cost of the war and contributed largely to the rehabilitation of Europe after the war. **The unpaid balance on these accounts at the end of 1933 was some $24,000,000,000.** This unpaid balance is represented mainly by long-term and non-liquid obligations of foreigners to us and by our direct investments in foreign countries.

Our practice of lending money abroad imprudently and over-generously permitted foreigners to build up from the proceeds of these loans a large body of short-term and highly liquid investments in the United States. With the depression the threat of their overnight withdrawal and their actual withdrawal substantially contributed to the demoralization of our banking system and to the shattering of our price levels. **We thus made possible our own depression by our own financial policy from 1923 to 1929.**

GEORGE N. PEEK

The discounts and commissions alone from all of this financing are reported to have amounted to about $1,190,000,000 since 1914.

A significant and sinister feature is that the movement of capital almost exceeded and dominated the movement of merchandise. The proportion of our dollar settlements for investment transactions has increased from 7.6% in 1919 to 41.6% in 1933. This means that assuming 100 represents the total dollar settlements of all kinds of the United States with the rest of the world, 7.6% in 1919 was used in our investment transactions, which increased to 41.6% in 1933. On the other hand, 70.7% was used for commodity and service transactions in 1919 and only 41.8% in 1933. These figures speak for themselves.

Exchange Restrictions

The details of the figures from which these conclusions are drawn are covered in my two letters to the President which, with his permission, have been made public and are available in pamphlet form to any one who cares to send for them.

Another broad conclusion to which I am led is that exchange restrictions imposed in the past few years by more than 35 nations have played a principal part in clogging the wheels of international trade. This means simply that, more or less arbitrarily, these countries have prevented the payment of debts, including those of nationals owing on current commercial transactions, by delaying or forbidding transfer of funds. Without discussion of the reasons given or the varying degrees of justification, the result is that such countries are in effect using

THE HORN OF PLENTY IN REVERSE

the money due exporters instead of borrowing it from investors.

Again, exclusive commercial agreements and barter transactions have been made by other nations quite generally since the depression started. We have a record of 180 of them covering all phases of international trade, from general tariff adjustments to specific agreements, barter between nationals of different countries, state trading, and, in some instances, trading by nationals encouraged by governments. This practice is not limited to the smaller nations. These mutually exclusive compacts have one common characteristic—that of leaving the United States entirely out of consideration. They have covered even such fine points in trade between nations as the international traffic in tourists. In June of last year two countries entered into an agreement whereby one of them traded tourists' revenue with another for carloads of hogs. The basis was $40 per head for hogs and $60 per head for tourists. The world is indeed hard pressed for a medium of exchange between countries when such meticulous adjustments as these are necessary.

I shall not take time to dwell upon the better known restrictive devices familiar to you all such as embargoes, quotas, and excessive tariffs. I have undertaken to outline briefly the situation as we see it from the studies we have been able to make. In passing, I shall refer to some of the criticisms directed to my published reports to the President. I shall then endeavor to indicate what we are doing to improve the situation and to make it possible to get serious negotiations really under way.

The first criticism is that there is nothing new in these reports and there is nothing to be gained by reminding the public of the mistake in our international transactions during the last dozen years.

Part of the criticism is justified—there is nothing new in these figures. For my own part, I have said so repeatedly. They have remained safely filed in the Department of Commerce after the Finance and Investment Division of that Department in its published yearly reports since 1922 called attention both to the condition and to the trend. I may add that in 1922 the responsible members of the administration were supplied with an international balance sheet, a copy of which is on record in Washington.

The trouble is that in the face of these repeated warnings nothing was done by the responsible authorities to prevent the debacle which followed, even though both the condition and the trend were clearly indicated to them.

Next, it has been and still is argued, in some quarters, that the country was better off as a result of the policy which was followed, of financing our exports through foreign loans, because industry was kept busy, wages were paid, there was general activity, and some individuals and concerns made profits, even if investors suffered. I disagree with that view. If the investors were a limited number of people of great means, who could stand the loss, it might have some foundation. But when the victims, in addition to the many small investors, were our insurance companies, trust companies, savings banks, and small country banks, which were trustees for millions of small investors and depositors, every property owner in the nation was affected adversely by the collapse of our short-sighted foreign commercial and financial policy. As these institutions were affected, the loss spread throughout the land. It contributed greatly not only to the weakening of our whole financial structure but to the social unrest as well. It thus becomes a matter of national and Governmental concern.

TIME FOR UNCLE SAM TO DO A LITTLE YANKEE TRADING TOO

Another argument is that arrangements between the nationals of two countries, such as barter transactions, which contemplate balancing accounts, would result in greatly reducing our foreign trade.

What is the use of trade without payment? In our normal private business activities we limit our sales to what we consider good or reasonable credit risks. We rely upon the ability of the buyer to pay. If he cannot pay in the conventional medium of exchange, we try to find out how he can pay or what he can give to us that we can use to satisfy the debt and facilitate trade. I need only to call to your attention the practice in recent years of some of our most orthodox implement companies, and others, who gladly took wheat, corn and cotton in payment of old indebtedness or for new

(Continued on page 6)

Lessons of 1934

By Dean H. W. Mumford,
College of Agriculture, University of Illinois

IN the school days of our youth the "hard" teachers embittered us and made us resentful at the time, but as the years mellowed and matured us, we looked back to revere and respect those teachers for the lessons they had taught us. Perhaps the finest thing we can say about 1934 is that it may have been a hard enough teacher so that we shall look back some day in thankful appreciation for the lessons it has taught. For the present, the assignment given me by the editor of the I. A. A. RECORD is to set down my views on what those lessons have been.

DEAN MUMFORD

To begin with, the 1934 Illinois corn crop is estimated to be the smallest in 61 years. The oats crop was the smallest in 58 years and the barley harvest was extremely small. The year's combined production of grain feeds and hay is undoubtedly one of the smallest on record. The apple crop is far below average, and the peach crop was only about one-third of what it was in 1933 and considerably less than a third of the 1927-31 average.

A Hard Teacher

As if this were not enough to make 1934 a "hard" teacher, there was the worst infestation of chinch bugs in history and the worst drouth and some of the hottest weather that farmers of Illinois have ever experienced.

Not the least of the lessons of the year has been that "farm relief," so glibly talked about by too many people, does not come easy. There have been many teachers who have tried to drill this into the public ever since farm relief began to be talked about, but it has taken a "hard" teacher like the year 1934 has been to drive the lesson home.

In the past we have been too much inclined to talk about farm relief as if it were something that could be pulled out of a magician's hat or at least something that would take place with instant and far-reaching benefits if only somebody would do something about it.

This year something has been done about it, and in the doing we have been taught that it is not as easy as some folks had thought, nor does it produce magic benefits as speedily as those who had talked loudest about it had hoped that it would. In the Agricultural Adjustment Act we have had the greatest mass movement of farmers, farm leaders and farm sympathizers and the greatest marshaling of public funds all working for the betterment of agriculture, that history has ever witnessed, and yet the results have been slower, more painful and less rosy than many had expected they would be.

He may have been too optimistic about the prospects before, but any farmer who has worked on his community corn-hog allotment committee, for instance, now has an idea of how much work, study, patience, cooperation and perseverance is involved in sound and lasting efforts to improve the farmer's position. Nor are these hundreds of community committeemen the only ones who have learned the lesson. Approximately 1,200,000 farmers signed corn-hog contracts alone. These and all other farmers who have had contact of any kind whatever with the AAA have had a demonstration of what is involved in controlled production.

Requires Work

If the AAA does nothing more than sober farmers and their leaders and sympathizers into realizing that "farm relief" takes something more than talk, it will have gone a long way toward repaying some of the money and effort that has been put into it. Having brought this lesson, 1934 will not go down as a total loss, in spite of all its other disappointments and even though it yielded no other lessons.

There have been others, though. We have learned, too, that high prices alone do not necessarily mean high tides of prosperity. Thus the developments in 1934 have taught us the necessity of keeping things in balance. Short crops have brought higher prices for grains and will bring higher prices for livestock. Even though prices rose last summer, business activity declined. With commodity prices averaging 10 per cent higher in September than a year ago, business activity was 13 per cent lower. This acted as a drag on further price increases, and beginning about the middle of September the general average of prices turned down.

The lesson in this, of course, is that sustained high prices are not possible without general buying power to support them. To make good prices there must be a healthy state of business activity so that the other fellow can buy what the farmer has to sell. Prices could

"FARM RELIEF AND FARM PROGRESS CANNOT come without close and sincere co-operation between farmers."

be arbitrarily fixed or set so that there would be $16 hogs and $11 beef cattle as there was in 1918, $1.50 corn as there was in 1919 and $2.26 wheat as there was in 1920, but if business activity was at such a low ebb that the city man could not buy the farmer's pork chops and beef steaks at these figures, the high prices would profit the producer nothing.

As Dr. L. J. Norton, of our department of agricultural economics, has pointed out, if business activity had been higher and demand conditions more active, there would have been even more striking increases than have recently taken place in the price of farm products.

Fortunately, there are a number of factors in the long-time outlook which point toward further recovery in business activity and demand, but for the time being at least we have learned that high prices can not go it alone when it comes to restoring more prosperous conditions.

Need Trade Recovery

We may have learned, too, that we shall have to do something to encourage international trade and regain our foreign markets before agriculture in Illinois and the rest of the United States completely recovers. This lesson would not be as clear as it is if we had not done as much as we have during the past year and a half to adjust and restrict production in the hope of solving the problem by getting on a self-sufficiency basis.

Stimulating international trade and regaining foreign markets for our products in some respects is a more encouraging and more logical approach to the solution of some of our problems than is the widespread curtailment of production. Unfortunately, however, the total volume of agricultural exports from the United States in the year ending June 30, 1934, shrunk even lower than it was

the previous year to hit the lowest spot since 1909-1910. Although some important products showed a substantial increase, the volume index of exports of 44 leading farm products for the year stands at 83 as compared with 85 in 1932-1933 and 100 for the 1909-1914 average. The year 1934 may have taught us, therefore, that future years will not be as bad as this one has been if we will do some of the things that might be done to get our volume of exports back to where it was in the days of better times.

"Brains" are being ridiculed in some quarters just now, but 1934 has put across another of its lessons there. It takes brains to do good farming, and there ought to be more trust in brains, not less, as a result of the way good farming has come through in 1934.

Farmers following the teachings of the College of Agriculture, University of Illinois have been practicing good farming for a long time, but no year in history has taught the merit of such farming more forcibly than has 1934 with its drouth, heat and other adverse conditions.

During the past decade and a half, for instance, more than 7,000,000 tons of limestone have been applied by Illinois farmers who have followed the recommendations of the College of Agriculture, University of Illinois with regard to the testing of soils, the growing of more legumes and the balancing of cropping systems.

Thousands of acres of legumes which have been made possible and successful as a result of this lime-legume program have stood farmers in good stead in a drouth year like 1934. More than 850,000 acres of sweet clover alone have been grown in Illinois this year largely as a result of the soil testing and liming program and the other good farming practices which farmers have adopted upon the recommendation of their county farm advisers and the extension service of the agricultural college. This sweet clover has been little short of a "life saver" on many farms this year where non-legume pastures have been burned out by the drouth and heat. Furthermore, some 300,000 acres of limed land grew alfalfa in Illinois this year. From this farmers got a good crop of hay when other meadows were practically worthless. One farmer, H. K. Johnston, of Buckley, Iroquois county, who has followed the college's recommendations ever since he started farming ten years ago, reported a yield of 32 tons of alfalfa in the first cutting from 14 acres which was limed six years ago.

The year 1934 has taught us at least one other lesson and that is that mass action, the expenditure of millions of dollars of public funds and other expediences can never be a substitute for the thinking and planning of individual farmers. This lesson has come out of the farm accounting project of the College of Agriculture, University of Illinois.

Over the state as a whole there are approximately 1,400 farmers who are keeping accurate records in connection with this project. Among these 1,400 farmers there is a group of 150 account keepers in the territory of Grundy, LaSalle, Marshall and Putnam counties who are enrolled in what is known as the farm bureau-farm management service project.

$1432 A Farm

This year their records were summarized for the three-year period 1931-1933 and the results featured in a round-up meeting which was held at Ottawa in September. The 30 farms with the largest net income had an average annual income of $1,432 a farm as the interest on their investment and to pay them for their risk and management. The 30 farms with the greatest losses had an average annual deficit of $445, which was $1,877 below the net income on the more profitable farms.

This difference was largely the result of differences in efficiency of organization and management of the farms and was attributable to such things as livestock efficiency, crop yields, size of business and expenses.

There have been other lessons that have stood out in 1934, but space does not permit a detailed review of them. Certainly the fact that we had the worst chinch bug infestation in 1934 that we have ever had has taught us that we can never relax our vigilance against insect and disease pests. The shortage of feed

A. F. B. F. Convention

TIME: December 10-11-12.
PLACE: Nashville, Tennessee.
HEADQUARTERS: Andrew Jackson Hotel, Hermitage Hotel.
ROOM RATES: $2.50 single—$4.00 double and less at other hotels.
RESERVATIONS: Make with A. F. B. F., 58 E. Washington St., Chicago, or direct.
R. R. RATES: Fare and one-third for round trip—must present reduced fare certificates when you buy ticket. Get certificates at A. F. B. F. headquarters.
SPEAKERS: Secretary Cordell Hull, Secretary Wallace, Chester C. Davis, Dr. Geo. F. Warren, Governor John G. Winant of New Hampshire, Dr. W. I. Myers, H. R. Tolley, M. L. Wilson, and others.

Make your reservations at once. Nashville is not far from downstate Illinois points by train or auto, and members will be well repaid for time and money spent attending the meeting.

Foreign Trade

(Continued from page 4)

goods. It is true that these direct transactions frequently lead us into multilateral negotiations, as in this case, but that is no reason for decrying direct transactions wherever they are desirable, and they may be desirable in many cases.

One other criticism is to the effect that before considering new trade transactions, we should collect what is now due us by other nations. Having had long experience in credits and collections, I understand that point perfectly. The founder of the business with which I was long associated, three-quarters of a century ago printed across the face of his invoices something like this—"All bills must be paid within 10 days from the date they fall due or arrangements made in advance for an extension, otherwise no further shipments will be made." He meant that he would insist upon his customers respecting their agreements to pay when due or arranging for an extension of time if necessary. Otherwise he would make no more shipments; he would not continue to throw good money after bad. That is my view.

We have two types of debtors always, one the kind that can but won't pay, the other the kind that desires to pay but for the time being is unable to do so. So it is with governments. I am more optimistic than many people about ultimate payments due us from foreigners. No civilized nation will assume the responsibility of urging repudiation of contracts between nations. In some cases it may be necessary to make adjustments or to extend the time of payment. But in the interim are we to sit still and await payment and make no attempt to trade? Should the answer be yes, it means continuation of unemployment, idle factories and farms and all that goes with such phenomena. We have had those conditions in our midst long enough.

In my judgment, it would be far better to negotiate country by country to see what we can trade and at the same time determine what arrangements can be started at least looking toward payment of past due indebtedness. Without trade, means for payment become nonexistent, and obligations of payment become so much waste paper.

This is the first of a series of two articles on "Foreign Trade" by Mr. Peek. The author became well known to Illinois farmers through his leadership beginning in 1921, in the fight for farm surplus control legislation and parity prices for farm products. Mr. Peek's home is at Moline in Rock Island county where he was in the farm implement manufacturing business. He is a charter member of the Illinois Agricultural Ass'n.—Editor.

Grain Meeting at Morris

Dedicate New Farmers National Elevator on Illinois River

DEDICATION of the new 60,000 bushel elevator of the Farmers National Grain Corporation on the Illinois river bank at Morris, November 12, was the occasion for a get-together and dinner which brought out nearly 100 farmers' elevator managers and directors, Farmers National and Illinois Grain Corporation officials, and their friends. Seventeen member elevators and seven non - members were represented.

HARRISON FAHRNKOPF

The dinner was held in the evening in the club house of the Morris Country Club, and was arranged by Ray Watson of the Grundy County Farm Bureau and Harrison Fahrnkopf, manager of Illinois Grain Corporation.

D. M. Hardy, president of the St. Louis Bank for Co-operatives, was a guest speaker. Among the Farmers National officials who attended were G. C. Johnstone, vice-president who is also president of Illinois Grain Corporation; J. O. McClintock, James Cole, Paul Kelly, John Anderson, and Jack Powers of the Chicago office. Charles P. Cummings, Peoria manager, and managers of branch offices at Pontiac and Mendota attended.

30 Terminals

Mr. Cole, manager of the Farmers National Warehouse Corporation, whose job is to see that the co-operative has proper facilities, said that the Grain Corporation is operating 30 terminals with a capacity of 30,000,000 bushels in addition to more than 400 country elevators, giving a combined capacity of 56,000,000 bushels of grain.

"I am glad to say that all our terminals are now operating in the black," he said. "Illinois Grain Corporation, we believe, is getting its share of facilities, although at the present rate of growth it will not be long until it outgrows present capacity."

Mr. McClintock who is in charge of developing outlets for grain, showed the close relationship between transportation rates and net returns on grain to farmers. Speaking of corn, he said that the Nebraska situation affects the price of grain at Illinois river points; that with water transportation grain from Illinois can be shipped to the Pacific coast for about half the rail cost from Lincoln, Nebraska. He predicted even lower water rates for short hauls.

"When river business has been fully developed it will affect prices of grain throughout the country," he said. "The Chicago market is the pulse of the grain business in America. If we can take some of the pressure off of the Chicago market on corn, I am satisfied we can influence the price level higher. It will be a market factor if we can take 25,000,000 bushels of corn out of the Mississippi valley by river. It is possible to ship corn from Morris to Memphis for less than half the rail rate. And you can move grain from Peoria to New Orleans by water for about the same rate by rail from Peoria to Chicago.

"The grain business is shifting and it is necessary to be alert and change our methods with the times. Right now there is discussion of building a 14 foot channel from Peoria to Chicago to make possible the loading of lake steamers and going direct through the Great Lakes and the Erie Canal to New York. Every reduction in transportation is reflected in a higher price to the farmer."

Truck Competition

Speaking of the new competition to farmers' elevators from truckers, Charles Cummings advised elevator managers to get out and handle this situation if necessary by leasing trucks and beating the competitor at his own game. "It may be necessary to go direct to the farmer to get the grain," he said. "We don't know how long this kind of competition will be with us. It probably will not last because trucks are now hauling grain below cost of operation. But while it is here you might as well face the situation and do everything possible to minimize its damaging effects on elevator business."

Jack Powers told how the Farmers National handled financed accounts, while Mr. Anderson discussed the details of handling bids and orders on the floor of the Chicago Exchange. Explaining the so-called "intimated price," he said that the grain firm must be able to sell the grain offered before it could bid above the standard call price. Anderson has been on the Chicago market for 30 years. He perhaps knows as many buyers, if not more than any other floor man. "We are doing our best to get the most for your grain," he said.

Mr. Kelly explained operations of the seed division and told how it was working to bring together the seed producer and the consumer. He called attention to the shortage of grass seed this year, particularly of alfalfa and the clovers.

In passing on loans the Bank for Co-operatives considers (1) the purpose for which they are to be used, (2) value of collateral, (3) ability to repay, Mr. Hardy explained. "Our loans bear 4.5 per cent interest," he said. "They are made only if we feel confident that the money will be permanently helpful. We avoid loans which possibly might help the co-operative to meet a crisis, but would not solve or overcome an inherent weakness."

President Johnstone emphasized that the aim of the whole movement is to return the farmer a better price for his grain; and it was this reason which prompted Farmers National and Illinois Grain Corporation to support balanced production and surplus control.

Vice President A. R. Wright, and Directors Geo. L. Potter and Walter Thomas, of Illinois Grain Corp., and Henry T. Marshall of LaSalle county, former I. A. A. director, spoke briefly about the development of their local elevators and their relationship with Illinois Grain Corp. Geo. E. Mellen, manager of Mazon elevator, the youngest member, spoke briefly for the managers. Harrison Fahrnkopf ably presided as toastmaster.

J. S. Sproul of the Public Service Company generated much enthusiasm and good fellowship by leading community singing.

Lessons Of 1934

(Continued from page 6)

that developed in parts of Illinois and in entire states farther north and west should teach us that future farm plans must include preparations for such emergencies. Our helplessness against the many ruinous effects of the drouth should teach us that not all the problems of agriculture and food production are solved nor are they ever likely to be. Our experiences with the corn-hog plan and other AAA programs should teach us that farm relief and farm progress can not come without close and sincere cooperation between farmers.

Indeed, 1934 has not been without its lessons. How well we have learned them remains for future years to prove.

Illinois 4-H Members At Fat Stock Show

Illinois farm boys and girls will be well represented in the junior classes of the 1934 International Live Stock Exposition, to be held in Chicago December 1 to 8.

Approximately 125 youngsters from 37 Illinois counties have listed entries of their prize baby-beeves, lambs, and pigs for the Exposition's Junior Live Stock Feeding Contest.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized namely, to promote, protect and represent the business, economic, political and educational interest of the farmers of Illinois and the nation, and to develop agriculture.

George Thiem, Editor
John Tracy, Assistant

Published monthly by the Illinois Agricultural Association at 165 So. Main St., Spencer, Ind. Editorial Offices, 608 S. Dearborn St., Chicago, Ill. Entered as second class matter at post office, Spencer, Ind. Acceptance for mailing at special rate of postage provided in Section 412. Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Deraborn St., Chicago. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association RECORD. Government and Co-operatives

THINKING farmers and co-operative leaders are perhaps justified in showing some concern over the effect of government licenses and codes on co-operative organizations. Not that government officials are antagonistic to the co-operative movement. Quite the contrary is true. But will farmers themselves who are members of co-operatives be lulled into thinking that the co-operative is no longer necessary now that the government is performing some of its functions.

As a matter of fact, federal marketing agreements have been and are being largely developed by farmers' organizations. These agreements are succeeding best where farmers are represented by strong, well-managed co-operatives. It is doubtful if they could function properly without the aid and support of the farm groups.

No one knows just how long marketing agreements and government intervention to restore parity prices for farm products will be continued. Effective organization of farmers can and does influence such policies but it cannot always direct and control them. The strength and usefulness of co-operatives must not be impaired. It is important that they not be left in a weakened condition if and when the government withdraws from this field.

The Drought Rate Cut

IT WAS largely the persistency of the Illinois Agricultural Association traffic division which resulted recently in a substantial cut in freight rates on hay and feed shipped into the drought stricken counties of northeastern Illinois. The I. A. A. secured the co-operation of the government in making its appeal in hearings before railroad officials. The reduced rates effective Nov. 7 will save farmers one-third on hay and one-half on forage. In granting this request the western railroads were mindful of the fact that farmers, as a group, are their best customers. Without organization and the aid of technically trained men, it is a foregone conclusion that this and similar benefits could not and would not be realized.

Incentive For Quality

ILLINOIS cream producers who market through their own co-operative creameries are learning that there is a wide spread in price between good and poor butter. Under the old system of selling at the local cream station, high quality cream brings no more than extremely sour, dirty, and even rancid cream. There is no incentive to keep the cows and barns clean, use sterilized utensils, wash the separator each time it is used, cool cream promptly, and market it often, if the extra returns from the resulting higher quality butter go to the processor. Under the co-operative system, all this is changed. The more high scoring butter the co-operative sells, the greater its income and the greater the dividends going to members. It is more than a coincidence that in Denmark where the finest bacon and butter in the world are produced, farmer-owned packing plants and creameries do the processing.

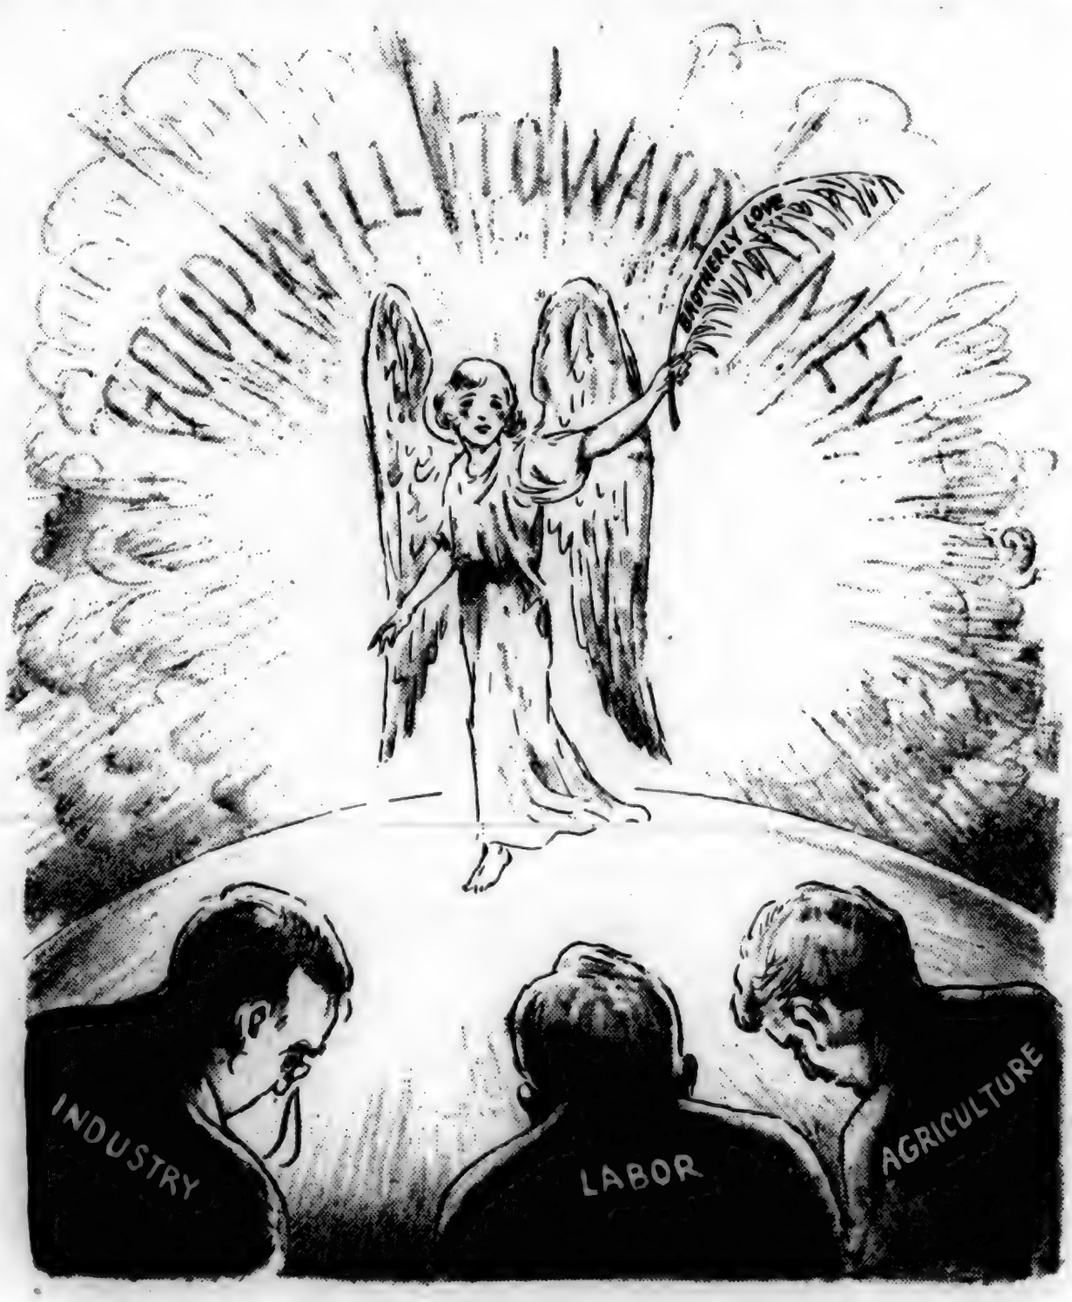
Future Farmers

PESSIMISTIC remarks regarding the future of farm organization and co-operation do not give due weight to the influence of agricultural teaching in high schools, colleges and to 4-H Club work. High school teachers who have a sincere interest in farm progress are doing more than merely instructing their pupils in better methods and the art of farming.

Ray Benbow, agricultural instructor at Normal, for example, writes in the "Fan Mill": "In both the classroom and project work I feel that we should be interested in farm problems principally from the practical aspect. As teachers we are constantly confronted with the question—'What shall I teach today that will be most helpful to the farmer of tomorrow?' I feel that I can be of most value to farm boys by directing their discussions and projects along lines of practical, co-operative activities backed by honest, sincere effort. We must help fit these boys to take their places in an organized, co-operative society. They should be instructed along the lines of fair play and honesty before we can achieve our goal. Start them in project work, in F. F. A. activities, in contests, teach them these principles, and then we will be achieving a goal worthy of any vocation. Make the boy realize that individual effort is important—that what he achieves depends on himself. He sets his own pace, encounters his own obstacles and in the end arrives at his own appointed destination. Teach him to work, think and act—honestly, sincerely and faithfully."

With such instruction and such ideals there need be no misgivings about the future of agriculture. The start made by the present generation toward improving the welfare of farmers through co-operation promises to be outdone by the future farmers of America.

Plan now to attend the I. A. A. annual meeting, Quincy, Jan. 29-30-31.



A Christmas Message

By Earl C. Smith

THE holiday season now fast approaching is a time for reflection, a period when the selfishness inherent in most of us gives way to the Christmas spirit of good will toward men. While we have all been through the valley of the shadow of depression, yet as we approach the Christmastide, it is well to consider and recount the peculiar opportunities and blessings afforded farm people.

If the Christmas spirit of giving rather than that of getting, of doing unto others as you would have them do unto you, could be put into every day practice by all men and all nations, it would solve most of the economic problems and troubles throughout the world.

The stress of recent years has almost removed this spirit of fairness between men and between nations. As a result, normal trade and relations have been thrown out of gear, from which all are suffering. In the heat of efforts to improve economic conditions and to secure government policies for the betterment of agriculture, sometimes we lose sight of the opportunities always present for thrift and industry, and forget the natural advantages farmers enjoy in the struggle for existence. Farming is a highly competitive business, yet we have an advantage in agriculture which few others enjoy. We have a daily market of one kind or another for our products, as people must have food. In other industries their markets are wholly dependent upon the capacity of the buying public. Farmers being the producers of and closer to the food supply than any other group in our national life are less troubled by the spectre of want than is the man in town who finds himself without the security of steady employment. In Illinois we are richly endowed with a naturally productive soil. Illinois and the corn belt almost invariably produce a crop. Even this year with the worst drought in history, Illinois has been far more fortunate than many other states.

While there is little opportunity to grow rich in farming as the world regards riches, yet the farmer is seldom poor as the world regards poverty. The security of its agriculture is the greatest asset of all nations. Whether on the farm or in the city, nearly every person at some time in his or her life desires to own land. In the past, farm property has been considered the best of security and I have every confidence will again be so considered.

While during recent years many farmers have been forced into the depths of discouragement and despair, the farm home is yet the corner-stone of the nation. The Farm Bureau program is directed toward improvement of conditions surrounding this ideal home, toward the greatest good for the greatest number. Its cooperative activities are inherently a system to spread benefits resulting from united effort and action and to distribute wealth wisely and widely rather than to concentrate it in few hands. Uninformed people may criticize our efforts to raise farm prices as a selfish program; yet students generally agree that equalizing the price level between farm producers and non-agricultural commodities will do more to stimulate trade and revive employment than any other one thing.

To the extent that recovery efforts have removed disparities and improved farm price levels, reflected in improved farm income, factory payrolls have increased.

Until the golden rule and fairness and honesty become more firmly established in economic relations between individuals and groups in this nation and between nations, American farmers have no other choice than to organize for their own protection. Because of the importance of the farming industry in all phases of American life, because of the peculiar opportunities and advantages of the farm and the farm home and because of the inherent fairness and honesty of a great majority of farm people, I have abiding faith that American agriculture will continue its record of furnishing the ideals, the integrity and the determination for perpetuating that spirit of fairness and good will toward all men that is most pronounced at Christmas time.

1935 Corn-Hog Plan

AS WE go to press, announcement of details of the 1935 AAA corn-hog-plan, specify a 10 percent reduction in both corn and hogs below averages for the base years 1932 and 1933, with benefit payments on the 10 percent corn reduction of 35c per bushel, and $15 per head on the reduction of hogs. Contract signers may grow anything except corn on the "shifted" acres and may reduce corn acreage up to 30 percent and get payment therefor.

Thus the program has been greatly simplified. Benefit payments to signers reducing the regular 10 percent will be two-fifths of the 1934 payment on hogs and a little more than half on corn. The contract signer whose total payments under the 1934 program are $500 on hogs and $180 on corn (total $680) will receive, based on a 10 percent reduction, approximately $200 on hogs and $105 on corn (total $305). The administration should be much less expensive in '35, compared with '34, because most of the needed production information is available in the '34 contracts.

Farmers who look ahead will reason that it's good business to sign up, first to cooperate in keeping production under control so as to maintain fair prices, and secondly to get the benefit payment, something they can count on regardless of what happens to crops and prices next year.

Because corn is relatively high-priced now, it is no guarantee that it will be as high next year. In fact, with a heavy crop it may be substantially less. And if drought and chinch bugs strike hard again, 35c per bushel on the reduced acres will not be hard to take.

Producers Creamery News

By Frank Gougler

On August 8 the first contract was let for converting the Vail Garage building 50 x 185 feet at Olney into a modern creamery. Saturday, November 10, the last piece of machinery was installed. This final piece of equipment was the power plant of Producers Creamery of Olney—a new 40 H. P. Fairbanks Morse Diesel Engine. Olney is the first to provide its own electric power plant, necessary in this case to avoid excessive power rates.

Cream received only from Richland county on the opening day, November 12, was churned into 500 pounds of butter under the supervision of Federal Inspector C. O. Tuttle. The first churning scored 90½. Enough cream was received on Tuesday, the second day, to make a 1,500 pound churning and Manager C. W. Simpson is confident that by the time he receives cream from all counties, he will be making from one to one and one-half cars of butter per week.

Producers, merchants, hotels and restaurants throughout the district have been eagerly waiting the opening of this plant so that they may be supplied with Prairie Farms Certified butter.

The Olney plant will serve 13 counties, as follows: Fayette, Jasper, Effingham, Crawford, Marion, Clay, Richland, Lawrence, Wayne, Edwards, Wabash, White and Gallatin. The organization is governed by a board of directors consisting of the following men: Burton Leamon, Olney, president; Rolla Barbee, Louisville, vice-pres.; J. C. Piper, Sumner, treasurer; Silas Andrus, Mt. Carmel, secretary; Perry Huber, Albion; Chester McCord, Newton; John Peters, Carmi; Walter Mellendorf, Effingham; Claude Ivers, Fairfield.

Manager Simpson has employed Geo. Adams of Salem as his buttermaker and plant superintendent. Mr. Adams has had several years experience as plant manager and buttermaker in the Salem, Illinois Dairy and in Chicago plants. All the plant help has been employed including truck haulers for nearly all counties.

The 13 counties comprising the Olney District have a total of approximately 60,000 milk cows on 2300 farms producing more than four million pounds of butterfat. There are more cream pools in the Olney district than in any other. Fifteen pools now serving the territory have been handling approximately 1,000,000 pounds of butterfat annually. These pools will all be closed eventually and the cream trucked direct from farm to plant twice each week. Butter scoring 92 or better will be packed in cartons under government inspection and sold in the district. Surplus butter will be shipped to central markets where it will be sold for a premium.

On its opening day, September 13, Producers Creamery of Champaign started off with a "bang." The plant was equipped on a million pound basis but the flow of cream into the plant the first few days was on a better than a two million pound basis. On the second day a wire was sent out for additional equipment.

On the first day 33 truckloads of cream were delivered to the plant. By evening one churning had been made, all vats were full and 11 truckloads still remained. The problem confronting Manager Burns, and President Williams was "what to do with the cream?" It was finally decided to dispatch a truck to the Farmers Creamery Company of Bloomington for a truckload of ten gallon cans. These were filled about midnight and stored in the cooler. On the second day another flood of cream arrived and so on day after day until the additional equipment arrived which made it possible to clean up the accumulation and take care of the regular flow.

Quality Comes Up

It is not always possible to anticipate what may happen in starting a project of this kind. It was a plain case of not being equipped to handle such a large volume. Everyone was overjoyed because of the large volume, yet it had its "kickback." Insufficient equipment made it impossible to properly handle and ripen the cream; therefore, this resulted in a low scoring butter.

October operation tells a different story. During the month, 138,948 pounds of butter were made—local sales amounted to 8,425 lbs. and shipped to market centers totalled 130,523 pounds. On this basis, the plant should put out approximately two million pounds the first year. It should be remembered that November is the lowest production month of the year, and furthermore, not all of the Champaign District is yet being served by truck haulers.

More Efficiency

Needless to say, the board of directors, the manager, and everyone connected with the plant is exceedingly happy because during October the quality of the butter has materially improved over the make during the last two weeks of September. Furthermore, the plant help has been shifted to serve its purpose better. Improvement in quality and more efficiency in the plant had already proved that this group of co-operators can "turn the trick."

The making of a better product has only been started. Federal Inspector C. O. Tuttle is visiting the plant each week to assist in standardizing the product. He first grades the cream into Grades AA, A, B and C. After the cream is churned he then scores the butter. The results reveal to him whether or not the plant

(Continued on page 15)

GOVERNMENT INSPECTION TO PRODUCE CERTIFIED 92 SCORE "PRAIRIE FARMS" BUTTER

ARE

ADVERTISEMENTS

Producers Creamery News

(Continued from page 10)

is making as good butter as the cream warrants. If not, then the next step is to find out why not. The grades of cream above mentioned should produce butter scoring as follows:

Cream Grade AA—93 score or better
" " A—92 " " "
" " B—90 " " "
" " C—89 " " "
" " D— under 89 score

How It's Done

This method of grading cream and scoring the butter gives a definite basis for making a higher quality product. If the butter does not score as high as the quality of the cream indicates, then the plant must be put in order. On the other hand, if the butter is as good as the quality of cream delivered, then the next job is to get the producer to take better care of his cream.

One point in connection with a co-operative creamery cannot be over-emphasized and that is this: **All the butter made in producer-owned creameries is still the property of the producers until it is finally sold, hence each producer has a financial interest in the manufactured butter.** Better butter brings more money. For an average over a four year period on the Chicago market, 93 score butter sold for 4.754c more per pound than 88 score butter. The old cream station method of assembling cream will not make much better butter than 88 score. Trucking from farm to plant twice each week is a great help, but there still remains much for the producers to do if their butter in their own plants scores high so it will bring more money.

On The Market, Dec. 1

Since July 15, Federal Inspector Tuttle has been devoting one-half of his time in the Peoria, Bloomington and Champaign plants to boost the quality of the product so we can put on the market a 92 score or better product. He is satisfied that the three plants, Peoria, Bloomington and Champaign, will be making a sufficient quantity of 92 score butter or better to warrant putting out a Federal CERTIFIED butter. This means that churnings scoring 92 or better will be set aside and put into our regular Prairie Farms Cartons except they will have CERTIFIED printed across the face of the carton, and on one panel it will show printed evidence of federal inspection.

In addition, a "Certificate of Quality" will be inserted within the carton. This certificate will also be perforated with the date of the churning, number of grading and the score of the butter when graded. Such carton and certificate can only be used in butter scoring 92 or better.

St. Louis Milk License Attacked By Dealers

St. Louis milk distributors have filed an injunction in the federal court at East St. Louis attacking the new milk license which raised the base price from $1.70 to $2 per cwt.

A hearing on the injunction set for Nov. 10 was continued to give attorneys additional time to prepare their arguments. The I. A. A. legal department is assisting Sanitary Milk Producers and the government in upholding the price increase.—Editor.

Rockford Milk Market

By Wilkie Lee, Manager

Our price for Class I milk in Rockford was $1.85 per hundred for 3.5% milk for the month of October. For surplus milk sent to the condensery, we received $1.18 per hundred for milk containing 3.5% butter-fat.

For the first 8 months of 1934, we had a gain of approximately three quarters of a million pounds of Class I milk compared with the same period of 1933. Of course no one knows what it might have been if we had done no local advertising, but we do give our National Dairy & Food Bureau program most of the credit for maintaining our Class I sales above the 1933 level.

We are expecting considerable sediment trouble this fall and winter as soon as our producers begin to keep their cows in the barn, because of a shortage of straw for bedding. We are asking our members to clip hind-quarters of their herd so they can be more easily cleaned.

Feed conditions in Winnebago County and adjacent territory from which we receive milk are possibly above the average for this year. This condition is due largely to getting some nice rains during the latter part of June that few others got.

Decatur Milk

The pool price for October was $1.44 for 4% milk f. o. b. plant, which is a 12c increase over September, reports H. W. Rotz, Manager Decatur Milk Association. The increase was partly due to increased Class I sales, also the increase in the butter market. We have been promised a milk license to become effective December 1, but we have heard nothing definite.

Country Life Radio Program

Country Life Insurance Company will sponsor a half-hour program on station WLS-WENR between 8:30 and 9:00 P. M. Thursday, December 6. The program will mark the wind-up of the company's year-end campaign for $67,000,000 of life insurance. The half hour will be devoted to short talks and reports by company officials, and entertainment.

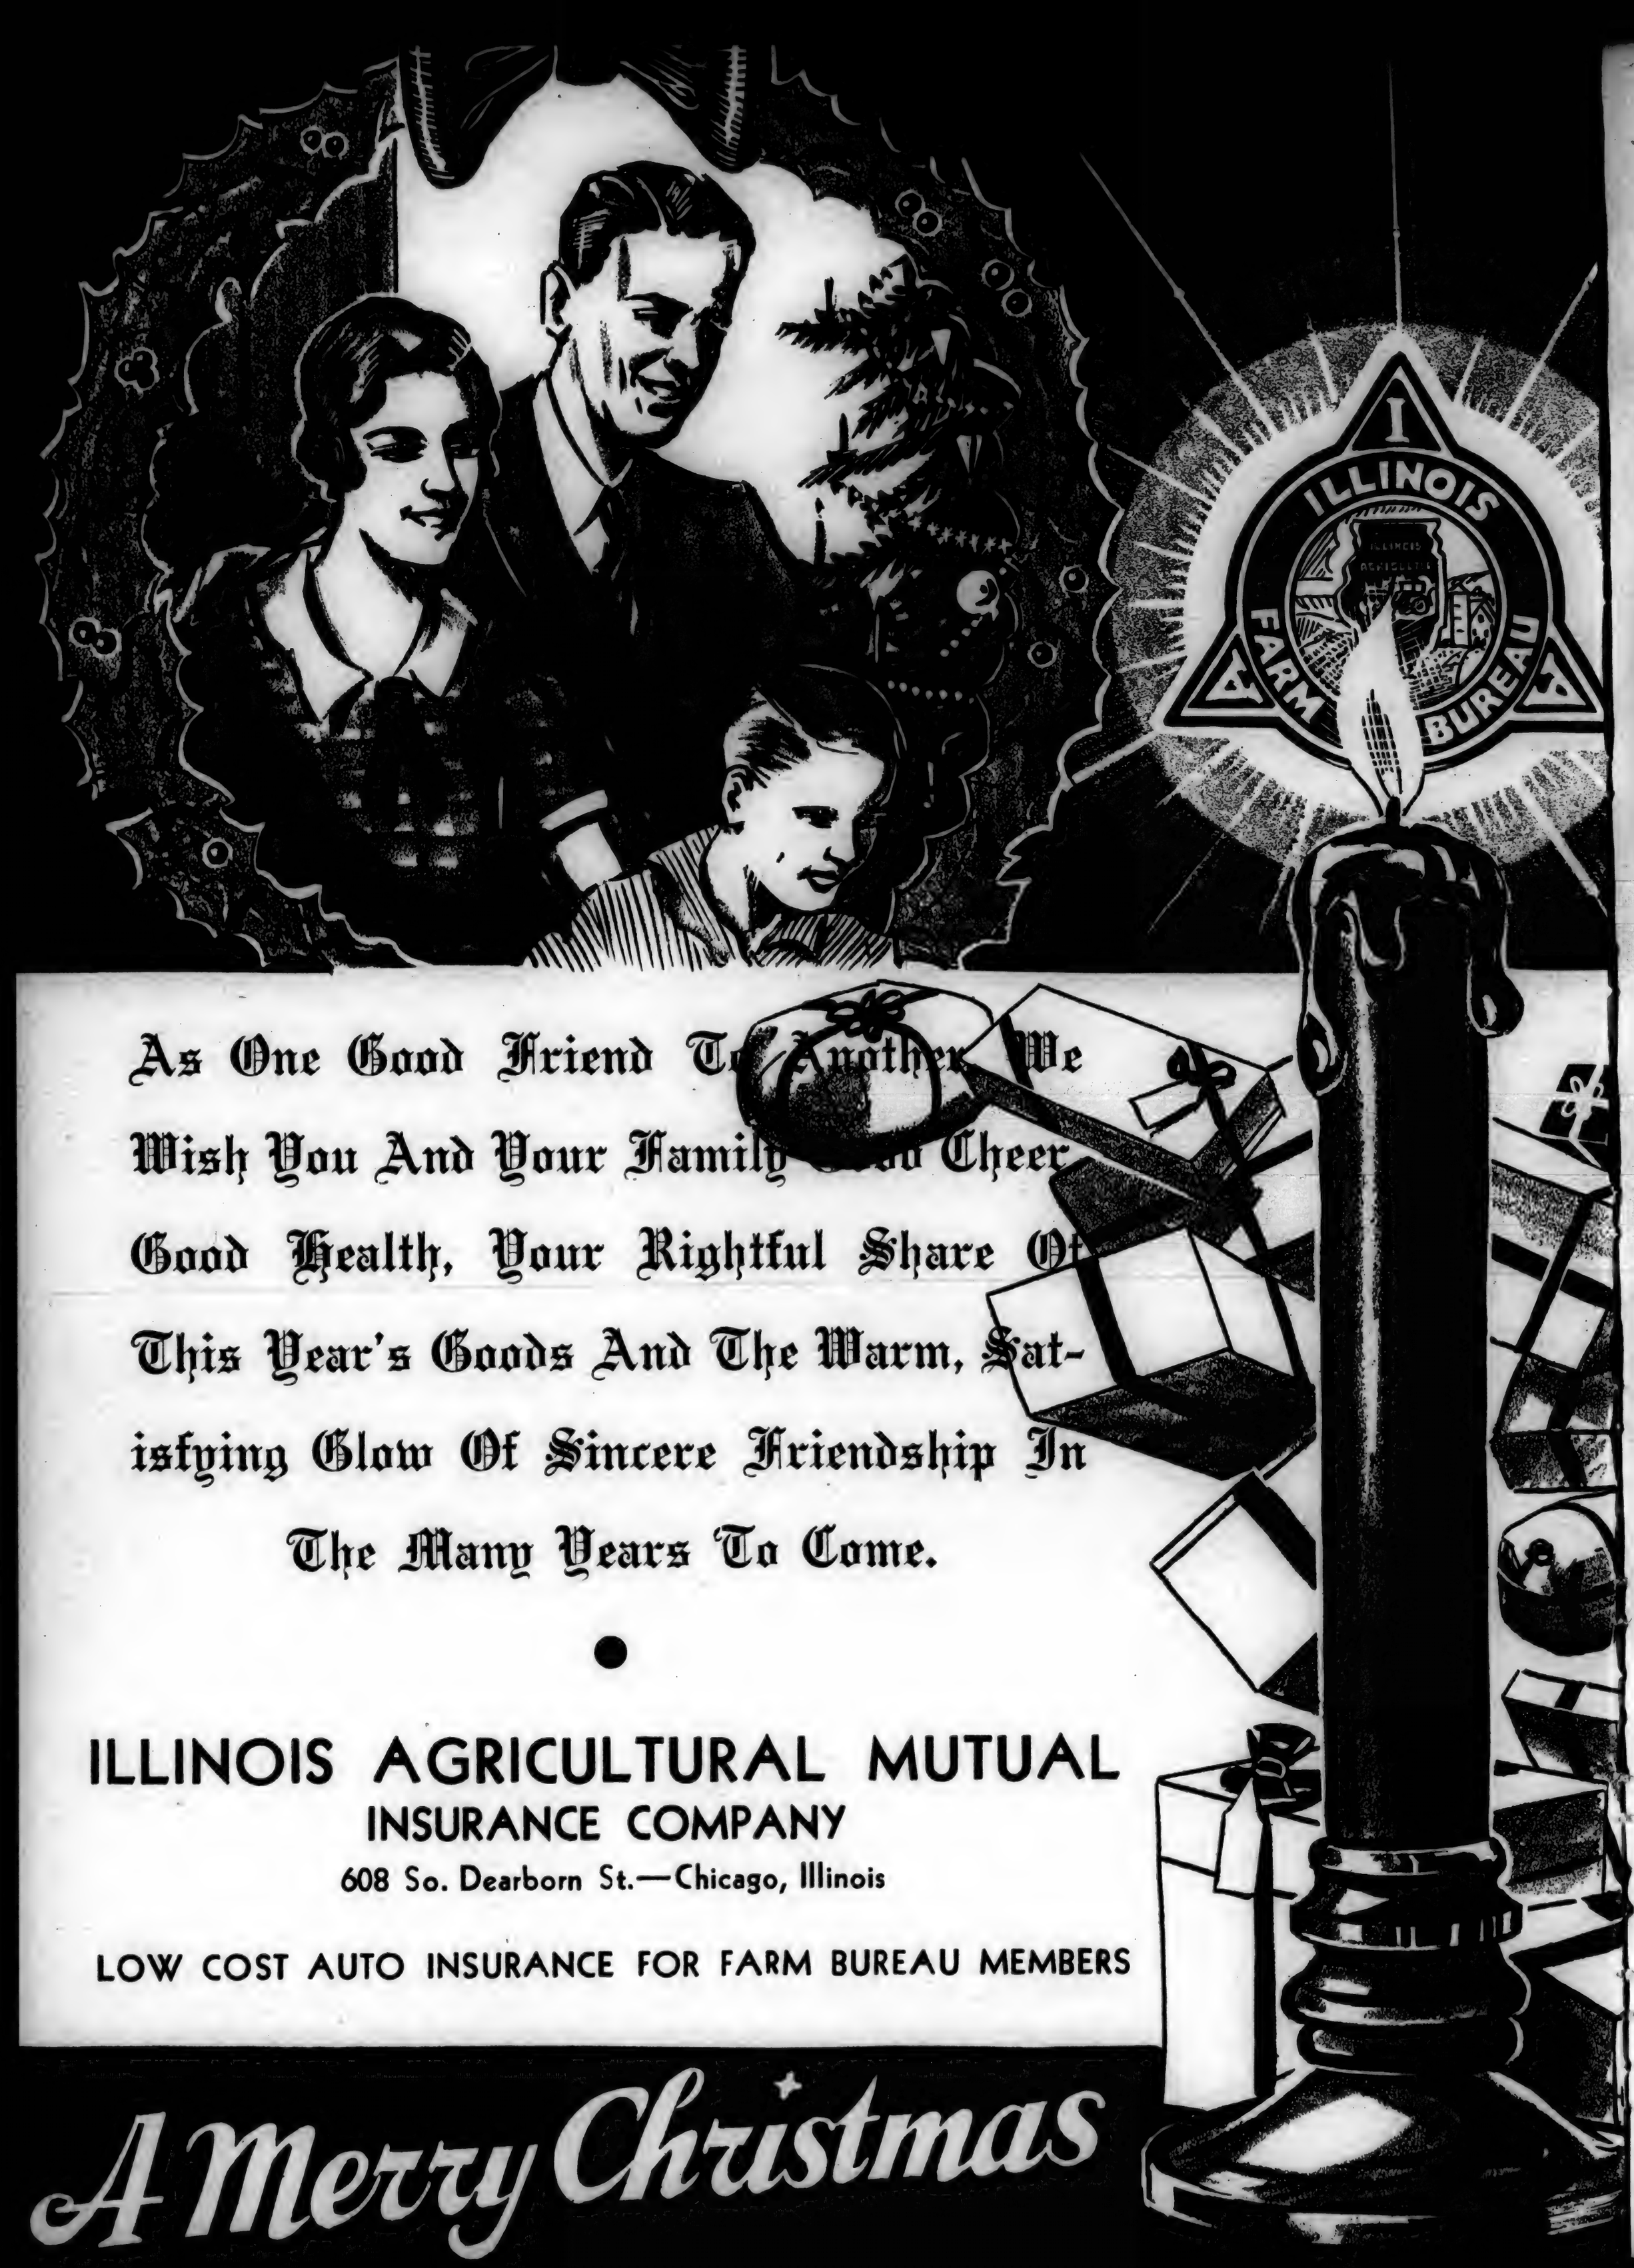
Bloomington Milk Market

By Forrest Fairchild, Manager

Production of milk for the month of October compared with last October has increased 9.21 per cent. Weather conditions have been favorable for milk production this fall. Sales have shown a substantial increase compared both with September this year and October a year ago. Average production is the highest we have had for the month of October. The price of 3.5 per cent milk delivered to Bloomington averaged $1.19.

Mr. Irwin, economist with the A. A. A. recently called on the distributors and producers' association in Bloomington to ascertain the attitude of both parties toward issuing a license on this market. The Association was assured that a license will be issued at an early date, possibly December 1.

With corn selling in the neighborhood of 75c, hay from $15.00 up, and protein supplements $38.00 to $42.00 a ton, milk prices are decidedly unfavorable. Prices paid for cream are now the highest since December, 1931. The is due to the increased price of butter and the cooperative method of marketing butterfat.



During October, McLean county sent more pounds of butterfat to Farmers Creamery than any other county. Macoupin was a close second, Total volume was 83 per cent greater than for October, 1933. Volume from five original counties for October 1934 was 34.2 per cent greater than for October, 1933. Quality has improved fully 45 per cent in the past two weeks, says Clyde Hamlin, plant superintendent. This is due largely to cooler weather, but it is significant in that producers could produce cooler temperatures for cream in warm weather by liberal use of cool water. Proper cooling and frequent delivery will add to farmers' profits if they will take advantage of their opportunities.

Farmers Creamery is getting substantial quantities of cream from the northern part of Pike county. A delegation of producers from that county recently drove up to Bloomington in three cars to inspect the plant. They were favorably impressed reports C. N. Atwood, field representative.

Peoria Producers Dairy

By Wilfred Shaw, Manager

Our price for October to members was $1.08 net for 3.5% milk delivered. Retail prices here are supposed to be 10c but milk is being sold all the way from 5c to 10c a quart. It would be difficult to predict what will happen on this market in the next 30 to 60 days. Our receipts are unusually low, due, no doubt, to the low price of milk, higher butterfat, and high cost of feed. At the Creamery we are paying 28c delivered for butterfat and 26c at the farm. Sales of our three butter routes to stores have never been higher in spite of the recent advance in price (30c) to stores.

As One Good Friend To Another We Wish You And Your Family Good Cheer, Good Health, Your Rightful Share Of This Year's Goods And The Warm, Satisfying Glow Of Sincere Friendship In The Many Years To Come.

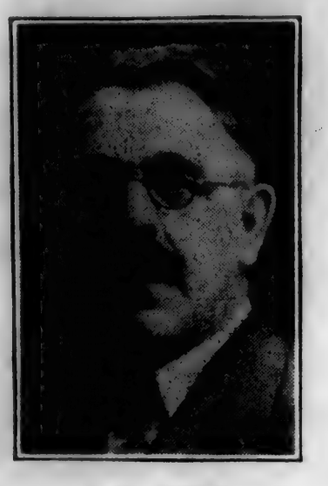
LOW COST AUTO INSURANCE FOR FARM BUREAU MEMBERS



A Merry Christmas

Leadership Training

By A. B. Culp, Organization Director, McLean County

IN McLEAN county we are developing two distinct groups of leadership to carry on the Farm Bureau program now and in the future.

In our Booster Clubs, six of which have been organized, we are calling on men ranging in age from 35 up who are today carrying the responsibility not only of operating their farms but also of organization to protect and work for the betterment of agriculture.

A. B. CULP

In this group it is our primary object to study current subjects such as tax reform, bond issues, national legislation, administration of laws, marketing problems and the like. We hope to have at least 150 taking part in these group meetings held twice a month. We hope to have at least 10 men in every township who are thoroughly familiar with all current problems affecting agriculture.

The other group we are developing is the McLean County Young Men's Forum or training school. This is for young men who have graduated from 4-H club work on up to 35 years of age. We hope to have enrolled in this school at least 100 young men. The purpose of the training school is to develop leadership in the Farm Bureau which will gradually take over the responsibility of carrying on the fight for agriculture.

Each member enrolling in the training school will be asked to sign a pledge to attend the meetings throughout the year ending September 20, 1935, and to aid in carrying out the program.

We believe the enrollment pledge is quite necessary. It places the responsibility of the school upon the shoulders of the students. Meetings will be held every month. Lessons will be provided on mimeographed sheets with references for study. Students will be quizzed at each session. We are starting with the study of previous farm organizations that we may find their weak spots as well as their strong ones. We will study the constitution and by-laws of the organizations, the I. A. A. and A. F. B. F. We will also study federal laws affecting agriculture, also the history and development of the Farm Bureau and the I. A. A.

From here we will go on to a study of each department of the I. A. A. Later we expect to have debates and entertainment to keep the students interested. Each will be called on for extemporaneous remarks from time to time. Every member of the Forum some time during the year must appear before the group in an oration or a debate.

Later in our program we expect to study parliamentary law and organize the group into a legislative body to illustrate how legislation is initiated and enacted.

We feel in McLean county that able, intelligent leadership is the greatest need of agriculture today, and that by developing leadership we will render a great service to agriculture.

Commenting upon this program Farm Adviser R. J. Laible said: "I personally feel, and I know that it is the sentiment of our board of directors, that this is the most forward looking piece of work that has been attempted in McLean county for many years. We look forward with anticipation to the results which we sincerely believe will come from it."

Young Men's Club Is Organized In Randolph

A Young Men's Club composed of sons and daughters of Farm Bureau members more than 18 years old has been organized in Randolph county. An initial membership of approximately 75 is reported by Farm Adviser Secor.

The club was organized with the aid of D. E. Lindstrom, rural sociology specialist of the University of Illinois.

Dramatics, debates, and discussion of current events will be featured. Three discussion teams with three speakers on each will compete in a county contest, the three best speakers to be selected for a district meeting.

For the Waterway

Editor I. A. A. RECORD:

I was pleased to read in the October RECORD the "Waterways and the Farmer" article. I have been deeply interested in the Illinois river waterway since a boy. Father was a farmer in this valley and I am now at 77 years old.

I saw the value of the waterways in central Europe in 1910. My interests are principally in Spring Valley, Illinois. I am working hard for a waterway connection there and would like a few copies of this issue for our bank and coal company. They are trying to arrange to ship coal by waterway.

Fred Gunther, LaSalle county, Illinois.

Progress In Auto Insurance In 1934

By A. E. Richardson, Manager

While the year is not yet ended, and no official reports of progress have gone into the record books indications are that the Farm Bureau auto insurance company, Illinois Agricultural Mutual, is going to chalk up the year of years for itself. Several factors enter the picture to account for our remarkable gains. First, farmers have more money to spend. A new plan of acquiring business has aided substantially. The renewed feeling of confidence of farmers over the successes made by the Farm Bureau in raising prices of farm products has influenced many "holdouts" to take out insurance in their own company.

A consistent publicity program in the form of weekly releases going out over the state stressing the need for careful driving has been followed all year. Regular advertising in the **RECORD**, in County Farm Bureau publications and booklets has kept Farm Bureau members informed about the "bargain" auto insurance the company offers. Tie this all together with low cost operation and efficient work of a loyal force in the office and field, and you have the picture of a healthy organization growing in service to Farm Bureau members.

Gain In Policies

Too much credit cannot be given to the local adjusters and agents for the splendid spirit of co-operation they have shown this year. Without their help and hard work we would never have made the progress revealed in the following records.

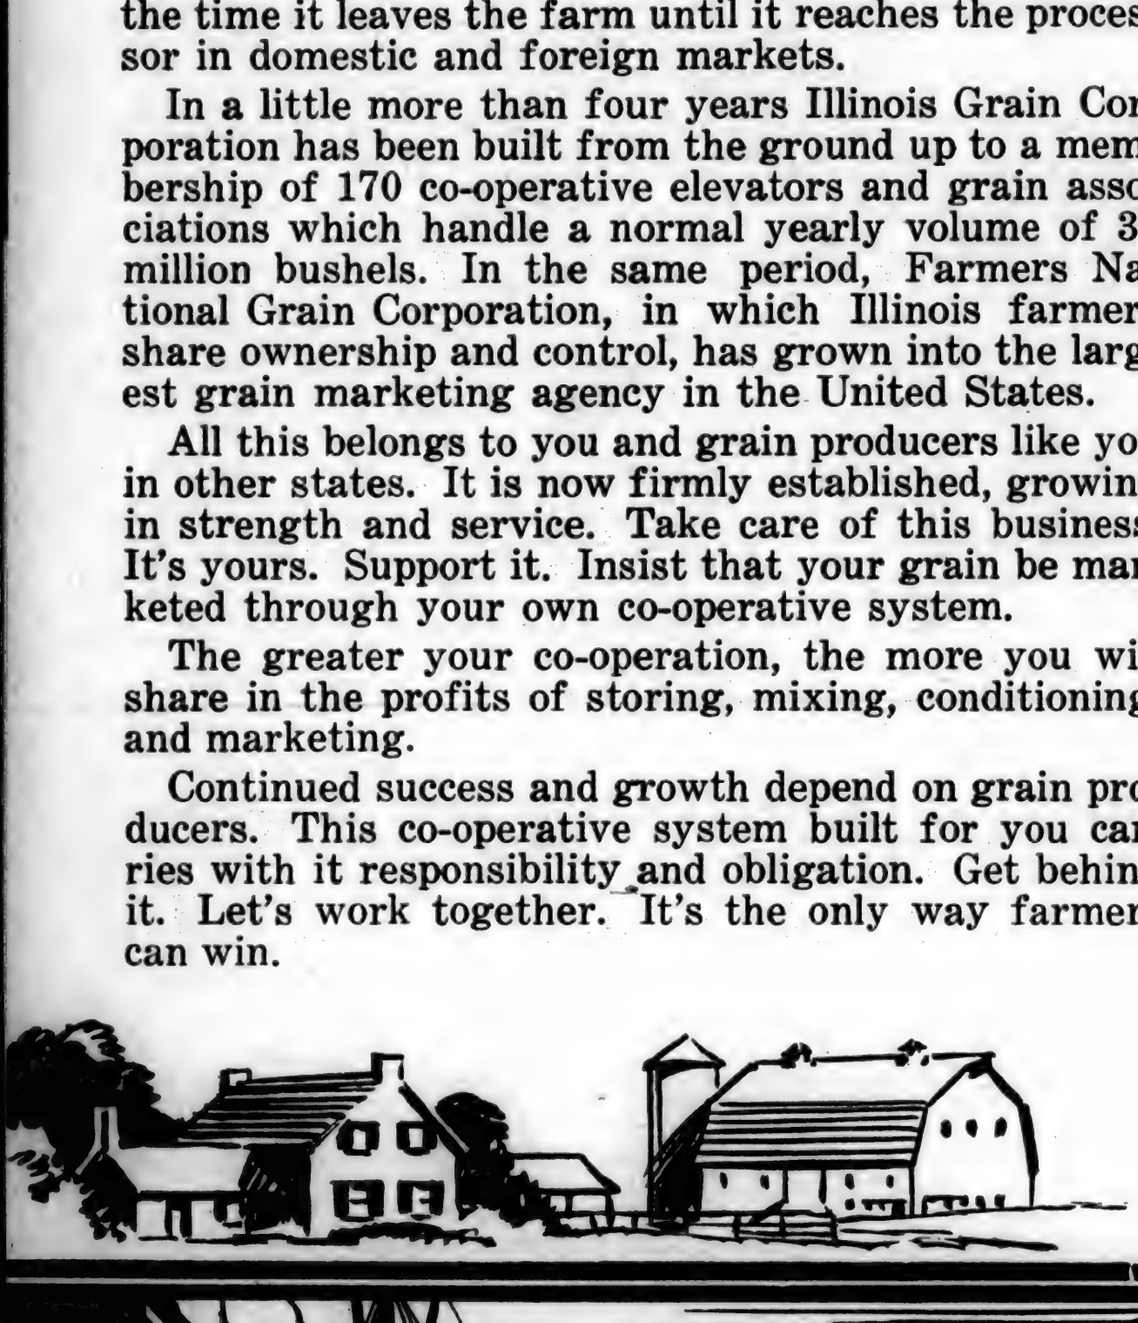
From January 1st, 1934 up to the first of November the number of net policies in force after deductions for cancellations has increased from 31,790 to 37,200. This is a gain of 17 per cent. Claims reported so far this year are 36 per cent more than last year for same period totalling 6634. Assets of the company have increased 12½ per cent to $1,115,460.28, which for the most part is invested in government, state and municipal bonds. Surplus also shows a gain of 14% per cent to $561,218.29.

Of the 37,200 policies now held by members, 31,476 are on pleasure cars, 5724 on trucks both farm and commercial, 1365 employers liability policies, and 1601 calves owned by 4-H Calf Club boys and girls.

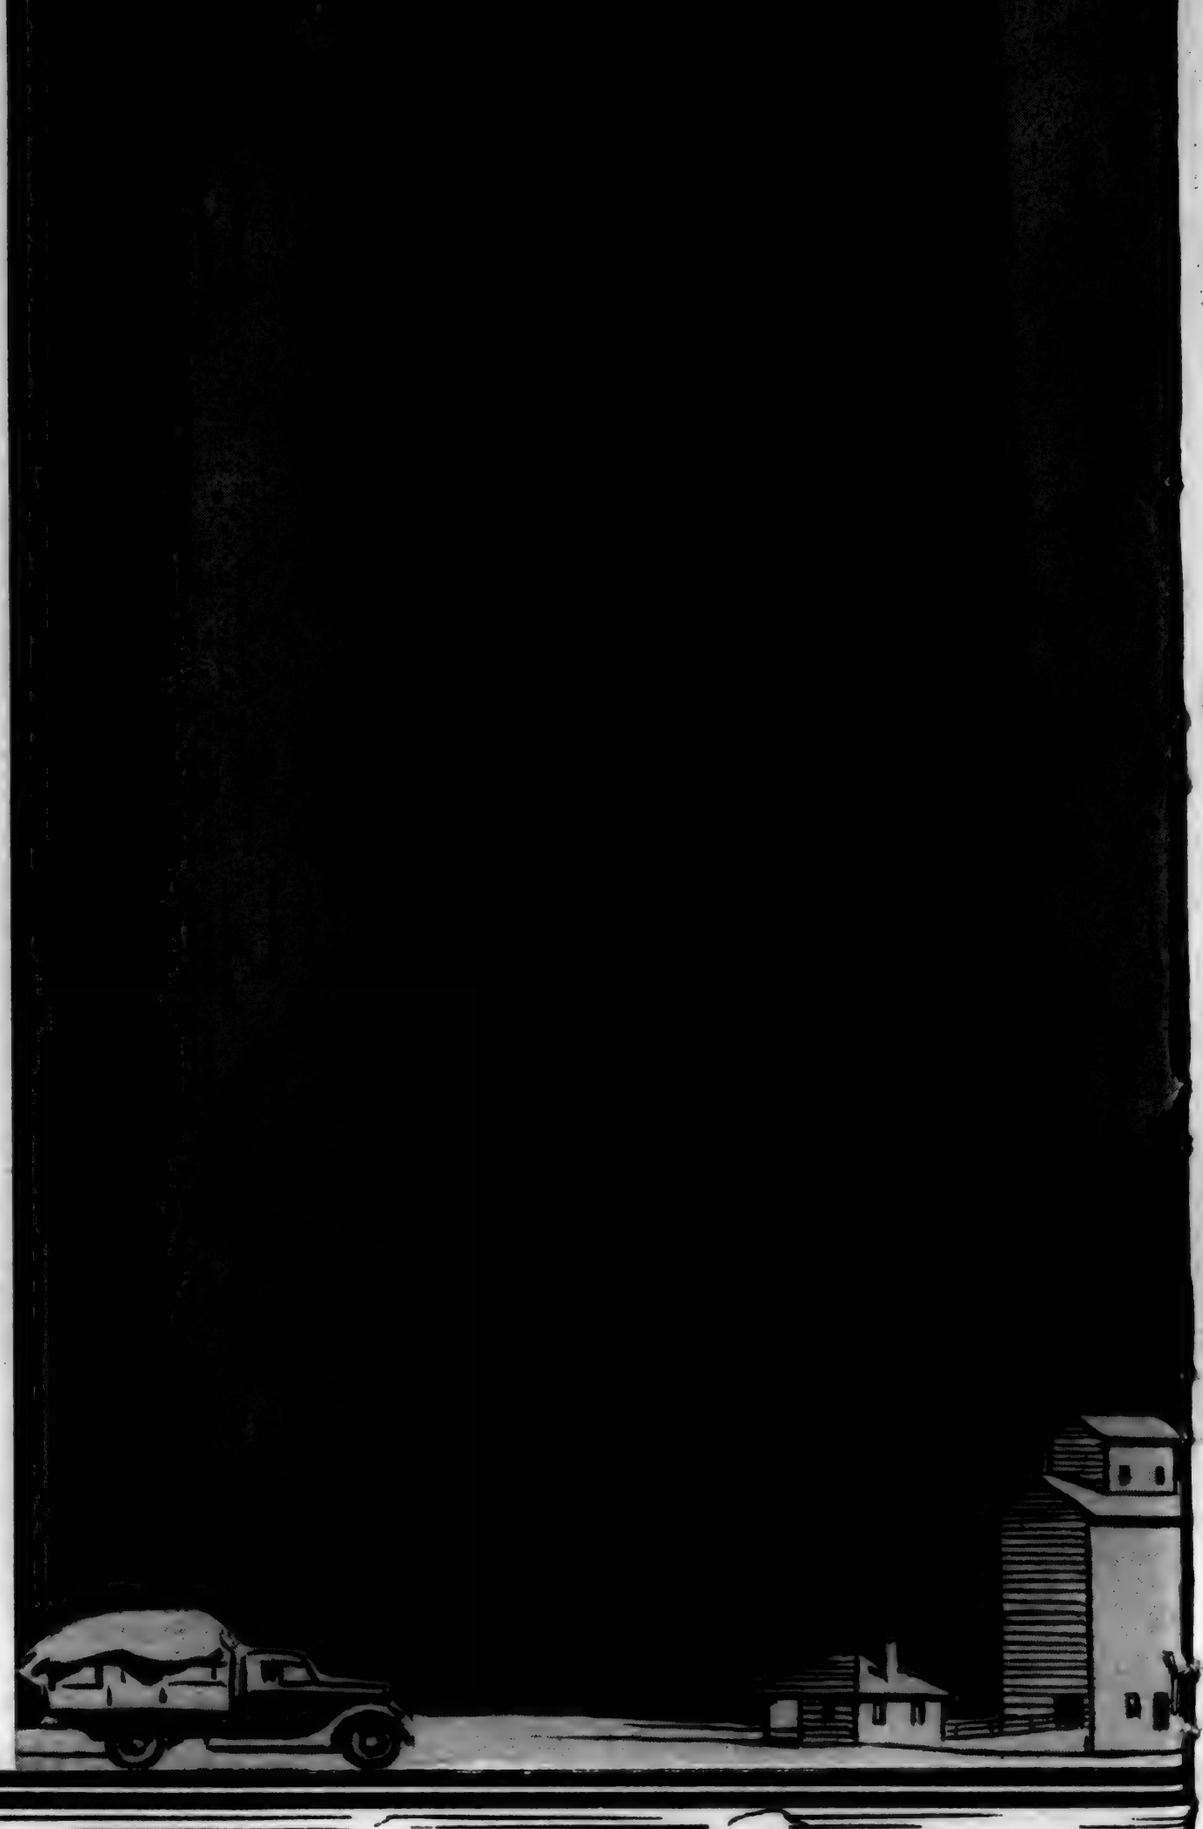
While the year so far has been very satisfactory we feel that we have only scratched the surface so far as insurance service to farm people is concerned. With the membership of the Illinois Agricultural Association and Farm Bureaus rapidly increasing, this company has a real job ahead for 1935.

New terminal elevator of Farmers National Grain Corporation on Illinois River, Peoria. The new plant adds additional capacity to Farmers National nation-wide facilities. It is equipped for loading and unloading to and from river barges and rail.

GROWING in STRENGTH and SERVICE



For the first time in history the Illinois grain producer has a complete co-operative grain marketing system. It is farmer-owned and farmer-controlled . . . working to return him more money for his grain from the time it leaves the farm until it reaches the processor in domestic and foreign markets.



In a little more than four years Illinois Grain Corporation has been built from the ground up to a membership of 170 co-operative elevators and grain associations which handle a normal yearly volume of 30 million bushels. In the same period, Farmers National Grain Corporation, in which Illinois farmers share ownership and control, has grown into the largest grain marketing agency in the United States.

All this belongs to you and grain producers like you in other states. It is now firmly established, growing in strength and service. Take care of this business. It's yours. Support it. Insist that your grain be marketed through your own co-operative system.

The greater your co-operation, the more you will share in the profits of storing, mixing, conditioning, and marketing.

Continued success and growth depend on grain producers. This co-operative system built for you carries with it responsibility and obligation. Get behind it. Let's work together. It's the only way farmers can win.

ILLINOIS GRAIN CORPORATIO

608 So. Dearborn St. Chicago, Illinois

Country Life Nears 67 Millions

By Larry Williams, Manager

COUNTRY Life Insurance Company will finish its sixth fiscal year at the end of December, 1934. It will, however, not fully complete six years of existence until February 1, 1935, from an operating standpoint, as we wrote our first policy on February 1, 1929.

The approximate amount of business we anticipate to be fully in force at the end of our sixth year is $67,000,000. This amount is impressive when considered that it has all been written in one state, and all during the years of depression.

We are continuing to operate in all Illinois counties, getting some business from each. There are, of course, varying degrees of activity in different counties. Where the ideals and purposes of Country Life are really appreciated we are getting marvelous support. Where the unsurpassed strength of the Company is understood we have little trouble in getting active production. When our lowness of cost is given due weight coupled with other factors, Country Life wins out against all competition.

Counties Vary

The aggressiveness with which our life insurance project is carried on is one thing we must constantly be on the alert to develop and increase. We have some counties with three million of life insurance in force, and others with only $100,000. We have some counties that will write nearly a million a year, and others that will write a bare application or two.

The amazing thing in the growth of Country Life is that a few of our best members still doubt that farmers are capable of supervising and hiring competent help to run a business. After going through a depression, and looking at the annual statements of other life insurance companies, there shouldn't be a question in the mind of any farmer or Farm Bureau member on this point.

No other company can show such a portfolio of investments, and no other company can show such a history of acquisition as Country Life Insurance Company.

The all-important thing in confidence building has been the state-wide representation and control. Our Company is owned and controlled and operated by the Illinois Agricultural Association. Its vast membership has adequate representation in all of the Company's affairs. Not only has the Company fulfilled the expectations of its sponsors, but in addition it has been able to pay, through the Illinois Agricultural Association, patronage refunds as benefits to policyholders that otherwise have not been recorded in life insurance statistics.

Great Improvement

The final report of 1934 will show a tremendous improvement in acquisition, and increases in assets and reserves. Our gain will probably be 100 percent over the gain in force of 1933. The continued low mortality is one of which every policyholder can be proud. But, outstanding among all the statistics will be the fact that Country Life Insurance Company has not lost one penny on its investments.

Then, why should there be doubters? Why should there be any who fail to give their complete support? The successful experience and accomplishments of the Company deserve whole-hearted and active support of every Farm Bureau and Farm Bureau member in the state. We offer policies that are available to all healthy risks up to age 65 inclusive, within the financial means of each.

Illinois now has a new investment law for life insurance companies that is more strict than the investment requirements for life insurance companies in any other state. This, coupled with the setup of service board management and active management, should add to the confidence of all policyholders and members in this strong company. If all policyholders asked for their cash values on the same day the money would be there for all of them.

Propaganda Plentiful

There is naturally the disgruntled attitude of competitors who see this rapid growth of a fine company, built and owned by farmers in the State of Illinois. Some use underhanded methods of belittling our great Company. That is to be expected. But for Farm Bureau members to give cognizance and hearing to such propaganda is something that we must not expect and haven't any right to expect. The Farm Bureau member should certainly have confidence in a company that has fought its way to the top in strength, growth, and low cost.

The County Farm Bureau continues to be the county agency, through which all policies are distributed. The Farm Bureau receives a part of the commission, for its supervision and the use of its office. We have paid our way as we go; we have built to new heights undreamed of in the short years of operation, and with added confidence will make of this company a giant of the west, performing beneficial services and guaranteeing security of the highest type.

The year 1934 will show a substantial increase in assets, bringing our total somewhere between three and a quarter and three and a half million dollars. Business men from various walks of life have complimented us on our portfolio of investments, and on our marvelous accomplishment. They read our statement and invariably are profuse with their congratulations. This is the thing that policyholders should be proud of, and this is the thing that should breed added confidence, and awaken new aggressive solicitation in every Farm Bureau community in the State of Illinois.

We Are Getting Along

By C. C. Burns, Mgr.

Producers Creamery of Champaign is paying 26c for butterfat, which is a current price hereabouts. Cheese factories are paying 30c a pound for butterfat in milk. Farmers are thus getting practically nothing for their skimmilk.

We are getting volume, quality and are making a net profit: three things necessary for successful operation of the plant.

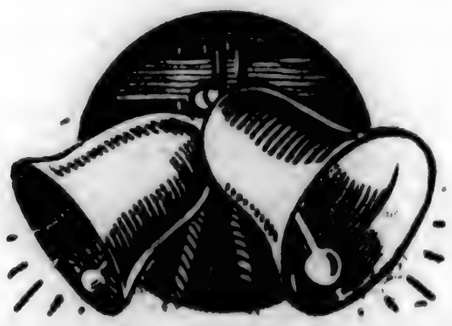
Monday, Nov. 12, we churned 5,567 pounds of butter—evidence of our large volume. We are making some of the finest butter in the state. We made 6,876 pounds of 92-score butter in October.

Had we made 52c more last week, we should have had an even $500 net profit. These facts are evidence of the success of the plant here.

Buying Soybeans

Charles Cummings, manager of the Farmers National Grain Corporation at Peoria, reports buying approximately 300,000 bushels of soybeans in the past few weeks at prices ranging up to 90 cents per bushel. An increased demand for soybeans for seed, feed and commercial purposes is expected to more than take care of this year's increased crop. Yields of beans are on some farms and the quality is excellent.

E. E. Stevenson, president of the Lasalle County Farm Bureau, recently celebrated his 71st birthday in Texas where he hooked a 16 lb. red fish 36 inches long.



Greetings

Wishing You and Yours
the Joy and Contentment
of an Old Fashioned

Merry Christmas

FARMERS MUTUAL RE-INSURANCE CO.

FIRE, WINDSTORM and HAIL INSURANCE

Learning about Livestock

YOU are impressed if you go on one of the marketing tours arranged by Ray Miller that the Chicago Producers has a staff of livestock salesmen who know their business. They can point out the shades of difference between various grades of livestock and why some kinds bring more than others.

An inexperienced eye can see the variation in a bunch of mixed calves but it requires an expert to get the last penny out of each one. Henry Johnson, calf salesman, can tell you about them. "Here are a couple that are plump and of the right age," he said as we stopped at the calf pens. "They have been whole milk fed. See how well filled they are about the tail head. This kind will bring seven cents a pound today. It doesn't make much difference about the breed. Over here are a couple of calves that are thin, bucket fed. All they got probably was a little skim milk and they didn't do well. They will sell for about three to 3.5 cents."

Then he sorted out calves of various weights and ages and told how much they would bring. Heavy and older calves bring much less—3.5 to 4 cents—than the light choice vealers. Choice veal has many uses—even as a substitute for chicken.

A Kosher Cow

Cattle salesmen Ray Walsh, Walter Howe, Geo. Story, Harold Duke and others tell you what happens to the various grades of steers, heifers and cows that come to market. "Here's a Kosher cow," pointing to a large, heavy, well-finished animal. "She's heavy in the forequarters and well filled around the ribs and loin. The Jewish trade uses only the meat from the hooks forward. That kind of a cow will sell up to $7.50.

"Over here is a canner," pointing to a thin Holstein, "worth about $2.50, suitable for sausage, mostly hide and bones. Here's a thin heifer that will probably go out in the country again as a feeder. She's too thin to kill and the kind that will make good gains in the feed lot."

You think of the waste in sending that class of cattle to the terminal markets, with transportation costs two ways, commissions for selling and buying, yardage fees at the market, and the loss from shrinkage in weight. Then there's the chance of picking up shipping fever and other ailments in going from the farm to Chicago and back again. It looks like stupid business, one of those things that has grown up and never changed perhaps because it's always been done that away.

"Here's a typical bologna bull," Hop Kenyon says as we gather around. "See his muscles. Lots of red meat there and little fat. The kind packers want. He'll go into wieners and bologna sausage. The lean meat will soak up lots of water. This fat bull over here looks better but he won't bring the price. The fat will go into soap. Fat meat will not absorb as much water as lean."

Mixed Steers

Harold Duke has assembled a mixed lot of steers. He shows you a smooth, well-finished Angus and tells you it will bring about $8.75, close to the top of the market that day. He shows you others not so well finished. Some of them thin that will sell for $8, $7.50, $6, $5 and on down. "The little packers will take this one and bid up for him," he says pointing to a baby beef, "but this heavier one over here has only a limited market. The big packers will take him for the chain store trade at a lower price."

You see a big well bred Shorthorn cow with gobs of fat around the hooks and pin bones. She may look good to her owner, but not to the packers. All that patchy fat is largely waste. The housewife won't take it. You see a big rugged steer, heavy boned, two years old or more, and fat. You learn that he will sell for considerably less than a small-boned fat baby beef largely because of the difference in dressing percentage.

Light Hogs

Over in the hog alleys Bob Grieser, head salesman, shows you that there are more than the usual number of half-finished porkers. In fact, most of them weigh under 200 pounds. Three-fourths of the runs at Chicago and elsewhere now are lights and light butchers. High priced corn is the reason. Two years ago when corn was cheap and plentiful, heavy butchers weighing 240 to 250 pounds were more numerous. This year hogs are being crowded to market early, which makes market experts believe the price will be substantially higher in the late winter and early spring.

"We are doing more than merely selling livestock here," Manager Dave Swanson says. "We are making a market. It's important that we have substantial volume and able men to sell the stock because each day we are building the price structure. We believe the Chicago Producers is a constant and effective influence for getting farmers better prices for their livestock. In the end it's the consumer, of course, who has the deciding voice as to price. But over short periods farmers can influence the market by concentrating their bargaining power in the hands of their own co-operative agencies."—Editor.

A circular on how dairymen can obtain short-term loans may be had from local production credit associations or from the Farm Credit Administration in Washington, D. C.

ANNUAL MEETING ILLINOIS Farm Supply Co., Decatur, Oct. 18. They heard about the six million dollar business in petroleum products handled by the 58 county companies last year.

Observations

Writing in the Journal of Land and Public Utility Economics (November) M. M. Kelso predicts that "land tenancy is likely to continue the rapid increase which set in between 1925 and 1930 because:

1. There has been and may again be an increased amount of foreclosure of farm mortgages by mortgage holders who are in no position to operate their farms themselves.

2. The decreased optimism concerning the rising level of land values and the safety of debt secured by land will likely tend to make down payments larger and purchase slower because of the necessity for larger accumulations.

3. The belief that land is highly desirable as an investment because it cannot burn up, blow away, or be stolen may be replaced by the conception that its value may disappear—a contingency to be as greatly feared as though it were to burn, blow away, or be stolen—thus impressing upon farmers of moderate means the desirability of working toward 'income' and 'living' rather than carrying the added risks of ownership."

The last few years have brought home with terrible force to many, the risks and responsibilities involved in ownership of land and other real property. The tenant has had all the best of it compared with owners who had interest, taxes, and principal payments to meet besides the usual repairs.

On the other hand, the depression has proved the superiority of land and real estate as an investment in comparison with certain kinds of stocks, debentures, and some industrial and utility bonds the value of which almost if not completely evaporated. It has also shown the value of life insurance in every man's financial program, whether he be operating a farm or working in the town or city.

With some notable exceptions life insurance companies have come through the depression able to meet their claims and with the cash values of policyholders unimpaired. To their sorrow, some folks during the '20s and before mortgaged unencumbered land to purchase more land when a wiser course would have been to invest their spare earnings in life insurance for protection to their families, and for old age income.

Only a glance at the list of investments of Country Life Insurance Co. shows how diversified they are, offering security for the capital invested far greater, yield considered, than any individual of moderate means could hope to achieve. These funds represent cash values belonging to policyholders. Cash values can be borrowed or used as collateral for loans in case of emergency. It has been almost impossible to borrow money on real estate during recent years. Thus life insurance meets the requirement of liquid assets in a well-balanced investment program.—E. G. T.

Cattle Feeders Banquet

About 175 livestock growers and cattle feeders attended the annual Greene county cattle feeders' banquet in Carrollton the night of October 27.

Speakers included P. O. Wilson, J. R. Fulkerson, H. D. Wright, Ray E. Miller, Farm Adviser George E. Hunt of Greene county and Mr. Boyle of Chicago.

K. T. SMITH

Guests included R. J. Laible, McLean county farm adviser who initiated the cattle feeders' banquet while serving in Greene county; W. F. Coolidge, Macoupin county farm adviser, and several cattle feeders from neighboring counties.

The 1934 banquet was arranged by the county livestock marketing committee of which Louis Reisch is chairman. K. T. Smith, president of the Greene County Farm Bureau and I. A. A. director, served as toastmaster.

The cattle feeders' banquet has been an annual affair in Greene county for the past 10 years and is regarded as an institution in that county.

Dean Larsen Writes

"I read with much interest the article in the I. A. A. RECORD giving a little of the history of the Quincy Cooperative Dairy, and also describing its success," writes Dean Chris Larsen of South Dakota Agricultural College in a letter to Plant Supt. Crocker of the Quincy Co-op. Dean Larsen was Director of Dairy Marketing for the I. A. A. in 1922-'23.

"Really the I. A. A. had more to do with the organization of it than was mentioned in the article," continues Dean Larsen. "The I. A. A. supplied all of the stock solicitors, held all of the meetings, and raised all of the required money. That was really the big job in connection with starting the organization. The I. A. A. also supplied the technical help in planning the business, and in the selection of the machinery and the place of business.

"Of course, you have had a good bunch of farmers down there, who have depended upon their management, and you have had good management. In addition the Quincy people were and are mighty fine in patronizing this cooperative dairy. I remember before the plant was started we went to see the publishers of your daily papers, also the Commercial Club or Chamber of Commerce. This organization had a banquet in honor of the organization of the Co-operative Dairy. So the conditions for a co-operative organization were mighty fine, and you, and also Mr. Connery and your lady office manager, Mrs. Laura Johnston, are to be congratulated.

"I feel mighty proud of the success of your co-operative milk plant. It is able to return more to the producers, and it is able to sell at a less price to the consumer, and I venture to state that you are supplying a mighty fine quality product, probably the best that can be found anywhere."

ARTIST'S SKETCH OF NEW HOME OF INTERNATIONAL LIVESTOCK EXPOSITION WHICH OPENS SATURDAY, DEC. 1 AND CONTINUES TO DEC. 8. The new building erected on the ruins of the old one destroyed by fire is modern throughout.

BLUE SEAL MOTOR OIL — ILLINOIS FARM SUPPLY COMPANY

PENN BOND MOTOR OIL — ILLINOIS FARM SUPPLY COMPANY

PENN-BOND and BLUE SEAL Motor Oils and Greases

. . . Setting the Pace in Sales and Savings on Thousands of Illinois Farms

PENN-BOND (100% pure Pennsylvania) Motor Oil comes from the finest Pennsylvania crudes. Carefully refined and fitted to Illinois farm work and weather. It gives heat resistance, "oiliness," and stability. Penn-Bond cuts friction, repair bills, prevents motor troubles and costly delays. It lasts longer under heavy duty service. Do as thousands of economy thinking farmers always do — buy it by the drum from your County Service Company.

CHANGE TO WINTER GRADE OIL NOW!

10-W and 20-W

PENN-BOND and BLUE SEAL

Pump and Flow at Zero

Save your battery. Avoid cold weather starting troubles. These low cold test oils are Paraflow treated and have the same high heat resisting and lubricating qualities as summer grades. Do not delay. Prepare your car for safe winter driving.

CHANGE TO WINTER GREASES TOO!

BLUE SEAL (Pure Paraffine Base) Motor Oil is refined from selected Oklahoma crudes. Work-tested to meet the needs of today's auto engines and heavy duty tractors, Blue Seal resists heat, protects the bearings and pistons from wear where ordinary oils carbonize and "fry" away. It has proved its superiority and operating economy on thousands of Illinois farms. Buy it by the drum and save money. Order your supply today.

VOTE FOR "HEAP" BIG MILLION

Ask your salesman how you can vote and how your vote will count in THIS big landslide. Look for the "Pacemaker's" mark in your barn yard.

EDUCATION OF … AND AGE …

SECURITY

... Country Life is a legal reserve ... providing the utmost ... protection with ... accurate security for the ... policy holder.

...GTH Not how big, nor how old, but how strong ... is the yardstick used in judging a life insurance ... Country Life is second to none in strength.

...UID Its ... of liquid assets to business in force is ... Authorities consider ... Life the "model life insurance company".

... Every month since its organization in 1929, ... Country Life has shown amazing growth. ...,000,000 insurance in force is the aim for 1934.

...E INVESTMENT OF FUNDS Investment of Country Life funds is ... nearly 94 per cent in government, ... and municipal bonds—better than cash. No ... Life investment ever lost a penny.

...LY BEST RISKS ACCEPTED Only persons in good health and normal earning capacity are accepted as ...ks by Country Life. This protects all policyholders ...ke, and builds increased security.

...LOW ...RTALITY In 1933, Country Life's better risks showed a mortality of only 28.8% of the expected, resulting in greater savings to invest for increased security.

...LOW ...PSE RATIO Few policyholders allow their Country Life insurance to lapse. This loyalty assures ...adily mounting strength of the company for the future.

...ENCY OF ...RATION Efficiency and economy is the watchword of Country Life. No high salaries, no ...ky trimmings, to eat up policyholders' funds.

...NSERVATIVE ...FICIENT ...AGEMENT The management of Country Life is conservative, experienced and primarily interested in building the permanent ...model of all life insurance companies".

...NERSHIP The Farm Bureau members of Illinois own ...d operate Country Life Insurance Company. It is co-operative in principle and fact, and the trusted servant ...the farmers of Illinois.

...ERVE FOR ALL TIME

WHAT DO YOU WANT in a LIFE INSURANCE POLICY?

...

The backbone of a life insurance program is the Ordinary or "straight" life policy. It provides the most protection for the least money; assures payment of the face of the policy in cash at death. It has cash value for every year after the third premium, loan values, dividend, and "paid up" insurance features. Parents start their children from the day of birth on this policy.

TE...

Sometimes called the "mortgage policy". It furnishes complete protection at extremely low cost. It is designed to aid those who are in need of temporary, additional protection for a mortgage, note, or similar obligation until times improve. This policy is convertible at any time to any other standard form of insurance. Provides full protection to age 65 if not converted. It also has cash, loan and dividend features.

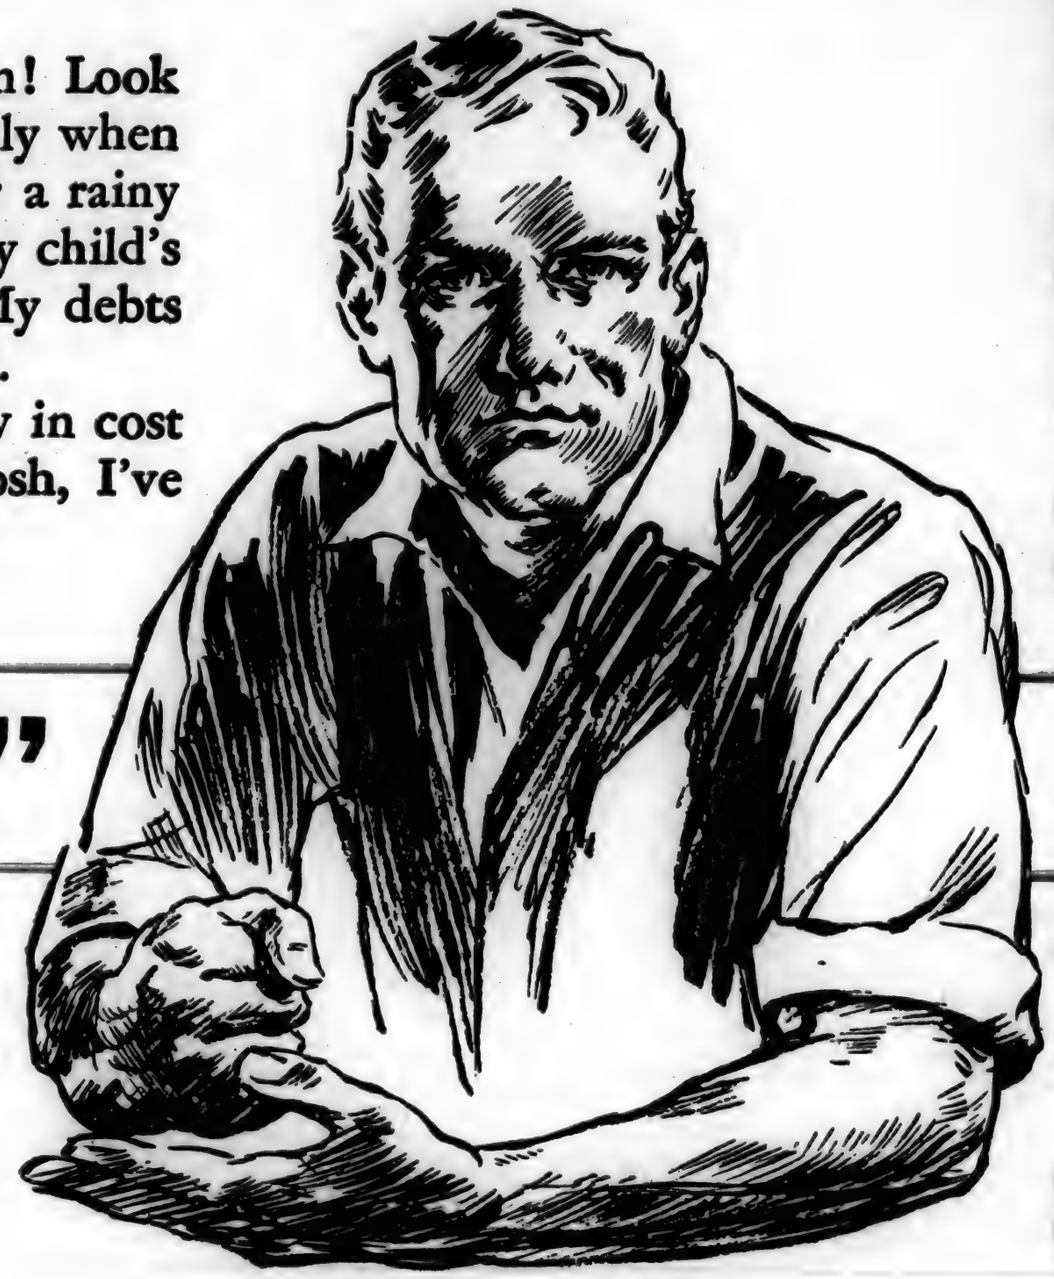
ENDOW...

Thousands of Illinois people are laying the foundation for a happy, independent old age with this "old-age pension" policy. It provides a monthly income for life after 65, plus protection for your family during your earning years. Pays face of policy to loved ones if you are taken from them before policy matures. Has cash, loan and dividend features. A popular policy to insure children from day of birth.

20 PAY L...

This policy is popular with those who desire a low cost paid-up policy during their productive years. You pay premiums for 20 years and have full protection. Then you stop paying but your protection continues. At any time after 20 years the paid-up policy may be surrendered for cash value plus any or all dividends. An excellent way to insure a child from day of birth.

20 YEAR ENDOWMENT PO...



Favorite policy with those who desire to combine protection with a guaranteed investment. Provides for the payment of the face of the policy at the end of 20 years. In the meantime, it also provides face value for your dependents, should you be taken from them. Has cash loan and dividend features. Parents guarantee their child's college education by taking out this policy on a child from the day of birth.

... **FAMILY PROTECTION** **PEACE OF MIND** **INDEP...**

"I'M sending in my application right now. Man! Look what I get! A guaranteed income for my family when I'm gone. A safe, definite way of saving for a rainy day, while I'm still young and producing. My child's education provided for. My mortgage protected. My debts paid. The family homestead fully and wholly owned.

What a financial picture for a man! And so low in cost I can hardly believe it's true. But it is—and by gosh, I've made up my mind!"

"I WILL DO IT TODAY!"

PREMIUM RATES FOR TERM TO 65 PARTICIPATING POLICY FOR $1000 OF INSURANCE

HOW TO START — AT ONCE!

Go at once to your County Farm Bureau office and talk to the Country Life insurance agent about your needs. He will gladly explain all Country Life policies and help you apply for the one of your choice. If you prefer, write direct to the home office,—Country Life Insurance Company, 608 South Dearborn St. Chicago, Illinois.

$1 Starts Your Insurance—Send Your Application TODAY!

SEND US YOUR CREAM

and WE'LL SEND YOU the

Savings As Patronage Dividends

Cream Weighed and Tested by Your Own Tester

NOW you have a chance to share in the profits of processing and distributing your butterfat. Five large co-operative creameries have been organized for you. Already they have raised average butterfat prices throughout the state. They deserve your support.

More than 10,000 cream producers are selling their butterfat through these creameries which they own and control. You too may become a partner in this enterprise.

When you sell co-operatively your cream is weighed and tested by your own tester. You share in patronage dividends paid out of profits from the manufacture and sale of "Prairie Farms" butter.

You become a part owner in a growing plant investment through ownership of dividend-paying preferred stock. You have something to say about the direction and management of your creamery. You have an incentive to deliver higher quality cream because the more 92 score butter your creamery makes, the greater its income and the greater your dividends.

The co-op. way through long experience has been tested and proved to be the sound way, the ideal way for farmers to market their cream.

Send your cream to the nearest producers' creamery. It pays. No worry. No bother. A card will bring a cream truck direct to your farm. Write the creamery nearest you or see your County Farm Bureau.

"Butter Your Bread with PRAIRIE FARMS Butter"

$100,000,000 MORE FOR 12 PER CENT LESS HOGS

$100,000,000 more for 12 per cent less hogs. That's what meat packers operating federally inspected plants paid during the first eight months of 1934 compared with payments the first eight months of 1933.

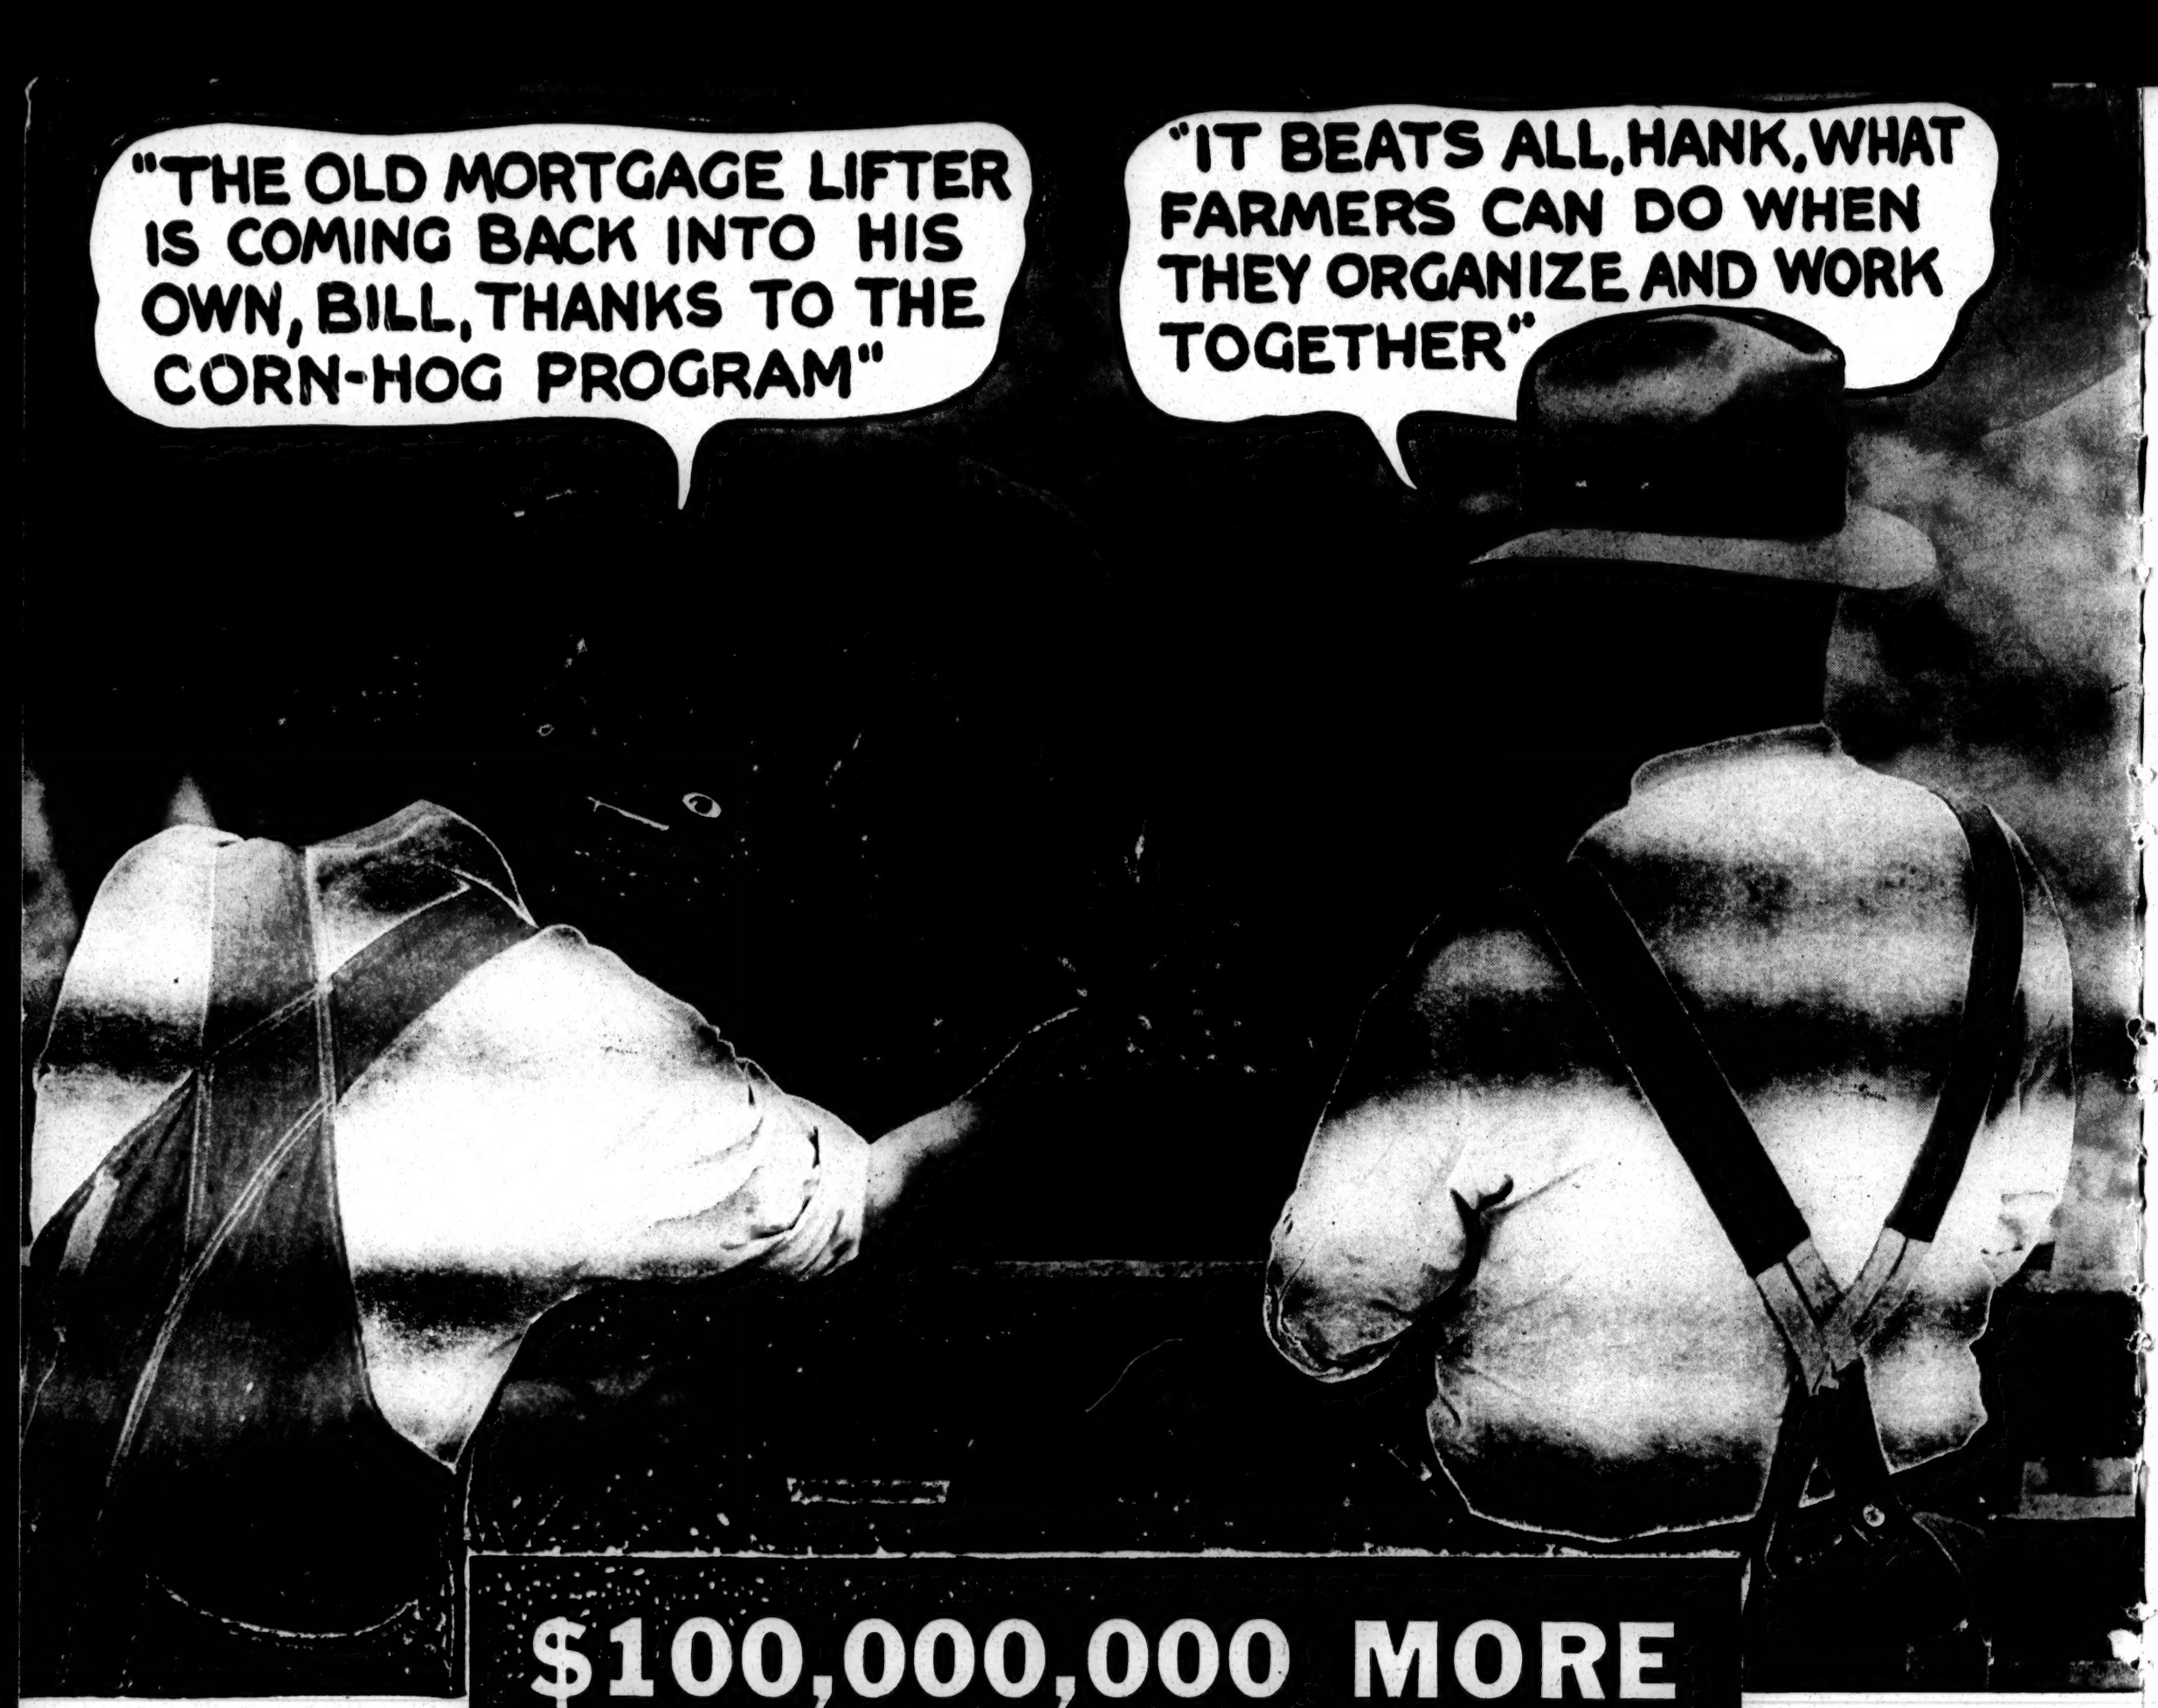
Who got the money? Farmers got it.

How did it happen? Organized farmers made it happen.

Farm income this year is estimated at 20 per cent higher than last year, 40 per cent in excess of 1932.

These gains are the result of farmers working together . . . made possible by effective legislation.

THE rise in farm prices began with initiation of crop control and dollar devaluation sponsored by the Farm Bureau. Three million farmers organized into county production control associations joined hands in the drive to restore farm buying power. Never before has co-operation been practiced on so wide a scale.



WHAT'S ahead for agriculture in the next 10 years or more, is now the concern of all thinking farmers. Shall the forces which always have opposed constructive farm measures prevail? Or shall farmers through organization assure the continuance and perfection of those policies designed to restore farm prices and protect the interests of agriculture? Times and policies change. What's true today may not be true tomorrow.

THE powerful voice of organized thousands must be ready for action when action is needed. The Farm Bureau is the rallying point for continuing agricultural policies of government toward helpful ends.

Illinois farmers can work most effectively through membership in the Farm Bureau and Illinois Agricultural Association. Is your neighbor enlisted in the fight for farm equality? If not, urge him to join.
